CONFIRMATIONS

Executive nominations confirmed by the Senate April 4, 1990:

DEPARTMENT OF THE TREASURY

TIMOTHY RYAN, OF VIRIGINA, TO BE DIRECTOR OF THE OFFICE OF THRIFT SUPERVISION FOR A TERM OF 5 YEARS.

DEPARTMENT OF JUSTICE

ROBERT W. SWEET, JR., OF VIRGINIA, TO BE ADMINISTRATOR OF THE OFFICE OF JUVENILE JUSTICE AND DELINQUENCY PREVENTION.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

JO ANNE B. BARNHART, OF DELAWARE, TO BE ASSISTANT SECRETARY FOR FAMILY SUPPORT, DEPARTMENT OF HEALTH AND HUMAN SERVICES.

COMMUNICATIONS SATELLITE CORPORATION

JAMES B. EDWARDS, OF SOUTH CAROLINA, TO BE A MEMBER OF THE BOARD OF DIRECTORS OF THE COMMUNICATIONS SATELLITE CORPORATION UNTIL THE DATE OF THE ANNUAL MEETING OF THE CORPORATION IN 1990.

JAMES B. EDWARDS, OF SOUTH CAROLINA, TO BE A MEMBER OF THE BOARD OF DIRECTORS OF THE COMMUNICATIONS SATELLITE CORPORATION UNTIL THE DATE OF THE ANNUAL MEETING OF THE CORPORATION IN 1993.

EXECUTIVE OFFICE OF THE PRESIDENT

THE FOLLOWING-NAMED PERSON TO BE AN ASSOCIATE DIRECTOR OF THE OFFICE OF SCIENCE AND TECHNOLOGY POLICY: WILLIAM D. PHILLIPS, OF MISSOURI.

THE FOLLOWING-NAMED PERSON TO BE AN ASSOCIATE DIRECTOR OF THE OFFICE OF SCIENCE AND TECHNOLOGY POLICY:

EUGENE WONG, OF CALIFORNIA.

FEDERAL MARITIME COMMISSION

DONALD ROBERT QUARTEL, JR., OF FLORIDA, TO BE A FEDERAL MARITIME COMMISSIONER FOR THE TERM EXPIRING JUNE 30, 1994.

CORPORATION FOR PUBLIC BROADCASTING

HENRY J. CAUTHEN, OF SOUTH CAROLINA, TO BE A MEMBER OF THE BOARD OF DIRECTORS OF THE CORPORATION FOR PUBLIC BROADCASTING FOR A TERM EXPIRING MARCH 1, 1994.

LLOYD KAISER, OF PENNSYLVANIA, TO BE A MEMBER OF THE BOARD OF DIRECTORS OF THE CORPORATION FOR PUBLIC BROADCASTING FOR A TERM EXPIRING MARCH 1, 1994.

DEPARTMENT OF COMMERCE

ROBERT MARSHALL WHITE, OF MINNESOTA, TO BE UNDER SECRETARY OF COMMERCE FOR TECHNOLOGY.

FEDERAL RESERVE SYSTEM

EDWARD W. KELLEY, JR., OF TEXAS, TO BE A MEMBER OF THE BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM FOR A TERM OF 14 YEARS FROM FEBRUARY 1, 1990.

NATIONAL CREDIT UNION ADMINISTRATION

ROBERT H. SWAN, OF UTAH, TO BE A MEMBER OF THE NATIONAL CREDIT UNION ADMINISTRATION BOARD FOR THE TERM OF 6 YEARS EXPIRING AUGUST 2, 1995.

THE ABOVE NOMINATIONS WERE APPROVED SUBJECT TO THE NOMINEES' COMMITMENT TO RESPOND TO REQUESTS TO APPEAR AND TESTIFY BEFORE ANY DULY CONSTITUTED COMMITTEE OF THE SENATE.

IN THE COAST GUARD

THE FOLLOWING OFFICERS OF THE U.S. COAST GUARD FOR APPOINTMENT TO THE GRADE OF REAR ADMIRAL:

ROBERT E. KRAMEK
RONALD M. POLANT
WILLIAM P. LEAHY, JR.
JOEL D. SIPES
RICHARD D. APPELBAUM

THE FOLLOWING OFFICERS OF THE U.S. COAST GUARD FOR APPOINTMENT TO THE GRADE OF REAR ADMIRAL (LOWER HALF):

GREGORY A. PENINGTON
PAUL E. VERSAW
WILLIAM C. DONNELL
KENT H. WILLIAMS
JAMES M. LOY

NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION

NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION NOMINATIONS BEGINNING JAMES A. YEAGER, AND ENDING JAMES L. YEATTS, JR., WHICH NOMINATIONS WERE RECEIVED BY THE SENATE AND APPEARED IN THE CONGRESSIONAL RECORD ON JANUARY 23, 1990.

IN THE COAST GUARD

COAST GUARD NOMINATIONS BEGINNING AUBREY W. BOGLE, AND ENDING DAVID P. DANGELO, WHICH NOMINATIONS WERE RECEIVED BY THE SENATE AND APPEARED IN THE CONGRESSIONAL RECORD ON MARCH 5, 1990.

EXTENSIONS OF REMARKS

BREAKING DOWN THE JAPANESE TRADE BARRIERS

HON. JOHN D. DINGELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. DINGELL. Mr. Speaker, I am taking this opportunity to call the attention of my colleagues to a recent editorial by Eliot Janeway entitled, "Chipping Away At Trade Barriers: U.S. and Japan Can Avoid a Trade War," which appeared in the January 26 edition of the Detroit Free Press. In the column, Mr. Janeway discusses the current state of our country's economic relationship with Japan, and addresses alternatives to confront the United States trade debt.

In light of the ongoing trade negotiations between the United States and Japan, Mr. Janeway's comments are insightful and extremely noteworthy. Mr. Janeway points out the urgent need for breaking down the trade barriers between the United States and Japan. He calls on the administration to negotiate from a position of strength, rather than one of weakness. I share Mr. Janeway's views. In order for the United States to come out a winner in negotiations, Washington must confront Tokyo with a comprehensive trade package that will provide the strength of improving our position in the international marketplace with the wisdom of reducing the trade tensions between our two great nations.

I also submit for the RECORD another editorial entitled, "Washington Sleeps While Japan Demonstrates that It Controls the U.S. Treasury, Economy," in which Mr. Janeway addresses Japan's hold on the United States market. Given the importance of this matter, I strongly urge that all Members of Congress take the time to review these columns.

The articles follow:

CHIPPING AWAY AT TRADE BARRIERS: UNITED STATES AND JAPAN CAN AVOID A TRADE WAR

"The Japan That Can Say No" is the title of a best-seller recently published in Tokyo. The brass-knuckled founding father and chairman of Sony Corp., the giant electronics manufacturer, teamed up with a chauvinistic member of the Diet, Japan's parliament, to coauthor it; Akio Morita, a geriatric (92-year-old) Japanese version of Donald Trump, and Shintaro Ishihara lead the chorus attracting audiences to its renditions of "Remember Pearl Harbor."

Suspicions that Japan may be riding for a fall have been kindled by the strategy behind "The Japan That Can Say No." It bars U.S publishers from bidding for American rights to the book. Its coauthors want American opinion demoralized by a second Pearl Harbor that would paralyze the U.S. economy. Their goal is to press the Japanese government to declare the economic war their book outlines against the United States.

Japan's destruction of the U.S. computer chip industry, vital to all industrial operations today, has armed the Japanese with their bombshell: the exploitation of a future Soviet-U.S. military confrontation by withholding chips from the United States and providing them to the Red Army. No one in Washington has yet asked Morita how many Sonys he sells for ready cash in the Soviet Union.

To the echo of this bellicose bluster from Tokyo came a terse announcement, unadorned by any fringe opinionating, that Japan is now producing automobiles at the rate of 8 million a year. Meanwhile, U.S. car sales slumped last year. If fourth-quarter 1989 sales figures are annualized, domestic manufacturers can expect to sell only 5.3 million cars this year.

The Japanese auto manufacturers' entry into the luxury brackets of the U.S. market reveals their new dependence on U.S. affluence. This pitch to freewheeling U.S. spenders may prove as badly timed as the bet that the American auto industry made on the small car after the price of oil came down after the OPEC oil embargo ended and U.S. car buyers raised their sights on their model preferences U.S. consumers seem to be more austerity minded today, and a large Japanese car will not fit into their budgets.

The world's other markets combined cannot begin to absorb this much Japanese capacity, nor can Japan's domestic market—certainly not for big cars. Japanese auto manufacturers have been right in advertising exports as the basis of their extraordinary expansion. Europe is the alternative continental market, but Europe's auto plants are over capacity, and more mergers are in the air. While the advent of the European Common Market in 1992 will mandate free trade among EEC countries, it will present a more protectionist front to the outside world than Japan currently does, and Japan already has learned this lesson the hard way. Tokyo has been pressing to expand trade within Europe to no avail.

Japan's need to sell cars—especially bigger cars—to the United States puts one cold-turkey proposition to Tokyo and a related one to Washington: Enjoy a boom with Japan or say no to Japan. The United States would be better off doing the latter, and really well off doing the former.

The troubled verdict of the New York and Tokyo markets shows that that alternative is easier said than done. The market malaise in both centers suggests that a head-to-head confrontation is more likely; sooner rather than later.

Plain talk to avoid complicated tangles is overdue. It's time to talk about fundamentals.

Japan's big shots have not bothered to grasp the workings of the American scheme of things. Admittedly, the American system is not only complicated but elusive. But as all Americans are brought up to know, this quirk reflects the strength of the system. It was designed and remains committed to dividing centers of power, not to concentrating them. To mentalities disciplined by the authoritarian Japanese system, the American substitute for an efficient chain of command is irresponsible and inexcusable. Yet it works.

Meanwhile, the relatively trivial issue of fees paid to U.S. political operatives is a misunderstanding that is festering into a grievance. The Japanese labor under the quaint misimpression that the Washington counterparts of Tokyo's power centers make the decisions in this country—and make them stick. They also expect their money's worth. In Washington, they have hired every eligible fee receiver (or available spouse).

Japanese management also labors under the impression that Reagan administration has been will operate like born-again live wires to influence the Bush administration and especially Congress! Their frustrations with Washington invite their conclusion that paying off a lobbyist to be Mr. Nice Guy doesn't pay in the U.S. capital as it does elsewhere, and that the time has come to teach U.S. officialdom a lesson. The Japanese believe that they have not only won a mandate but ensured it with their hirings of lobbyists to write their own trade tickets without submitting to negotiations over quotas.

This bad blood means not that civic virtue reigns in Washington, only that the Japanese have not figured out how the system works.

A more complacent form of Japanese logic may prove more provocative than rhetoric recalling Pearl Harbor. Japanese thinking assumes that American business and labor have accepted a challenge to fair competition on a level playing field, and have lost. Therefore, it concludes, the United States is obligated to concede defeat with good grace, and to adjust to a subordinate role.

America's answers can be terse and tough: The fight was fixed; the Japanese government did the dirty work for Japanese business; the American government provided the cover-up. Talk about Pearl Harbor can boomerang. Pearl Harbor angered the United States into fighting back, but the first U.S. counterattack was not to mobilize troops to shoot weapons. It activated plants to produce them. Auto plants in Detroit led the charge. A free union the (UAW) inspired the strategy, not by singing company songs in plant yards before dawn, but by persuading President Franklin D. Roosevelt to convert the auto plants to war production. The United States won the war of production before it started to fight a war for victory.

The U.S. victory devastated Japan. Nevertheless, the United States made an extra effort to understand Japan's special institutions and defer to them. Hence the unpopular decision to permit Japan to console itself in defeat by keeping the emperor.

On a fair playing field, with each government backing up its own economy, the broad terms of a cease-fire come into focus. The U.S. auto industry is a bedrock American institution, and the country will not permit any occupant of the Oval Office to preside over its liquidation in the wake of so many American industries that have either become extinct or branches of foreign groups. The simple device of limiting car imports in general—and Japanese car imports

● This "bullet" symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.

in particular—to a marginal percentage of total U.S. car sales will give the Japanese establishment an incentive to maximize its economic activity on which U.S. auto sales swing. U.S. car sales can suffer when the economy holds. But if the economy rises, U.S. car sales will follow.

The United States needs to rebuild its computer chip industry. In return for granting Japanese chips a negotiated quota in the U.S. chip market, Washington should hold out for a capital contribution to an effort to revive the U.S. chip industry. Such an investment would reassure corporate America that the United States is finally beginning to compete for its own market, and help corporate investors overcome their failure of nerve that led them to veto a purely American effort just attempted by a California consortium.

The United States can afford to respect Japan's right to remain protectionist, provided Japan pays cash for the privilege. Why not invite Japan to help finance the U.S. deficit Japan also could pick up part of the $500-billion tab for the S&L debacle. True, Japanese money is already the biggest market buyer of U.S. Treasury paper, but the trick is to avoid a conventional loan-for-interest deal.

Instead Washington should invite Tokyo to buy zero-coupon bonds (jumbo savings bonds, tailor-made for big shots), familiar to Japanese investors. In the 1960s, Japan bought unmarketable U.S. Treasuries and will do so again if it buys continued access to U.S. markets. Japanese ownership of Treasury "non-marketables" would free the government, markets and the economy from the nightmare that a Japanese decision to dump Treasuries might break the bond market and drive U.S. interest rates sky-high during a business downturn.

Eliminating interest payments now bleeding the Treasury would have the same effect as balancing the budget. The lift to the U.S. economy, beginning with a drop in U.S. interest rates, would leave room for good neighbors to live happily and breathe freely again, no longer troubled by ghosts of Pearl Harbor.

WASHINGTON SLEEPS WHILE JAPAN DEMONSTRATES THAT IT CONTROLS THE U.S. TREASURY, ECONOMY

Japan has mounted a shrewd and tough counterattack against the Bush administration's drive to open the Japanese market to U.S. products. Tokyo's playmakers are putting a pincer play on this country's Achilles' heel: its debt.

U.S. debt—by no means only governmental—has reflected the growth of America's market-place vulnerability, and therefore, of her susceptibility to political pressure from creditors. U.S. debt inflation also has facilitated the consolidation of Japanese financial power. Japan has emerged as the United States' lead banker.

But congratulations to Japanese manufacturers on their U.S. marketing success with autos, TV sets and the rest are misconceived. Japan's trade surplus with the U.S. corresponds roughly with borrowing by our banks from Japanese banks. Japan has bought its ability to sell here through its own power to lend.

Japan's counterattack is thus an exercise in jujitsu—and public relations. It's warning from our No. 1 banker to stop pressing for a better balance in trade if the U.S. government wants to continue borrowing to cover our deficit.

Washington trusts free markets as firmly and naively as it does free trade, and Tokyo has nurtured this illusion. Result: Market forces politically orchestrated in Tokyo are squeezing the U.S. Treasury in New York.

Long-term money (10-year bonds) had for years gone begging in Japan at 2½ percent, while America's need to borrow produced rates of 8½ percent and higher. The Japanese financial institutions cashed in on the rich spread, borrowing cheap money in their home market in order to relend it back to the U.S. Treasury at better than a 300 percent mark-up.

The game was good so long as the price was right, but suddenly the Tokyo rate for long-term money has jumped to 7 percent. No market forces could naturally engineer such a breath-taking switch. Only a central command could have made and transmitted this decision. Only a disciplined corps of market operatives could execute it in unison.

Because of the hike in Tokyo's interest rate, the U.S. Treasury can no longer count on the Japanese to finance the U.S. deficit as a matter of good business; and more ominous still, the United States is now on notice from the market that its treasury is in pawn to Tokyo's decision makers.

The decision to triple rates runs counter to the prevailing forces at work in Japanese credit markets. For months, Japan's export-dependent economy has recorded a downtrend, measured by its trade surplus which swings on its surplus with the United States. Normal credit policy, therefore, called for official encouragement to lower interest rates—especially in transactions that affect Japan's ability to continue lending to the United States.

The timing of the Tokyo pincer-play also was revealing. It coincided with uncertainty over the outcome of the large U.S. Treasury refunding operation, where bondholders are asked to re-subscribe, scheduled for early February. That prompted paranoid U.S. market speculation over whether Tokyo's calculated jump in long-term rates was a prelude to Japanese rejection of the Treasury offer to re-subscribe.

The New York market got the message, as interest rates went up and the bond market fell, although Washington policymakers do not seem to have focused on it, yet. The movers and shakers in West Germany are distracted by pressures closer to home, but they got the message, too. It came just when fears of inflation, kindled by immigration from East Germany pushed their long-term rates up. Consequently they moved to the sidelines, waiting to see how fast and how high U.S. long-term interest rates would be notched up.

But Japanese participants in the Treasury auction did not follow up on the threat that they might not purchase bonds. Instead, they dramatized it by cutting their bids from the customary 30 percent of the total to 20 percent—a slice of one-third. Hence the unsettling, unfamiliar spectacle of long-term interest rates hardening while the U.S. economy softens. The parallel with slow water torture is unmistakable.

Tokyo's governmental directive to Japanese financial institutions is similar, as it calls for continuing to subscribe to U.S. Treasury bonds, but at a reduced pace. Although the narrowed spread between paying the 7 percent in Tokyo and collecting 8½ percent in New York hardly pays, it certainly isn't worth taking when weighed against the danger that the weakened U.S. economy might drag the dollar down with it. A double-digit drop in the dollar would more than wipe out this meager interest rate spread.

In a Jan. 28 column in the Free Press, I advocated a new Washington approach to Tokyo, one that would assure Japanese manufacturers of continued access to the U.S. marketplace, but would require Japanese financial institutions to invest on a reciprocal basis. I suggested offering them fair market consideration in the form of zero-coupon (jumbo savings) bonds (which Japanese investors own in abundance) for waiving U.S. interest payments. The thrust of my suggestion called for the United States to offer Japan a balance of payments formula for a balance of trade deal.

In the meantime, while Washington slept, Tokyo has stolen yet another march, imposing a payments ultimatum on the United States as Japan's condition for avoiding comprehensive trade negotiations.

IN MEMORY OF JOE SEWELL

HON. CLAUDE HARRIS

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. HARRIS. Mr. Speaker, on March 6, baseball lost a legend; my alma mater, the University of Alabama, lost a great alumnus; and I lost a personal friend, Mr. Joe Sewell.

Those who follow baseball know that he was a member of the Hall of Fame. They know that in his 14 years with the major leagues he set records which still stand: Fewest strikeouts in a season, three—twice; most consecutive games without a strikeout, 115; most consecutive at bats without a strikeout, 437. They know he played on two world championship teams, the 1920 Cleveland Indians and the 1932 New York Yankees. A friend of Lou Gehrig and Babe Ruth, he became a manager and scout for the Cleveland organization for many years following his retirement as a player.

At the University of Alabama, Joe Sewell was, at the time of his death, the oldest letterman, for football though, rather than baseball. Baseball was always his first love and at the university he was the star of teams which won four straight Southern Intercollegiate Athletic Association championships. Of football he said, "My last day of football was the best day of my life."

Joe Sewell later coached Alabama's collegiate baseball teams, and at age 70 he led Alabama to the 1968 Southeastern Conference Championship. His influence on young athletes will continue for years as they draw upon lessons he instilled and the inspiration which he passed along as he recounted his association with baseball's other legends.

Mr. Speaker, Joe Sewell was a modest man, despite his many outstanding accomplishments. In both those accomplishments and in his modesty he set an example which all of us would do well to follow. Speaking for myself, my alma mater, and, I am sure, speaking for all who love baseball, we are grateful to have known Joe Sewell, and mourn his passing.

HONORING JEFFREY WALDHOFF

HON. TERRY L. BRUCE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. BRUCE. Mr. Speaker, I rise today to honor Mr. Jeffrey Waldhoff, a high school student from Shumway, IL, who recently won the National Good Citizen Award from the Daughters of the American Revolution. For a 17-year-old student at Beecher City High School, national recognition is truly exceptional and I am delighted to commend his distinguished achievement.

The contest included students from 9,124 high schools from across the country who were nominated according to scholastic honors, leadership, citizenship, community service, and patriotism. The nominees competed by composing an essay on the topic, "Our American Heritage and My Responsibility To Preserve It," within 2 hours.

Jeff took the opportunity to describe several national treasures, such as the freedoms of expression and thought, scientific and technological innovations, and our democratic form of government and Bill of Rights, which distinguish the United States from other countries. In his essay, Jeff discussed the importance of these national characteristics and the danger of losing them.

I am proud to see that Jeff's many accomplishments have been recognized. Not only is he valedictorian of his class and the winner of a total of six varsity letters in baseball and basketball, but his long list of extracurricular activities reflects his varied interests and contributions to his community.

As a member of the Scholastic Bowl team, Jeff has won first place on the all-conference honor team for the past 3 years. He also demonstrates civic responsibility by serving as senior class student council representative and council president.

Additionally, he currently presides as president of the National Honor Society chapter, Vice President of Effingham County Snowball chapter and treasurer of the Math and Science Club. His club memberships include the Spanish Club, the Drama Club, the Varsity Club, and a teenage drug and alcohol abuse prevention group.

On April 18, 1990, Jeffrey Waldhoff will receive the national award at the Daughters of the American Revolution's national convention here in Washington, DC. I look forward to seeing him then and personally congratulating him upon his outstanding achievement.

Today, I would like to thank him for his valuable contributions to the 19th Congressional District of Illinois. I am certain that this award is an indicator of many future accomplishments as he continues his education on a 4-year tuition scholarship at Eastern Illinois University in Charleston, IL.

INTRODUCTION OF A BILL COMMISSIONING A SET OF ENGRAVINGS IN CELEBRATION OF THE 500TH ANNIVERSARY OF THE DISCOVERY OF AMERICA BY CHRISTOPHER COLUMBUS

HON. MARGE ROUKEMA

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mrs. ROUKEMA. Mr. Speaker, it gives me great pleasure to introduce this bill today which authorizes the preparation of a series of engravings to commemorate the 500th anniversary of the discovery of America by Christopher Columbus.

This legislation, however, is much more than a commemorative. The series of engravings which will be created according to this bill will be based on a series of engravings commissioned by Congress for the 400th anniversary of America. As part of the festivities surrounding that event, Congress in 1892 commissioned the artist M.S. Tobin to create a series of engravings from which prints were made and displayed during the Columbian exposition of that same year. This legislation, then, has a great deal of historic significance and will serve as a link to the celebrations which took place 100 years ago.

I wish to thank my colleague, the distinguished gentleman from Illinois [Mr. ANNUNZIO] for his support and assistance in introducing this bill and all the members of the Italian-American Foundation who joined me as original cosponsors and for their work in organizing and promoting the festivities for the National Christopher Columbus 1992 Celebration. This celebration will not only commemorate the achievements of Christopher Columbus, but will celebrate the many contributions that Italian-Americans have made to our culture over the centuries since Columbus discovered America.

I also want to thank Mr. Sebastian Gaetta, a constituent of mine from Wyckoff, NJ, for bringing to my attention the works of M.S. Tobin and others that were commissioned by Congress as a part of the Columbian Exposition of 1892.

This bill to create a series of engravings depicting the discovery of America, along with several other pieces of legislation pertaining to the 500th anniversary of the discovery of America by Christopher Columbus, will surely make for a richer and more rewarding celebration in 1992.

Because of the historic and artistic significance of the works commissioned by Congress 100 years ago, I urge my colleagues to support this legislation to create a new set of engravings building upon those works as a fitting way to celebrate the discovery of America 500 years ago.

TRIBUTE TO JUNE BINGHAM

HON. TED WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. WEISS. Mr. Speaker, I would like to share with my colleagues the following article from the New York Times describing the Trained Liaison Comforter Program at the Columbia-Presbyterian Medical Center. June Bingham, the wife of our late colleague, Representative Jonathan Bingham, recently created the T.L.C. program there to aid and comfort the friends and family of critically ill patients.

Inspired by her experience during the death of her husband in the intensive care unit in 1986, June Bingham established a corps of volunteers known as T.L.C's to make potentially frightening and confusing visits to the hospital much less traumatic. T.L.C. volunteers explain medical procedures, run errands, and generally provide greatly needed emotional support—tender loving care—to patients' loved ones during difficult times.

June is now married to Robert Birge, who was a classmate of Jack Bingham at Yale. Mr. Birge was also the first T.L.C. volunteer to report for duty.

I strongly recommend to my colleagues the following article on the T.L.C. program, which serves as a fitting living memorial to our dear friend Jack Bingham.

[From the New York Times, Feb. 5, 1990]

FOR FAMILIES OF THE CRITICALLY ILL, A DOSE OF T.L.C.

(By Kathleen Teltsch)

When her husband, former Representative Jonathan Bingham, lay dying in an intensive care unit at the Columbia-Presbyterian Medical Center nearly four years ago, June Bingham, was at his bedside every day and observed that many other gravely ill patients were all alone—forsaken by loved ones who found the visits frightening and confusing.

Acting on her concern, Mrs. Bingham has established a corps of volunteers at the medical center to explain medical procedures, run errands, provide a sympathetic ear and otherwise comfort the families and friends of the critically ill. Their mission, she said, "is to diffuse the anxiety."

The volunteers, known as the Trained Liaison Comforters or T.L.C's, will begin operating at the medical center today, providing what most people think of when they hear the group's initials, tender loving care. "Hand-holding has a noble tradition in medicine," said Dr. Philip B. Muskin, a psychiatrist who is co-director of the program.

"Volunteers can do such seemingly small but highly meaningful things as handing a family visitor a cup of coffee or reminding them to eat," Dr. Muskin said. "For families, for example facing the death of a parent, there has to be someone who will say to the couple already experiencing grief: 'It's all right for you to leave and to take some time together and not feel guilty. We will call you.' "

INFORMATION AND SUPPORT

While many hospitals offer services for patients' families, the T.L.C. project has brought together a social worker, an educa-

tional program and trained volunteers to provide information and emotional support.

"I don't know of any similar program that provides this kind of service," said Susan Watson, the executive director of the Foundation for Critical Care, an organization based in Washington that promotes quality health care.

The volunteers, who will be on duty in four-hour shifts during daily visiting hours, are not intended as substitutes for physicians, nurses, psychiatrists or social workers. But while the professional staff focuses on the patients' needs, the volunteers will concentrate on helping the patients' family members and friends.

A trained counselor will be available to help family members deal with financial hardship and other problems that can arise when the patient is the family's primary breadwinner.

To ease the shock of seeing patients tethered by tubes to monitoring devices and life-support equipment, the volunteers will offer a videotaped educational program that was produced with financing from the United Hospital Fund, a philanthropic organization that supports health-care institutions in New York City.

Mrs. Bingham is a medical writer, playwright and the author of a biography of U Thant, the former Secretary General of the United Nations. In developing the T.L.C. concept, she has drawn upon her own experiences in intensive care units as a patient and in caring for her husband, Congressman Bingham, who was also a former United States Ambassador to the United Nations. He died of pulmonary complications in July 1986.

"Visitors come into the intensive care unit and it is a rude shock when, instead of the patient's face, they see only blue tubes or they hear the rasping sound of a respirator," she said.

Mrs. Bingham has written a brochure that will be given to visitors to the intensive care unit. Called "You and the I.C.U.," it offers insights and advice like: "The hardest thing is the emotional roller coaster, with one day full of hope and the next, despair. It's important to share your feelings with family or friends—or with the T.L.C. volunteers who have been trained to be there for you."

The project will begin with eight volunteers, but the hospital hopes to recruit more—especially those who speak Spanish. Forty percent of the medical center's patients come from the largely Hispanic neighborhoods of upper Manhattan.

"If it flies—and I'm sure it will—we will try to see it adopted by hospitals around the country," Ms. Watson of the Foundation for Critical Care said.

ST. RITA'S CHURCH OF ALEXANDRIA, VA, CELEBRATES 75TH ANNIVERSARY

HON. STAN PARRIS

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. PARRIS. Mr. Speaker, it is with great pleasure that I insert in the RECORD today a letter from Joseph E. O'Leary celebrating the 75th anniversary of St. Rita's church located at 3815 Russell Road in Alexandria, VA.

This church has been known perhaps for its architectural beauty, but it is better known for its close knit family of parishioners and the generous contributions it has made to the Alexandria community.

Seventy-five years ago, St. Rita's held its first mass in a cobblers shop. On April 29, at 4 p.m., after years of service and witness to others, St. Rita's is celebrating its anniversary by dedicating the Diamond Jubilee Memorial Pipe Organ. This magnificent instrument was acquired through the dedicated efforts of The Diamond Jubilee Committee of St. Rita's Parish. The dedication service is open to all.

Mr. Speaker, I ask that the letter from Colonel O'Leary, which describes the efforts of St. Rita's be included at this point in the RECORD.

ST. RITA'S CHURCH,
Alexandria, VA, April 3, 1990.

Hon. STAN PARRIS,
House of Representatives,
Washington, DC.

DEAR CONGRESSMAN PARRIS: St. Rita's Catholic Church of Alexandria, Virginia, has just celebrated the 75th anniversary of the laying of the cornerstone for its original building and to recognize this milestone, will dedicate the Diamond Jubilee memorial Pipe Organ on Sunday April 29, 1990 at 4:00 PM.

Since the first mass was celebrated in a cobblers shop in Alexandria so long ago, much has been accomplished. Memories have been made. Our children have been baptized here, attended school here, married here, moved away and even returned. In the spirit of the Risen Lord, along with traditional values we have always known, we are today, witnessing a renaissance of inspiration and even more meaningful liturgies.

The parishioners reflected on the sacrifices made by those who made possible the magnificent Gothic designed building which we all enjoy. We felt privileged to enjoy the fruits of their effort and we accepted the responsibility to those who had advanced this effort to see that it was completed as planned. This challenge manifested itself in the installation of a pipe organ and the establishment of a maintenance fund to ensure that this monument will endure.

To accomplish these tasks a Diamond Jubilee Committee was formed. We established a goal and defined specific tasks. Included was a program for Individual and Corporate Solicitation; an Arts and Antique Auction; a fun filled Fiesta; an Automobile raffle; a grant search; and a select group to meet and visit pipe organ manufacturers throughout the land to insure we were getting the right instrument at the best price. There was something for everyone to do and with everyone's help the goal has been reached.

So now its done. To that we say Amen. Many people worked very hard and gave generously of their time and treasure. They all deserve our thanks. God knows of their efforts to enhance his house and each in a special way will be rewarded. We all take great comfort in this knowledge because that's really what its all about.

Everyone is invited to celebrate with us, and we hope that you can attend.

Sincerely,

JOSEPH E. O'LEARY,
Chairman, Diamond Jubilee Committee.

THE POLITICS OF THE PEACE DIVIDEND

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. DORNAN of California. Mr. Speaker, the Congress continues to discuss the tremendous changes that are taking place in the Soviet Union and Eastern Europe and speculates on their implications for the shape of U.S. national security programs. One implication of the reform movement in the Soviet Union is the effect glasnost is having on the defense debate in the United States.

Many Members of Congress, supported by the dominant media culture, have declared a peace dividend. This peace dividend is the result of the proposed major cuts in the U.S. defense budget. Many of these cuts are directly related solely to Soviet pronouncements of its intent to scale down its conventional forces. Indeed, while many of Gorbachev's declaratory policies are quite promising and have led to significant cutbacks in some areas of conventional weapons and manpower, the United States has seen little or no slowing in Soviet strategic programs.

Further, the movement toward democratic freedom in the Soviet Union and several of its constituencies is not necessarily irreversible. Rather than declare the cold war over and rush to spend a questionable peace dividend, the United States should maintain its strong national security posture and wait to see how the current Soviet domestic crisis and related independent movements in the Baltic and Eastern Europe are resolved.

In any case, Mr. Speaker, the Congress should not strip our defense budget to fund a welfare program for the Soviet Union as some Members have suggested. If, after the political situation on the Euro-Asian landmass stabilizes somewhat, and the President determines that we can responsibly make deep reductions in our military strength, the so-called peace dividend would be best spent on reducing the deficit—not increasing our foreign aid. In the meantime, the prudent course to follow would be not to strip our defenses, but to defend the American people more effectively. And, the most effective way is investment in strategic defense.

Mr. Speaker, I would like to share with you a column written by my good friend, Pat Buchanan in which he further elaborates on the folly of a peace dividend for the Soviets.

GEPHARDT'S FOLLY: PAY GORBACHEV THE PEACE DIVIDEND

(By Patrick J. Buchanan)

House Majority Leader Dick Gephardt has come up with the most novel idea yet of what Americans should do with any peace dividend from the Cold War. Give it to the Bolsheviks, says he.

"Rather than pour more and more money into weapons systems, we should be investing in our own self-interest," says Gephardt. His idea of US "self-interest"? Start transferring US high-tech to Moscow, use tax dollars to back corporate investments in the Soviet Union, start shipping our Russian friends free grain.

"How can the Soviets pull Red Army troops out of Eastern Europe," asks Gephardt, "if they have no jobs and no homes . . . to return to in Russia?" What, exactly, does that mean? Is HUD now going to build low-cost housing for the Red Army?

Do these congressmen think the wealth of this country is inexhaustible? Some $300 billion in bank loans to Brazil, Argentina and Mexico failed to generate sustained growth. How much would it cost to get the huge and moribund Soviet economy up and running? Even Democrat Sen. Bill Bradley warns Gephardt he may have stumbled into a world-class foreign-aid rathole.

But Gephardt is not alone. Zbigniew Brzezinski, Jimmy Carter's national security adviser, wants the United States to put together a new $25 billion aid package for Central Europe; and the World Bank's Barber Conable, after turning on the foreign aid spigot again for China's Deng Xiaoping is already pushing $5 billion into Eastern Europe.

Too many politicians and journalists seem to think this is 1950 all over again, when we commanded 50 percent of global GNP. But, today, we have powerful challengers for economic primacy; and we cannot afford the kind of nonsense we are hearing on Capitol Hill.

If Gorbachev needs investment capital, he has two fat pots of money to draw on. One is the $5 billion annual subsidy he sends Fidel Castro for use of Cuba as a strategic base camp; the other is the Soviet war machine, which consumes perhaps 20 percent of Soviet GNP.

Instead of telling President Bush to stop "pouring money into weapons systems," Gephardt ought to take a trip to Moscow and tell Gorbachev to use his imagination, and stop pouring his money into weapons systems. After all, the US defense budget, not the Soviet, has fallen every one of the last five years.

There is a lot of ruin in an empire, someone once wrote. While the immense Soviet empire is distintegrating, it is by no means dead.

The Red Army remains intact: the KGB and its East European auxiliaries are all functioning: modernization of the Soviet rocket forces proceeds. Since Moscow's withdrawal, record quantities of Russian arms have poured back into Afghanistan Soviet officers led the attack on Jonas Savimbis UNITA forces in Angola; and Moscow's defense minister sent the MIG-29s to Cuba. If Gorbachev has cash on hand for these investments, let him finance perestroika himself.

From Sweden to Tanzania, From Brazil to Poland, the truth lies before us: Whether Marxist or democratic socialism does not work; no amount of aid can make it work. The vast infusions of Western capital into the communist and Third Worlds—perhaps $2 trillion in 40 years—has but delayed the day of reckoning, deepened the inevitable collapse.

America can't save socialism; and we ought not to try. As with alcoholism there are only two cures, death or cold turkey. In our own national interest, in the interest of mankind, we should let socialism die a natural death, before the new century begins.

As for the Soviet Union, America's first purpose, Gephardt's hopes notwithstanding, is not to see perestroika succeed, it is to see communism fail, and fail utterly; to see that revolting and repressive system overthrown, the KGB abolished, the Red Army dissolved, the missiles scrapped, the Church restored, the people freed.

In World War II, the American Army could have liberated Prague, Vienna, and Berlin. We stopped short. Let's not stop short of victory in the Cold War; and let's not settle for anything less.

A TRIBUTE TO DR. EMORY ROSWELL OWENS

HON. GREG LAUGHLIN

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. LAUGHLIN. Mr. Speaker, I rise today to pay tribute to Dr. Emory Roswell Owens. Dr. Owens retired in 1989, after 50 years in the medical profession serving the people of Waller County, Prairie View A&M University, and the people of the Prairie View community. Dr. Owens has shown his dedication to the people of the Prairie View community by being a selfless servant to the people of this area. To the people of the Waller County area Dr. Owens is a much esteemed community leader. To myself and others he is an example of an individual who has risen from a humble background and has made tremendous strides and accomplishments for his community.

Mr. Speaker, I want to share with you some of the accomplishments of Dr. Owens. He was born and raised in Smithville, TX, and after graduating from Fisk University he enrolled in the physician and surgeon college in Boston, MA, from which he received his medical degree. He came to Prairie View in 1941, and has been practicing there ever since. During this time he was instrumental in establishing excellent student health services for the students of Prairie View A&M University, in addition to contributing greatly to the university.

He also accomplished a number of firsts in his career. Among these are his being appointed health officer for Waller County and becoming the first black named president of the Tri-County Medical Society, another interracial miracle for the period in the sixties. In addition he was appointed by Texas Governor Dolph Brisco to the hospital licensing advisory council in the Texas Navy. In 1988 he was inducted into the Prairie View A&M University sports hall of fame. He is a member of the African Methodist Church and the Alpha Phi Alpha Fraternity in addition to other numerous civic and fraternal organizations. Dr. Owens and his wife Julia are the proud parents of two lovely daughters, Carolyn Marie Westbrook and Rosalyn Eugena Mason. Clearly, Dr. Owens is an example of excellence in his community, and a model for future doctors. He has always exercised the necessary patience, exactness, understanding, and patient surveillance as a dedicated physician. I am proud to bring Dr. Owens' accomplishments to the attention of my colleagues today.

SAFETY BELTS CAN SAVE LIVES AND MONEY

HON. JOHN D. DINGELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. DINGELL. Mr. Speaker, I rise today to make my colleagues aware of a recent announcement by the American Coalition for Traffic Safety [ACTS] that reports on an important development on our Nation's highway system: The last half of the 1980's was the safest period on America's roads since the early 1960's. Further—and perhaps more important—the mileage death rate, the key barometer of safety progress, reached an all-time low of 2.2 fatalities per 100 million miles of vehicle travel in 1989, according to the National Highway Traffic Safety Administration [NHTSA].

There are many reasons for this progress, but an important factor has to be the dramatic increase in safety belt use which was achieved in the mid to late 1980's through the enactment of State safety belt use laws and other activities to promote safety belt use.

In fact, NHTSA reports that from 1983 to 1988, an estimated 15,500 lives were saved by safety belts, with 10,500 of these due to belt use laws.

This is true progress, but more can and must be done to bring about greater use of safety belts so that highway fatalities can continue to be controlled. In this regard, I am pleased to see that a major campaign has been announced in my State of Michigan to encourage the business community to implement safety belt use programs for employees.

The business community has an important but sometimes unrecognized vested interest in increasing safety belt use. The Michigan Coalition for Safety Belt Use points out that automobile crashes are the leading cause of worker absenteeism and the No. 1 cause of on-the-job fatalities, and they also cost employers nationwide $1.9 billion per year.

To generate more support for belt use promotion in the business community in Michigan, the coalition is sponsoring workshops throughout the State in May and June. Gov. James Blanchard is the honorary chairman of this project. Secretary of State Richard Austin, a long-time safety belt use advocate, is the chairman. Keynote speakers at the workshops include labor and business leaders.

Mr. Speaker, I am most hopeful that this Michigan project will produce results in terms of increasing safety belt use and reducing traffic fatalities and injuries. The ACTS announcement shows the gains that have been made, but we need to do more, and the Michigan project is an example of the kind of work that can be done. I attach the following statistics for the benefit of my colleagues:

[Compiled by the Michigan Coalition for Safety Belt Use]

1. Traffic crashes rank as the number one killer of Americans ages 1-44.

2. The probability of being involved in a motor vehicle injury crash during a 75-year lifetime is higher than 86 percent.

3. For every dollar invested to encourage people to buckle up, there is a projected

return of $105.07 in economic savings. This return is more than can be gained by any other health-risk-factor intervention, such as encouraging people not to smoke.

4. Currently, 45.6 percent of front seat occupants in Michigan use their safety belts.

5. In Michigan, more than $750 million is spent each year on medical costs due to the nonuse of safety belts.

6. An average of four people die on Michigan roadways each day due to auto crashes, while over 400 more are injured.

7.Nonuse of safety belts resulted in 546 premature deaths and the loss of 17,736 years of productive working life in Michigan during 1983.

8. In 1988, Michigan averaged 1,123 traffic crashes each day. More than 155,000 persons were injured, crippled, or maimed; and 1,704 people were killed in 1,522 fatal crashes.

9. Auto crashes are the leading cause of worker absenteeism.

10. Auto crashes cost the average employer nearly $120,000 per employee death.

11. Serious injuries caused by auto crashes result in average medical payments of $208,400.

12. More employees are injured or killed on the road than in the plant.

IN MEMORY OF ROY O'NEAL COLEMAN

HON. CLAUDE HARRIS

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. HARRIS. Mr. Speaker, I come before this body today to commemorate the memory of a very fine gentleman from the Seventh District of Alabama.

Mr. Roy O'Neal Coleman, a native of Choctaw County, AL, was a resident of the Little Walker community. He served with the Butler Police Department for 17 years. His knowledge of the law, his kindness and sense of fair play to all persons exemplified the kind of man he was during his brief life on this Earth.

Roy had the respect of his fellow police officers, and was president of the local Fraternal Order of Police at the time of his death in February of this year. He not only served his community with honor as a member of law enforcement, but he was concerned about the youth in the area. He was a Boy Scout leader and coach of a girl's softball team

Officer Coleman served the Little Walker CME Church on the steward board, board of trustees, and as a Sunday School teacher. He was a member of the Masonic Lodge, acting in the capacity of Sirprince.

We are indebted to men like Roy Coleman and the sacrifices they and their families have made in order for them to devote themselves to the many towns and communities of this great Nation.

Mr. Coleman will long be remembered for his selfless devotion, not only to his wife, Mary Alice, and daughters Whitney and Tiffany, but to his job, community, and truly, his country. He will be missed.

INTRODUCTION OF A HOUSE JOINT RESOLUTION DESIGNATING THE MOZART BICENTENNIAL AT THE LINCOLN CENTER IN NEW YORK CITY, NY, AS THE NATIONAL OBSERVANCE OF THE 200TH ANNIVERSARY OF WOLFGANG AMADEUS MOZART'S DEATH

HON. TED WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. WEISS. Mr. Speaker, I am introducing a bill today that designates the Mozart Bicentennial at the Lincoln Center in New York City, NY, as the national observance of the 200th anniversary of Wolfgang Amadeus Mozart's death. I invite my colleagues to join as cosponsors.

Wolfgang Amadeus Mozart (1756–91) stands as one of the greatest musical geniuses in the history of humankind. He began composing at the astonishing age of 5 and composed over 800 works in his tragically short and arduous lifetime. His masterpieces continue to inspire and delight listeners throughout the world.

Mozart's musical legacy will be celebrated in a bicentennial tribute at the Lincoln Center in New York City, NY, from January 1991 through August 1992. This bicentennial celebration will be the first occasion that the composer's complete works have been presented under one auspice. It will encompass over 500 events including concerts, recitals, operas, films, ballets, lectures, scholarly symposia, and educational programs.

The Mozart Bicentennial will serve a broad range of audiences, with activities ranging from free outdoor concerts of Mozart's chamber music; to jazz reinterpretations; to a free exhibition entitled, "Mozart and His Times;" to a Salzburg puppet troupe performing Mozart's operas; to performances by internationally renowned artists, chamber musicians, and orchestras; to films about Mozart; to Mozart programs in schools throughout the region. The celebration will reach a national and international audience through live television and radio broadcasts.

I hope my colleagues will join me and New York's Lincoln Center in commemorating the death of this brilliant and prolific composer by cosponsoring this legislation. Mozart's legacy deserves to be recognized and cherished; the Lincoln Center's bicentennial celebration will do so in a glorious manner.

The resolution is printed below.

H.J. Res. —

Whereas Wolfgang Amadeus Mozart (1756–1791) stands as one of the greatest musical geniuses in the history of humankind;

Whereas Mozart began composing at the astonishing age of five and composed over 800 works in his tragically short and arduous lifetime;

Whereas Mozart's masterpieces continue to inspire and delight listeners throughout the world;

Whereas Mozart's musical legacy will be celebrated in a bicentennial tribute at the Lincoln Center in New York City, New York, from January 1991 through August 1992;

Whereas this Mozart Bicentennial will be the first occasion the composer's complete works have been presented under one auspice;

Whereas the Mozart Bicentennial will encompass over 500 events including concerts, recitals, operas, films, ballets, lectures, scholarly symposia, and educational programs;

Whereas the Mozart Bicentennial will serve a broad range of audiences, with activities ranging from free outdoor concerts of Mozart's chamber music; to jazz reinterpretations; to a free exhibition entitled, "Mozart and His Times;" to a Salzburg puppet troupe performing Mozart's operas; to performances by internationally renowned artists, chamber musicians, and orchestras; to films about Mozart; to Mozart programs in schools throughout the region;

Whereas the Mozart Bicentennial will reach a national and international audience through live television and radio broadcasts; and

Whereas the tribute will be presented by all 11 of the Lincoln Center's resident companies: the Metropolitan Opera, the New York Philharmonic, the New York City Ballet, the New York City Opera, the Chamber Music Society of Lincoln Center, the Juilliard School, the Film Society of Lincoln Center, the Lincoln Center Theater, the School of American Ballet, the New York Public Library at Lincoln Center, and the Lincoln Center for the Performing Arts, Incorporated: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Mozart Bicentennial at the Lincoln Center in New York City, New York, taking place from January 1991 through August 1992, is designated as the National Observance of the 200th anniversary of Wolfgang Amadeus Mozart's death.

INSIGHT INTO OLIVER STONE

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. DORNAN of California. Mr. Speaker, last week the prestigious Academy of Motion Picture Arts and Sciences awarded Oliver Stone an Oscar for his direction of "Born on the Fourth of July." The movie follows a tormented, twisted, and fictionalized tale that loosely approximates Ron Kovic's life. Kovic's story, as directed by his cowriter Stone, is a sad and bitter chronicle of a once very, very dedicated young marine. It is unfortunate that Kovic was paralyzed in an action to save the life of a fellow marine, which is not in the film, but it is more unfortunate that he let himself be used for 18 years by those who continue to destroy the moral fiber of this great Nation.

Mr. Speaker, I would like to share with you two articles in stark contrast to "Born on the Fourth of July." The first is an article published in Human Events which outlines Oliver Stone's fascination with the late Jim Morrison, the tortured lead singer of the sixties rock group, The Doors. The second article, published in the Orange County Register, is the story of Major Blake Morrison, another para-

lyzed vet who took exception to Ron Kovic's tale of woe and self-pity. This former fighter pilot gives us a different view of dealing with personal tragedy; and he hints at God's unique plan for each of us.

WHY DOES OLIVER STONE IDOLIZE JIM MORRISON?

(By John Lofton)

It is important to know who our opinion molders worship. Because, as the Proverbs (23:7) tell us: As a man "thinketh in his heart, so is he." Thus, it is instructive to learn that the movie director who won an Oscar for *Platoon*, Oliver Stone, has told the New York *Times* that he's going to do a film about the late rock star, Jim Morrison, lead singer of the "The Doors."

Stone says: "There's a lot of the bad boy in me . . . I identify with Morrison. He was a shaman. He was a god for me, a Dionysian figure, a poet, a philosopher. I'd like to bring his life out into the light."

Okay. So who, exactly, was Jim Morrison? Well, he was not, to put it mildly, the kind of guy most Americans would probably pick, first, as a "god." Here's what Jerry Hopkins and Daniel Sugerman told us about Morrison in their admiring 1980 biography of him bearing the prophetic title *No One Here Gets Out Alive* (Warner Books):

Morrison was a "revolutionary figure" who told close friends he believed records could serve the same purpose that books and printed manifestos had in earlier revolutions. He devoured the works of the God-hating philosopher Friedrich Nietzsche. And Norman O. Brown's Freudian interpretation that mankind is unconsciously bent on self-destruction is said to have "greatly appealed to him." These authors say of Brown that "images of magic and violence and sex and death ran through his notebooks like a dark river."

Morrison was a drug addict who "gobbled acid tabs like beer nuts, or aspirins." He reportedly said that he took acid 250 times. One woman swears she saw him smoke six ounces of marijuana in one day, "which he managed to do by staying up half the night and chain-smoking bombers as thick as his index finger." On one occasion he said: "If I had a mountain of coke in my backyard, I'd do it—because it was there."

Morrison was a drunk. One classmate of his says: "It was as if he drank only to get drunk." Once, while drunk during a Long Island show, he startled other members of "The Doors" by attempting to take off his clothes on stage. He said of his drinking—which these authors say was his "panacea, the magic potion that answered his needs"—that "it's like . . . I guess it's the difference between suicide and slow capitulation."

Morrison was involved in the occult. A reader of English books on 16th and 17th Century demonology, he wrote about Hieronymous Bosch, the Dutch painter who saw the world as a hell in which we pass through the Devil's digestive system. And, we are told, Morrison's theory was that the artist was "a member of the Adamite sect, a group of medieval heretics."

In addition, he married Patricia Kennely, "an initiated, practicing witch, high priestess of a coven." At their wedding ceremony, the two made small cuts on their wrists and forearms, mixed a few drops of blood into a cup of wine and drank it.

On another occasion, to another woman who it is said "sometimes drank blood," Morrison said, smiling: "Okay, let's you and me drink some right now." As authors Hopkins and Sugerman describe it, here's what happened next:

"She went into the bathroom to search. Moments later she held a blade with one corner barely touching the fleshy pad of her skin where her thumb joined her left hand. She nervously stuck herself, eyes closed. Where she opened her eyes, there was no blood. She closed them and jabbed again. On the fifth stab, blood spurted everywhere and Jim whooped, grabbing a champagne glass to catch it.

"They made love and danced some more, smearing their bodies red. The next morning when he awoke on blood-caked sheets, with dry brown streaks from Ingrid's blood over much of his body, Jim was scared. The paranoia increased."

Morrison was a sex pervert and a pornographer. When, during one concert, he sang a song screaming his desire to have sexual intercourse with his mother, and to kill his father, the owner of the club where they were playing said "The Doors" would never play there again even if they paid to get in.

And when he and a friend made a movie while taking a film course, the authors say it is no surprise that the film featured sexual references, "often ranging over a wide assortment of neuroses, fetishes and abnormalities—from hermaphroditism and necrophilia to masochism, sadism and homosexuality."

At one time, Morrison had 20 paternity suits pending against him. And when his witch wife Patricia aborted their child, which was in its 20th week of growth in the womb, "Jim was not present and did not call."

Had enough? Get the picture?

Now, all we need to know is why Oliver Stone says Jim Morrison was "a god" for him.

Mr. Stone?

PILOT'S STORY: KOVIC AND I TOOK DIFFERENT PATHS

(By Blake Morrison)

I wasn't there in the Nam. Ron Kovic was, but I wasn't. I should have been there, but I couldn't be. Whether I was there is immaterial, really. I speak for my point of view and I do not attempt to speak for anyone else.

Ron Kovic is a brave man and a hero. The film of his story, "Born on the Fourth of July," is well presented although biased. I was struck by how our lives—his and mine—paralleled and how they diverged.

He was paralyzed in combat in Vietnam. I was paralyzed after bailing out of a combat fighter—an F-105 in late 1962 in Germany. Kovic's spine was shattered by a VC bullet; mine, when I crashed through the trees and slammed into the ground. Our losses were similar. We are both permanently confined to a wheelchair. We both received treatment at VA hospitals, his in the Bronx, mine at Long Beach. We are both compensated for our injuries by our government.

Some of the scenes shown in the VA hospital in "Born" brought back memories of my own experiences. Although our injuries happened a few years apart, the treatments had some similarities. I vividly remember the day I was lying flat on my back with a "monkey bar" hanging over my head, and the doctors quietly but firmly and matter-of-factly told me I would never walk again. I remember how I, too, refused to believe it was happening to me. I know what it's like to have to adjust to your worst nightmare. I recall the pain and frustration I had in learning to cope with transferring from the wheelchair to a bed or commode and then trying to get back into the chair. I know the hurt and exhaustion of trying to walk in braces while being supported by parallel bars.

Kovic and I share these memories. We shared bitterness, anger, and frustration at our injuries. We both struck out against God, blaming him.

But what we did not share—and what was particularly repugnant to me—were the ward scenes shown in Oliver Stone's movie. I was in four VA hospitals from 1963 to 1974—during the time Kovic was interned. Although the hospitals were old and the equipment available not the most modern, it worked well. The conditions I observed were nothing like those shown in the film. I never saw giant rats or a rampant cockroach problem. I never saw the filth that prevailed in the film. I never saw spinalcord injured patients allowed to lie in their own urine or feces while an indifferent nursing and hospital staff left them unattended. If those conditions had been allowed to exist in a hospital, virtually all of the patients would have died of staph infections. It is my impression that the truth was stretched beyond credibility by the writers, that situations were grossly embellished for dramatic effect. I don't believe that conditions worse than those that existed in Civil War field hospitals were allowed to exist in a VA hospital.

Anger, frustration, and bitterness are common feelings of all who suffer spinalcord injuries. This happens when reality sets in. It's overwhelming at first to know that you'll never be normal again, that one life is over and another—a different and limited life—lies ahead. Ron Kovic was justifiably bitter about his fate. So was I—up to a point.

Kovic's confrontation with reality during his stay at the VA hospital ignited his anger and started his metamorphosis. He held on to his bitterness, and like a cancer, it fed on his soul and poisoned his perspective. In frustration, he abused his mother. In anger, he turned against his government. The anger turned to hate. He traveled to Mexico to wallow in booze and self-pity. He turned himself on with drugs. He condemned his fellow veterans as "baby killers." He joined the anti-war counterculture and tried, along with the well-heeled, privileged radicals, draft-dodgers, deserters, and anarchists, to bring down his country.

Ron Kovic saw the patriotic parades of his youth and they inspired him to join the Marine Corps. I too got fired up watching these parades when I was young, or seeing a military convoy roll by. But I was also old enough to remember Pearl Harbor, Coventry, Bataan, Auschwitz, and Buchenwald. I joined the Air Force to fly fighters, but also to do what I could to prevent such horrors from occurring again. I still believe in patriotism.

The VA staff helped me come to terms with reality—my permanent confinement to a wheelchair. There was only so much they could do, medically and psychologically. The rest was up to me. I left the Long Beach VA after five months. I was on my own. Maybe it was because of my responsibility to my wife and children; maybe it was a stubborn desire to go on and try; maybe it was the strong beliefs my parents instilled in me as a child—probably it was all these and more that carried me on, but I sure as hell didn't follow Kovic's route. Don't think that there were not and still are not times when the anger and frustration well up inside and I wallow in self-pity. I did and I

do. But these periods are brief and for the most part private.

Kovic denounced his goverment, yet he, as do I, receive benefits and some hefty priviliges from that government. We have available a substantial grant for construction of a specially-equipped home. We receive each month a sizable compensation check, tax free, for life. We have a grant for specially-equipped vehicles. He pays virtually no property taxes on his home in California. We enjoy lifetime medical services. All this is provided by a government that Kovic has reviled (the malodorous Oliver Stone will never portray any of these benefits in any of the nihilistic bile he produces).

Kovic's and Stone's message in "Born on the Fourth of July" is this: Nothing is worth risking your life and body for. The message is false. Ask some of the Vietnamese boat people now living in Orange County. Consider the collapse of the communist monolith, and what has just happened in Nicaragua. My having been a member of a strong military deterrent was a role I'm proud I could play to help bring about all these changes. There is a chance that freedom and democracy can work worldwide.

If I could go back and do it all again, I would, even if I were to end up in this chair again. Yes, even the right of Kovic and Stone to display their convoluted left-wing views is worth living and fighting and sometimes even dying for.

Their movie will probably walk away with many Oscars in a few weeks. Members of the Academy dote on antiwar and especially anti-Vietnam films. You'll never see a film receive an award that depicts veterans as most of them were and are—soldiers who didn't kill babies, didn't come back mentally screwed up or terminally embittered, but who did their job within the rules of war and then got on with their lives. You won't see a movie about those disabled veterans who didn't turn to drugs and booze, who didn't become whining, vindictive wimps—those who were angry and hurt, yes, but took it from there with what they had left and made it work. Those veterans are too dull and uninteresting, I suppose, to be depicted according to the rules of Kovic and Stone.

Please, those of you who see this film, remember that it is the product of two men who see the Vietnam experience from their own radical left perspective, just as this article is written from my perspective. Their view is not necessarily the way it was in Vietnam.

RECOGNIZING JAMES MADISON HIGH SCHOOL CONCERT BAND

HON. STAN PARRIS

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. PARRIS. Mr. Speaker, I rise today to call to the attention of my colleagues in the House of Representatives the James Madison High School Concert Band from Vienna, VA, who on April 19, during a gala concert, will receive the Sudler Flag of Honor Award for 1990 by the John Philip Sousa Foundation.

The James Madison High School Concert Band, conducted by Mr. Carl Bianchi, is one of only three high school bands selected this year from the entire United States to receive this honor. The Sudler Flag of Honor is the highest recognition of excellence that can be awarded to a high school band program. Since the award's 8-year existence only 27 high school bands from the United States have received this honor. The award is sponsored by the John Philip Sousa Foundation to identify, recognize, and honor those high school concert band programs throughout the United States that have demonstrated high standards of excellence in concert activities during a period of at least 7 years.

The winning band is evaluated for its concert activities as well as participation in solo and ensemble performances by its individual members. The evaluation of the nominations, and the selection of the recipients, is made by a committee of nationally known band conductors—all of whom have themselves conducted outstanding high school concert band programs.

The Sudler Flag program is funded by an endowment by Louis and Virginia Sudler. Mr. Sudler, chairman emeritus of the Chicago Symphony Orchestral Association and executive chairman emeritus of the Sousa Foundation has long been interested in recognizing the accomplishments and nurturing the gift of our musically talented youth.

Mr. Speaker, I extend my warmest congratulations to the James Madison High School Concert Band on receiving the Sudler Flag of Honor and wish them the best of luck in all of their future endeavors.

TRIBUTE TO MR. ART McCORMICK

HON. TERRY L. BRUCE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. BRUCE. Mr. Speaker, I rise today to pay tribute to an exceptional educational leader from the 19th Congressional District of Illinois. At a time when the Nation's schools face mounting financial and social difficulties, the Oblong School District has been privileged to be directed by Mr. Art McCormick.

Since 1983, Mr. McCormick has served as superintendent of the Oblong School District, and I would like to thank him for his valuable contributions as he accepts the challenge of a new position this summer.

During Mr. McCormick's tenure as superintendent, Oblong schools achieved remarkable academic success. Through the Scholastic Bowl Program, Oblong's students competed with the area's best academic teams to win numerous conference championships and tournaments hosted by several colleges in the region. These successes led to Oblong schools' esteemed participation each year from 1987 to the present in the Texaco Star National Scholastic Bowl Tournament.

In addition, the Oblong Scholastic Bowl Program was recognized throughout the United States as an exemplary program of 1990 by the National Rural and Small Schools Consortium, Bellingham, WA.

The accomplishments of the Oblong School District's Mathematics Program were particularly impressive under the direction of Mr. McCormick. Entering the Illinois Council of Teachers of Mathematics Competition during the 1983-84 school year, the Oblong Math Program has repeatedly finished among the State's best small schools. The math team has won seven regional championships and earned the following places in the State competition: 1984—sixth in the State; 1985—second in the State; 1986—first in the State; 1987—second in the State; 1988—third in the State; 1989—first in the State; 1991—Oblong considered to be among the top four in April 28's tournament.

The Oblong Schools' Future Homemakers of America Program also gained from Mr. McCormick's leadership as indicated by its numerous awards including the election of several national FHA officers.

The Oblong School District's students, faculty and community are grateful to Mr. Art McCormick for all of his efforts to help the school district reach its academic potential. While his contributions will continue to influence the accomplishments of the Oblong School District, I am certain that the Petersburg schools will also benefit greatly from his talents.

THE INTRODUCTION OF THE MARKETS AND TRADING REORGANIZATION AND REFORM ACT

HON. DAN GLICKMAN

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. GLICKMAN. Mr. Speaker, we are sitting on a ticking financial time bomb. The United States has 21st century financial markets regulated by a regulatory structure designed in the 19th century. As U.S. investors and investors from around the world continue to push the edge of financial innovation and sophistication further, the gaps and weaknesses in the regulatory safety net grow wider and wider. Instead of providing assurances to investors and protecting our markets, the bifurcation in regulation lays underneath the markets like a San Andreas fault waiting to give way at the next big tremor.

Now is the time to put an end to this arbitrary and outdated system. The bill we are introducing today will do that. In creating one, unified regulator of the securities and futures markets, governmental policy will, finally recognize what the markets have known for years. The markets and investors in those markets are inextricably linked—you simply cannot tear them apart, and should not.

Indeed, if we were starting from scratch, I doubt few if any would advocate setting up two separate regulatory agencies as we have today. We would do what other countries have done: We would establish one unit to oversee these markets to provide the linkages in regulation which already exist in the markets. We need to do so to protect our markets and our investors and to ensure that the United States stays at the forefront of world financial innovation, and that investors, exchanges, and regulators do not continue to spin their wheels fighting over turf but put that energy to use in

being creative and imaginative. It is time to put sound policy before politics.

This bill will create one new regulatory agency, the Markets and Trading Commission, which will have jurisdiction over all the functions, laws, and markets which are now divided up between the Commodity Futures Trading Commission and the Securities and Exchange Commission. It is not a piecemeal approach as some have advocated—it is a wholesale reorganization of how the Government oversees these markets and one which needs to be accomplished.

The bill also creates another new body, analagous to the existing Presidential Working Group begun after the market crash of 1987. The new entity, the Federal Financial Market Coordinating Council, will be composed of the Federal regulators responsible for all segments of the financial markets. It will be charged with coordinating all Federal financial regulatory activities and make recommedations to Congress for changes which need to be considered in further recognition of the linkages between these markets.

In summarizing the bill, let me highlight five things the bill does:

First. It creates one new Federal regulatory body the Markets and Trading Commission to regulate the securities and futures markets.

Second. It creates the Federal Financial Markets Coordinating Council composed of representatives of Federal financial markets regulators, to coordinate regulatory activities with respect to these markets and recommend further changes.

Third. It gives the new Commission authority to set margins on stocks and issue orders to establish or change margin requirements on futures when needed to ensure the financial intergrity of those markets.

Fourth. It preserves within the new regulator one division exclusively responsible for the regulation of futures on physical commodities, such as agricultural commodities, metals, and oil.

Fifth. It provides for a 2-year transition period to establish the new agency.

Now, let me highlight five things this bill does not do:

First. It does not change existing congressional jurisdiction. Existing jurisdictional responsibilities in the House and the Senate will be preserved.

Second. It does not take away from futures exchanges the abilities and responsibility for setting day to day margin levels.

Third. It does not solve all the regulatory complexities of today's financial markets. The Federal Financial Markets Coordinating Council is the first step into examining issues concerning the regulation of the new sophisticated, hybrid financial products now trading in the markets to determine how they should be logically incorporated into this regulatory structure.

Fourth. This is not a panacea for volatility and fluctuations in the markets, However, by unifying regulation, the same regulators will be able to see across markets and assess potential problems earlier and more accurately and take appropriate steps as needed.

Fifth. Most importantly, this is not a stalking horse to create a super SEC or a super CFTC. It is not a takeover of one agency by the other. It is neutral. This legislation simply recognizes the way markets are and rationalizes the regulatory structure around it.

In closing, let me make one final observation. Of all the important reforms and legislation passed during the New Deal, perhaps the most significant were those which restored confidence in our Nation's financial system—the banking system and the securities markets. It was this body of law which restored confidence in the markets and our financial way of life and which provided the foundation for the recovery from the Depression. This new legislation is designed to do the same thing in laying a new foundation of investor confidence in our financial markets as we move into the 21st century.

I am pleased to have had the close collaboration of my good friend, Mr. ECKART, in developing this legislation. I have had extensive conversations with representatives of the industries and the administration in this development and am pleased that in concept, I have had very positive reactions. It is my hope that not only will our colleagues here in the House join Mr. ECKART and myself in support of this legislation, but that the administration too will lend its support so we can get this legislation into place before another market disaster and calls for hasty, perhaps imprudent legislation are raised.

MARKETS AND TRADING REORGANIZATION AND REFORM ACT OF 1990

SECTION-BY-SECTION DESCRIPTION

Section 1—Short Title; Table of Contents

Section 1 provides that the Act may be cited as the "Markets and Trading Reorganization and Reform Act of 1990" and includes a table of contents listing the sections of the bill.

Section 2—Purposes

Section 2 states that the purposes of the bill are—

(1) to establish a single Federal regulatory body with jurisdiction over securities, options, futures, and related markets and instruments;

(2) to consolidate and revise the authority for setting margin requirements on all such instruments;

(3) to coordinate the regulation of all financial markets;

(4) to strengthen investor confidence in United States financial markets; and

(5) to ensure the competitiveness of those markets.

Section 3—Definitions

Section 3 defines terms used in the bill as follows:

(1) the term "Commission" means the Markets and Trading Commission established by Section 101 and

(2) the term "function" includes any duty, obligation, power, authority, responsibility, right, privilege, activity, or program.

Section 4—Effect on Congressional Jurisdiction

Section 4 states that it is the sense of the Congress that nothing in the bill shall be construed to affect the jurisdiction, established under House and Senate rules respectively, of any committee or subcommittee of the Congress with respect to any function transferred to the Commission by the Act.

TITLE I—ESTABLISHMENT OF COMMISSION

Section 101—Establishment

Section 101 establishes an independent regulatory commission to be known as the Markets and Trading Commission.

Section 102—Members, Appointment; Terms

Section 102(a) provides that the Commission shall be composed of five commissioners appointed by the President, by and with the advice and consent of the Senate. One of the commissioners shall be designated by the President as chairman. Not more than three members of the Commission shall be of the same political party. Each commissioner shall be selected solely on the basis of integrity and demonstrated knowledge of the operations of the markets subject to the jurisdiction of the Commission.

Section 102(b) provides that each commissioner shall be appointed to a term of five years except that—

(1) a commissioner may continue to serve beyond the expiration of a term until a successor is appointed and has qualified, but may not continue to serve after the expiration of the next session of Congress;

(2) the terms of office of the commissioners first taking office after enactment of the Act shall expire, as designated by the President at the time of their appointment, as follows—

(A) one at the end of one year;

(B) two at the end of three years; and

(C) two at the end of five years and

(3) any commissioner filling a vacancy occurring prior to the expiration of the term for which the predecessor was appointed shall be appointed for the remainder of such term.

Section 102(c) provides that no commissioner shall engage in any other business or employment other than serving as commissioner and that no commissioner shall participate, directly or indirectly, in any market operation or transactions subject to regulation by the Commission.

Section 102(c) provides that the Commission may accept, according to regulations prescribed by the Commission, payment and reimbursement from non-Federal sources for travel and related expenses incurred by Commission members and employees in attending meetings and conferences concerning functions or activities of the Commission.

Section 102(c) further provides that former employees of participants in the Commission's professional fellows program may pay such participants their expenses for relocation to Washington, D.C.

Section 102(d) provides that whenever a fee is required to be paid to the Commission, the Commission may provide that such fee shall be paid in a manner other than in cash.

Section 103—Organization of Commission

Section 103 provides that the Commission shall establish divisions and subdivisions except that one such division shall be responsible for functions relating to markets in physical commodities.

Section 104—General Counsel

Section 104 provides that the Commission have an Office of General Counsel, headed by a General Counsel appointed by the President, by and with the advice and consent of the Senate.

TITLE II—TRANSFERS OF FUNCTIONS

Section 201—Commodity Futures Trading Commission

Section 201 provides that all functions of the Commodity Futures Trading Commission are transferred to the Commission.

Section 202—Securities and Exchange Commission

Section 202 provides that all functions of the Securities and Exchange Commission are transferred to the Commission.

Section 203—Jurisdiction of Margin Authority

Section 203(a) provides that the functions of the Board of Governors of the Federal Reserve System with respect to the setting of margins on securities are transferred to the Commission.

Section 203(b) provides that, notwithstanding the provisions of Section 5a(12) of the Commodity Exchange Act (which prohibits the Commodity Futures Trading Commission, in designating a contract market, from reviewing any rule or regulation of such contract market with respect to margin) the Commission, as necessary to ensure the financial integrity of such market, may—

(1) by order direct contract markets to adjust the level of margin required in any contract or

(2) by regulation prescribe limits on the level of margin required on any class or category of contract.

TITLE III—FEDERAL FINANCIAL MARKETS COORDINATING COUNCIL

Section 301—Establishment; Membership

Section 301(a) establishes a council to be known as the Federal Financial Markets Coordinating Council.

Section 301(b) provides that the Council's membership shall include the heads of the following agencies or their designees—

(1) the Board of Governors of the Federal Reserve System;

(2) the Comptroller of the Currency;

(3) the Department of the Treasury;

(4) the Markets and Trading Commission;

(5) the National Credit Union Administration;

(6) the Office of Thrift Supervision; and

(7) the Federal Deposit Insurance Corporation.

Section 301(c) provides for the election of one member of the Council to serve as chairman.

Section 302—Functions of the Council

Section 302 provides for the following functions of the Council—

(1) serve as a facility to coordinate the regulatory operations of each agency represented on the Council;

(2) meet bimonthly and at the call of the chair to discuss issues relating to the safety and effectiveness of the financial services industry and related issues;

(3) establish an advisory committee of five representatives of the futures, commodities, options, and securities exchanges and banking industry to meet no less than four times annually; and

(4) report biennially to Congress on its functions and activities and, in its first such report, to include recommendations for legislative action as it considers appropriate.

Section 303—Staff; Administrative Support, Expenses

Section 303(a) provides that each agency represented on the Council shall provide to the Council such personnel and administrative support as the Council may require to carry out its functions.

Section 303(b) authorizes to be appropriated to the Commission such sums as may be necessary for the expenses of the Council to be reimbursed to agencies for personnel detailed to the Council and for administrative support as provided for in Section 303(a).

TITLE IV—ADMINISTRATIVE PROVISIONS

Part A—Personnel Provisions

Section 401—Officers and Employees

Section 401(a) provides that the Commission may appoint and fix the compensation of its officers and employees in accordance with the civil service laws.

Section 401(b) provides that—

(1) at the request of the Commission, the Director of the Office of Personnel Management shall provide for the establishment of the same number of supergrade positions (grade levels GS-16, GS-17, and GS-18) in the Commission as existed on the day prior to the effective date of the Act for the performance of the functions and offices transferred to the Commission from the Commodity Futures Trading Commission and the Securities and Exchange Commission;

(2) at the request of the Commission, the Director of the Office of Personnel Management shall provide for the same number of professional and technical positions as were in effect on the day prior to the effective date of the Act outside the General Schedule as were used for the performance of functions and offices transferred under the Act;

(3) the Commission may make appointments to special positions provided for under the subsection without regard to the provision of the civil service laws if the person appointed to such position is an individual who is tranferred in connection with the transfer of function provided for in the Act;

(4) the authority to make special appointments under the subsection expires with respect to the first person first appointed to fill such position; and

(5) makes certain technical and conforming amendments to the Civil Service Reform Act of 1978.

Section 401(c) permits the Commission to make up to 100 special appointments of technical or professional employees and fix their compensation at a level not equal to or more than the minimum rate of pay currently paid for GS-16 of the General Schedule.

Section 401 (d) requires the Director of the Office of Personnel Management to establish within the Commission ten limited service positions within the Senior Executive Service to be effective not longer than three years following the effective date of the Act for the purposes of assisting with the establishment of the Commission.

Section 402—Experts and Consultants

Section 402 permits the Commission to obtain the services of experts and consultants and compensate them at a rate not to exceed the daily rate prescribed for GS-18 of the General Schedule.

Part B—General Administrative Provisions

Section 411—General Authority

Section 411 provides the Commission may exercise any authority available by law that is transferred by the Act and that the exercise of that authority shall have the same force and effect as when exercised by the official or agency from which the authority is transferred.

Section 412—Delegation

Section 412 permits the Commission to delegate any function to such officers and employees as the Commission may designate.

Section 413—Reorganization

Section 413 authorizes the Commission to allocate or reallocate functions amounts its officers and to establish, consolidate, alter, or discontinue such organizational entities.

Section 414—Rules

Section 414 authorizes the Commission to prescribe such rules and regulations as the Commission determines necessary or appropriate to administer and manage the functions of the Commission.

Section 415—Contracts

Section 415 authorizes the Commission, pursuant to the provisions of the Federal Property and Administrative Services Act, to enter in contracts, grants, leases, and agreements with Federal, other public agencies, including State and local governments, and private organizations and persons to the extent such funds are provided in advance under appropriation Acts.

Section 416—Regional and Field Offices

Section 416 authorizes the Commission to establish regional and field offices.

Section 417—Use of Facilties

Section 417 permits the Commission to use the facilities and services of other agencies of the Federal government and of State and local governments; permits the facilities of the Commission to be used by public and private entities under such terms and conditions as the Commission may prescribe; provides that proceeds from such use of facilities be credited to appropriations for the cost of equipment or facilities so used; and provides that any interest in real property acquired by the Commission shall be acquired in the name of the United States Government.

Section 418—Working Capital Fund

Section 418 provides for the establishment of a working capital fund for common administrative and maintenance services such as stationery, supplies, equipment, mail, telephone, other communications services, office space, document reproduction, and central library.

Section 419—Funds Transfer

Section 419 provides that the Commission may transfer up to five percent of one appropriation to another within the Commission.

Section 420—Seal of Commission

Section 420 requires the Commission to establish an official seal.

Section 421—Annual Report

Section 421 requires the Commission to publish an annual report, for the President for transmission to the Congress, as soon as practicable after the close of each fiscal year and include in the report a statement of goals, priorities, and plans of the Commission and assessment of the Commission in meeting such objectives. Section 412 further requires that the annual report include an estimate of the extent to which non-Federal personnel employed by the Commission under contract.

Section 422—Authorization of Appropriations

Section 422 authorizes to be appropriated to the Commodity Futures Trading Commission and the Securities and Exchange

Commission $10 million for the establishment of the Commission and authorizes to be appropriated for the two fiscal years following the effective date of the Commission (Ooctber 1, 1992) such sums as may be necessary to carry out the Act.

TITLE V—TRANSITIONAL, SAVINGS, AND CONFORMING AMENDMENTS

Section 501—Transfer and Allocation of Appropriations and Personnel

Section 501 transfers to the Commission all personnel, assets, liabilities, contracts, property, records, appropriations, authorizations, and other funds made available with respect to functions transferred to the Commission by the Act.

Section 502—Effect on Personnel

Section 502 provides that any transfer of personnel made pursuant to this Act shall not cause any such personnel to be separate or reduced in grade for compensation for one year after the date of transfer to the Commission.

Section 503—Agency Terminations

Section 503 provides that on the effective date of the Act, the Commodity Futures Trading Commission and the Securities and Exchange Commission shall terminate.

Section 504—Incidental Transfers

Section 504 authorizes the Director of the Office of Management and Budget to make such additional incidental transfers and terminations of personnel, equipment, and funds as necessary with the establishment of the Commission.

Section 505—Savings Provisions

Section 505(a) provides that all order, determinations, rules, regulations, permits, contracts, certificates, grants, licenses, and privileges affected by the transfer of functions under the Act and in effect at the time of the effective date of the Act shall continue in effect until modified, terminated, superseded, or set aside in accordance with law by the President, the Commission, or court.

Section 505(b) provides for the continuation of any proceeding, rulemaking, application for license or permit, or related matter in progress at the time of the effective date of the Act and permits the Commission to promulgate regulations for the orderly transfer of such proceedings.

Section 505(c) provides that nothing in the Act shall affect suits commenced prior to the effective date of the Act.

Section 505(d) provides that no suit pending prior to the effective date against any agency affected by the Act shall be dismissed by the enactment of the Act.

Section 505(e) provides that with respect to any suit or proceeding commenced with respect to any function transferred by the Act, the suit shall be continued with the Commission substituted or added as the appropriate party.

Section 505(f) provides that orders and actions of the Commission transferred by the Act shall be subject to judicial review to the same extent and in the same manner as if such transfer had not been executed.

Section 506—Separability

Section 506 provides that if any provision of the Act is held invalid the remainder of the Act shall not be affected.

Section 507—Reference

Section 507 provides that with respect to any function transferred by the Act, any reference in any other Federal law to any other department, commission, or agency from which such functions are transferred shall be deemed to refer to the Commission.

Section 508—Amendments

Section 508 makes conforming and technical amendments in the schedule of Federal executive salaries and deletes provisions of the Securities and Exchange Acts and Commodity Exchange Acts made obsolete by the Act.

Section 509—Transition

Section 509 authorizes the Commission to use the services, personnel, and officers of agencies affected by the transfer of functions made pursuant to the Act to facilitate the transfers needed for the implementation of the Act.

TITLE VI—EFFECTIVE DATE

Section 601—Effective Date

Section 601 provides that the Act becomes effective no sooner than October 1, 1992.

THE INTRODUCTION OF THE PENNY STOCK REFORM ACT OF 1990

HON. JOHN D. DINGELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. DINGELL. Mr. Speaker, I am pleased to join my colleagues on the Energy and Commerce Committee in introducing legislation to crack down on penny stock fraud. The gentleman from Massachusetts [Mr. MARKEY] is to be commended, along with the gentleman from New Jersey [Mr. RINALDO] and the gentleman from Oregon [Mr. WYDEN] for their strong leadership in producing this bill.

Penny stock fraud has become a national embarrassment. During the 1980's while Federal prosecutors and the SEC directed their resources at high-profile, insider trading cases, crooks, who ought to be buried under the jail, overran the market for low-priced, over-the-counter securities. When regulators closed down one operation, the perpetrators would merely open up new operations cross-town or cross-border. What we clearly need here is the legislative equivalent of RAID.

The North American Securities Administrators Association Report on Fraud and Abuse in the Penny Stock Industry—September 1989—estimated that investors are losing $2 billion a year from penny stock fraud. In chilling testimony on September 7, 1989, before our Subcommittee on Telecommunications and Finance, Lorenzo Formato, a veteran penny stock broker and promoter—and convicted felon with admitted ties to the mob—insisted that organized crime had infested the entire OTC market. Even if Formato was exaggerating, we cannot afford to ignore this warning.

The SEC is to be commended for recent actions in this area. In November 1988, David Ruder, then SEC Chairman, established within the Commission a Market Manipulation Task Force to address the problem of penny stock fraud. Other law enforcement agencies and State securities regulators have been working with the SEC in coordinating examinations, investigations, and enforcement activities involving penny stock firms.

In August 1989, the SEC adopted rule 15c2-6 which imposes sales practice requirements on broker-dealers who recommend purchases of penny stocks to persons who are not established customers. The rule became effective on January 1, 1990. But more is clearly needed.

Accordingly, this legislation would give the Commission the authority to bar crooked penny stock promoters and consultants. Penny stocks would have to be traded through a system which provided firm automated price quotations, thereby improving surveillance and providing a greater flow of information to investors. The bill would substantially increase risk disclosure and other disclosures given to investors. The bill would prohibit excessive spreads in penny stocks, require greater substantive review of penny stock offerings, and require the NASD to establish a toll-free number to receive and respond to inquiries from customers regarding broker disciplinary actions. Finally, the bill would place restrictions on blank check and blind pool penny stock offerings.

I urge the subcommittee to hold prompt and careful hearings on this bill. Particular focus should be directed at the restrictions on blank check and blind pool offerings to make sure that we are not unduly harming legitimate capital raising efforts by small businesses and startup ventures. Well before the fall of Drexel Burnham Lambert Group Inc., the junk bond market had tiered and suffered a liquidity crisis. Last month, press reports, for example, "Credit Crunch: As Banks Get Tough With Borrowers, Fears of a Recession Rise," Wall Street Journal, Thursday, March 22, 1990, warned that Federal regulations were becoming far more aggressive in their demands upon banks to disclose problem loans, build reserves, and add to equity capital. In response to that regulatory pressure and to a slow economy, we are advised that banks all over the country are asking businesses for more collateral, turning down loans, and scrutinizing even long-term customers more closely. We need to take account of these matters in crafting the legislation that we ultimately bring to the floor of the House.

At the same time, and as a complement to the excellent penny stock legislation, I would urge action on H.R. 975, the Securities Law Enforcement Remedies Act, which I introduced at the request of the SEC on February 9, 1989. On July 14, 1989, the subcommittee held a hearing on H.R. 975, and on February 9, 1990, the SEC submitted proposed revisions to the bill. This revision would amend the Federal securities laws to:

Authorize the Federal courts to order the payment of civil money penalties, in addition to disgorgement, for violations of the Federal securities laws;

Authorize the Commission to order disgorgement and impose civil penalties in certain administrative proceedings under the Securities Exchange Act of 1934, the Investment Company Act of 1940, and the Investment Advisers Act of 1940;

Authorize the Commission to issue cease-and-desist orders for violations of the securities laws; and

Expressly affirm the inherent authority of the Federal district courts, in connection with injunctive actions brought by the Commission, to issue orders that prohibit individuals who

have committed egregious violations of section 17(a)(1) of the Securities Act of 1933 or section 10(b) of the Exchange Act from serving as officers or directors of any reporting company.

A February 21, 1990, Journal of Commerce editorial encaptioned "SEC's Modest Request" had this to say about H.R. 975:

A handful of insider traders has gone to jail, but run-of-the-mill violators of the securities laws have little to fear from the long arm of the law. The investor who is slow to disclose a large stock purchase, the brokerage firm that fails to segregate customers' funds and the publicly held company that juggles the books face little risk if they are caught. Their most likely punishment is a toothless cease-and-desist order in which, without admitting any violation of the law, they promise never to violate it in the future.

But the SEC's new chairman, Richard Breeden, has signaled that they days of laissez-faire are over on Wall Street. Mr. Breeden wants Congress to give his agency the authority to levy civil penalties of up to $500,000 for each violation for a wide range of securities law infractions. That would give the SEC the ability to impose real punishment on securities law violators without issuing worthless cease-and-desist orders or taking the Draconian step of shutting them down.

Public confidence in government oversight is essential if the stock market is to survive as a means for raising capital. That confidence will be impossible to maintain unless the SEC is able to levy tougher financial penalties against those who flout securities laws. Mr. Breeden's modest request should be granted speedily.

I urge my colleagues to join us in these efforts and I commend Messrs. MARKEY, RINALDO, and WYDEN for the bipartisan legislation which we are introducing today.

U.S. VIRGIN ISLANDS HONORS ST. THOMAS ARTIST IRA SMITH

HON. RON de LUGO

OF THE VIRGIN ISLANDS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. DE LUGO. Mr. Speaker, the U.S. Virgin Islands is honoring one of its finest artists, Ira Harrington Smith, whose exquisite watercolors, acrylics, and other creative works enhance the beauty of our tropical islands, which he has loved so much in his 43 years as an active and appreciated member of our community.

It is an honor to speak to the U.S. Congress on behalf of Ira, whose artistic creations and service to our community have endeared him to many in the Virgin Islands and have earned him the respect and praise of art lovers everywhere.

Ira has just been honored with a resolution and plaque prepared by the 18th Legislature of the Virgin Islands, and he has been selected for the 1990 Cultural Achievement Award by the St. Thomas Arts Council. These honors are most fitting and well deserved for a lifetime of achievements, beginning in New York as a teenager and including study abroad.

Ira's works have been chosen for presentation to former President Lyndon Baines Johnson and display at the 1964 World's Fair in New York. The government of the Virgin Islands has commissioned his paintings for presentation to such dignitaries as the King of Denmark and President of the Republic of Niger.

For more than 40 years now, Ira has shared his artistic talents with the Virgin Islands. When he and his late wife, Doris "Stevie" Stevenson, opened their popular guest house, Smith's Fancy, they established one of the first local art and craft galleries on St. Thomas. Their gallery became a focal point for art lovers and Ira was a source of encouragement for many young artistic Virgin Islanders who went on to success.

As a founding member of the St. Thomas Historical Trust and active member of the St. Thomas Orchid Society, Ira has greatly contributed to efforts to preserve and enhance our rich heritage of graceful architecture and natural beauty. He has always sought to reach out with his artistic vision with the entire community, and has shared his work with the Virgin Islands Departments of Commerce, Agriculture, and Conservation and Cultural Affairs, as well as the Virgin Islands Port Authority and Virgin Islands Telephone Co.

I am proud to contribute to this tribute to Ira Smith by sharing my personal regard for Ira's artistic abilities and community spirit, and drawing national attention to his achievements by making this statement to the U.S. Congress.

The resolution by the Virgin Islands Legislature follows:

RESOLUTION No. 1419

(To honor and commend Ira Harrington Smith for his contributions to the Arts and the people of the United States Virgin Islands)

Whereas Ira Harrington Smith was born on November 8, 1915, in Maplewood, New Jersey, to Philip Smith and Vera Leonard Smith; and

Whereas Mr. Smith has painted since the age of fourteen, exhibiting with the New York Water Color Society and the American Water Color Society; and

Whereas having completed his public school education in New Jersey, Mr. Smith graduated from the prestigious Pratt Institute in Brooklyn, New York; and

Whereas he studied further with Van Deering Perrine, N.A., and at the Instituto Allende in San Miguel de Allende, Republic of Mexico; and

Whereas the artist began his professional career designing and executing displays for various national retailers, including Lord and Taylor, B. Altman, Marshal Field and Neiman Marcus; and

Whereas in 1947, he married Doris Stevenson, affectionately known to many as "Stevie"; and

Whereas that same year they moved to the island of St. Thomas and established "Smiths' Fancy", a guest house with one of the first local art and craft galleries in the United States Virgin Island where he employed local Virgin Islanders and encouraged many young people to pursue a career in the arts; and

Whereas in 1950, Look Magazine featured the Smiths in an article, " The Virgin Islands: A frontier in the Sun", as representative of the many expatriate families that had moved to the Territory of the Virgin Island; and

Whereas J. Antonio Jarvis, in reviewing a 1952 exhibit of Mr. Smith's water colors remarked that, "One of the satisfactions of having the Ira Smiths and people with equally decent regard for the fine old architecture, quaint lanes, splendid palms and the riot of local colors is that the Virgin Islands become better known and loved through their efforts. Another gain is the inspiration their work gives to the young people of the community"; and

Whereas several of Mr. Smith's paintings are owned by the Government of the Virgin Islands are in the permanent collection at Government House of St. Thomas; and

Whereas Mr. Smith has contributed his artistic talents to the Virgin Islands Departments of Agriculture; Commerce (now Department of Economic Development and Agriculture); Conservatoin and Cultural Affairs (now Planning and Natural Resources); and Health, as well as the Virgin Islands Fort Authority; and

Whereas Ira Harrington Smith has distinguished himself as a Caribbean artist and has captured the charm, flavor and true spirit of our island community and the people of the Virgin Islands; his work was chosen for display at the 1964 World's Fair in New York City, and for presentation to the Honorable Lyndon Baines Johnson upon his unauguration as President of the United States; and

Whereas the Government of the Virgin Islands has commissioned his paintings for presentation to various world dignitaries; including the King of Denmark and the President of the Republic of Niger; and

Whereas in 1976, the Virgin Island Telephone Company selected his work, "Look Back and Be Proud . . . Look Ahead and Achieve", among mamy other artists' as the cover of the Biscentennial Telephone Director; and

Whereas due to his appreciation of the Virgin Islands' vernacular architecture, Ira Smith became a founder of the St. Thomas Historical Trust; and

Whereas as an avid orchid grower and member of the St. Thomas Orchid Society, he has sought to preserve and promote many Virgin Islands species through a series of botanical acrylic paintings and has won many awards of merit from the American Orchid Society; and

Whereas the St. Thomas Arts Council selected Ira Harrington Smith as the recipient of its 1990 Cultural Achievement Award for his many contributions to the arts and the preservation of the cultural heritage of the United States Virgin Islands; and

Whereas it is the sense of the Legislature that Ira Harrington Smith has earned the respect and admiration of the people of the Unites States Virgin Islands for his work as an artist and should be honored for his years of devoted service, numerous accomplishments and contributions to the people of the United States Virgin Islands: Now, therefore, be it

Resolved by the Legislature of the Virgin Islands:

SECTION. 1. The Legislature, on behalf of the people of the United States Virgin Islands, hereby honors and commends Ira Harrington Smith for his dedication to the arts and the preservation of the culture of these islands.

SECTION 2. A perma plaque copy of this Resolution shall be prepared and presented to Ira Harrington Smith by the President of the Legislature, or his designee, at an appropriate ceremony held for that purpose.

BUSH VERSUS ISRAEL

HON. MEL LEVINE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. LEVINE of California. Mr. Speaker, recent actions and statements by the Bush administration raise significant questions about its ultimate direction in the Middle East. In particular, these incidents—on the peace process, on Jerusalem, on housing guarantees for Soviet Jews, and on foreign aid—have helped reawaken deep Israeli fears with regard to American policy in the region.

William Safire of the New York Times recently wrote a column which explored this issue. Entitled "Bush Versus Israel," the piece paints a troubling picture of this administration's attitude toward Israel and the United States-Israel relationship. Indeed, it begins by saying, "Arabs and Jews who agree on little else can agree on this: George Bush is less sympathetic to Israel's concerns than any United States President in the four decades since that nation's birth."

Mr. Speaker, I ask unanimous consent to place this article in the RECORD and urge my colleagues to review it:

BUSH VERSUS ISRAEL

WASHINGTON.—Arabs and Jews who agree on little else can agree on this: George Bush is less sympathetic to Israel's concerns than any U.S. President in the four decades since that nation's birth.

President Carter harbored grudges at stiff-necked Israelis, but was constrained by the unity of our ally under Menachem Begin, the strong ties to the Democratic Party of most Jewish voters, and the reputation of Israel as a valiant ally under siege.

Those protections have been stripped away. Mr. Bush is dealing with an Israel paralyzed by parliamentarianism, with a voting group here that goes mainly against Republicans anyway, and with commentators holding Israel to wartime rules never applied to its neighbors.

Mr. Bush has long resisted America's special relationship with Israel. His Secretary of State, James Baker, delights in sticking it to the Israeli right. His national security adviser, Brent Scowcroft, and chief of staff, John Sununu, abet that mind-set.

The basic U.S. policy shift was noted last week by no less an authority than Yasir Arafat. "This Administration is the first American Administration that speaks of the end of the Israeli occupation," he said, hailing James Baker for telling Israelis "to forget the dream of a Greater Israel."

Mr. Arafat knows who his friends are; he accurately senses a historic change in White House support of Israel's right to decide its future.

This is the first Administration to openly threaten to cut aid to Israel; Secretary Baker enlisted Bob Dole in a scheme to drive a rift in American ethnic groups by shifting aid from Israel to Poland.

This is also the first Administration to tie aid directly to Israel's willingness to conform to U.S. policy demands: unless the West Bank is barred to Jews who want to move there, no loans will be guaranteed to help Soviet Jews start new lives.

Mr. Bush, by extending his anathema on "settlements" to a portion of Israel's capital, is the first to raise the prospect of a divided Jerusalem. Mr. Bush pretends that his bombshell, which brought down the Likud Government, is no change in U.S. policy; that legalistic half-truth fools nobody.

No previous Administration shut its eyes to clear evidence of terrorism: despite a rise in attacks on Israelis by Palestinian Arabs, and hundreds of assassinations of intifada Arabs by P.L.O. hit men, Mr. Bush holds that if no proof can be produced to show Mr. Arafat personally ordered the terror, the P.L.O. is innocent.

With such diplomatic strengthening, the P.L.O. was able to prevail on Mikhail Gorbachev to renege on an agreement with Israel's airline to transport Soviet Jews directly to safety. Another terrorist group was able to bring the Hungarian Government to its knees, at least temporarily canceling an escape route.

That's why Mr. Arafat is so high on the Bush Administration. That's why Iraq's Saddam Hussein, recipient of a fresh $500 million in U.S. loan guarantees, feels no restraint in building poison-gas plants and missiles, hanging anybody who dares to inquire.

No wonder that mainstream Jewish groups in America have belatedly come to the conclusion that Israel's friends are in the Congress, not the White House. And no wonder that Israeli diplomats are straining to build new ties in Central Europe, against the day Mr. Bush decides that Israel has lost strategic significance.

This Administration's policy, grimly fixed on imposing a P.L.O. state in the disputed territories and the Old City of Jerusalem, comes at the worst moment for millions of Jews in the Soviet Union.

Great political-cultural pressures are building in Russia. Forgive me for sounding alarmist, but if resurgent Russian nationalism turns anti-Semitic, as it so often has, no one can say how many scapegoats will be slaughtered.

Mr. Gorbachev, to gain American trade, opened the gates to let Jews out; Mr. Bush closed American gates, directing the refugees to Israel, which exists to receive them; but Arab leaders, emboldened by the Bush-Baker mind-set, have used terrorism and diplomacy to close off the escape route to Israel.

Come the first pogrom, which God forbid, who in the Bush White House will accept responsibility for failing to facilitate the new exodus while there was still time?

Who among supporters of Israel will step forward on some future Passover and admit they were so caught up with the "peace process" that they refused to confront the real possibility of a death process?

GINGRICH: NO MORE MR. NICE GUY

HON. ANDREW JACOBS, JR.

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. JACOBS. Mr. Speaker, according to the Washington Post, one of our colleagues has recently charged that "because of leftists' opposition to legislation, we can't trace AIDS because it would infringe on personal lifestyles."

It is amazing how much you can learn from colleagues' speeches. I could have sworn that I, your humble Democratic peer, authored section 8008 of Public Law 100-647 which requires Social Security to help blood banks trace citizens believed to have donated AIDS tainted blood.

GINGRICH: NO MORE MR. NICE GUY

After he was elected House minority whip a year ago, Rep. Newt Gingrich (R-Ga.) toned down some of his strident partisan rhetoric. Last Saturday, however, Gingrich reverted to form as he called Democrats "cultural masochists" who relish bad news and fund a "bureaucratic welfare state" that "cripples children."

Gingrich, the keynote speaker at a GOP fund-raiser in Colorado, also attacked Democrats in general and House Armed Services Committee Chairman Les Aspin (D-Wis.) in particular for slashing the defense budget. Aspin, Gingrich said, acted in "a petty and destructive manner" to push for massive and irresponsible cuts.

Gingrich criticized the legislative agenda of Colorado Democratic lawmakers Sen. Timothy E. Wirth and Rep. Pat Schroeder. "The tradegy of [their] values is that it's the poor people who will suffer the most," Gingrich said.

Democrats also did not escape blame for the AIDS crisis, which Gingrich said is partly a result of "liberals who advocated free sex." He added that "because of lefists' opposition to legislation, we can't trace AIDS because it would infringe on personal lifestyles."

Gingrich then seized on the example of Ohio Gov. Richard F. Celeste (D) to underscore his assertion that "the vast majority of Americans don't believe the left makes any sense." Gingrich said that "Celeste, in a fit of lunacy, decided his state would participate in a National Condom Week."—Maralee Schwartz and David Maraniss.

A TRIBUTE TO THE MONROE COUNTY CHAPTER OF THE AMERICAN RED CROSS

HON. JOHN D. DINGELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. DINGELL. Mr. Speaker, I rise today to honor an organization in my district that exemplifies the meaning of community service.

The Monroe County chapter of the American Red Cross is celebrating 75 years of dedicated service to its community, helping area residents in both the prevention of and relief from disasters and accidents. In times of peace, war, and disaster, the volunteers, members, donors, and staff have provided relief and care to people in need.

In 1915, when several prominent community members met to organize a Red Cross chapter in Monroe County, the main activities were a membership drive, a Christmas stamp campaign, and fundraising to aid the starving in Mexico. Seventy-five years later this chapter has substantially broadened its services, not the least of which is generating over 5,000 units of blood annually to transfer the gift of life at crucial times to countless recipients.

The chapter also offers safety classes in cardiopulmonary resuscitation, first aid, swimming, and boating. Emergency messages are delivered, family counseling is provided, and financial assistance is offered to people in

need of a helping hand. Nearly 100 persons in Monroe County receive disaster relief annually, and the chapter stands constantly ready to serve thousands more in the event of an emergency.

In my 35 years of service to the residents of southeastern Michigan I have often been comforted by the thought that I work in communities where people help each other, where when tragedy strikes and people are in need, I can witness the results of Americans pulling together and lending a helping hand to a neighbor. On behalf of all the citizens of Monroe County, I wish to thank the Monroe chapter for all it has given our community.

Mr. Speaker, I ask the House of Representatives to join me today in honoring the Monroe County chapter of the American Red Cross on the occasion of its 75th anniversary. Over this century the efforts of the chapter's thousands of volunteers deserve high praise as an example of giving and caring community service. May the next 75 years be just as successful.

RECOGNIZING THE CONTRIBUTIONS OF WOMEN TO AMERICA'S HISTORY

HON. ILEANA ROS-LEHTINEN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Ms. ROS-LEHTINEN. Mr. Speaker, women have generously contributed to the character of our Nation from the taming of the Western frontier to the frontiers of space. As National Woman's History Month comes to a close, it is important to remember the legacy of the heroines of the women's suffrage movement throughout the years. By securing the right to vote for women, the suffragettes set in motion the cause of universal suffrage.

In all the varied pursuits of life, women have made a special contribution, sometimes against the odds. Elizabeth Blackwell broke into the previously exclusive vocation of physician in 1849, penning her experiences in "Pioneer Work in Opening the Medical Professional to Women." In 1916, Jeannette Rankin, a Republican of Montana, became the first woman to be elected to the House of Representatives. In 1958, Mary Roebling of the Trenton Trust Co., became stock exchange director and one of the 32 governors of the American Stock Exchange. And today, Wilma Mankiller is the Cherokee Nation's woman principal chief.

In addition to these spectacular entries to America's history books, women have contributed to the moral strength of our Nation, as our mothers and sisters. Mr. Speaker, let us all take note of the significant role women have played in America as they help guide our Nation into the future.

IN TRIBUTE TO FAIRMOUNT MANOR OFFICERS

HON. RONALD K. MACHTLEY

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. MACHTLEY. Mr. Speaker, I rise today to honor the recently elected officers of the Fairmount Manor in Woonsocket, RI.

The president of the Fairmount Manor will be Fleur Nunes, while the seat of vice president will be filled by Richard Plath. Hortense Laflamme will serve as the new secretary while Paul Houle will be the treasurer. Bernadette Rioux will serve as the activity chairperson.

I would like to wish my best to the new officers of the Fairmount Manor and hope that they continue to create a spirit of love within their home. Their dedication is a testament to their unselfish devotion to their fellow tenants.

MR. LEWIS E. DRISKELL, C.S. MOTT CITIZEN OF THE YEAR

HON. DALE E. KILDEE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. KILDEE. Mr. Speaker, I commend to my colleagues' attention the attached article from the Flint Journal about a truly remarkable human being from my hometown of Flint, MI. Mr. Lewis E. Driskell has made many trememdous contributions to the quality of life of so many of us in Flint and I feel strongly about the need to bring the attached story to the attention of the Congress and the Nation:

PRINTER NAMED CITIZEN OF YEAR: OWNER OF FLINT FIRM SELECTED BY C. OF C.

Lewis E. Driskell Sr., president and chief executive officer of Union Printing Co. Inc., was named the 1990 C.S. Mott Citizen of the Year by the Flint Area Chamber of Commerce.

Driskell, 59, will receive his award during the chamber's annual dinner meeting May 17 at the Hyatt Regency Hotel.

He is the 18th recipient since the award was first presented to George Whyel in 1973.

Driskell deserves the award because of "his willingness to immerse himself in all facets of the community," said chamber President Lawrence P. Ford.

Driskell was recognized last year as "Minority Entrepreneur of the Year" by Gov. James J. Blanchard.

Driskell, one of the cofounders of the Flint-based Metropolitan Chamber of Commerce, was born in Forsyth, Ga., and moved to Flint in 1960. He opened his business in 1974.

He is president of the Private Industry Council and the Central City Investment Club.

Driskell is a member of the state's Human Investment Council for Job Training and the Employability Skill Task Force. He was appointed by Blanchard to the Michigan Job Training Coordinating Council. He also was appointed by the state Board of Education to the Michigan Council on Vocational Education and served as chairman for two years.

Driskell served for 12 years as president of Local 282, Graphics and Communication Union.

He was a member of the board of directors for the Flint Urban League and the Flint Branch of the NAACP.

He served on the allocation board of the United Way of Genesee and Lapeer Counties.

He also is past president for the Alpha Phi Alpha fraternity.

THE MARKETS AND TRADING REORGANIZATION AND REFORM ACT

HON. DENNIS E. ECKART

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. ECKART. Mr. Speaker, today, Mr. GLICKMAN and I are introducing legislation to radically change the current structure of our financial market regulators by merging the Securities and Exchange Commission [SEC] and the Commodity Futures Trading Commission [CFTC] into a single regulatory entity. The Markets and Trading Reorganization and Reform Act [MTRRA] would alleviate much of the regulatory tensions that exist between the SEC and the CFTC and focus needed energies upon effective regulation rather upon jurisdictional battles. It is our belief that this regulatory restructuring will reestablish stability in the marketplace and restore investor confidence.

In this time of sophisticated trading strategies and continued introduction of new hybrid trading instruments, we need to ensure an effective regulatory environment. Historically, the United States has been in the forefront of market innovations, and we must maintain that competitive edge. By struggling with regulatory differences, we spend more time in the courts determining which regulatory agency should regulate which product rather than capitalizing on the ingenuity and potential of new trading instruments. A case in point is the recent Seventh Circuit Court of Appeals decision over the regulation of index participations [IP's]. While extensive litigation dragged on, the United States lost the market for IPs to Great Britain.

Our bill would establish the Markets and Trading Commission [MTC] which would encompass components from both the SEC and CFTC. The MTC, drawing from current SEC and CFTC personnel, will have expertise in all markets, from the physical commodities to stock index futures and equities. We are not creating a "super SEC" which gives preferential treatment to New York at the expense of Chicago. We are establishing a "super regulatory agency" to restore stability and vitality to our marketplaces. This unified regulator, which exists in most other industrialized countries, will foster an efficient marketplace and preserve our worldwide competitiveness.

MTRRA also addresses the issue of margin-setting authority. This bill would transfer margin-setting authority over equities from the Federal Reserve to the MTC and grant the MTC oversight responsibilities over margins in the futures markets. While the MTC would set

a floor for margins in the futures markets, the exchanges would retain their authority to set margin levels on a day-to-day basis.

It is time to put pettiness and turf battles behind us and concentrate on creating good policy. I look forward to working with Members of Congress, the SEC, the CFTC, Treasury, industry and the exchanges as we work to reach a consensus on the best way to organize and structure this new Commission.

SUMMARY OF THE MARKETS AND TRADING REORGANIZATION AND REFORM ACT

I.—Merges the Securities and Exchange Commission and the Commodity Futures Trading Commission into one entity, the Markets and Trading Commission.

II.—Eliminates both the SEC and CFTC.

III.—Commission shall have five commissioners appointed by the President and approved by the Senate.

IV.—The Commission shall establish the principal divisions and subdivisions within the Commission, except that it shall establish one division solely devoted to the physical commodities like soybeans, porkbellies and metals.

V.—The Commission shall have jurisdiction over margin-setting levels.

A. Current margin-setting authority over equities which resides now with the Federal Reserve shall be transferred to the Commission.

B. The Commission shall also prescribe limits on the level of margin for future contracts (set a floor), but the exchanges will continue to set day to day margin levels, provided that they are above the floor level set by the Commission.

VI.—The bill shall establish a Federal Financial Markets Coordinating Council composed of the Federal Reserve, the Treasury, the Comptroller of the Currency, the Markets and Trading Commission, the National Credit Union Administration, the Office of Thrift Supervision and the Federal Deposit Insurance Corporation.

This Council will meet bimonthly and at the call of the Chair to discuss issues relating to the safety and effectiveness of the financial services industry and other issues relating to those regulatory operations.

Establish an advisory committee of representatives from the futures, commodities, options, and securities exchanges and the banking industry to meet no less than 4 times annually.

The Council shall report to Congress biennially on its functions. The first report shall contain recommendations for legislative action it considers appropriate.

VII.—The Commission shall be effective by October 1, 1992. During the interim two years, it shall go through a transitional period. $10 million is authorized over the next two years to carry out this transition.

DISABLED WORK INCENTIVES EQUITY ACT

HON. RON WYDEN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. WYDEN. Mr. Speaker, today I am introducing legislation to alleviate the current disparity in work incentives provided to the blind and the nonblind. This legislation, the Disabled Work Incentives Equity Act of 1990, will give nonblind disabled supplemental security income [SSI] recipients the same kinds of incentives to work as are presently afforded to blind SSI recipients.

Presently, blind disabled individuals are allowed to exempt more expenses from their earnings than nonblind individuals before their income level is tested for SSI eligibility. In addition, blind individuals have their eligibility based on net income, while nonblind workers' eligibility is based on gross income.

These disparities in work incentives between the blind and the nonblind are unwarranted. Why should a blind individual receive greater incentives to work than a nonblind individual?

Both blind and nonblind individuals should be provided with the proper incentives to work and become independent. Neither group should have to risk losing needed medical and cash assistance because they choose to get a job and be productive.

My bill does not condemn the current incentives provided to the blind. Quite the contrary. My bill simply says that a nonblind SSI recipient should be given the same incentives to work as are currently provided to blind SSI recipients.

The cost of providing this major improvement to the nonblind disabled is minimal. Preliminary Congressional Budget Office [CBO] estimates put the cost of my legislation at $26 million per year in fiscal year 1991, leveling off at $20 million per year by 1993.

The modest cost of this bill should come as no surprise. After all, if nonblind individuals are given greater incentives to work, it is only logical that they will be paying the Government back through increased payroll taxes and, in some instances, independence from Government assistance.

Granting equal and proper incentives to all of our disabled citizens to become independent is simply the right thing to do. I urge my colleagues to cosponsor this important initiative.

ASSURING PHYSICIAN QUALIFICATIONS

HON. FORTNEY PETE STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. STARK. Mr. Speaker, I rise to introduce H.R. 4464, the Medicare Physician Qualification Act of 1990.

The Medicare Physician Qualification Act of 1990 would improve the quality of care provided to Medicare beneficiaries by requiring that physicians treating Medicare patients pass a periodic examination of their competence as a condition of payment.

States have the authority and responsibility to assure physicians' competence through their licensing activities. However, in practice, physicians are first licensed shortly after graduating from medical school. At no time after receiving his or her initial license is a physician required to demonstrate that he or she has maintained the basic skills required for the practice of medicine.

While States can remove or suspend a physician's license, it is done only rarely. In 1987, there were 913 instances when a physician's license was revoked or suspended. This is an improvement over the 492 cases in 1984, but it still means that less than 0.2 percent of 540,000 practicing physicians were sanctioned.

Most physicians are competent. However, anecdotal evidence suggests that too many are not, and too many of the incompetent ones find ways to retain their licenses. In California, Dr. Milos Klvana was convicted of murdering nine babies through incompetence but retained his license while awaiting criminal trial. In another case, U.S. district court Judge Marvin Aspin had to order a special panel of physicians to investigate whether a physician convicted of Medicare fraud was competent to continue to practice.

Until recently, a physician sanctioned in one State could simply set up practice in another.

Clearly, our systems of medical licensure and discipline are not doing an adequate job of assuring the public that licensed physicians are competent to practice medicine.

For patients, lifelong licenses offer little assurance of competence. Just because a physician was judged minimally competent 10 or 20 years ago has little bearing on whether he or she has maintained his or her competence.

One approach for assuring that physicians are currently qualified is to require relicensure or recertification. After all, it is easier to deny an incompetent physician a new license than it is to remove one.

Recertification policies have been adopted by 17 of the 23 member boards of the American Board of Medical Specialties. This involves periodic reassessments of the qualifications of physicians who wish to be a board certified specialist. While board certification is voluntary and doesn't effect a physician's license to practice, it suggests a model that could be used to assure the qualifications of all physicians.

The Medicare Physician Qualification Act of 1990 would require that all physicians treating Medicare patients pass an examination of their competence at least every 7 years as a condition of receiving payment.

The Secretary of Health and Human Services would establish standards for evaluations of physicians' qualifications that may include written and other types of evaluations. A general exam would be developed that could be taken by all physicians. In addition, exams could include evaluations of physicians within a particular specialty of medicine.

Qualifying organizations, generally organizations already evaluating physician qualifications for licensure and certification, could apply to have their examinations certified as meeting the Secretary's standards.

Taking incompetent physicians out of practice is an important step in assuring Medicare beneficiaries that they are receiving quality medical care. The need for this action is demonstrated by high rates of medical injuries and the burden that malpractice places on the health care system.

I hope my colleagues will join in this effort.

INTRODUCTION OF ANTARCTICA BILL

HON. BRUCE F. VENTO

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. VENTO. Mr. Speaker, the future of Antarctica is an issue that rightly attracts increasing public interest and concern. Today I am introducing legislation intended to provide the basis for the protection of its threatened environment and priceless living and nonliving resources and values.

Antarctica is a unique and very special region of the Earth. With 90 percent of the Earth's ice and 70 percent of its fresh water, Antarctica is both a fragile ecosystem that supports many forms of life, and an indispensable part of the atmospheric and oceanographic systems that moderate the world's weather and maintain the habitability and productivity of our planet.

Since 1961, the Antarctic Treaty has provided a framework for peaceful and cooperative international activities in Antarctica. America can be proud of its leadership role in the development and implementation of the treaty, as well as in the carrying out of scientific research and other activities that have taken place in Antarctica since its ratification.

Now, however, Mr. Speaker, there is growing concern about the need for new steps to assure that Antarctica will remain unspoiled and dedicated to peaceful research. This is a subject that has been of special importance to me for some time, especially since the 1988 signing of a Convention on the Regulation of Antarctic Mineral Resource Activities—or "CRAMRA"—that would for the first time constitute a framework for possible prospecting and other mineral exploration and development activities in Antarctica.

Anticipating that the 101st Congress might be called upon to consider approval of CRAMRA and implementing legislation for that convention, in 1988 I asked the Congressional Research Service to examine the issues related to protection of the Antarctic environment. In response, the Congressional Research Service convened a workshop of experts on Antarctica and produced a valuable report on environmental protection issues, and I have drawn upon that report in shaping the legislation I am introducing today.

Mr. Speaker, many of us followed with attention and enthusiasm the heroism of an international team, led by Minnesota's Will Steger, on the recently completed trans-Antarctic expedition—a record-setting dogsled crossing of Antarctica. In a moving Christmas message, taped while crossing the Antarctic plateau with the expedition, Mr. Steger urged the United States to take a leadership role in promoting international cooperation for the preservation of Antarctica. That is exactly the point and purpose of the bill being introduced today.

Leadership from the United States is essential, Mr. Speaker, because as CRS noted in its 1988 report mentioned earlier, as human activity in Antarctica has increased over the past several years, concerns over environmental impacts have also grown. The number of research personnel stationed in Antarctica has grown dramatically over the past decade: From 544 in 1979–80 to over 2,000 every year since 1982–83. Waste disposal and wildlife disruption associated with these increases have caused concern and criticism of the U.S. program and those of other nations by the environmental community. Tourism activities have grown, with very large increases projected: From 6 visits by 692 tourists in 1981 to 13 visits with 1,295 tourists in 1986–87, and some 2,800 people in 1988. I understand that the Antarctic tour season, which averaged 55 days a decade ago, in recent years has been for 95 days.

Accommodating and supervising these increasing numbers of tourists has been a growing problem, especially with regard to assuring protection of the environment, research operations, and wildlife. While most tourists are seriously concerned about protecting Antarctica, their visits are often localized, repetitive, and can frequently occur at breeding grounds for seals, penguins, and other seabirds. Such visits place additional stress on these species, and could cause animals to abandon their breeding sites or increase the vulnerability of their eggs and young to predation. Indeed, frequent helicopter visits by the first tourists to Antarctica—diplomats and dignitaries visiting McMurdo Station—quickly resulted in a 50-percent reduction in the southernmost adelie penguin rookery at Cape Royds. More recently, the release of at least 180,000 gallons of diesel fuel and other petroleum products from an Argentine tour/supply ship seriously jeopardized wildlife breeding colonies near Palmer Station on the Antarctic peninsula.

And these environmental problems from tourism could seem insignificant by comparison should Antarctica be opened to widespread mineral development. The Bush administration maintains that the CRAMRA agreement would establish a framework for regulating and controlling mineral activities, so as to reduce environmental problems. But I believe that we can do better. I believe that we can take the lead in seeking and obtaining international agreement that Antarctica should be forever off-limits to mineral activities and continue to be dedicated to peaceful and cooperative uses that advance our understanding of the world and universe and that will leave this part of the globe unimpaired for all generations to come.

Toward this end, Mr. Speaker, in November of last year I joined Chairman UDALL and the other chairmen of subcommittees of the Interior Committee—Representatives MILLER of California, RAHALL, DE LUGO, and KOSTMAYER—in writing the President to urge that alternatives to CRAMRA be explored. So far, however, the administration has demonstrated an unwillingness to seriously consider such alternatives. Therefore, I have attempted to shape a legislative alternative that I believe more fully responds to the importance of the Antarctica resource and the proper leadership role of our Nation. That alternative is embodied in the bill being introduced today.

The bill would be known as the Antarctica World Park and Protection Act of 1990. Its central purpose is to establish that the policy of our Nation is to act to protect Antarctica's lands, waters, resources, and values, so as to preserve them for the benefit of present and future generations of the world's people.

Toward that end, it would direct the Secretary of the Interior, through the National Park Service, to prepare an inventory of Antarctica's wilderness, cultural, scenic, wildlife, marine, historic, environmental, ecological, scientific, and other resources and values. This would be done so as to identify areas that should be managed to preserve unique natural ecological systems, areas of exceptional scientific interest, and other areas possessing special resources and values that must be properly managed. The inventory would be prepared in cooperation with other agencies of our Government, members of the worldwide scientific community, and with cooperating foreign nations.

Building on the inventory, the Secretary of the Interior, through the National Park Service, would prepare a management plan that would be appropriate for management of Antarctica as a world park. This plan would identify areas appropriate for public education and interpretation, for tourism, and for scientific research. It would also identify areas in Antarctica needing restoration or mitigation because of past damage, from oil spills, waste dumps, or other causes.

Once the plan was developed—a process that would involve public participation—its provisions would become binding on our Government and citizens, but even before that the Secretary of State would be required to begin negotiations with other nations to seek to have them join in agreements to protect Antarctica by prohibiting mining and in other ways, and to facilitate world park status for Antarctica. These talks should start this year, when parties to the Antarctica Treaty hold a meeting in Chile to discuss environmental issues.

In the interim, the bill would prohibit activities by the United States related to Antarctica that were not consistent with the purpose of the bill—protection of Antarctica—and the policy of preserving its resources, values, and environment for present and future generations.

Toward that end, the bill would immediately prohibit any prospecting or mining in Antartica by United States entities, and would extend to Antarctica the environmental and historic preservation laws that govern actions of Government and other entities in the United States.

Further, the bill would establish the Department of the Interior as a central clearinghouse for information about activities or proposals of other nations in Antarctica, so that this information can be available for public review and comment. It would require the Secretary of the Interior to prepare an analysis and comments regarding such matters, to establish a basis for our Nation's policy and reactions to them.

The bill would also bolster the existing mechanisms established under the Antarctic Treaty, for protecting the Antarctic environment. This would be done by making it more difficult for actions by our Government or U.S. citizens to be exempted from environmental restrictions established under the treaty mechanisms, and by requiring public and congres-

sional involvement in any proposal for such exemptions. In the same line, the bill would require consideration of sanctions against other nations not abiding by environmental protection measures recommended through the treaty mechanisms, and would condition U.S. agreement to extend voting rights under the Antarctic Treaty to additional nations on the willingness of those nations to abide by such recommendations and to be guided by and act in accordance with the plan for managing Antarctica as a world park.

Finally, Mr. Speaker, the bill would authorize appropriate citizen lawsuits to ensure that it is abided by and enforced.

Mr. Speaker, this is not time for half-measures if America is to be the world's leader in protecting Antarctica. Other nations, including those that have indicated their dissatisfaction with the prospect of mineral development in Antarctica, are waiting for a strong signal from the United States. Now, in the year when we will mark the 20th anniversary of Earth Day, is the time for us to send that signal and for us to take the lead in preserving the last continental region that is still essentially natural.

Mr. Speaker, I urge all our colleagues to join us in support of this measure.

CABLE IN THE CLASSROOM

HON. BOB McEWEN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. McEWEN. Mr. Speaker, schools in 500 communities in Ohio now have access to an exciting educational tool, Cable in the Classroom because of the commitment of Continental Cablevision in Centerville, OH. Today I want to recognize Continental Cablevision and share its success with my colleagues.

Cable in the Classroom was made available through the efforts of Ronald J. Testa, Jr., Continental Cablevision's district public and government relations manager. Mr. Testa made a commitment to provide Cable in the Classroom free of charge to all of the junior high and high schools in the 500 communities served by Continental Cablevision. His work made it a reality.

Cable in the Classroom is more than just TV. For students and teachers who equate television with couch potatoes, Cable in the Classroom is a real surprise. It harnesses the power of the television and provides an educational tool for teachers that truly excites students. Cable in the Classroom provides a continuous source of quality programs that engage and challenge students and teachers alike. Every program demands student involvement—from observing Congress and calling Members via C–SPAN, reporting like a journalist on CNN or writing about the excitement of space exploration and more. The program also provides study guides and support materials that help both students and teachers.

Cable in the Classroom is also flexible. Materials can be shown live, taped for later use, or edited to fit teachers' lesson plans. All of this programming is provided free—free of charge and free of commercials.

The programs available apply to every subject matter—English, math, science, and social studies. It could be a ballet from the Arts & Entertainment Cable Network. It could be an exploration of the phenomenon of tornadoes coupled with valuable safety tips from the Weather Channel. It could be a program on drugs distributed on Continental Cablevision's educational and public access channels. It could be a program on the Discovery Channel integrating match and science in a space shuttle mission. The variety is almost endless and teachers have the freedom to pick and choose only those programs which would benefit their students.

Continental Cablevision performs an invaluable service by providing Cable in the Classroom free of charge to schools. Cable in the Classroom broadens the definition of learning for students. From inside their classrooms, it can take them around the world, to outerspace and back. As parents, we are grateful that an exciting learning tool such as Cable in the Classroom is available to our children in school to enrich their education. We owe our thanks to Ron Testa and Continental Cablevision for bringing it to them.

TIRE RECYCLING NEEDS CONSIDERATION

HON. WM. S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. BROOMFIELD. Mr. Speaker, recently, John King, a retired businessman and newspaper columnist from my district sent me two editorials he had written on tire recycling. The articles appeared in several local newspapers, and indicate a growing awareness of this problem.

Representative TORRES of California has introduced comprehensive legislation, H.R. 4147, the Tire Recycling Incentives Act, which will require tire companies to purchase recycling credits proportional to their tire production. Every recycled tire will be worth one credit issued to any firm which can satisfactorily reprocess tires. H.R. 4147 approaches an environmental problem through incentives for small business and entrepreneurs. I have just signed on as a cosponsor and urge my colleagues to give the Tire Recycling Incentives Act serious consideration.

I am including Mr. King's articles which help illustrate this problem:

THE CALAMITY OF A RAGING USED TIRE FIRE

As I write this column the world's largest used tire fire is burning virtually uncontrolled and may well be burning for the next year.

The location is not so far from here in neighboring Ontario near a small town called Hagersville, which is just southwest of Hamilton.

By reading local and national newspapers and watching American television, one would be totally unaware that such an environmental tragedy has hit this part of North America.

Such is the parochial attitude that the American media exhibits toward our neighbor to the north.

I dare say that if such a calamity hit the United States, the news treatment would be quite different. The only reason I am so knowledgable about this incident lies in the excellent coverage that it has had from the Canadian Broadcasting Company and its station in Windsor.

The fire is consuming some 14 million tires, which makes it the largest used tire fire in history to date.

But there will be others and larger ones, because the problem of used tires is one that the western world has not solved, and it does not look like it will be solved in the near future.

It is estimated that we throw away annually one tire casing for every person in the country, and almost nothing is being done to recycle them.

Landfills will not take them because they take forever to disintegrate and take up far too much space. So what do we do?

We pile them up in huge mounds and sooner or later someone sets them afire. It is almost impossible to put them out once the fire has started.

Huge amounts of chemicals are going into the air and running into the ground to contaminate the ground water supply in a very nice farming area. What a pity!

Could such a calamity happen here?

Yes, it could and has happened recently on a much smaller scale.

The current rewrite of the country's solid waste program is completely inadequate in the way it treats this subject. I quote:

"Tires must be handled appropriately to avoid environmental problems. The county will cooperate with the state to develop a separate program to dispose of used tires, such as a drop off collection site".

This language will not do the trick, and environmentalists had better be out in force at the March 1 hearing on the plan at the county courthouse.

LAISSEZ-FAIRE ATTITUDE GROWING TIRESOME

Last week I discussed the problem of waste tires and the world's largest tire fire which was then under way in Haleyville, Ontario, and which, according to the latest reports, has been extinguished.

This week we are going to point out the real culprits responsible for the huge accumulation of used automotive tires and the blatant fact that neither the tire manufacturers, the makers of automobiles and trucks nor any branch of private industry or the government at any level in this country and Canada are really trying to do anything constructive about this problem which is probably the most important in the Western world.

It is my position that one of the major faults of the so-called private enterprise system lies in the fact that both the automobile industry, which sells the completed vehicle, and the rubber companies, which make and market the tires, have for more than half a century done nothing about finding a way to get rid of tires.

They simply produce and sell the product and then wash their hands of the problem and wish that it would go away. The same can be said for old vehicles, although in the latter case some recycling has been done.

Private corporations have got to rethink their place in society and their responsibilities for getting rid of the products that they manufacture. This will undoubtedly mean higher costs for cars and tires, but we cannot go along much longer disregarding the problem as we are now doing.

Wake up tire and vehicle companies and accept the responsibility for those cast-off products that are rightfully yours. If you do not do it voluntarily, then we are going to have to force you to by legislation. Storing tires in huge dumps and allowing them to catch on fire is just not good enough.

I have found out that the four used tires that I gave to Sears a month ago are being recycled and retreaded in a plant in the Chicago area, but this procedure is just a drop in the bucket.

In addition to greatly accelerated rates of research on the part of private industry, government at all levels—including Oakland County—have got to make this problem a number one priority. There is a little recycling going on such as a company in Santa Rosa, Calif., which is collecting tires from all over the country and burning them to make electricity.

Unfortunately, the environmental groups in that part of the country are complaining about the gases that go up in the smokestack. Such are the foibles of people.

U.S. COURT OF APPEALS DECISION ON TELECOMMUNICATIONS INDUSTRY RESTRICTIONS

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. MARKEY. Mr. Speaker, I call to the attention of my colleagues, yesterday's decision by the U.S. court of appeals on the AT&T divestiture case, which in part reversed and remanded the lower court's ruling maintaining the restrictions on the provision of information services by the regional Bell operating companies.

Yesterday's ruling reaffirms the need for Congress to make telecommunications policy for the Nation rather than leaving our national policymaking decisions to the courts. Almost 3 years after the U.S. district court's original ruling, the appeals court reversed and remanded that decision, returning the vital public policy issues regarding information services back to square one. The United States cannot afford to have the Nation's telecommunications future volleyed back and forth among the courts while our industries remain crippled by uncertainty, unable to make the strategic plans and investments that will bring the next generation of communications technologies to the American public.

While the court is the appropriate body to interpret antitrust law, it is not the appropriate body to make policy decisions affecting American consumers. The court itself realizes, and I quote, " * * * we see no clear evidence that ratepayer protection was part of the contemporaneous understandings of—the decree's—purposes * * * and in any event, we—the Court—believe the text of the decree generally forecloses the goal of ratepayer protection * * * ".

Clearly, yesterday's ruling demonstrates to all segments of the industry and American consumers that Congress must set a consistent, timely, and comprehensive national telecommunications policy; a policy that ensures the principles of universal service, diversity, and localism—the cornerstones of the Communications Act and the foundation on which the world's greatest telecommunications network was built.

To this end, the Subcommittee on Telecommunications and Finance is continuing to hold a series of hearings on the staff draft of the "Telecommunications Policy Act of 1990." This act would provide the appropriate vehicle to balance a gradual expansion of Bell Co. business opportunities with extensive safeguards designed to protect consumers and workers as well as promote fair and vigorous competition within the industry.

The availability of these new electronic services would not only stimulate our economy, but help the United States regain the leading edge in telecommunications technology. I urge my colleagues to join in my effort to establish a national telecommunications policy which will lead the United States into the 21st century.

THE FAIRDALE BULLDOGS: KENTUCKY STATE BOYS' HIGH SCHOOL BASKETBALL CHAMPIONS

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. MAZZOLI. Mr. Speaker, today I rise to celebrate and congratulate the Fairdale High School Bulldogs who, in Louisville's Freedom Hall, won the 1990 Kentucky State boys' high school basketball championship.

This tournament is what we in Kentucky, Mr. Speaker, call the sweet 16 and how sweet it was for Fairdale High School, and the Fairdale community.

For those of us who live in Jefferson County and are natives of that area, we know how important to the Fairdale community the high school is. Every resident of Fairdale was in ecstasy as the final seconds ticked off the game clock.

So after several years of being in the sweet 16 but without being able to bring home the championship cup, the Fairdale Bulldogs won it all. They won convincingly, and they won with class.

I would like to take this opportunity again, Mr. Speaker, to celebrate Fairdale's victory, and to salute the players: Jermaine Brown, Tyrran Scroggins, Terry Jenkins, Chris Kelso, Sean Bishop, James Gardner, Maurice Morris, Tony Wheat, Carlos Turner, David Hicks, Tim Comstock, and Jeff Thompson; the head coach, Stan Hardin; the assistant coaches: Lloyd Gardner, Andrew Bailey, Larry Hall, and Ken Able; the athletic directors; George "Butch" Greschel and Donna Miller; the cheerleaders: Jennifer Johnstone, Brenda Sondergeld, Michelle Cox, Tracy Scroggy, Carla Atwell, Wanda Eaves, Stephanie Lyons, Dana Edwards, Jennifer Whitley, Karen Clark, Leslie Moore, Penny Lanham, Amanda Weston, Rhonda Marr, and Julie Hale; the cheerleader sponsors: Beckie Hardin and Judy Barnes; the managers: German Vasquez, Sean Hood and Gary Compton; and the principal, Marilyn Hohmann, and the faculty and staff and everybody who was involved with the great victory. It brings pride to those of us who are residents of Jefferson County.

HONORING MICHAEL L. MAZZUCCA

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. GILMAN. Mr. Speaker, today I would like to call the attention of our colleagues to the heroic actions of one of my constituents, Michael L. Mazzucca, a resident of New York City, NY, who is a shining example of the humanitarian instincts of an American citizen.

On May 1, 1985, a tragic accident occurred. Mr. Carrol Barton was traveling on his bicycle in New York City when he was struck by an automobile, Pinning him against a bus. Michael Mazzucca, upon witnessing the accident, acted immediately and effectively. He moved the car, and administered the emergency first aid to the victim's severed leg which saved Mr. Barton's life.

These actions come as no surprise to those who know Mike. Due to the fact that, throughout his life, Mike endeavored to better the lives of those around him. He has been an active leader in the Boy Scouts for over 19 years, as Scoutmaster for Troop 128 and as vice chairman of the Rockland County Boy Scout Council.

Since its inception, the Boy Scouts of America have promoted such lofty values as good citizenship, honor, courage, loyalty, assistance to others, and determination. Beyond that, the Boy Scouts provide extensive training in various skills that benefit all the members of our society. Carrol Barton can attest to the value of the first aid training the Boy Scouts provide. Fortunately, because of men like Michael Mazzucca, the young people in our society continue to receive this training.

Mike's contributions to our communities, and our society as a whole, are not limited to the Boy Scouts, important as they are. In addition, Mike has served on our 22d Congressional District's Drug Advisory Committee since 1985, assisting me in my efforts to address the critical problem of drugs in our society.

I could go on about Mike's extensive service to his community and our Nation, but knowing Mike's modesty, I will desist. Indeed, the reason that we are honoring him so long after his action is due to that modesty, which precluded him from alerting people to this heroic act. Fortunately, on March 30, 1990, the Boy Scouts honored him at their annual dinner, paying homage to a man who justly deserves it.

Mr. Speaker, I invite our colleagues to join in saluting Michael Mazzucca for his heroic action which saved a life, for his civil-minded devotion to the people of our society, and for his single minded devotion to the ideals of the Boy Scouts of America.

BILL NAVE, MISSES NATIONAL TEACHER OF THE YEAR, BUT MAKES THE MARK

HON. JOSEPH E. BRENNAN

OF MAINE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. BRENNAN. Mr. Speaker, the National Teacher of the Year, Janice Gabay, was honored today at the White House, however, I think it's important to acknowledge the four finalists, in particular, Maine's 1990 Teacher of the Year, the national finalist, Bill Nave.

Bill is a teacher at the Alternative School in Turner, ME, and he was the only finalist selected who works with at risk youth and high school dropouts. I believe Bill's efforts are exceptional in building the aspirations of kids and in working with people who are frequently skipped over, or fall through the cracks in our education system.

On Wednesday, I met with Bill and a group of his students on the steps of our Nation's Capitol. These kids were exhilirating, they were excited to be in Washington and they asked insightful and thoughtful questions.

I think the fact that Bill Nave takes at risk youth and helps them to build dreams and to set reasonable goals is worth recognition and in my book, I congratulate him on being a national finalist, and Maine's 1990 Teacher of the Year.

THE REAUTHORIZATION OF THE NATIONAL ENDOWMENT FOR THE ARTS

HON. TED WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. WEISS. Mr. Speaker, I would like to share with my colleagues Garrision Keillor's article entitled "Thanks for Attacking the NEA." It appeared in the New York Times today, April 4, 1990. I believe that "Thanks for Attacking the NEA." poignantly and elegantly conveys an important perspective on the significance of the National Endowment for the Arts—the perspective of an artist.

As Congress considers legislation to reauthorize the Endowment, and the possibility of restricting the agency's ability to function as it was intended to, we must keep this agency's manifold and consequential contributions in mind. If Congress subjects the NEA to content restrictions based on political, rather than peer review judgment, we will be faced ultimately with the question of whether it is worth funding the agency at all. What price in freedom of expression and creativity will we be willing to pay to have the Government continue to fund the arts?

I urge my colleagues to look closely at Garrison Keillor's argument in support of a National Endowment for the Arts unrestricted by statutory content provisions.

The article follows:

THANKS FOR ATTACKING THE NEA

(By Garrison Keillor)

WASHINGTON.—It's a pleasure to come down to Washington and speak in support of the National Endowment for the Arts, one of the wisest and happiest pieces of legislation ever to come through Congress. I'm grateful to those who have so ably attacked the Endowment over the past year or so for making it necessary to defend it. I enjoy controversy and I recognize the adversary: they are us.

My ancestors were Puritans from England. They arrived here in 1648 in the hope of finding greater restrictions than were permissible under English law at that time. But over the years, we Puritans have learned something about repression, and it's as true today as when my people arrived: man's interest in the forbidden is sharp and constant.

If Congress doesn't do something about obscene art, we'll have to build galleries twice as big to hold the people who want to see it. And if Congress does do something about obscene art, the galleries will need to be even bigger than that. We've heard three or four times this morning that, of 85,000 works funded by the N.E.A., only 20 were controversial. I don't know why anyone would cite that as something to be proud of.

All governments have given medals to artists when they are old and saintly and successful and almost dead. But 25 years ago, Congress decided to boldly support the creators of art—support the act of creation itself—to encourage artists who are young and vital and unknown, very much alive and therefore dangerous. This courageous legislation has changed American life.

Today, in every city and state, when Americans talk up their home town invariably they mention the arts—a local orchestra or theater or museum or all three. It didn't use to be this way. Forty years ago, if an American meant to have an artistic career, you got on the train to New York. Today, you can be a violinist in North Carolina, a writer in Iowa, a painter in Kansas.

This is a revolution—small and lovely—that the Endowment has helped to bring about. The Endowment has fostered thousands of art works—many of which will outlive you and me—but even more important, the Endowment has changed the way we think about the arts. Today, no American family can be secure against the danger that one of its children may decide to become an artist.

Twice in my life, at crucial times, grants from the Endowment made it possible for me to be a writer. The first, in 1969, arrived when I was young, broke, married with a baby, living on very little cash and a big vegetable garden. I was writing for the New Yorker at the time but they weren't aware of it.

I wrote every morning and every night. I often had fantasies of finding a patron. A beggar would appear at my door one day; I'd give him an egg salad sandwich, and suddenly he'd turn into a man in a pinstripe suit, Prince Bob from the Guggenheim Foundation. But instead of him, I got a letter offering me a job for one month in the Poets in the Schools program in Minneapolis, funded by the N.E.A., directed by Molly LaBerge, which sent young writers into the schools to read and teach. In 1969, there were three such programs: in New York, California and Minnesota. Today, there's at least one in every state.

It was the first time anybody paid me to be a writer. It was the sort of experience a person looks back at and wonders what would have happened if it hadn't.

In 1974, a grant from the N.E.A. enabled me and my colleagues at Minnesota Public Radio to start "A Prairie Home Companion." The help of the Endowment was crucial because the show wasn't that great to begin with.

For our first broadcast, we had a crowd of 12 persons, and then we make the mistake of having an intermission and we lost half of them. The show wasn't obscene, just slow. It took us a few years to figure out how to do a live radio show with folk music and comedy, and stories about my home town of Lake Wobegon.

By the time the show became popular and Lake Wobegon became so well-known that people thought it was real, the Endowment had vanished from the credits, its job done.

When you're starting out—I think it is true in the arts as in politics—it seems like nobody wants to give you a dime. When you have a big success and everything you could ever want, people can't do enough for you. The Endowment is there at the beginning, and that's the beauty of it. Now my desk is filled with offers to speak, to write, to endorse, which I've thoroughly enjoyed, but I remember very well when nobody else but my mother and the Endowment was interested. I'm grateful for this chance to express my thanks.

When I graduated from college, the degrees were given out in reverse order of merit, so I got mine early and had a chance to watch the others. I remember the last graduate, the summest cum laude, a tall shy boy who walked up the stairs to the platform and en route stepped on the hem of his own gown and walked right up the inside of it.

Like him, the Endowment has succeeded in embarrassing itself from time to time, to the considerable entertainment of us all, and like him the Endowment keeps on going. It has contributed mightily to the creative genius of America: to art, music, literature, theater and dance, which to my wife and other foreigners is the most gorgeous aspect of this country. Long may it wave. I hope it lives another 25 years; I hope we will continue to argue about it.

WESTOVER AIR FORCE BASE: 50 YEARS OF SERVICE

HON. RICHARD E. NEAL

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. NEAL of Massachusetts. Mr. Speaker, for many years Westover Air Force Base in Chicopee, MA, has been an important national asset and a highly visible public reminder of the challenges facing the United States of America. On the occasion of its 50th anniversary, I ask my colleagues to join me in congratulating the men and women who have served with distinction at Westover in the past, and to wish the existing personnel all the best in the future.

Just days after the German invasion of Poland sparked World War II, the massive Northeast airbase authorized by Congress in 1939 was officially sited between Chicopee and Ludlow, MA. On April 6, 1940, the airbase was dedicated as Westover Field to honor

Maj. Gen. Oscar Westover, the former Army Air Corps Chief who advocated strategic airpower.

Mr. Speaker, Westover Field was designated as an attack base because the War Department feared the loss of Great Britain and a possible German invasion of Greenland and Canada. Westover's neighbors endured blackout conditions and were trained as aircraft spotters. After the Battle of Britain, the Westover mission was changed to training. From bases around the Nation, pilots, bombardiers, navigators, and aerial gunners came to Westover to be molded into aircrews for the Eighth Air Force operating out of England.

At the dawn of East-West confrontations, Westover became the headquarters of the Eastern Division of the Military Air Transport Service. The base reflected America's concern and became the U.S. hub for the Berlin airlift. As relief supplies were loaded aboard MATS airlifters, local citizens assembled handkerchief parachutes to deliver candy to children in the Allied sector of Berlin. Thus the "Little Vittles" nickname was born.

As the cold war intensified in the mid-1950's, Westover Air Force Base became the new home to the Eighth Air Force, and the main runway was widened and lengthened to accommodate Strategic Air Command B-52's and KC-135's. Local residents became accustomed to the constant roar of SAC bombers and tankers as the Nation faced a series of crises in Berlin, Cuba, and around the globe. But even as Westover crews were assigned to bombing missions in Southeast Asia and protesters picketed Westover's gates, neighbors of the base treated military personnel with kindness and respect.

When conscription ended and the total-force concept was initiated, Westover again reflected the needs of the Nation and, consequently, the Air Force Reserve took control of the base. Like the Massachusetts militia of the mid-1600's, reservists of the 439th Military Airlift Wing continue to serve at Westover today to fly international missions in support of U.S. foreign policy.

Mr. Speaker, I ask my colleagues to join with me in paying tribute to this historic military installation, and to the men and women who have served there honorably over the years. I am proud to have Westover in my district, and it is with great satisfaction that I offer my congratulations on the base's 50th anniversary.

TREE OF LIFE AWARD

HON. ELIOT L. ENGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. ENGEL. Mr. Speaker, my parents are constituents of Congressman HARRY JOHNSTON and listened to him recently when he spoke to the B'nai B'rith. I am today submitting for the CONGRESSIONAL RECORD, the comments that Congressman JOHNSTON offered when he received the Tree of Life Award from the Jewish National Fund:

TREE OF LIFE AWARD

I received a letter recently from an 11-year-old Coral Springs girl who seemed very much in tune with the goals of the Jewish National Fund, so I would like to take a moment to share part of her letter. She wrote of a story she learned in Hebrew school. A story about an old man who was planting a tree when the King walked by. The King asked the old man how long it would take until the tree would bear apples. The old man said about 70 years. "How old are you?," asked the King. The old man replied, "a little over 70 years old." The King was surprised, and asked the old man why he was taking the time to plant the tree if he wouldn't be alive to eat it's fruit. The old man looked up and said, "I am planting it for future generations. When I came to be, there were already trees planted by other people, and so may it be, that I will plant trees for future people."

The story is a simple one, but it communicates a basic wisdom which so many of our generation have somehow lost. It is the wisdom to live our lives with an eye toward future generations, so that their lives might be enhanced.

The Jewish National Fund has not lost sight of that wisdom, and, for that, we can all be grateful.

The story of Israel has, for generations, been the story of ceaseless struggle, buoyed by an insurmountable hope for the future. In these times of dramatic change, events in Eastern Europe and the Soviet Union coupled with political turmoil within Israel have conspired to confuse that struggle. The administration's recent comments regarding Jerusalem have not helped.

Tom Dine, the executive director of AIPAC, wrote in the New York Times last week that several administration actions have caused alarm to Jews and friends of Israel. Dine cited the President's opposition to settlements in East Jerusalem; the apparent softening of U.S. policy toward the P.L.O., coupled with increased public criticism of Israel; and the unnecessary linking of the housing of Soviet Jews with the issue of settlements in the territories.

Of all these affronts to the sentiments of Israel's supporters, the one that has caught fire and truly mobilized American Jewish sentiment is the issue of Jerusalem.

The complex political and emotional situation in the Middle East lends itself to may interpretations. And it is not uncommon or inappropriate for Israelis, Americans, and friends of Israel throughout the world to express differing opinions on the proper course for peace negotiations and strategic planning for Israel's future.

But there is one thing upon which virtually all Israelis and their allies agree: Jerusalem is the soul of Israel. Jerusalem is a symbol for Jews throughout the world, and a spiritual center for people of many faiths. As the celebration of passover approaches, Jews throughout the world will reaffirm the importance of this holy city by proclaiming "next year in Jerusalem."

That is why President Bush miscalculated so drastically when he equated East Jerusalem with the West Bank and said that there should be no new settlements of Jews in either area. In my opinion, that is why the Government of Israel is racked with dissension. That is why Americans who support Israel are in a state of shock.

We are all united in our desire to see a lasting peace achieved in this vital portion of the world. And we are disheartened that the administration's words over the last few days may have dealt a severe blow to the painstaking efforts toward peace in the Middle East. I hope our country's actions over the next crucial weeks belie the administration's harmful words, and instead, contribute to healing Israel and her people.

Mary and I, and Eleanor and Sandy Weinstock, were in Israel at the time of the Intifada. I did not know much about the Jewish National Fund until that visit. But I learned a great deal about the role the JNF was playing in Israel, and in the field of world ecology. The work you do is vital to ensuring a sound and secure future for our children and our children's children.

Earlier this week, Esther Krutick related to me her experience working for the Jewish National Fund in the early twenties. Esther said she left Hebrew each day, and walked up and down the trolley line in Worcester, Massachusetts with her blue can, collecting coins to plant trees in Palestine.

Another friend mentioned, after receiving his invitation for this evening, that one of his earliest memories was of the blue can sitting on the counter next to the cash register in his father's grocery store in Brooklyn, New York.

I am proud to be associated with an organization that has been such a vital part of American Jewry for the past 89 years. Thank you for having me here this evening, and thank you for honoring me with the Tree of Life Award.

TRIBUTE TO NEW OFFICERS OF ST. JOSEPH'S SENIOR CITIZEN'S CLUB

HON. RONALD K. MACHTLEY

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. MACHTLEY. Mr. Speaker, I rise today to honor the new officers of the St. Joseph's Senior Citizen's Club in Woonsocket, RI.

The president of St. Joseph's Senior Citizen's Club is Rita Rousseau and her first vice president will be Jean-Paul Dumais. The second vice president is Arthur Henault. Cecile Dubeau will be the secretary and Rita Dumais will act as treasurer.

The St. Joseph's Senior Citizen's Club first opened in 1975. Since then, the club has been a meeting place for the elderly and handicapped in Woonsocket. Monthly parties are sponsored by the club as well as a Christmas banquet which is very popular with the members. This year, the club is celebrating the 50th anniversary of the club's founding in May. At the present time, St. Agatha's has 780 members.

I would like to wish my best to the new officers of the St. Joseph's Senior Citizen's Club and hope that they continue to create a spirit of love among their fellow members. Their dedication to the club is a testament to their unselfish devotion to their fellow members.

CUBAN EDUCATOR DAY IN EXILE

HON. ILEANA ROS-LEHTINEN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Ms. ROS-LEHTINEN. Mr. Speaker, I rise today to remember "Cuban Educator Day in Exile" which was celebrated on April 1. A beautiful remembrance ceremony was held in Miami in memory of Dr. Humberto Pinera, a distinguished Cuban educator and philosopher who passed away while in exile, unable to see his homeland again.

A wonderful opening address was given by an extraordinary member of the Cuban community, Dr. Rolando Espinosa. Dr. Espinosa, president of Cuban Doctors in Education Association in Exile, who has repeatedly contributed his talent and time to the education cause.

After the invocation by Rev. Martin Anorga of the First Hispanic Presbyterian Church of Miami, several distinguished guests were honored at the ceremony including Mr. Paul Bell, the new superintendent of the Dade County School System, who was presented as a "Member of Honor." Also recognized at the ceremony were Dade County School Board Members Rosa Castro Feinberg, Mr. G. Holmes Braddock, Ms. Betsy Kaplan, Mr. Robert Renick, and Mr. William H. Turner. Mr. Murray Sisselman, president of United Teachers of Dade and Mrs. Maria V. Zeien, Dade County "Teacher of the Year" were also given distinctive acknowledgment.

In addition, awards of recognition were presented to Dr. Joseph A. Iannone, chairman of humanities department at St. Thomas University; Mr. Demetrio Perez, Jr., president of Bilingual Private School Association; Mr. Les Todd, principal of South Dade Skill Center; Mrs. Norma L. Delgado, assistant principal of the Miami Springs Adult and Community School; Mr. Alberto Mesa, secretary of Miami Senior High Adult and Community School; Dr. Gloria Aguila Fisher, principal of Seminole Elementary School; Mr. Thomas R. Newcomm, assistant principal of Seminole Elementary School; and Mr. Pedro Capote, a Spanish teacher at Seminole Elementary School.

Also recognized at the ceremony were Mrs. America Bermudez, principal of Kensington Park Elementary School; Mrs. Marta Cil, supervisor of the Bureau of School Operations; Dr. Emelina Espinet Borges, a teacher at Royal Park Palm Elementary School; Dr. Lemmie Deliford, principal of West Homestead Elementary School; Mrs. Elouise Slater, assistant principal of West Homestead Elementary School; and Mr. Terence N. Armbruster, assistant principal of West Homestead Elementary School.

Awards of recognition were also presented to Mr. Maria del Carmen S. Gonzalez, principal of South Miami Heights Elementary; Mrs. Claudia Hesing, assistant principal of Ben Sheppard Elementary School; and Mrs. Eloisa Menes, assistant principal of Amelia Earhart Elementary School.

Recognized with the special "Elsa Glazer" Awards were Mrs. Dorothy Bendroso Mindingall, principal of Lillie C. Evans Elementary School; Dr. Julio Carreras, principal of Charles Hadley Elementary School; Dr. Armando Piedra, counselor at Miami Senior High Adult Education Center; Dra. Gladys Pico, "Teacher of the Year" at Amelia Earhart Elementary School; and Mrs. Yamila Carballo, "Beginning Teacher of the Year" at Miami Spring Middle School.

Also recognized with the "Elsa Glazer" Award were Mrs. Beatriz Cruz, "Beginning Teacher of the Year" at Stirrup B.W.F. Elementary School; Mrs. Clara Marta Cruz, "Beginning Teacher of the Year"; Dra. Olga Lorenzo, teacher in Special Assignment-Region III; Dra. Gertrudis de la Rionda, Spanish teacher at Miami Springs Middle School; Dra. Mary Ann Polo, elementary teacher at Poinciana Park Elementary School; Mr. Gerardo Zamora, elementary teacher at Biscayne Elementary School; and Dra. Isabel Socarras, social studies teacher at Miami Springs Middle School.

Additionally, Mrs. Mercedes Capote, retired teacher; Benita Santiago, registered nurse and school volunteer; Dr. Leonardo Fernandez Marcane, professor at Florida International University; Antonio Saud, M.D., administrator for the Program for Professionals DCPS; Fernando Egea, M.D. director of the Program for Professionals; Jose Luis Corominas, M.D., professor of Medical Education; Mrs. Onelia Fajardo, Medical Education; and Mrs. Claire Frances Whitehurst, teacher at Miami Senior Adult Education Center were also recognized with the special award. On an exceptional note, Mrs. Caridad Capote was honored for 50 years of service to the teaching profession.

I commend the above mentioned people for their dedication to the teaching profession while recognizing the need to remember "Cuban Educator Day." Education is vital in today's society and it is important that we strive to continue educating ourselves.

MS. OLIVE R. BEASLEY, QUIET CRUSADER

HON. DALE E. KILDEE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. KILDEE. Mr. Speaker, I commend to my colleagues' attention the attached article from the Flint Journal about a truly remarkable human being from my hometown of Flint, MI. Ms. Olive Beasley has made tremendous contributions to the quality of life of so many of us in Flint and I feel strongly about the need to bring her story to the attention of the Congress and the Nation.

OLIVE BEASLEY CONTINUES HER LONG MARCH FOR CIVIL RIGHTS

(By Andrew Heller)

A glance at the headlines is all it takes for Olive Beasley to remember why she's here.

Apartheid's end may be coming in South Africa, and she is overjoyed by this, but closer to home, in her own back yard, the stories never seem to end about her people's struggles: drugs, crime, poverty, education, housing, racism.

Clearly, there is still much to be done. The old lioness cannot rest.

"Are you kidding?" she says, almost incredulous. "We've got a long way to go."

And so Olive Beasley—who for 16 years headed the Flint office of the Michigan Civil Rights Commission and who, since her retirement in 1980, continues to be widely regarded as a top expert on civil and human rights—continues her work.

There are her meetings, of course. She's still an active board member of the Urban League, the Urban Coalition of Greater Flint, the Legal Aid Society, the Channel 28 (University of Michigan-Flint TV) advisory board and others.

She still maintains a downtown office, where papers, speeches and clippings detailing years of struggle for fair housing practices, equal employment opportunities and the like are stored. (She's donated some of her papers to the Walter Reuther Archives at Wayne State University. UM-Flint may also start a collection of Beasley papers.)

And she's noodling with the idea of writing a book about the history of African Americans in Genesee County.

But much of Beasley's most important work is reportedly behind-the-scenes, pricking the consciences of people in positions of influence with a phone call or letter.

Do they listen?

"People listen to her, especially when it comes to race relations," says Ernelle Taylor, the Urban League's vice president for volunteers and special events. "She's one of those people who keeps us on our toes."

"She's a . . . conscience. She's very well-respected. She knows so many people," says Benjamin Davis III, president of the Urban Coalition. "She's probably forgotten more about . . . human rights than most of us will ever know."

"All I know," says Inez M. Brown, senior policy adviser to U.S. Sen. Donald W. Riegle Jr. "is that no matter how busy the senator is, if he gets an Olive Beasley letter, he's going to find time to read it."

They listen. And how.

But don't tell Beasley that. She prefers the comfort of modesty. She dislikes fanfare or fuss. It is her way.

"I still don't understand why you would want to write about me?" Beasley says, shifting in her chair and lighting a Virginia Slims.

She is at the dining room table of the upper-story flat she rents in Flint's College and Cultural area. The place is cluttered with books, magazines and newspapers. They line the tables and floors and shelves. They are both fuel and hobby. She just finished Paula Giddings' "When and Where I Enter," a lengthy tome on the impact of black women on race and sex in America.

"It was wonderful," she says, touching the cover adoringly.

She is dressed in a simple cotton dress. Nothing fancy. Her hair is mostly grey now. Her age? None of your business, she says, yet it's clear she is aging gracefully. There is an air of elegance and dignity about her slight, slow movements. Her words retain their renowned edge; her memory retains its sharpness.

She was born, she says, in Chicago many years ago. Her father was a farmer, her mother a housewife. Both died before she was old enough for kindergarten.

As was the custom among black families at the time, Elizabeth White, a family friend in the city, took her in. The woman was a widowed dressmaker whose mother had been a slave in South Carolina.

"Knowing the story of that grandmother being born in slavery and being a young

housewife in South Carolina, seeing the Ku Klux Klan riding around her house, or seeing her husband's horse come home alone and not knowing if her husband was dead or alive—you can't have that kind of background and not want to try to make this a better world," Beasley once said.

The neighborhood she grew up in was "a little United Nations. Italian. English. Jewish. Polish. Blacks. You grew up thinking of people just as people."

The family was "very much into politics," so Beasley was accustomed to being around some of the brightest lights in Chicago's black population, including Oscar De Priest, the first black congressman elected after the Reconstruction era, and A. Philip Randolph, a civil rights and labor leader.

It was Randolph, Beasley has said, who showed her how "to win dignity and decent wages for people at a time when someone did not take on large established companies and win."

Beasley studied marketing and labor relations at the YMCA College in Chicago and worked throughout World War II with the Illinois Employment Service in Moline. Someone later told her she was the first black to hold a white collar job in that town.

In 1947, she moved to Detroit, where the head of the NAACP asked if she would take a temporary job working to establish a Fair Employment Practices law in Michigan.

The three-month job turned into 10 years, but ultimately the law was passed, and Beasley moved onto organizing discussion groups for the National League of Women Voters to "get some of the hysteria out of" the McCarthy era.

Finally, in 1964, Beasley was named district executive of the Flint branch of the Michigan Civil Rights Commission.

At first, Beasley found Flint "an ugly factory town," but she liked her job and she liked the people, and she's stayed ever since.

Her most vivid memory of the 1960s civil rights movement in Flint centers around former mayor Floyd McCree's effort to enact a fair housing ordinance to end housing discrimination in the city.

Upset with the reluctance of the city council to do so, McCree threatened to resign his post, a threat that Beasley says "brought the whole town to its feet."

Beasley helped organize rallies and a sleep-in on the City Hall lawn, which attracted national media attention.

The council bowed to the pressure and passed the ordinance only to have a citizens group bring the question to a public vote.

Again, Beasley was involved in efforts to see that Flint became the first city in the United States to successfully defeat a referendum to rescind a fair housing law.

It frustrates her, then that, in her opinion, the ordinance has never been enforced.

"There's never been a case processed under it. They (the city attorney's office) never developed rules for receiving and processing cases."

In a paper she wrote for World of Difference, an anti-prejudice community program, Beasley wrote:

"Reaators, black or white, still tend to steer buyers to renters to neighborhoods where one or the other race is concentrated or to already racially mixed areas."

Still, in many other ways, blacks have progressed in Flint, she says.

"There are more blacks in key positions than at any time in the past. There are four blacks on the city council. There is a black chancellor at UM-Flint. The public library director is black. There are many blacks in managerial positions."

In that way, the civil rights struggle these days is different. In years past, it's always been for the right to vote, the need to end segregation, the right to equal job opportunities and the like.

"Today, the thrust is for political and economic parity and participation," she says, the lack of which contributes to homelessness, blight, poverty and crime.

The solution?

"Hard struggle," she says.

Which is right up her alley.

PHYSICIAN ASSISTANT SERVICES NEEDED

HON. RON WYDEN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. WYDEN. Mr. Speaker, today I am introducing, with the support of over 45 of my colleagues, legislation to provide for Medicare part B coverage of physician assistant [PA] services. This bill is being introduced as part of the House Rural Health Care Coalition legislative package for 1990.

Under current law, Medicare covers PA services provided in hospitals, nursing homes, rural health manpower shortage areas, health maintenance organizations, competitive medical plans, rural health clinics, and for assisting at surgery, However, PA services provided in a physician's office located in rural areas not officially designated as health manpower shortage areas are not reimburseable.

PA's are particularly important to rural areas which lack an adequate number of physicians because they supplement the services provided by a physician, freeing the physician to care for more people. Not only do PA's increase access to care, but they also save Medicare money by allowing for lower cost reimbursement which would have otherwise been billed and reimbursed at physician reimbursement levels.

My legislaiton would authorize Medicare to cover PA services in all remaining practice settings. The PA would still be required to practice under the supervision of a physician, payment would still go directly to the employer of the PA—not the PA—and reimbursement would still be discounted to 85 percent of the physician's prevailing charge.

At this point, it makes little sense to have different policies for physician assistants depending upon the area of the country or type of practice setting. Urban medically underserved areas are just as much in need of PA services as their rural counterparts.

I urge my colleagues to join me in cosponsoring this important legislation.

WHAT IS A BILLION?

HON. WM. S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. BROOMFIELD. Mr. Speaker, whether we are speaking of budgets or deficits, Congress deals in terms of billions every day. Unfortunately, we in Congress become too familiar with billion-dollar pricetags and billion-dollar accounts. Here is an essay written by one of my constituents, Mr. Joseph H. Ajlouny which puts this awesome figure in perspective.

The essay follows:

BILLION IS NOT A WORD

(By Joseph S. Ajlouny)

Something extraordinary happened to me this week: I turned one billion seconds old.

I report this fact not because I feel any differently—though it's a milestone, to be sure—but because it reduces the number "one billion" from an abstraction to a comprehensible measure. In so doing a valuable lesson is bourne.

Actually, to feeble beings like ourselves a billion isn't a number at all, it's a concept or a notion. We cannot visualize a billion, for example, like we can visualize a basket of one hundred apples. One person might say a billion apples would fit into a jumbo jet. A second might say they would fill up Cobo Arena. Still another might suggest that they could fit into the Silverdome. The point is, we really have no idea whatsoever. That should give us great cause for concern.

It used to be that "billion" was only helpful in describing the age of the world or the size of the universe in light years. We didn't know exactly how old or how far we were talking about, but we knew we were talking about a ton. Today we read it and hear it but rarely see it written out with all ten digits standing at attention. Billion has become more word than number. Yet we cannot afford to become desensitized to the enormity of a billion of anything. That would be a dangerous mistake in this time of hundred billion dollar budgets and budget deficits.

I know it's impossible, but let's ponder the following facts:

General Motors' and Fords' combined 1989 earnings were eight billion ($8,000,000,000) dollars;

Americans use sixteen billion (16,000,000,000) disposable diapers and two billion (2,000,000,000) disposable razors per year;

In 1988 U.S. airlines gave away seventy-seven billion (77,000,000,000) frequent flyer points.

Last year people all over the world smoked an estimated ninety billion (90,000,000,000) cigarettes and drank thirty-five billion (35,000,000,000) gallons of cola. Incidentally, the world's population is about five billion, (5,000,000,000).

Japan's automotive and electronics manufacturers reported total 1989 sales of five hundred and seventy billion ($570,000,000,000) dollars. At about 150 to the dollar, care to figure out how many yen that is?

To keep these amounts in persepective, consider that all of the salaries of all of the professional baseball, basketball, football and hockey players, including all bonuses and playoff earnings for 1989 totaled a lousy two hundred and ten million ($210,000,000) dollars. Now we're beginning to get the picture.

Now we can understand how between them, Coca Cola, Pepsico, Phillip Morris and R.J. Reynolds could afford to acquire the following "assets"; Columbia Pictures, Nabisco, Miller Brewing, Bacardi liquors, Kraft Foods, Minute Maid, Hi-C, Frito Lay, Kentucky Fried Chicken, Pizza Hut and Taco Bell. We can also understand how

Sony bought Paramount Studios and how Mitsubushi was able to pay cash for Rockefeller Center.

I'll bet, however, that if you ask the chairmen of the boards of all those companies combined not one would come close to telling you how long it would take to spend a billion dollars at the rate of a dollar a day. ANSWER: 2,739,726 years!

Yes, one billion days takes two million, seven hundred and thirty-nine thousand, seven hundred and twenty-six years to pass. Astounding, isn't it? Looking at it another way, Moses parted the Red Sea just last week; "Romeo and Juliet" was performed for the first time this morning.

There's no question about it. A billion considered in any fashion cannot be accurately imagined. It's a greater quantity than the human mind can comprehend. Though we don't get the number, we better get the message: we're talking tons and tons and tons of tons of tons of tons. Was it a former Speaker of the House McCormick who uttered the memorable line, "A billion here, a billion there, pretty soon you're talking real money."?

Many would have us believe that in this age of trillion dollar GNP's and multi-hundred billion dollar defense budgets, a single billion is international chump change. Don't believe 'em. A "measely" billion dollars could build a beautiful rail and subway system for the entire city of Detroit. Half that amount would feed all the starving children of Ethiopa and Sudan for a whole year.

Oh yeah, not to end on a sour note: in case you wanted to offer me One Billion Second birthday greetings, I'm 31 years, eight months and give or take a few days old.

INTRODUCTION OF THE MEDICAID HOME RESPIRATORY CARE ACT

HON. RON WYDEN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. WYDEN. Mr. Speaker, today I am introducing, with the support of over 15 of my colleagues, legislation to allow Medicaid beneficiaries who are dependent on a ventilator to receive care at home. This bill, the Medicaid Home Respiratory Care Act of 1990, will allow low-income ventilator-dependent individuals to be able to leave the hospital setting and return home.

Right now, Medicaid coverage for home ventilator coverage is optional. But only eight States—Arizona, Arkansas, California, Maine, Michigan, Texas, Washington, and Wisconsin—have exercised this option since its implementation in 1986.

I believe that home ventilator coverage should be available to all Medicaid beneficiaries, regardless of which State they live in. My bill will bring the outmoded, institutionally biased Medicaid reimbursement system into the 1990's and free many patients from the confines of a hospital.

Today, there are Medicaid patients who, while dependent on a ventilator, are medically stable and want to go home. But if a ventilator-dependent person happens to live in a State which has not exercised the home health option, that person is forced to remain in the hospital.

My bill is not for all ventilator patients. There will always be patients who are too medically fragile to leave the hospital. But there are many, especially ventilator-dependent children, who have a supportive home environment and would be happier receiving care at home.

I urge my colleagues to support the provision of much-needed home ventilator care to Medicaid beneficiaries by cosponsoring this important legislation.

NASA'S SPACE LEMON

HON. FORTNEY PETE STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. STARK. Mr. Speaker, I bring this article, "NASA's Space Lemon," which appeared in the Oakland Tribune on March 22, 1990, to the attention of my colleagues. The time has come for Congress to ask harder questions about spending more money on manned space stations.

NASA's Space Lemon

For Sale.—Plans for an experimental vehicle, uses yet to be determined. Final shape not yet decided. Finished product will end up in the shop much of the time. Price: If you have to ask, you can't afford it.

Who would be dumb enough to buy, you ask? The U.S. government. By the end of this fiscal year, taxpayers will have spent nearly $4 billion for preliminary work on NASA's manned space station, without much more to go on that this ad.

NASA originally slated the orbiting facility to cost $8 billion, no small chunk of change. Subsequent estimates have driven up the price tag to a staggering $30 billion. And that's only for starters.

An internal NASA study, leaked to The New York Times, estimates that 2,200 hours of astronaut space walks will be required each year just to keep the apparatus in repair. That's more than five times the duration of all space walks to date and more than 10 times as much as NASA once thought practical.

It also represents an enormous operational expense. NASA says such maintenance is "a normal part of doing business" and won't jeopardize station construction. True enough. But Congress may just decide that doing business this way isn't worth the trouble.

There's no easy way around this problem. "You can make things more robust," said Charles Price, an engineer at Johnston Space Center and expert on space station maintenance, "but you'll spend more money." You'll also increase the station's weight and power draw—increasing launch costs and cutting capabilities.

The problems could still prove a blessing if they spur Congress to review the program's very premises before more good money gets thrown after bad.

The space station's two primary missions seem suspect at best. One is to serve as a platform for low-gravity commercial research in materials science and biology. No one, however, plausibly maintains that the payoff from these endeavors is worth a $30 billion investment. The same money plowed into semiconductors, fiber optics, carbon fibers and pharmaceutical research on Earth would go a lot farther—because the experiments themselves wouldn't have to go as far.

The other mission is loftier but less concrete: to serve as a way-station for a permanently manned based on the Moon or Mars.

Reasonable people may differ over how vital it is to explore and settle these new frontiers. But no one can deny the staggering cost of the venture. The $30 billion invested in the space station will be largely wasted unless this nation, perhaps in partnership with others, commits to the infinitely more ambitious goal of landing on Mars.

"The cost of a moon-Mars mission will dwarf that of a station," says John Pike, a Washington-based space expert with the Federation of American Scientists. "Until you can tell me what your timetable is for Mars and where you're going to get the money, you've got the cart before the horse." NASA has yet to do either.

The station seems to have one ultimate mission: keeping NASA in the manned spaceflight business, traditionally the source of most of its funding and prestige. As Pike observes bluntly, "the next time a shuttle blows up, if you don't have a space station, NASA will be out of business."

That's a good reason for NASA to ask for the money, not for Congress to grant it. Between planetary probes, space telescopes and Earth-observing satellites, the United States has plenty it can accomplish in space without tossing billions more dollars down the space station's drains.

RURAL HOSPITAL PAYMENT EQUITY ACT OF 1990

HON. BYRON L. DORGAN

OF NORTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. DORGAN of North Dakota. Mr. Speaker, last year the Congress passed legislation containing a rural health care package that will provide significant relief to rural hospitals throughout the country. This package provided a badly needed special update in the payment rate to rural hospitals as well as established several policy changes to existing programs. The package also included a novel program, the Essential Access Community Hospital [EACH] Demonstration Program, designed to assist rural communities and States adapt to the changing rural health care environment.

Challenges still remain, however, to ensure that Medicare beneficiaries in rural areas have access to quality health care. The Congress must continue to recognize the unique nature of rural health care delivery. Today, along with 26 of my colleagues on the House rural health care coalition, I am introducing legislation to equalize the urban and rural standardized rates in Medicare reimbursement. This legislation addresses the issue of payment equity that rural advocates, here on Capitol Hill and around the country, have been clamoring for since the enactment of the prospective payment system.

The bill we are introducing today proposes that the rural standardized rate for Medicare reimbursement be raised to the same level as the urban rate in fiscal year 1991. As a result of the higher rural update enacted in the Om-

nibus Budget Reconciliation Act of 1989, the differential in the standardized rate stands at about a 7-percent shortfall for rural hospitals as compared to urban hospitals. I realize that eliminating the 7-percent differential would mean providing rural hospitals with a substantially higher update for next year. Nevertheless, the equalization of the standardized rates will finally bring fairness to rural hospitals in the Medicare Program.

The Congress must also look at other aspects of the overall urban/rural differential. The differential in the standardized rate is only portion of a larger differential, which can exceed 30-percent lower payments to rural hospitals than urban hospitals. A major portion of the overall differential is in the wage index adjustment. One of the problems with the current wage index calculations is that it assumes that all rural counties within a particular State compose a single labor market. The fact is, there is often a great deal of variance between rural areas within each State and there are many instances where rural hospitals are competing with nearby urban hospitals for the same staff. It seems to me that we should make some adjustments to the wage index that would recognize and correct some of these problems.

That is why we are proposing that we begin examining ways to redefine the area wage index for rural hospitals that will more accurately reflect the labor markets of rural hospitals, especially as it relates to competition with urban hospitals for professional staff. This legislation will also call for the Secretary of Health and Human Services to begin collecting data on employee compensation for each occupational category. This is what the Prospective Payment Assessment Commission [ProPAC] has recommended. However, this legislation goes a step further and calls for an evaluation on redefining the wage index for rural hospitals in such a way that establishes a separate professional wage index for each rural hospital that is tied into the nearest Metropolitan Statistical Area [MSA]. This redefinition would recognize that many rural hospitals are competing with neighboring urban hospitals for professional staff and reflect this in the wage index adjustment for Medicare reimbursements.

I understand that this year the wage index will be updated and this should positively impact many rural and urban hospitals. Nevertheless, the Congress can begin laying some ground work on addressing some of the problems in the way labor costs for hospital payment are calculated. This legislation proposes an option that could address some of the problems that rural hospitals are confronted with under the current system.

In conclusion, I wish to reiterate that the Congress should continue to work to change the inequitable basis of payments to rural hospitals. The Congress has recognized the pressing needs of rural hospitals and has made significant headway in trying to provide solutions to the problems facing rural health care delivery. But inequities still exist and the Congress must continue to address these problems. I urge my colleagues to support this legislation.

STUDENTS RISE TO DEFICIT CHALLENGE

HON. DAN ROSTENKOWSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. ROSTENKOWSKI. Mr. Speaker, for the past several weeks, my first priority has been an effort to do something serious about our budget deficit. In my speeches and conversations, I've become increasingly convinced that the public is ready for strong action.

I often remark that the children of today will end up paying our deficit bills tomorrow if we don't act soon. That message has struck a strong chord with some patriotic high school students who believe the time has come to face the music.

These students have organized themselves into a group called Students for Deficit Reduction and are attempting a national lobbying effort to press for action. I know these kids and am impressed by their skills and their seriousness.

They plan a series of activities emphasizing deficit reduction during the week of May 14, culminating with a series of events on May 18 to focus national attention on this problem. I wish them well because if they prevail all Americans will win.

I would like to share the arguments that they have been making. I wish this group well and hope my colleagues find their arguments as compelling as I do.

STUDENTS FOR DEFICIT REDUCTION

Students for Deficit Reduction (SDR) is trying to make a difference in the futures of all generations. SDR's purpose is to educate people about the deficit crisis and to enlist students in encouraging our leaders to make needed changes.

TALKING POINTS

We are concerned about ongoing budget deficits because they continue to increase our national debt, a debt we are about to inherit. The burden of this debt will mean a declining standard of living not only for our generation, but for all generations.

The interest on the present debt (even if the government doesn't borrow another nickel) is $150 billion a year. That's the third largest expense in the federal budget. It means that taxpayers must pay nearly $5000/second—or $300,000/minute—or $1,800,000/hour—that's over $400,000,000/day—every day. In fact, in the time it has taken me to tell you this, the U.S. government has spent enough on interest to have sent two of us through four years of college, or to have hired two teachers for a year, or to have housed ten families for a year.

Every time the government borrows another $150 billion—which it has done in each of the last ten years—our lifetime tax bill goes up by about $7,500. In other words, during the last ten years, our lifetime tax bill has risen by about $75,000.

What happens in a time of crisis? What happens, for example, if our economy goes into a recession and the government must borrow money? We already have a hint at the answers:

After the earthquake in San Fransisco, people asked the government for some money from the Highway Trust Fund (money that had been collected over the years from the federal gas tax and held in trust by the government) to help rebuild their roads. But there was no money—only IOU's. To get any money, taxes would have to be raised. So now the citizens of California are raising taxes to pay for the rebuilding.

The same is true for air travel. The government needs about $7.5 billion to improve airports and the air traffic control system. There's supposed to be about $7 billion in a Trust Fund to do this work. But there's nothing there except IOU's. So now we must raise taxes on airport users to pay for the things that the Trust Fund was supposed to pay for.

There is also the Social Security Trust Fund—money the government is holding in trust for our parent's retirement years—money that is being held to reduce our future tax burden. Nothing is there but IOU's either!

And none of these Trust Fund IOU's counts in the national debt! They're hidden—for now.

We can even see the problem now as our government must stand by and watch as democracy triumphs in Eastern Europe. We simply don't have enough money to help much.

Our grandparents and parents faced down a "red menace," created by the governments of Russia and China—Communism—and won!

Our generation—and our children's—will face a second "red menace," this one created by our own government—a sea of red ink.

Our parents inherited clay from their parents—their future was theirs to shape and mold. Are we to inherit stone?

The government deficits are taking money away from investment in the future. Unless we do a better job at improving our nation's productivity, our standard of living will decline even further.

We can already see this, too. Our grandparents had to give up the opportunity to own a new, stripped-down Ford to put our parents through college. Our parents have to give up the opportunity to own a new, fully-loaded Cadillac to put us through college! What will we have to give up to put our kids through college?

Even before that—how will we be able to afford housing? Do we expect to live with our parents? At least our kids will get to know their grandparents! And what will happen to our parent's Social Security as our income declines?

Maybe worst of all the debt we are piling up with foreigners. We owed almost nothing to foreigners ten years ago—now we owe about $800 billion! That's $60 billion/year in interest alone! We can already see the result—we had to sell Rockefeller Center—and some Colleges—and 7/11. What next? We can't blame foreigners for cashing in on the money we borrow from them. If we lose control of our future—we will have only ourselves to blame!

HMONG VETERANS' NATURALIZATION ACT OF 1990

HON. BRUCE F. VENTO

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. VENTO. Mr. Speaker, today I am introducing legislation which would relax certain naturalization requirements for Hmong veter-

ans who served alongside United States forces in the Vietnam war.

The Hmong Veterans' Naturalization Act of 1990 recognizes the significant sacrifice made by thousands of Hmong and other Laotian highland groups who served in special guerrilla units in the Vietnam war from 1960 to 1975. These forces were recruited and trained by the Central Intelligence Agency and bore the brunt of fighting against the North Vietnamese and Pathet Lao forces. Although they were never inducted into the U.S. Army, these units were created, controlled, and funded by the Defense Department through the CIA.

The consequences of Hmong's service in the Vietnam war was utterly devastating. The most conservative reports list 18,000 to 20,000 killed in combat between 1963 and 1971 with tens of thousands injured. In addition to the loss of life, the war also resulted in the loss of homeland for the Hmong. When the Communists took power after the war, the Hmong were targets for persecution and over 100,000 fled to refugee camps to save their lives.

The Hmong were known as fierce fighters who made great sacrifices in the line of battle. Experts estimate that up to 40,000 served in the special guerrilla units in the peak years. These forces included men, women, and children, some as young as 10 years old. The prewar Hmong population was estimated to be between 150,000 to 300,000. Using conservative estimates, some 18,000 Hmong were either killed or had to flee their homelands after the loss of the war. Thus the participation of the Hmong in United States operations in Southeast Asia, actively pursued and paid for by our Government, resulted in a loss of approximately half of the Hmong population.

While it is obvious the Hmong served bravely and sacrificed dearly in the Vietnam war, many of those who did survive and make it to the United States are having a difficult time adjusting to life here. Many of the 100,000 Hmong refugees living in the United States are separated from their family members. Considering the importance of family to the Hmong, it is a great hardship for the Hmong to have family members scattered throughout the world with little chance for reunification. Fortunately there is something we can do to speed up the process of family reunification and ease the adjustment of Hmong into U.S. society, at no cost to the Federal Government.

Once refugees are resettled outside the United States they can only immigrate to the United States as immediate relatives of U.S. citizens or pursuant the preference system. Permanent residents can sponsor spouses and unmarried sons and daughters. Other relatives including children, parents, married sons and daughters and siblings must be sponsored by citizens. Thus the key to family reunification is the attainment of citizenship.

My bill would make the attainment of citizenship easier for those who served in the special guerrilla units by waiving certain naturalization requirements which are particularly difficult for Hmong people to meet. The greatest obstacle in becoming a citizen for the Hmong is passing the English test. This is due to the unique historical and linguistic circumstances of the Hmong people. The Hmong came from the highlands of Laos where there were few opportunities for formal education. More importantly, their language was an oral one. Written characters for the Hmong language have only been introduced recently, and whatever chances most Hmong may have had for learning the written language were disrupted by the war.

As a result of this history, most Hmong came to the United States without the ability to read or write in their own language and with little or no formal education. The acquisition of English presumes prior experience with formal education and literacy skills. The Hmong have neither, and learning English is therefore extremely difficult for most Hmong, especially the middle aged and elderly Hmong. Several studies have reported on the difficulty of English acquisition for the Hmong. I'm sure other Members of Congress who represent districts with large Hmong populations have anecdotal evidence of this phenomenon as well. Since the English test is an insurmountable obstacle to the spouses and widows of Hmong veterans, and considering the great hardship they have endured as a result of their spouses' service, the legislation waives the English requirement for these Hmong as well.

My bill would also waive the residency and presence requirements for those who served in the special guerrilla units to speed up the process of family reunification. Current law permits aliens or noncitizen nationals who served honorably during World War I, World War II, the Korean conflict, and the Vietnam war to be naturalized regardless of age, period of residence or physical presence in the United States. The well-established precedent of relaxing naturalization requirements based upon service is behind the Filipino Scouts legislation passed by the House last year and currently pending before the Senate.

I would like to thank my colleague GERRY SIKORSKI who is joining me today in the introduction of this legislation today which recognizes the brave service of the Hmong people and the extreme difficulty of acquiring the English language for the Hmong people. The legislation was developed by leaders of the Hmong community in Minnesota and has been endorsed by the Lao Family Community of Minnesota and the Hmong and American Veterans Alliance, a national organization made up of soldiers from both of these groups who served together in Southeast Asia.

In addition to helping reunite families separated by the passage of years and the distance of miles, the enactment of this bill would be an important component to the full integration of the Hmong into American society. Voting and other citizenship benefits would help the Hmong adjust to the radically different society they have moved to. Our refugee resettlement efforts, which I believe have had a mixed record of success, would also be helped by the passage of this legislation.

Mr. Speaker, the Hmong served the United States for 16 years. They suffered a tremendous loss of life and homeland. I urge my colleagues support this important legislation which gives rightful recognition to a group too often forgotten in our society who served our interests when we asked them.

JIM BRADY: ON THE BRADY BILL

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. MAZZOLI. Mr. Speaker, I commend to the attention of my colleagues the following op-ed piece written by President Reagan's first Press Secretary, Jim Brady, from the Tuesday, April 3 New York Times.

Jim recently appeared before the House Subcommittee on Crime, on which I serve, to express his support for sensible firearms legislation. He delivered a gripping, riveting statement in behalf of both assault weapons legislation and the waiting period bill which bears his name.

I urge my colleagues to support us in our efforts to enact this much-needed legislation.

[From the New York Times, Apr. 3, 1990]

CONGRESS DIDN'T WANT TO SEE . . .

(By James S. Brady)

WASHINGTON.—I wheeled my way up to both houses of Congress in recent months to testify in support of legislation bearing my name: the Brady bill. It would require a national seven-day waiting period for handgun sales from gun dealers. The bill is intended to give police departments time to run a background check on the purchaser, to deny instant access of a concealable weapon to a known felon or to another John W. Hinckley Jr.

I believe that if the bill had been law in March 1981, Mr. Hinckley would not have been able to purchase the handgun he used against President Ronald Reagan, and I would not have been wounded and disabled.

It was surprising that Representatives who made a point of voting against the bill last time were conspicuously absent when I put in my two cents at the hearing. Perhaps they didn't want to see what a handgun wound can do to a human being. I'm sure it's easier to deal with the gun issue when you're talking about abstract statistics or contributions from political-action committees.

The Brady bill, still pending in both houses, is a political winner. Few pieces of legislation are endorsed by every major law enforcement group in America and backed by the overwhelming majority of voters. The point left unsaid was that voting against the bill could make the legislator a loser in November.

One thing I've learned on the campaign trail is the need to cloak political candidates in law and order positions. The average voter has a high regard for police officers, knowing they not only work for the public safety but put their lives on the line daily.

In recent political campaigns, from Presidential campaigns on down, there has been a heavy emphasis on law and order themes. Come this fall, with the growing drug-related violence in America, we'll see even more TV spots focusing on this subject.

That's why all politicians should reassess their position on guns. Concealable handguns, especially assault pistols like the Tec-9's, Mac-10's and Uzi's, are increasingly the weapon of choice of crack peddlers and drug addicts.

Law enforcement officials—police chiefs, sheriffs and the rank and file—are united in

their call for tough curbs on access to these weapons.

Just recently in Broward County, Florida, the police responded to a robbery in progress at a fast-food restaurant. They confronted two criminals armed with an assault pistol. One deputy sheriff was killed and another seriously wounded. The alleged killer—wanted in Massachusetts on three separate criminal charges—was arrested. In his wallet was a receipt for the assault pistol, which he had easily purchased from a Florida gun dealer.

There was the expected rush of politicians to the bedside of the wounded sheriff. But there was a notable lack of action in the state capitol to prevent another such tragedy from occurring. Too many legislators seem to fear lobbyists of the National Rifle Association more than they do armed drug dealers.

But if I have anything to do with it, that's going to change. I'm a Southern Illinois boy who grew up hunting and at home with guns. Assault pistols aren't used for hunting; they're only used to stalk human prey.

Responsible gun owners don't object to a handgun-waiting period and background check. The only inconvenience is for the gun dealer who can't pocket the money right away. Is this what N.R.A. lobbyists really care about?

Get ready for the next round of pious speeches from politicians on law and order issues. But you'll hear more from those in the police community asking, "How can our politicans win the drug war when they're arming the enemy?"

A CONGRESSIONAL SALUTE TO JACQUELINE RYNERSON

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. ANDERSON. Mr. Speaker, I rise today to pay tribute to an outstanding public servant and civil leader, Councilwoman Jacqueline Rynerson of the city of Lakewood. "Jackie," as she is known to her professional colleagues and friends alike, will be appropriately honored at a reception in her honor on Tuesday, April 17, 1990, which will also mark the occasion of her last city council meeting.

Jackie Rynerson has had a long and distinguished career in public service and community activities. In the 1950's she served in several key capacities. As secretary to the Lakewood Civic Council, she fought the annexation of Lakewood and aided in the incorporation of the city. She also served as a member of the Citizens Advisory Committee and the Lakewood Park, Recreation and Parkway District Board. She later served as chairwoman of the Lakewood Planning Environment Commission and Lakewood Recreation and Community Services Commission. She has also been a member of the Board of Directors for the Greater Long Beach Girl Scout Council and as a League of California Cities representatives to the National League of Cities Economic and Community Development Committee. Jackie Rynerson's leadership and dedication to the community and city of Lakewood has always been recognized by her peers. She was elected chairman of the Southern California Association of Governments Overall Work Program Committee and was the chairman and founder of the Lakewood Beautiful Advisory Council.

In 1978, Jackie was elected to the Lakewood City Council. Her responsiveness to her district and her complete understanding of the local issues won her the immediate respect of her fellow council members. This mutual respect eventually led to her election as mayor of Lakewood on three separate occasions since 1980.

In recognition of her many years of service, Jackie Rynerson has received numerous awards for her service. She was named "1986 Woman of the Year" by Cerritos College. She received the "Citation of Merit" for her work with the National Recreation and Park Association for lifetime service for improving community recreation opportunities. Jackie was also named the 1987 "Woman of Distinction" and the "Woman of the Year" by the Lakewood/Long Beach Soroptimist and the California State Legislature respectively. In 1988, Jackie received the "President's Award" for her work for and with the Senior Care Action Network.

Some of Jackie's more involved community activities include the Long Beach Area League of Women Voters, the Friends of the Lakewood Library, the Lakewood High School PTA, and the Long Beach Area Advisory Council of the Southbay-Harbor Volunteer Center.

Mr. Speaker, without a doubt Jackie Rynerson has been and will continue to be a beloved member of our community and a respected civic leader. My wife Lee and I, take extreme pleasure in recognizing her for her service and we wish her and her family all the best in the years to come.

AN UNFORTUNATE DILEMMA ON CHILD CARE

HON. AL SWIFT

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. SWIFT. Mr. Speaker, last Thursday, I cast one of the most difficult votes of my 12 years in this body. Two major educational goals I greatly value were thrown into conflict and I had to choose between them.

Last Thursday, the House passed comprehensive legislation, H.R. 3, to address the serious need for childcare assistance for our country's single-parent families, the low-income families where both parents must work, and families that live on one income to care for their children at home. The child care package offered on the floor of the House represented the culmination of at least 3 years of hard work by many Members of this body, as well as many groups and individuals who are seriously concerned about our Nation's most precious resource, our children.

H.R. 3 contained a number of very important provisions—the expansion of the Head Start Program, before and after school care, and basic quality assurances to name a few.

This is a concept I strongly support. Yet, I had to vote against the bill. I want to tell you why.

There is one portion of the bill which disturbs me a very great deal. That provision is the delivery system for providing childcare assistance. The bill calls for each State to establish a voucher system whereby parents use the vouchers to pay for child care. I have real concerns about the long-term implications of such a voucher program.

I believe that the establishment of this type of voucher program for child care will set a major precedent that will be to the enormous detriment of our Nation's public school system. In short, if we establish a voucher system as a key mechanism for child care and early childchood education, the next logical and probable step will be to extend the voucher program to K through 12. This has already been seriously proposed on numerous occasions and continues to be a primary goal of many interest groups.

What is so wrong with that? The proponents of vouchers for education argue that it would give parents the freedom to send their children to any school, public or private, and better tailor their children's education to the type and style of education the parents prefer. To me, giving parents that kind of option is not the problem. The problem is a side effect of such an approach that is called, in utility parlance, "bypass."

Here is what bypass is. Take your telephone service: It costs so much to keep that basic system operating. Those basic costs do not go down very much when fewer people use the system. The wire, the poles, the switches, et cetera still have to be there, still have to work, and still cost money whether a lot of people use them or fewer people use them. Of course, there are costs that grow and diminish with amount of customers, but these very basic costs tend to remain static, even in the face of reduced usage.

Now, what happens if some of the largest users of telephone service take most of their business away from the phone company? A large company might install its own microwave, for example, and handle communications between its own plants, or even between it and major customers by itself. All of that usage used to be on the telephone company's system—and paid to the phone company. When that customer leaves, it takes those payments away too, and the cost of that basic system must be spread over fewer customers. The result is that prices go up or service quality goes down or both. All because customers have bypassed the basic system.

Now, let me apply that analogy to our schools.

I believe that the public schools are the very foundation of the entire educational system in this country. On them rests higher education, vocational education, and even the private school system in this Nation. Weaken the public schools and the entire system is weakened.

A voucher system for K through 12 would simply establish a mechanism for a bypass of the public school system. Today parents can send their children to private schools if they wish. They should have that right. But they still contribute—as do people with no children—to the public schools and therefore they do not bypass it.

But with vouchers, that in this case would be paid for by school taxes, parents could spend that money at public schools or private schools. The result will be that more families will bypass the public school system. And that means the basic costs for running a public school system will be covered by fewer people with the additional result of higher costs or lower quality.

Perhaps that would make no difference if the public school system were not the foundation of our entire educational system. But it is and, in my judgment, bypass would devastate it. The voucher mechanism contained in the child care bill starts us on the path toward that eventuality.

It is for that reason and that reason alone I voted against the child care bill. I continue to believe that the Federal Government should provide assistance to families for child care—through grants to States and perhaps other means. There is monumental need. But to meet that need in a way that will compromise the integrity of the public schools is not a trade we should have made.

The bill passed. After conference I am sure the bill will go to the President. He has some problems with it—very different from mine—and might veto it. If not, it will become law. In that case, I sincerely hope that my reservations about it will prove wrong, that the vouchers will work for child care and not become a model for K through 12 with resulting harm to our school system.

But I think I am not wrong and I reluctantly and with great sadness voted against the child care bill.

TRIBUTE TO THE ST. LOUIS SENIOR CITIZENS CLUB

HON. RONALD K. MACHTLEY

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. MACHTLEY. Mr. Speaker, I rise today to honor the recently elected officers of the St. Louis Senior Citizens Club in Woonsocket, RI.

The president of the St. Louis Senior Citizens Club will be Constance Piotrowski, while the seat of vice president will be filled by Rose Gauthier. Georgette Guernon will fill the role of secretary and the treasurer will be Bernadette Rioux.

Throughout the year, the 300 members of the St. Louis Senior Citizens Club partake in many social events. Most notable are their Mothers' and Fathers' Day and Christmas parties.

I would like to wish my best to the new officers of the St. Louis Senior Citizens Club and hope that they continue to create a spirit of love within their home. Their dedication is a testament to their unselfish devotion to create for their fellow members.

KILDEE HONORS DR. RICHARD W. WILSON FOR OUTSTANDING SERVICE TO THE BRANDON SCHOOL DISTRICT

HON. DALE E. KILDEE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. KILDEE. Mr. Speaker, I rise today to urge my colleagues in the U.S. House of Representatives to join me in honoring an outstanding public servant, Dr. Richard W. Wilson, who is retiring as superintendent of the Brandon School District in May.

Dr. Wilson is retiring after serving the Brandon School District in Oakland County for the past 12 years. He majored in social studies and education and received a bachelor of science education and a master of arts at the University of Detroit. Dr. Wilson went on to study at the University of Michigan and received his doctorate degree in education curriculum development and administration from Wayne State University in 1966.

Dr. Wilson began his career in education in 1956 as a teacher in Livonia, MI. While at the Livonia schools he was a department chairman and later became an assistant principal of Bentley High School. Dr. Wilson left the Livonia schools in 1967, but his dedication to serving public learning institutions did not leave with him. He was principal of Adrian Senior High School and later assistant superintendent for personnel and labor relations of Adrian Public Schools before he came to his present position.

As the superintendent for the Brandon School District, Dr. Wilson's influence and leadership in advancing the educational structure of the school district will be seen for years to come. Some of his accomplishments while there include a total curriculum reorganization, a complete revision of the district's business operations, a major building program, and a comprehensive revision of the district's policies and procedures. There is no doubt that he has left his imprint on the Brandon School District.

Another indication of Dr. Wilson's involvement and concern for the future of education comes from both his professional and personal recognitions. He has consistently been elected and reelected to various county and State superintendent organizations, often serving as president. He has served as president of the Oakland County Superintendents Association, the State Council of the Michigan Association of School Superintendents to represent Wayne, Oakland, and Macomb Counties, and was appointed to the National Committee of School Superintendents of Larger Secondary Schools. In addition, Dr. Wilson has had several professional writings, such as "Merit Pay Can Work" and "Who Speaks for the Kids?" published in national education journals.

Mr. Speaker, it is indeed an honor and a pleasure for me to recognize Dr. Richard Wilson for his efforts on behalf on the citizens in the Brandon School District. I know he is now entering a new phase of his life, with new horizons and a new set of challenges. I have no doubt that Dr. Wilson will meet those challenges and will excel in whatever he pursues. His dedication to enhancing the public school system will be a lasting legacy in his honor. I know the entire U.S. House of Representatives joins me in paying tribute to this dedicated public servant and wishing him continued success in his retirement.

IRAQI THREATENS ISRAEL

HON. ILEANA ROS-LEHTINEN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Ms. ROS-LEHTINEN. Mr. Speaker, President Saddam Hussein's recent string of events reminds us of the dangers that loom in the Middle East. Just recently, Hussein reacted sharply to United States criticism of the execution last month of a British-based Iranian reporter. The hanging of the reporter, who was accused of espionage, uncovered the Iraqi plot last week to smuggle nuclear detonators from the United States to Iraq. But this repercussion was just the beginning of Hussein's uncalled for statements.

According to the April 3, 1990, edition of the Washington Post, President Hussein accused the United States, Britain, and Israel of plotting against his country. The main intent of his speech, which honored his Armed Forces, was that Iraq would use its chemical weapons against any aggressor, especially Israel.

Posing a threat to Israel's sovereignty is absurd. At a time when peace in the Middle East is a top priority, it is a disgrace that Israel must be subjected to this. Israel has stated that they have no aggressive intention against Iraq.

I commend the State Department in criticizing the Iraqi's remarks. Margaret D. Tutwiler, the State Department spokeswoman said that the remarks were, "inflammatory, irresponsible, and outrageous."

OHIO ASSOCIATION OF BROADCASTERS

HON. BOB McEWEN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 3, 1990

Mr. McEWEN. Mr. Speaker, when President Bush outlined the administration's war on drugs, he correctly exhorted all of us in every sector of society to help in this effort. He did this because drug use is ripping apart the fabric of our society. Substance abuse endangers all of us. No one is immune. Substance abuse crosses racial, social, ethnic, and economic lines. Today I want to recognize the efforts of the Ohio Association of Broadcasters in this fight.

It started with a simple idea: Many voices, one message. Last summer, Dale Bring, executive vice president of the Ohio Association of Broadcasters and his assistant Judy Masters thought about the power of the broadcast media and the danger of drugs. What, if they thought, all of the broadcast stations in Ohio were to broadcast a united message about

the dangers of substance abuse at the same time?

It was a great idea, but only the start of a massive undertaking. The wonder is Dale and Judy pulled it off. First they convinced the board of directors that it was a viable idea. Without the board's support the idea would have died, but it did not. The board of directors set aside individual parochial and business considerations and embraced the project. The board then worked to get the support of individual broadcasters across the State.

I want to recognize the members of the board of the Ohio Assocation of Broadcasters who worked so hard to make this project a reality. First the OAB Officer:

President, Gary Petricola; vice president, Gary Robinson; corporate secretary, Fred Anthony; past president, Thomas S. Stewart; OAB general counsels, William Kloss and James Gross; and, of course, executive vice president, Dale V. Bring, and assistant, Judy Masters. Dale and Judy coordinated the entire effort with able assistance from the other members of the board: Tony Kiernan, John Llewellyn, Dave Miller, Xen Zapis, Gary Kneisley, Richard Elliott, Richard McBroom, and last but not least Roger Hinerman of WLGN, Logan in my own Sixth District.

No other event or issue in memory has ever prompted this level of cooperation and teamwork among the local media. Breaking down barriers of competitiveness, television stations joined together as markets to produce unique local programs in Dayton, Columbus, Cleveland, and Toledo. Television and radio stations donated their employees' staff time and the advertising revenue from the 2 hours of primetime broadcasts. Cincinnati radio and television stations and Youngstown television stations committed $2 million for antisubstance abuse public service announcements. Many newspapers across the State contributed their own special coverge.

All of the effort came together on March 7, 1990 as 22 television stations and 126 radio stations across the State of Ohio delivered antisubstance commercial-free programming from 8 to 10 p.m. to an estimated 7 million people. Almost every radio and television station in the State participated. Dale and Judy's idea of last summer had become reality.

The television and radio stations of Ohio which performed this great service form a special honor roll and I want to recognize them all. Led by the Ohio Association of Broadcaster's board of directors, all of these stations set aside commercial interests and harnessed their combined power as mass media to deliver a message of unquestioned importance to our society. The March 7, 1990 broadcasts were a stupendous achievement on their own. I also commend them to you, my colleagues, as a model for broadcasters across America.

The honor roll of Ohio broadcasters who devoted 2 hours of primetime programming on March 7, 1990 to send a united message about the dangers of substance abuse are as follows:

TELEVISIONS

WKYC-TV—John Llewellyn, 1403 E. Sixth, Cleveland 44114.

WOIO-TV—Dennis Thatcher, 2720 Van Aken, Cleveland 44120.

PRESIDENT BUSH'S PASSOVER MESSAGE

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. GILMAN. Mr. Speaker, earlier today I was pleased and proud to attend the Passover message ceremony at the White House. Today's event recognized the many changes that have occurred in the past year, including the participation at this ceremony of Vladimir "Zev" and Carmella Raiz, now of Jerusalem, Israel, but formerly of Vilnius, Lithuania.

In his remarks, President Bush referred to Passover as the Festival of Freedom. Indeed, Mr. and Mrs. Raiz were Soviet Jewish refuseniks for 18 long years. Just a few weeks ago, on March 6, 1990, I was able to call Carmella into my office and inform her that permission had been granted by the personal decree of Soviet President Mikhail Gorbachev.

Carmella and Zev will now be able to celebrate their first Festival of Freedom, Passover, in real freedom, in Israel. The age-old refrain of the Passover seder, "Next year in Jerusalem," has become for them, a reality. They and so many other thousands of Soviet Jews now en route to Israel, will share in this unique taste of freedom by commemorating a holiday that marks the passage of the people of Israel from slavery in Egypt to freedom in the promised land.

Mr. Speaker, freedom for Soviet Jewry is a matter that has for many years been a cause celebre for me personally. Each time I learn of a refusenik family who has appealed for help, my heart goes out to their simple desire for religious and cultural freedom. Natasha Stonov, also in attendance today, remains refused. Her husband, Leonid, was forced to remain behind in Moscow when she was granted a visitor's visa for the United States. I know that President Bush will do everything he can do to obtain that freedom for the Stonov's at the earliest possible opportunity, and that many of us in Congress will do our level best as well.

I would, therefore, like to take this opportunity to insert the President's remarks into the CONGRESSIONAL RECORD. I know that my colleague's will find his message to be of great interest.

Mr. Speaker, Passover is the Jewish holiday of redemption. The White House ceremony today was a poignant reminder that religious freedom cannot be taken for granted. Our ad hoc task force on Soviet refugees, on which I serve as chairman, has been closely monitoring all aspects of the problems facing Soviet Jews. We will continue to press for free and open emigration, compliance with the Helsinki Final Act and Jackson-Vanik amendment, as well as for both direct commercial and indirect charter flights to Israel. It is only with these components that Soviet Jews can exercise their birthright of "Next year in Jerusalem" as a tangible reality.

It is therefore with great pleasure that I commend President Bush's remarks today for the edification of my colleagues.

REMARKS BY THE PRESIDENT AT CEREMONY FOR SIGNING OF PASSOVER MESSAGE

Mr. Vice President, Mr. Secretary and distinguished guests. Welcome to the White House. Today, we are marking Passover, known as the "Festival of Freedom," a poignant occasion in the year that has seen freedom's lights begin to glow all over the world—in Eastern Europe, in Central and South America, in Africa, and even in the Soviet Union.

"Let my people go." Those were the words of Moses nearly 4,000 years ago, when the Israelites took the first step on the march from captivity to freedom. All Americans share in the solemn pride of millions of Jewish men, women and children everywhere as they commemorate the Exodus. It

was a journey of courage and strength, toward the dream of a better tomorrow.

And today, as well, people all throughout the world have continued that epic journey, a quest, for a new life of liberty and peace. We support them in their struggle for democracy. We admire them for the strength of conviction. And we pray for their success.

This is a special time of rejoicing for the more than 15,000 Soviet Jews who have made their way to Israel this year. We are proud to have lent a helping hand, over the years, to make possible the historic emigration, from the Soviet Union, of those who have long sought to leave. The modern exodus is a great event for all those who delight in human freedom. The United States has worked hard to open up this lifeline. And we will continue to do everything necessary to make it possible for Soviet Jews to get to Israel, including continuing to press for direct and indirect flights. We are glad that so many will celebrate the seder in Israel, and we're going to keep working so that many more can join them.

As we remember the Exodus, it is my deep honor to welcome Zev Raiz to the United States, after 18 years of waiting. Zev—(Applause.) Zev and Karmella, may you and your children enjoy many years of happiness together in your new home in Israel. For nearly two decades of darkness, you've been a brave symbol for all refuseniks. And we acknowledge and then applaud the dramatic changes that have taken place in the Soviet Union, making possible the emigration of many who have long sought to leave. But we must not—and I can assure you, we will not forget those who are left behind.

And I'd also like to welcome Natasha Stonov to the White House. I admire the courage and determination that you and Leonid, your husband, have shown through 11 long years of waiting. You have become the voice of the refusenik community, and your steadfast efforts have been invaluable to us as we strive to convince the Soviet leadership to act on its promises.

I regret that another Passover is here with Leonid still in the Soviet Union. I wish that he were here with you in America, so that he, too, could experience the freedoms we enjoy. And we ask that you convey a message to Leonid and all others who still await freedom: They are not forgotten.

The Nobel Laureate—a friend to so many in this room—Elie Wiesel said, "Just as despair can come to one only from other human beings, hope, too, can be given to one only by other human beings." Zev, you have given us hope. For that, we admire you. And together, we look forward to the day when no nation interferes with the faith of any of its people.

So thank you all for being here with us on this very solemn and special occasion. And, once again, I rejoice in your happiness, and we're so pleased you're here. And now I will sign this. (Applause.)

THE 30TH ANNIVERSARY OF THE RIVERDALE MENTAL HEALTH ASSOCIATION

HON. TED WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. WEISS. Mr. Speaker, I rise today in recognition of the Riverdale Mental Health Association's 30th anniversary on April 28. I wish to commend the association for its excellent record of service to the residents of the northwest Bronx.

During the past 30 years, the Riverdale Mental Health Association has helped thousands of area residents through its outstanding program of mental health services. The association's programs are licensed by the New York State Office of Mental Health and the New York State Division of Substance Abuse Services. Their comprehensive services cater to the special needs of children with learning disabilities, adults discharged from psychiatric hospitals, substance abusers, at-risk children, the elderly, families in crisis, and other groups. In the last several years, the association initiated a resale shop which provides prevocational training for chronic patients and a 15-bed supervised community residence.

The Riverdale Mental Health Association fully deserves its longstanding, excellent reputation for the quality of its work and its contribution to the stability and vitality of the northwest Bronx community. I congratulate the association on its upcoming 30th anniversary and wish it many more years of continued success and service. Its performance is one of the many reasons which makes me proud to represent the people of the 17th Congressional District of New York.

THE VFW VOICE OF DEMOCRACY SCHOLARSHIP PROGRAM TENNESSEE WINNER

HON. MARILYN LLOYD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mrs. LLOYD. Mr. Speaker, I am pleased to commend Alice Tym, a young woman from Tennessee's Third Congressional District, and the State's winner of the VFW Voice of Democracy scriptwriting contest.

Alice was asked to write an essay on "Why I Am Proud of America?" Her entry, which focused on a recent trip to China, proved to be the best in Tennessee. Alice is a sophomore at Ooltewah High School, in Hamilton County. She, her high school, and Hamilton County have reason to be proud.

I respectfully request that her essay be included in the RECORD.

WHY I AM PROUD OF AMERICA

Why I am proud of America. This August, I stood on Tianamen Square in Beijing, China. The blood had been washed away from the patterned pavement, but the trends from the tank tracks were still visible. Soldiers with machine guns surrounded the monuments and only seventeen people with proper passes and identification were allowed on this ninety-eight acre square. Tianamen Square is supposed to celebrate heavenly peace and the founding of the Peoples' Republic of China. Why am I proud to be an American? I saw firsthand what democracy really means. The United States is the symbol of freedom to the whole world. In China, students were shot for erecting a symbolic state of liberty. Our Statue of Liberty is a national symbol respected by leaders and common citizens alike. Our Statue of Liberty represents hope to the world and its meaning has remained unchanged since it was first erected on October 28, 1986. People still dream of coming to America. My birthright is only a prayer for millions of people all over the world.

I confess to taking that birthright for granted until I visited China. Whenever my family wants to go on vacation we just go. In China, a person has to receive permission from his cadre or leader of the unit where he works. Then he has to carry personal documents like a passport and produce them on the train or at the airport. A ticket just simply isn't enough! Every move he makes is closely controlled by a Communist Official. We can travel anywhere in the United States at will. And, our states are united. In China, some regions are more important than others and receive better funding for schools, roads, and industries. Even though China is larger than the United States it has only one time zone . . . Beijing time . . . and everyone must live by Beijing time. Our capital is important, but it does not dictate the manner of living in the rest of the United States because we have representation of all of the people. Our federal government is strong, but so are the governments of our states. I am proud to be an American, but I am also proud of my state and its role in American history.

As our land is united so are its people. My country makes me proud because it has maintained an identity of its own and still allowed its people to maintain their individual rights and freedoms. Hispanics, the Irish, the Jews, the Afro-American . . . all have woven the colorful American tapestry. In China, ever since Mao ZeDong came to power October 1, 1949, there has been a strong effort made to wipe out minorities, destroy traditional religions, and even break up families. My guide in Guangzhou has a wife and a six year old daughter in Shanghai, a thousand miles away, and only gets to see them two weeks out of the entire year during his vacation. I'm proud that my country considers all races and religions equal and of value. That means my country needs me. It needs all of us. We are the people who represent freedom to the world and we have a responsibility to America and to the world to maintain our democracy. I want the United States to be as proud of me as I am of the United States.

A GREAT FLORIDIAN, A GREAT AMERICAN

HON. ANDY IRELAND

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. IRELAND. Mr. Speaker, Florida has lost a favorite son, and I have lost a dear friend. I am speaking of William Mercer Hollis who passed away recently in Lakeland, FL.

Bill Hollis moved to Florida with his parents, and began his career in food service in 1928. At the end of World War II, Bill Hollis joined George Jenkins in what is today one of Florida's finest business enterprises—Publix Supermarkets.

Publix has grown beyond even their early dreams because of the values instilled in the company by these men and the leadership they offered. Today, there are few in Florida who have not shopped in a Publix store and

been treated to good service, quality products, and a fair price.

Bill Hollis was a man of great integrity, of keen intelligence, and genuine compassion toward his fellow man. He was a wonderful story teller, often weaving life lessons into grand tales and anecdotes. He was a tireless leader in his community, putting his personal efforts into many civic and charitable causes through the years. He served as the mayor of Lakeland, as a deacon in his Southside Baptist Church, and on the Governor's State educational panel.

He was also a Mason of the highest order. During his affiliation with the Masons, Bill served as the Master of the local Masonic Lodge, Sovereign Grand Inspector General for the State of Florida and Grand Master of the State. His membership in this group was a source of great pleasure and pride.

There are few who have made such a mark and left such a legacy as Bill Hollis. His son, Mark, has said that his father asked, "If you ever think of me, think of me kindly as having loved my fellow man." Those of us who had the privilege of knowing Bill Hollis will always think of him kindly and with great respect and we will miss him.

INTRODUCTION OF THE SUSTAINABLE AGRICULTURE AND CLEAN WATER ACT OF 1990

HON. ARLAN STANGELAND

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. STANGELAND. Mr. Speaker, today I am introducing legislation to promote sustainable agriculture—including best management, integrated crop management, and integrated pest management practices—so we can increase farm profitability while improving surface and ground water protection efforts. The sustainable agriculture and Clean Water Act of 1990 is a nonregulatory, fiscally responsible approach to integrating the two goals of profitable agricultural production and environmental protection.

My bill will increase USDA's and EPA's efforts to provide information and technical assistance to farmers, State and local officials, manufacturers and dealers of fertilizers and agricultural chemicals, and the general public.

It will help to make key terms such as "sustainable agriculture," "integrated crop management," "integrated pest management," and "best management practices" part of USDA's, EPA's, and the agricultural community's working vocabulary.

Title I relates to USDA programs and activities within the jurisdiction of the Agriculture Committee. Sections 101 and 102 provide important policies and definitions. Section 103 establishes a sustainable agriculture policy and integrated crop management program within USDA. Together with the definitions in section 102, section 103 may well form the heart of the bill. It should lead to significant water quality benefits as well as site-specific integrated crop management programs.

Section 104 goes well beyond definitions and technical assistance. It makes important substantive changes to the Conservation Reserve Program. In keeping with some of the recommendations of the administration, environmental groups and countless other organizations, my bill makes the CRP more environmentally responsive by allowing for the enrollment of wetlands, filter strips, and other critical areas to increase water quality and protect wildlife habitat and other resources. It incorporates all of H.R. 4353, the Wetlands Conservation Reserve Program Act of 1990, which I introduced on March 21.

Section 105 establishes a soil testing program within USDA to help individual farmers, USDA, and policymakers at all levels get a better understanding of the potential for ground water problems and the fate and transport of agricultural pollutants.

Section 106 establishes a nutrient management education program within USDA. This will help provide more information to farmers, dealers, and others so we can use and dispose of nutrients in a more cost-effective and environmentally sound manner.

Section 107 expands upon the ongoing research initiatives within USDA to improve our data base on the link between agriculture and water quality.

Title II relates to Clean Water Act programs, all of which are within the jurisdiction of the Public Works and Transportation Committee. The bill reauthorizes and strengthens key provisions dealing with agriculture and water quality issues set to expire this fiscal year or next. Section 201 establishes in the Clean Water Act a ground water protection goal, thus recognizing the importance of our underground water resources and the close relationship between surface and ground water—two inextricably linked components of the hydrologic cycle.

Besides having a strong emphasis on ground water, title II contains important reauthorizations and refinements to the section 319 Nonpoint Source Management Program, the section 208(J) Rural Clean Water Program, and the section 314 Clean Lakes Program. The bill authorizes such sums as may be necessary for each of these important programs through fiscal year 1995.

Title II also addresses interagency coordination, provides clearer cross references between section 208(J) and section 319, improves efforts to monitor water quality progress, and encourages watershed pollution prevention activities.

Mr. Speaker, I am hopeful the Agriculture Committee can include title I or at least some of its key components in the 1990 farm bill. I would also hope to see the thrust of title II's provisions become part of the Clean Water Act reauthorization debate in the Public Works and Transportation Committee. I look forward to working with my colleagues both on and off the committees in an effort to promote sustainable agriculture and clean water.

CIVILIAN CONSERVATION CORPS CELEBRATES ITS 57TH ANNIVERSARY

HON. ARTHUR RAVENEL, JR.

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. RAVENEL. Mr. Speaker, I was informed by one of my good friends, Durward Stinson of Charleston who is a past southeast director of the National Civilian Conservation Corps [CCC], that this Saturday, April 7, the CCC will proudly celebrate its 57th birthday. I would like my colleagues in the House to join me in recognizing the outstanding accomplishments of this fine group.

The first CCC camp was established under President Franklin Delano Roosevelt in George Washington National Forest, Skyline Drive, Edinburg, VA. Between 1933 and 1942, nearly 1 million men and women from all branches of the services were associated with the CCC operation. Enrollees ranged from under 18 to veterans of World War I, and camps were in every State plus Puerto Rico and the Virgin Islands. The CCC became the greatest challenge in human relations in the history of our country.

The CCC's accomplishments of building, rebuilding, planting, preserving, protecting and restoring our natural and national resources from 1933 to 1942 are not recorded in our libraries or history books, nor are their contributions to World War II from 1942 to 1945. This is the largest group of forgotten men and women in the United States. Over 4 million CCC people have never been recognized or given credit for what they have done and are still doing for our country.

There is no better time than this Saturday, when CCC observes its 57th anniversary, to give this fine group of men and women their deserved recognition.

WHY I AM PROUD OF AMERICA

HON. RICHARD A. GEPHARDT

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. GEPHARDT. Mr. Speaker, I would like to bring to my colleagues' attention an award-winning essay written by one of my constituents, Heather Michelle Beach. Ms. Beach, a high school senior in St. Louis, was the Missouri State winner of the annual Voice of Democracy broadcast scriptwriting contest, sponsored by the Veterans of Foreign Wars and its ladies auxiliary.

The theme of this year's competition was "Why I am Proud of America." Heather Beach's essay demonstrates both excellent writing skills and an admirable appreciation of our country and its democratic values. I congratulate her on her achievement.

I also salute the Veterans of Foreign Wars and its ladies auxiliary for their 43-year commitment to fostering scholarship and patriotism in our young people through their excellent Voice of Democracy program.

WHY I AM PROUD OF AMERICA
(By Heather Michelle Beach)

In between hungrily nibbling on my pencil eraser and glancing furtively at the blank face of the classroom clock, I wondered how it happened. The writers of history text books had, it seemed, formed a conspiracy. They must have met one sour, Sunday afternoon and mutually agreed to make all text books so boring that students hopelessly wished details of the past to stay there. The question is . . . why? An American history book should teem with adventure stories of brave pioneers, action-packed articles of wartime crises, and heart-warming tales of true loves tragically separated for the sake of Democracy only to be reunited in times of peace.

Was it not for the saving grace of audio-visual aids and a dynamic teacher, I might not survive American history. My teacher glories in springing deep, thought provoking questions on unsuspecting, and usually inattentative pupils. Alas! Today she chose me. "Why are YOU proud of America?"

Talk about a million dollar question! How does she expect me to answer this? It's too general! What makes me proud of America? An endless list of reasons scrolling towards Eternity instantly pops to mind. A list so long in fact, that I promptly forget every answer. Such a simple question, why should the answer be to promptly forget every answer. Such a simple question, why should the answer be so tough? Why am I proud of America? What exactly is she looking for?

"I am proud of an America that balances trade deficits and limits monopolizing foreign competition". That's much too technical. How about: "I am proud of the industries America has initiated and the convenient method of displaying merchandise in ultra shopping malls"! That's a bit too insouciant. She'll want a more moderate answer.

"I am proud of an America that allows the freedom of choice". Can I expound on that? Let's see . . . "In America, I can choose to excel, or choose to vegetate. I have the right to believe as I wish and express those ideas to my fellow countrymen. I may choose where or whether to worship when I please. Who I will go out with, where we will go, when we will leave, and what time we will return . . . all of this is up to me.

"My America says, 'Be all that you can be. You may do anything . . . just do it to the best of your ability.' If you will do nothing with your life, at least it is your choice to do nothing".

Later that night I pondered my answer. The freedom to choose . . . why are we so serendipitous while some of our sisters and brothers do not have the right to life's basic amenities? When were we bestowed with the gift of freedom?

Long ago, early Americans had a dream. They envisioned a young nation that could endure and triumph, and more importantly, they lived for that dream. My ancestors struggled through wars and depression, famines and natural disasters. My grandfather put his nineteen-year-old aspirations on hold while he went to India to fly combat planes in World War II. My grandmother worked for the USO while she prayed for his safety and hoped for a promising future upon his return.

Even today, men and women dedicated to the spirit of freedom risk their jobs, welfare, and even their lives to keep the dream alive. Though their contributions may seem less dramatic, today people I love work for democracy and the land they love. My father counsels veterans. My mother sends medical supplies to Third World countries. Why do they work so hard to keep the dream alive? The answer is simple: to ensure the freedoms fortified by the stability of a "more perfect union" for themselves and their offspring.

As a child of so many great Americans, I extend my gratitude. I am proud to be an American. I am proud of my country because my country is proud of me.

A CONGRESSIONAL SALUTE TO BILL DEMERS

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. ANDERSON. Mr. Speaker, today I rise to pay tribute to W.C. Demers on his retirement as special assistant for the Communications Workers of America [CWA] District 9. W.C., or Bill to his friends, leaves his latest office after 45 years of selfless service to the southern California labor movement.

He built a career on helping others to make life better for themselves and their children. Bill held the post of vice president of CWA-9 himself before assuming his current advisory role. Previous to that he was vice president of the Los Angeles County Federation of Labor, AFL-CIO, and a member of the executive board of the Federation's COPE board. He is vice chair and a founding member of the Los Angeles Business Labor Council. His distinguished career also includes previous assignments as planning commissioner, president of the State CIO Council, and vice president of the State AFL-CIO.

Not only is Bill a true leader, he is a teacher and visionary as well. A man ahead of his time, Bill sought business-labor partnerships to better prepare American industry for a more competitive future as a founding member of the Los Angeles Business Labor Council and as a member of the California Commission on Industrial Innovation. As a founding member of the Labor Center Advisory Committee, Bill serves today on the labor advisory committees of Cal State Dominguez Hills and UCLA, developing labor studies educational programs and helping to prepare the future workers of America for tomorrow's challenges.

For all that Bill has done in the past and will continue to do in the future, I would just like to say thanks. My wife, Lee, joins me in honoring him for his lifelong record of achievement, dedication, and service. He is an example for us all.

THE CHIEF GALL INN

HON. BYRON L. DORGAN

OF NORTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. DORGAN of North Dakota. Mr. Speaker, the site selected by the tribes and the Indian Health Service for the regional drug and alcoholism treatment center in the Aberdeen area is the Chief Gall Inn, near Wakpala, SD. While the project is desperately needed, the Federal agencies involved have continued to delay the project. Among other things, the Indian Health Service [IHS] more than a year after agreeing to the site has now called for yet another feasibility study before moving ahead with the project.

This will involve several more months of delay. IHS' current schedule calls for construction—which is actually renovation of existing structures—to be completed no sooner than March 1992. There is no reason this project should take 2 more years to become operational. IHS must streamline its process and complete the Chief Gall Inn treatment center project promptly, to provide treatment for Indian youth who are not now being properly served.

I bring this to the attention of my colleagues in connection with the consideration of S. 1813, which modifies the Indian Alcohol and Substance Abuse Prevention and Treatment Act. That law provides the authority for the Chief Gall project. I urge my colleagues to support aggressive implementation of this law.

TRIBUTE TO NEW OFFICERS OF WATERVIEW APARTMENTS

HON. RONALD K. MACHTLEY

RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. MACHTLEY. Mr. Speaker, I rise today to honor the members of the board of the Waterview Apartments in Woonsocket, RI.

The chairman of the board will be Nelson Coderre. The other board members will remain William Piette, Helen Ducharme, Pearl Peloquin, and Camille Coupain.

I would like to wish my best to the new officers of the Waterview Apartments as they continue to create a spirit of love and hope within their home. Their dedication is a testament to their unselfish devotion to their fellow tenants.

KILDEE HONORS DR. MAX E. DODDS

HON. DALE E. KILDEE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. KILDEE. Mr. Speaker, I rise today to pay tribute to a man who has served as an outstanding leader in the medical profession and in my hometown of Flint, MI, for more than 47 years, Dr. Max E. Dodds.

Born in Silverwood, MI, Dr. Dodds received a bachelor of arts degree and his M.D. degree from Wayne State University. He served his internship at the Woman's Hospital of Detroit, followed by 2 years in the U.S. Navy. After serving in the Navy, Dr. Dodds had his residency in surgery at the Hurley Medical Center, followed by a 3-year residency at the Memorial Cancer Center in New York City. In 1953, Dr. Dodds returned to Flint where he established his practice in surgery and became a highly respected surgeon, teacher, and citizen.

Dr. Dodds distinguished himself in innumerable ways, giving of himself generously so that those around him would benefit. He was a member of countless organizations, including many professional, public service, and educational groups that serve not only the Flint area but the entire Nation as well. On the national level, Dr. Dodds was an active member of the American Medical Association, the American Society of Clinical Oncology, and the American College of Surgeons.

While he held his participation in these and other national organizations dear, it was on the State and local level that Dr. Dodds proved himself to be most active. Dr. Dodds served as a committee member and as a chairman of several committees for the Michigan State Medical Society, and he also was actively involved in leadership roles with the Genesee County Medical Society. Besides serving on several committees, Dr. Dodds also served as president of the Flint Academy of Surgery. Dr. Dodds has also dedicated countless hours to the American Cancer Society at the county and State level. He has served on the board of directors, on committees, as president, and as committee chairman. Until 1985, he served on the National Board of Directors of the American Cancer Society. He has also served such education-oriented organizations as the University Affiliated Hospitals of Flint.

Besides being a member of these many organizations, Dr. Dodds has also shown himself to be one of our Nation's most skilled surgeons. At St. Joseph Hospital in Flint, he served as the chief of surgery for 5 years. He almost single-handedly ran the Hurley Medical Center, where he was chairman of the department of surgery, the director of surgery, a member of the graduate education committee, director of surgical education, chairman of the cancer committee, chairman of the critical care committee, and chairman of other committees of monumental importance to the medical center. Through his hard and efficient work, Dr. Dodds has eased the pain and suffering of countless people. He has served as a beacon which all of his fellow surgeons and health care colleagues have striven to emulate. Through his relentless, often thankless persistance in providing quality health care to all who require it, Dr. Dodds has proven to all who know him what can be achieved through hard work and staunch dedication.

Dr. Dodds has also distinguished himself in many community-based activities. He served as president of the Musical Performing Association, as well as being an active member of the board of directors of the Flint Institute of Music. He is also a member of the board for the Community Council, a board member at Greenville College, and a dedicated member of St. Paul's Episcopal Church.

Dr. Dodds has received many honors and awards spanning his many years of service. Dr. Dodds has 14 peer reviewed publications, was awarded the Squibb Senior Fellowship at Sloan Kettering Institute, and has received the American Cancer Society Annual National Division Award in 1985. He has been awarded the Michigan State Medical Society Flag Award, as well as the American Cancer Society Certificate of Merit. Michigan State University has appointed Dr. Dodds clinical professor of surgery in their College of Human Medicine in recognition of his great professional skill and his great knowledge in the field of surgery. Perhaps the most fitting of the awards received by Dr. Dodds was the Genesee Medical Society Presidential Citation for Lifetime Community Service. Dr. Dodds was the first person ever awarded this extremely honorable citation, as never before did anyone do so much for so many people in so many ways.

Mr. Speaker, it is with great honor and pride that I herald the achievements and contributions made by Dr. Dodds to his community. My district has been extremely fortunate to have received the services of Dr. Dodds for so long, and I urge my colleagues to join me in paying tribute to this great man. It is not often that we come across a man such as Dr. Dodds who has served his fellow citizens in so many ways; first in the Navy, then through active participation in community events, and finally through his skilled services as a surgeon. In my many years of public service, I have seen many people doing positive things for those around them. Few people, if any, have surpassed the achievements of Dr. Dodds. I would like to thank Dr. Dodds for his many years of selfless service to his fellow citizens, and I urge everyone to join with me in honoring this great man.

ELENA BONNER CALLS FOR RECOGNITION OF LITHUANIA

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. GILMAN. Mr. Speaker, an open letter was recently sent by Elena Bonner, the widow of Andrei Sakharov, to President Bush regarding our Government's position on Lithuania. She informs the President that her husband would have called upon him to act and so she calls upon him to recognize the Republic of Lithuania. I urge my colleagues to read her letter, which follows, and I request the full text be printed at this point in the RECORD:

MARCH 26, 1990.

The lawful Lithuanian government, acting on the will of the great majority of its population, has proclaimed the independence of the Lithuania.

The statements by your government express hopes for the peaceful resolution of the situation. But in Lithuania the tension is growing, fed by the increasing Soviet military presence. The psychological atmosphere is such that at any moment the incidents of violence can be provoked. That can endanger President Gorbachev's position and drastically slow down or completely stop the process of democratization in the Soviet Union.

For half a century the government of your country considered unlawful and refused to recognize the incorporation of the Baltic states into the Soviet Union. That was in line with the U.S. democratic traditions. It was a moral statement on the Molotov-Ribbentrop pact, or, to be exact, on the bargain struck between Stalin and Hitler. Was such a position just empty words, that deceived American people and the whole world? Only actions can answer this question—by immediate recognition of the Republic of Lithuania and the establishment of the diplomatic ties with it. The U.S., because of its unique role in the world, and you, Mr. President, have a grave historic responsibility.

I am addressing you because I know that Andrei Sakharov would have done it. Back in 1988 he wrote that one should not fight the separatist tendencies but try to treat the problems that are causing them. The government of the USSR had failed to act timely. But it's mistakes must not be paid for with the blood of the Lithuanian people, who, at the hands of Stalin, have lost almost a third of the concentration camps and in the Siberian deportation.

I call on you to immediately recognize the Republic of Lithuania.

Sincerely,

ELENA BONNER.

MAKING EARTHQUAKE INSURANCE AFFORDABLE AND AVAILABLE

HON. AL SWIFT

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. SWIFT. Mr. Speaker, today eight of my colleagues and I have introduced comprehensive legislation to make earthquake insurance more affordable and available.

The Federal Earthquake Insurance and Reinsurance Act, is a proactive approach aimed at protecting homeowners and our national economy from the catastrophic consequences of major earthquakes.

Let's review some basic facts. First, a catastrophic earthquake is inevitable. Most seismologists agree that there is a virtual certainty that a monster quake at least 30 times more powerful than last year's San Francisco earthquake will strike somewhere in the United States within the next 40 years.

Second, major earthquakes can happen almost anywhere in our country. While we often think of California for quakes, the fact is that 39 States are vulnerable to major or moderate earthquakes. The Puget Sound region of my State is especially susceptible to a major quake, having already withstood damaging jolts in 1949 and 1965. Even earlier this week, a tremor measuring 4.4 on the Richter scale shook parts of eastern Whatcom County in my district.

Earthquakes are also not solely a west coast problem. Studies by the U.S. Geological Survey confirm that the big one could as easily occur east of the Rocky Mountains as in the Western States. The largest earthquake in recorded American history occurred along the New Madrid fault in the Central United States. Another New Madrid quake would cause severe damages in several Central States, including Tennessee, Missouri, Arkansas, Mississippi, Kentucky, Illinois, and Indiana. As a testament to the national dimension of this problem, the original cosponsors for this bill represent seven diverse States: Massachusetts, Tennessee, Indiana, Illinois, Nevada, Washington, and California.

Third, a catastrophic earthquake occurring anwhere in the country would have lasting impacts for the entire Nation. Destroyed lifelines

such as highways, bridges, gas pipelines, and transmission lines would affect regions thousands of miles from the epicenter. Insured losses could easily exceed $50 billion. This magnitude of loss would ripple through the national economy impacting the stock and municipal bond markets, affecting every American. Some consumers following a massive quake might not be able to purchase insurance for ordinary perils such as auto and general liability, as many insurance companies would not have any funds available to write new policies.

Individual homeowners could suffer the most. Fewer than 5 percent of the homeowners in Washington State and most of the country have earthquake insurance. Only about 25 percent even have earthquake insurance in the highest earthquake awareness regions around the bay area in California. Earthquake insurance is generally not purchased because the premiums and deductibles are simple too high. A major quake would be particularly catastrophic for those uninsured homeowners who could lose a lifetime's worth of equity in a few seconds of shaking.

The bill I have introduced today will help remedy many of these problems. This legislation creates two separate but parallel insurance programs: First, a primary earthquake insurance program which covers shake damage and applies to all residential property secured by federally backed mortgages; and second, an excess reinsurance program which covers all related earthquake damages and is only triggered if the quake exceeds about $10 billion in insured losses. Both programs would accumulate premiums in tax-free, off-budget reserve accounts that would be used to pay earthquake claims.

This bill would make available, to nearly all homeowners, insurance protection against losses resulting from direct shake damages for all earthquakes. With such a universal program that spreads the risk nationwide, premiums would drop dramatically. Most of the country would see at least a 60-percent reduction in earthquake premiums. Under the proposal, high risk areas might pay as much as $50 per year for an average house while low risk areas might pay premiums as low as $2.

This legislation also protects the national economy. The reserve funds will help cushion the economic blow of a truly catastrophic earthquake. In a sense, this approach partially prefunds disaster relief assistance. The proposal relies on premiums collected from homeowners and the insurance industry to fund the program, not the taxpayers. Federal moneys could be borrowed in the interim only if a serious quake strikes before the fund has built up to sufficient amounts to cover the loss, but must be paid back with future premiums with interest.

Finally, this legislation contains an earthquake loss mitigation provision. The bill requires the development of a mitigation plan of building codes, seismic standards, and earthquake strengthening measures. The mitigation plan will be submitted to the Congress and State and local governments for approval. In addition, reward-based insurance incentives—such as lower deductibles and premiums—would be available for those homeowners who take steps to reduce the loss from earthquakes.

This is one of what I hope will be several bills addressing earthquake insurance and preparedness. We do not have all the answers in this bill, but the problem is a compelling one and we need to start the search for solutions. We hope this bill and others will start the congressional dialog on this important and timely issue.

THE NATIONAL HEALTH SERVICE CORPS REVITALIZATION AMENDMENTS OF 1990

HON. JIM COOPER

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. COOPER. Mr. Speaker, in the last two decades, thousands of poor communities got doctors they would not otherwise have had because of a vital Government program—the National Health Service Corps. However, drastic budget cuts have brought the corps to the brink of disappearance.

Today, 34 million people in close to 2,000 communities face chronic shortages of doctors and other health professionals. A third have no doctors at all in their communities, even though most of them have health insurance. They need an estimated 4,000 health professionals to provide their residents with just minimal medical service.

For many years, the National Health Service Corps helped meet these needs. Beginning in 1972, the corps offered scholarships to medical students in exchange for service in underserved areas. At one time, 3,000 corps doctors were serving 5 million patients per year. Now communities served by the corps are losing 600 practitioners a year with no replacements.

That is because the Reagan administration slashed the corps' budget, asking in 1986, 1987, and 1988 to zero out funding for scholarships. They argued that the free market would distribute surplus physicians to these needy communities. Not surprisingly, however, it has turned out that these surplus physicians never went to the poor rural towns and inner cities, choosing instead to practice in the more lucrative suburban and urban areas. But underserved communities are losing their corps doctors just the same.

Congress saved the corps from extinction, but the number of scholarships were still cut from more than 6,400 in 1980 to less than 50 in 1988. Despite volunteer recruitment and a new program that pays off educational loans for those who agree to practice in underserved communities, the corps will send out less than 250 practitioners next year.

Let me tell you what this has meant for one of the counties in my district. For years, the residents of Morgan County, TN, had no doctor to take care of even their basic medical needs. They were lucky if they got a doctor from outside the county to visit half a day a week. Most folks had to drive to Oak Ridge, an hour or more away, in order to see a doctor.

In 1974, their salvation came. Two doctors arrived through the National Health Service Corps. In the 16 years since then, corps doctors have insured that Morgan County got at least basic medical care.

The budget cuts mean, however, that there will be no replacement when their one corps doctor leaves in June. The county's other doctor agreed to stay for good, but it is simply not possible for him to take care of all of Morgan County's 16,700 residents.

Morgan County is a poor county, but they are so desperate they have offered $80,000 a year for a family physician to come. They have not even had inquiries.

"The National Health Service Corps Revitalization Amendments of 1990," introduced today by Mr. RICHARDSON, myself, Mr. SLATTERY, Mr. WAXMAN, and 23 other sponsors, is needed to put the corps back on its feet so that Morgan County and other communities like it will not go without basic medical services again. This bill allows Congress to increase the number of corps doctors in future years.

The bill authorizes the corps to spend whatever sums are necessary to meet these chronic shortages of medical personnel. I am pleased that President Bush has recognized the importance of this program, and has requested a $56 million increase over last year's appropriation of just $8.9 million. But if we are serious about meeting these basic needs, we must appropriate that much and more this year and in coming years.

Second, in order to receive the scholarship program, the bill reserves a substantial percentage of the corps' recruitment funding for new scholarships, including scholarships to nurse practitioners and midwives and physicians assistants.

Third, we strengthen the loan repayment program, the program that pays off educational loans if you agree to practice in underserved areas. This program has not brought health professionals to the neediest areas because it offers at most $20,000 in payments per year which is itself taxed. We increase this maximum to $35,000 and require reimbursement for the Federal taxes on it.

We also recognize that the corps has had many problems with its operations which have damaged its effectiveness and credibility. Our bill refocuses the corps on its basic mission of getting practitioners to the areas with the direst need and doing everything it can to make it likely that its members would stay in such areas after their obligation ends.

Many corps members have complained that the corps was rigid and impersonal, caring nothing for their needs and abilities. These people end up wanting nothing more but to finish their obligation and get out of town, and that should never be the case. So our bill requires the corps to provide members with counseling and assistance, especially in setting up practice and in finding temporary replacement so they can take vacation time. I believe this kind of help will encourage many corps health professionals to settle permanent in these areas.

We also clarify the priorities for the corps: namely, to retain good doctors and recruit new ones for the very neediest areas, rather

than for particular population groups or diseases. In particular, the bill encourages health professionals to make their careers in these areas by requiring the corps to offer a choice of assignments in needy areas, and to consider factors—such as family situations—which affect an individual's willingness to remain in the area.

Currently, a portion of the corps' funding is spent on matching grants for seven States with their own loan repayment programs. However, these grants do not necessarily go to the neediest States and the programs have not always been as effective as the Federal program. For these reasons, the bill replaces the State Loan Repayment Program with grants to State rural health offices to improve rural health care, including through loan repayment or other incentives for practitioners. The 3-year authorization level for this provision is $10 million.

Mr. Speaker, we are facing unprecedented health care programs due to skyrocketing costs and a huge uninsured population. Yet, for millions of Americans, these are not even their worst health care troubles. Rural towns and inner cities across the country continue to face chronic shortages of basic medical services.

The National Health Service Corps is the best program we have to address this situation, but we have let it get cut, when it should have been expanded. The legislation introduced today is needed to rebuild a much diminished corps and ensure that it is on the best footing it can be to carry out its mission.

THE HIGH-SPEED RAIL TRANSPORTATION POLICY AND DEVELOPMENT ACT

HON. DOUG WALGREN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. WALGREN. Mr. Speaker, today I am introducing a bill to reestablish the U.S. leadership in the development and commercialization of tomorrow's transportation systems—MAGLEV and high-speed rail.

Each of us knows the hardships caused by our congested highway and air traffic systems. Many of our districts have also been hurt by the United States' decreasing ability to compete in the world market for advanced technologies. Despite these realities, the Federal Government has plodded along for 15 years with no national policy for or commitment to the introduction of advanced high-speed ground transportation systems. My bill would remedy this situation by establishing a national high-speed rail transportation policy, providing for the study of high-speed rail's commercial feasibility, and authorizing Federal guarantees of loans to high-speed rail projects.

As we enter the 1990's, the United States finds itself faced with a decaying transportation infrastructure, a threatened environment, a dependence on foreign energy supplies, and an increasingly competitive global economy. Restoring the U.S. leadership in the development and commercialization of high-speed rail and magnetically-levitated [MAGLEV] trains will help us to clear many of these obstacles as we enter the 21st century.

This country's transportation policy is currently at an important crossroads. Next year, the authorization for the Interstate Highway Act, the largest public works project in history, will expire. Even as this system is being completed, however, we find it over capacity. Today, more than 65 percent of peak hour travel on urban interstates experiences congestion. The Federal Highway Administration projects that by the year 2005, highway congestion will result in up to $46.5 billion annually in lost time and fuel costs.

Our air traffic system is hardly better. Twenty-one primary airports now experience over 20,000 hours of flight delays each year. Delays in the air traffic system are expected to result in more than $13 billion in losses annually by the year 2005.

Clearly, the congestion and delays caused by an inadequate transportation system have detrimental effects on the environment, our ability to conserve energy, and the productivity of our industries. In the recently released national transportation policy, President Bush acknowledges the dangers of this overburdened transportation network and declares that "innovation and technological advances within the transportation field will be vital to ensure that the system can meet the Nation's transportation requirements for the 21st century." To facilitate these advances, the policy defines a role for the Federal Government in promoting the development of high-speed rail and MAGLEV trains. The President's policy calls for Federal support of research and the injection of project seed money to spur high-speed rail commercialization.

High-speed rail offers several advantages. MAGLEV and advanced wheel-on-rail systems are quick, efficient, and environmentally sound. By promoting high-speed rail, we can improve the productivity of existing American businesses while introducing an entirely new domestic manufacturing base. Because they run on electricity, high-speed rail systems will once again enable us to use domestic coal and hydropower as a transportation fuel. High-speed rail trains have none of the harmful emissions of petroleum-fueled vehicles, and, in the case of MAGLEV, are practically silent.

HISTORY

There was a time when Americans pioneered the development of advanced high-speed ground transportation. Between 1965 and 1975, the High-Speed Ground Transportation Act provided for millions of dollars of research into experimental air cushion, monorail, and wheel-on-rail ground transportation systems. In 1968, two MIT professors patented the first design employing magnets to suspend and propel vehicles along a fixed guideway. Gradually, U.S. research efforts shifted toward this new and promising MAGLEV concept. By the mid-1970's, U.S. scientists has solved many of MAGLEV's most difficult engineering problems, and the technology was nearing the application stage.

Then, in 1975, the Government abruptly terminated all Federal funding for research under the High-Speed Ground Transportation Act, and efforts to develop MAGLEV and other promising technologies shifted overseas.

Today, nearly 15 years after the United States ended its research effort, high-speed rail transportation is finally a reality. In Europe and Japan, advanced wheel-on-rail system such as the Bullet Train and the TGV provide efficient intercity service at more than 150 miles per hour. Meanwhile companies in Germany and Japan have developed functional MAGLEV systems which are capable of operating at close to 300 miles per hour.

Time is ripe for the final development and commercialization of high-speed rail in this country. In Orlando, planners hope to open the first leg of an elevated MAGLEV system by October 1994. This MAGLEV system would offer connections to a high-speed wheel-on-rail passenger train slated to run between Orlando and Miami. Similar projects are being planned for routes as diverse as Los Angeles-Las Vegas, Houston-Dallas and Pittsburgh-Cleveland. The Federal Government must play a role in promoting the development, construction, and commercialization of these and other systems by conducting economic and technological research, establishing comprehensive high-speed rail policy, and minimizing the long-term risks of investors. The legislation I am introducing today would accomplish each of these goals.

THE BILL

My bill would first authorize $10 million for the Federal Railroad Administration [FRA] to complete a commercialization study assessing the economic and technical feasibility of constructing high-speed rail system in the United States. The FRA would also be required to develop model legislation for State and local governments to use to facilitate high-speed rail construction. In his 1991 budget proposal, President Bush has requested $10 million to fund a similar program.

My legislation would also require the FRA Administrator to issue a national high-speed rail transportation policy. This policy would establish Federal priorities and provide for the promotion of American competitiveness in this field.

Finally, my bill would establish a Federal loan guarantee program similar to the program in legislation recently introduced by Senators REID and MOYNIHAN. My legislation would authorize the FRA to guarantee loans made to high-speed rail construction and demonstration projects by State and local governments—including government employee pension plan funds. Guarantees would be limited to $2 billion in new obligations per year, and no more than $10 billion in loans could be guaranteed at any one time.

State and local government employee pension funds currently contain more than $700 billion. By issuing loan guarantees to ensure these pension funds a safe and competitive rate of return, the Federal Government would grant high-speed rail projects access to billions of dollars in investment capital with little or no Federal expenditure. The concept of Federal guarantees to protect State and local pension investments in infrastructure projects has been endorsed by numerous State treasurers and leading economists alike.

In the wake of the collapse of the FSLIC and the problems with FHA and guaranteed student loans, some of my colleagues may

question a proposal to establish yet another Federal guarantee program. However, the program I am proposing today would include a variety of safeguards designed to minimize risk to the Federal Government. The structure of the program would be very similar to that of the loan guarantee program established by section 511 of the Railroad Revitalization Act, a successful and long-running guarantee program which has never required a Federal outlay to cover a defaulted loan.

In the coming 20 years, MAGLEV and high-speed rail will become an important part of our transportation equation. We invented MAGLEV, and we need it to solve our transportation, environmental, and energy dependence problems. The only question is whether we will work to build a healthy high-speed rail industry here at home, or whether we are going to import the technologies developed and manufactured by others. I encourage my colleagues to answer this question by joining me in support of this important measure.

INTRODUCTION OF THE UNDERWATER PIPELINE LEAK PREVENTION ACT OF 1990

HON. FRANK J. GUARINI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. GUARINI. Mr. Speaker, in the wake of a seemingly incredible string of oilspills in the Arthur Kill and Kill Van Kull waterways in New Jersey, I feel there is a real need to minimize the risk of accidents involving underwater pipelines. For this reason, I am introducing, along with the entire New Jersey delegation, the Underwater Pipeline Leak Prevention Act of 1990.

Currently, there are many miles of pipelines across our Nation which are not regulated. These pipelines must be inspected and monitored so that we can prevent future damage to our natural resources. This is not to say that the transport of oil through pipelines is dangerous. On the contrary, it is one of the safest ways to transport oil. However, we need to know where these underwater pipelines are and that they are safe.

This legislation will substantially reduce the risk of accidents which involve underwater pipelines carrying hazardous liquid. It amends the Hazardous Liquid Pipeline Safety Act to provide for special mapping, inspection, and safety regulations for underwater pipelines, and for other pipelines that, in the case of an accident, are likely to damage our aquatic environments. Currently, pipelines which operate at a low pressure are exempt from DOT testing requirements.

Speciifically, my bill requires that all underwater pipelines be inspected annually with internal inspection devices. Those pipelines that cannot be inspected must be upgraded in order to be compatible with the proper inspection devices. Each pipeline in less than 50 feet of water must be checked annually to ensure that the pipeline has not become a hazard to navigation. Furthermore, adequate navigation market for the pipelines must be put in place.

This legislation also requires pipeline operators to report to the Department of Transportation on the location and status of these underwater pipelines. The DOT must summarize the information and submit a report to Congress. In addition, States will be required to implement the underwater pipeline regulations or risk losing Federal pipeline safety grants.

Mr. Speaker, on January 1 of this year, an Exxon pipeline in the Arthur Kill waterway in Bayonne, NJ, spilled over half a million gallons of oil into the water. This spill symbolizes what could be just one of thousands of environmental accidents waiting to happen. We need to make sure spills like the Bayonne spill are prevented in the future. This bill is one step toward achieving that goal. I urge my colleagues to join me in this endeavor.

TRIBUTE TO NEW OFFICERS OF THE MOUNT VERNON APARTMENTS

HON. RONALD K. MACHTLEY

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. MACHTLEY. Mr. Speaker, I rise today to honor the recently elected officers of the Mount Vernon Apartments in Woonsocket, RI.

The president of the Mount Vernon Apartments will remain Roger Levesque. The newly elected Florence Beauregard will serve as secretary while Marie Travis will continue her role as treasurer.

Throughout the year Mount Vernon Apartment residents take part in many social events. Most notable are their St. Patrick's Day, Halloween, and Christmas parties and their awards night when they honor their choice of most outstanding man and woman of the year.

I would like to wish my best to the new officers of the Mount Vernon Apartments and hope that they continue to create a spirit of love within their home. Their dedication is a testament to their unselfish devotion and desire to create a home for their fellow tenants.

COMMEMORATING THE 50TH ANNIVERSARY OF THE NAZI INVASION OF NORWAY AND THE FIRST UNITED STATES CASUALTY OF WORLD WAR II

HON. MARTIN OLAV SABO

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. SABO. Mr. Speaker, today I rise to bring to the attention of the American people and my colleagues here in Congress two important and noteworthy dates. They are both very significant to our fellow citizens and to our dear friends, the people of Norway.

Next week—April 9, 1990—is the 50th anniversary of the Nazi invasion of Norway. April 21, 1990 is the 50th anniversary of the death of the first American serviceman in uniform in World War II.

The Norwegian people will be commemorating their resistance to the April 9 invasion in solemn ceremonies throughout the country. It is appropriate that we too honor the Norwegian people's heroic resistance to totalitarian aggression. The steadfast leadership and refusal to bend under pressure of King Haakon VII were—and remain today—examples to the world of personal and national moral courage.

The contributions of the Norwegian Merchant Marine during the war also deserve special mention. And the heroism and persistence of the men and women of the Norwegian resistance forces must never be forgotten. They remain bright shining testimony of the bravery of these freedom-loving people.

On April 21, 1940—nearly 18 months before the United States entered World War II—the first American serviceman was killed. Capt. Robert Moffat Losey, a military attache assigned to the American Embassy in Oslo, was killed in a Nazi bombing raid on the town of Dombås in the county of Dovre in Norway.

On the 50th anniversary of that date, Norwegian officials from Oslo, Dombås, and Dovre, representatives from the American Embassy, military officers from the armed services of both the United States and Norway, and representatives of the Sons of Norway will participate in ceremonies at the Memorial Park in Dombås. They will honor the memory of Captain Losey and the many Norwegians who died or suffered as a result of the invasion and subsequent occupation.

Mr. Speaker, as the son of Norwegian immigrants, I am very proud of the nation of my ancestors. It remains the home of many of my relatives today.

Norwegian immigrants to the United States have enriched our land far beyond our ability to repay. The contributions they have made are especially important and evident in the State I have the privilege of representing, Minnesota, and the State of my birth, North Dakota.

While my pride and warmth for Norway is personal in many ways, I encourage all Americans to join me in expressing our respect, admiration, and appreciation for the Norwegian people. Norway was a brave and true ally during World War II. The Norwegian people suffered and fought valiantly in that great struggle against tyranny.

Today Norway remains a staunch NATO Ally and a firm supporter of Western democratic ideals. Let us join together with our great Norwegian friends and remember with the utmost respect the sacrifices and hardships that began on April 9, 1940, and the noble American life that ended on April 21, 1940.

THE 1990 TEXTILE AND APPAREL TRADE ACT

HON. CASS BALLENGER

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. BALLENGER. Mr. Speaker, I strongly support the 1990 Textile and Apparel Trade Act and am proud to be an original cosponsor of this important piece of legislation.

The goal of this bill is to put foreign textile and apparel imports on par with the current growth rate of the U.S. domestic textile industry. As we all know, textile and apparel imports coming into the United States increased by more than 13 percent over last year. And if we don't pass this legislation the news will be equally bad this time next year.

We know that Japan, Taiwan, and many of our other trading partners have taken over our domestic market in recent years through their skillful use of unfair trade practices. These so-called trading partners subsidize their products and then dump them into our markets. The question is how much longer are we going to stand idly by as we continue to lose more and more American jobs everyday.

It is simply unrealistic to expect our American companies to be able to compete under these circumstances. The textile legislation I support will correct the inequities in the system and give our American workers the fighting chance they deserve. The textile bill would use 1989 imports as a starting level and allow a 1-percent increase in foreign imports per year. This 1-percent import increase would equal the current annual growth rate of the U.S. domestic textile industry.

Employment in the U.S. textile industry is down from more than 2.5 million workers in 1973, to less than 1.8 million today. This represents a loss of 700,000 jobs in the industry that is recognized as second only to the U.S. steel industry in terms of our national security. In my district there are over 40,000 people employed in the textile industry.

As someone recently remarked, if we ever have to go to war again our servicemen and women may be wearing foreign made uniforms and Gucci shoes. Let's pass this legislation while we still have textile and apparel jobs in our country to protect. Along with over 175 other Members of the House who support this vital legislation, I say enough is enough. Let's move forward with the 1990 Textile and Apparel Trade Act and send a strong message to the administration as well as our trading partners.

EUROPE 1992 PLAN

HON. SAM GEJDENSON

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. GEJDENSON. Mr. Speaker, the European Community's plan to integrate the 12 economies of Europe by 1992 has attracted significant attention in the United States. Congress, the administration, and the American business community have attempted to discover whether Europe 1992 will be a net gain, or a net loss, for United States trade interests.

I believe that one key element of the Europe 1992 plan—the EC's process to set product standards and to test compliance with those standards—has the potential to make Europe 1992 a net loss to certain American industries. For that reason, I am today introducing five companion bills, along with Representative JOHN MILLER, to use American leverage in the product standards arena to ensure that American exporters face equitable European product standards and reasonable ways to show they comply with those standards.

In short, my legislation would prohibit EC firms from certifying in their own factories or in European laboratories that they comply with U.S. Government standards.

The House Foreign Affairs Subcommittee on International Economic Policy and Trade, which I chair, held six hearings on Europe 1992, and issued a report making recommendations to the administration on how to improve the U.S. response to the European economic challenge.

While the subcommittee's investigation focused on several potential troublespots for U.S. business in the Europe 1992 plan, it became clear that the European Community's standards-setting and testing process posed a clear threat to American exporters.

On the face of it, the EC's plan to harmonize all European product standards, and the procedures to test compliance with those standards, would seem to benefit American business. After 1992, a product which can be sold under the common EC standard and the standard of one EC nation will be marketable throughout the European Community. U.S. exporters which previously had to jump over 12 different product standard hurdles to sell in Europe will have to jump over far fewer hurdles after 1992.

In reality, the standards set by the European Community may make it far more difficult for some businesses to be competitive in the EC market. By setting key product standards without the opportunity for international scrutiny, and by not guaranteeing that American companies can easily show their compliance with EC standards, Europe 1992 may actually erect more hurdles, not less, for some exporters.

To understand why the Europe 1992 plan for product standards poses a serious threat to U.S. business, one must first examine the EC's complex standards-setting process. The European Community establishes a broad outline for a product standard in a Europe 1992 directive. The European standards organization CEN/CENELEC uses that directive to write a product standard which is then implemented by all EC countries.

The meetings of CEN/CENELEC, however, are totally closed to most non-European observers, including representatives of United States businesses without factories in Europe, experts from American trade associations, and United States Government officials. Product standards which establish the minimum health and safety standards for thousands of American products, ranging from paper products to toys, are being set behind closed doors. Consequently, the EC representatives to CEN/CENELEC who are usually from the industry itself, have already written standards which benefit European producers of anesthesiology equipment, toys, and forklifts over American producers.

In contrast, the United States relies upon private sector organizations to set product standards, many of which are voluntary. The meetings of the vast majority of American standards-setting organizations, including Underwriters Laboratory [UL], are open to all American and foreign companies. Many EC companies not only observe American standards meetings, they actually vote on American standards.

The nontransparency of CEN/CENELEC is not the only reason that the Europe 1992 plan for product standards poses a threat to American exporters. The European Community is currently establishing the rules for companies to test and certify their compliance with product standards on a European-wide basis. While harmonization of European testing and certification procedures could be a welcome development for American exporters, trouble may very well be on the horizon.

The European Community's draft policy on testing and certification fails to unequivocally guarantee that the current bilateral testing and certification system, which is open and fair, will be continued. Under this system, American companies can test their compliance with European standards in American laboratories, and European companies can test their compliance with American standards in European laboratories. The Europe 1992 plan may nullify the existing agreements which govern this mutual recognition process, and may require American companies to have their products tested in the European Community before they can be marketed.

The administration has protested the Europe 1992 plan for product standards, but these protests have only resulted in minor gains. Congress must legislate where protests to the EC have failed.

The legislation I am introducing today would make it far more difficult for EC companies to do business in the United States in response to the EC's restrictive policies. Unless American firms are treated in the European Community just as EC firms, we in the United States should not accord equal treatment to EC firms.

While most American product standards are private, voluntary standards, several U.S. Government agencies—the Environmental Protection Agency, the Federal Communications Commission, the Food and Drug Administration, the Department of Energy, and the Department of Labor—set health and safety standards to protect the American public.

American and foreign companies alike are allowed to self-certify their compliance with many of the standards set by these agencies. For other standards, American and foreign companies must bring their products to independent laboratories in the United States or abroad for testing and certification.

Under my legislation, firms based in the EC would not be allowed to self-certify their compliance with the product standards set by these five United States Government agencies until the European Community cleans up its act on product standards. Furthermore, EC firms could not use European laboratories to test and certify their products. Companies based in the EC would be required to send their products to American laboratories prior to marketing.

These restrictions upon EC firms would only be lifted when the U.S. Secretary of Commerce certifies that the European Community is setting product standards in an open and fair manner and has established equitabie rules for testing and certifying compliance with European standards.

The goal of this legislation is not to force the European Community to totally restructure its system to establish and test compliance with product standards. The EC has a right to its system, and we have a right to ours. Rather, these bills are simply designed to open the doors at CEN/CENELEC and guarantee equitable rules for American companies to show that they comply with European Community standards.

The cost of American inaction on product standards may be high. For every $1 billion in lost exports, 25,000 American lose their jobs. While it is important that we maintain a good working relationship with our European trading partners, it is equally as important that we use American leverage on product standards to protect the jobs of American workers who are deperident upon an open European Community market.

I urge my colleagues to cosponsor these five pieces of legislation.

CELEBRATING EARTH DAY

HON. CLAUDINE SCHNEIDER

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Ms. SCHNEIDER. Mr. Speaker, the celebration of Earth Day's 20-year birthday offers us a golden opportunity to reflect what has occurred and what lies ahead. I would like to share with my colleagues what is finally being recognized as the most powerful tool we can use to celebrate Earth Day everyday: prevention.

When my Rhode Island constituents elected me to Congress 10 years ago, I was appalled to find crisis management to be the business-as-usual practice in Washington. Environmental problems, in particular, tend to be routinely ignored until they become excessively costly to solve. To practice reactive crisis control is to wait until the ship hits the sand. The examples are legion:

Failing to control toxic chemicals which threaten more than one-third of the Nation's groundwater, cost the country more than $40 billion per year in health damage and environmental costs, and require over $300 billion to clean up leaking dumps and contaminated weapons facilities;

Acid rain pollutants that are destroying our lakes, fisheries, forests, and historic buildings, destroying over $12 billion a year in economic value;

Rising foreign oil imports, which worsen the trade deficit by $40 billion per year, incur an additional $40 billion of military expenditures to defend foreign oil supplies, and lead to routine tanker spills that despoil our fragile coastal waters;

Providing $30 billion per year to subsidize fossil fuels, despite studies showing these dirty fuels result in more than $100 billion in economic losses.

However, the philosophy I have promoted is a preventive one—it echoes Benjamin Franklin's timeless adage, an ounce of prevention is worth a pound of cure. This is becoming absolutely essential given the number of energy and environmental problems we face. Business-as-usual in the 1990's guarantees disasters for both the economy and the environment.

Not surprisingly, there are an enormous number of win-win preventive opportunities available for not only averting ecological disasters, but actually spurring economic prosperity while enhancing environmental quality and public health. Let me highlight several key ones of notable value to my Rhode Island constituents, as well as citizens across the country and around the world.

NARRAGANSETT BAY PROTECTION

Making sure we don't foul our nests is a longstanding environmental maxim, and in my case this has meant seeking protection over the past several years for Narragansett Bay—which is literally the crown jewel of Rhode Island. Through the House Merchant Marine and Fisheries Committee, I have been able to develop a comprehensive approach to reducing and preventing coastal pollution, cleaning up aleady polluted waters, and protecting and restoring depleted fishery resources.

This month my Merchant Marine and Fisheries Committee will be acting on several bills and amendments which I have introduced. This legislative package will enclude my National Oceans Policy Resolution which will help to establish a comprehensive and coordinated policy for protecting our coastal water. Some of the provisions in this legislation include: making polluters pay for new sewage treatment plant construction; easing the way for restricting or prohibiting oil drilling on the Georges Bank; increasing fines for ocean dumping of sewage sludge and medical waste, as well as providing $10,000 bounties to anyone providing information which leads to such a conviction; and providing additional moneys for fisheries, marine mammal, and coastal pollution research facilities working in Narragansett Bay.

OCEAN DUMPING BAN

The horror of used hypodermic needles and other medical wastes washing up on our beaches, as well as the offshore dumping of millions of gallons of sewage sludge from New York City that is destroying our offshore environment and exacting a toll on the Rhode Island fishing industry, are preventable problems. Ocean dumping of sewage sludge and industrial waste should be banned, and my legislation to do so was signed into law in 1988. Again, this success was due in large part to documenting cost-effective waste prevention, recycling, and alternative disposal methods.

OILSPILL PREVENTION

The *World Prodigy* oilspill in Narragansett Bay, and the several thousands of other oilspills documented since the *Exxon Valdez* disaster in Alaska, point to two key needs. First, we must increase our reliance on energy efficiency and solar resources and decrease our dependency on oil, and second, we need strong laws and guidelines to prevent oil tanker spills until that transition fully occurs.

I was proud to be part of this year's landmark oilspill prevention legislation. This bill will take a number of significant steps, including: allowing States to retain stricter environmental and liability standards against oil and shippng companies; increasing penalties for violating Federal pilotage laws; initiating the effort to designate Block Island/Montauk Point Channel as a tanker free zone; and using satellite technology for tracking vessels in coastal waters.

BIG RIVER PRESERVATION

As with our current energy practices, we needlessly squander precious water resources. To prevent the destruction of an irreplaceable Rhode Island natural asset filled with a rich diversity of plant and animal species—8,300 acres of open space, including over 2,000 acres of valuable wetlands—I have worked to promote water efficiency improvements as a lower cost option than the proposed Big River Reservoir. I am pleased to report that through the combined efforts of my office and several dozen Rhode Island citizen associations, we have prevailed upon the EPA to deny a permit for the Army Corps of Engineers to dam this exquisite wildlife habitat.

The availability of water-conserving technologies made a compelling case for preserving the environment. Using more efficient faucets, showerheads, toilets and other devices could save consumers billions of dollars nationwide, while preserving scenic rivers and wetlands. To further this win-win economic/environmental goal I have consistently pushed for national water efficiency standards, a removal of Federal water subsidies, and the establishment of a clearinghouse on water efficiency to help State and local governments pursue this least-cost option.

POLLUTION PREVENTION

Despite a multihundred-billion-dollar cleanup bill for improperly disposed hazardous wastes, the United States continues to generate an additional 500 million to 1 billion tons per year of hazardous wastes. Moreover, several billion pounds of toxic air pollutants remain unregulated, and several billion tons of virgin resources must then be mined to replace these waste products.

Rhode Island is confronted with nine major Superfund sites that require expensive cleanup. Disposing of hazardous wastes is the third largest expenditure for Rhode Island governments, behind education and roads. The yearly bill exceeds $80 billion nationwide. Fortunately, as I mentioned before, prevention pays. Indeed, detailed studies show that half our current wastes could be reduced at the source, and half the remaining amount can be reused or recycled. This would save Americans billions of dollars per year, while reducing health risks, and eliminate the need for billions of tons of raw materials.

I am pleased to announce that legislation I have coauthored for several years, the Hazardous Waste Reduction Act, is being adopted by the EPA. This would make waste reduction and pollution prevention the Nation's top priority—instead of disposal and incineration. When EPA becomes a Cabinet agency, it will officially establish an Office of Pollution Prevention that will help States and businesses capture these available savings.

LOWER COST ENERGY OPTIONS

One of Rhode Island's highest priorities in the two decades since the original Earth Day has been to reduce our dependency on foreign oil imports. The oil price shocks of the 1970's destroyed many cash-strapped busi-

nesses, throwing many people out of jobs, and made life miserable for the poor and elderly on fixed incomes. It is no surprise, then, that by a 4-to-1 margin the polls show voters want fossil fuels replaced with renewable resources. By a similar margin, the public wants energy efficiency promoted instead of constructing more powerplants.

Federal energy policies are doing just the opposite, and, as a result, nearly half of all our oil continues to be imported, and the bulk of tax dollars continue to subsidize powerplant construction. As a result, Americans pay an estimated $200 billion per year more than necessary for energy services. Energy efficiency improvements to buildings, vehicles, appliances, lights, motors an factory and office equipment would not only capture these savings, but prevent a further estimated $100 to $200 billion in damages caused by the waste pollutants released from these resources.

For the past decade I have challenged this costly and risky policy, and in its place I have championed State, national and global energy policies based on least-cost and low-risk planning principles. Beginning in 1986, I was pleased to see Congress pass my initiative to set up a least-cost utility planning program. This information and technology transfer program helps States and utilities identify energy efficiency investments that are less expensive than powerplants. Full implementation of currently available options promise to save several hundred dollars per person per year, or $85 billion yearly nationwide. Finally, given Congress' current debate over the Clean Air Act, it is noteworthy that these improvements would lead to an impressive 50 percent reduction in acid rain pollutants at no cost to ratepayers or taxpayers.

The least-cost energy strategy is especially valuable for resolving the unprecedented peril of global greenhouse warming. I am spearheading the major comprehensive legislation on this problem, the Global Warming Prevention Act (H.R. 1078), designed to cut energy costs and greenhouse gases at the same time. It gives top priority to energy efficiency, including such incentives as $2,000 tax rebates for consumers to purchase highly efficient vehicles. Detailed studies show that the least-cost approach applied worldwide could simultaneously prevent a tripling of global carbon-dioxide emissions and eventually cut energy bills by more than $500 billion per year.

Mr. Speaker, as Earth Day approaches these are just a few ways we should be thinking about to lighten people's impact on the earth and save us money at the same time. Clearly there are many, many more opportunities available to individuals, companies, and communities to undertake on a daily basis. It is incumbent upon each of us to use our purchasing power, voting rights, and investment options to further the goals of Earth Day everyday.

BIPARTISAN FOREIGN INVESTMENT LEGISLATION TO BE INTRODUCED AFTER THE EASTER/PASSOVER RECESS

HON. NORMAN F. LENT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. LENT. Mr. Speaker, Congressman TAUZIN, Congressman BROOMFIELD, and I planned to introduce foreign investment legislation tomorrow. However, since the House will not be in session tomorrow, we have decided to wait until after the Easter/Passover recess to introduce our bill.

We urge our colleagues to cosponsor this bipartisan legislation on foreign investment. The data our Government currently collects is too imprecise to allow us to understand the extent of foreign investment in certain sectors of the economy and regions of the United States.

Our bill would improve the data currently collected by:

First, giving the Bureau of Economic Analysis [BEA], which has primary responsibility for collecting data on foreign direct investment, access to the Census Bureau's data on foreign direct investment; and

Second, requiring the Secretary of Commerce to report to Congress on the progress of the data exchange.

Our bill represents a bipartisan approach to a controversial issue. The bill improves the data we collect without threatening to restrict foreign investment. It meets the public interest of improved data but protects American jobs.

We urge our colleagues to become original cosponsors to our foreign investment bill. We will be introducing it on April 18 after the Easter/Passover recess. If you have any questions or would like to cosponsor our bill, contact me or have your staff call Justin Lilley of the Energy and Commerce Committee at 5-3641.

LEGISLATION TO AMEND THE BRIDGE-TO-BRIDGE RADIOTELEPHONE ACT

HON. WALTER B. JONES

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. JONES of North Carolina. Mr. Speaker, I rise to introduce legislation to amend the Bridge-to-Bridge Radiotelephone Act.

Currently, the inland navigational rules provide that vessels of less than 20 meters may not obstruct the passage of larger vessels and that vessels of 20 meters or more may share the channel with similar size vessels.

To maintain order it is essential that these large vessels, maneuvering in a narrow channel, be able to communicate. Thus, current law requires vessels of 300 gross tons or more to carry bridge-to-bridge radiotelephones. While most vessels of 20 meters or more exceed 300 gross tons and thus are required to carry bridge-to-bridge radiotelephones, there are exceptions. The amendment I propose would eliminate these unjustified exceptions by requiring radiotelephones on all vessels that are 20 meters or greater. In effect, this bill would merely extend the current requirement to reach those few vessels that are over 20 meters and less than 300 gross tons.

This is an important safety measure that would ensure that large vessels passing in a narrow channel are able to effectively communicate. During the period 1981–88, the failure to use radiotelephones was involved in 25 maritime accidents. This legislation, though it will make only a minor change in current law, would improve safety on our Nation's waterways and reduce the chance of spills of oil and other hazardous materials.

This proposal is strongly supported by the administration and I am aware of no industry opposition.

A TRIBUTE TO HOWARD W. TIEDT

HON. HARRIS W. FAWELL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. FAWELL. Mr. Speaker, I rise today to honor an outstanding individual from my district who passed away on March 7. Mr. Howard W. Tiedt, president of Santa Fe Speedway, devoted nearly all his life to providing recreation and the opportunity for Chicago residents to experience the excitement of auto racing. This occasion allows me to express my sincere appreciation to a man whose many years of dedication made south suburban Chicago a better place to live.

Mr. Tiedt was a lifelong resident of Hinsdale, IL, and its immediate surrounding areas. After his father's death in 1946, he inherited the racetrack which had been featuring horse and cyclist races. Mr. Tiedt relied on his experience and his degree in accounting from the University of Illinois, to enlarge the track and grandstand in order to accommodate large races and more spectators. Since 1953, the Santa Fe Speedway has been home to both stock car and midget auto races. I am proud to say that it is also one of the most respected and desirable short-track courses in the country, according to champion NASCAR drivers.

Mr. Tiedt's daughter, Mary Louise, will succeed him as president of Santa Fe Speedway. I wish her the best in her new position. I am sure Santa Fe Speedway will continue to provide popular entertainment to the citizens of my suburban Chicago district.

Once again, my deep condolences go out to the family of a great man who will be sorely missed by his community. We will be lessened by his departure.

PENNY STOCK REFORM ACT OF 1990

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. MARKEY. Mr. Speaker, I am introducing today the Penny Stock Reform Act of 1990, a comprehensive effort to clean up the rampant fraud now pervading the penny stock market. I am extremely pleased to be joined in this effort by Mr. RINALDO, the ranking minority member of the Subcommittee on Telecommunications and Finance, Mr. WYDEN, Chairman DINGELL of the Energy and Commerce Committee, as well as Mr. RICHARDSON, Mr. MOORHEAD, and Mr. MCMILLEN of Maryland. In particular, I want to note the extraordinary contributions of Mr. RINALDO and Mr. WYDEN and their staffs, who have been so dedicated to developing legislation in this area.

Mr. Speaker, the problems in the penny stock market are a subset of the larger dilemmas facing the investing public and our economy. In the aftermath of the crash of October 1987, and the minicrash of October 1989, investors are reeling from losses in the legitimate stock market. The horror stories from the penny stock market are fueling that lack of confidence to an even greater degree. Furthermore, small legitimate firms are unable to raise capital in this market, finding it difficult to pry investors hands free from money in bank accounts or perhaps wrongly invested in fraudulent penny stocks. Therefore, we must work aggressively to create the regulatory structure necessary to rebuild investor confidence and oil the machinery of the capital formation process upon which our future economic growth hinges so greatly.

Mr. Speaker, last fall the Subcommittee on Telecommunications and Finance held two hearings to examine the problem of fraud in the penny stock market. The first was a field hearing in Portland, OR, chaired by Mr. WYDEN, and the second was here in Washington. The facts gleaned from those hearings are stunning and represent a travesty for the small investor. According to the findings of the North American Securities Administrators Association's [NASAA] 50-State survey, investors lose $2 billion or more each year due to fraud and abuse in the penny stock market, over one-fifth of the entire total of primary and secondary market activity in penny stocks. Incredibly enough, these losses linked to fraud come in addition to an estimated 70-percent probability that an investor in an unmanipulated penny stock will lose some or all of his or her investment. In all, the likelihood of losing money in penny stocks runs at 90 percent. Comparing this market to a night at the casino seems an unfair slap at casino operators.

Penny stock fraud's harm to the capital formation process poses an even more sweeping economic threat to the Nation. According to the NASAA report, the $2 billion in investor losses equals two-thirds of the total of $3 billion raised by the U.S. venture capital industry in 1988. Given that $25,000 is the average outside financing needed to start a new company, these ripoffs represent a loss of 80,000 potential new firms, employing well over 150,000 workers. These con artist schemes drive a stake right through the heart of our Nation's history of entrepreneurship and our future efforts to rebuild America's competitive edge in the world marketplace.

The legislation we are introducing today strikes directly at the most egregious problems in the penny stock market. The bill focuses a laser beam on the stocks trading at the lowest end of the scale, on the pink sheets or beyond, which are the most recognized area for fraudulent activity. The bill proposes several key tools for attacking this problem.

First, the legislation would expand the Securities and Exchange Commission's authority to bar crooked promoters and consultants from the securities business. As we learned in last fall's hearings, even the most recidivist criminals imaginable, having been barred from acting as brokers or dealers, wind up as manipulative promoters in the penny stock business.

The bill would also mandate that all penny stocks be traded though an automated quotation system which provides firm automated quotes of stock prices. This would greatly improve surveillance and information flow about this market and prevent these stocks from hiding in the netherworld of the pink sheets and beyond.

Another key feature of this bill would greatly expand disclosure to investors in penny stocks. This would include information about the price of stocks, actual value on a month-to-month basis, and a risk disclosure document containing information regarding the nature of the risk in the penny stock market.

The legislation would mandate expanded self-regulatory organization responsibility for overseeing the penny stock market. The expanded powers would include prohibiting customer ripoffs though excessive spreads; initiating a review of penny stocks to guarantee the adherence to standards of just and equitable principles of trade; and establishing and maintaining a new means for investors to receive information regarding broker disciplinary actions. If we are to have a system of securities laws which relies on self-regulation, then we must assure that that regulation is vigilant and aggressive in the pursuit of fraudulent activity.

Finally, the bill would ban outright the registration under the Federal securities laws of blank check offerings and penny stock blind pool offerings. These are common vehicles for fraud and manipulation in the penny stock market.

In summary, Mr. Speaker, this bipartisan legislation is a potent weapon in the battle to make our securities markets safe for all investors and to restore greater integrity to the capital formation process. The bill has been endorsed by the North American Securities Administration and the Consumer Federation of America, and letters from those groups will be inserted in the RECORD following my remarks.

In the weeks to come, as we move toward legislative hearings and markup of this legislation, I look forward to working with the SEC, the States, and others in the adoption of effective, comprehensive penny stock legislation.

CONSUMER FEDERATION OF AMERICA,
Washington, DC, April 4, 1990.

Hon. EDWARD J. MARKEY,
House of Representatives, Rayburn House Office Building, Washington, DC.

DEAR REPRESENTATIVE MARKEY: On behalf of the Consumer Federation of America (CFA), I would like to thank you for introducing legislation to protect consumers from fraud and abuse in the penny stock industry.

As you know, a September 1989 study by the North American Securities Administrators Association estimates that Americans lose at least $2 billion each year as a result of schemes involving penny stocks. Further, the study points out, "The penny stock industry increasingly is dominated by utterly worthless or highly dubious securities offerings that are systematically manipulated by repeat offenders of state and federal securities laws and other felons, some of whom have been identified as having ties to organized crime."

The con artists who use lies and deception to sell penny stocks and who manipulate prices are robbing investors, many of whom are unsophisticated first-time participants in the financial markets, of their life savings, retirement funds, and money to fund their children's education. This alone would justify legislative action. But the problem goes deeper. All of us pay a price when Americans lose confidence in the financial markets and when money that could have gone to support honest businesses that create jobs is lost to penny stock fraud.

Recognizing that the problem has become a national one, the Securities and Exchange Commission and states have beefed up regulation in this area, and they are to be applauded for their efforts. But more needs to be done.

By expanding the authority of the SEC to police this industry, by making it easier to keep fraudulent "promoters" and "consultants" out, by mandating additional up-front disclosure to investors, and by prohibiting the registration of "blank check" offerings and restricting "blind pool" offerings, the "Penny Stock Reform Act of 1990" provides vital additional investor protection.

CFA congratulates you for your leadership on this issue and looks forward to working with you for passage of this vital legislation.

Sincerely,

BARBARA ROPER,
Financial Planning Specialist.

SECTION-BY-SECTION ANALYSIS "PENNY STOCK REFORM ACT OF 1990"

Section 1. Short Title.

This Act is formally titled the "Penny Stock Reform Act of 1990."

Section 2. Findings.

The findings lay out the rationale underlying this legislation. They include the need to establish and maintain an honest and healthy secondary market for securities offerings; to provide investors with better information concerning low-priced penny stocks; to broaden Securities and Exchange Commission authority to regulate and redress wrongdoing in the penny stock market; to enhance SEC authority to sanction "promoters" and "consultants," among others, who operate at the fringes of the penny stock market; and to prohibit the use of certain practices, such as the issuance of blank check offerings, whose inherent characteristics promote fraud.

Section 3. Definition of Penny Stock.

This section adds a new paragraph 51 to Section 3(a) of the Securities Exchange Act of 1934 ("the '34 Act") by defining the term "penny stock" and thus setting the scope of securities covered under this Act. The definition focuses largely upon the non-exchange-listed and non-NASDAQ-quoted market, also known as the "pink sheet" market. This is the area of the securities markets furthest outside the scope of adquate regulation and surveillance.

The definition of penny stock largely follows the Commission's definition of "designated security" contained in its penny stock rule adopted last fall (SEC Rule 15c2-6). It would exempt from the definition of penny stock any security which is registered or approved for registration on a national securities exchange, such as the New York or American, among others, which meet operating criteria established by the Commission. The rule would also exempt securities traded on the National Association of Securities Dealers NASDAQ/NMS and NASDAQ system; investment company securities; and other securities the Commission may exclude based on other relevant criteria, such as high trading price or low trading volume.

Section 4. Authority of Commission to Police Disqualified "Promoters" and "Consultants".

The hearings in the Subcommittee on Telecommunications and Finance last fall indicated that there currently exists a substantial problem in the large numbers of individuals who are barred from working as brokers, dealers or exchange or NASD members, but who emerge nonetheless as promoters or consultants operating illegally in the penny stock market. This section amends Sections 3(a)(18) and 3(a)(21) of the '34 Act. It expands the current law definition of persons "associated" with brokers, dealers and members of securities exchanges or the NASD to include "promoters," "consultants" and others who work in the penny stock market yet may evade SEC sanction by avoiding formal registration as brokers and dealers. The section also includes within the definition of a broker those individuals associated with issuers, even if no formal association with a broker could be established.

Section 5. Requirements for Brokers and Dealers of Penny Stocks: Automated Quotations, Enhanced Disclosure.

Subsection (a) of Section 5 adds a new paragraph (g) to Section 15 of the '34 Act and thus establishes a system for more comprehensive disclosure and regulatory oversight for the operation of the penny stock market, from the initiation of broker-customer contact through the trading of these stocks and the maintenance of customer accounts in such stocks.

The section adds new requirements for the method of effecting transactions, and for additional disclosure obligations prior to transactions, at the time of confirmation, and through monthly account statements. First, all transactions in penny stocks must be effected through an automated quotation system operated by a national securities association such as the NASD. Second, prior to effecting any penny stock transactions, a broker or dealer must provide customers with a specific "risk disclosure" document, and must disclose the bid and ask prices at the time of the transaction, the number of shares to which such prices apply, the amount of commissions or other compensation the broker or dealer is receiving with regard to purchases or sales of that penny stock, and any additional information the SEC may deem necessary.

The "risk disclosure" document mandated under this section must contain a description of the nature of risk involved in the penny stock market, the method of pricing markups in that market, identification of means to receive information on broker-dealer disciplinary histories, and a description of other significant terms used which would assist customers in their understanding of the penny stock market.

At the time of confirmation, the section requires brokers and dealers to provide in writing similar price and volume information as that mandated prior to the purchase of sale of any penny stock. In addition, the monthly account statement required under this section must contain all trading information for the previous month and the present market value of a customer's holdings in penny stocks.

Subsection (b) of Section 5 imposes new requirements for self-regulatory organizations (the NASD) to establish and oversee a fair penny stock market. Under the general requirements of Section 15A(b)(11) of the '34 Act, that a "registered securities association" promulgate rules designed to produce "fair and informative" quotations, this subsection requires the NASD or other such SROs to enact rules that prohibit excessive spreads and require firm bid and ask prices reasonably related to the most recent quoted prices.

This section makes the effective date of these new requirements for brokers and dealers and SROs 90 days from the date of enactment of this Act.

Section 6. Voidability of Contracts In Violation of Section 15(c)(2) of the '34 Act.

Section 6 effectively would void securities contracts made in violation of the Commission's penny stock rule and all other rules adopted pursuant to Section 15(c)(2) of the '34 Act. This section would amend Section 29(b) of the '34 Act to specify that any contract in violation of rules adopted under Section 15(c)(2) of the '34 Act, which includes prohibition of fraudulent, deceptive or manipulative practices, would be deemed automatically void. The Commission would have the authority to exempt certain rules from this mandate.

Section 7. Restrictions of Blank Check Offerings.

Subsection (a) of Section 7 amends Section 7 of the Securities Act of 1933 ("the '33 Act") to prohibit the registration of all "blank check" stock offerings and all penny stock "blind pool" offerings, types of stock issues frequently involved in fraudulent or manipulative schemes. Blank checks are securities offerings in which the issuer discloses no specific business plan or purpose, or merely identifies an intent to engage in mergers and acquisitions, but no identity of business lines for the anticipated mergers or the management which will be responsible for operating the merged entity. Blind pools do identify a general business, product or service line for intended mergers, but not a particular property or business.

Subsection (b) contains an amendment to Section 15 of the '34 Act which would affect the trading of blank checks and penny stock blind pools. First, by adding a new Subsection (h), it would prohibit the trading of any blank checks or penny stock blind pools. Second, by amending Subsection 12(b), it would enhance the enforcement of the trading ban by mandating that all penny stocks registering under the '34 Act provide specific information regarding their lines of business. This information will help the Commission identify potentially illegal blank checks and blind pools.

Subsection (c) amends Section 15A(b) of the '34 Act by mandating that the NASD or other SROs overseeing the penny stock market promulgate rules to prohibit the evasion of blank check and blind pool restrictions, to require greater review of penny stock registration statements in pursuit of this goal, and to establish means for improving dissemination of information concerning "reverse mergers" of private companies with public shell corporations.

The effective date for this section is 90 days from the date of enactment of the legislation.

Section 8. Expanded SRO Review of Penny Stocks.

This section requires a new review of penny stock offerings to assure that they are not used for "fraudulent and manipulative acts and practices" and are consistent with "just and equitable principles of trade." These standards are drawn directly from Section 15A of the '34 Act, which governs the operation of self-regulatory organizations. Section 8 specifically amends Section 15A(b) of the '34 Act to mandate that the NASD or other penny stock SROs prohibit participation of any of its members in the offering of any penny stock which has not been renewed favorably under this standard.

Section 9. Broker/Dealer Disciplinary History.

This section mandates that the NASD or other registered securities association establish a toll-free telephone listing to respond to customer inquiries concerning the disciplinary history of association members.

NEW MEDICAL FACILITY: SISKIN HOSPITAL OPENS IN CHATTANOOGA, TN

HON. MARILYN LLOYD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mrs. LLOYD. Mr. Speaker, recently I had the great privilege of attending the ceremony opening a remarkable new medical facility in my congressional district, Siskin Hospital in Chattanooga, TN, this hospital represents the culmination of a dream of Mose and Garrison Siskin and I'm sure it will stand as a monument to their families' collective commitment to dedication and service to our community. Rabbi Richard Sherwin, of B'nai Zion synagogue, a man of great distinction and honor, gave a thoughtful and eloquent invocation which I would like to share with my colleagues in the house. His remarks are as follows:

SISKIN HOSPITAL DEDICATION: INVOCATION

All too often, the religious person is wrongly portrayed as one who accepts life as it is—for better or worse—claiming that it has been ordained by God. It is a view of religion that was rejected by Garrison and Mose Siskin, one that is rejected by the Binder, Levine, Pregulman and Siskin families today, one that will be rejected by all whose lives will be graced by hope as they enter the doors of this magnificent hospital. The healthy view of religion is not that God deals us the cards, but that God helps us with the cards that life has dealt. This hospital is itself a religious statement that dignity belongs to every human-being, and that even a broken life can be filled with hope.

The charge of religion is to use our God-given intelligence, our God-given talents, and our God-given creativity to find ways to transform the world from the way it is to the way it might be. We are charged to dream of what might be, then to go out and to fulfill our dreams.

It was Theodor Herzl who said: If you really want something, it need not remain a dream.

The Siskin brothers dreamed to restoring hope to those who have good reason to lose it. They worked hard to make their dream become reality, and the community worked with them and made the Siskin dream their own. Today, less than two years after the groundbreaking, a new stage of the dream come true has, indeed, become reality.

The charge of religion today is to savor this moment, then to find new and better ways to fulfill the dream of Mose and Garrison Siskin. With this facility, many will be given the chance to make their own dreams come true, and—with God's help—we will find new ways to enhance the Siskin dream.

Almighty God, Source of all creativity and moral energy,

You inspire dreams within us, then you grant us the strength to fulfill them. Help us to see that each dream is only part of an ever-expanding dream.

We thank You for enabling us to reach this day. We see it not as the end of the Siskin dream, but as a significant phase that will create many new beginnings. Grant the gift of vision to those entrusted with the operation of this hospital and the care of its patients. Help them to see the worthwhileness of life, and to convey that sense of meaning to those who enter these doors so that they may mend or alter their shattered dreams. Enhance the lives of those who benefit from the warmth and caring that this hospital will provide.

Let this hospital stand as testimony to the faith of the extended Siskin family that we can work hand-in-hand with God in transforming the world as it is into the world it has the potential to be.

We praise You, Lord our God, Sovereign of the Universe, for granting us the gift of life, for sustaining our strength, for enabling us to endure as we pursued the Siskin dream, and for being with us as we celebrate this day together. Amen.

DEMOCRACY RESTORED IN PANAMA

HON. JOHN P. MURTHA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. MURTHA. Mr. Speaker, the year of 1989 will go down in history as the year of the decline of dictatorships. In addition to the dramatic events in Eastern Europe, we all welcome the demise of the brutal dictatorship of Manuel Antonio Noriega.

In May 1989, President Bush tasked me to be chairman of the U.S. Presidential Observation Delegation to the Panamanian National Election. I had served on many similar delegations in the past and our mission was straightforward—observe events as completely and accurately as possible and report back to the President and the congressional leadership. The delegation's effort was coordinated with the international delegation headed by former President Jimmy Carter.

It was quite clear to our delegation that Noriega lost the election. In fact, it appears that he was defeated overwhelmingly in the polls by a ratio of 75 to 25. Despite the overwhelming rejection by his own people, he remained in power and the brutality, money laundering, drug transhipments, and accumulation of massive arms caches continued.

The Panamanian people expressed their strong desire for democracy in that May election, but because of the oppressiveness and brutality of the Noriega regime, the deployment of United States troops was necessary to allow the installation of a democratic government.

COMPLEX MILITARY OPERATION

As chairman of the House Defense Appropriations Subcommittee, I am vitally interested in all aspects of the successful military effort to restore democracy in Panama. I believe that Operation Just Cause was one of the most complicated military operations that the Defense Department has performed since the Korean war.

Operation Just Cause involved the simultaneous nighttime attack on numerous installations in concert with the securing of a number of facilities. A wide variety of missions had to be undertaken—commando units liberated American prisoners and Panamanian political prisoners, Navy SEAL teams attacked and secured a small airport that Noriega might have used to escape, Rangers attacked and secured the large commercial airport and the Rio Hato barracks where Noriega loyalists were stationed, an advanced weapon system was used to carry out a precision bombing to assist in the Rio Hato operation, and artillery, tanks, and AC–130 gunships attacked the P.D.F. Headquarters.

Moreover, the majority of the troops involved in the operation had to be airlifted to Panama. Many of the troops and much of the equipment had to be air dropped. A total of 428 airlift missions utilizing C–5, C–141, and C–130-type aircraft carrying 14,000 troops and 12,500 tons of cargo were completed. A total of 172 tanker missions utilizing KC–10 and KC–135-type aircraft offloaded 12 million pounds of fuel to 274 aircraft.

An important aspect of Operation Just Cause was the effort to minimize casualties since our differences were with Noriega and not the Panamanian people or even with most of the P.D.F. Thus various aspects of the operation involved the use of the element of surprise, weapons to scare and disorient opponents, and the use of psychological warfare techniques. In various instances our troops used bullhorns to inform the P.D.F. that if they surrendered no shots would be fired.

I went on an inspection trip to Panama and visited many of the combat sites so I could meet with the troops and make an onsite assessment of the situation. I was tremendously impressed with the morale and commitment of all of our troops. I cannot say enough about the quality of the U.S. Armed Forces in Operation Just Cause. They were well trained, well disciplined, and performed their assigned operations with professionalism and pride. They are a credit to the United States.

Many factors contributed to the great success of Operation Just Cause. I think much of the success can be attributed to the high level of training and improved readiness that our troops have undergone during the past decade. While training is not a glamorous issue, to me it is the essence of maintaining a first-rate military capability. Also, the fine performance of the equipment was gratifying.

I recognize that because of budgetary realities and the changing international scene, there will be declines in the overall spending for defense for the next few years. However, it must be recognized that the current defense budget represents a smaller percentage of the gross national product than has been the case in all but 7 of the past 49 years and any reductions that are made from that level must be done prudently and carefully. I think an important lesson to be learned from Operation Just Cause is that as the defense budget undergoes reductions in the next few years, we must make certain that we do not return to the hollow Armed Forces of the seventies.

TRADING WITH THE EUROPEAN COMMUNITY

HON. JOHN MILLER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. MILLER of Washington. Mr. Speaker, the European Community is one of my State's best trading partners. In 1988 alone, Washington State businesses exported nearly $3.5 billion in electronics, medical equipment, aircraft, seafood, and other products to Western Europe. My State has a $2.5 billion trade surplus with the European Community. Trade with the European Community is important to me and it is important to Washington State and it is important to the United States.

Today, the European Community is putting into place a new unified market initiative commonly referred to as EC–92. The elimination of internal trade barriers will make Europe one unified market from Italy to England and from Portugal to West Germany. The elimination of redundant tariff and customs zones is a great step forward. A step which should make it easier for our exporters to compete in this new European market.

But, I am concerned with one element of the EC–92 equation—how to set and how to test product standards. Because of that, I am cosponsoring five pieces of legislation that would equalize product testing standards on both sides of the Atlantic.

As a member of the House Foreign Affairs Subcommittee on International Economic Policy and Trade, I attended six hearings on the 1992 Common Market. I also convened a conference, "Europe 1992: A Strategy for Our Region" in Seattle last May. That conference brought together 300 business and community leaders. At our hearings and at my conference, it became apparent that the European Community's stand on product testing clearly threatens American exporters.

At first glance, the European Community's concept of unifying product standards seems like a good idea. After 1992, if a product meets the standards in one European Community country, it can be marketed in all European Community countries. American export-

ers would only have to jump through 1 hoop instead of 12 different hoops with their products.

Yet the threat comes from how the Europeans plan to set their standards. After 1992, the European Community would first develop a general outline on product standards. The European standards organization, CEN/CENELEC, would then use that outline to establish product regulations for all European Community members. The problem is that the CEN/CENELEC meetings would be closed to most non-Europeans, including American Government officials and American businesses.

The minimum standards for thousands of products that flow out of the United States would be set behind closed doors. The health and safety regulations for everything from camera film to cars would be established without the participation of American businesses. And, I am afraid these standards could unfairly benefit European products over our American goods.

Back on our side of the Atlantic, Americans have relied on the private sector to set the standards. And, most of the organizations that set these policies are open to both American and foreign input. In fact many European Community companies help develop American standards.

The closed-door tactic of CEN/CENELEC is not the only problem. With product standardization comes product testing. Right now, American exporters can test their goods at home, so they can comply with European regulations. But, the European Community will not guarantee the system after 1992. This means Americans may be forced to test their export products over in Europe.

It just does not make good sense to make something, and then ship it to Europe just so they can say it's OK to sell. Imagine Boeing having to send their 747's to Belgium for noise testing. Imagine a small technology-based exporter learning that their trade association and their Government cannot participate in CEN/CENELEC. All we want is fair treatment.

The administration has objected to the European Community plans, but with little success. Now, it is time for Congress to use our resources to help the administration and American businesses.

This legislation would reciprocate the European Community in product testing and standardization using five government agencies—the Environmental Protection Agency, the Federal Communications Commission, the Food and Drug Administration, the Department of Labor, and the Department of Energy. If the European Community keeps CEN/CENELEC meeting closed, or if they do not accept product testing conducted in U.S. laboratories, any imported European Community product regulated by these five agencies would have to be tested and certified in American laboratories. CEN/CENELEC meetings should be open to U.S. businesses and Government representatives. CEN/CENELEC should accept product testing conducted in American laboratories.

I do not want our European neighbors to change their entire trade system. I just want the European Community to have fair and open discussions with our Government and our exporters. These bills will put American exporters and European exporters on equal terms. Furthermore, the restrictions would be lifted once the European Community resolves this inequity.

I appreciate the opportunity to work with Chairman GEDJENSON in developing these bills. He deserves much credit for focusing the attention of the House of Representatives on the opportunities presented by EC–92.

These bills are important to Washington, Connecticut, and the rest of our country. Obviously, we all want a good working relationship with the European Community. But, before the final chapter of EC–92 is written, it is time to use tangible leverage with our product standards to prevent the European Community from closing some of its markets to our exporters.

I urge my colleagues to join Chairman GEDJENSON and me in supporting these bills.

A TRIBUTE TO PERCY E. SUTTON: "THE CHAIRMAN'S LASTING LEGACY"

HON. KWEISI MFUME

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. MFUME. Mr. Speaker, today I rise in recognition of a distinguished African-American entrepreneur who for more than 20 years, has established himself as a foremost pioneer for minorities in the mass media industry. The man I am referring to is none other than Percy E. Sutton, chairman of New York City's Inner City Broadcasting Corp.

Percy Sutton is a man whose vision I came to admire many years ago while I was the program director of a small alternative radio station in Baltimore, MD. To those in the industry, Percy Sutton—also known as the "Chairman"—is regarded as a tough, innovative businessman with a shrewd penchant for detail.

Percy's courage and tenacity to compete and win within the tumultuous telecommunications industry, attests to his forward looking style and understanding of what large segments of American radio lovers expect from the industry.

It took Percy Sutton less than two decades to build an empire that orchestrated the rebirth of the world renowned Apollo theatre and transformed New York City's WBLS radio station into one of the hottest and popular FM stations in the country. Looking beyond the 1990's, I believe that America will witness the successful transformation of Inner City Broadcasting from a radio broadcast firm to a multimedia news information, entertainment and broadcasting conglomerate.

Mr. Speaker, early last year Percy Sutton indicated that he plans to step down as chairman of Inner City at the end of this year. However, those of us who usually worry about the concomitant change brought about by the natural order of things need not worry about this decision. For Percy Sutton's remarkable career has been characterized by his ability to influence various projects through his everyday caring and concern for the community.

What makes Percy Sutton's story even more astounding is that he seemingly never intended to enter the mass media industry. Percy Sutton began as a successful New York lawyer and practiced with his brother before the latter Sutton became a judge. Percy Sutton was noted for taking very difficult high profile cases, including the defense of the Black Panthers. During the early 1970's Percy Sutton was elected and served as Manhattan Borough president and made an unsuccessful bid to be Mayor of New York City.

Although he is no longer in politics, this does not mean that politics are not in Percy. Percy Sutton has been very successful in developing an African-American power base, particularly in the Harlem community. His latest winning association saw New York City elect its first mayor of African descent ever. Profoundly, while Percy Sutton is no longer in the governing spotlight, he has managed to preserve his power base and maintain his position as a major power broker in New York City politics.

It would be a serious travesty for me to limit Percy Sutton to strictly business and politics. Percy Sutton is a devoted family man. The managerial and organizational base of Inner City is founded upon his immediate family. Back in the mid-1970's, it was Pierre Sutton—Percy's son and heir apparent to chair Inner City—who convinced the then former borough president to join the fledging broadcasting company. From that day on, Percy, Pierre, and the Sutton-controlled family business has been on the fast track toward success.

Mr. Speaker, the reason that I decided to pay this special tribute to the chairman, is because of his special stature within the African-American community. Percy Sutton has worn many hats during his illustrious career. Manhattan Borough president, prominent defense attorney, political fundraiser, organizer, and most importantly, philanthropist. Americans of African descent in and out of the mass media industry owe a tremendous debt to Percy Sutton. Percy's willingness to reach back and pull others up along the way is something that I have specifically admired and emulated.

Within every movement and organization there are movers and shakers who don't always appear to have the power and wherewithal to move mountains and shake foundations. These persons spend much of their time laboring unselfishly behind the scenes to ensure that the engine parts are well heeled and oiled. Percy Sutton is such a man.

Percy Sutton is talented enough to have undertaken many career paths and worked for personal wealth and aggrandizement. Instead, Percy Sutton chose to stay within his community and deal directly with the tough issues of empowerment, inclusion and good government. To conclude, while Inner City may miss the chairman, those of us who know and love him know full well that Percy Sutton will continue to labor at the projects and issues that have kept him on top for so many years.

ISHAF FORMS TO COMBAT PROTECTIONIST WILDLIFE COMMUNITY AND ANTIGUN PROPONENTS

HON. LINDSAY THOMAS

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. THOMAS of Georgia. Mr. Speaker, in the recent past, this Nation has witnessed an intense and sometimes violently destructive campaign by a well-financed minority to stop all hunting, fishing, and trapping. In addition, many factions of the antigun lobby would infringe further upon the rights of shooters and hunters to pursue legitimate recreational activities.

It is certainly ironic that all of the private organizations of the sportsmen's groups that the antis seek to eliminate have contributed unselfishly of their time and money to promote laws and regulations for the professional management of our renewable resources as well as educational programs for hunter and shooter safety. The antis, on the other hand, seem to be just that, opposed to everything and unable to contribute anything.

It is imperative that the general public understand the conservation role of the sportsmen in this Nation and the world. The concept that the hunter, the fisherman, and the trapper are those persons who exploit wildlife, injure the environment, and cause irreversible damage to the environment must be challenged with the truth.

I would commend to my colleagues a fairly new organization that seeks to unite sportsmen in a positive and aggressive manner in promoting legislative and regulatory protection of the sportsmen's heritage. The International Shooting & Hunting Alliance [ISHA], and its Foundation [ISHAF], working with the many excellent sportsmen's groups, believes the time has come to initiate a positive agenda, to not only combat the misinformation generated by the protectionist wildlife community and antigun proponents, but to go on the offensive in the regulatory, judicial, and legislative arenas.

I have worked with and know the officers, staff, and many of the board of directors of ISHA. They bring to the table a wealth of experience that will be invaluable in developing programs and policies of material benefit to the sporting community.

Robert E. Petersen is chairman of ISHA, and chairman of the board of Petersen Publishing Co. that, among other publications, publishes Petersen's Hunting and Guns & Ammo magazines. Mr. Petersen, a lifelong sportsman, was commissioner for shooting sports for the 1984 Los Angeles Olympics. The vice chairman of ISHA is Arlen Chaney, president of the Outdoor Division of Blount Industries, and chairman of the National Shooting Sports Foundation. G. Ray Arnett, former director of the California Fish and Game Department, and Assistant Secretary for Fish and Wildlife and Parks of the Department of the Interior, is the president and chief executive officer.

Other members of the board include Lorne Yeo, assistant managing editor of the Guardian and the Evening Post in Charlottetown, PE, Canada, and president, Canadian Wildlife Federation; J.C.D. Bailey, president, Bailey Financial Group in Rocky Mount, NC, a director of Quail Unlimited, a former commissioner of the North Carolina Wildlife Resources, and a former senior vice president of Ducks Unlimited; Frank G. Harris III, partner in CHAI Exploration in Shreveport, LA, is a life sponsor of Ducks Unlimited, and a national board member of the Waterfowl Habitat Owners Alliance; Dr. Donald T. Lewis, M.D., of Easton, MD, past president of American Wildlife Heritage and the Easton Waterfowl Festival; Clare Conely, editor-in-chief, Outdoor Life magazine of the Times-Mirror Corp. of New York City; Gen. William C. Westmoreland, U.S. Army, retired of Charleston, SC; Dr. Graham F.T. Child, former director, Department of Parks and Wildlife Management, Zimbabwe, Africa, and an IUCN senior consultant; and Richard Garstang, former interpretive officer, Kruger National Park, Republic of South Africa, and international vice president of the Safari Club International. David M. Powers of Rocky Mount, NC, serves as executive vice president, and Stephen S. Boynton, an experienced wildlife attorney in Washington, DC, serves as general counsel.

ISHA, working with the newly formed congressional sportsmen's caucus, has been extremely helpful by contributing their time to assist in developing a meaningful agenda for the caucus and the recently incorporated Congressional Sportsmen's Caucus Foundation. As vice chairman of the caucus, I sincerely thank them for their contributions.

ISHA expresses justified concern that far too often the antihunting and antishooting groups have reached into the Halls of Congress and State legislatures in support of their activities. Their philosophy has, unfortunately, been represented in fish and game departments resulting in inappropriate laws and regulations that are clearly not in the best interest of sound conservation policies or reasoned regulations on firearms ownership and use. Sportsmen must share this concern, and support efforts to combat and reverse this trend. The national attention is focused and it is time to act.

Sportsmen have, and will continue to, finance the conservation programs of this Nation. Since the beginning of this century, sportsmen have spent over $15 billion to finance wildlife management programs and conservation efforts, research, habitat acquisition and maintenance, gun safety, and hunter education. Such funds have been derived from hunting, fishing, and trapping licenses and permits, excise taxes on hunting and fishing equipment, State and Federal conservation stamps, and other direct costs to the sportsmen. In addition, millions of dollars have been raised privately and thousands of hours donated to improve and support conservation and shooting sports. Sadly, this tale is not told often enough nor is it fully understood. Clearly, because of the sportsmen's role in conservation, this Nation can be proud of its healthy and stable wildlife populations.

I commend the International Shooting and Hunting Alliance for its efforts to insure the sportsmen a continued heritage for tomorrow. I share the belief with ISHA that much can, and must, be done to insure that reasoned wildlife management and law enforcement prevail, and that constitutional safeguards for gun ownership are maintained. Reasoned policies must not be replaced by political considerations. As sportsmen, we must support that goal.

COLORADO SPRINGS OUTSTANDING DETECTIVE RETIRES

HON. JOEL HEFLEY

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. HEFLEY. Mr. Speaker, I rise today to pay tribute to Detective Lou Smit who retired from active service in Colorado Springs on April 2, 1990. Detective Smit has been recognized and admired by his colleagues for outstanding performance in his 24-year career with the Colorado Springs Police Department.

Detective Smit, who spent 18 years as a homicide investigator, participated in 250 investigations and had a solution rate of 87 percent. Not only did he go beyond the call of duty to console friends and family in cases of death, he had a unique ability to communicate with perpetrators of violent crimes, resulting in numerous confessions.

Detective Smit's tremendous dedication to the police service, his unique blend of skill, experience, and respect for the defense bar, prosecutors, and the judiciary, will be truly missed. Residents of Colorado Springs were fortunate to have such an outstanding public servant and skilled individual serve their community.

As a Member of Congress representing Colorado Springs, I would like to ask my colleagues to join me in congratulating Detective Smit and thanking him for 24 years of dedicated service to the city of Colorado Springs above and beyond the call of duty.

A TRIBUTE TO RABBI HAROLD SCHULWEIS

HON. HOWARD L. BERMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. BERMAN. Mr. Speaker, I rise today to pay tribute to a truly outstanding community leader—Rabbi Harold Schulweis. He is one of our country's leading Judaic scholars, a prolific and acclaimed author, and for the last 20 years, rabbi of Temple Valley Beth Shalom in Encino. For his devotion, dedication, leadership, and vision he is being honored by Temple Valley Beth Shalom as their 1990 "Man of the Year."

Rabbi Schulweis' career and education reflect the evolution and expansion of the American Jewish community as a whole. He began his studies at Yeshiva College, continuing at New York University, was ordained at the Jewish Theological Seminary, and pursued graduate studies at Columbia University, the University of California, and the Pacific School of Religion at Berkeley. He studied under Rabbi Mordecai Kaplan, founder of Recon-

structionism, and for 50 years Rabbi Schulweis has played a central role in the development and growth of Judaism in America. He was also one of the first to recognize the role of non-Jews who risked their lives to save Jews during World War II and founded the Institute for Righteous Acts in 1962 to ensure these heroes received their due.

As the spiritual leader of Valley Beth Shalom, Rabbi Schulweis has been at the forefront of innovation. He set up the synagogue's counseling center and the Para Robbinie Program. He initiated the Havurah group concept which has become one of the most emulated and important forums of Jewish worship and discussion. In addition he was a founder of Mazon—the Jewish response to hunger—and has set up outreach programs aimed at the disabled.

Rabbi Schulweis is the recipient of numerous awards and honors. He is a holder of the prestigious Israel Prime Minister's Medal and has been awarded the United Synagogue's Social Actions Award and the Akiba Award of the American Jewish Committee.

Rabbi Harold Schulweis and his wife, Malkah, are proud parents to Seth, Ethan, and Alisa.

Mr. Speaker, it is a high honor and privilege to ask my colleagues to join me in acclaiming Rabbi Harold Schulweis—a world-renowned leader, scholar, and an exemplary teacher and role model for all.

EXCELLENT WORK OF CORRIGAN MENTAL HEALTH CENTER

HON. BARNEY FRANK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. FRANK. Mr. Speaker, too little is heard these days about the excellent work that is done by so many public agencies, particularly in the field of human services. One of those agencies which does a superb job of providing necessary services to our fellow and sister citizens in need is the Corrigan Mental Health Center in Fall River, MA. Last week, I had the opportunity to meet with people at the Corrigan Center and hear from them about their work and in particular about the importance of a new drug which they have found very useful in combating some of the effects of mental illness. One of the things they shared with us at the time was an article about the Corrigan Mental Health Center from "innovations," a new publication of the National Alliance for the Mentally Ill and the Public Citizen Health Research Group.

In this first issue of this publication, there is a well deserved short article praising the excellent work that is done by the Corrigan Mental Health Center. I congratulate area director Daniel Amigone and all of those who work with him at the center. I wish we in the public sector did a better job of providing the resources they need, and I want to pay particular tribute to those employees of the center who work for inadequate wages and in less than ideal conditions to provide these necessary services.

Mr. Speaker, because it is important for the public at large to understand what vital services institutions such as the Corrigan Mental Health Center provide, I ask that the article from "innovations" be printed here.

IN BRIEF: CORRIGAN MENTAL HEALTH CENTER

(By E. Fuller Torrey)

Here is a community mental health center that is functioning as CMHCs were originally envisioned when they were sold to Congress in 1963. With a catchment area of 150,000 and a 38-bed inpatient unit that is JCAHO-accredited and HCFA-certified, Corrigan has sent only three patients to state hospitals (including the forensic unit) in the past 10 years, and these hospitalizations were for medical, not psychiatric, reasons.

The resources of the Center are strongly oriented toward people with serious mental illnesses. The professional staff has been stable, has a very clear sense of mission, and takes pride in being able to maintain even the most seriously ill clients in community settings. Corrigan's director, Daniel K. Amigone, personally takes clients with schizophrenia to lunch when they have made progress. Pressure from the Alliance for the Mentally Ill of Greater Fall River, led by former Massachusetts AMI president Anita Pyatt, has been an essential ingredient in Corrigan's improvement in recent years.

Programs include a six-bed crisis home across the street from the Center, a hospital diversion program for children, a clubhouse (Towne House), a day program (Polaris House) that operates 364 days a year, an impressive vocational program that includes a restaurant (Gerry's Hot Dogs), and a network of residences and apartments that are notable for being homelike and not in the worst neighborhoods.

When the Center found it difficult to find housing for older mentally ill adults, it opened up its own 10-bed residence, Harbor Hill. When the Center found it was getting too many admissions from the local single-room occupancy (SRO) residence, it assigned a staff person to the SRO. Corrigan staff members do outreach to the local police and appear to have developed excellent relations with the community. And it does all this on a budget that is below average for CMHCs in Massachusetts. Overall, this is an excellent CMHC and a program of which Massachusetts can be proud.

BORDER PATROL PERSONNEL SHOULD BE INCREASED

HON. CARLOS J. MOORHEAD

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. MOORHEAD. Mr. Speaker, today, I am introducing legislation to authorize additional appropriations to increase Border Patrol personnel to 6,600 by the end of fiscal year 1992. Joining me as a cosponsor is my colleague and fellow Californian, BILL LOWERY of California's 41st District. At a time of record drug seizures and unrest and upheaval in Central America, increasing the strength of the patrol to this level is eminently sensible. At the end of 1989, 88 percent of the total increase authorized by my amendment to the Immigration Reform and Control Act of 1986 [IRCA] was in effect. The lack of appropriations, a budget freeze, reprogramming, inflation, and other uncontrollable factors have all been roadblocks to achieving full funding under my amendment. Current budget proposals do not reflect a significant increase in Border Patrol agents.

Over the last 10 months apprehension of illegal aliens has been up by 29.9 percent, and, despite an increase in appropriations to expand Border Patrol personnel by 50 percent over 1986 levels, much of the expenditure has yet to be directed to an increase in enforcement activities focusing on illegal immigration. Of the $9 million earmarked for 200 additional Border Patrol positions in the fiscal year 1990 Commerce-Justice-State appropriations bill, most of the funding has been used to finance pay increases and moving expenses for personnel already on board. My bill would authorize additional appropriations to increase Border Patrol personnel to 6,600 by the end of fiscal year 1992. Should it become necessary, the bill makes available amounts in the Justice Department forfeiture fund for the additional positions.

I am disturbed by the fact that since the INS hiring freeze went into effect and particularly in the past few months, the number of apprehensions has increased, showing an upward trend and leading us to believe that the number of illegals crossing the border is once again on the rise. Public perception is important on both sides of the border, and the awareness aroused by reports that Border Patrol strength is currently declining along with current attempts by Congress to grant additional amnesty requests is sending the wrong message to foreigners wishing to enter our country illegally.

A March 29, 1990, GAO report alleging discriminatory practices in employer sanctions could result in Congress repealing these IRCA provisions within 30 days. With that possibility, it is wise and prudent to increase the strength of our Border Patrol.

The Southwest border has been designated as one of the areas to receive special attention from the President's national drug control strategy. This makes additional funding even more necessary. As part of our drug control strategy, the President has made it clear that funding is to be provided for an increase in resources to our Southwest border.

In a recent opinion poll sent to every household in my district, one of the questions asked was "Do you think the southern border of the United States is secure?" Nearly 80 percent of those responding answered "no." I believe that similar results would be found in other border States where people are clearly aware of the existing problems. For all these reasons, Mr. Speaker, I hope my colleagues will join me in this effort to make funds available to increase our Border Patrol to the numbers necessary for the enforcement of our immigration laws and the protection of our citizens.

LONG LIVE LITHUANIA

HON. GEORGE E. SANGMEISTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. SANGMEISTER. Mr. Speaker, I want to applaud the House for passing this afternoon, by an overwhelming vote of 416 to 3, House

Continuing Resolution 289 which expresses congressional support for the Lithuanian people in their efforts to reclaim their independence. I would like to thank my colleague, Mr. DURBIN, for his continual commitment for freedom by offering this resolution. I believe the House has sent a clear message to President Bush that he must stand firm with President Mikhail Gorbachev and persuade the Soviets to live up to international law. How much longer must the Lithuanian people be subjected to Russian tyranny? They have lived under the horrors of Nazi Germany and for the last 50 years, Soviet hegemony. This is a great opportunity for Mr. Gorbachev to follow through with his reforms as he has with Eastern Europe, by granting the Lithuanian Government their rightful independence. Mr. Speaker, the Lithuanian people have suffered and sacrificed much for freedom. With this in mind, can the United States stand idly by and do nothing? Of course not. We have a moral responsibility to support the movement of freedom. Surely, Lithuania is as clear a case as any. In the end, lasting peace and security within the United States will largely be determined by the level of freedom from outside her borders. Long live Lithuania!

HOUSE CONCURRENT RESOLUTION 289

HON. BILL SARPALIUS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. SARPALIUS. Mr. Speaker, with the overwhelming passage today of House Concurrent Resolution 289, we in this House have sent a strong message to the people of Lithuania. We have told them that we stand firmly behind them as they struggle to regain the independence stolen from them 50 years ago.

Some would wonder whether one congressional resolution can make a difference in a struggle between a small nation trying to find its way in the world and a nation as powerful as the Soviet Union. Well, let me tell you members, it can make a big difference.

Last February, Congressmen DURBIN, MILLER, and COX and I traveled to Lithuania to observe the first free elections there since the Soviet takeover in 1940. We were just four Congressmen. We could not guarantee the Lithuanians anything but our personal support for their efforts. Yet to them, our mere presence meant so much.

I think we sometimes are too complacent about the freedoms we enjoy, and I don't think we fully appreciate what those freedoms represent to the oppressed peoples of the world. When I went to Lithuania I saw people who have been without freedom for half a century. They have suffered under the oppression first of Stalin, then, briefly, of Hitler, Stalin again and Brezhnev. They have seen some of their finest minds rounded up and moved out of Lithuania, never to be seen again. Now, finally, they have a realistic chance to break the chains that have shackled them for 50 years, so they naturally look to the United States as an example of everything democracy should be.

Any moral support, any small gesture from those of us in the U.S. Government is appreciated there. Just as our trip in February was a morale booster, so will be this resolution. It will tell them that the legislative branch of our Government is firmly in their corner.

It also will send an important message to the Soviet Union, a message just as strong as the administration's admonition against using force. They have to know that the United States, as the world's leading democracy, can and must offer its full moral support to other peoples' efforts to attain democracy.

Now, we are realists. We know true Lithuanian independence will not be achieved overnight. We understand this is a complicated issue, and that it is one that can be resolved only through lengthy negotiations between the Republic of Lithuania and the U.S.S.R. We also recognize and understand the internal political problems Mr. Gorbachev must deal with during this process. We are willing to show a degree of patience in this process, and I think House Concurrent Resolution 289 reflects that willingness.

What we cannot tolerate—ever—is the type of tactics we have seen from the Soviet Union during the last weeks. There was no need, no reasonable cause, for the Soviet Army to occupy public buildings in Vilnius. Similarly, there was no reason for the Soviet Army to storm a Vilnius hospital to round up Lithuanian nationals who had left the Soviet Army to return to their homeland. And, I think House Concurrent Resolution 289 accurately reflects our indignation at these actions.

So, Mr. Speaker, I think this House today has honorably discharged its duty as a body of representatives of the freest people in the world. We have reaffirmed the values upon which we founded this Nation, and we have made it clear to the people of Lithuania and the leaders of the Soviet Union that we will be unswerving in our support of Lithuanian independence.

It is my hope and prayer that the next time we meet to discuss Lithuania, it is to congratulate the people of the republic on the realization of their dream of independence.

INTRODUCTION OF "COMPOSTING RESEARCH ACT OF 1990"

HON. GEORGE J. HOCHBRUECKNER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. HOCHBRUECKNER. Mr. Speaker, today I am introducing the Composting Research Act of 1990. This legislation is designed to help alleviate our Nation's waste disposal burdens.

The United States faces a looming garbage crisis which the Congress cannot ignore. Americans generate 160 million tons of trash each year. Only about 11 percent of this garbage is being recycled, while 75 percent is entombed in landfills and 13 percent is incinerated. Since 1978, 70 percent of all U.S. landfills—14,000 facilities—have been closed. In my own district, all landfills must close permanently this December under New York State law.

Local officials across the country are instituting a variety of programs intended to reduce the amount of trash generated and increase the proportion of the waste stream routinely separated for recycling. Nonetheless, they face the instability of markets for recyclable materials. More and more jurisdictions in this Nation are running out of places to hide their waste, and they have seen no leadership from Washington in addressing the problem.

One important strategy in addressing the waste disposal crisis is composting, which reduces waste to a mulch-type material through natural decomposition. Composting is an ancient technology that holds great promise for modern society. Over one-third of the Nation's municipal solid waste could be diverted from the waste stream and composted rather than landfilled or incinerated. Materials suitable for composting include fallen leaves, branches, tree stumps, grass clippings, and post-consumer wastes composed of organic materials. Composting could be an important element in a comprehensive waste management strategy, but its success is dependent upon the creation of markets for the finished compost material.

Composting of agricultural wastes can help prevent contamination of water supplies and lessen waste removal burdens on farmers. Following recovery and reuse of valuable elements such as starches, fats, and oils, composting can transform crop and livestock wastes into a useful soil additive. Application of finished compost can help to stabilize and enrich soil and reduce the use of chemical fertilizers.

As we consider a comprehensive reauthorization of the nation's farm programs, the Congress may wish to explore the potential benefits of expanding composting in the farm sector. Runoff of manure and other agricultural wastes into groundwater, rivers, lakes and estuaries has been of major concern to the environmental community. Perhaps there is a larger role for composting to play in transforming potentially hazardous farm wastes into harmless mulch. The Department of Agriculture USDA could be directed to analyze the suitability of compost as a soil conditioner and stabilizer in association with food and nonfood crops. Members of the horticulture industry are interested in utilizing compost derived from solid waste, but growers need to have assurance that such compost does not contain hazardous substances.

On November 16, 1989, a hearing on composting held in the House Agriculture Subcommittee on Department Operations, Research, and Foreign Agriculture revealed consideable support for legislation in this area. That hearing focused on a measure I introduced in January 1989 entitled the Recyclable Materials Science and Technology Development Act (H.R. 500). The proposal I am introducing today incorporates recommendations made by USDA and the Environmental Protection Agency at that hearing.

I believe that the USDA is uniquely qualified to evaluate agricultural composting methods

and uses for compost. The agency studied composting during the 1970's, but its research was discontinued under the Reagan administration. My bill would have USDA revisit this subject and initiate extension efforts to help identify markets for compost and facilitate on-farm composting.

The Composting Research Act of 1990 recognizes that compost can be a safe and useful soil additive which can help to stabilize and enrich soil. It states that the use of compost as a substitute for other soil additives can help avoid the depletion of raw materials and protect the environment. The bill directs the Federal Government, through the USDA, to help facilitate the use of compost.

This bill establishes a Compost Task Force, whose 15 members shall be selected from the following groups: officials from States with laws on composting; representatives of livestock, forestry, fishing, nursery, horticulture, vineyard, and orchard interests; landscapers and builders; the composting industry; microbiological scientists; food and fiber processors; food service industries; public interest groups; and manufacturers of consumer product packaging.

The bill directs the USDA, in consultation with the Compost Task Force, to research potential uses for compost and identify domestic and international markets. The agency's research must include evaluation of the application of compost derived from various wastes on soil, plants, and food and fiber crops.

The USDA is also directed by the legislation to assemble a catalogue of laws, regulations, and programs adopted by State and local governments, and by foreign countries, that establish standards for compost quality, set definitions for processing, handling, or using compost, or otherwise affect the production or use of compost. This catalogue will be of use to the Congress in evaluating the need for further legislation at the Federal level.

The Composting Research Act also directs the USDA to initiate extension efforts including seminars, demonstration projects, and dissemination of materials, to inform the agricultural community about the desirability and safety of compost derived from solid waste, about on-farm composting techniques, and about procedures for apply finished compost. It also requires USDA to consider designating composting as a farm conservation practice eligible for cost-sharing.

Finally, the Department is directed to initiate interagency agreements to identify opportunities for applying compost on Federal lands.

Mr. Speaker, I believe that composting could prove to be the "sleeping giant" of waste management. If compost operations can be designed to be cost-effective, convenient to the generators of compostable wastes, and non-offensive to nearby communities, then the technolgoy should prove to be a highly attractive alternative to landfilling and incineration. Furthemore, if finished compost can be demonstrated to have value as a soil additive, then we will be advancing a truly natural system of recyling.

IN MEMORY OF RICHARD WALLACE GEARY

HON. JAMES H. BILBRAY

OF NEVADA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. BILBRAY. Mr. Speaker, it is with great sorrow that I rise today to pay tribute to an outstanding Las Vegan, Richard Geary, who died Tuesday, March 13, 1990, after fighting a long and valiant battle with cancer.

Born September 12, 1934, to Thomas and Opal Geary in Palo Alto, CA, Richard grew up in the San Francisco area. Richard's interest in advertising was sparked in 1952 when he worked as an assistant to a San Francisco advertising agency. Realizing this was to be his life's calling, and eager to work in advertising, he landed his first real job in the mail room of an outdoor advertising company in Los Angeles.

In 1964, Richard moved to Las Vegas and by 1969 he had founded the award-winning Geary Co./Advertising Agency. Throughout the seventies, the company worked almost exclusively with artists—for entertainers such as Elvis Presley, Wayne Newton, Dolly Parton, Joan Rivers, and Steve Martin, advertising and promoting their engagements in Las Vegas and on tour. By 1975 Richard had successfully established himself and his advertising agency in the hotel/resort industry. During the last dacade the Geary Co. has won three Addy Awards and six Certificate of Merit Awards.

Richard's success professionally was not to be outshined by his personal generosity to numerous civic activities. For many years he donated all advertising/artwork for fundraising efforts for the St. Jude's "Nite of Stars." He contributed regularly to the Las Vegas Ballet, UNLV Women's Basketball Team, channel 10, Sigma Chi, Farm Aid, National Kidney Foundation, American Cancer Society of Nevada, and American Lung Association of Nevada.

I extend my sympathies and those of my wife and daughters to Richard's wife Mary, his son Dan, and his entire family.

Mr. Speaker, the passing of Richard Geary is a great loss to all Las Vegans and Nevadans. I thank my colleagues for this opportunity to a tribute to this admirable man in the permanent history of this body. It is a great privilege.

TRIBUTE TO JACQUELINE CHARLENE HO

HON. TOM SAWYER

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. SAWYER. Mr. Speaker, I rise today to pay tribute to a patriotic and talented young woman of my district, Miss Jacqueline Charlene Ho of Silver Lake, OH. Jacqueline is a 17-year-old senior at Cuyahoga Falls High School, and I am proud to say that she is this year's Ohio winner of the Veterans for Foreign Wars of the United States and its Ladies Auxiliary's Voice of Democracy scriptwriting contest. This year more than 137,000 secondary school students participated nationally on the theme of, "Why I Am Proud of America." Jacqueline was aided with her composition by her teacher, Mrs. Joan Benfield.

As for Jacqueline's future, she plans to study at Yale University. Mr. Speaker, I am pleased to submit the full text of Jacqueline Ho's award winning speech.

WHY I AM PROUD OF AMERICA

(By Jacqueline Charlene Ho, Ohio Winner of the 1989/90 VFW Voice of Democracy Scholarship Program)

Independence Hall, a place were many great voices of America have been heard. I visited that glorious symbol of our freedom this summer, and I was over-whelmed to think that such figures as John Adams and Thomas Jefferson had walked on the same ground I was walking on. In the room where delegates had met for the Second Continental Congress, I could almost see Richard Henry Lee announcing that the colonies "are . . . and ought to be, free and independent states". I could picture Benjamin Franklin when he sat in that same room as the Constitutional Convention. After the Constitution was signed, he pointed to a chair decorated with a carefully carved half-sun. He remarked, "I have often looked at that . . . without being able to tell whether it was rising or setting. But now I have the happiness to know that it is a rising and not a setting sun". Franklin was right. America is a rising sun. We have always striven to uphold the standards of liberty and equality our forefathers envisioned, and our light of liberty shines all over the world. I am proud of America for its freedom. And I am proud that we had leaders with vision who could build this great nation.

America has been blessed. Our forefathers protected our rights in the Constitution. If they had not made sure that those rights, and liberty, and equality were principles ingrained in our government, we may never have had the freedom we enjoy today. Some dream all of their lives to have freedom. They dream of coming to America. Some reach their dreams. I knew of one such person.

Twenty years ago a young girl fresh from college came to America. She carried two suitcases of dreams, dreams of the freedom and equality America stood for. Dreams she thought unreachable. As a child, she had seen the tragedy of her neighbor. He had kept a book that criticized the government. The government discovered it and jailed him for twenty-five years. He was never to see this children grow up. The government had robbed him of some of the best years of his life.

So all this girl knew was that the government was king and the citizens were its helpless subjects. They heard what the government wanted them to hear; they had to believe whatever was told them; they could speak only of the so-called "good" of the government; and above all else, they had to obey.

When this young lady arrived in America, she found a new land, a land of freedom. She was amazed at the openness she found. Newspapers critized the government; political cartoons were absolutely shocking; and protesters dared to rally for their causes. Freedom of speech felt wonderful, and so did other freedoms like the right to vote. It was an especially moving moment for her when she cast her first ballot. That young lady was my mother. She has always taught

me how important freedom is and how proud we should be to live in America.

So when I went to Independence Hall, I realized the great importance of its history. During that vivid moment when I touched the Liberty Bell, history struck me. The Bell had rung proudly after we had declared independence. As I ran my hand down its worn, bronze surface, I felt the roughness of the crack on its side; and to me, that crack symbolized all the people who dies for liberty. Today the Bell rings for everyone. It rings the message of freedom it tolled for on the momentous day in 1776. And now its message is being heard in other countries. From Solidarity in Poland to the students in China, freedom is taking root. And even the Berlin Wall has crumbled.

I am proud that for 200 years America has kept freedom alive. I am proud that my mother had the courage to find her dreams in America. I am proud that I am an American. And I am proud that I can still feel the Liberty Bell ringing today.

WE ALL "KNEW" TED WOLF

HON. CLARENCE E. MILLER

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. MILLER of Ohio. Mr. Speaker, a Maryland State Police officer was gunned down alongside I-95 last week near Baltimore, killed in the line of duty, doing his job, just as he had done exceptionally well for 16 years.

I never met Cpl. Ted Wolf. In fact, I would never even heard of him prior to this tragedy. Yet, somehow, I knew this man, and because he was an honorable public servant, we will miss him as though he were family.

His job was risky. He enforced the law, some of which were passed in this Chamber and given to Trooper Ted Wolf to enforce for the public's good and our highway safety.

He leaves a wife and three children, as well as a distinct impression that will last a long time: a good man, a professional. We all know someone just like him.

I put two things into the mail today: A check to the Ted Wolf Memorial Fund and a letter to my House colleagues urging them to do the same.

Send a check, sign your name. Say the contribution comes from someone who knew Ted Wolf.

LEGISLATION TO RESTORE SMALL BUSINESS FINANCING IN AREAS OF POSSIBLE HAZARDOUS WASTE CONTAMINATION

HON. JOHN J. LaFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. LaFALCE. Mr. Speaker, today I am introducing legislation that would halt a disturbing trend in hazardous waste liability law which is threatening the ability of thousands of small businesses to obtain the financing they need to survive. The problem is that several recent Federal court decisions have interpreted the Comprehensive Environmental Response Compensation and Liability Act [CERCLA], better known as the Superfund statute, so that a secured lender which forecloses on a facility that is contaminated with hazardous waste may be liable for the cost of cleaning up the hazardous waste, even if the lender in no way caused or contributed to the contamination. The cost of such a cleanup can be several million dollars. As a result, lenders are often unwilling to make loans in areas of possible hazardous waste contamination, and small businesses in these areas cannot obtain financing. For areas of the country which have hazardous waste problems, the economic repercussions can be devastating.

The most notable Federal court case imposing liability on a lender which foreclosed on a contaminated property is U.S. versus Maryland Bank & Trust, a 1986 Federal case in Maryland. Maryland Bank and Trust Co. foreclosed on a farm in 1982, which, the Environmental Protection Agency discovered a short time later, was contaminated with hazardous waste. EPA then cleaned up the site at a cost of half a million dollars and sued Maryland Bank and Trust for reimbursement. Even though the bank had no idea at the time it foreclosed that the property was contaminated and did nothing to create the problem, the Federal district court of Maryland found that the bank was an owner within the meaning of CERCLA and therefore was subject to Superfund's strict liability standard. EPA settled with Maryland Bank and Trust for more than $500,000.

Although U.S. versus Maryland Bank & Trust is the most notable case of its kind, there have been others like it. In Guidice versus BFG Electroplating, a 1989 Federal case in Pennsylvania, a bank foreclosed on its mortgage on the premises of a defunct electroplating plant and held title for just 8 months before reselling. The bank in no way contributed to the hazardous waste contamination and was merely acting to protect its security interest. Nevertheless, in September 1989 the U.S. District Court for the Western District of Pennsylvania held that the bank was an owner within the meaning of the Superfund statute, and thus was subject to CERCLA liability. In an ongoing action, a small bank in the Western United States faces possible bankruptcy because, as a foreclosing lender, it has been named as a potentially responsible party liable for cleanup costs at one of the worst Superfund sites in the country. Cleanup costs are estimated at $7 to 10 million.

Cases like these are sending shock waves through the financial community. Suddenly lenders foreclosing on their secured property are faced with the threat of potentially limitless liability. Toxic waste cleanups often cost millions of dollars, which may be many times more than the value of the property itself, and CERCLA contains no limit on the amount of liability. And so in many cases lenders, faced with this dilemma, have stopped making loans to businesses in areas where there is even the smallest suspicion of hazardous waste contamination.

The result for the small business trying to obtain financing has been devastating. An independent petroleum marketer testified at an August 3, 1989, hearing before the Small Business Committee that many petroleum marketers needed financing to repair and replace their underground petroleum storage tanks in order to comply with Environmental Protection Agency regulations. But they could not get that financing because lenders were afraid of Superfund-type liability under an analogous section of another environmental statute. In other words, these petroleum marketers could not even get the financing they needed to clean up their facilities. And so these independent petroleum marketers, most of which are small businesses, were faced with the imminent closure of over 25,000 service stations. EPA later agreed to postpone implementation of the regulations.

I have heard similar stories from companies in other industries and geographical areas. Drycleaners, transshippers, electric platers, wood product manufacturers, metal finishers, and other businesses that use hazardous materials either in their processes or as a part of the product often have difficulty obtaining a loan secured by their facilities. In western New York, where I come from, small businesses located in areas of possible contamination frequently cannot obtain financing from any lender, up to and including the State of New York, because the lenders fear Superfund liability.

In 1986, Congress amended CERCLA to insulate a secured lender from liability if the lender can show that before it acquired a facility, it made appropriate inquiries—such as an environmental assessment—to determine whether the facility might be contaminated. This is the so-called innocent landowner defense. The trouble with the innocent landowner defense is that in many cases it exacerbates the problem for small businesses trying to obtain financing in areas of possible hazardous waste contamination. Suppose, for example, that a lender is considering making a secured loan to a small business, and, in order to protect itself through the innocent landowner defense, conducts an environmental assessment of the property on which the business is located. If that environmental assessment indicates even the slightest possibility of contamination, or if it indicates contamination of a minor nature, the lender is not likely to make that loan, because doing so would subject the lender to possible liability running into the millions of dollars. On a loan of only a few thousand dollars, it is just not worth it for the lender to take that risk. And so, as the American Bankers Association mentioned in their testimony before my committee, the result is a squeeze on credit. Once again it is the small business in need of financing that is hurt.

In addition, the innocent landowner defense raises the cost of borrowing to the point where many small businesses can no longer afford to borrow. An initial environmental assessment usually costs about $1,500 to $2,000. If that assessment indicates possible contamination, a more thorough property check can run from $3,000 to $150,000 per site. If lenders conduct such assessments before making secured loans, in order to meet the conditions of the innocent landowner defense, they will pass along the cost of the as-

sessment to the borrower. For a small business seeking a loan of $25,000, that increased cost may well be prohibitive. As Sally Narey, General Counsel to the Small Business Administration, testified before my committee:

Because of this potential liability, a prudent lender will often request an environmental audit of the potential borrower's property upon submission of a loan application. This can cost several thousand dollars. Small Businesses . . . generally do not have sufficient funds to incur the costs of such audits and may be deprived of the opportunity for financing.

CERCLA may also pose problems for a fiduciary which holds title to or controls a contaminated property as part of a trust or estate. It is possible that courts will interpret CERCLA so that such a fiduciary will be liable for the cost of cleaning up the contaminated property and for damages. That is, even if the fiduciary had no knowledge of contamination at the time it agreed to administer the trust or estate, it may still be considered an owner or operator under Superfund and therefore subject to liability. Liability in a case like this could exceed the value of the entire trust or estate, in which case the fiduciary may be held personally liable.

Last year, I introduced legislation to deal with the twin problems of lender and fiduciary liability. The bill was designed to insulate corporate lending institutions from inappropriate Superfund liability when they foreclose on property that turns out to be contaminated. The bill would thus allow them to lend to businesses in areas of possible hazardous waste contamination without taking on potential Superfund liability. In addition, the bill was designed to extend Superfund's liability exemption to innocent corporate fiduciaries which hold title to a contaminated property for the purpose of administering a trust or estate.

Since I introduced that bill last year, a number of organizations have raised legitimate concerns that the bill did not go far enough in insulating innocent lenders and fiduciaries from inappropriate liability. It was pointed out, for example, that although the bill extended Superfund's liability exemption to commercial lending institutions when they foreclose on contaminated property, it did not protect other types of lenders which face the identical problem, including public lenders—such as the Small Business Administration—mortgage lenders, and charitable institutions, among others. Just like corporate lending institutions, these lenders are innocent parties which are deterred by the threat of CERCLA liability from lending to small businesses and other customers. Thus, they warrant the same treatment.

Likewise, it was pointed out that although the bill extended Superfund's liability exemption to corporate fiduciaries which hold legal title to property for purposes of administering an estate or trust, it did not extend the exemption to other types of fiduciaries which face the identical problem, such as individual fiduciaries and corporate fiduciaries which do not actually hold title to property which is part of an estate they manage.

After carefully considering these concerns, I decided to revise my original bill in order to extend Superfund's liability exemption to other categories of lenders and fiduciaries. Today I am introducing the revised legislation, the text of which follows. In addition, I would like to insert in the RECORD an excellent Forbes magazine article describing the lender liability problem.

H.R. 4494

Be it enacted by the Sente and House of Representatives of the United States of America in Congress assembled,

SECTION 1. AMENDMENT TO COMPREHENSIVE ENVIRONMENTAL RESPONSE, COMPENSATION, AND LIABILITY ACT OF 1980.

(a) AMENDMENT TO DEFINITION OF OWNER OR OPERATOR.—

(1) EXCLUSION.—Subparagraph (D) of section 101(20) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (42 U.S.C. 9601(20)(D)) is amended—

(A) by inserting after the first sentence the following new sentence: "Such term also does not include any of the following:

"(i) Any designated lending institution which acquires ownership or control of the facility pursuant to the terms of a security interest held by the person in that facility.

"(ii) Any corporate fiduciary which—

"(I) has legal title to any facility for purposes of administering an estate or trust of which such facility is a part; or

"(II) does not have legal title to the facility but operates or manages the facility pursuant to the terms of any estate or trust of which such facility is a part.

"(iii) Any individual or institution or successor thereto that serves as an indenture trustee for outstanding debt securities or any certificates of interest or participation in any such debt securities and acquires ownership or control of a facility as a result of an event of default pursuant to the terms of an indenture agreement or similar financing document between such trustee and the issuing entity."

"(iv) Any individual fiduciary who has legal title to any facility for purposes of administering an estate or trust of which such facility is a part.

"(v) Any designated lending institution which acquires ownership of any facility in connection with a lease subject to regulation by applicable federal or state banking authorities."; and

(B) in the second sentence (as determined before the amendment made by subparagraph (A) of this paragraph)—

(i) by striking "State or local government" each place such term appears and inserting "State or local government or person referred to in the preceding sentence"; and

(ii) by striking "nongovernmental entity" and inserting "any person (other than any person referred to in the preceding sentence)".

(2) CONFORMING AMENDMENT.—Clause (iii) of section 101(20)(A) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (42 U.S.C. 9601(20)(A)) is amended by inserting after "to a unit of State or local government" the following: "or to any other person covered by subparagraph (D)".

"(3) DEFINITION OF DESIGNATED LENDING INSTITUTION.—Section 101 of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (42 U.S.C. 9601) is amended by adding at the end the following new paragraph:

"(39) DESIGNATED LENDING INSTITUTION.—The term 'designated lending institution' means—

"(A) any depository institution (as defined in section 19(b)(1)(A) of the Federal Reserve Act), any leasing company which is an affiliate thereof, any institution of the Farm Credit System, and any trust company; and

"(B) any other person which is a bona fide lending institution and during the 1-year period beginning 6 months before and ending 6 months after the date on which the security interest in the facility referred to in paragraph (20) was perfected, made real estate loans the aggregate amount of which exceeded $1,000,000 to 25 or more borrowers; for the purposes of this subparagraph a bona fide lending institution shall include—

"(i) any mortgage lender (including any lender whose loan with respect to any facility is secured by a deed of trust);

"(ii) any agency, department, or other unit of the United States Government or of any State or local government not otherwise described in paragraph (20) which makes loans on the security of any facility, including economic and industrial development agencies; and

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall take effect on the date of the enactment of this Act.

[From the Forbes magazine, Feb. 19, 1990]

WHOSE MESS IS THIS?

(By Thomas Jaffe)

A customer of Maryland Bank & Trust Co. defaulted on a $335,000 loan, and the bank foreclosed on a 117-acre tract of land. After the foreclosure, the Environmental Protection Agency found drums of chemicals and contaminated soil on the site. The EPA then cleaned up the mess.

To whom did the agency send the cleanup bill? To the bank, from which the EPA won a settlement of over $500,000, despite the fact that the bank had nothing to do with creating the mess.

To junk bonds, bad real estate loans and Third World debt, add to the banks' and thrifts' woes the specter of environmentalists going after banks for tens of billions of dollars to clean up foreclosed real estate that may be loaded with hazardous waste. According to Craig Gass, a New York-based senior manager for KPMG Peat Marwick who specializes in environmental financial management, the potential cost of cleaning up hazardous waste in the U.S. could run up to $500 billion over the next 50 years. Gass guesstimates that, based on what's already known, banks could be on the hook for at least 20% of that amount. Even discounted to its present value, that is a huge potential liability.

Buck Jones, a partner in charge of banking with Nashville's J.C. Bradford & Co., agrees. He warns that for lenders of any size, a foreclosed site can easily turn out to be "an environmental time bomb."

Just such a bomb recently fell into the lap of $225 million (assets) Workmen's Bancorp, the holding company for Workmen's Federal Savings Bank of Mount Airy, N.C.

Workmen's recently disclosed that during the Sept. 30, 1989 quarter Camel City Laundry Co. of nearby Winston-Salem had filed for bankruptcy still owing Workmen's some $558,000 on a loan. Because of environmental concerns, explained Workmen's, the value of the real estate securing the Camel City loan was questionable. As a result, the bank charged off the full $558,000 plus accrued interest.

Had Workmen's failed to do its homework on the loan? Hardly. Before making the loan, it had run a routine check to see if the

laundry site was contaminated. The site received a clean bill of health.

Shortly after the loan was funded, however, the bank discovered that the property adjacent to the laundry had a hazardous waste problem. Worse, the laundry site itself might be to blame. Years ago, it seems, a coal gasification plant had been situated there.

The lawyers are having a field day. The bankrupt debtor has filed a motion in bankruptcy court asking that the bank's lien on the property be declared worthless. Workmen's is fighting this. Why? It doesn't want to foreclose, repossess title to the property and be stuck with an enormous cleanup bill. Workmen's prefers to wait until someone else picks up the tab; then it would consider foreclosing. "We want to know that afterwards we will still be the owner of what may be a salable piece of property," says Thomas (Buck) Faw, president of Workmen's.

Faw adds: "It's an extremely dangerous position for a bank to be in. You want to be as sure as you can be that property is free of any contamination that might render it suspect as security for a loan. I don't know what a bankruptcy court will do in a situation like ours, where the debtor can't afford to pay for the cleanup. But it makes you very uncomfortable, to say the least." As if the lenders didn't already have enough to make them feel uncomfortable.

HERB DOGGETTE: SOCIAL SECURITY ADMINISTRATION'S SUPERSTAR

HON. BILL ARCHER

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. ARCHER. Mr. Speaker, it takes millions of dedicated men and women to run this massive conglomerate we call the Government of the United States. Within this enormous work force there are many excellent, conscientious, devoted public servants. Within that large circle of excellence, there is a smaller number that could honestly be termed heroes, those who consistently go beyond the call.

And, there is an even more select group, a minute handful of those unsung heroes who are nothing less than legends in their field. One of those legends has just retired from Government service and it is only just that we pay tribute to him and his unparalleled record of service to the American public.

Herbert R. Doggette, Jr., just retired as the Social Security Administration's Deputy Commissioner for Operations. In that role, he has managerial and supervisory responsibilities that exceed those of any chief executive officer of any Fortune 500 corporation.

He supervised 60,000 employees in over 1,300 Social Security field offices throughout the country, over 80 percent of the Agency's work force. He was the overseer of SSA's immense data processing network, including the National Computer Center. He was responsible for an operation which generates the payment of more than $225 billion in benefits each year.

Herb Doggette was the driving force behind a computer modernization program at the Social Security Administration that has reduced processing times for benefit claims, wage posting, cost-of-living increases, address changes, and other actions from days and weeks to mere hours. He made the Social Security Administration a faster, most efficient public service instrument.

Mr. Doggette's career is the stuff of which legends are made. He didn't begin at the executive level. Just the opposite, he started 31 years ago as an entry-level mailroom supply clerk. He didn't stay there long, however. In just 6 years, he opened and managed a Social Security district office in the Watts area of Los Angeles, the first Federal office to be located in that community.

His talents and skills led to further promotions, culminating in appointments, twice, as Acting Commissioner, and to the position from which he has just retired. He has twice received the Presidential Distinguished Rank Award, the pinnacle honor for Federal public servants.

Mr. Doggette is not a stranger to this body. He has frequently represented his agency in committee hearings, and I can personally attest that he has represented it well. When Mr. Doggette's name appeared on the witness list, I knew that I would hear a well-reasoned analysis of Social Security programs and policies. But, more importantly, I knew I would hear the voice of honesty and integrity.

Now, however, Herb Doggette has chosen to shift his considerable talents and abilities from the world of government to the world of academia. He will teach management, and I can't envision a better qualified instructor.

It's a regrettable fact of life that our outstanding Government executives, even the most stellar among them like Herb Doggette, toil in anonymity. The American people, by and large, do not know they have lost the services of this remarkable man. However, each time they receive a Social Security check, or receive courteous service from 1 of those 1,300 field offices, or remark at how quickly SSA processes a change in their records, they will be reaping the fruits of Herbert R. Doggette, Jr.'s 31 years of service, a truly outstanding career.

WHAT ABOUT CHILE?

HON. PETER H. KOSTMAYER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. KOSTMAYER. Mr. Speaker, in a recent op ed in the Times of the Americas, our former colleague and chairman of the Subcommittee on Western Hemisphere Affairs, Michael D. Barnes, asks "What About Chile?" The article, coauthored by Arnold H. Weiss, former general counsel of the Inter-American Development Bank, makes the point that in these days of dramatic events in Eastern Europe and in Central America, Chile's historic—but quite—transition to democracy has been virtually overlooked.

"The election and inauguration of President Patricio Aylwin, a centrist Christian Democrat, to replace the 16-year military rule of Gen. Augusto Pinochet, is one of the most promising developments in Latin America in recent years," write Barnes and Weiss. But that trend will not remain positive without support from the international community to meet Chile's two main challenges: a restructuring of the outstanding foreign debt and meeting the pressing social demands of those left out of the economic miracle of the 1980's. They correctly point out that "these challenges are made more difficult by the outrageous efforts of Pinochet to tie the hands of his successor by eleventh hour initiatives that have received virtually no attention outside Chile."

During his tenure as chairman of the Subcommittee, on which I have the honor to serve, Mike Barnes was a champion for human rights and a return to democracy in Chile, I urge my colleagues to read the entire article, and to heed its conclusion that President Aylwin will need the support of the international community if he is to fulfill the hopes of this people.

The text of the article follows:

[From Times of the Americas, Mar. 21, 1990]

WHAT ABOUT CHILE?

(By Michael D. Barnes and Arnold H. Weiss)

With the exciting events taking place in Eastern Europe and Nicaragua these past few weeks, it has been easy for many in the United States to overlook the dramatic transition to democracy in Chile. The election and inauguration of President Patricio Aylwin, a centrist Christian Democrat, to replace the 16-year military rule of General Augusto Pinochet is one of the most promising developments in Latin America in recent years.

Nonetheless, the new government in Chile will require understanding and support in the international community to overcome both the inherent economic problems Chile faces and the last-minute Pinochet maneuvers that threaten to weaken Aylwin's ability to govern effectively.

Chile will need to move quickly on two fronts. Chile must restructure some of the country's outstanding debt to international financial institutions and private banks. At the same time, the government must address pressing social demands at home that have been left out of the "economic miracle" of the 1980s.

These challenges are made more difficult by the outrageous efforts of Pinochet to tie the hands of his successor by eleventh-hour initiatives that have received virtually no attention outside of Chile. Pinochet's actions include everything from selling off government-owned enterprise at bargain prices, to restrictive new personnel laws that will make it virtually impossible for new officials to appoint even their own secretaries and close assistants.

Pinochet has sold an air force base, popular radio stations, a hydroelectric plant, mining rights, and other valuable assets to close associates and supporters. All of the concessions took place without normal public bids in a process that assured only Pinochet cronies would be purchasers.

The army also strengthened its position against the new civilian government during the last days of Pinochet. Laws were enacted to protect the military from effective civilian supervision and to increase the army's share of receipts from revenues of Chile's copper exports.

These and other last-minute scandals put President Aylwin under inceased pressure as he seek a smooth return to Chile's tradition

of successful democracy. He will need some patience of the part of Chileans and assistance from the international community if he is to fulfill the hope of his people for better times.

Mr. Barnes is a former chairman of the Subcommittee on Western Hemisphere Affairs in the U.S. House of Representatives. Mr. Weiss is a former general counsel of the Inter-American Development Bank. Both now practice law in Washington.

DO WE SAVE THE GRAND CANYON, OR DO WE CONTINUE TO DESTROY IT?

HON. GEORGE MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. MILLER of California. Mr. Speaker, I am today introducing legislation to protect the resources of the Grand Canyon from further damage caused by the operation of Glen Canyon Dam.

Glen Canyon Dam impounds billions of gallons of Colorado River water, storing it for daily hydroelectric power generation and for use by farmers and cities in the desert Southwest.

Park Service employees and Colorado River rafting guides have known for years that the daily operation of the dam was wreaking havoc on the beaches and wildlife habitat at the bottom of the Grand Canyon. Now the word is starting to get out—we have a problem of crisis proportions at Glen Canyon Dam, and emergency action ineeded before it is too late for the Grand Canyon.

The problems at Grand Canyon are the direct result of the way the Secretary of the Interior operates Glen Canyon Dam. By dumping almost unimaginable volumes of water through the dam's turbines every day to generate peaking hydroelectric power, the operators of the dam are unnecessarily risking the resources of Grand Canyon National Park.

The widely fluctuating water releases are washing away the once pristine beaches along the canyon floor and causing other problems for endangered species and recreational users in Grand Canyon National Park.

The Department of the Interior has a dual and somewhat conflicting role. It is responsible for the operation of Glen Canyon Dam and the protection and management of Grand Canyon National Park. The Department's response to the damages in the Grand Canyon has been to order study after study, nearly 8 years worth.

To his credit, the Interior Secretary Lujan recognized that a series of never-ending studies was not going to solve the problems caused by power operations at the dam. Lujan's instincts were right—he ordered the preparation of an environmental impact statement [EIS] on the dam's operations. We can hope that a sensible long-term solution will result from that study.

But while that EIS drags on for at least the next 2 years, the damage to the Grand Canyon will continue. Already, we have racked up 8 months of unnecessary damages since Secretary Lujan first announced this plan to do an EIS. It is painfully clear that the Department lacks the courage to stop the damage while it agonizes over a complicated EIS process.

My legislation will correct this intolerable situation. My bill will direct the Secretary to operate the dam in a way that will stop the destruction of the Grand Canyon while the EIS is prepared.

Mr. Speaker, this bill presents the Congress with a very clear choice: Do we save the Grand Canyon, or do we continue to destroy it? I think the answer is very simple. We must take every action to protect this priceless resource. I hope my colleagues will agree.

IN HONOR OF JONES METROPOLITAN HIGH SCHOOL OF BUSINESS AND COMMERCE

HON. CARDISS COLLINS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mrs. COLLINS. Mr. Speaker, in June 1940, a unique high school was established to provide Chicago students with an alternative high school education, one that prepared them to enter the workforce. That school was Jones Metropolitan High School of Business and Commerce. The basic framework for such a school was in place at Jones, but it was not until Clarence B. Carey took over as director in 1940, that the innovative course of study was initiated and emphasis was put on on-the-job education.

Jones provides classes in the regular high school curriculum, but goes beyond that to stress the fundamentals of business, including professionalism and responsibility. Students receive instruction in appropriate attire for work, business decorum, and respect for the workplace.

Jones graduates have gone on to fill jobs in every avenue of business in Chicago: They are owners of both small and large companies and work in every facet of corporate endeavor. Many credit the training they got at Jones for their career success.

Many Jones graduates go on to 2- or 4-year colleges, but frequently in a different pattern than do students from more traditional high schools. Some Jones graduates delay going to college in order to amass the resources necessary to cover college expenses; others attend college with the financial assistance of their employer. Still others opt to remain in the workforce and progress upward through experience and on-the-job training.

At a time when the national unemployment rate among teenagers is 14.5 percent and 20.5 percent in Chicago, and the national unemployment rate for black youth is 26.7 percent and 43.3 percent in Chicago, there is certainly a need for the type of practical preparation offered at Jones. Quite often the door to employment is closed to youth because they have no experience nor marketable skills. Not so with Jones students. While they are taught the fundamentals of business in the classroom, the educational experience is enhanced by on-the-job learning: At Jones, all seniors are required to spend half of each day at work.

Finally, I would like to highlight another important difference of the Jones experience: civic awareness. At Jones, learning about our Government is not just taught, but a sense of civic duty is enforced. Each graduate leaves with a diploma and a voter registration card and is encouraged to be a responsible citizen.

For all Jones has meant to the city of Chicago and the thousands of students who have passed through its doors in the past 50 years, I salute the directors, principals, faculty, and staff for a job very well done. To Jones' graduates and current students, I wish you all continued and future success in the business world.

PROTECT SOCIAL SECURITY; FOSTER HONEST BUDGETING

HON. DONALD J. PEASE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. PEASE. Mr. Speaker, late last year, a colleague in the other body offered a modest proposal to roll back the most recent Social Security tax increase. This simple idea has trained a powerful spotlight on Social Security's impact on both the budget deficit and the national economy as a whole. The result has been that people today understand in a way that they never have before how the Social Security Program is financed and how that financing mechanism affects the Government's operating deficit.

The fact is that Social Security payroll tax receipts are being used to mask the size of the overall Federal budget deficit. The emergency repair work we undertook on the Social Security Program in 1983 has had an unintended by-product in the past few years. The surpluses in the Social Security trust funds—which were intended to help pre-fund Social Security's obligations to the baby boom generation—have provided cover for the failure by Congress and two administrations to make real progress toward deficit reduction. For example, the budget deficit for fiscal year 1990 is required by the Gramm-Rudman-Hollings deficit reduction law not to exceed $100 billion. However, if the Social Security surplus could not be counted toward that goal, the fiscal year 1990 budget deficit would exceed $160 billion.

Today I am introducing a bill which is intended to remedy this situation by making our budget presentation more honest. The approach is very simple. First, I propose that the Social Security trust funds be removed from the Gramm-Rudman-Hollings deficit calculation. Second, I propose making the Gramm-Rudman-Hollings deficit reduction law permanent. Finally, I propose a 2-year stretchout of the deficit reduction targets.

Under my bill, the target for fiscal year 1991 would be $141 billion, representing the current law's target of $64 billion plus CBO's estimate of the OASDI trust funds' surplus of $76 billion. For fiscal year 1992, the target would be $114 billion—the current law target of $28 billion plus CBO's projection of that year's OASDI surplus. The fiscal year 1993 target would be $65 billion, representing two-thirds

of the year's OASDI surplus. In fiscal year 1994, the deficit could not exceed one-third of the projected OASDI surplus, or $36 billion. By 1995, then, we would have a deficit of zero without taking Social Security into account.

These steps are long overdue. For the sake of the integrity of both the Social Security system and the budget process, I urge their approval.

OFFERING CONGRESSIONAL BLACK CAUCUS HOUSE CONCURRENT RESOLUTION FOR THE FISCAL YEAR 1991 QUALITY OF LIFE BUDGET

HON. RONALD V. DELLUMS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. DELLUMS. Mr. Speaker, it is with a deep sense of pride and respect for history that the Congressional Black Caucus today presents to this Congress and the Nation, a sweeping new vision of America's responsibility to her citizens and the world. It is particularly fitting that we introduce this legislation on the 22d anniversary of the assassination of Dr. Martin Luther King, Jr., because he died in an effort to create a new reality for our country and its commitment to the precepts upon which it was founded.

This year the Congressional Black Caucus has crafted a budget proposal that meets the moral test of leadership. Impacted are those most in need of help—the poor, the elderly, the young, the physically disadvantaged, and the jobless. The proponents of this budget believe that the ravages of the arms race and fiscal irresponsibility are not legacies of a great and just nation. The Congressional Black Caucus has shown that we can provide for our national security, increase spending for crucial social programs, reduce deficit levels, and generate requisite revenues without increasing taxes for the vast majority of our citizenry. Together with our colleagues, we have sought to capitalize on the dramatic changes occurring in our world. Changes in southern Africa, Central America, Eastern Europe, and around the globe represent a dramatic opportunity to reprogram dollars that would be spent on armaments, and to reinvest them in the human and physical resources of our Nation. The centerpiece of this budget is therefore an unyielding commitment of our most precious national asset—our children. It emphasizes that commitment through increased funding for health care, especially prenatal and pediatric; quality teaching and student assistance, from preschool through professional school; better housing and job training programs; and an unequivocal determination to end the terror of the drug epidemic that is killing and maiming our youth. A nation that condemns its children to hopelessness, is a nation that cannot begin to remain economically competitive or morally strong. This is the year to take decisive action in rejecting the casual rhetoric of cold war combatants and proceed to redefine the future of America. Toward this end we introduce the Congressional Black Caucus fiscal year 1991 budget.

NATIONAL HEALTH SERVICE CORPS REVITALIZATION

HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. WAXMAN. Mr. Speaker, there are about 12.5 million Americans living in areas without primary health care. The problem is not that these Americans are uninsured; many of them have public or private coverage. The problem is that there are simply no primary care doctors or other health professionals serving the communities in which they live. At the same time that over 1,900 rural and urban areas are underserved, there are many communities with a surplus of physicians. This is indefensible.

We have a program to address this problem: The National Health Service Corps. Established in 1970, the corps places physicians and other health professionals in health manpower shortage areas [HMSA's]. These practitioners may be volunteers, but for the most part they have an obligation to the corps as the result of receiving scholarship assistance, or as the result of receivng assistance in repaying loans they took out to finance their professional education.

Unfortunately, due to a bad decision we made in the early 1980's to phase out the scholarship program, the corps is no longer able to meet the needs of most underserved communities. To eliminate the shortages in all 1,935 HMSA's would require 4,147 primary care physicians. This year, the corps expects to place 1,751 physicians and other health professionals in HMSA's. That is down from 1,950 placements in 1989. There are currently 123 scholarship recipients available for placement. By 1993, this number will decline to 18.

The logic of these numbers is obvious. Unless we change course, we are never going to meet the need of underserved areas for 4,147 primary care physicians. Unless we change course, 12.5 million Americans in rural and urban underserved areas will never have access to primary health care. To change course, I am joining today with Mr. RICHARDSON, Mr. COOPER, Mr. SLATTERY, Mr. TAUKE, and 23 additional colleagues in introducing the National Health Service Corps Revitalization Act.

This bill would make several important changes. First, it would clarify that the mission of the corps is to make primary health services available to residents of underserved rural and urban areas. Second, it would revise and extend the authorization for the corps field program, providing such sums as necessary to eliminate health manpower shortages. Third, it would clarify the criteria and procedures which the Department of Health and Human Services [HHS] must use in designating the underserved areas with the highest priority for placement of corps physicians. Fourth, it would start up the scholarship program again, by requiring that at least 10 percent of the amounts appropriated each year for scholarships or loan repayments be applied to scholarships, and that at least an additional 5 percent of the total amounts appropriated each year be used to fund scholarships for certified nurse midwives, certified nurse practitioners, and physician assistants. Finally, the bill would authorize the Secretary of HSS to make grants to States to establish and operate offices of rural health.

How did we get ourselves into a situation where 12.5 million Americans are without primary care and the only program we have to respond is phasing down? The Congress got some bad policy advice from the Reagan administration, and, in a misguided quest for short-term budget savings, made the mistake of following that advice. In 1982, the administration asked that Congress discontinue funding for all new NHSC scholarships. Their rationale: "[t]here is evidence that physicians are locating in greater numbers in previously medically underserved areas, thus lessening the need for the NHSC in the outyears."

Well, here we are in the outyears, and it turns out that the need for the NHSC has increased. Physicians have not flocked to establish primary care practices in isolated, poor, rural areas, or in low-income inner-city neighborhoods. There can no longer be any doubt that market forces alone will not improve the distribution of primary care physicians. To meet the primary care needs of underserved communities in the 1990's, we will have to use the corps. In the short run, we will have to rely on the loan repayment program. However, we also need to start funding new scholarships, so that by the mid-1990's we will again have an adequate supply of primary care physicians and midlevel personnel coming out of the pipeline, available for placement.

To his credit, Secretary Sullivan has proposed, as part of his minority health initiative, to raise funding for the NHSC scholarship and loan repayment programs to $63.9 million in fiscal year 1991, up from $8.9 million this fiscal year. In order to attact minority and disadvantaged students in the health professions to the corps, the Secretary has proposed to vary the length of time that an individual, in exchange for a scholarship or loan repayment, is obligated to serve, so that individuals electing to serve in HMSA's that are easier to staff would serve longer than those placed in the hardest-to-fill HMSA's.

The corps is very important to minority and disadvantaged populations. It makes many physicians and other health professionals available to minority and disadvantaged communities. And, through its scholarship program, it makes educational opportunities available to minority and disadvantaged students. But the mission of the corps is not the training or recruitment of minority or disadvantaged health professionals. Its mission is to meet the primary health care needs of underserved rural and urban areas. We need to improve the unacceptably low health status of minorities in this country, and the corps can help. But the corps is not a minority health program.

I am now working with other members to develop a minority health initiative. It is my intention to secure enactment of both the NHSC revitalization amendments and minority health legislation this year.

A budget estimate has been requested from the Congressional Budget Office.

SUMMARY OF MAJOR PROVISIONS OF NATIONAL HEALTH SERVICE CORPS REVITALIZATION AMENDMENTS OF 1990

TITLE I. REVISIONS IN GENERAL PROGRAM FOR NATIONAL HEALTH SERVICES CORPS

Section 101. National Health Service Corps.—Clarifies that the purpose of the Corps is to provide primary health services in health manpower shortage areas. Primary health services is defined as services regarding general medicine, family medicine, internal medicine, pediatrics, obstetrics, gynecology, dentistry, or mental health, that are provided by physicians or other health professionals.

Section 102. Designation of Health Manpower Shortage Areas.—Requires the Secretary of HHS to publish in the Federal Register, within 60 days of enactment, a list of HMSAs. Any revisions to this list would have to be published within 30 days. The current criteria for the designation of HMSAs would remain unchanged.

Section 103. Assignment of Corps Personnel.—Deletes certain current law priorities for assignment of Corps members in medically underserved areas, and for assignment of physicians specializing in family medicine.

Section 104. Priorities in Assignment of Corps Personnel.—Clarifies and consolidates current law priorities regarding assignment of Corps personnel to HMSAs. Directs the Secretary to give priority to HMSAs with the greatest health manpower shortages. Requires the Secretary to publish in the Federal Register, within one year after enactment, criteria for determining HMSAs with the greatest health manpower shortages. Requires that the Secretary publish, no later than July 1 of each fiscal year, the list of HMSAs with the greatest manpower shortages and the sites in those HMSAs that the Secretary has designated for placement of Corps personnel for the following fiscal year.

Section 105. Effective Provision of Services.—Directs the Secretary to try to match Corps members to sites based on the characteristics of the individual (and spouse, if any), so as to increase the probability that the individual will remain in the HMSA to which he or she is assigned after completion of his service obligation. Requires the Secretary to offer each Corps member a choice of at least 3 HMSAs, subject to the requirement that the HMSAs with the greatest manpower shortages receive highest priority in the assignment of Corps personnel. Directs the Secretary to offer counseling on services in the Corps to individuals during their education and once they have begun providing services as Corps members. Directs the Secretary to provide assistance to Corps members in establishing arrangements through which they get temporary relief from their daily service obligations for continuing education or vacations.

Section 106. Authorization of Appropriations.—The NHSC field program is currently authorized at $65 million in FY 1990. Appropriations for FY 1990 are $41.8 million. The bill would authorize such sums as necessary for FY 1991 and subsequent fiscal years for the purpose of eliminating health manpower shortage areas.

TITLE II. SCHOLARSHIP AND LOAN REPAYMENT PROGRAMS OF NATIONAL HEALTH SERVICE CORPS

Section 201. Scholarship Program.—Clarifies that the purpose of the NHSC scholarship program is to assure an adequate supply of physicians, dentists, certified nurse midwives, certified nurse practitioners, and physicians assistants and, if needed by the Corps, an adequate supply of other health professionals.

Section 202. Loan Repayment Program.—Clarifies that the purpose of the NHSC loan repayment program is to assure an adequate supply of physicians, dentists, certified nurse midwives, certified nurse practitioners, and physicians assistants and, if needed by the Corps, an adequate supply of other health professionals. Directs the Secretary to give priority in making loan repayments to those individuals who have (and whose spouse, if any, have) characteristics that increase the probability that the individual will continue to serve in a HMSA after the completion of his or her service obligation. Allows the Secretary to pay up to $35,000 on behalf of an individual for loans for each year of obligated service (the current law ceiling is $25,000 for Indian Health Service sites, $20,000 for all other HMSA sites). Requires the Secretary to make payments to loan repayment recipients to offset any increased Federal tax liability resulting from the loan repayment.

Section 203. Report and Authorization of Appropriations.—Clarifies that the current law authorization of such sums as necessary for each fiscal year is intended to authorization the amounts necessary to fund enough scholarships and loan repayments to eliminate all health manpower shortage areas. Requires the Secretary to obligate, of the amounts appropriated for both scholarships and loan repayments, at least 20 percent in FY 1991, 15 percent in FY 1992, and 10 percent in FY 1993 and subsequent fiscal years exclusively for new scholarships. Further requires the Secretary to obligate an additional 5 percent of the total amounts appropriated for both scholarships and loan repayments (over and above the 20 or 15 or 10 percent set-aside) for new scholarships to nurse practitioners, nurse midwives, or physician assistants.

TITLE III. STATE OFFICES OF RURAL HEALTH

Section 301. Establishment of Program of Grants to States.—Authorizes the Secretary, acting through the Office of Rural Health Policy, to make grants to States for the operation of existing State offices of rural health or the establishment of new offices. The grants could equal up to 75 percent of the costs of the offices in the first year, 50 percent in the second year, and 25 percent in the third year; States would have to match these expenditures with non-Federal funds. Appropriations would be authorized at $3 million in FY 1991, $4 million in FY 1992, and $3 million in FY 1993. The program would sunset after appropriations totalled $10 million.

State offices receiving funds under this authority would be required to carry out certain activities: (1) operating a clearinghouse for information on rural health, (2) coordinating activities in the State relating to rural health care, and (3) providing technical assistance to public and private nonprofit entities regarding participation in Federal and State programs regarding rural health. Grant funds could also be used to pay the costs of any activity relating to recruitment and retention of health professionals in rural areas.

The current authority for State loan repayment programs, which expires in FY 1990, would be discontinued.

TITLE IV. GENERAL PROVISIONS

Section 401. Effective Dates.—The amendments would take effect on the later of October 1, 1990, or the date of enactment.

REOPENING THE OHMSETT

HON. JIM COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. COURTER. Mr. Speaker, recent oilspill disasters throughout the United States underscore the pressing need to undertake a concerted effort to avoid future environmental tragedies by improving oilspill response technology. I commend the Committee on Science, Space, and Technology for its efforts to effectively address this concern in title VII of the landmark Oil Pollution Act of 1989.

However, I would like to discuss today an unfortunate situation regarding the future of oilspill technology which we have an opportunity and an obligation to reverse.

The Oil and Hazardous Materials Simulated Environmental Test Tank [OHMSETT] Research Center, located at Earle Naval Weapons Station in New Jersey, is a 2.5 million gallon state-of-the-art wave tank designed to research and improve oilspill containment and cleanup strategies. The only tank of its size, OHMSETT simulates open water conditions for oilspill research and has been used to test prototypes of booms, small skimmers, and other oil containment and cleanup equipment. Built in the early 1970's, OHMSETT was operated by the Environmental Protection Agency until a lack of financial resources forced the test tank to be formally ceded to the Navy last March.

OHMSETT's importance has been recognized by the Committee on Science, Space, and Technology in its report accompanying H.R. 1465. According to the report:

Federal oilspill research peaked in the late 1970's and declined significantly thereafter, with almost no spending in the last several years. Most of the technology presently used was developed in the 1970's. Indeed, the only interagency research program, which used EPA's OHMSETT, ended in the mid-1980's and the facility closed last year.

The committee report also noted that:

A number of witnesses indicated the utility of controlled field-testing of cleanup technologies to verify the performance of the technologies in real-world conditions, but the use of controlled spills in the U.S. for research purposes has virtually stopped since the shutdown of the EPA OHMSETT tank testing facility last year.

The need to advance our response capability technology was further documented in a recently released General Accounting Office report. The report found that responses to the *Presidente Rivera* and *Exxon Valdez* spills indicated a need to improve equipment capabilities for containing oil and removing it from the water. According to the report, oil was initially recovered by physically picking up the clumps, either by hand or by fishing net, and placing them in containers. Later, according to Coast Guard officials, clamshell dredges were more effective in picking up the oil. Resorting and relying upon this kind of technology is both tragic and irresponsible.

Fortunately, the Department of the Interior has recognized the inadequacy of our technology. Acknowledging the valuable contribution

to be made by the unique OHMSETT facility, the Department of the Interior has reprogrammed funds from its budget to refurbish the test tank, and is presently working with the Department of Defense to gain access to the facility. In fact, testimony given before a Senate subcommittee by a Department of Interior representative indicated that "probably 95 percent of the performance data we have for all offshore and in-shore—and probably 100 percent for the near-shore equipment—have come from tests at the OHMSETT facility."

In a letter to Defense Secretary Cheney, Interior Secretary Lujan explained that the Minerals Management Service [MMS] greatly expanded its oilspill response research to attain significant technological goals within a 3-year period. In his letter, Secretary Lujan stated:

The attainment of several of these goals is dependent upon testing at OHMSETT. The MMS, together with the Department of the Environment, Canada, has reviewed all other test facilities on the North American continent where this research could be conducted. There is no comparable facility in North America, nor are the time and funds available to convert another facility.

My efforts over the past several months to reopen the mothballed OHMSETT recently culminated in correspondence from Secretary Cheney describing an agreement reached between MMS and the Navy to draft a memorandum of agreement allowing MMS to operate the OHMSETT facility for a 5-year period. However, while there is widespread support for reactivating the OHMSETT, and the commitment made by the Departments of Defense and Interior to advance our cleanup technology is both commendable and encouraging, it is important to recognize that reactivating the OHMSETT is irrelevant if we fail to provide for its continued long-term operation.

I would like to encourage the administration to continue to support the reopening of the OHMSETT. In addition, we in Congress must work to ensure its future operation and prevent such a valuable research facility from being shut down at a time when its contribution to protecting our fragile coastlines from oilspill disasters is so essential. Therefore, I would like to suggest to the conferees to H.R. 1465 that language be included to provide for the institutionalization of the OHMSETT so that we can more effectively respond to oilspill emergencies.

Mr. Speaker, I would like to submit for the RECORD copies of correspondence from the Departments of Interior and Defense, the Coast Guard, and the Environmental Protection Agency expressing their support for the reopening of the OHMSETT.

THE SECRETARY OF DEFENSE,
Washington, DC, March 2, 1990.

Hon. JAMES A. COURTER,
House of Representatives, Washington, DC.

DEAR JIM: Thank you for your recent inquiry concerning the Navy's negotiations with the Department of the Interior over use of the Oil and Hazardous Materials Simulated Environmental Test Tank (OHMSETT) at Naval Weapons Station (NWS) Earle. I appreciate the opportunity to update you on the Navy's progress in this important matter.

As you may know, Navy representatives met with negotiators from the Department of the Interior's Minerals Management Service (MMS) on 1 February to discuss the future of the OHMSETT facility. Both parties agreed that the unique environmental protection research available only at OHMSETT should continue.

At the meeting, the Navy agreed to draft a Memorandum of Agreement (MOA) allowing MMS to operate the OHMSETT facility for a five year period. The Navy and MMS are reviewing the MOA now, and they hope to finalize the agreement in early March. The MMS is also researching the requirements of the National Environmental Policy Act of 1969 and applicable sections of the United States Code. They will obtain all required permits and will insure compliance with the National Environmental Policy Act before the facility resumes operations.

In closing, let me assure you that the Navy is committed to supporting the Department of the Interior's critical oil spill research at OHMSETT, and they stand ready to assist in any way they can. If I can be of further help, please do not hesitate to contact me.

Sincerely,

DICK CHENEY.

THE SECRETARY OF THE INTERIOR,
Washington, DC, October 19, 1989.

Hon. RICHARD CHENEY,
Secretary of Defense, Washington, DC.

DEAR MR. SECRETARY: I am writing on a matter of urgency to this Department regarding a critical need for continued use of the test facility known as the Oil and Hazardous Materials Simulated Environmental Test Tank (OHMSETT) located on the Naval Weapons Station Earle, Leonardo, New Jersey. Our interest in the facility pertains to the responsibilities of the Minerals Management Service (MMS) of the Department of the Interior for ensuring safe, pollution-free oil and gas operations on offshore Federal submerged lands.

Subsequent to the recent tanker accident off Valdez, Alaska, MMS greatly expanded its oil spill response research to attain significant technological goals within a 3-year period. The attainment of several of these goals is dependent upon testing at OHMSETT. The MMS, together with the Department of the Environment, Canada, has reviewed all other test facilities on the North American continent where this research could be conducted. There is no comparable facility in North America, nor are the time and funds available to convert another facility. The loss of the facility would require the MMS to abandon its nearly completed efforts to develop standard test procedures for offshore oil spill containment booms and skimmers. This project is a precursor to the development of equipment performance standards. The loss of the facility will require development of new procedures which will require millions of dollars and several years. However, we are prepared to reactivate OHMSETT and to conduct continuing testing.

The OHMSETT facility is unique, and I consider it essential for implementing the Administration's initiative of increased environmental protection.

We have entered into discussion with the Director of Installations and Facilities of the Office of the Secretary of the Navy but have not been able to resolve the matter. I am therefore requesting your intercession so that we may proceed without further delay in our pursuit of improved technologies for responding to offshore oil spills. I would be most pleased to have your response at your earliest convenience.

Sincerely,

MANUEL LUJAN, Jr.

U.S. DEPARTMENT OF TRANSPORTATION,
U.S. COAST GUARD,
Washington, DC, July 21, 1989.

Hon. JIM COURTER,
House of Representatives, Washington, DC.

DEAR MR. COURTER: Thank you for your letter of June 30, 1989, co-signed by Congresswoman Roukema, concerning the reactivation of the Oil and Hazardous Materials Simulated Environmental Test Tank (OHMSETT) at Leonardo, New Jersey.

The Coast Guard agrees that the OHMSETT would be a valuable addition to the research and development of oil spill prevention programs, as well as aiding in the formation of cleanup contingency plans in the case of environmental disasters.

We support the reactivation of the OHMSETT program, although funding from the Coast Guard is currently not available. We would like to assure you that the development and exploration of new technologies in disaster reaction and prevention plans is a high priority of the Coast Guard.

An identical letter has been sent to Congresswoman Roukema. Your time and attention to this matter is appreciated.

Sincerely,

CLYDE T. LUSK, Jr.,
VICE ADMIRAL, U.S. COAST GUARD,
Acting Commandant.

U.S. ENVIRONMENTAL PROTECTION AGENCY,
Washington, DC, March 5, 1990.

Hon. JIM COURTER,
U.S. House of Representatives, Washington, DC.

DEAR MR. COURTER: Thank you for your letter of February 21, 1990, concerning the reactivation of the Oil and Hazardous Materials Simulated Environmental Test Tank (OHMSETT) which is located on U.S. Navy property at the Naval Weapons Station Earle in Leonardo, New Jersey.

Beginning in the early 1970s, EPA conducted an active oil spill research program that included testing oil spill response technology at OHMSETT. During the 1980s, competing priorities from other hazardous waste and underground storage tank programs resulted in a decline in the oil spill research program. The program was ended in 1987 and EPA returned the OHMSETT facility to the U.S. Navy in fiscal year 1989.

The Exxon Valdez oil spill has focused attention on the need to improve oil spill response technology and I believe that the public and private sectors must now jointly reevaluate research priorities. In January of this year, the Minerals Management Service (MMS) of the Department of Interior and EPA met with the Navy to begin negotiations to reactivate OHMSETT. The MMS plans to enter into an Interagency Agreement with the Navy to operate the facility to conduct tests of oil spill response technologies similar to former EPA activities at the facility. The MMS plans to refurbish the facility this fiscal year and to begin full reactivation next year. The facility will be operated on the MMS oil spill research and development budget with additional support from the American Petroleum Institute, the U.S. Coast Guard, and Environment Canada. EPA will, of course, keep abreast of the activities and projects at the facility,

but does not intend to play a significant role in its funding for reactivation.

If you have additional questions regarding OHMSETT activities, you may wish to contact Mr. Edward Tennyson, the Program Manager for Oil Spill Research at: Minerals Management Service, 381 Elden Street, Herndon, Virginia 22070 (703) 787-1559. Thank you for your interest in this matter. I hope you find this information useful.

Sincerely yours,

ERICH W. BRETTHAUER,
Assistant Administrator for Research and Development.

U.S. ENVIRONMENTAL PROTECTION AGENCY,
Washington, DC, March 15, 1990.

Hon. JIM COURTER,
U.S. House of Representatives, Washington, DC.

DEAR MR. COURTER: I am writing in response to your recent inquiry regarding the Oil and Hazardous Materials Simulations and Evaluation Test Tank (OHMSETT) Research Center at Leonardo, New Jersey.

To clarify and reiterate my recent correspondence to you on this issue, the Environmental Protection Agency strongly supports reopening the facility provided that the agency is not required to fund restoration and maintenance costs.

Sincerely yours,

ERICH W. BRETTHAUER,
Assistant Administrator for Research and Development.

PIRO IMPLEMENTATION, INC.
Washington, DC, October 20, 1989.

Hon. CARL LEVIN,
U.S. Senate, Washington, DC.

DEAR SENATOR LEVIN: Your letter of October 17, 1989 asked my views on the value of reactivating the Oil and Hazardous Materials Simulated Environmental Test Tank (OHMSETT) for oil spill research. In my opinion OHMSETT is extremely valuable national resource. If dismantled it would represent a substantial impediment to effective oil spill research, development, test and evaluation.

OHMSETT is unique. I know of no other research facility in our nation which approaches its capabilities. It has been used for a wide range of hardware tests, systems analyses, combustion studies, etc. At a time when industry and federal agencies are making substantial new commitments to oil spill R & D it would seem inappropriate to impede these efforts by having a singular research tool eliminated.

Sincerely,

JOHN COSTELLO,
President.

THE REAGAN OF THE CARRIBEAN

HON. BOB WHITTAKER

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. WHITTAKER. Mr. Speaker, the Dominican Republic has had—like many Latin American countries—a history of military-led governments as well as popularly elected governments. What is so ironic, indeed incredible, about the current Dominican Presidential election campaign is the self-proclaimed Marxist candidate claims to have United States support. Candidate Juan Bosch, who was overthrown by a civic military movement 7 months after reaching power in 1963, is again aiming for the Dominican Presidency. The irony? Bosch claims to be an avowed Marxist. He even said so on national television last fall.

The September 5, 1989, edition of the Dominican newspaper ULtima Hora contained a summary of Bosch's television appearance the day before. Declaring that "I am a Marxist, but not a Leninist," Bosch launched into a diatribe against the United States and blamed it for the strength and influence of narcotraffic in the Dominican Republic. He also stated that he looked at everything in the world through a Marxist glass: "I was and am a Marxist in everything that refers to the study of society. The person who does not study society from the point of view of Karl Marx can not understand society." Strong words indeed. But strange in a world that has proven the folly of Marxism.

But last October, Bosch and members of his Dominican Liberation Party [PLD] met with U.S. Ambassador Paul Taylor and two members of the State Department, one of whom was Joseph Becelia, Under Secretary of State for Interamerican Affairs. Unfortunately, these kinds of meetings and others, as well as PLD rhetoric, lend credibility and substance to Bosch's campaign. Tacit support of Bosch also hinders the Presidential campaign of another pro-U.S. candidate, Jacobo Majluta, a Vice President and former President of the republic.

If there is a Presidential candidate like Ronald Reagan anywhere in the world, it would be Majluta. Mirroring Reagan's 1981 economic policy reforms in many ways, Majluta's campaign strategy calls for an across-the-board tax cut, a larger free market and reduced bureaucratic interference. Majluta also supports increased United States capital investments, monetary reform, and closer United States/Dominican relations.

After Bosch met with the United States ambassador to the Dominican Republic and members of the visiting State Department delegation in October, the PLD press secretary, Dr. Leonel Fernandez, said both sides discussed the "need to strengthen ties between the United States and the Dominican Republic." Some question whether or not Bosch would ever want to increase ties to the United States.

In a recent Gallup Poll, Bosch led with 34 percent. Already, it seems, even indirect support of Bosch by the United States could cause voters to support his campaign.

On one hand you have Majluta, a politican who shares much of the policies of the Reagan-Bush administrations, and on the other you have Bosch, a self-proclaimed Marxist. There is an important choice here. After all, the Dominican Republic is a key United States ally in the Caribbean Basin. It is strategically located between Communist Cuba and Puerto Rico, and it shares the Island of Hispaniola with Haiti. The Dominican Republic lies adjacent to critical shipping lanes and air routes.

It is for this very reason that Fidel Castro—always looking for more Caribbean nations to undermine—is anxiously awaiting for a fellow Marxist to gain power. With the downfall of Ortega and the ouster of General Noriega, Castro is becoming increasingly isolated, both economically and politically. He is therefore understandably interested in Bosch. And Bosch, it seems, is also interested in going outside of the Dominican Republic for support. Indeed, it was recently announced in Dominican newspapers that Bosch had established contacts in Panama and Venezuela. His party sent representatives to Panama to pick up 52 trucks and vans for his campaign drive. It appears even former Panamanian strongman General Noriega was a big supporter of Bosch, and there were allegedly contacts with Castro and Ortega. Even if there were not, it is logical that Castro would welcome another Marxist in the Caribbean.

For now, however, it appears the geopolitical interests of the United States could be lost if we continue to act as if Bosch has our support. The United States and the State Department should be more encouraging of Jacabo Majluta, a man who shares our principles for a vibrant democracy, a strong economy, a stable military, and good government.

100TH ANNIVERSARY OF MILLARD E. TYDINGS

HON. C. THOMAS McMILLEN

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. MCMILLEN of Maryland. Mr. Speaker, I rise today to recognize the 100th anniversary of Millard E. Tydings birth, April 6, 1990. Millard Tydings served Maryland and America with great honor and distinction for the past 100 years.

In 1916, Millard Tydings was elected to the Maryland House of Delegates. However, when the United States entered World War I, he joined the Army as an officer in the American Expedition Force where he saw action in the Haute Alsace and the Meuse-Argonne offensive. He was promoted to the rank of lieutenant colonel in the 29th Division, Machine Gun Units and was awarded the Distinguished Service Medal, the Distinguished Service Cross, and three citations.

Upon his return to the United States, he devoted himself to serving the public for the next 30 years. From 1920 to 1922, he served as Speaker of the Maryland House of Delegates and was later elected to the Maryland Senate. In 1923, he was elected to the U.S. House of Representatives and in 1927 he was sent to the U.S. Senate. During his four terms in the Senate, Millard Tydings distinguished himself as a leader of a coalition of Southern Democrats.

He championed a wide range of causes from Phillipine independence to limiting government deficits. However, perhaps, the bravest moment of his career came when he was chairman of the Special Senate Foreign Relations Committee, where he was called upon to examine Senator McCarthy's accusations of Communist infiltration of the State and Defense Departments. In a scathing denunciation, he rejected McCarthy's charges as "complete hogwash." For his courageous stand, Millard Tydings paid the ultimate political price, losing his fifth election in the wave

of anti-Communist hysteria that was sweeping the Nation.

Mr. Speaker and fellow colleagues, let us rise and recognize Millard Tydings' dedication to public service and justice on the 100th anniversary of his birth.

TRUTH IN REPORTS FROM GOVERNMENT AGENCIES

HON. TONY P. HALL

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. HALL of Ohio. Mr. Speaker, today I am introducing the Food Program Evaluation Integrity Protection Act of 1990. This legislation will assure accuracy in the reporting of food program studies and evaluations conducted by the Department of Agriculture under mandate by the U.S. Congress.

I regret the need for this legislation. Our relationship with Federal departments and agencies should be founded on trust and cooperation. We in Congress should be able to unequivocally rely on the accuracy of research conducted by these entities. However, it has come to my attention, as chairman of the House Select Committee on Hunger, this is not the case. I have learned that ethics in the Department of Agriculture's handling of various food assistance program evaluations has taken a back seat to the Department's goal of assuring that this research reflect what the Department wants reported rather than what the data actually reveals.

I would like to share with my colleagues the series of events that prompts this assertion on my part. In 1978, Congress directed the Department of Agriculture to conduct an evaluation of the WIC Program. Prior to releasing the final report to Congress in 1986, the Department deleted the executive and chapter summaries submitted by the principal investigator and substituted its own compendium of results. The Select Committee on Hunger was informed by the principal investigator that the Department's compendium severely understated the positive impact of participation in WIC. In 1987, Representatives Mickey Leland, the late chairman of the Hunger Committee; GUS HAWKINS, chairman of the Education and Labor Committee; JIM JEFFORDS, then ranking minority member of the Education and Labor Committee; and Senator TOM HARKIN commissioned a General Accounting Office [GAO] investigation of possible improprieties in the handling of this document.

In December 1989, we received a final report from GAO and in January of this year, the Select Committee on Hunger conducted a hearing to bring to light, once and for all, the real findings of the Department of Agriculture's national WIC evaluation. GAO's investigation found that the Department's compendium of results bore little resemblance to the executive and chapter summaries prepared by the researchers; contained questionable data; and, in certain instances, flatly contradicted the researchers' findings.

Consequently, for almost 4 years we were misled into believing that this comprehensive federally-mandated study had concluded that the positive impact of WIC participation was questionable at best. During this time, the Congress was forced to determine policy and funding levels governing the operation of the WIC Program on information that was grossly inaccurate.

Since the committee's hearing in January, we have learned from other USDA contractors that the Department's questionable handling of the national WIC evaluation was not an isolated incident. In fact, research teams for other studies of food programs that affect low-income children and families have fallen victim to the Department's manipulations in the release of final report documents.

We cannot allow this type of abuse to continue. We, as policymakers, are heavily reliant upon this research to develop and implement national policy. We must have assurances that information transmitted by the Department of Agriculture is factual and accurate.

My bill would require that the Secretary of Agriculture notify contracting researchers of all changes made by the Department in the studies and evaluations the contractors have submitted. The researchers would then be permitted to comment on the Department's revisions. These comments would subsequently be incorporated in the final reports submitted to Congress. Finally, my bill would protect the researchers and their opportunities for future contract awards by preventing the Department from discriminating against them for offering such comments.

I am confident that the Food Program Evaluation Integrity Protection Act of 1990 will aid in restoring faith and credibility in the Department of Agriculture's evaluations and reporting procedures.

TRIBUTE TO MARTIN WEISS AND LORI PATENT

HON. GUS YATRON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. YATRON. Mr. Speaker, today I rise to congratulate two young people from the State of Pennsylvania. On March 30, 1990, Martin S. Weiss, of Reading, PA, and Lori J. Patent, of Philadelphia, PA, were engaged to be married. The couple's engagement party was held at Nick's Chat-A-While Inn in Reading.

Mr. Speaker, I am sure that my colleagues in the House of Representatives join me in wishing Martin and Lori all the best for their future years. I hope that their engagement is the beginning of a rich and happy life together.

TRIBUTE TO GARDNER NEWMAN

HON. RICHARD RAY

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. RAY. Mr. Speaker, I rise today to pay special tribute to Mayor Gardner Newman of La Grange, GA. Gardner Newman retired from the position of La Grange's mayor on the first of this year. He had served 26 years in this post.

Mayor Newman, the oldest son of James and Flossie Newman, was born in 1920 in La Grange. He graduated from La Grange High School and went to Georgia Tech where he received 3 years of engineering education. Mayor Newman married the former Frankie Fling whom he had dated since they were 14 years old. Mayor Newman spent World War II in the Navy.

After the war, Mayor Newman returned to the family business, the Newman Construction Co. He became president of the company upon his father's death in 1968. He later became chairman of the board and turned the presidency over to his younger brother John.

Mayor Newman served on the La Grange City Council for 12 years, from 1951 to 1963. He then served 26 years as mayor from 1963 to this year. For the past 38 years, Gardner Newman has been an extremely active and vital part of La Grange city government.

Since Gardner Newman's inauguration onto the city council, La Grange has steadily risen in size and stature. It is currently a vibrant municipality that is luring new residents and businesses from across the Nation. Mayor Newman has run the town with fiscal responsibility and has maintained a balanced budget, while offering a wide range of community services. It is practices such as these that help to make a great city and a great community.

Mayor Newman has applied these same principles in becoming a very successful businessman. The Newman Construction Co., has built buildings in the La Grange area and at Callaway Gardens that are excellent representations of American hard work and construction.

Last, Mayor Newman is appreciated as a fine family man, having helped to raise 6 charming children and 14 beautiful grandchildren. Additionally, I am sure that Mayor Newman will admit that much of the credit for his success goes to his lovely wife "Frankie."

I would like to thank Mayor Newman for his hard work in making La Grange a great place to live. While the city will miss his leadership, I am sure that all of its citizens join me in wishing him a rewarding and well-deserved retirement from community service.

THE 25TH ANNIVERSARY OF THE HEAD START PROGRAM

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. BROWN of California. Mr. Speaker, tomorrow, April 5, 1990, Head Start in San Bernardino County will join the rest of the Nation in celebrating the 25th anniversary of Head Start Programs. In my congressional district, the Preschool Services Department of San Bernardino County serves the communities of Ontario, Fontana, Bloomington, Colton, San Bernardino, and Rialto. The national Head Start Program was officially launched by President Lyndon B. Johnson on May 18, 1965, to provide preschool training to prepare young-

sters to enter first grade in the fall. I have always been a strong supporter of Head Start, and I was pleased to vote in favor of creating the program when it was debated on the House floor in July 1965.

The most innovative feature of the Head Start Program is that instead of recruiting those children from poverty who were the most likely to succeed, Head Start reached out to the 55 poorest counties in the Nation, to children who would usually be least likely to be recruited. There was a recognition that disadvantaged children needed stimulation and support in educational, social, and intellectual areas. Also of importance was health care and the program's emphasis on the involvement of parents with the child in local programs.

The overall goal of the Head Start Program, nationally and in San Bernardino County, is to bring about a degree of social competence in children of low-income families; that is, to increase the child's everyday effectiveness in dealing with both present environment and later responsibilities in school and life. Social competence takes into account the interrelatedness of cognitive and intellectual development, physical and mental health, nutritional needs, and other factors that enable a developmental approach to helping children achieve social competence.

Since its inception in 1965, Head Start has provided educational, social, medical, dental, nutritional, and mental health services to more than 11 million children and their families across the Nation. Since 1965, Head Start has become a full-year program servicing more than 450,970 children each year in urban and rural areas of all 50 States, the District of Columbia, and the U.S. Territories, including many Indian and migrant children. In San Bernardino County alone, 45,000 children and their families have been served in the past 25 years.

Since 1965, in San Bernardino County, the Preschool Services Department has served children and families in the county, receiving funds from the Federal Government and the State Department of Education. The program delivers child development services in five areas: education, parent involvement, social services, handicapped, and health. In San Bernardino County, Head Start currently serves approximately 1 out of 5 of the eligible low-income preschool children. At least 98 percent of the children in Head Start are from families who have incomes at or below the poverty level or who are receiving AFDC payments. Approximately 2,100 children are served each year; 10 percent of Head Start enrollment consists of handicapped children. Head Start Programs also use the USDA Child Care Food Program, which reimburses Head Start for its costs in providing food and food services. All Head Start Programs in San Bernardino County participate in this program.

In its 25 years, Head Start has become an important landmark in the social, educational, and health policy areas. Head Start is part of the social fabric of our country, and the program is still growing, still producing Head Start success stories. I ask my colleagues to join me in saluting the 25 years of accomplishments of Head Start Programs in San Bernardino County and nationwide.

THE NATIONAL HEALTH SERVICE CORPS REVITALIZATION ACT OF 1990

HON. BILL RICHARDSON

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. RICHARDSON. Mr. Speaker, I am pleased to introduce the National Health Service Corps Revitalization Act of 1990 reauthorizing the National Health Service Corps with my colleagues, Representatives JIM COOPER, JIM SLATTERY, HENRY WAXMAN, TOM TAUKE, and 23 others.

The National Health Service Corps [NHSC] is the Federal Government's primary means of recruiting physician's to rural and inner-city health areas. These areas have historically suffered from health manpower shortages. The corps was first established in 1970 with a mandate to improve and maintain the health status of medically underserved populations * * * by addressing the geographical maldistribution of health manpower resources.

Unfortunately, while the number of medically underserved areas has increased from 1,432 to 1,955 since 1981, the number of physicians in the corps has declined by 14 percent. More critically, we find that rural areas like my own State of New Mexico, are suffering disproportionately from the physician shortages. Over 1,300 rural areas are designated shortage areas. To meet the demand for physicians just in designated shortage areas, we would need 4,224 physicians.

The NHSC has been a successful and model program for recruiting physician's and other health care personnel into rural and inner-city medically underserved areas. Needless to say, the corps was more successful in the past than it is now in meeting these needs. This is due in part to a phase-out of the scholarship program requested by the Reagan administration.

As a result, the corps has declined from a peak field strength of 3,127 NHSC providers in 1986, to the 123 scholarship recipients available for placement this year. If the program continues without change, only 18 scholarships will be meted out in 1993. It has been estimated that communities served by the corps are losing 600 providers a year with no replacements.

Sadly, the corps is no longer even minimally meeting its mandate to improve and maintain the health status of medically underserved populations. Given the crisis in rural health care, this cannot and will not continue.

Today, people living in rural areas continue to be in poorer health—12 percent versus 9.4 percent, travel farther for health care, report chronic or serious illness more frequently—1.78 chronic conditions per person per year versus 1.55—are more likely to die from injury, and are older than their urban counterparts. Moreover, rural residents are more than twice as likely as the Nation as a whole to face shortages of primary care physicians.

For these and other reasons, I am pleased to be introducing legislation which renews the National Health Service Corps' commitment to providing primary health care to medically underserved areas. The legislation follows up on the recommendations contained in the Office of Rural Health Policy White Paper, as well as the advice and recommendations of the many organizations comprising the National Health Service Corps Coalition.

Specifically, our legislation continues the current loan repayment program and rejuvenates the scholarship program by insuring that a minimum of 10 percent of appropriated funds are used for scholarships. In this way, we intend to meet both short-term needs—the loan repayment program targets students in their third year of medical school and long-term needs by replenishing the pipeline of providers.

The legislation also requires that a minimum of 5 percent of appropriated funds be used for scholarships for midlevel practitioners such as nurse practitioners, nurse midwives, and physician assistants. Better utilization of midlevel practitioners can increase the productivity of primary care physicians and save money in the long run. One study found that nurse practitioners serving in outpatient medical clinics can reduce hospital stays for their patients by up to 50 percent.

In an effort to retain NHSC providers and help get them into the neediest areas, among other things, the legislation increases the maximum loan payment from $20,000 to $35,000 per year, and directs the corps to give priority to those individuals with characteristics that increase the probability that they will remain in the underserved area when their obligation is completed. To this end, the legislation also requires the corps to provide each NHSC provider with a choice of a least three health manpower shortage areas [HMSA's] subject to a requirement that the most underserved areas receive the highest priority. The corps would also be required to provide counseling after placement, and help corps member's establish professional affiliations with universities and health education centers.

Finally, the legislation provides $10 million for a new grant program to help States operate new and existing State offices of rural health. Under the legislation State offices of rural health would be required to serve as clearinghouses on rural health information, and provide technical assistance. States could also use these funds to recruit and retain health care professionals in rural areas.

SALUTE TO ARTHUR J. REMILLARD, JR. AND COMMERCE INSURANCE CO.

HON. RICHARD E. NEAL

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. NEAL of Massachusetts. Mr. Speaker, it is my honor to pay tribute today to Arthur J. Remillard, Jr., and the Commerce Insurance Co. of Webster, MA. This man and this company have contributed substantially to Webster, to the surrounding area, and to Massachusetts. His community spirit has been recognized in Webster, and Arthur J. Remillard, Jr. Way will now be a named street in the town.

From modest beginnings, Mr. Remillard has demonstrated an unparalleled determination and drive in making Commerce Insurance Co. one of the leading insurance agencies in Massachusetts. In May 1972, approval of operating authority was granted to Commerce Insurance. At that time, the total operating staff was six employees. Headquarters was a back office in a conference room of the Clark-Prout Insurance Agency. In 1973 the company's net written premiums were less than $1 million. In just 10 short years, the company could boast a figure of $37 million in net written premiums and a staff size of over 100. This growth forced a move to a bigger location, so the company moved to its present location on Main Street in Webster. Currently, the company employs over 950 people, serves over 400,000 policyholders, and is the second largest auto insurer in the State. All this from a start with six people in a conference room in 1972.

Mr. Speaker, I salute Mr. Remillard and commend him for his dedication to Commerce Insurance Co., and to those who contribute to Commerce Insurance Agency; the stockholders, the directors, the employees, and the associated agencies. I am confident that Arthur J. Remillard, Jr. and Commerce Insurance Co. will enjoy continued success as it enters a third decade of service.

TYLER ELEMENTARY SCHOOL'S 30TH ANNIVERSARY

HON. CARL D. PURSELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. PURSELL. Mr. Speaker, it is with pride that I bring to your attention today the 30th anniversary of Tyler Elementary School in Livonia, MI.

Tyler Elementary School—where good things are happening—opened its doors in 1959 for 288 students and 13 staff members. With a growing student population of nearly 600, a new wing was added to the school in 1961. Just 3 years later, as the community's growth and prosperity continued, a second addition provided 8 new classrooms and a multipurpose room—accommodating 702 students and 30 staff members.

Population shifts which brought a high enrollment of 1,000 students in 1965, dwindled that enrollment to 282 in 1980. Strong community support discouraged the board of education from closing the school for economic reasons, and it soon housed the school district's special education programs. During the mid-1980's, demographics of the attendance area again began to change, and in 1988 the special education programs were moved to create more room for the growing population.

On the 30th anniversary of this elementary school it hosts 485 students and a staff of 34. By 1995, Tyler School is expected to be the largest elementary school in the Livonia Public Schools—for a second time.

Tyler Elementary School is proud of its outstanding service to the community and students, providing a wide range of social and educational activities, and I commend them and send best wishes for this memorable occasion.

WELCOMING FREE ENTERPRISE WINNERS TO WASHINGTON

HON. RICHARD H. BAKER

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. BAKER. Mr. Speaker, I would like to take this opportunity to welcome two Free Enterprise Contest winners, Brandy Hayden and Jennifer Plauche', to Washington, DC. Brandy and Jennifer are high school students from Hammond, LA, and they are interning in my office during the week of April 8 to 13.

The Free Enterprise Observance Committee involves students and teachers in activities designed to stimulate economic enthusiasm. Brandy and Jennifer won a district wide contest last year in which the students researched and learned about business opportunities. During their visit, the winners will see the magnificent sites in Washington including the White House, Washington, Lincoln, and Jefferson Monuments. Also the young ladies will assist my staff in day to day office duties and legislative issues.

I am proud of these students who have the foresight to realize that thinking about today in tomorrow's terms is a necessity. In order to keep up with our ever-changing national and international markets, it is imperative for the youth of our country to stay abreast and challenge the concepts that drive business.

I congratulate both of you, and I hope your stay is memorable.

ACE CELEBRATES 40 YEARS

HON. ANTHONY C. BEILENSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. BEILENSON. Mr. Speaker, the American Cinema Editors, an honorary society of motion picture editors, celebrated its 40th anniversary on March 24, 1990. That day was proclaimed ACE 40th Anniversary Day by Los Angeles Mayor Tom Bradley.

ACE was the original idea of two Paramount Studio film editors, Warren Low and Jack Ogilvie. A charter membership meeting, held on November 28, 1950, was attended by 108 of the industry's top film editors. On January 9, 1951, the first membership meeting followed, at which time the society adopted American Cinema Editors as its name; members are identified on screen credits with "ACE" following their names.

From its inception ACE members were committed to encouraging the art and craft of editing by fostering an ongoing relationship with cinema schools throughout the country. The society, through its Visiting Editor Program, fills requests from cinema schools for lecturers, and it jointly sponsors seminars and an internship program with the American Film Institute. In 1957, ACE produced two films which are available to educational institutions, "Basic Principles of Film Editing" and "Interpretations and Values of Film Editing"

On March 14, 1951, the first annual ACE Awards dinner was held to honor the nominees for the Film Editing Award by the Academy of Motion Picture Arts and Sciences. In 1962, society editors became judges of their peers' efforts, resulting in the annual ACE Eddie Awards. The ACE Student Editing Awards were added in 1973.

The American Cinema Editors made its initial appearance in May 1951, as the official magazine of the society. It is circulated in the United States and in many foreign countries, and is a respected forum for postproduction expression.

The 40th anniversary was celebrated on March 24 at the annual ACE Eddie Awards dinner. At the event, held in the Beverly Hilton Hotel, Director Steven Spielberg was presented with the ACE Film Maker of the Decade Award. This special award, granted for the first time, was given to him in recognition of his having produced/directed the six most successful films during the 1980's. Mr. Spielberg delivered the keynote address and was inducted as an honorary member of ACE.

Career Achievement Awards were presented by George Grenville, president of ACE, to Margaret Booth and Elmo Williams for their outstanding achievements during lifetime careers in editing.

The American Cinema Editors look forward to the beginning of the next decade and the next century with anticipation as the motion picture and televisions industries undergo creative and technological innovations.

PHYSICIAN REGULATORY RELIEF AND IMPROVEMENT BILL

HON. J. ROY ROWLAND

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. ROWLAND of Georgia. Mr. Speaker, physicians and patients throughout the country are demoralized over the increasing amount of Government redtape which burdens America's health care system and threatens to undermine the quality of care.

More redtape—much of it unnecessary and sometimes even harmful—is the end result of a budget-driven system which substitutes short-term economic paper gains for long-term sensible health policymaking.

Redtape is destroying the close personal relationship doctors have traditionally had with their patients. It's interfering with good medicine by denying procedures to patients which physicians feel they may need. It's inundating doctors with paperwork and driving an increasing number out of active practice. It's causing many others to withdraw from Medicare participation, making health care less accessible to many people. Even many prospective doctors are deterred by redtape, which is cited as a major factor in a 25-percent decrease in medical school applications over the past 5 years.

The New York Times stated in one of a series of articles on medical payment and practice changes in the 1980's:

• • • The feeling of being shackled by rules and overseers is nearly universal among doctors today, experts inside and outside the profession say. Doctors say they are overwhelmed by paperwork, prohibited by insurance companies from doing procedures and subjected to scrutiny by group employers like health maintenance organizations that can even include scheduling of restroom breaks.

Mr. Speaker, today I am introducing legislation entitled the "Physician Regulatory Relief and Improvement Act" to reduce the regulatory burden on Medicare. The changes I am proposing are few, but together they can help restore an environment of faith and confidence that in the past has always characterized the country's health care system.

The legislation proposes the following changes:

To require the mandatory release of medical parameters and screens that are used to determine which Medicare claims might need individual review.

To allow attenting physicians to bill Medicare for services provided to a patient by a professional colleague who is covering temporarily for the absent attending physician.

To prohibit Medicare carriers from charging physicians for information or documents that are reasonably needed to comply with Medicare statutory and regulatory requirements.

To amend Medicare reconsideration and appeal requirements to allow State medical societies or other professional organizations to file actions on behalf of the entire class of aggrieved physicians.

To establish a physicians advisory group to review Medicare administrative requirements and their implementation prior to initiation of new policies.

TRIBUTE TO ANTHONY M. TARABOCCHIA

HON. ROBERT G. TORRICELLI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. TORRICELLI. Mr. Speaker, it is with great respect and admiration that I address my colleagues in the House today, for I rise to extend my heartiest congratulations and warmest best wishes to Mr. Anthony M. Tarabocchia. The Hackensack chapter of UNICO will be honoring Mr. Tarabocchia as its Man of the Year.

Tony was born on the island of Sansego, Yugoslavia, and came to the United States in 1955, at the age of 7. After completing his education, Tony worked as a traffic manager until 1972, when his life was completely changed. It was during this period that Tony entered the restaurant business and married Michelle Vecchiarello. Tony and Michelle have two lovely children, Christina and Anthony, Jr.

In 1981, Tony purchased the Cottage Inn in Lodi, NJ, and renamed the restaurant the Princess. With Tony's experience and knowledge of the restaurant business, the Princess has become a huge success.

Tony is an active and involved member of the community of Lodi. He encourages the youth in Lodi to participate in the numerous athletic programs they have available to them. He has been honored by many organizations in Lodi including the Italian-American Forum of Lodi and the city of Lodi itself. Tony often donates the use of the Princess to help raise money for worthy causes.

Tony is involved in organizations such as the Italian-American Forum of Lodi, many chapters of UNICO, and the Italian-American Soccer League of New Jersey. He has received many awards in recognition of his community service work including honors by the Hackensack chapter of UNICO in 1982, and being named the "Man of the Year" in 1983, by the Italian-American Forum of Lodi for his fundraising efforts to benefit Columbus Park in Lodi. In 1984, Tony received an award from Intersport Promotions, Inc., for promoting the Italian-American Soccer League of New Jersey. Tony was knighted a Cavaliere in the prestigious international organization Reale Ordine Di Cipro in 1985, and received the UNICO National Antonio R. Rizzuto Award the same year.

Clearly, this is a man who is one of the few individuals who really make a difference in our society. He is a man of the highest integrity and his energy and enthusiasm are apparent to all who come in contact with him.

Mr. Speaker, I am proud to join in paying tribute to this exceptional man and extend my appreciation on behalf of his efforts and offer my best wishes to him on this special occasion.

A TRIBUTE TO EMMA C. CHAPPELL

HON. GEORGE W. GEKAS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. GEKAS. Mr. Speaker, I rise to ask my colleagues to join me in recognizing a Pennsylvanian whose accomplishments should serve as an inspiration to all minorities.

Emma C. Chappell is visiting Harrisburg, PA, in my congressional district to address participants in a business conference. Her message, highlighted by her experience, is a can-do one. It is a message of optimism, energy, tenacity, and hard work.

Ms. Chappell is vice president and director of the Urban Development Services Department of the Continental Bank. With more than 30 years of experience in the banking industry, she is also chairman-designate of United Bank, a Philadelphia-based, minority-controlled commercial bank that is scheduled to open in the fall of 1990.

In many respects, Ms. Chappell has played a pioneering role for African-Americans and for women in the banking industry. In 1977, she earned the distinction of being elected the first female vice president in the history of Continental Bank.

In 1988, Ms. Chappell was appointed to the Pennsylvania Economic Development Partnership Board and to three board committees—the International Development Advisory Committee, the Committee on Housing, and the Statewide Advisory Committee on Minority Economic Development. She is also a member of the board of the Philadelphia Industrial Development Corp., and serves as co-chair of the Advisory Committee on Economic Development for Philadelphia.

Emma Chappell is a role model for women and for minorities. I congratulate her on her achievements.

A TRIBUTE TO THE NATIONAL ORANGE SHOW'S DIAMOND JUBILEE CELEBRATION

HON. JERRY LEWIS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. LEWIS of California. Mr. Speaker, I would like to bring to your attention today a wonderful anniversary celebration of the National Orange Show, taking place in San Bernardino, CA, on April 18, 1990. This year the National Orange Show is marking its diamond jubilee celebration with a Bob Hope salute to Norton Air Force Base and the Military Air Command.

The National Orange Show and our local community is proud and honored to welcome Bob Hope again this year. It is most fitting that he is joining us for the 14th time in the last 48 years to commemorate Norton Air Force Base and the Military Air Command on the 75th anniversary of the National Orange Show. Over the years, Bob Hope has traditionally appeared at the National Orange Show for Military Appreciation Day.

The National Orange Show began in 1911 as a citrus fruit fair to promote California's citrus fruit industry. Each year, with the exception of the war years, this local tradition has grown and has become an active participant in providing for the present and future needs of our local community.

In 1987, the National Orange Show Foundation was created under the guidance and leadership of Martin Matich and W.E. Leonard as a charitable arm of the National Orange Show. The foundation's purpose is to function as a direct benefit to the community through active participation in community affairs. The foundation intends to promote scholarships for nursing and, in the future, will promote the arts through providing grants, art shows, and exhibits as well as musical concerts for the benefit of the community.

In addition, there have been preliminary discussions within the foundation relating to future work providing food and shelter for the homeless as well as services for the aged. Presently, the National Orange Show is a nationally certified American Red Cross disaster center and provides food and shelter to those in need in times of crises.

Mr. Speaker, I ask that you join me and our colleagues today in congratulating the organizers and participants of this year's diamond jubilee celebration and recognizing this year's National Orange Show Foundation's Bob Hope Salute to Norton Air Force Base and the Military Air Command.

STATEMENT ON CHINA

HON. GERALD B.H. SOLOMON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. SOLOMON. Mr. Speaker, the bad news from China just keeps on coming. Compelling evidence has surfaced during the past week which indicates China has resumed selling missiles to the Middle East. Whether these missiles are bound for Iran, Iraq, or some other gangster state is not precisely clear, but we'll know soon. What is clear beyond any doubt, however, is that the Chinese assurances to General Scowcroft last year are proving to be just as hollow as the administration's own policies toward China.

The United States-China dialog has become the political equivalent of a hot air balloon. But that's of no concern to the Chinese dictatorship. As the first anniversary of the Tiananmen Square demonstrations draws closer, the comrades in the so-called Great Hall of the People are too busy beefing up security and putting on shows of force in Beijing to worry about bleatings from Washington. They're too busy protecting themselves from the Chinese people.

Mr. Speaker, following the upcoming district work period, I will be returning to this well to discuss in depth all of the steps China has taken since the prodemocracy demonstrators were massacred last spring. I can tell you right now that this is a pathetic record. Empty promises. Self-defeating policy reversals. Cynical betrayals of the Chinese people. It's all there. The only question is when the White House will stop offering reassuring pats on the shoulder and start dealing with the Government of China the same way we should with any other ruthless dictatorship.

IRAQ: OUTLAW STATE

HON. MEL LEVINE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. LEVINE of California. Mr. Speaker, 2 weeks ago, the Iraqi regime of Saddam Hussein demonstrated the standards of decency to which it holds itself by hanging the English journalist, Farzad Bazoft, despite the protests of Britain and many others. In the last several days, Iraq has been caught with its hand in the nuclear cookie jar, and Hussein himself has unequivocally stated that Israel will be "annihilated" should it attempt any military strike against Iraqi targets.

These actions should underscore that Iraq, which supposedly had been sobered by its war with Iran and therefore had adopted a new aura of moderation, in fact continues its radical and repressive behavior. Yet, according to the Arab League, it is not Iraq that deserves condemnation, but all those Western governments who "meddle in Iraqi affairs."

And the Arab League chose solidarity over decency in supporting the murder of this innocent journalist.

Jim Hoagland recently wrote an excellent op ed in the Washington Post which deals with this issue. Entitled "Iraq: Outlaw State," it scores both Iraq's and the Arab League's behavior. Indeed, Mr. Hoagland writes, "The Arab League reaches a new stomach-turning low in meekly endorsing Iraq's judicially sanctioned murder [of Mr. BAZOFT]."

Mr. Speaker, I ask unanimous consent to place the article in the RECORD, and urge that my colleagues take a few moments to review it.

[From the Washington Post, Mar. 29, 1990]

IRAQ: OUTLAW STATE

(By Jim Hoagland)

PARIS.—The Arab League is outraged. With characteristic courage and vision, the organization that represents 21 Arab governments and the PLO has taken up the execution by Iraq of London-based journalist Farzad Bazoft. Pulling no punches, the Arab League has blasted Prime Minister Margaret Thatcher for asking Iraq not to carry out the execution.

It came as no surprise that the appeal was rejected by Iraq's rulers, who head not a government but a criminal enterprise that has taken control of a country. But the Arab League reaches a new stomach-turning low in meekly endorsing Iraq's judicially sanctioned murder of the Iranian-born freelance journalist, who was traveling on British documents when he was arrested and accused of espionage.

How dare she? the league huffed of Thatcher's appeal for clemency. Meddling in Iraqi affairs! the league puffed, much as it did 18 months ago when outsiders briefly criticized Iraq for using poison gas against its Kurdish citizens.

The truth is that Western nations, including Britain and the United States, have responded too mildly to this latest example of Iraq's disregard of international norms. The weakness of Western response to Iraq's cynical execution of Bazoft encouraged the Arab League to spit in Thatcher's eye. The league knew it would not suffer from doing so.

Arab governments have again shown a collective willingness not just to endure evil within their community, but to endorse it. Claiming to speak on behalf of the world's 200 million Arabs, the Arab League reflexively defends murder in its midst in the name of Arab solidarity.

This is not solidarity. This is craven and

Moreover, the Arab leaders undermine their own legitimacy with their policy of silence and acquiescence. Their disgusted citizens see this not as solidarity, but as weakness and lack of courage. Given a choice between decency and Iraq, Arab leaders make the wrong choice time after time.

That is not the worse part of it. The worst part is that they are aided and abetted in this by Western democracies and Japan, which do not even have the phony excuse of solidarity to explain their inaction. They placate Iraq because they smell money—or rather, they smell oil. They fail to see that the promise of lucrative contracts from the debt-ridden regime in Baghdad is a mirage.

I exaggerate? Consider the dispatch from Tokyo this week: Japan's Foreign Ministry has asked the Foreign Correspondents Club of Japan to explain why it had revoked the honorary membership of the Iraqi ambassador to protest the Bazoft execution. The Foreign Ministry should be joining the correspondents in ostracizing Iraq, not exerting the subtle pressure of an official demand mindless surrender to the worst elements within the ranks of Arab leadership, who insist that their fellow rulers sink to their own beastly level. By failing to take a moral stand on the excesses of brutality committed by the butchers of Baghdad, by Gadhafi and others, Arab leaders undermine their criticisms of human-rights abuses committed elsewhere, specifically in Israel. for an explanation.

Or think back to the debate in Congress about imposing economic sanctions of Iraq for using poison gas on its own citizens in 1988: Senate Foreign Relations Committee Chairman Claiborne Pell (D-RI) was unable to get House members to share his outrage and pass a bill imposing limited sanctions against Iraq. Heavy pressure from firms doing business or wanting to do business in Iraq helped block passage. During the debate, I found out later, a major U.S. chemical company called one congressional office to ask for a briefing on the effect the sanctions might have on its business in Iraq.

Sanctions are generally an ineffective, unwieldy policy tool. But because Iraq's $70 billion to $100 billion in war debts (making Iraq an unlikely source of future profits for American companies), sanctions would bite and force change in this case.

But there is an even more important point to be made with sanctions, Iraq is one of a handful of governments that openly engages in criminal conduct as a matter of routine. This is government by Murder Inc. As were the educated classes of Cambodia during the time of Pol Pot or Jews in Hitler's Germany, Iraqi Kurds are killed or dispossessed of their belongings because of who they are, not what they have done. There must be a way to cast such countries beyond the pale of the international community. Sanctions here would be a beginning.

But the House did not have the courage to do that in 1988. Nor did the British, the French or others take meaningful actin. Iraqi President Saddam Hussein must have taken the measure then of his fellow Arab leaders and his outside critics and concluded that he could continue to act in the bloodsoaked style to which he has become accustomed.

If poor Farzad Bazoft counted on international pressure to save him, he misunderstood both Saddam Hussein and the international community.

A TRIBUTE TO THE HOLLAND CHORALE AND CALVIN LANGEJANS

HON. GUY VANDER JAGT

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. VANDER JAGT. Mr. Speaker, this year marks the 30th anniversary of the Holland Chorale, a group of approximately 70 singers from Holland, MI. Since its beginning the Chorale has been under the outstanding direction of Calvin P. Langejans. I appreciate this opportunity to bring some of the accomplishments and contributions of this very special singing group to the attention of my colleagues in the Congress. I know you will join me in saluting the members of the Holland Chorale.

A celebration is planned for May of this year to commemorate the Chorale's anniversary and to honor their director, Calvin P. Lange-

jans. Cal Langejans is greatly revered by the members of the Chorale. In learning of his inspiration and importance to the group from those who work closely with him, it was lovingly imparted to me that he brings to his direction a great deal of creative energy, enthusiasm, and expertise. He is a man with the ability not only to shape new ideas, but a leader who is able to make those ideas a reality. In addition to directing the many concerts presented by the Chorale each year, Cal also founded the March Festival of Arts. This celebration of the arts involves music, visual arts, drama, photography, dance, an art exhibit, and creative writing contest. It allows for the interaction between established artists and students in the Holland community.

Mr. Speaker, in a time when there is a great need for community spirit, a need for people united together to work for a common goal, a need for people who can go that extra mile to make life richer and fuller for those around them, it gives me great pleasure to pay tribute to a group of people who have fulfilled these needs—the Holland Chorale. I ask my colleagues to join me in honoring the Chorale and its director, Calvin P. Langejans, for their many contributions to their community and in wishing them many more years of success.

STATE INCOME TAX ALLOCATION

HON. WILLIAM M. THOMAS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 4, 1990

Mr. THOMAS of California. Mr. Speaker, all of us are concerned that American business be able to compete with their foreign counterparts. In fact, we have had hearings in several committees to look at new programs to help U.S. corporations compete abroad. But there are rules and regulations being promulgated under existing laws that impose additional costs on U.S. businesses competing in the world marketplace. It seems to me that we should begin to address international competitiveness for U.S. companies by making sure that our current laws and regulations do not hamper our ability to compete.

I am introducing legislation today which would provide that all State income taxes, including those imposed under unitary apportionment formulas, be allocated to U.S. source income. For some time, the Internal Revenue Service has been unclear in its own mind on how to allocate State income taxes. At one point, all, or most, State income taxes could be allocated to U.S. source income. At other times, large portions could not. During these times of indecision, however, foreign corporations competing in the United States were always given full use of their State taxes. The failure of the IRS to allow full allocation of State income taxes to U.S. source income has increased taxation of U.S. companies causing a competitive disadvantage as compared to foreign corporations.

Moreover, the IRS position on the allocation of State income taxes is inconsistent with Supreme Court rulings that State income taxes can only be imposed on income that is connected to activities in that State. It seems to me that if a taxpayer pays taxes to any State, then the taxpayer should be able to deduct that tax against his U.S. income.

The legislation that I am introducing today will eliminate this disadvantage and resolve a longstanding problem on the lack of consistency between State and Federal taxing systems. Unfortunately, the taxpayer has been caught in the middle of this inconsistency, and it's time that the issue was properly resolved so that U.S. corporations can get on with competing around the world.

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Meetings scheduled for Thursday, April 5, 1990, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

APRIL 6

9:00 a.m.
Labor and Human Resources
To resume hearings to review the Bipartisan Commission Comprehensive Health Care (Pepper Commission) recommendations on universal health care issues.
SD-430

9:30 a.m.
Finance
Private Retirement Plans and Oversight of the Internal Revenue Service Subcommittee
To hold oversight hearings on the implementation of the Omnibus Taxpayer Bill of Rights (P.L. 100-647).
SD-215

Governmental Affairs
Government Information and Regulation Subcommittee
To resume hearings on the quality of U.S. health promotion statistics.
SD-342

10:00 a.m.
Banking, Housing, and Urban Affairs
To hold hearings on the General Accounting Office's final audit of the Federal Savings and Loan Insurance Corporation (FSLIC).
SD-538

11:30 a.m.
Appropriations
Legislative Branch Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1991 for the Government Printing Office and the General Accounting Office.
SD-116

APRIL 18

9:00 a.m.
Veterans' Affairs
To hold joint hearings with the House Committee on Veterans' Affairs to review the legislative recommendations of the AMVETS, the Vietnam Veterans of America, the Veterans of World War I, and the Non-Commissioned Officers Association.
SH-216

10:00 a.m.
Appropriations
VA, HUD, and Independent Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1991 for the Department of Housing and Urban Development.
SD-138

2:00 p.m.
Appropriations
Interior Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1991 for the National Park Service, Department of the Interior, and the National Gallery of Art.
S-128, Capitol

APRIL 19

9:30 a.m.
Select on Indian Affairs
To hold hearings on S. 1289, to improve the management of forests and woodlands and the production of forest resources on Indian lands.
SR-485

10:00 a.m.
Appropriations
Commerce, Justice, State, and Judiciary Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1991 for the Small Business Administration, and the Legal Services Corporation.
S-146, Capitol

Appropriations
Transportation Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1991 for the Federal Railroad Administration and the National Railroad Passenger Corporation (Amtrak).
SD-138

Appropriations
Treasury, Postal Service, General Government Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1991 for the Office of Management and Budget, and the Executive Office of the President.
SD-116

Finance
To hold hearings on the changing trade relations between the United States and the Soviet Union.
SD-215

2:00 p.m.
Agriculture, Nutrition, and Forestry
Agricultural Production and Stabilization of Prices Subcommittee
To hold hearings on proposed legislation to strengthen and improve U.S. agricultural programs, focusing on deficiency payment problems associated with barley.
SR-332

Agriculture, Nutrition, and Forestry
Conservation and Forestry Subcommittee
To hold hearings on S. 2205, to designate certain lands in the White Mountain National Forest, Maine as the Caribou-Speckled Mountain Wilderness, and as components of the National Wilderness Preservation System.
SR-485

Appropriations
Foreign Operations Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1991 for foreign assistance, focusing on Eastern Europe.
SD-138

Commerce, Science, and Transportation
To hold hearings on the nomination of John K. Lauber, of Maryland, to be a Member of the National Transportation Safety Board.
SR-253

2:15 p.m.
Appropriations
Energy and Water Development Subcommittee
To hold closed hearings on proposed budget estimates for fiscal year 1991 for the Department of Energy, focusing on atomic energy defense programs.
SD-116

APRIL 20

9:30 a.m.
Energy and Natural Resources
To hold hearings on the nomination of Thomas L. Sansonetti, of Wyoming, to be Solicitor, Department of the Interior.
SD-366

APRIL 23

9:30 a.m.
Agriculture, Nutrition, and Forestry
Agricultural Production and Stabilization of Prices Subcommittee
To hold hearings on proposed legislation to strengthen and improve U.S. agricultural programs, focusing on the cost of production.
SH-216

2:00 p.m.
Appropriations
Interior Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1991 for the Forest Service of the Department of Agriculture.
SD-192

Select on Indian Affairs
To hold oversight hearings on the Indian Federal acknowledgement process, including S. 611 and S. 912, bills to establish administrative procedures to determine the status of certain Indian groups.
SR-485

APRIL 24

10:00 a.m.
Appropriations
Defense Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1991 for the Department of Defense, focusing on the National Guard and Reserves.
SD-192

Appropriations
Transportation Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1991 for the National Transportation Safety Board and the Federal Highway Administration.
SD-138

Energy and Natural Resources
Energy Research and Development Subcommittee
To hold hearings on the Department of Energy's superconducting super collider program.
SD-366

2:30 p.m.
Appropriations
Foreign Operations Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1991 for foreign assistance, focusing on refugee programs.
SD-138

APRIL 25

9:00 a.m.
Labor and Human Resources
Business meeting, to consider S. 722, Food Safety Amendments, S. 1425, Nutrition Labeling and Education Act, S. 436, Employee Health and Safety Whistleblower Protection Act, and other pending calendar business.
SD-430

9:30 a.m.
Commerce, Science, and Transportation
Science, Technology, and Space Subcommittee
To hold hearings on the National Science Foundation and the upcoming scientific manpower crisis.
SR-253

10:00 a.m.
Appropriations
Commerce, Justice, State, and Judiciary Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1991 for the Office of the Attorney General.
S-146, Capitol

Appropriations
Treasury, Postal Service, General Government Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1991 for the General Services Administration.
SD-116

2:00 p.m.
Agriculture, Nutrition, and Forestry
To hold hearings to examine the jurisdiction between the Commodity Futures Trading Commission and the Securities Exchange Commission.
SR-332

Commerce, Science, and Transportation
Communications Subcommittee
To hold hearings on S. 1981, to permit the Bell Telephone Companies to conduct research on, design, and manufacture telecommunications equipment.
SR-253

Energy and Natural Resources
Public Lands, National Parks and Forests Subcommittee
To hold hearings on S. 370, to establish the American Heritage Trust to provide funding for the preservation of America's natural, historical, cultural, and outdoor recreational heritage.
SD-366

APRIL 26

9:00 a.m.
Commerce, Science, and Transportation
Aviation Subcommittee
To hold hearings on proposed legislation authorizing funds for the National Transportation Safety Board.
SR-253

9:30 a.m.
Appropriations
VA, HUD, and Independent Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1991 for the National Aeronautics and Space Administration.
S-126, Capitol

10:00 a.m.
Appropriations
Defense Subcommittee
To hold closed hearings on proposed budget estimates for fiscal year 1991 for defense intelligence programs.
S-407, Capitol

Appropriations
Commerce, Justice, State, and Judiciary Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1991 for the Department of State.
S-146, Capitol

Appropriations
Transportation Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1991 for the General Accounting Office.
SD-138

2:00 p.m.
Energy and Natural Resources
To resume oversight hearings on the Department of Energy's Decision Plan relating to the opening of the Waste Isolation Pilot Plant (WIPP) in Carlsbad, New Mexico, and on proposed legislation to withdraw the public lands surrounding the WIPP site.
SD-366

Governmental Affairs
Oversight of Government Management Subcommittee
To hold hearings on S. 1957, to provide for the efficient and cost effective acquisition of nondevelopmental items for federal agencies.
SD-342

APRIL 27

9:00 a.m.
Commerce, Science, and Transportation
Aviation Subcommittee
To hold hearings on proposed legislation authorizing funds for fiscal year 1991 for the Federal Aviation Administration.
SR-253

10:00 a.m.
Labor and Human Resources
Education, Arts, and Humanities Subcommittee
To resume hearings on proposed legislation authorizing funds for the National Foundation on the Arts and Humanities.
SD-430

APRIL 30

2:00 p.m.
Appropriations
Interior Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1991 for fossil energy and clean coal technology programs of the Department of Energy.
S-128, Capitol

Select on Indian Affairs
To hold oversight hearings on provisions of S. 1203, to provide tax incentives for businesses on Indian reservations, and S. 1650, to allow an Indian employment opportunity credit for qualified employment expenses of eligible em-

ployers on Indian reservations; to be followed by a business meeting to mark up S. 143, to establish the Indian Development Finance Corporation to provide development capital for Indian businesses.
SR-485

MAY 1

9:30 a.m.
Energy and Natural Resources
Energy Research and Development Subcommittee
To hold hearings on the Department of Energy's uranium enrichment program.
SD-366

SENATE—*Thursday, April 5, 1990*

(Legislative day of Tuesday, January 23, 1990)

The Senate met at 10:30 a.m., on the expiration of the recess, and was called to order by the Honorable TOM HARKIN, a Senator from the State of Iowa.

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray:

And it shall be, if thou do at all forget the Lord thy God, and walk after other gods, and serve them, and worship them, I testify against you this day that ye shall surely perish. As the nations which the Lord destroyeth before your face, so shall ye perish; because ye would not be obedient unto the voice of the Lord your God.—Deuteronomy 8:19, 20.

Almighty God, this warning from Moses, preparing Israel for nationhood, is reflected in the proclamation of President Lincoln calling the Nation to a day for "national humiliation, fasting, and prayer":

"We have grown in numbers, wealth, and power as no other nation has grown—but we have forgotten God.

"We have forgotten the gracious hand that preserved us in peace, and multiplied and enriched and strengthened us. * * *

"We have vainly imagined that all these blessings were produced by some superior virtue and wisdom of our own. It behooves us, then, to humble ourselves, to confess our national sins, and to pray for clemency and forgiveness."

Help us to realize that to profess faith in God and live as though He were nonexistent is worse, if anything, than belief in no god. Forgive us, Lord. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore [Mr. BYRD].

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, DC, April 4, 1990.

To the Senate:

Under the provisions of rule I, section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable Tom Harkin, a Senator from the State of Iowa, to perform the duties of the Chair.

ROBERT C. BYRD,
President pro tempore.

Mr. HARKIN thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF THE MAJORITY LEADER

The ACTING PRESIDENT pro tempore. The majority leader is recognized.

THE JOURNAL

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Journal of the proceedings be approved to date.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

THE SCHEDULE

Mr. MITCHELL. Mr. President, this morning, following the time for the two leaders, there will be a period for morning business until 12 noon, with Senators permitted to speak therein for up to 5 minutes each.

At noon, we will proceed to consideration of S. 1109, the vocational education authorization bill.

I am advised that staff have been working diligently to iron out remaining problems with respect to this bill and that between now and noon we will learn the results of these negotiations.

I hope that we will be able to enter into a time agreement regarding the bill, but if we are not we will proceed to it, or at least attempt to proceed to it at noon, and I intend to continue on the bill until we complete it prior to recess.

In addition, Mr. President, it is my hope that we can proceed today to the Panama/Nicaragua assistance authorization bill under an agreement that provides for no amendments and under a limited time.

The President has been anxious for us to act on this matter. He has spoken to me as recently as yesterday urging such action. We would like to accommodate the President and proceed in this regard and will do so if we can get such an agreement which I hope will be forthcoming very shortly.

RESERVATION OF LEADER TIME

Mr. MITCHELL. Mr. President, I reserve the remainder of my leader time and I reserve all of the time of the distinguished Republican leader.

The ACTING PRESIDENT pro tempore. The time of the leaders is reserved.

MORNING BUSINESS

The ACTING PRESIDENT pro tempore. Under the previous order there will now be a period for the transaction of morning business, not to extend beyond the hour of 12 noon, with Senators permitted to speak therein for not to exceed 5 minutes each.

THE 1990 APRIL QUARTERLY REPORTS

The mailing and filing date of the April Quarterly Report required by the Federal Election Campaign Act, as amended, is Sunday, April 15, 1990. All principal campaign committees supporting Senate candidates in the 1990 races must file their reports with the Senate Office of Public Records, 232 Hart Building, Washington, DC 20510-7116. You may wish to advise your campaign committee personnel of this requirement.

The Public Records Office will be open from 12 noon until 4 p.m. on Saturday, April 14, and from 12 noon until 3 p.m. on Sunday April 15, Easter Sunday, to receive filings. In general, reports will be available 24 hours after receipt. For further information, please do not hesitate to contact the Office of Public Records on (202) 224-0322.

The Senator from Maine.

REORIENTING DEFENSE IN THE 1990'S

Mr. COHEN. Mr. President, it is clear that we are witnessing vast changes on a global level. We are witnessing a reduced threat to our European allies and, indeed, to the United States. We are also seeing a change in the domestic environment, one that will no longer support large increases in military budgets and, indeed, will demand reductions in our military spending.

The question is, How are we going to respond? Are we going to simply repeat old antagonisms? Are we going to redouble the volume on our rhetoric? Are we going to stretch our existing programs making them thinner and more expensive? Or are we going to cut programs by an equal percentage, a sort of Gramm-Rudman-Hollings approach cutting across the board? My response is none of the above.

I think we have to, No. 1, recognize emerging realities both on a military and political level. Second, we have to reshape our defense structure in a way that will serve our three basic goals that we have maintained certainly since the end of World War II, and that is to deter a nuclear attack by the Soviet Union or anyone else upon the United States, to prevent the Soviet domination of the Eurasian land mass, and to maintain access to the open seas and to project power where we have to.

We are going to have to maintain these three basic goals, and we can do so in a way that reflects the reduction in our commitment to defense spending. It is not to simply pick out of the air a number and say let us pick this number for defense spending and then cut and shape our defense budget to match the number. Rather, we first have to develop a strategy and then make reductions to conform to that particular strategy.

Senator JOHN MCCAIN of Arizona and I have been working for a number of weeks now trying to develop a set of guidelines that hopefully will serve to reorient our defense in the 1990's. I basically outline these goals.

First, maintain nuclear deterrence with forces lower in level, and more stable in structure, than those currently proposed in START.

Second, European defense arrangements in which Europeans assume greater responsibility and U.S. contributions are reduced and rendered more compatible with U.S. global responsibilities.

Third, regional security that stresses the political influence of U.S. military power and partnership with friends and allies, including enhanced burdensharing and security and economic assistance.

These are the three principal goals around which we would shape our defense structure in Europe in the future.

Mr. President, I ask unanimous consent that the full statement prepared by Senator MCCAIN and myself be printed in the RECORD at this point.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

REORIENTING DEFENSE IN THE 1990's

(By Senator John McCain and Senator William S. Cohen)

During the next five years, we must make the most unprecedented changes in our strategy and force structure since the end of World War II. We must adjust our overall defense efforts to sharply reduce the present burden on our economy and the federal budget. At the same time, we must set new priorities that reflect the major changes that are taking place in the threats to our national security.

We cannot make these changes simply by cutting each service by roughly the same percentage and by failing to change the roles and missions of our forces. We cannot continue looking at the problems we face one year at a time and letting our military thinking lag behind changing political and economic realities.

Disciplined caution in altering our defense posture is certainly warranted. The specter of the Cold War's possible return, however, cannot be used to defer a reconsideration of defense policy that was warranted even before the events of the last six months. If we do not reorient our defense planning to the genuine needs of the future, we will squander a unique opportunity and waste declining defense resources. We will also surrender leadership to those focused on cutting defense for cutting's sake and those who would substitute parochial interests for strategy.

There is, at present, a notable lack of the kind of framework that can shape the debate and discussion in the way that is needed to look beyond the narrow issues in the FY-1991 budget. We believe the U.S. must act now to reorient our defense planning and force structure in the three principal mission areas:

Nuclear deterrence with forces lower in level, and more stable in structure, than those currently proposed in START.

European defense arrangements in which Europeans assume greater responsibility and U.S. contributions are reduced and rendered more compatible with U.S. global responsibilities.

Regional security that stresses the political influence of U.S. military power and partnership with friends and allies, including enhanced burdensharing and security and economic assistance.

Our recommendations are meant as a guideline for reorienting U.S. defense policies, not a detailed blueprint for budgetary cuts. While we identify some program reductions and terminations, we do not attempt to cite every cutback we believe warranted nor to quantify all of those we do cite. Details are important. But until a consensus emerges on the conceptual framework for our defense policy, details distract from more urgent issues.

Overall, we believe that the U.S. can meet its defense requirements with budget levels lower than those proposed by the Administration. Moreover, we believe the American people will support the budget levels that are needed only if they believe our defense policies correspond to the changing world scene.

The Administration has proposed real defense reductions of about 2 percent in each of the next five years. We believe that with proper planning, real reductions about twice this level are realistic. This would cut the real defense budget in FY-1995 by about $50 billion below the current level, while leaving the nominal defense budget at about current levels. Since sensible defense planning requires that budget authority be cut more quickly than outlays, however, even cuts of this magnitude will produce a significant "peace dividend" only in the outyears.

STRATEGIC FORCES AND NUCLEAR DETERRENCE

Current plans call for the U.S. to spend far more to modernize and maintain its strategic nuclear forces than is necessary or can be sustained in light of declining defense resources. These modernization efforts are largely driven by employment plans for strategic forces that emphasize maximum coverage of extensive target lists. This approach results from institutional arrangements that excessively concentrate in a single locus decisionmaking regarding deterrence requirements, targeting objectives and operational needs. It produces unrealistically high weapon "requirements," distorts procurement decisions and essentially forecloses post-START arms reduction.

The U.S. should more clearly enunciate a deterrence strategy focused on reducing incentives for a first-strike and escalation by both sides. U.S.-Soviet relations have evolved sufficiently to negotiate agreements aimed at such far-sighted objectives. But even absent modifications to the current START draft treaty, we should act now to adjust strategic force modernization plans.

We should proceed with the Advanced Cruise Missile for carriage on B-52s and B-1Bs and, as Soviet defenses improve, transition the B-1B into primarily a cruise-missile carrier role. The B-2 Stealth bomber program should be curtailed.

We are unlikely to find the political support or funding for two new ICBM systems. While rail-basing for the MX is less expensive and probably can be deployed sooner than the Small ICBM, we should actively pursue reciprocal restrictions with the Soviet Union to cut back MIRVed ICBMs—including the rail-based MX—in favor of single-warhead missiles such as the Small ICBM.

We should continue to modernize the SSBN and SLBM force, which constitute the bedrock of our deterrence posture. However, since the exact number of Trident SSBNs to be procured is linked to unresolved issues in START, we should consider the schedule for procuring additional SSBNs an open question. We should consider retaining the C-4 SLBMs deployed on the first eight Trident SSBNs and not backfit them with D-5 SLBMs as planned.

Given the increasing proliferation of ballistic missile technology, the SDI program should be reoriented to place more emphasis on defending against potential threats from countries other than the Soviet Union. SDI activities should continue to abide with the traditional interpretation of the ABM Treaty, and FY-1990 funding should be considered an upper limit to future funding levels.

NATO AND THE DEFENSE OF EUROPE

The U.S. should continue to remain involved in Europe to help ensure freedom, peace and stability. The U.S., however, cannot hold primary responsibility for maintaining European security or managing the significant changes that are under way in Europe. The U.S. should significantly reduce its military forces in Europe, while maintaining the capability to reintroduce large numbers of forces if the need should arise. Given the increases foreseen in strategic warning of hostile Soviet actions, such reinforcements could rely primarily on fast sealift.

The CFE treaty under negotiation would entail major reductions in U.S. forces in Europe, including cuts in personnel down to 195,000 in the Central Region and 225,000 in the whole of Europe. Secretary Cheney has stated that CFE implementation would allow elimination of 3 active divisions and 2 reserve divisions and 5 tactical air wings, although he has not stated how many would come from forces deployed or intended for use in Europe and whether the air wings would come from active or reserve forces. We believe that all of these cuts should come from forces intended for use in Europe, with most if not all of the 3 active divisions and most of the 5 air wings coming from forces now in place in Europe. Additional reductions of active divisions de-

ployed in the U.S. should be considered within a sound Total Force concept.

The restructuring of forces in Europe should involve not only a reduction in force levels but a realignment of missions and responsibilities among the NATO partners as well. U.S. forces should emphasize providing the logistical base and prepositioned equipment for any required reintroduction of U.S. forces and allied forces should assume principal responsibility for heavy ground forces and air defense.

A serious re-evaluation is required of the Alliance's theater nuclear posture and its objectives for negotiations on short-range nuclear forces (SNF). U.S. strategic nuclear forces will remain the ultimate deterrent, but theater weapons will continue to play a critical role and one to which major contributions could be made by the British and French nuclear forces, which are being modernized. In consultation with our allies, the U.S. should move aggressively forward with negotiations on SNF in Europe aimed at eliminating the Soviet Union's significant advantages, particularly in ground-based missiles.

Besides the reductions in divisions and air wings, other force adjustments would include: termination of the Follow-On-to-Lance and the M1 tank, as planned; deferring production after completion of R&D on the Advanced Tactical Fighter (ATF) and Follow-on-Forces-Attack (FOFA) related sensor systems; larger procurement of fast sealift adaptable to both reinforcement of Europe and regional power projection; and continued reliance on and upgrading of current weapon systems such as the F-16 and F-15. The C-17 and Advanced Tactical Aircraft will remain necessary, but adjustments in schedule and total buys should not be ruled out.

REGIONAL STABILITY

The global economy is interwoven to an unprecedented extent and is vulnerable to disruptions from regional conflicts. The U.S. is increasingly dependent on the continued flow of goods and raw materials, particularly imported energy, to sustain our economy. While we should not aspire to the role of global policeman nor seek to intervene in every regional hot spot, our vital interests compel us to continue our leadership role in the community of nations, including the prudent exercise of military power.

The one enduring fact of geography is that we are an island nation. Vital markets and resources are located across vast oceans, and sea lines of communication are the main arteries through which our growing volume of trade flows. At the same time, our ability to station forces on foreign soil is increasingly hampered. Thus, the relative importance of naval, marine and other force projection assets, the forces most often employed in the past, will grow significantly. At the same time, the absolute level of force projection capabilities will decline.

With regard to our naval forces, vestiges of plans to attack the Soviet fleet in its bastions should be de-emphasized in favor of regional missions; the overall number of ships should decline, including the carrier fleet which could decline by one or possibly two decks if current trends continue; and modernization plans should be scrubbed, with some programs, such as the Navy ATF, deferred. But reduced force structure, the spread of sophisticated weaponry to Third World countries, and the high probability that our naval forces will periodically see action in hostile situations dictate that the naval forces that remain must be modernized. The ATA and surface vessel modernization should proceed, since there are no adequate alternatives for the Navy air attack role and the destroyer fleet faces block obsolescence. The Marine Corps, with its ability to preposition and sustain its forces by sea, and the likelihood of its use, should remain roughly its present size.

The Air Force provides ground attack and air defense capability that can rapidly be forward deployed, strategic and theater airlift capability, and airborne surveillance and reconnaissance. However, many of the Air Force's modernization programs, such as the ATF and FOFA-related sensor systems, are inappropriate or exceed the requirements for regional contingencies, which can be met with currently deployed systems with upgrades as necessary. The C-17 should proceed as noted above.

The Army should reduce emphasis on heavy units designed for a European conflict and focus more on lighter forces, based in the U.S., that can be rapidly deployed for sustained combat power. These forces should be designed for use in regional contingencies, while retaining the capability to reinforce NATO. We will need fewer active divisions than now envisioned by DOD, but a portion of the active force should be maintained in high readiness, including airborne and special operations forces. Special operation forces are among those most likely to be used and their military and political value far outweighs their cost; we should continue to emphasize their modernization, training, and plans for their use.

FORWARD DEPLOYMENT AND BURDEN SHARING

Wealthy allies, such as Japan and South Korea, need to pay more of the costs of locally deployed U.S. forces that provide stability in their regions. They also need to provide more economic assistance to strategically important nations in which we share interests. In some cases, retaining forward deployed forces where they are welcome will make sense both militarily and economically, since it would be more expensive to relocate forces to the U.S. and buy the increased lift to return them in contingencies. In other cases, forward deployed forces may no longer be welcome or may entail problems that exceed the benefits. The Philippines may well fall into this latter category, and we should prepare to reduce our forces stationed there.

However, we must recognize, as the local players certainly do, that U.S. forces fill a political as well as a military role and that their withdrawal creates a vacuum that will be filled by other powers, potentially to the disadvantage of regional stability and our own interests. As we alter the structure and levels of our forward deployed forces, we should work with the local players to minimize potential adverse effects on stability and U.S. interests.

Mr. COHEN. In addition, I should indicate I had the privilege of working with the Foreign Policy Institute at Johns Hopkins University and this study group, which is comprised of a number of experts in the field of defense and foreign policy, has recently published a report which is entitled "Changing Roles and Shifting Burdens in the Atlantic Alliance." I commend this to my colleagues, and I ask unanimous consent that this be printed in the RECORD.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

[FPI Policy Study Groups, April 1990]

CHANGING ROLES AND SHIFTING BURDENS IN THE ATLANTIC ALLIANCE*

(Foreign Policy Institute, the Paul Nitze School of Advanced International Studies, the Johns Hopkins University, Washington, DC)

EXECUTIVE SUMMARY

The revolutionary changes sweeping Eastern Europe and the Soviet Union bring the most fundamental goals of the North Atlantic Treaty Organization within reach. The transition to a more peaceful, democratic, and secure Europe also entails risks, however, which mandate a comprehensive and patient Western response that focuses on the achievement of long-term objectives, while hedging against short-term risks.

The rapid pace of change requires that existing institutions be adapted to new realities. For the West, while the European Community can serve vital economic and political needs, the task of managing the transformation of the security system must fall primarily to the only organization with the requisite knowledge and experience, the Atlantic Alliance. Regardless of the fate of the Warsaw Pact, the Alliance can continue to serve American interests both by helping to ensure the security of Western Europe, and by reassuring nations in both Western and Eastern Europe that German unification is taking place within a coherent security framework.

As part of the process of East-West political reconciliation and the creation of a new security framework encompassing a reunited Germany, the Atlantic Alliance should seek formal, verifiable agreements enforcing the gradual, but far-reaching reduction of conventional and nuclear forces in Europe. Tight constraints on the readiness and posture of the forces that remain can also help to build the confidence of all nations in the new security framework.

As a first step, the Alliance should seek the rapid conclusion of the CFE agreement now on the table in Vienna, and initiate negotiations on short-range nuclear forces shortly thereafter. The Alliance must also begin immediately to address the question of the minimum level of forces necessary to preserve peace and security in Europe over the long term, in order to prepare the way for future reductions. Any such analysis, moreover, must recognize the unique role of nuclear weapons.

Eventually, a single organization encompassing all the nations of Europe and North America might be established to monitor the new security regime and to work out its political aspects, including those associated with the unification of Germany. The Conference on Security and Cooperation in Europe, if developed further institutionally, is a logical candidate for this role. Even with the establishment of such a comprehensive

*The general thrust (though not necessarily every word) of this Interim Report on Changing Roles and Shifting Burdens in the Atlantic Alliance was endorsed by David Abshire, Barry Blechman, Bill Bradley, Harold Brown, Zbigniew Brzezinski, David Calleo, William Cohen, Russell Dougherty, Joseph Fromm, Andrew Goodpastor, Benjamin Gilman, Lee Hamilton, Arthur Hartman, Dave McCurdy, Edward Meyer, Paul H. Nitze, Sam Nunn, Rudolph Penner, Rozanne Ridgway, Alice Rivlin, Simon Serfaty, William Simon, William Y. Smith, and Helmut Sonnefeldt.

security institution, however, the Western nations should maintain a distinct organizational structure to coordinate their policies.

For its part, the United States should undertake urgently a reexamination of its commitments and policies in the new international context to determine the forces necessary to undergrid the peace and security of Europe over the long term. We believe that the maintenance of both U.S. nuclear guarantees and substantial numbers of U.S. troops in Europe will serve vital American security interests for years to come.

Sizable reductions in the U.S. military presence in Europe are possible, however. President Bush's proposal to reduce U.S. and Soviet forces in Central Europe to 195,000 each, with the U.S. retaining the right to station 225,000 troops throughout Europe, should serve as the immediate goal of U.S. policy. Such a treaty should be signed during 1990 and implemented by the end of 1992. In the meantime, the United States should refrain from unilateral reductions.

The United States can look forward to additional reductions in its forces in Europe beyond those mandated in the CFE Treaty. These additional reductions might be taken as a result of additional treaties, or be made unilaterally and subsequently ratified in agreements. Such additional reductions might lead to greater specialization within NATO, with the U.S. concentrating on the nuclear, tactical air, and reinforcement missions, and other NATO countries assuming the burden of providing whatever active armored forces were required on the continent. Consideration of NATO's future military posture must pay special attention to nuclear forces, moreover, and particularly, in light of developments in Central and Eastern Europe, to short-range nuclear weapons. In view of West Germany's clear opposition to the proposed follow-on Lance missile, the funds requested for this program in the fiscal 1991 budget could be used more advantageously for other purposes.

While the scope and form of American military commitments in Europe are likely to change substantially in the years ahead, the American interest in a democratic, free, and peaceful Europe will remain fundamental. In the long run, the creation of a secure and undivided Europe represents the greatest peace dividend.

INTERIM REPORT

The North Atlantic Treaty Organization enters its fifth decade poised on the threshold of momentous accomplishments. The political environment in which it was created and nurtured is being transformed beyond recognition, making possible the creation of a more peaceful and stable security regime in Europe. Essential to these objectives is a process of negotiation that places tight controls on the size and activities of the armed forces of all nations in Europe, that brings about closer economic cooperation on the continent, and that transforms political relationships among all nations from confrontation to cooperation.

There are dangers during this transitional period, however, dangers that could be magnified by uncoordinated, unilateral national actions. The United States has sustained a very successful security policy toward Europe for more than four decades. Staying the course for a few more years will be difficult politically, but well worthwhile in terms of this nation's own security and political objectives.

BACKGROUND

The Soviet Union is undergoing revolutionary change, seeking to revive a failing economy while feeling its way toward a modified political system that can accommodate burgeoning national and political aspirations within the USSR. In Eastern Europe, the USSR's allies are departing even more rapidly, if unevenly, from previous models of economic and political organization, installing more democratic political systems while striving for economic rejuvenation through association with the West. The futures of both the Soviet Union's economic grouping, COMECON, as well as its security organization, the Warsaw Pact, are difficult to assess, but are unlikely to be bright.

These developments put within reach achievement of the Atlantic Alliance's most fundamental goals:

(i) removal of the military threat once posed to its members by the Warsaw Pact;

(ii) establishment of lasting processes leading to freedom, democracy, and national self-determination in Eastern Europe, including the USSR itself;

(iii) peaceful resolution of the issues remaining from the Second World War, most notably, the division of Germany; and

(iv) establishment of a security regime in Europe that supports peaceful change and security at greatly reduced levels of military expenditure.

Full achievement of these goals poses new challenges for the United States and its European allies, however. Europe has cast loose from the familiar moorings of the bipolar system that maintained an uneasy peace over the past forty years, but its ability to navigate through the uncharted waters which lie ahead cannot be taken for granted. The transformation of Eastern Europe has unleashed powerful forces of national identity and national pride throughout the region, reopening historic conflicts that eventually might threaten the integrity of several nations. The economic situation in most East European nations is so difficult as to reinforce national unrest, with little hope of more than slow and limited improvement in the near-term, even with substantial aid from the West. With only limited experience with democratic practices, the creation of resilient political institutions will be difficult and uncertain. And past abuses of fundamental human rights by governments, security organizations, and Communist parties in Eastern Europe have created hatreds and bitterness that may yet generate violent reprisal, feeding civil strife and risking anarchy in several nations.

In the meantime, the political future of the one man whose bold policies made possible the historic changes now taking place in Eastern Europe and the USSR, Mikhail Gorbachev, can not be taken as assured, nor can the policies of his possible successors be foreseen. The turmoil that conceivably could be set loose by Gorbachev's overthrow, or which could almost as easily erupt in his presence, could negate in some measure the gains that have already been made, though a return to Brezhnevism, let alone Stalinism, seems highly unlikely. There would be some chance, no doubt, of a move back in the direction of old regimes and old policies, recreating, in lesser degree perhaps, the division of Europe and the military contingencies which until recently posed risks to NATO. A more likely danger, though, is that the eruption of widespread violence and political chaos could result in new alignments and different contingencies, such that Western security would be threatened in ways unknown.

The problems posed to the United States, Canada, and the nations of Western Europe by the uncertainties in the East are compounded by emerging political forces among the Western nations themselves. In West Germany, unhappiness with that nation's status within the Alliance has been manifested most clearly in Bonn's increasing assertiveness on questions of nuclear weapons and peacetime military operations. Within the past year, however, German assertiveness has expressed itself more directly in the form of open support for reunification. No longer a distant dream, resolving the questions posed by Germany's current anomalous condition as two states in one nation is among the highest priorities on the international agenda. None of us could help be moved by the outpouring of emotion which greeted the events in Berlin last November. But the question of German unification retains the potential to fracture the complex pattern of relations between Germany and the rest of Europe so carefully developed over the past forty years, and must be resolved in a way that satisfies the concerns of Germany's neighbors.

Other political trends also can hamper the West's ability to deal effectively with revolutionary change in Eastern Europe. Popular interest in, and support for, the efforts necessary to maintain NATO's military capabilities and political cohesion are weakening in many of the member states of the Alliance. Western governments have so far been able to maintain a considerable degree of cooperation, in most instances, but find it increasingly difficult to sustain the policies that they know are the most prudent.

This tendency is apparent with respect to military spending. Even before the upheavals in Eastern Europe, many governments in Western Europe and North America were reponding to popular pressures for lower defense burdens by cutting back on previous plans for modernizing and expanding forces. As the policies of Mikhail Gorbachev have taken hold, domestic needs—both public and private—have gained greater priority in allocations of national resources throughout the Alliance. With last year's dramatic events, pressures for greater cut-backs are building further, outrunning the pace of arms negotiations. Thus, to cite one example, the FRG has announced a 20 percent reduction in the size of the Bundeswehr, tied allegedly to successful conclusion of the first phase of the talks on conventional forces in Europe (CFE). The U.S. defense budget is similarly under pressure, with the administration's proposed real reduction of two percent per year certain to be deepened in coming months.

Apart from pressures against military spending, the growing unreality in the minds of most people of the contingencies contained in European military plans (which are still based on the situation that previously existed) manifests itself differently in the various NATO countries. In West Germany and other countries in northern Europe, the apparent demise of the Warsaw Pact as a coherent military threat has added to longstanding challenges concerning nuclear weapons, crystallizing powerful political forces opposing steps to improve nuclear capabilities and favoring major reductions in those weapons' roles and numbers. The willingness last Spring of even a conservative Bonn regime to break publicly with Washington over nuclear issues—even before the recent drastic

changes in the non-Soviet Warsaw Pact countries—was a telling sign of the strength of anti-nuclear feelings in the Federal Republic in virtually all political sectors.

In the United States, previously accepted military planning scenarios are now perceived to be out of date. The cutbacks in U.S. force levels and closings of military facilities in this country made necessary by current budgetary decisions, coming against a background of revolutionary change in Eastern Europe, is giving new life to calls to bring home many of the U.S. forces now stationed in Europe and other parts of the globe, despite the fact that the return of armed forces without their demobilization actually increases costs, rather than saving money.

Each of these individual national pressures should be manageable in a cooperative international atmosphere, but only if key Western governments remain united in developing a common understanding of the preferred course of action. The level of cooperation which has marked intra-alliance discussions of security issues in recent years, with the exception of the few months prior to last May's summit, is far from certain, however. The question of German reunification, especially, if not handled properly, could disrupt ties among the European allies. Economic issues, moreover, have the potential to divide the Alliance across the Atlantic, especially if economic growth falters in the United States.

The movement toward economic and political integration of the European Community has specific potential for causing stresses among the NATO partners if insufficient consideration is given to the interests of non-Community members. Some in the United States are already concerned that West European economic and political integration can come only at the expense of American interests. The Japanese have similar fears. Managed correctly, European economic integration can be a powerful force for peace, ensuring the maintenance of highly positive relations between Germany and its allies, and working to encourage the recovery of Eastern economies. Indeed, along with the East-West security dialogue addressed below, European economic integration is probably a co-requisite for successful resolution of the German issue.

The countries of the Atlantic Alliance thus face a dilemma. On the one hand, they should act decisively, and with a reasonable degree of coordination, to take advantage of the opportunities presented by the developments in Eastern Europe. Constructive NATO policies and clear actions are essential to support the new-found independence of the nations in Eastern Europe, their economic viability, and their democratic character. Too limited a response could lose this sudden chance to resolve many of the conflicts that have divided Europe for so many decades and to establish a more stable and peaceful security regime on the continent.

Should this opportunity to bring peace to Europe be missed, the cost would be felt not only by the people of Eastern Europe, but in the West itself. A failure in Eastern Europe would have severe implications for the cohesion of the Alliance. Neither Americans nor West Europeans would lightly face the prospect of renewed military risks in Europe. We have come too far already to return to the old situation.

On the other hand, NATO cannot act as if the future is assured. The Alliance cannot simply assume that all military risks have disappeared for good, and unilaterally dismantle its military capabilities, as attractive and popular as such a move might seem. Such actions could only encourage precisely the contingencies we most fervently wish to avoid—either a return to military confrontation in Europe, which could only follow a period of extremely uncertain, and thus dangerous, relations between East and West, or the emergence of an even more threatening situation of widespread violence and political chaos.

Individually, and collectively, the members of the Alliance must develop a conception of how they would like to see the situation in Europe evolve. Such an idealistic "vision" of European politics and economics can serve as both a long-term goal and a guide to near-term actions. In addition, though, they must define a realistic set of policies to navigate through the present. Such policies must not only aim to build a future security regime in Europe, but must hedge adequately against the emergence of untoward events in the current transitional situation. It would be tragic if, in their haste to achieve an ideal, the members of NATO prematurely undermined the structures and policies that have defended their interests for so long, and so well.

What is needed, in short, is a prudent and comprehensive plan encompassing the diplomatic arrangements, economic policies, military strategies, force postures, and approaches to arms control negotiations that would best facilitate the achievement of the Alliance's long-term goals. The plan must spell out the steps of a continual, and decisive, progression over time toward political reconciliation, economic renewal, and measures of military disarmament and stabilization. Simultaneously, however, it must incorporate practical measures to protect against the risks that threaten the currently favorable trend of events.

We are a group of American legislators, retired diplomats, military officers, and civilian defense officials, and private citizens, most of whom have had considerable experience in government and, specifically, in European affairs. We believe that the current situation requires all Americans to think deeply and carefully about the future of Europe. U.S. involvement in European political, economic, and military affairs is not a favor granted by the United States to the Europeans; history has taught that a considerable degree of American participation is essential to our own vital interests.

In particular, it is timely to consider how the U.S. government, together with its allies, can act to ensure favorable long-term results of the current process of change. Of key importance among such actions will be modifications of the roles and missions played by different states within the Alliance. Just as NATO's outwardly directed policies must adapt to the new political-military-economic realities, the current situation provides a welcome opportunity and a clear necessity to adapt the Alliance's internal organization, responsibilities, and weight in decisionmaking to the anticipated strengths and needs of the member-states.

In the remainder of this report, we sketch the key elements of a comprehensive approach to European security—an approach that can both achieve long-term ideals and avoid near-term dangers. We offer these proposals as the basis for discussion and debate within the United States, in the hope of contributing to the formation of a national consensus that can sustain an enlightened policy for as long as necessary.

ENSURING A SUCCESSFUL TRANSITION TO A NEW SECURITY REGIME IN EUROPE

Despite the dramatic changes of the past six months, much remains to be accomplished before peace and reconciliation can be guaranteed in Europe. The obstacles are many and powerful—obstacles rooted in the hatreds and violence of the past, in the honest clash of opposing interests in the present, and in the unknown problems that may emerge in the future. We believe that the United States, together with its NATO allies, should work diligently to transform the security regime in Europe, but we believe strongly that they must do so within a framework in which the West's security would be protected should any contingency divert the current trend of events.

Obstacles to the establishment of a new security regime include not only the risks and hazards previously outlined, but also the sheer magnitude of the task. Designing, negotiating, and implementing a new system for guaranteeing the peace and stability of Europe and North America will require an extensive collaboration on the part of all the countries concerned. Establishment of a new security order alone, moreover, will prove insufficient for securing long-term stability. Just as important, if not more so, will be coordinated actions to promote economic integration and long-term political cooperation.

The rapid pace of change will not allow for the construction of new institutions custom-tailored to the new realities. Instead, existing institutions must be given new responsibilities and be adapted to the evolving situation, a conclusion shared by Secretary of State James Baker. His call in late 1989 for a "a new architecture for a new era" constitutes a valuable starting point for confronting the challenges ahead. Among other things, such an architecture must encompass revised roles and missions for NATO, the European Community (EC), and the Conference on Security and Cooperation in Europe (CSCE).

Among the Western Allies, the task of managing the transition to a new security system must fall to NATO. The Alliance has the established procedures, the experienced bureaucracy, and the knowledge of past patterns of successful multinational actions, to make possible a smooth transition. Even as the continuing erosion of the Soviet Union's military power reduces the role of Western military power, NATO's effectiveness as a political organization to coordinate Western security policies can and should be enhanced.

NATO can serve in this role, moreover, regardless of the fate of the Warsaw Pact. A voluntary association of democratic nations, NATO was formed well before the Soviet Union formalized its control of the armed forces of Eastern Europe through the Warsaw Pact. It could usefully survive well past the point when the reassertion of democracy and national independence in Eastern Europe leads to the Pact's demise. The two organizations should not be linked.

The fundamental changes underway in Eastern Europe and the Soviet Union mean that NATO's continued relevance can no longer be taken for granted, however. As we have illustrated, member nations are already tempted to act unilaterally, or to shift their attention to other multinational organizations. NATO's relevance can be maintained only so long as its members recognize a common interest in acting in concert to ensure a successful transition, by guiding,

rather than responding, to events. If the process is implemented properly, NATO's role would be to help sustain a security environment in which the aspirations of the peoples of all nations for freedom, peace, and economic progress can be fulfilled.

So long as political and economic changes continue in favorable directions, NATO's efforts should be concentrated on the achievement of gradual, but far-reaching reductions in both conventional and nuclear forces in Europe. While some reductions might initially be taken unilaterally, they eventually should be codified in, and verified through, the provisions of negotiated agreements. While no verification scheme can be fool-proof, the establishment of procedures for effective monitoring of the size, structure, and equipment of military forces that remain in Europe, as well as constraints on their readiness and posture, can help to build the confidence of all states that new military threats are not emerging.

As is now its stated goal, the Alliance should seek to conclude the first CFE agreement by the end of 1990, with the limits specified by the Treaty to be achieved within two years. Talks on short-range nuclear forces should begin shortly thereafter, with the goal of achieving reductions to equal low ceilings within a year or two.

So as to establish guidelines for both negotiated and unilateral reductions, thus facilitating rapid progress after the first CFE agreement, the members of the Alliance should immediately take up the questions of the minimal forces desired to be retained at the end of the arms control process, as it can now be foreseen, and of the rough stages necessary to reach those lower levels. Many questions will have to be answered: How should cuts in forces be apportioned among the members? What military strategy might be effective should conflict erupt as forces decline in size? What changes in the force structures of the key members would best support such a military strategy? Should there be a continuing role for U.S. and Soviet forces in Central Europe? How can viable defense industries and research organizations be retained at substantially lower levels of defense spending? These and many other questions will have to be studied and consensus reached among NATO members.

Special problems are attached to nuclear forces, where the beliefs and interests of the nuclear powers sometimes run counter to those of their allies. While very substantial reductions in nuclear forces are no doubt feasible in the new political climate, and especially as conventional force levels decline, enthusiasm for the abolition of nuclear forces must be tempered by recognition that conventional parity alone cannot guarantee security, as we evidenced numerous times in Europe before 1939. Some level of theater nuclear forces must be maintained, at least through the transitional period. At the same time, the nuclear powers must take account of the changed political situation in any decisions on the required capabilities and deployments of nuclear forces.

The European Community also could play important roles during the transition to a new security regime in Europe, depending upon the desires of its member states. In the future, as it develops politically, the EC might also play a security role, but in the meantime it could prove invaluable for coordinating Western public and private economic aid and investment for Eastern Europe, as well as for promoting the process of economic integration. Moreover, as part of the redistribution of roles, authority, responsibility, and burdens within the Atlantic Alliance that might be considered in the new circumstances, there is a need for closer policy coordination among groupings of European nations that do not include the United States. If its members so choose, the European Community could play a greater part in bringing about such intra-European policy coordination on security questions.

If currently favorable political trends continue, a promising possibility is that, over the long run, a single organization encompassing all the nations of Europe and North America might be established to oversee the new security regime. Its primary purpose would be to establish a broad political process whereby the divisions of Europe could be healed and the new security regime sustained. Among other things, the new organization should have the functions of continuously verifying strict compliance with all arms control and political agreements among the members, of resolving any disputes that arise among its members with respect to these agreements, and of monitoring the international situation to identify threats to the peace before they get out of hand.

The establishment of such a comprehensive security organization for Europe and North America would not necessarily imply the disestablishment of NATO. Whether or not NATO itself exists indefinitely, moreover, the Western nations almost certainly will want to maintain an organizational structure through which they can coordinate policies in the new comprehensive security organization.

It would be logical for the Conference on Security and Cooperation in Europe to become the new comprehensive organization. The CSCE already includes all relevant states, and its mandate already incorporates the economic and human rights considerations so vital to ensuring a successful transition to a new security regime. The CSCE would have to be developed considerably to play this new role, however, as it now has no permanent structure, no headquarters, and no secretariat. The meeting of the CSCE in the Fall, now planned to follow completion of the Phase One CFE Treaty, would be a logical time to begin discussing how to modify the organization so that it could serve these broader functions.

It would be left to the new organization, whether an outgrowth of the CSCE or not, to build further on the political aspects of the new security regime in Europe and North America. A rigid time table should not be established for such a transition, but a plan of action should be set in motion, with milestones to mark progress, keyed to the favorable evolution of economic and political relationships, and the achievement of democracy and respect for human rights in all nations. The organization and distribution of roles, responsibilities, authority and burdens in the new organization would have to be developed as it took on these expanded functions.

As part of this broader process, the new organization could also facilitate formal international acceptance of the unification of Germany within the boundaries established following the Second World War. Unification is now being carried out on a de facto basis, as a rapid process involving primarily the two German states, in which common political, economic, and social institutions are being built from the ground up. This process may be completed, more or less, within the next year or two.

In the end, though, German unification must be recognized formally by the nations of Europe and North America, and particularly by the Four Powers, in order for the postwar arrangements to be transformed appropriately, for decisions to be made about the troops now stationed in East and West Germany, and for a new security regime to be put in place. Affirmation of the permanence of the postwar boundaries, by all German political leaders, would greatly facilitate this process. The existence of a comprehensive organization charged with monitoring the arms control agreements placing tight constraints on the size and activities of the military forces of all nations, and of resolving disputes about their implementation, could further help to reassure all of Germany's neighbors that the new security regime would not suddenly be overthrown.

IMPLICATIONS FOR NEAR-TERM U.S. DECISIONS ON TROOPS IN EUROPE

The debate on U.S. policy toward Europe, in particular on the desirable size and composition of American forces on the continent, is becoming more intense. The debate has been, and no doubt will continue to be, driven as much by budgetary pressures at home, as by changes in the Warsaw Pact. As Eastern Europe grows more independent, Warsaw Pact forces grow smaller, and the prospect of Soviet-sponsored invasion of Western Europe grows ever more remote, the fiscal benefits of unshouldering the burdens of the Cold War will tempt more Americans.

Surely, a reexamination of U.S. policy and military commitments is in order. The reexamination should use as its criterion, not the Cold War standard of the forces necessary to contain the Soviet threat as then evisaged, but a new measure of the level of forces required to undergird the peace and stability of Europe during a potentially protracted period of transition. This is the fundamental U.S. interest. A continued American military presence not only can help to make possible continued progress toward democracy and reduced armaments in the East, but can simultaneously help to ensure that neither the Soviet Union nor Germany begin to perceive the other as a threat, and thus to increase its own armaments.

An understanding that Europe's freedom, national integrity, and peace were essential to America's security served as the basis for American involvement in this century's two world wars, as well as for the deployment of U.S. troops in Europe for the past four decades. This understanding is no less valid now than before the 1989 revolutions in Eastern Europe, notwithstanding the greater difficulty of maintaining a national consensus behind it.

None of this is to say, however, that reductions in American forces in Europe cannot, or should not, be made. The issues pertain to the context and extent of withdrawals; that there will be withdrawals is already beyond discussion.

As an initial step, it is highly desirable to complete the negotiations underway in Vienna for a first-phase agreement on conventional armed forces, including an explicit limit on U.S. and Soviet troops stationed in Europe. President George Bush's proposal of a 195,000-person ceiling on each of the great powers' forces in the central region strikes us as a reasonable immediate objective of U.S. policy. If the CFE phase-one agreement could be concluded before the end of the year, which seems achievable, it could be implemented by the end of 1992.

This would mean a reduction and demobilization within the next 33 months of roughly 80,000 troops; the equivalent, perhaps, of 1⅔ divisions and 4 air wings. Annual savings could reach $10 billion once the cuts were fully implemented.

Withdrawing U.S. forces in the context of a negotiated agreement has a number of advantages. It makes clear, for example, that the American cut-back is a response to reductions in the threat posed to the United States and its allies in Europe, not a capricious action motivated by budgetary considerations. As the agreement specifies bloc-wide ceilings on various types of equipment, as well as on U.S. and Soviet troop levels, it requires the allies to consult on the apportionment of the reductions made possible by the treaty, and to coordinate their respective national actions so as to maintain a coherent military posture. Unilateral decisions determined in the absence of such consultations would have the potential of both crippling the alliance's overall military capabilities and of introducing new sources of political conflict among the allies.

Completion of the Phase One CFE Treaty also will lock in the Soviet Union's commitments to reduce its armed forces. While there can be no guarantee that a future Soviet regime might not throw out the agreement and rebuild its armed forces, the fact of the agreement provides some greater protection than do unilateral commitments. The direct violation or sudden abrogation of a ratified international treaty can result in serious international political costs, which even conservative Soviet regimes have been reluctant to incur; unilateral declarations of intent can be changed virtually without cost.

Moreover, completion of the Phase One CFE agreement will make perfectly clear the extent and composition of Soviet force reduction commitments. As was demonstrated with respect to President Gorbachev's December 1988 announcement of unilateral force reductions, such statements leave much to the imagination. Completion of the Phase One CFE Treaty would establish an extensive verification system to monitor changes in conventional forces on the two sides. This will make it possible to verify not only implementation of the CFE Treaty itself, but also to determine if any future changes in the USSR's force posture in Europe, whether announced unilaterally or resulting from a second-phase CFE agreement, were being implemented faithfully.

For all these reasons, we strongly urge the administration to show the flexibility necessary to complete the Phase One CFE agreement before the end of 1990 and to implement it by the end of 1992. We urge the Congess, at the same time, to eschew demands for unilateral reductions in U.S. forces in Europe prior to completion of the CFE accord, to move rapidly in considering ratification of the Treaty, and to refrain from mandating additional reductions in U.S. forces in Europe during the period in which the Treaty is being implemented.

IMPLICATIONS FOR THE U.S. MILITARY POSTURE IN EUROPE OVER THE LONGER TERM

We believe that the United States can look forward to the possibility of further force reductions beyond those mandated by the Phase One CFE Treaty. These additional reductions could result from the negotiation of new phases of the CFE Treaty, or they could result from unilateral actions, assuming the continued existence of the verification regime established by the Phase One agreement. In the case of the latter, any proposed unilateral cuts should be discussed with the NATO allies well before firm decisions have been reached. All of the allies should coordinate any unilateral force reductions so as to maintain a coherent and effective alliance-wide military posture, even as overall capabilities are reduced.

Decisions regarding additional withdrawals of U.S. forces should be made with careful attention to the impact of such actions on the prospects for a more stable European order. We believe that in consideration of fundamental American security interests, the United States should continue to play a security role in Europe for the indefinite future. We believe that this security role, moreover, should include continuation of the United States' nuclear guarantee, as well as the maintenance of a substantial number of U.S. troops on the continent, as long as events in the USSR remain unsettled or potentially threatening. Both the size and composition of U.S. troops that should remain in Europe, however, and the weapon systems required in the theater to implement the nuclear guarantee, are questions requiring additional study.

Continued American participation in European security affairs would have a stabilizing influence on any transition to a new security order, and could do much to relieve anxieties about possible risks in the new situation. In contrast, precipitous unilateral withdrawals of large number of troops could endanger European stability while greatly reducing American influence. In the long run, the creation of a stable, secure, and undivided Europe will represent the greatest dividend of peace. Deeper reductions in U.S. defense spending can follow, both in the course of such a process, and as a natural result of such an outcome, but the two processes must be coordinated closely.

Any residual American force left on the continent would have the important political function of representing the continued American interest and security guarantees, as well as the key military function of hedging against contingencies. Given the dramatic changes taking place in Warsaw Pact armed forces, however, the United States may wish to seek greater specialization in the military roles played by NATO members. U.S. military commitments should probably concentrate on nuclear and tactical air missions, and on the maintenance of high quality reserve ground and air forces. It may not be necessary for the United States to deploy active armored forces in Europe to fulfill its specialized functions. If sufficient mobilization capabilities were retained in the United States, perhaps with some equipment stockpiled in Europe, and an expandable basing infrastructure retained on the continent, emphasis in selecting the units to remain in Europe could be placed on intelligence, command and control, administration, planning, and logistical functions. The point would be to retain a capability to closely monitor the political and military situation, and to respond quickly if the situation began to change in ways which suggested the desirability of re-introducing larger numbers of American ground forces.

With respect to the nuclear guarantee, the ultimate enabling weapons will remain those systems that are part of the U.S. nuclear deterrent—land-based ICBMs, submarine-launched ballistic missiles, cruise missiles, and long-range bombers. Given the evolving political situation, however, attention has to be paid to the missions, number, and structure of theater nuclear forces and, particularly, to the roles of shortrange systems—including nuclear-capable artillery, air-delivered ordnance, and short-range missiles. These issues will have to be taken up soon, moreover, as pressures to began negotiations on short-range nuclear forces shortly after conclusion of the Phase One CFE agreement are likely to prove irresistible. Given this situation, and the firm opposition of West Germany to deploying new short-range missiles, it strikes us that the funds requested in the fiscal year 1991 budget proposal for the Lance missile modernization program would be better spent elsewhere.

If Soviet military power continues to decline and democracy continues to take hold in Eastern Europe and within the Soviet Union itself, it will become increasingly difficult for the administration and congressional leaders to sustain the political support necessary to carry out the types of policies, envisioning gradual, and largely negotiated, withdrawals of U.S. forces from Europe, advocated in this report. But despite the likelihood of problems, the game is worth the candle. With clear time-phased goals as to where the process should take us, and with sufficient attention on the part of the highest political authorities to ensure both that momentum is maintained and that the process is conducted in an orderly and responsible way, it is more likely that the necessary political support will be forthcoming.

Program Note: The Johns Hopkins Foreign Policy Institute with the support of the Carnegie Corporation of New York and the John M. Olin Foundation has assembled a group of distinguished American legislators, retired diplomats, military officers, and civilian defense officials, and private citizens to study the future of the Atlantic Alliance in light of the revolutionary changes now sweeping Eastern Europe and the Soviet Union. This interim report reflects the view of the group that the pace of change currently taking place requires all Americans to think now about the future of Europe and the role of the United States in preserving its peace and stability.

Mr. COHEN. Mr. President, I thank the President, and I yield back the remainder of my time.

The ACTING PRESIDENT pro tempore. The majority leader.

TIME LIMITATION AGREEMENT—S. 1109

Mr. MITCHELL. Mr. President, I am advised that the time agreement has now been worked out with respect to the vocational education authorization bill and accordingly I will now propound a unanimous-consent agreement that I am advised has been cleared on both sides.

Mr. President, I ask unanimous consent that when the Senate proceeds to the consideration of Calendar item No. 414, S. 1109, the vocational education authorization bill, that the bill be considered under the following time limitations:

Two hours on the bill, the committee substitute and a committee amendment, to be equally divided and controlled between Senators PELL and KASSEBAUM, or their designees; 1 hour

on a Lautenberg community employment projects amendment.

I ask unanimous consent further that no other amendments or motions to recommit be in order, that the agreement be in the usual form; that when all time is used or yielded back, the Senate then proceed to third reading of S. 1109, as amended, after which the Senate proceed to the immediate consideration of Calendar item No. 502, H.R. 7, the House companion; that all after the enacting clause be stricken; that the text of S. 1109, as amended, be inserted in lieu thereof; that the bill be read for the third time; and that the Senate, without any intervening action or debate, then proceed to final passage of H.R. 7, as amended.

Mr. COHEN. Mr. President, this has been cleared with the Republican leadership, and there is no objection.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. MITCHELL. Accordingly, Senators should now be aware that the vocational education bill will be considered by the Senate between noon and 3 p.m. Two votes are possible, one possibly on the Lautenberg amendment and one on final passage sometime between the hours of noon and 3 p.m. So Senators should be aware that votes will occur during that period of time. When we complete action on that, I hope to be in position then to announce to Senators the further measures to be considered today and prior to the recess.

Mr. President, I thank my colleague.

I yield the floor, and I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. REID. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

INTERSTITIAL CYSTITIS

Mr. REID. Mr. President, I rise today to bring attention to a mysterious disease, frustrating and painful to those who suffer from it, and baffling to those involved in treating it. It is estimated that nearly 500,000 Americans, mostly women, suffer from this disease, which is described by some patients as feeling as though there were pieces of glass in their bladders. This disease is known as painful bladder syndrome, or interstitial cystitis. There is no known cause or cure for this disease which is marked by scarring and stiffening of the bladder wall, ulcers or cracks in the lining of the bladder, decreased bladder capacity, a frequent urge to urinate, and pelvic pain. Interstitial cystitis is a difficult disorder to diagnose, treat, and even study, because not all people diagnosed with it experience all of the noted symptoms. The agony experienced, those who suffer from this disease are told, is caused by thousands of pinpoint hemorrhages between tissue layers within the bladder which have begun to scar.

Doctors suspect that interstitial cystitis, or IC, may be an autoimmune disease, an allergic reaction, a scar tissue disease, or perhaps even an infection. A new theory even holds that it is caused by a bladder lining defect.

IC patients' lives are limited because of their debilitating pain. We all sympathize with their feelings of hopelessness, knowing that there is no cure as yet. Until recently it was believed this disease was psychological because there was no physical explanation. A German psychiatric text, of only a few decades ago, reads like this:

> Urgent bladder symptoms without any established organic cause would appear to be a psychosomatic illness usually affecting married women in midlife. The majority of patients manifest serious neurotic disorders such as anxiety neuroses, hysteria, phobia, and depression. Patients have sexual disorders, hysterical personality structure, dominated by Oedipus or phallic problems * * *.

Such medical literature was, in effect, telling ICC patients that there was really nothing wrong with them—that they were really just crazy.

The credit for raising public awareness of IC goes to Dr. Vicki Ratner, the founder of the Interstitial Cystitis Association. Dr. Ratner is an orthopedic surgeon. She also suffers from IC. Dr. Ratner likens a day at work to trying to operate on someone when you've got an abcessed tooth. Before the founding of this association 5 years ago, the scientific and clinical community were largely unaware of the magnitude of this disease, both in terms of the numbers of people suffering from it, and the incredible pain caused by it.

I am pleased to report that the National Institutes of Health is working closely with the Interstitial Cystitis Association to stimulate increased research interest in IC and to gain a better understanding of what patients with this disorder are forced to live with. NIH has established a plan for a research approach to the causes, diagnosis, and treatment of the disease. Now money is needed to develop this research.

IC not only afflicts large numbers of people in the United States, but also has adverse effects on our economy. Studies have shown that the economic impact of this disease is $1.7 billion each year in lost productivity, wages, and medical costs.

Mr. President, I am confident that with adequate funding for interstitial cystitis research, results will be no less than miraculous. For those who suffer chronic, enduring pain, their relief will be no less than miraculous. So let us work to make this miracle a reality.

I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BOND. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. ADAMS). Without objection, it is so ordered.

VLADIMIR RAIZ

Mr. BOND. Mr. President, yesterday I had the opportunity to shake hands with a man whom I have been waiting years to meet. Frankly, I did not expect to get that opportunity as soon as I did, a fact which made it all the more gratifying. That man was Vladimir Raiz, who until last month had the dubious distinction of being the Soviet Jew longest denied permission to emigrate from the Soviet Union.

Since I first came here in 1987, I have been working on Mr. Raiz' behalf. I have written letters to President Gorbachev and other Soviet officials urging that Mr. Raiz be allowed to leave. I have written Presidents Reagan and Bush urging them to raise Mr. Raiz' case in talks with the Soviets. And I have made many statements on this floor about the plight of Mr. Raiz and his family. Many of my colleagues have taken similar action on behalf of Mr. Raiz and others in his situation. These are important efforts and it is critical that we continue them until every refusenik in the Soviet Union has not only been given permission to leave, but also has been given the opportunity to leave.

The case of Vladimir Raiz illustrates the ridiculous lengths to which the Soviets have gone to prevent Jews from leaving the Soviet Union. Mr. Raiz, a molecular biologist, worked in a government laboratory in the 1960's. He never held a security clearance and he never worked on classified projects. Yet in 1973, when he first applied for permission to emigrate—years after his work for the government had come to an end—his application was denied on the grounds that he possessed state secrets. Despite the fact that that charge was ludicrous on its face, the Soviet Government maintained that position for 17 years—granting Mr. Raiz permission to emigrate just 2 weeks ago.

I like to think I played some role in gaining Mr. Raiz' release. Just a month before he was allowed to leave, I met with Soviet Ambassador Dubinin who spoke to me of the urgent need for the Senate to vote to repeal the Jackson-Vanik amendment.

I told the Ambassador that although I understood his concern, I could not vote for repeal or waiver until all Soviet Jews who wish to leave are given permission to leave. When he answered that all who want to leave now can, I raised the case of Vladimir Raiz. Ambassador Dubinin said he would look into the case; and a few weeks later Mr. Raiz was given permission to leave.

As we celebrate the fact that Vladimir Raiz and his wife Karmella will this year celebrate Passover in freedom in Israel, we must not forget the many other refuseniks who remain in the Soviet Union—denied permission to leave year after year, and now forced to live with the very real fear of rising anti-Semitism and increasing threats of violence. We also must not forget the hundreds of thousands of Soviet Jews who have been granted permission to leave but who cannot do so because the Soviets, bowing to Arab pressure, continue to refuse to allow direct flights between Moscow and Tel Aviv.

These are grave issues—issues that we must not overlook in our rush to support Gorbachev's moves toward openness and restructuring. I have raised this concern with the administration and I intend to continue to pursue it.

Yesterday, Vladimir Raiz told those of us who joined him at the White House that the Jewish people give thanks for their release from bondage 3,000 years ago. As the holiday of Passover begins, I believe that all of us—Jews and non-Jews alike—should reflect upon the situation that now exists in the Soviet Union, the need to ensure that this group of Jews—like their forefathers in ancient times—must be allowed to leave and to live in freedom.

ALAN WOODS

Mr. BOND. Mr. President, I have come to the floor several times in the past year to talk about Alan Woods. Not only because he was my friend and his death from cancer last June was a loss to me and all who knew him, but also because he left unfinished the critically important work he had begun as Administrator of the Agency for International Development to reform our foreign assistance policies, and I want to make sure that we follow up on his efforts. That we make sure his work was not in vain.

It was Alan's belief that our international assistance policies can and should work to bring to developing countries the benefits that we in the United States enjoy. He believed that the way to do this was by promoting economic development and private enterprise in these countries.

In his too short tenure at AID, Alan did much to increase AID programs aimed at promoting sound economic development. He also worked to bring common sense to our foreign assistance policies. His report, "Development and the National Interest," highlighted many of the problems which exist in our aid laws and make positive suggestions for improvement. A recent article by Morton Kondracke in the New Republic discusses Alan's work, and I ask unanimous consent that it be included in the RECORD at the end of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

This week in the Agriculture Committee, we began mark up on a bill which is the first comprehensive revision of our food aid laws in 25 years. The bill introduces common sense back into the process by reducing bureaucracy, eliminating redundancy and reorienting the system back toward its basic goals of feeding the hungry and helping people to improve their economic situation.

It is the kind of bill which Alan would have supported. I hope my colleagues will support it when it comes to the floor and I hope my friends in the House will see fit to approve it as well.

But we must remember it is only a first step. We must make all our foreign assistance programs work in all ways that will allow recipient countries to build their economies, create jobs and improve quality of life for all citizens.

EXHIBIT 1

[From the New Republic, Feb. 26, 1990]

HOW TO AID AID.—THE ANSWER: REAL CAPITALISM

(By Morton Kondracke)

The Senate Republican leader dropped a bomb on the foreign aid status quo in January by suggesting a five percent cut in funds for Israel, Egypt, Turkey, Pakistan, and the Philippines in order to provide $330 million more in aid for Eastern Europe and Panama. But the bomb did not explode, nor is it likely to. Foreign aid needs drastic reform in order to stimulate economic growth in the Third World and truly benefit poor people. Bob Dole's approach—cutting Israel to help Hungary—had little to do with systemic reform. It did do this much, however: even though foreign aid is perennially unpopular in Congress, it stimulated Democratic leaders to declare almost in unison that the aid "pie" should be expanded, with new money coming from the defense budget, especially from funds now allocated to defend Western Europe.

Dole was trying to take a small step toward another, worthier goal that the Bush Administration also has been pushing: getting Congress to stop earmarking funds for a few favored countries, thereby forcing other needy nations to make do with little aid, or none at all. In this too he has almost certainly failed. A top official of the Agency for International Development (AID) said he was told by a Senator, "There are only two reasons to be on the Senate Foreign Relations Committee. One is to get on television when there's a foreign crisis. The other is to provide goodies for your friends in the Third World."

Congress specifically directs where 92 percent of all U.S. military aid is to go, 98 percent of all Economic Support Funds (free grants for budget support), and 50 percent of all development funds. As a result, countries without lobbies or influential legislators to protect them are left with far less money than they need and deserve, often close to nothing. Examples this year include Jamaica, Honduras, Senegal, the Sudan, Chad, and Ecuador. The Administration thought about invoking special Presidential authority to shift funds in the interests of national security but feared Congress might take the authority away. So the fiscal 1991 budget shows no signs of changing the status quo.

Whatever good Dole intended to do was undermined by the perception that his ulterior motive was to target Israel, the biggest benefactor of U.S. aid. Israel gets $3 billion per year out of the $15 billion aid total (followed by Egypt, with $2.1 billion). The fact that the Administration generally supported Dole's idea led to suspicions (also stoutly denied) that Secretary of State James Baker was sending a message to Israel to be more forthcoming on the Mideast peace process. The Israel lobby is aroused and has the added force of a meritorious case: Israel needs money to absorb tens of thousands of Jewish émigrés from the Soviet Union that the United States no longer will take in. Meanwhile the Arab threat to its security has not been affected by the events in the East bloc, since Syria was substantially resupplied before the great change.

Pro-Israel lobbyists surely will help win extra money for Eastern Europe and Panama, but money alone will not solve the basic problems of American foreign aid. As recommended by one Administration and one Congressional task force last year, there needs to be a refocusing of the program toward a few specific goals, clarity at AID about accomplishing those goals, and less micro-management by Congress.

Making American aid more efficient actually would be the best way out of the money trap, better than robbing some countries to help others or simply increasing the aid budget, which hasn't enough popular or Congressional support to be a long-term option anyway. Unfortunately, the reform cause lost its most vigorous advocate last June when AID Director Alan Woods died of cancer at age 43. His post is only just being filled on a permanent basis with the nomination of Ronald Roskens, former president of the University of Nebraska, whose basic views on aid are still not clear.

Woods left behind a comprehensive report detailing AID's failings, including the fact that not a single country eligible for U.S. aid has graduated into self-sufficiency in nearly 20 years and many have become poorer. In part, Woods said, Congress has mandated too many purposes for the agency. To name a few, it's legally required to advance America's strategic interests, win friends for the United States in the developing world, build democratic institutions, feed the hungry, counter initiatives of the Soviet Union, dispose of U.S. agricultural surpluses, promote private-sector growth in the Third World, improve education, achieve health for all by the year 2000, and strengthen both the American land grant college system and the historically black colleges and universities.

In their similar report last year, Representative Lee Hamilton and Benjamin

Gilman said that AID had been given 33 separate objectives and 75 "priorities" by Congress, which also has imposed 288 individual reporting requirements—second only to the number levied on the Defense Department, which has a budget of $300 billion compared with AID's development budget of $5 billion. Out in the developing world, AID field workers complain that they spend so much time filling out reports for Congress and Washington headquarters that they have only an afternoon a week to help the poor. The first priority of AID bureaucrats everywhere is always to spend this year's money so that next year's budget doesn't get cut.

Woods had a vision: to convert AID from a welfare agency easing the woes of the poor—"baby washing," some of his allies call it—to a promoter of economic growth. Woods was deeply influenced by the work of Hernando De Soto, a former Peruvian banker who advocates a combination of political democracy and economic empowerment of the so-called "informal sector" in Third World countries. He means the hard-working peddlers, tradesmen, and other small-scale, just-get-by private "businessmen" who often account for 60 percent to 70 percent of a country's real GNP but are not legally recognized by the government, have no access to credit or insurance, and are unable to incorporate and share the risk of doing business.

Many Americans think the economies of Latin America are "capitalist." De Soto says they are really "mercantilist." He said recently on the PBS show I moderate, "American Interests," that "what we've traditionally had in Latin America is the possibility of doing business for only a few. . . . It's crony capitalism that involves, on the part of the businessman, a lot of politicking, getting through heavy regulation, often bribes." According to De Soto, "Of 175 countries in the world, there are only 21 market economies and open democracies. What we've discovered is that in most of Latin America most people work outside the law. They are doing the same things we're doing, but on a smaller scale, inefficiently, with low productivity—selling, buying, producing, manufacturing, doing agriculture, building furniture, weaving carpets, making eyeglasses. They don't have the advantage of economies of scale, they do it with very little credit, or loan-shark credit."

De Soto's book, "The Other Path," about Peru, is a hot seller among developmentalists all over the world. He's working on a sequel dealing with Eastern Europe and other underdeveloped countries, but his agenda is clear: the best way to fight poverty is to give peasants, squatters, and "informal" workers legal title to their land, which will give them collateral and the chance to expand. A concomitant, he says, is that "democracy" means not just having elections, but giving citizens and the legislative branch the opportunity to affect what the elected executive is doing and to deregulate the economy for entrepreneurship large and small.

Woods saw to it that De Soto's Institute for Liberty and Democracy got $2 million a year to do research and spread the word. He also managed to redirect AID priorities so that programs stimulating private-sector development doubled as a portion of AID's development budget, from ten percent to 22 percent of the total. Woods was convinced that more countries needed to follow the models of Taiwan, South Korea, and other East Asian nations where per capita income has soared because of private enterprise development.

Woods died, though, before he could convert the AID bureaucracy to the idea of making growth its top condition aid to Third World countries on their willingness to adopt pro-growth economic policies. Despite directives from on high, AID directors for African countries spend much of two annual conferences debating the morality of private enterprise. And cold war thinking has sometimes prevented the Administration from telling a strategic ally—say, Zaire—to cut corruption and excessive government regulation or do without U.S. assistance.

Hamilton and Gilman too recommended that economic growth promotion become one of AID's top priorities, along with just three others: environmental protection, poverty pluralism. Hamilton called for a reduction of earmarking and of onerous reporting requirements to Congress.

Unfortunately, the Woods and Hamilton-Gilman reform ideas are almost as dead as Dole's suggestions. The Senate has not even considered reform. Meanwhile, a vigorous, well-meaning citizens' lobby, RESULTS International, flooded Congress with mail and editorials last year and got the House to pass the Global Poverty Reduction Act, which adds legal requirements for AID to reduce infant mortality, female illiteracy, and the general poverty level of Third World countries by 50 percent during the 1990s. Woods' allies at AID say poverty reduction deserves to be a main goal, but that to divert resources specifically to infant health and female literacy is to treat symptoms of povertly, not causes.

There ought to be a way for RESULTS and AID to cooperate and not to fight, RESULTS has what AID does not—a grassroots following for foreign aid, including 100 chapters in the United States that hold three meetings a month, one by national telphone hookup. But the director of RESULTS, anti-hunger activist Sam Harris, aged 43, doesn't trust a Republican Administration or AID bureaucrats to truly serve the poor. AID reformers don't trust the bureaucracy either, contending it has a vested interest in the welfare model for foreign aid, not the economic growth idea. And Congress obviously doesn't trust the Administration and persists in micromandating what AID should do.

There is some hope. RESULTS and AID now are fighting over—but may come to terms on—a De Sotoesque idea: providing credit opportunities for tiny enterprises around the world, on the model of the Grameen Bank in Bangladesh, which makes loans of as little as $50 to micro-entrepreneurs and regularly gets paid back. The Administration and Congress so far seem agreed on trying the Woods approach at so far seem agreed on trying the Woods approach at least to Eastern Europe and the Soviet Union.

No one suggests appropriating money for "foreign aid" or "bailouts" for the Soviet Union. What's been offered so far is technical assistance in 12-areas to teach the Soviets how to dismantle state monopolies, set up a budget and taxing system, form private agricultural cooperatives, train bankers, and start up small private businesses. The Administration's new budget calls for $300 million in new funds for Eastern Europe, with the main emphasis on institutional measures to expand private enterprise and trade.

If Congress and the Administration can agree that a shift from state socialism to free enterprise is the only way to prosperity for Eastern Europe, and they have the examples of Taiwan. Hong Kong, and South Korea to show that a shift from mercantilism to real capitalism will produce prosperity, why can't they apply these principles to the rest of the developing world and make them the basis for a reformed foreign aid program? They can, but so far they won't.

Mr. BOND. Mr. President, I yield the floor and suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. CONRAD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

S. 2394—FARM INCOME AND FLEXIBILITY ACT OF 1990

Mr. CONRAD. Mr. President, I am pleased to rise today to join my colleagues, Senator BOB KERREY of Nebraska, Senator TOM DASCHLE of South Dakota, Senator TOM HARKIN of Iowa, and Senator JAMES EXON of Nebraska, in introducing S. 2394, the Farm Income and Flexibility Act of 1990.

We have worked many hours to craft a farm bill which will be good for farmers, good for consumers, and good for taxpayers.

We had four primary goals in developing this legislation: First, restore farm income; second, provide farmers the tools to farm in a more environmentally sound manner; third, provide farmers the flexibility to respond to changing market conditions; and four, to increase our ability to compete in foreign trade.

Of these four goals, farm income is the key. Without a stable, reasonable level of farm income, gains on environmental issues are not possible, flexibility is meaningless, and trade competitiveness is lost.

Mr. President, when I go home to my State of North Dakota, and ask an audience of young people how many would like to continue in farming, the hands go up. Then I ask, "How many of you think you will actually continue in farming?" Virtually no hands go up.

I asked those young people. "Why is it if you love farming, if you love the rural way of life, why are you telling me almost none of you intend to farm?" The answer is consistent, Mr. President. "There is no money in it. We have seen our parents suffer, and we do not want to suffer that way ourselves."

We have been told repeatedly by the Department of Agriculture that we have had record farm income. In the last 2 years I remember clearly hearing the Secretary of Agriculture tell

the American people that we have had record farm income, everything is fine.

Everything is not fine. The record farm income of which they speak forgets about inflation.

Mr. President, when you adjust for inflation the picture is quite different. The chart that I have prepared shows net farm income by decade beginning in 1910 when they first started keeping records. What this chart shows is quite a different picture than what we have been told by official Washington. In fact, this table shows that the decade of the 1980's had the lowest farm income of any 10-year period since they started keeping records in 1910.

Mr. President, I ask unanimous consent that the above-mentioned table be printed in the RECORD at this point.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

U.S. Net Farm Income by Decade 1910–89

[Average per year in constant 1982 dollars]

Decade:	*Billions* [1]
1910's	$51.2
1920's	36.8
1930's	31.1
1940's	65.8
1950's	47.6
1960's	36.2
1970's	41.3
1980's	28.8

[1] Average net farm income.

Source: USDA. Adjusted for inflation by the implicit GNP deflator.

Mr. CONRAD. Mr. President, that is the reality that our farmers face out across the great heartland of America. That is why people are leaving in droves to find income to support their families. That is why for 5 straight years my State has led the Nation in outmigration.

America has to make a decision. Are we going to have a rural part of this country with people in it, or are we going to have the rural part of this country completely denuded of its population and left open for the buffalo? There have been some that suggest a buffalo commons, that we make a big buffalo pasture out of the heartland of America. Does anyone seriously think that is a policy that makes any sense?

The rural communities of this country cannot take much more. Let me give you some examples of how difficult the 1980's have been.

Many of my colleagues have heard me talk about the continuing hard times in North Dakota as a result of 2 years of very deep drought that have replaced the bottom of the barrel farm prices to keep my State in an economic slowdown. The deep economic trouble of my State is due to a sharp drop in average net farm income from the 1970's to the 1980's, a drop from an average of 34,000 a year in 1989 dollars in the 1970's to less than half of that in the 1980's.

It is not just my State that is suffering. It is not just my State that has experienced dramatic declines in real net farm income. Farmers in Illinois lost 53 percent; Indiana's farmers, 65 percent; Iowa's, 51 percent. On and on it goes throughout the rural States. In each of these States average net farm income per farm has dropped to 60 percent or less of median family income in this Nation. We are on the verge of two America's; one urban, one rural; one moving forward, one in reverse. The rural parts of this country are in deep trouble. Rural areas cannot have 10 years of sustained low-farm income without beginning a process of erosion and decline.

Mr. President, I ask unanimous consent that two tables, one showing average net farm income per year over the last three decades, and one showing the net farm income as percent of median family income, be printed in the RECORD at this point.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

AVERAGE NET FARM INCOME PER YEAR IN THE 1960's, 1970's, AND 1980's

States	1960's	1970's	[1] 1980's	Percent decline from—	
				1960's	1970's
Illinois	$2.04	$2.51	$1.19	−42	−53
Indiana	1.22	1.39	.48	−61	−65
Iowa	2.56	2.71	1.32	−48	−51
Minnesota	1.55	2.16	1.17	−25	−46
Mississippi	.87	.80	.40	−54	−50
Missouri	1.17	1.27	.56	−52	−66
North Carolina	1.49	1.50	1.03	−31	−31
North Dakota	.73	1.17	.44	−40	−62
South Carolina	.44	.36	.16	−64	−56
South Dakota	.82	.99	.53	−35	+46

[1] Data for 1989 was not available. Average income for 1980's includes only 1980 through 1988 (9 years).

Sources: "State Financial Summary, 1988, Economic Indicators of the Farm Sector," Economic Research Service, USDA (ECIFS 8–2); "Farm Income Data: A Historical Perspective," Statistical Bulletin No. 740, Economic Research Service, USDA; and "Statistical Abstract of the United States, 1989," 109th Edition, Bureau of the Census, U.S. Department of Commerce.

NET FARM INCOME AS PERCENT OF MEDIAN FAMILY INCOME—1980's

States	Average net farm income per farm (1982) [1]	Percent median family income ($24,736) [2]
Illinois	$12,796	52
Indiana	5,926	24
Iowa	11.892	48
Minnesota	12,188	49
Mississippi	8,333	34
Missouri	4,912	20
North Carolina	13,553	55
North Dakota	12,941	52
South Carolina	5,818	24
South Dakota	14,521	59

[1] Based on number of farms in 1985 according to USDA.

[2] Average median family income for the 1980s is in constant 1982$ and is averaged over the years 1980 to 1987.

Sources: "State Financial Summary, 1988, Economic Indicators of the Farm, Sector," Economic Research Service, USDA (ECIFS 8–2); "Farm Income Data: A Historical Persepective," Statistical Bulletin No. 740, Economic Research Service, USDA; and "Statistical Abstract of the United States" 1989, 109th edition, Bureau of the Census, U.S. Department of Commerce.

Mr. CONRAD. Mr. President, beginning that process is precisely what has happened. And Why? It is happening because of high, real interest rates an overvalued dollar that pushes commodity prices down, and a farm bill which moved in conjunction with the increasing value of the dollar to push farm prices to the lowest levels in real dollars in a half century.

Low-farm income affects all of America, not just the rural areas, because the food industry in this country employs 20 percent of all Americans. When the primary producers are in trouble the rest of the country is also affected.

For example, during the 1970's, gross investment in agriculture averaged over $20 billion a year in constant 1982 dollars. In the 1980's, gross investment dropped to an average of $12 billion. The loss of $8 billion of investment per year resulted in the loss of a quarter of a million off-farm jobs in manufacturing and construction per year.

Let me repeat that. This decline in farm income and farm investment resulted in a loss of a quarter of a million jobs per year in the nonfarm sector; manufacturing, and construction. Those were good paying jobs.

Many farmers survived this period of reduced income by delaying the replacement of used machinery. Because of this, net investment in agriculture has been a negative $4.5 billion per year in the eighties.

Mr. President, I direct your attention to this table. It shows average net farm capital investment per year expressed in 1982 dollars. In the period 1970 to 1974, there was a positive $3 billion; in the period 1975 to 1979, almost $4 billion of net investment in agriculture; the period of 1980 to 1984, a negative investment of $4.6 billion. That was followed by another 5 years of negative capital investment in agriculture of about $4.5 billion per year.

Mr. President, I ask unanimous consent that this table be printed in the RECORD at this point.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

U.S. Net farm investment in depreciable assets

[Average per year, constant 1982 dollars]

	Billions
1970–74	$3.0
1975–79	3.8
1980–84	−4.6
1985–89	[1] −4.5

[1] Values exclude operator dwellings, 1989 value estimated.

Source: USDA, Economic Research Service.

Mr. CONRAD. Mr. President, agriculture is living off the balance sheet. It has been doing so for the last decade, and unless the trend in farm income is reversed, American agriculture will continue its serious decline.

This Nation's policies in the 1980's harmed the American farmer and harmed the millions of U.S. workers who depend on an economically healthy farm sector for their jobs. We can do better in the 1990's. We can improve farm income; we can reduce the

harmful environmental impact of agriculture, and prevent farm budget costs from ballooning out of control.

The legislation we are introducing today will raise farm income by indexing support levels to the cost of production. What does that mean? That means very simply, the price that farmers receive will be increased by the increase in the cost of production that they are experiencing.

Why do that? Because very simply, for the last 2 years, the support farmers have received for their commodities has been below the cost of producing those commodities. No industry, Mr. President, can long survive when it costs more to produce its product than they receive for that product.

Second, this legislation will equalize support for major and important crops, the oats and barley crops.

Third, this bill will implement a program for oilseeds, the fastest growing food market in the world.

Fourth, it will provide farmers the flexibility to reduce costs through environmentally sound crop rotations.

In order to conserve our soil and water, Mr. President, farmers must, first, have an opportunity to earn a decent income and, second, have a variety of profitable crops. This legislation will provide the income and flexibility to allow farmers to be better stewards of the land. Equitable support levels for oats, barley, and oilseeds allows farmers to engage in environmentally sound rotations. That is in the interest of all Americans. The land and water in this country are a precious heritage. It is a heritage that we must preserve and conserve.

Mr. President, for a moment, let me be parochial and refer to the Great Plains. It is extremely important in our part of the country that oilseeds like sunflowers, canola, rape seed, safflowers, and flax be included, as well as soybeans, in the oilseeds program. These oilseeds are not only in growing demand, but provide wheat farmers profitable alternative crops in order to better preserve the environment and reduce input costs.

Finally, let me spend a few moments on the budget issue. The 1985 Food Security Act allowed prices to fall to historically low levels. The effect was not only to harm farmers and those whose incomes depend on agriculture, but to raid the Federal Treasury. Only the droughts of 1988 and 1989, which reduced stocks dramatically and increased prices, saved the Treasury from spending even more.

Price support for agriculture has been cut by 25 percent since 1985 in real dollars. The President proposes to cut support for fiscal 1991 by 20 percent in 1 year. That is simply not fair. He proposes to cut Farm Program spending to less than eight-tenths of 1 percent of the budget, down from our 30-year historical level of 1.4 percent.

Let me repeat that, Mr. President. I said earlier that the farm income of the decade of the 1980's was the lowest of any decade since they started keeping records in 1910.

What is the President's response in the face of those facts? The President's response is to say, we ought to devote eight-tenths of 1 percent of the Federal budget to agriculture when the historical share is 1.4 percent.

Make no mistake, no one is more interested or more committed to deficit reduction than myself. The occupant of the Chair, Senator KOHL of Wisconsin, has devoted himself to deficit reduction in his time in this Senate. We are not asking for our historical share of the Federal budget, 1.4 percent, because we recognize the budget problems of this country. We recognize the crisis, and we are ready to contribute our fair share.

Mr. President, the number that we are offering with respect to this farm bill would be about 1 percent—in fact, less than 1 percent of the Federal budget, again a sharp reduction from our traditional share, but more than the President has put on the plate. Because very frankly, what the President of the United States has offered is inadequate to meet the challenge. Half of the farmers of this country are within 10 years of retirement. Who is going to go replace them? The young people in my State are sending a very clear signal to this Senator: It will not be them. It will not be the young people of the farm families who are out there now, because they cannot earn a decent living. They have seen what has happened to their parents; they are not going to let it happen to them.

Mr. President, we have to make some very basic decisions as a society. What kind of America is it that we want? Do we want an America in which all of the people are in large urban areas? Is that what we want? Or do we as a society want America with diversity and choice? Do we want an America in which there are urban centers that are the centers of commerce and banking? And do we want an opportunity for people to be out in the rural areas of America, providing a diversity of good foods for a hungry world? Those are the kinds of choices we will make when we write the farm bill in 1990.

We will have a chance to decide whether we condemn a generation of people on the land to a future with no prosperity. That is a choice we will have a chance to make. We have worked very hard to construct a farm bill that will provide an opportunity within a reasonable budget, one that makes sense in keeping America a strong competitor in the world.

Mr. President, some may be unaware of this, but we are engaged in a trade war in agriculture in the world economy. I submit to my colleagues, if in the middle of World War II the President of the United States had submitted a budget that cut military spending 20 percent, people would have wondered what could he possibly be thinking. But that is what this President has done with respect to an agricultural trade war.

In the midst of the GATT negotiations which could determine the structure of agriculture for decades to come, in the midst of those tough negotiations, at the very time that our European competitors are subsidizing crops at triple world market prices, three times world market prices for soybeans, three times world market prices for sunflowers, two times world market prices for wheat; this administration signals retreat.

This administration says we will not be part of the battle; we will not be sending a tough message in the middle of these negotiations.

Mr. President, that is a mistake. We can cut our Farm Program to the bare bones as has been proposed by this administration, but that will only reward the European Community for their aggressive, subsidized Export Program.

If we allow that to happen, we will rue the day when America, which has led the world in agricultural production, failed to take up the challenge and allowed our competitors to steal those world markets.

We cannot afford to send that message to our trade adversaries at this critical juncture in the GATT negotiations. We cannot afford to force our farmers to live off past investments until some unknown future date when another GATT round may be successful in reducing EC subsidies. This legislation responds to the challenge from the European Community and others by allowing our farmers to compete.

We have many difficult decisions to make this year concerning the budget, farm programs, education, drugs, homelessness, and many other issues. One choice we must make is to keep our agricultural industry strong.

Mr. President, let me just conclude by repeating that the people in the agricultural heartland of America are hurting. They are hurting because they do not have sufficient income to continue. That is the hard reality.

In my State, 40 percent of agricultural producers are at risk of failure; 40 percent, Mr. President. If we as a society allow the heartland of America to decline, we will someday be on the floor of this Senate proposing a massive, ambitious rural redevelopment program at a cost of tens of billions of dollars, make no mistake about it, because we cannot be a nation that has its population located on the east coast and the west coast with the heartland bare. That makes no sense.

Mr. President, we are going to make the most profound decisions about the future of America when we write the 1990 farm bill. I hope that our colleagues pay close attention. It is not like it was in 1986, when the Federal program spending was at $26 billion, and we were at a historical high. Those days are gone.

We are now talking about expenditure levels of less than half of that, and we are coming off a decade of the lowest farm income since recordkeeping began in 1910. We have to choose.

Are we going to make sure there is a rural way of life in the future of America? Are we going to turn our back on a part of the country and a way of life that has been central to the strength of this democracy?

I ask unanimous consent to include four tables illustrating the agricultural situation in the proper places in this statement.

Thank you, Mr. President. I yield the floor and suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. GRAHAM. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXTENSION OF TIME FOR MORNING BUSINESS

Mr. GRAHAM. Mr. President, I ask unanimous consent that the time for morning business be extended until the completion of my remarks and the introduction of legislation.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Florida is recognized.

Mr. GRAHAM. I thank the Chair.

(The remarks of Mr. GRAHAM pertaining to the introduction of S. 2435 are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

LATIN AMERICA

Mr. GRAHAM. Mr. President, there has been considerable concern recently that the exciting events in the Soviet Union and central Europe will divert United States' attention for the challenges that exist within this hemisphere. As an anecdote to that concern, I would like to have printed in the RECORD a very perceptive article which appeared in the Wall Street Journal of March 20 of this year by Mr. Peter F. Drucker on the subject of helping Latin America and helping ourselves.

I ask unanimous consent to have printed in the RECORD, Mr. Drucker's article.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

HELP LATIN AMERICA AND HELP OURSELVES

(By Peter F. Drucker.)

Who needs Latin America? "We don't," most American businessmen would say. But it is the wrong answer, Latin America, rather than Japan, holds the key to the U.S. trade deficit.

Whatever may be wrong with American industry—and many things are surely wrong—it is not "lack of international competitiveness." Since the overvaluation of the dollar was corrected nearly five years ago, U.S. industry has turned in a stellar performance, especially in exporting to Western Europe and Japan. A host of industrial exporters—South Korea, Brazil, Taiwan, Singapore—became bigger players in world trade. Yet the U.S. has regained the share of the world's manufactured goods exports it held before the overvaluation—as large a share as the U.S. ever held except in the immediate post-World War II period.

Nor can the U.S. trade deficit be blamed on "excessive imports." Manufactured-goods imports account for a smaller share of America's GNP—9%—than they do in any other developed country except Japan. And the Japanese are now "outsourcing" at such a furious rate that the import share of manufactured goods in Japan's GNP is likely to match the U.S. figure within four or five years.

What then explains the massive American trade deficit? Its main cause is the collapse of the world's food and raw materials economy in the past decade.

WORLD'S LARGEST PRODUCER

The U.S. is the world's largest producer and exporter of agricultural and forest products, and about one-third of the trade deficit is directly traceable to this collapse in prices and demand. Another third or so is owing to the impact of the raw-materials depression on what traditionally was one of U.S. manufacturers' best foreign customers—Latin America. Indeed in most Latin American countries U.S. imports traditionally accounted for half or more of all manufactured-goods imports. (By the way, most of Japan's export surplus is far less a result of industrial prowess than of the raw-materials depression; Japan—the world's largest raw-materials importer—is the main beneficiary—

The trade deficit will not be eliminated by increasing exports of manufactured goods to Western Europe and Japan. Indeed if Japan removed *all* restrictions to U.S. imports. U.S. exports would at most grow by $5 billion—as against a trade deficit with Japan of $50 billion. And the U.S. will be hard pressed to maintain current export volume with the developed world in the years ahead, when world manufacturing competition is bound to intensity.

We also cannot realistically expect food exports to bounce back. For a few short years ahead there may be sharply increased demand to assuage almost certain famine in the Soviet Bloc, but food relief on a massive scale can be maintained only for a few short years. Yet the U.S. trade deficit cannot continue indefinitely, and perhaps not even for many more years.

The interest payments on the debt due our suppliers already greatly exceed our capacity to earn foreign exchange to service them. While the foreign creditors can convert their dollar claims into U.S. assets—that is, buy American businesses and real estate—and most economists consider this to be harmless and perhaps beneficial, "buying America" clearly will not be tolerated long politically.

There are, in effect, only two ways to cut the trade deficit. In the wrong but traditional way, a very sharp recession cuts domestic consumption by 10% or so. The alternative: a revival of Latin America as a customer for U.S. manufactured goods.

It would be a great deal easier to turn around Latin America than to turn around Eastern Europe, the region on which most attention is focused now. Latin America is home to 300 million people—almost as many as in the Soviet Bloc. In sharp contrast to the Soviet Bloc, Latin America comfortably feeds itself and has a substantial surplus of both food and industrial raw materials. In the larger countries there is an excellent supply of well-trained engineers, entrepreneurs, accountants, economists and lawyers. And they did not have to become moral eunuchs to get an education or to get and hold a decent job.

Nor do the educated people of Latin America have to be "re-educated" to function in a free economy. Until the raw materials depression hit, Latin Americans worked effectively in a market economy and participated in rapid economic growth. And there is enormous pent-up demand for goods of all kinds.

Finally, Latin America, unlike the Soviet Bloc, has an adequate supply of capital. Indeed, Latin America probably has three times as much capital—or more—than it has foreign debt. There is only one thing wrong with it: It is not in Latin America. It has been driven out systematically—and often purposefully—by government policy.

But if the money that is now in Miami and New York, Zurich and Geneva—but also in the mattresses of virtually all but the poorest families in Latin America—could be enticed into productive investment at home, every Latin American nation, save perhaps the smallest and poorest, would have all the capital it needed for rapid economic growth. And the holders of Latin America's capital are willing, and indeed eager, to invest their money at home if only their governments were to stop expropriating savings and investment through inflation and punitive taxation, and were to stop discouraging productive investment through the granting of monopolies to military and governmental enterprises. As a result of these policies, even the shoeshine boys in Buenos Aires and Sao Paulo demand to be paid in dollars.

What needs to be done is clear enough: Stop inflation by turning off the spigot of government spending; dismantle the grossly overstaffed and unproductive monopolies owned by the government or the military (especially in Brazil and Argentina) or by the government's political cronies and the ministers' relatives (especially in Mexico); cut excessive nominal tax rates that discourage honest enterprise, but increase actual tax collection.

That these things can be done, and without political catastrophe, has been shown by two of the smaller countries: Chile under Augusto Pinochet's dictatorship, and (reasonably) democratic Bolivia. And there is now widespread demand throughout the region for a return to sanity.

Mexico has taken some fairly big steps in the right direction, especially in dismantling protection for governmental monopoly industries; the immediate results have been most impressive (including a more than twofold increase in Mexico's purchases from

the U.S.). The first priority of the new government inaugurated in Brazil last week is to sell more than a hundred unproductive, overstaffed and loss-making government enterprises. And the albatross of the foreign debt that the Latin American countries incurred when the raw-materials economy collapsed has largely been removed—it has been written down in all but legal fiction.

Latin America's turnaround is, in other words, no longer a matter of economics, but largely of the political will. It requires, above all, the backbone not to cave in—as did the governments of both Argentina and Brazil in both 1988 and 1989—at the first protest by a powerful group such as the labor unions or the army. The things that need to be done will at first be painful and unpopular. But within a year they will begin to produce results and to enjoy wide popular support.

But the U.S. too, has a crucial role to play: to stop the well-meaning but destructive policies it has pursued for almost 40 years. Maybe Latin America needs fairly small short-term loans to help assuage the pains of the transition. But the favorite "aid" policies of the past four decades—government-to-government aid; military aid; World Bank loans—must not be continued. They are largely to blame for the current crisis of the continent.

ANTI-ENTERPRENEUR BIAS

These policies encouraged government spending. They paid for bloated government bureaucracies and for military establishments that are, in many countries, four or five times as large proportionately as that of the U.S.—and without any foreign threat. They diverted capital from productive investment into "prestige project" steel mill, for instance—without domestic markets that, in their own way, were not too different from the monstrosities of Stalinist planning. Above all, these policies all had a strong anti-business and anti-entrepreneur bias. To continue them would be like pushing drink on an alcoholic.

What Latin America needs from the U.S. is trade, not aid. It needs political support for policies that reward enterprise and discourage monopolies and protectionism, policies that stress savings rather than spending, and economic growth rather than growth of the bureaucracy.

And these policies also are needed precisely because the U.S. needs Latin America.

SAFETY BELTS ARE A HEALTHY CHOICE

Mr. CHAFEE. Mr. President, recently the Providence Journal printed an article by Dr. H. Denman Scott, who is director of the Rhode Island Department of Health.

In his article "Why Won't Rhode Islanders Buckle Up?" Dr. Scott cites convincing evidence from a variety of sources on the effectiveness of safety belts. As a doctor he also has had numerous personal experiences with accident victims that have convinced him of the benefits of safety belts, and the high cost to individuals and society when safety belts are not used.

Buckling up can make the difference between a serious injury or a minor injury, and too often between life and death. Yet, human nature being what it is, we don't always do what we know is best for ourselves.

Dr. Scott quotes the National Highway Safety Administration 19 cities survey in 1989 that shows that Providence is at the bottom of the list for safety belt use and Dallas has the highest rate of use. I believe this makes a strong argument for safety belt laws. A critical difference between Providence and Dallas is that the State of Texas has sent a message to its citizens about the importance of using safety belts by passing a safety belt law and enforcing it. Rhode Island has not passed a safety belt law. I am convinced that safety belt laws are very effective in persuading people to wear their safety belts. That is why I have introduced legislation, S. 1007, which requires States to pass safety belt laws or forgo a small amount of their Federal-aid highway funds.

Finally, Mr. President, as we enter another budget cycle where we will have to make difficult decisions on how to spend limited Federal resources, Dr. Scott makes a very important point concerning the skyrocketing medical costs that are being shared among all taxpayers and insurance holders for the treatment of trauma victims who were not wearing safety belts. Dr. Scott concludes by saying:

One of the most important things we can do to improve the health of Rhode Islanders and to moderate health-care costs in the decade ahead is to increase the number of us wearing seat belts. Medical evidence shows clearly that buckling up every time you get in the car is a healthy choice to make.

I could not agree more.

Mr. President, I ask unanimous consent that the article by Dr. Scott be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

WHY WON'T RHODE ISLANDERS BUCKLE UP?

(By H. Denman Scott)

I know of no better way to prevent death and serious injury than to have all drivers and passengers use seat belts every time they get into a motor vehicle. But unhappily, many people, particularly Rhode Islanders, don't see the importance of this precaution.

The evidence that seat belts reduce injuries and save lives, as presented in medical journals and other scientific publications, continues to mount. Recent studies have caught the attention of much of the medical community, and I would like to share with you some of these findings.

According to the National Highway Traffic Safety Administration (NHTSA), in the event of a motor vehicle crash, seat belt use reduces the risk of death by 40 to 50 percent and the risk of moderate to serious injury by 45 to 55 percent. In 1985, 90 percent of the people killed in motor vehicle crashes were not wearing seat belts. Since there is an 86 percent likelihood of being involved in a crash in which someone is injured at least once during a 75-year life span, the heatlh reasons for everyone to buckle up are quite clear.

About a year ago, the prestigious Journal of the American Medical Association printed an editorial entitled "The case for safety seat-belt use." It was part of an issue containing several reports of research about the efficacy of seat belt use. That editorial, by Dianne Steed, head of NHTSA, pointed out that from 1983 to 1987, increased seat-belt use saved an estimated 11,000 lives and many more serious injuries in the United States. She urged physicians, as part of their daily routine, to advise patients of the importance of seat belts and child-safety seats as ways to prevent motor vehicle injuries. This commentary is my response to that plea.

One of the studies published in that issue of JAMA reported that the percentages of front-seat occupants who had severe or fatal injuries in crashes in North Carolina decreased as seat-belt use increased after the passage of a mandatory seat-belt law in that state. The authors estimated that about 1,100 severe or fatal injuries are prevented each year because of the increased use of seat belts in North Carolina.

A second JAMA article described a Chicago hospital study that compared motor vehicle crash victims who wore their seat belts with those who did not. The seat belt users were less severely injured and, as a result, had lower hospital admission rates than those who did not wear belts. Fewer than seven percent of seat-belt wearers were admitted to the hospital after having been taken to the emergency department, compared to almost 20 percent of those who were unbelted. Consequently, the medical costs of seat-belt wearers were 66 percent lower than for those not wearing belts.

This November, another prominent medical publication, the Mortality and Morbidity Weekly Report, published by the Centers for Disease Control, reported on another study validating seat-belt use. That study gathered data on persons injured in motor vehicle crashes and receiving emergency medical care at any of 16 rural and urban Iowa hospitals. Injuries were less severe and the costs less for those patients who had used seat belts. Unbelted persons were three times more likely to be hospitalized, more than eight times more likely to have head injuries accompanied by loss of consciousness, and almost three times more likely to sustain fractures and lacerations.

However, as a group, Rhode Islanders are not responding to that evidence yet. Another epidemiologic study on seat-belt use was based in part on research done in Providence at the Department of Health and published in the Bulletin of the New York Academy of Medicine in the fall of 1988; It had been shown that between 1984 and 1985, injuries and deaths in New York state were reduced because of the passage of a mandatory seat-belt law. However, during the same period, serious injuries and deaths from motor vehicle trauma in Rhode Island increased, corresponding to a lower rate of seat-belt use here.

A National Highway Safety Administration survey of 19 cities, released in 1989, placed Providence at the bottom of the list for seat-belt use. Less than one in five drivers in our capital city buckles up, compared to two out of three drivers in Dallas, the survey city with the highest rate of use.

People who do not buckle up risk personal safety. In addition, as medical costs skyrocket and are shared among all taxpayers and insurance holders, the cost of treatment for trauma victims who were not wearing seat belts becomes a particularly unnecessary

and wasteful expense for the public as a whole. The Highway Users Federation estimated that if all occupants of motor vehicles in Rhode Island had worn seat belts in 1983, the cost savings of preventable deaths and injuries for that year would have been $15 million.

In summary, one of the most important things we can do to improve the health of Rhode Islanders and to moderate healthcare costs in the decade ahead is to increase the number of us wearing seat belts. Medical evidence shows clearly that buckling up every time you get in the car is a healthy choice to make.

RESEARCH AND TECHNOLOGY EFFORTS ON THE ISLAND OF MAUI, STATE OF HAWAII

Mr. INOUYE. Mr. President, I wish to bring to the attention of my colleagues the outstanding progress in scientific research and technology that has been occurring on the Island of Maui, in the State of Hawaii. Maui is usually known as a tropical vacation spot, and thus, very few people associate Maui with science, research, and technology activities. However, research in the areas of energy, agriculture, and surveillance, among others, has been conducted for years. The Maui research projects also provide job and educational opportunities by attracting interest from numerous companies and through creative arrangements with institutions of higher education. Mr. President, I wish to ask unanimous consent that the attached article be printed in the RECORD, as it elaborates on the progress of research and development capability that is taking place on Maui.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

MAUI RESEARCH AND TECHNOLOGY ACTIVITIES

Maui has conducted agricultural and surveillance research for a number of years in comparative quiet with little public knowledge. In 1983, the public and private sectors of Maui began a program to bring high-tech business to Maui to help create new and alternative job opportunities for its youth.

The Maui Research & Technology Park was created in the Kihei area. Situated above the Silversword Golf Course 330 acres have been zoned for R&T uses in two-plus acre parcels operating under a fast track building permit process and protected by an environmentally sensitive ordinance.

The state of Hawaii is the recipient of five acres of land in a prominent location in the park and is in the process of constructing a Research & Technology Center (R&T Center) which will house University of Hawaii research activities and also contain provisions for new business start-ups (incubators) and for phasing in new ventures.

The Maui R&T Center Park is attracting interest from several companies interested in developing research activities closer to Asian markets and in providing a "halfway house" for conducting business and research on a joint-venture basis. The R&T Center will also contain a modern telecommunication capability and will have facilities for teleconferences and educational programs in connection with the Maui Community College (MCC). MCC is a creative organization which has conducted two-way audio/video courses between the islands of Molokai and Lanai—a facility I have been privileged to use a number of times. This is a must in island communities where the distances over water preclude easy motoring to educational facilities and thus become a real deterrent to the higher education of its citizens.

In a very real sense, Maui is a bellwether for island communities in the Pacific as well as for some of the coastal regions in the U.S. in pioneering the use of modern telecommunications in the classroom.

The R&T Park also has an "antenna farm" adjacent to the park which contains telecommunication antennas to serve the park without having antennas bristling atop each building in the park. This is also the site where advanced surveillance technology development is under way. Currently the Air Force is conducting a Relay Mirror Experiment as part of the nation's program to enhance surveillance capability through development of lasar-based techniques. This work is being done in connection with the tracking facility atop Mount Haleakala—a facility of increasing importance as our nation's defense efforts move in the new directions being chartered by the President and Congress.

SOLAR ENERGY RESEARCH

Maui is blessed with copious sunshine. The Kihei coastline in particular has some of the highest insolation ratings in the islands. Recently, Maui has become a participant in the national PVUSA program and has installed one of the photovoltaic technologies in that program in the antenna farm. This past fall a twenty-kilowatt test installation of the amorphous technology became successfully operational and is now connected to the Maui Electric Company grid.

Another energy project in the planning stage involves Maui Electric Company serving as a model utility in a joint federal program more formally entitled Integrated Electric Utility Program (IEUP). Quoting from its draft implementation plan published in September 1989.

"The IEUP implementation strategy will be to establish and foster partnerships between developing country utilities and private sector, U.S. renewable energy industry, U.S. utilities, and the financial community to encourage the use of appropriate renewable energy systems within an integrated electric utility framework. These partnerships will be developed through information and technology transferred, by providing convincing evidence to users that the technology works in commercial settings, ensuring that the technologies are appropriately deployed, identifying and implementing projects, helping make the institutional and infrastructural changes needed to expand the sustainable use of these technologies, and thereby gaining the confidence of private and public investors in these technologies."

Maui Electric Company has been selected to be the model utility and several agencies here in Hawaii are participating in the program: PICHTR headed by Admiral Ronald Hays is the prime contractor; and the Hawaii Natural Energy Institute (HNEI); Department of Business and Economic Development, and Maui Development Board are serving as subcontractors on the project. As planned and in process of implementation, the IEUP will bring representatives of many Pacific Basin and Pacific Rim nations to Maui to see alternate energy electric power generation programs in operation as part of a commercial electric company.

Stimulated by the process which led to the PVUSA installation and the IEUP, the state of Hawaii is adding emphasis to solar energy on Maui. Several related matters are before the state legislature now. Taken together, these all serve to initiate Maui's program to emphasize R&D in solar renewable energy technology and support the notion of a Pacific Solar Center as a focus for such work. That visible commitment to solar energy development responds both to the need in Hawaii for alternatives to fossil fuel and to the public's increasing sentiment in favor of environmentally sound energy generation technologies. Alternative energy is already well supported in Hawaii, but to date solar energy as such has not been adequately developed.

The intent on Maui is to provide the basis for full economic exploitation of solar energy and to create a Pacific Solar Center as part of the project we are characterizing as "Maui Captures the Sun." That mythical story of the god Maui symbolizes the very process we are engaged in, using our abilities to induce the sun to serve our needs.

AGRICULTURAL BIOTECH WORK

A third area of advanced work in Maui lies in the NifTAL program which the University of Hawaii is conducting for the Agency for International Development (AID).

The NifTAL program, which stands for Nitrogen Fixation by Tropical Agriculture Legumes, has developed significant products from its R&D efforts which have been used in some fifty countries. This project has developed the technology to treat legume seeds to improve their natural ability to fix nitrogen in the soil. This highly successful program is typical of the collegial approach to technology transfer employed by AID. The approach involves training individuals from the countries and supplying technical assistance in producing and utilizing the technology. We are very proud of the contributions this project is making to enhancing the world's food supply.

KAPALUA PACIFIC CENTER

The Kapalua Pacific Center is located in West Maui and is dedicated to holding conferences and workshops leading to improved East-West dialogue in issues affecting the economic, political, and social/cultural dimensions of our growing relationship. Programs such as the following have been held:

International Productivity Conference;

Partners in Planning symposium/workshop;

The Influence of the U.S. on Pacific Island Nations—an international conference;

The State of the Pacific Basin—an international conference cosponsored with the University of Hawaii.

These symposiums serve to better define and understand mutual opportunities and concerns the U.S. shares with Pacific nations as we move into the 1990s.

In conclusion, Maui is on the way to being a vibrant part of the American technology capability and is placed in a convenient half-way location to our Pacific neighbors. Maui is contributing to building a better Asia/America bridge.

AIDS UPDATE

Mr. CRANSTON. Mr. President, according to the Centers for Disease

Control, as of February 28, 1990, 124,984 Americans have been diagnosed with AIDS; 76,030 Americans have died from AIDS; and 48,954 Americans are currently living with AIDS.

Mr. President, 7,213 Americans have developed AIDS and 5,717 Americans have died from this horrible disease since I last noted these statistics 2 months ago.

Mr. President, in just 2½ months, San Francisco will be hosting the Sixth International Conference on AIDS—one of the most important events each year in which scientists and public health experts from around the world convene to exchange information about the latest discoveries about AIDS.

Unfortunately, some experts may not come this year. Current immigration policy requires foreign visitors infected with the human immunodeficiency virus [HIV] to obtain a special entry permit. Because there is no public health justification for such a policy and because it may lead to discrimination in individuals' home countries, many international organizations and individuals have indicated that they are going to boycott the meeting.

According to a March 23 Los Angeles Times article, health ministries in France, Switzerland, and the African nation of Cape Verde have already decided not to send official delegations to the conference, and the International League of Red Cross and Red Crescent societies have announced that they will not participate. A resolution of the European Parliament is urging all European scientists to stay home, and top researchers are seriously considering such action.

Mr. President, current policy is discriminatory and counterproductive. All leading public health authorities, including the National Commission on AIDS and the World Health Organization believe it is unnecessary and oppose it.

The United States, as the leader in research on AIDS, has an obligation to share information with representatives of other countries, and the annual international conferences have enabled scientists to exchange state-of-the-art knowledge about the disease. Yet, if attendance of the the international conference is impeded because of the current policy, the United States would be effectively blocking the free flow of communication.

Mr. President, it is ironic that the United States, which has more individuals infected with the HIV than any other country, would institute such a policy. Allowing individuals who are infected with the virus into the United States for short visits would not contribute to or worsen the epidemic in any significant way. However, other countries, fearful that Americans may be carrying the disease, may institute similar policies prohibiting our citizens from traveling abroad.

Mr. President, time is short. The United States must demonstrate leadership for the rest of the world—not succumb to fear and prejudice. I ask all my colleagues to join with me in urging the administration to allow foreign visitors to attend the conference unimpeded.

I ask unanimous consent that a copy of a resolution passed by the city and county of San Francisco urging that the travel restrictions be lifted be printed in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

[Travel Restrictions—Dangerous Contagious Diseases]

Urging Congress and the Bush administration to review and revise the list of dangerous contagious diseases used to restrict entry into the United States; urging that swift action be taken to lift the travel restrictions prior to the Sixth International AIDS Conference in June of 1990.

Whereas the United States government currently medically excludes people with certain diseases including HIV from travel in the United States; and,

Whereas travel restrictions on people with HIV could hamper research and the global fight against the HIV epidemic; and,

Whereas the Sixth International Conference on AIDS is planned to begin in San Francisco on June 20, 1990; and,

Whereas travel restrictions will prohibit many people from attending the conference; and,

Whereas there is a growing boycott of the conference by International AIDS organizations as well as local AIDS organizations because of the travel restrictions; and,

Whereas the Centers For Disease Control (CDC) has recommended that all diseases except active tuberculosis be removed from the list of "dangerous contagious diseases"; and,

Whereas the opinions of public health experts should be seriously considered in making public health policy decisions; now, therefore, be it,

Resolved, That the Board of Supervisors urges Congress and the Bush administration to direct the CDC to review and revise the entire list of contagious diseases used to restrict entry into the United States; and, be it,

Further resolved, That swift action should be taken to lift the travel restrictions on people with HIV in time for the Sixth International AIDS conference in June 1990; and, be it,

Further resolved, That a copy of this resolution be transmitted to his honor the Mayor with a request that he transmit copies to the San Francisco members of the House of Representatives, the United States Senators from the State of California, and the San Francisco Legislative Representative in Washington, D.C., with a request that they take all action necessary to achieve the objectives of this resolution, and that an additional copy of this resolution be sent to the President of the United States.

QADHAFI CALLS FOR RELEASE OF HOSTAGES

Mr. MOYNIHAN. Mr. President, I rise to inform my colleagues that today marks the 1,846th day that Terry Anderson has been held in captivity in Beirut.

I would also like to remark that according to the official Libyan news agency JANA, Mu'ammar Qadhafi yesterday suggested that "liberation movements in the Middle East" celebrate the Muslim holy month of Ramadan by freeing all foreign hostages and prisoners of conscience. Such an unusual gesture of conciliation from one of the West's most vehement critics certainly contributes to the air of optimism presently surrounding the hostage situation.

I ask unanimous consent that an article from today's Washington Post as well as a story from yesterday's Associated Press newswire concerning Qadhafi's comments be printed at this point in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Washington Post, Apr. 5, 1990]

QADHAFI URGES HOSTAGES' RELEASE

ROME.—Libyan leader Mu'ammar Qadhafi said foreign "hostages and prisoners of conscience" should be freed to mark the current holy Moslem month of Ramadan, the official Libyan news agency JANA said yesterday.

JANA, monitored in Rome, said the Libyan leader stressed Islamic humanitarian values and called on Moslems to refrain from detaining innocent people. The agency said he singled out French hostage Jacqueline Valente, who was captured on a yacht off Cyprus in 1987 by Abu Nidal's Libyan-backed Fatah-Revolutionary Council.

In Washington, White House press secretary Marlin Fitzwater welcomed Qadhafi's appeal. "Sometimes you get support from strange quarters," he said.

LIBYAN LEADER URGES MOSLEMS TO RELEASE HOSTAGES

ROME.—Libyan leader Mu'ammar Qadhafi urged Moslems to celebrate their holy month of Ramadan by releasing foreign hostages held in the Middle East, Libya's official news agency said today.

Col. Qadhafi specifically mentioned Jacqueline Valente, a Frenchwoman captured on a yacht off Cyprus in 1987 by Abu Nidal's Libyan-backed Fatah-Revolutionary Council, the JANA news agency report said.

Qadhafi appealed to "Moslems the world over in his capacity as the leader of the international Islamic People's Command calling for releasing the hostages and prisoners of conscience on the advent of the blessed month of Ramadan the month of love and tolerance," said JANA, monitored in Rome.

Ramadan began in late March.

The JANA dispatch said Qadhafi stressed Islamic humanitarian values and called for refraining from detaining innocent people.

"He has called to mind the hostages in the Middle East of various nationalities and religions, in particular the French hostage," Jacqueline Valente. She was captured along

with her two daughters and five Belgians. The Abul Nidal group claimed they were Israeli spies. Her whereabouts are unknown.

The children, then aged 7 and 6, were freed in December reportedly after Qadhafi intervened.

After their release, Qadhafi urged "liberation movements in the Middle East" to free the rest of the hostages. The group has not been included on the list of Western hostages held in Lebanon. Eighteen Westerners, including eight Americans, are missing and presumed held captive. The longest held is Terry Anderson, chief Middle East correspondent of The Associated Press. He was kidnapped in Beirut on March 16, 1985.

The hostages also include Dr. Thomas Sutherland, of Colorado State University at Fort Collins.

TRIBUTE TO WILLIAM BECK, SR.

Mr. HEFLIN. Mr. President, I rise today to pay tribute to William M. Beck, Sr. His death has taken from Alabama one of its foremost attorneys and statesmen.

As is the case with so many great men, William Beck rose from humble beginnings. William was one of 15 children in a farming family. He spent his youth working on the family farm in Calhoun County in Alabama.

He was a good student and a determined young man; he realized early that an advanced education was essential in order to fulfill his aspirations. He attended Newberry College, Jacksonville State University, and Birmingham Southern College. He put his education to work by teaching high school in Oxford, AL, for 6 years. A superb athlete, William also played part time professional baseball in the Georgia and Alabama leagues.

It was in this period that he met and married Miss Vera Isbell. It was said at William's funeral:

When Mr. Beck married Miss Isbell, he was a Methodist and a Democrat and she was a Baptist and a Republican. After the marriage, he was a Baptist and a Democrat and she was a Baptist and a Democrat. Theirs' was a successful mixed marriage.

William studied law alone in the evenings. In 1932, he passed the Bar without the benefit of law school and started a practice in Oxford. His renown in legal and legislative affairs led to his election to the Alabama Legislature in 1939 and selection as a judge in De Kalb County. However, World War II was raging; ever a man to selflessly serve for the greater good, he resigned his positions in the Government and entered the Marine Corps as a buck private. He had advanced to master sergeant by the end of the war.

At this point in his life, the honors began to come thick and fast for William. After the war, he returned to the legislature. He was elected Speaker of the House in 1947. He was appointed chairman of the board of Judson College in 1951, and was later elected president of Judson. Gov. George Wallace named him to the State board of education, where he served for 12 years.

William was elected president of the De Kalb County Bar Association, elected Bar Commissioner from the Ninth Judicial Circuit for three terms, and was vice president of the Alabama Bar. He was named Outstanding Attorney on behalf of the Alabama League of Municipalities in 1974, and was an Alabama Special Assistant Attorney General for 10 years.

William received an honorary doctor of law degree from Judson College and received the Algenon Sydney Sullivan Award from Judson for outstanding public service. The Boy Scouts presented him with the Silver Beaver Award, the highest award the Boy Scouts grant. The Woodmen of the World elected him State president. He also was a 32d-degree Mason and active in the Oddfellows, participating in both organizations for more than 50 years.

He has three children and seven grandchildren. His two sons are lawyers, and one grandson is in law school. I am pleased that Alabama will continue to be blessed with Beck legal acumen for generations to come.

William Beck's life was extraordinarily well lived; I daresay few others will accomplish so much with the time granted them by God. However, that does nothing to mitigate my feeling of loss at his death. I can only hope his example will inspire others.

BETTS LEGISLATION

Mr. HEINZ. Mr. President, I rise today to express my deep concern about an issue of great importance to me—protecting the rights of older workers from employment discrimination. In July 1989, in response to the U.S. Supreme Court decision in Public Employees Retirement System of Ohio versus Betts, I introduced legislation to overturn the Court's decision and to make clear congressional intent on protecting the rights of older workers. Shortly thereafter, my colleagues from Ohio and Arkansas, Senators METZENBAUM and PRYOR, introduced legislation similar to mine.

After months of negotiations between my staff and that of Senators PRYOR, METZENBAUM, JEFFORDS, and other congressional staff, as well as the administration's representative, the Equal Employment Opportunity Commission [EEOC], we thought a compromise was hammered out. While I do not agree with all of the provisions of the compromise, I nevertheless recognize the importance of moving forward. Unfortunately, the EEOC which had been representing the administration, has had their legs cut out from underneath them—apparently someone in the administration finally decided that the EEOC, which was bargaining in good faith, had gone too far.

This resulted in a letter from the White House to a Member of Congress stating that the administration has very serious concerns with certain aspects of the bipartisan compromise. The letter is extremely troubling to this Senator, since it demonstrates that while the Federal Government led us to believe it was an active partner in the development of Betts legislation, it actually failed to participate. Even the EEOC, the agency of the administration who had responsibility for negotiating a compromise, is now keeping its distance from this issue.

We cannot afford to let the administration's letter delay the Senate's consideration of Betts legislation. As each day passes, more and more older workers find themselves in jeopardy of employment discrimination—receiving less benefits than someone who is substantially younger, because the Supreme Court decision says that it is lawful to use age and pension eligibility as a basis for denying older workers benefits they have earned.

I want to praise Senator METZENBAUM and Senator JEFFORDS, the chair and ranking member of the Labor Subcommittee, and Senator PRYOR, the chair of the Aging Committee and the bill's primary sponsor, for their dedication to developing a bipartisan compromise on the most important age discrimination legislation in several years. I know that my colleagues share the concern that the Betts decision will unravel the cloak of protections for older workers that Congress has spent the last two decades weaving.

We took the first stitch in 1967, when the Age Discrimination in Employment Act [ADEA] established that age discrimination, like discrimination based upon race, religion, or sex, is inherently contrary to the principle of individual merit. In 1978, we extended the age for protection from 65 to 70. Finally, in 1985, I introduced legislation to eliminate mandatory retirement for all ages. In passing this legislation, Congress reinforced the rights of all senior citizens to remain active contributors in the American economy.

Despite Congress' efforts to ensure that older workers are treated equitably in the workplace, these rights were threatened by the Betts decision, which ruled that employee benefit plans were no longer protected under the Age Discrimination in Employment Act [ADEA]. The 7-to-2 decision, coming in the case of a challenge to Ohio's retirement plan for public employees, makes it much more difficult for employees to challenge benefit plans that they believe discriminate against older workers. In the past, the Equal Employment Opportunity Com-

mission [EEOC] and the Department of Labor have interpreted the ADEA to mean that employers discriminating on the basis of age must justify their plan on a cost basis. Undermining more than 20 years of protection under the ADEA, the Supreme Court's ruling could result in discrimination in older worker's health, disability, life insurance, and severance benefits.

In the past several months, Members of Congress have received numerous mailings from organizations arguing that the Betts legislation would wreak havoc with existing employee benefits plans. We have heard much from business organizations about their desire to integrate pensions with other types of benefits, such as severance pay. Many employers argue that because both pensions and severance replace lost wages, that they should be considered equally in mass layoffs or plant closings. The practical effect of this rationale is that older workers across the country have been denied severance play in mass layoffs and plant closings.

If we get beyond all the hysteria that has descended upon Congress, it is evident that what we are facing here is an issue of basic fairness. Integration of benefits allows older workers to be treated differently than younger workers, simply because of their age and pension-eligibility. Pensions are a vested right, and in most cases represent deferred compensation. Pensions are earned and severance pay is not. I believe that older workers are entitled to receive their pensions and full severance pay in the case of involuntary terminations.

Let me for a few moments give you the story of a worker in my home State of Pennsylvania, who was targeted for layoff and then denied severance benefits, solely because of his age. Donald C. was employed at the same company for 36 years, when at age 58, he received a letter that because of lack of work, he had been selected for layoff. The company gave Mr. C the choice of receiving reduced pension benefits immediately or severance pay and full pension benefits at age 65. Since he wanted the security of a monthly pension benefit, and did not want to wait several years to start receiving benefits, he chose his pension. Under the provisions of the current Betts legislation, Mr. C. would not have been forced to make such an unfair decision, and would have received both his pension and severance pay.

Although older workers forfeited severance pay if they chose to receive their pension, younger workers were still entitled to receive severance pay. In fact, younger workers will still receive their full pension benefits when they reach retirement age. I understand that some try to justify this inequitable treatment by using the argument that younger workers need severance pay more than older workers. They argue that the purpose of severance pay is to replace lost income until the worker can find other employment, and since older workers have reached retirement age, it is the younger worker who deserves severance pay.

While I agree that younger workers need severance pay, I wholeheartedly disagree with the premise that older workers do not need severance pay. In Mr. C's case, he was forced to leave his job several years before he planned to retire. He had recently received a company award for excellence, and was looking forward to remaining an active contributor to the company. His reduced pension benefit represented a significant drop in income, which he had not accounted for in his financial planning for retirement. He tried earnestly to find other employment, but says he encountered resistance by companies to hire someone his age who had worked for 36 years in a specific, technical trade.

Clearly, severance pay would have helped Mr. C. through a difficult period when he was actively seeking employment. Mr. C. is not alone in his desire to remain an active member of the work force. A recent study by the Commonwealth Fund, found that 1.1 million Americans over age 50 who are not currently employed are willing and able to work. Nearly 50 percent stated that money for essentials or medical expenses was their most important reason for wanting to work. Eighty percent of the sample did not want to leave the work force; the most common reason they stopped working was involuntary loss of their jobs.

Many older workers who have been involuntarily terminated and denied severance pay have filed discrimination cases under the ADEA, and have been waiting as long as 7 years for their cases to be decided. The longer we wait to discuss this legislation in the Senate, the greater the chance that cases currently pending will be dismissed. This would mean that thousands of workers who deserve benefits would not receive them. S. 1511 affects thousands of our constituents who have been treated unfairly because of policies that use age and pension eligibility as a basis for different treatment of older workers. We in the Senate have an obligation to promptly consider this legislation.

Although I will agree to cosponsor S. 1511 as amended, I do have some reservations, which need to be fully debated on the Senate floor. My own bill, S. 1293, does not include a retroactivity provision. S. 1511, would apply retroactively to cases pending as of the date of the Supreme Court decision, including reopening cases dismissed after the decision. While I agree that the legislation should apply to cases that are still pending at the date of the bill's enactment, I do not support the provisions that would reopen dismissed cases. In my opinion, it is bad policy to reopen litigation in this manner. This is one of the reasons that I am urging that we quickly bring this legislation to full debate in the Senate; we must act before more cases are dismissed.

S. 1511 makes reforms that are desperately needed to ensure that implementation of the ADEA is true to the intent of the act. Congress must send a clear message that it will reject all barriers to older workers' full and equitable participation in the work force. As the biological clock advances on this Nation's work force, the pool of younger workers will shrink. We must take steps now to eliminate policies which discriminate against older workers, and develop strategies which will assist businesses to encourage more workers to remain productive. I sincerely hope that we can quickly move forward with a bill that most Members of the Congress and the administration can support.

I see that the distinguished Senator from Ohio [Mr. METZENBAUM] is on the floor. I would like to ask the Senator whether he would be willing to work with me and other Members to see if an agreement can be reached with the administration on the Betts legislation.

Mr. METZENBAUM. As my friend from Pennsylvania knows, I consider the Betts legislation extremely important and something that must be completed soon. As the Senator from Pennsylvania just stated, with every day that passes, more and more litigation is being dismissed that adversely impacts older workers and allows discrimination against older workers to continue.

As the Senator knows, as our staffs worked together on developing a bipartisan compromise, they repeatedly asked the administration for comment and involvement. The EEOC told us that they represented the administration—today that is no longer true.

But I can assure my friend from Pennsylvania that I will have my staff work with his staff in an attempt to reach a compromise with the administration. I hope that this can be achieved.

Mr. HEINZ. I want say to my friend from Ohio, that I too hope that we can reach an agreement with the administration. The work on this issue has been conducted on a bipartisan basis from the beginning. While we may disagree on the retroactivity provision in the compromise as it is currently drafted, the bottom line is this—we are all committed to protecting the rights of older workers against employment discrimination. The Betts case pushed employment discrimina-

tion case law a giant step backward. It is incumbent upon Congress to move expeditiously to resolve this dilemma, and to demonstrate to all workers that employment discrimination will not be tolerated—now or ever.

While I hope that we can achieve a bipartisan compromise with the administration, I want to make one point very, very clear. From this Senator's perspective the issue of integration of severance benefits and pension benefits is a nonstarter.

I look forward to working with the Senator from Ohio on developing a compromise that the administration may be able to support.

THE HUBBLE SPACE TELESCOPE

Mr. HEFLIN. Mr. President, the story is told that, when Galileo pointed the first crude telescope to the heavens, those around him asked: "What do you expect to see?"

His reply was simple: "Wondrous things!"

The launch of NASA's Hubble space telescope this month will open a revolutionary new chapter in the history of astronomy. Not since Galileo's telescope almost 400 years ago, has one astronomical device possessed so much potential for uncovering new knowledge about our universe and the laws that govern it.

What do today's astronomers expect to see with the Hubble space telescope? The answer is simple: "Wondrous things!"

The Hubble space telescope will search out the size and origin of the universe and may even glimpse hints of its ultimate fate. It will help determine how stars and galaxies are formed, and it could provide clues to the existence of planets that orbit other stars the same way the Earth revolves around the Sun. It will zoom in on details of planets in our own solar system, and it will peer back to the early stages of the universe more than 15 billion years in the past. It will answer questions about mysterious objects like quasars and black holes, and it will raise a myraid of questions we have not yet thought to ask.

The most exciting thing about the Hubble space telescope is that we really do not know what it will discover. Just as Galileo was surprised to find moons orbiting Jupiter and what proved to be rings around Saturn, there are doubtless many unexpected wonders that still lie beyond our view. The Hubble space telescope will allow astronomers to see stars and galaxies that are 25 times fainter than those which can now be seen with the best ground-based observatories. We will be able to explore celestial objects in 10 times finer detail than ever before. There is no way to anticipate fully what this discovery machine will reveal.

The Hubble space telescope holds such potential for wonderous discoveries for two reasons.

First, it is a space telescope. Hubble will operate above the Earth's atmosphere, which distorts visible light and absorbs most other forms of radiation. In addition to producing crystal-clear images of celestial bodies in visible light, the space telescope can support scientific instruments that will study them in the ultraviolet and infrared wavelengths as well. From each form of radiation, we can uncover different pieces to the puzzle of the universe.

Second, the Hubble space telescope is, quite simply, the best optical telescope ever made. Its 8-foot primary mirror is so finely polished that if the surface of the Earth were as smooth, its tallest peak would be no more than five inches high. Its detectors are so sensitive that they could record the light from a flashlight a quarter of a million miles away. And its pointing is so accurate that it could line up a golf putt with precision on a 1,500-mile green stretching from Washington, DC, to Dallas, TX.

It took the combined efforts of hundreds of scientists, engineers, and other professionals from various NASA centers, private companies, universities, and the international scientific community to produce this engineering marvel. Leading the way over almost two decades of definition, design, and development has been NASA's Marshall Space Flight Center in Huntsville, AL. The NASA Center, which gave America the thrust to reach the moon with its powerful Saturn V rockets and that furnishes the propulsion system which boosts our space shuttles into orbit, is also providing the means to reach the very edges of the observable universe with this unique discovery machine.

The idea of a telescope in space was first proposed in the 1920's by German scientist Hermann Oberth. One of his most ardent pupils, rocket pioneer Dr. Wernher von Braun, became the Marshall Center's first director. In 1962, just 4 years after NASA was established, development of a large space telescope was officially suggested as a long-range goal of the fledgling space agency. And in 1972, NASA selected Alabama's Marshall Space Flight Center as the lead management center for the space telescope project.

Marshall engineers and their contractors went to work on the initial definition phase of the project, thinking through all the elements required to create this revolutionary window to the heavens. In the meantime, NASA's Goddard Space Flight Center in Greenbelt, MD, concentrated on definition of the telescope's scientific instruments. The European Space Agency made the space telescope program international by joining in the effort in 1975.

After Congress gave the final goahead for the project in 1977, Marshall awarded two major contracts for the construction of the space telescope.

The Perkin-Elmer Corp. of Danbury, CT—now Hughes Danbury Optical Systems—was selected to provide the optical telescope assembly—the two mirrors, the structure which holds them in precise alignment to one another, and their support systems. Marshall managers set tough standards for the perfection of the mirrors, but the contractor met or exceeded them all. The result of their painstaking effort was the smoothest large mirror ever made—less than a millionth of an inch from perfection.

The contract for the support systems module systems engineering and integration went to Lockheed Missiles and Space Co. in Sunnyvale, CA. They furnished the exterior structure of the Hubble space telescope and the various systems that make it possible for the optical telescope assembly and the scientific instruments to do their jobs. And there were a myriad of systems to provide: pointing control to lock onto celestial bodies being studied, thermal protection from the temperature extremes of space, antennas and computers for communications between the ground and the spacecraft, and electrical power to bring the space telescope to life.

Lockheed's design job was particularly demanding because this is to be a permanent space telescope, operating continuously for 15 years or more. Bringing it back to Earth every time a part needs to be replaced or a new instrument installed would be prohibitive, both in terms of expense and observing time. Therefore, the Hubble space telescope became NASA's first spacecraft specifically designed for servicing in orbit. Astronauts and technicians spent many hours in Marshall's neutral buoyancy simulator trying out designs for modular replacement units that could be readily manipulated in orbit. The simulator, a four-story-high tank filled with over a million gallons of water, is used to reproduce the weightless environment of space. There, astronauts practice space maneuvers wearing suits that are counterbalanced so they neither sink or float. Hubble simulations in the tank continued throughout the 1980's.

Careful documentation guarantees that Hubble space telescope design, construction, and component inventory records will be available to support telescope activities during its 15-year lifetime. This information is stored in the Marshall Center's technical management information system. When the time comes for servicing missions, the necessary background data will be

easily accessible through this computerized library.

Lockheed was also assigned the task of assembling and testing the finished product. The scientific instruments developed under the direction of the Goddard Space Flight Center, the solar arrays provided by the European Space Agency, and the optical telescope assembly were sent to Lockheed's California facility, where the precision parts were assembled into the largest astronomical observatory ever constructed for orbit. Extensive ground tests satisfied Marshall's project management team that the Hubble space telescope is indeed the astronomical jewel it was designed to be—one that will keep the United States in the forefront of world astronomy well into the next century.

Now, after years of design, construction, assembly, and testing, the big day is almost here. This very month, the Space Shuttle *Discovery* will roar into space. And in its cargo bay will rest our Hubble space telescope, ready to make this new decade the premier decade of astronomical discovery.

However, we will have to wait a few more months before the pictures of wonders start rolling in. Even amateur astronomers do not take their telescopes into a field and just begin observations without preparation. First, they set up their tripods, making sure the legs are level and the footing is steady. Next they aim their telescopes to the area of the sky they want to study and begin carefully adjusting the focus. Only then do they start viewing their targets.

Because the Hubble space telescope is an extremely complex, precise, and sensitive instrument, it will require an extensive period of activation, adjustment, and checkout before it is turned over to the scientific community for their observations. This period, referred to by NASA as orbital verification, will be under the direction of a team from Marshall's Hubble space telescope project office. The oribital verification management team will travel to Goddard Space Flight Center, where the space telescope operations control center is located, to direct the step-by-step process of deployment, activation, focusing, and evaluation. A second Marshall team will be gathered in the Huntsville operations support center in Alabama. This team is made up of engineers from Marshall, Lockheed, Hughes Danbury, and the European Space Agency—the people who designed and built the Hubble space telescope. They will monitor thousands of points of data on the spacecraft's status to make sure it is working just as they designed it to work.

After the Marshall Space Flight Center management team is satisfied that the engineering portion of the Hubble space telescope is operating smoothly, they will turn over control to Goddard, the NASA Center which will operate the telescope during its years of service.

Marshall will support orbital and science verification for as long as 2 years if necessary, but their involvement in the Hubble space telescope project will be gradually phased out. The Marshall Center's creativity will be focused on new challenges: building the modules for Space Station Freedom; developing a new astronomical telescope, the Advanced X-ray Astrophysics Facility, which will view the universe in yet another wavelength; and designing the vehicles which will take us back to the Moon and on to Mars.

But the dividends on the tremendous investment of time, effort, imagination, and dollars in the Hubble space telescope will continue to compound. It is new knowledge that fuels the future, that raises our vision, and broadens our horizons. And with the Hubble space telescope, wondrous discoveries will be, not the exception, but the rule.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Morning business is closed.

CARL D. PERKINS VOCATIONAL EDUCATION ACT AMENDMENTS

The PRESIDING OFFICER. Under the previous order, the Senate will now proceed to consideration of S. 1109, which the clerk will state.

The assistant legislative clerk read as follows:

A bill (S. 1109) to amend the Carl D. Perkins Vocational Education Act to extend the authorities contained in such act through the fiscal year 1995.

The Senate proceeded to consider the bill, which had been reported from the Committee on Labor and Human Resources, with an amendment to strike all after the enacting clause, and insert in lieu thereof the following:

SECTION 1. SHORT TITLE.

This Act may be cited as the "Carl D. Perkins Vocational Education Act Amendments of 1989".

TITLE I—VOCATIONAL EDUCATION ASSISTANCE TO THE STATES

SEC. 101. ALLOTMENT.

(a) IN GENERAL.—Section 101(a)(1) of the Carl D. Perkins Vocational Education Act (hereinafter referred to as the "Act") is amended—

(1) in subparagraph (A) by—

(A) striking "2" and inserting "2.75"; and

(B) striking "part E" and inserting "part D"; and

(2) by striking subparagraph (B) and inserting the following:

"(B) 2 percent for the purpose of carrying out section 103; and

"(C) .25 percent for the purpose of carrying out section 104.".

(b) TECHNICAL AMENDMENT.—(1) Section 101(a)(3)(C) of the Act is amended by striking ", Guam, American Samoa, the Northern Mariana Islands, and the Trust Territory of the Pacific Islands,".

(2) Section 101(c)(1)(B) of the Act is amended by striking ", Guam, American Samoa, the Virgin Islands, the Northern Mariana Islands, and the Trust Territory of the Pacific Islands" and inserting "and the Virgin Islands".

SEC. 102. WITHIN STATE RESERVATION.

Section 102 of the Act is amended to read as follows:

"SEC. 102. (a) Each State shall reserve from its allotment of funds appropriated under section 3(a) for each fiscal year an amount that does not exceed—

"(1) 20 percent for State programs and State administration of which—

"(A) 75 percent of such 20 percent shall be available for State programs and State leadership; and

"(B) 25 percent of such 20 percent shall be available for State administration;

"(2) 5 percent for technical preparation education under part B of title II; and

"(3) 75 percent for basic programs under part C of title II of which—

"(A) 65 to 75 percent of such 75 percent shall be available for subpart 1 of part C of title II; and

"(B) 25 to 35 percent of such 75 percent shall be available for subpart 2 of part C of title II.

"(b) SPECIAL RULES.—(1) From the amount reserved pursuant to subsections (a)(1)(A) and (a)(1)(B) each State shall reserve 20 percent for sex equity programs in accordance with section 202.

"(2) From the amount reserved pursuant to subsection (a)(3)(B) each State shall reserve for single parents, homemakers, and single women programs in accordance with section 242 an amount which equals or exceeds 9 percent of the total amount reserved pursuant to subsection (a)(3) for subparts 1 and 2 part C of title II.".

(c) MATCHING REQUIREMENT.—Each State receiving financial assistance under this Act shall match, on a dollar-for-dollar basis, the funds received pursuant to subsection (a)(1)(B) from non-Federal sources.

(d) HOLD HARMLESS PROVISION.—The requirements of subparagraphs (A) and (B) of subsection (a)(3) shall only apply to—

(1) 20 percent for fiscal year 1991,

(2) 36 percent for fiscal year 1992, and

(3) 51 percent for fiscal year 1993,

of the funds available under subsection (a)(3) to each State for basic programs under part C of title II.

SEC. 103. INDIAN AND HAWAIIAN PROGRAMS

Section 103 of the Act is amended to read as follows:

"INDIAN AND NATIVE HAWAIIAN PROGRAMS

"SEC. 103. (a)(1)(A) From 7/12 of the amount of funds reserved under section 101(a)(1)(B), the Secretary shall award grants to, or enter into contract with—

"(i) Indian tribes that are eligible to receive a grant from, or to enter into a contract with, the Secretary of the Interior under—

"(I) the Indian Self-Determination and Education Assistance Act, or

"(II) the Act of April 16, 1934 (48 Stat. 596, chapter 147; 25 U.S.C. 452, et seq.), and

"(ii) tribal organizations of such Indian tribes,

to plan, conduct, and administer programs, or portions of programs, that provide voca-

tional-technical training and related activities.

"(B) Grants awarded, and contracts entered into, under subparagraph (A) shall—

"(i) be subject to the terms and conditions of section 102 of the Indian Self-Determination and Education Assistance Act, and

"(ii) be conducted in accordance with those provisions of sections 4, 5, and 6 of the Act of April 16, 1934 (48 Stat. 596, chapter 147; 25 U.S.C. 455, 456, 457) that are relevant to the programs for which the grant or contract is provided.

"(2)(A) From 1/12 of the funds reserved under section 101(a)(1)(B), the Secretary shall award grants to schools funded by the Bureau of Indian Affairs of the Department of the Interior for the purpose of providing vocational education programs for secondary students attending those schools.

"(B) Each grant awarded under subparagraph (A) shall equal or exceed $50,000.

"(C) The Secretary of the Interior is authorized to accept and use any grant awarded under subparagraph (A) for the purposes for which the grant is awarded.

"(D) The Secretary is authorized to enter into an agreement with the Secretary of the Interior for the operation of vocational education programs authorized by this Act in institutions serving Indians who are eligible to receive educational benefits as Indians from the Bureau of Indian Affairs because of their status as Indians.

"(3)(A) From 3/12 of the funds reserved under section 101(a)(1)(B), the Secretary shall award grants for vocational-technical training, and related activities, to two or more schools of vocational-technical education, each of which—

"(i) is governed by a board of directors or trustees, a majority of whom are Indians,

"(ii) has been in operation for 5 or more years,

"(iii) enrolls the full-time equivalent of not less than 100 students, of whom a majority are Indians, and

"(iv) is accredited, or a candidate for accreditation, by a nationally recognized accrediting agency for postsecondary vocational education institutions.

"(B) If any portion of the funds that are authorized to be used to provide grants under subparagraph (A) for any fiscal year remains after all schools eligible for the grant that submitted acceptable applications for the grant have been awarded a grant under subparagraph (A) for the fiscal year, the Secretary may use the remaining funds—

"(i) to award grants under subparagraph (A) to institutions of higher education that are eligible for assistance under the Tribally Controlled Community College Assistance Act of 1978, and

"(ii) if funds remain after all grants authorized under clause (i) have been awarded to eligible institutions that submitted acceptable applications for the grant, to fund grants and contracts provided under paragraph (1).

"(C) Each grant awarded under subparagraph (B)(i) shall equal or exceed $50,000.

"(D) The Secretary shall, subject to the availability of appropriations, provide for each program year to each school of vocational-technical education having an application approved by the Secretary under subparagraph (A), an amount necessary to pay expenses associated with—

"(i) the maintenance and operation of the program, including development costs, costs of basic and special instruction (including special programs for individuals with handicaps and academic instruction), materials, student costs, administrative expenses, boarding costs, transportation, student services, day care and family support programs for students and their families (including contribution to the costs of education for dependents);

"(ii) capital expenditures, including operations and maintenance and minor improvements and repair, physical plant maintenance costs; and

"(iii) costs associated with repair, upkeep, replacement, and upgrading of the instructional equipment.

"(4) For purposes of this Act, the Bureau of Indian Affairs of the Department of the Interior shall be considered to be a State board.

"(5) Programs funded under this subsection shall be in addition to such other programs, services, and activities as are made available to eligible Indians under other provisions of this Act.

"(b)(1) From 3/12 of the funds reserved under section 101(a)(1)(B), the Secretary shall enter into contracts with organizations primarily serving and representing Native Hawaiians which are recognized by the Governor of the State of Hawaii to plan, conduct, and administer programs, or portions of programs, that provide vocational-technical training, and related activities, for the benefit of Native Hawaiians.

"(2) For purposes of this section, the term 'Native Hawaiian' means any individual who has any ancestors that were natives, prior to 1778, of the area which now constitutes the State of Hawaii.

"(c) Grants awarded, and contracts entered into, under this section shall be subject to such terms and conditions as the Secretary may prescribe relating to satisfactory performance of the grant or contract.

"(d) Nothing in this section shall be interpreted as affecting or limiting the ability, or eligibility, of any person or agency to which this section applies to apply for, or receive assistance from, any other source, including assistance provided by the Federal government under any provision of law other than this title.".

SEC. 104. THE TERRITORIES.

Part B of title I of the Act is amended by inserting at the end thereof the following new section:

"THE TERRITORIES

"SEC. 104. (a) IN GENERAL.—From funds reserved pursuant to section 101(a)(2)(C), the Secretary shall make a grant to the Center for the Advancement of Pacific Education, Honolulu, Hawaii, or its successor entity or entities to make vocational education and training grants in Guam, American Samoa, Palau, the Commonwealth of the Northern Marianas, the Federated States of Micronesia, and the Republic of the Marshall Islands, or cooperative efforts involving two or more of these entities for the purpose of—

"(1) teacher training and retraining;

"(2) curriculum development;

"(3) improving vocational education and training programs in secondary schools, institutions of higher education, or cooperative programs involving both secondary schools and institutions of higher education.

"(b) LIMITATION.—The Center for the Advancement of Pacific Education may use no more than 5 percent of the funds received pursuant to subsection (a) for administrative costs.".

SEC. 105. STATE ADMINISTRATION.

Section 111 of the Act is amended—

(1) in subsection (a)(1)(A) by striking "113(b)(9)" and inserting "113(b)(14))";

(2) in subsection (a)(1)(C) by inserting ", including business and industry" before "involved";

(3) in subsection (b)(1) by—

(A) redesignating subparagraphs (C), (D), (E), (F), and (G), as subparagraphs (D), (E), (F), (G), and (H), respectively, and

(B) inserting the following new subparagraph (C) after subparagraph (B):

"(C) reviewing and commenting upon the plans of local educational agencies to ensure that the needs of women and men for training in nontraditional jobs are met;";

(4) in subsection (b)(3) by inserting "from funds allocated under section 102(a)(1)(B)" before "expend";

(5) by redesignating subsections (c), (d), and (e) as subsections (f), (g), and (h), respectively; and

(6) inserting the following new subsections after subsection (b):

"(c)(1) Any State desiring to participate in the programs authorized by this Act shall designate or assign the head of the State office responsible for administering part B of the Education of the Handicapped Act to—

"(A) review all plans of local eligible recipients to ensure that students with disabilities are receiving vocational educational services required by their individual educational program pursuant to Public Law 94-142;

"(B) ensure that the plans of the local educational agency, area vocational school, or intermediate educational agency provide assurances of compliance with the provisions of section 504 of the Vocational Rehabilitation Act and the Education of Handicapped Act regarding equal access to programs;

"(C) review all plans of local eligible recipients to ensure that local educational agencies, area vocational schools or intermediate educational units have—

"(i) identified the number of students with disabilities enrolled in vocational programs operated by the local recipient,

"(ii) assessed the vocational needs of the students identified pursuant to clause (i), and

"(iii) developed an adequate plan to provide supplementary services sufficient to meet the needs of such students; and

"(D) evaluate the plans of all local eligible recipients with respect to the appropriateness of the program and the quality of the program.

"(2) For purposes of this subsection, the term 'State' means any one of the 50 States and the District of Columbia.

"(d) Any State desiring to participate in the programs authorized by this Act shall assign the chapter 1 coordinator to review the plans of the local recipients to ensure that the number of economically disadvantaged students have been identified, and that the needs of such students are being met as outlined by such plans.

"(e) Any State desiring to participate in the programs authorized by this Act shall designate or assign the head of the State agency responsible for administering programs for students with limited English proficiency to review the plans of the local educational agency, area vocational schools, or intermediate educational agencies to ensure that the number of students with limited English proficiency have been identified and that the needs of such students are being met as outlined by such plans.".

SEC. 106. STATE COUNCIL ON VOCATIONAL EDUCATION.

Section 112 of the Act is amended—

(1) in subsection (a)(1)(A) by inserting "trade organizations," after "industry,";

(2) in subsection (a)(2) by inserting at the end thereof the following new sentence: "In addition, the State Council may include members of vocational student organizations and school board members.";

(3) in subsection (a) by inserting the following new paragraph after the matter following paragraph (2):

"(3) SPECIAL RULE.—No member of the State board shall serve on State Council.";

(4) in subsection (d)(2) by—

(A) striking "advise" and inserting "make recommendations to";

(B) redesignating subparagraphs (A) and (B) as subparagraphs (B) and (C), respectively; and

(C) inserting the following new subparagraph (A) immediately preceding subparagraph (B) (as redesignated in subparagraph (B)):

"(A) the State plan;";

(6) in subsection (d)(8) by striking "201(b)" and inserting "223";

(7) by amending subsection (d)(9) to read as follows:

"(9)(A) evaluate at least once every 2 years—

"(i) the extent to which vocational education, employment and training represent a consistent, integrated, and coordinated approach to meeting the economic needs of the State,

"(ii) the vocational educational program delivery system assisted under this Act, and under the Job Training Partnership Act, in terms of such delivery systems' adequacy and effectiveness in achieving the purposes of each of the two Acts, and

"(iii) make recommendations to the State board on the adequacy and effectiveness of the coordination that takes place between vocational education and the Job Training Partnership Act;

"(B) comment on the adequacy or inadequacy of State action as put into practice;

"(C) make recommendations to the State board on ways to create greater incentives for joint planning and collaboration between the vocational education system and the job training system at the State and local levels; and

"(D) advise the Governor, the State board, the State job training coordinating council, the Secretary, and the Secretary of Labor regarding such evaluation, findings, and recommendations.".

(8) in subsection (e) by inserting the following new sentences at the end thereof: "Each State Council may submit a statement to the Secretary reviewing and commenting upon the State plan. Such statement shall be sent to the Secretary with the State Plan."; and

(9) in subsection (f)(1)(A) by—

(A) striking "120,000" and inserting "150,000"; and

(B) striking "225,000" and inserting "250,000"; and

(10) in subsection (f)(1)(B) by striking "the Trust Territory of the Pacific Islands" and inserting "the Commonwealth of the Northern Mariana Islands, the Federated States of Micronesia, and Palau".

SEC. 107. STATE PLANS.

Section 113 of the Act is amended to read as follows:

"SEC. 113. (a)(1)(A) Any State desiring to receive funds from its allotment for any fiscal year shall submit to the Secretary a State plan for a 3-year period in the case of the initial plan, and a 2-year period thereafter, together with such annual revisions as the State board determines to be necessary.

"(B) The planning periods required by paragraph (1) of this subsection shall be coterminous with the planning program periods required under section 104(a) of the Job Training Partnership Act.

"(2)(A) In formulating the State plan (and amendments thereto) the State board shall meet with and utilize, before the development of such plan, the State Council, established pursuant to section 112 of this Act.

"(B) The State board shall conduct public hearings in the State, after appropriate and sufficient notice, for the purpose of affording all segments of the public and interested organizations and groups an opportunity to present their views and make recommendations regarding the State plan. A summary of such recommendations and the State board's response shall be included with the State plan.

"(3) In developing the State plan, the State shall conduct a State assessment according to section 115.

"(b) Each State plan shall—

"(1) address the needs indicated by the State assessment conducted pursuant to section 115; and

"(2) provide assurances that, and where necessary a description of the manner in which, the local educational agencies, area vocational schools or intermediate educational agencies will comply with the requirements of titles I, II, and III of this Act including—

"(A) a description of the manner in which the State will comply with the criteria required for programs for the special populations prescribed by section 223;

"(B) assurances that the State will develop measurable goals and accountability measures for meeting the needs of special populations;

"(C) adequate monitoring of programs in local educational agencies, area vocational schools or intermediate educational agencies to ensure that programs within the State are meeting the goals described in subparagraph (B); and

"(D) assurances that, to the extent consistent with the number and location of individuals described in section 223, who are enrolled in private elementary and secondary schools, provision is made for the participation of such individuals in the vocational education program assisted under subpart 1 of part C of title II;

"(3) set forth the planned distribution to local educational agencies, area vocational schools or intermediate educational agencies as prescribed by section 221;

"(4) provide assurances that the State will comply with the provisions of section 102;

"(5) set forth the criteria the State board will use—

"(A) in approving applications of eligible recipients, and

"(B) for allocating the 20 percent reserve for the State as authorized under section 102(a)(1);

"(6) provide assurances that if the State exercises the option to redistribute the 20 percent reserve, the State will match the reserve as prescribed under section 101(c);

"(7) describe how funds expended for occupationally specific training will be used only for occupations in which job openings are projected or available;

"(8) provide assurances that the goal of each program shall be to give a student experience in, and understanding of, all aspects of the industry in which the student is preparing to enter;

"(9) describe the progress the State has made in achieving the goals set forth in each State plan subsequent to the initial State plan;

"(10) provide such methods of administration as are necessary for the proper and efficient administration of the Act;

"(11) provide assurances that, in the use of funds available for single parents and displaced homemakers, and single pregnant women under section 242, the State will emphasize assisting individuals with the greatest financial need, and that in serving homemakers the State will give special consideration to displaced homemakers who because of divorce, separation, or the death or disability of a spouse must prepare for paid employment;

"(12) provide assurances that the State will furnish relevant training and vocational education activities to men and women who desire to enter occupations that are not traditionally associated with their sex;

"(13) describe how the State is implementing performance evaluations as prescribed by section 231;

"(14) provide assurances that the State will—

"(A) develop measures for the effectiveness of programs assisted under this Act in meeting the needs identified in the State plan, including evaluative measurements such as—

"(i) the occupations to be trained for, which will reflect a realistic assessment of the labor market needs of the State;

"(ii) the levels of skills to be achieved in particular occupations, which will reflect the hiring needs of employers; and

"(iii) the basic employment competencies to be used in performance outcomes, which will reflect the hiring needs of employers;

"(B) as a component of the measures under subparagraph (A) of this paragraph, establish appropriate measures for evaluating the effectiveness of programs for the special populations described in section 223 assisted under this Act; and

"(C) evaluate the projects, services, and activities supported under this Act of not less than 20 percent of the participating eligible recipients within the State in each fiscal year;

"(15) describe the methods proposed for the joint planning and coordination of programs carried out under this Act with programs conducted under the Job Training Partnership Act, the Adult Education Act, chapter 1 of title I of the Elementary and Secondary Education Act of 1965, the Education of the Handicapped Act, and the Rehabilitation Act of 1973, and with apprenticeship training programs;

"(16) provide assurances that programs of personnel development, and curriculum development shall be funded to further the goals identified in the State plan;

"(17) provide assurances that the vocational education needs of identifiable segments of the population in the State that have the highest rates of unemployment have been thoroughly assessed, and that such needs are reflected in and addressed by the State plan;

"(18) provide assurances that the State board will cooperate with the State council on vocational education in carrying out its duties under this part;

"(19) provide assurance that none of the funds expended under this Act will be used to acquire equipment (including computer software) in any instance in which such ac-

quisition results in a direct financial benefit to any organization representing the interests of the purchasing entity or its employees or any affiliate of such an organization;

"(20) provide assurances that Federal funds made available under this Act will be used so as to supplement, and to the extent practicable increase the amount of State and local funds that would in the absence of such Federal funds be made available for the uses specified in the State plan, and in no case supplant such State or local funds; and

"(21) provide assurances that the State will provide for such fiscal control and fund accounting procedures as may be necessary to assure the proper disbursement of, and accounting for, Federal funds paid to the State (including such funds paid by the State to eligible recipients under this Act).".

(c)(1) When changes in program conditions, labor market conditions, funding, or other factors require substantial amendment to an approved State plan, the State board, in consultation with the State council, shall submit amendments to such State plan to the Secretary. Any such amendments shall be subject to review by the State job training coordinating council, and the State council.

(2) Each State plan shall be submitted to the Secretary by May 1 preceding the beginning of the first fiscal year for which such plan is to be in effect. The Secretary shall approve each plan before the expiration of the 60-day period beginning on the date the plan is submitted if the plan meets the requirements of section 113 and is of sufficient quality to meet the objectives of this Act (including the objective of developing and implementing performance evaluations and improvements), and shall subsequently take appropriate actions to monitor the State's compliance with the provisions of its plan and the requirements of this Act. The Secretary shall not finally disapprove a State plan except after giving reasonable notice and an opportunity for a hearing to the State board.

SEC. 108. APPROVAL.

Section 114(a)(1) of the Act is amended by—

(1) inserting ", the chief executive officer of the State" after "legislature" each place such term appears; and

(2) redesignating subsection (c) as subsection (d); and

(3) inserting the following new subsection after subsection (b):

"(c) The State board shall develop the portion of each State plan relating to the amount and uses of any funds proposed to be reserved for adult education, postsecondary education, technical preparation education and for secondary education after consultation with the State agency responsible for supervision of community colleges and the State agency responsible for secondary education, respectively. The State board shall, in developing such plan, take into consideration the relative training and retraining needs of secondary, adult and postsecondary students. If a State agency finds that a portion of the final State plan is objectionable, such agency shall file such objections with the State board. The State board shall respond to any objections of such agency in submitting such plan to the Secretary. The Secretary shall consider such comments in reviewing the State plan.".

SEC. 109. STATE ASSESSMENT.

Section 115 of the Act is amended to read as follows:

"STATE ASSESSMENT

"SEC. 115. (a)(1) Each State board receiving assistance under this Act shall develop measurable objective criteria by which to assess the quality of, and standards for, State and local programs. Such criteria shall be developed in consultation with local educational agencies, area vocational schools, intermediate educational agencies, business and industry, union and trade representatives, vocational educators, superintendents, community-based organizations, parents, representatives of special populations described in section 223, guidance counselors and the State council. Each State board shall widely disseminate such criteria. State boards shall develop criteria by the beginning of school year 1993, and shall use criteria to assess program quality. Assessment criteria shall include—

"(A) student improvement in basic skills;

"(B) positive learning and educational outcomes;

"(C) acquisition of all aspects of occupational competencies;

"(D) student improvement in life skills, problem solving skills and career decision making;

"(E) the ability of local educational agencies, area vocational schools and intermediate educational agencies to meet the needs of special populations such as the economically disadvantaged, students with disabilities, students with limited English proficiency, and women and men in programs for training in nontraditional occupations, and criminal offenders in correctional institutions, for access to vocational education and vocational services in terms of labor market needs;

"(F) assessing the quality of vocational education in terms of—

"(i) the pertinence of programs to the workplace and to new and emerging technologies;

"(ii) the technological and educational quality of vocational curricula, equipment, and instructional materials to enable vocational students and instructors to meet the challenges of increased technological demands of the workplace;

"(iii) the capability of vocational education programs to meet the needs for general occupational skills and improvement of basic academic skills in order to address the changing content of jobs;

"(iv) the capability of vocational education programs to—

"(I) give students experience in, and understanding of, all aspects of the industry in which the student is preparing to enter; and

"(II) provide job placements; and

"(v) measuring the state-of-the-art quality of the vocational education provided; and

"(G) setting measurable goals to meet the needs of special populations.

"(2) In developing assessment criteria pursuant to the provisions of paragraph (1)(E), the head of the special education unit, the sex equity coordinator and the individual designated under section 111(d) to monitor programs for students with limited English proficiency shall each develop data collection procedures appropriate to the special populations being served. Data collected should include information about program services and outcomes, as well as which individuals are being served.

"(b) Each State board receiving assistance under this Act shall assess improvements needed in vocational education programs through the use of Federal funds provided under this Act and State and local vocational education funds. Such assessment shall utilize the following 6 factors:

"(1) integration of academic and vocational education;

"(2) sequential course of study;

"(3) increased student job placement;

"(4) increase linkages between secondary and postsecondary;

"(5) ensuring that at-risk populations obtain assistance necessary to enroll and succeed in upgraded programs; and

"(6) raising the quality of vocational programs in schools with high concentrations of poor and low-achieving students.".

TITLE II—BASIC STATE GRANTS

SEC. 201. BASIC STATE GRANTS.

Title II of the Act is amended to read as follows:

"TITLE II—BASIC STATE GRANTS FOR VOCATIONAL EDUCATION

"PART A—STATE PROGRAMS

"STATE PROGRAMS AND STATE LEADERSHIP

"SEC. 201. (a) From amounts reserved under section 102(a)(1)(A) each State shall conduct State programs and State leadership activities.

"(b)(1) State programs conducted pursuant to subsection (a) shall include—

"(A) training and retraining programs for teachers, administrators and counselors, including corrections educators and counselors, and educators and counselors in community-based organizations, which may include—

"(i) training in the integration of academic and vocational studies and programs that give students experience in, and understanding of, all aspects of the industry the student is preparing to enter; and

"(ii) retraining of vocational teachers in modern instructional techniques and new technologies;

"(B) curriculum development, curriculum dissemination and field-testing of curriculum; and

"(C) supporting vocational student organizations, with every effort being made to increase minority participation in such clubs.

"(2) Training and retraining programs conducted pursuant to paragraph (1)(A) shall give particular emphasis to recruiting and training minority teachers and shall encourage programs that utilize business and industry equipment and personnel.

"(3) In carrying out the provisions of paragraph (1)(B) the State—

"(A) shall give priority to curriculum which integrates academic and vocational studies;

"(B) shall provide special emphasis on curriculum which incorporates the needs of business and industry in high skilled occupations;

"(C) may award contracts to the Corporation for Public Broadcasting; and

"(D) may provide grants for technical preparation programs as described in part B of this title.

"(c)(1) Leadership activities conducted pursuant to subsection (a) shall include—

"(A) monitoring and evaluation, including technical assistance to local recipients;

"(B) development and implementation of performance evaluations and improvement required under section 250, including technical assistance;

"(C) development and implementation of the State assessment required under section 109;

"(D) promoting business, industry, and interagency linkages and linkages with community-based organizations;

"(E) establishing guidelines for the development of local plans;

"(F) the creation and maintenance of a public awareness program;

"(G) developing linkages with community-based organizations; and

"(H) building collaboration and joint efforts among education, labor, job training, public assistance, and other State agencies to improve vocational education services to traditionally underserved populations.

"(2) Each State receiving financial assistance under this Act shall match, on a dollar for dollar basis and from non-Federal sources, the funds received pursuant to section 102(a)(1)(A) for leadership activities.

"SEX EQUITY PROGRAMS

"SEC. 202. From amounts reserved under section 102(b)(1) the State shall, under the administration of the sex-equity coordinator described in section 111(b)(1)—

"(1) support programs, services, and activities to eliminate sex bias and stereotyping in secondary and postsecondary vocational education;

"(2) support vocational and prevocational education programs, services, and activities for girls and women, aged 14 through 25, designed to enable the participants to support themselves and their families; and

"(3) provide support services for individuals participating in vocational education programs, services, and activities described in paragraphs (1) and (2) including dependent-care services and transportation.

"PART B—TECHNOLOGY PREPARATION

"PROGRAM AUTHORIZED

"SEC. 211. From amounts reserved under section 102(a)(2) the State agency shall make competitive grants for activities carried out under this part to consortia of—

"(1) local educational agencies, intermediate educational agencies serving secondary school students or area vocational schools serving secondary school students; and

"(2) community colleges (including post-secondary vocational technical schools), apprenticeship programs, or institutions of higher education offering—

"(A) a two-year degree,

"(B) an associate's degree, or

"(C) a two-year post-secondary certificate.

"TECHNICAL PREPARATION EDUCATION PROGRAMS

"SEC. 212. (a) GENERAL AUTHORITY.—Each recipient of a grant under this part shall use amounts paid under this part to develop and operate a 4-year technical preparation education program.

"(b) CONTENTS OF PROGRAM.—Each such program shall—

"(1) be carried out under an articulation agreement between the participants in the consortium;

"(2) consist of the 2 years of secondary school preceding graduation and 2 years of higher education, or a 2-year apprenticeship program, with a common core of required proficiency in mathematics, science, communications and technologies designed to lead to an associate degree in a specific career field;

"(3) include the development of technical preparation education program curriculum appropriate to the needs of the consortium participants; and

"(4) include in-service training for teachers that—

"(A) is designed to train teachers to implement effectively technical preparation education curriculum;

"(B) provides for joint training for teachers from all participants in the consortium; and

"(C) may provide such training in weekend, evening and summer sessions, institutes or workshops.

"(c) ADDITIONAL AUTHORIZED ACTIVITIES.—Each such program may—

"(1) provide for training programs for counselors designed to enable counselors more effectively to recruit students for technical preparation education programs, and ensure their successful completion of such programs and their placement in appropriate employment;

"(2) provide for the acquisition of technical preparation education program equipment; and

"(3) as part of the program's planning activities, acquire technical assistance from State or local entities that have successfully designed, established and operated tech-prep programs.

"APPLICATIONS

"SEC. 213. (a) IN GENERAL.—Each consortium that desires to receive a grant under this part shall submit an application to the State board at such time and in such manner as the State board shall prescribe.

"(b) FIVE-YEAR PLAN.—Each application submitted under this section shall contain a 3-year plan for the development and implementation of activities under this Act.

"(c) APPROVAL.—The State board shall approve applications based on their potential to create an effective technical preparation education program as described in section 212.

"(d) SPECIAL CONSIDERATION.—The Secretary shall give special consideration to applicants whose applications—

"(1) provide for effective employment placement activities or transfer of students to 4-year baccalaureate degree programs; and

"(2) are developed in consultation with business, industry, and labor unions.

"DEFINITIONS

"SEC. 214. For purposes of this part—

"(1) the term 'articulation agreement' means a commitment to a program designed to provide students with a nonduplicative sequence of progressive achievement leading to competencies in a technical preparation education program.

"(2) the term 'community college' has the meaning provided in section 1201(a) of the Higher Education Act of 1965 for an institution which provides not less than a 2-year program which is acceptable for full credit toward a bachelor's degree.

"(3) the term 'technical preparation education program' means a combined secondary and postsecondary program which—

"(A) leads to an associate degree;

"(B) provides technical preparation in at least 1 field of engineering technology, applied science, mechanical, industrial, or practical art or trade;

"(C) provides technical preparation in agriculture, health, or business;

"(D) provides competence in mathematics, science, and communications (including through applied academics); and

"(E) leads to placement in employment.

"PART C—SECONDARY, POSTSECONDARY AND ADULT VOCATIONAL PROGRAMS

"Subpart 1—Secondary School Programs

"WITHIN STATE ALLOCATION

"SEC. 221. (a) From amounts reserved under section 102(a)(3)(A), the State board shall allocate to each local educational agency an amount that bears the same relationship to such funds as the amount such local educational agency was allocated under sections 1005 and 1006 of the Elementary and Secondary Education Act of 1965 in the preceding fiscal year bears to the total amount received under such section by local educational agencies in the State in such year as modified by State board pursuant to subsection (b).

"(b)(1)(A) In the case of criminal offenders who are in State correctional institutions the State board shall ratably reduce the percentages obtained under subsection (a) in order to make available to the State correctional program under section 228 an amount which is substantially equivalent to the amount which such program would have been eligible to receive under chapter 1 of title I of the Elementary and Secondary Education Act of 1965 for that fiscal year if the State correctional program were a local educational agency.

"(B) For the purpose of subparagraph (A) the age of children in correctional institutions to be counted shall be ages 9 through 35.

"(C) The amount determined pursuant to subparagraphs (A) and (B) shall not exceed 5 percent of the amount reserved under section 102(a)(3)(A).

"(2) In the case of an area vocational school the amounts calculated under subsection (a) that are available to local educational agencies served by that area vocational school shall be made available to that area vocational school.

"(3) In the case of an intermediate educational agency the amounts calculated under subsection (a) that are available to local educational agencies served by that intermediate educational agency shall be made available to that intermediate educational agency.

"(c)(1) No local educational agency, area vocational school or intermediate educational agency, shall be eligible for an allocation unless the amount calculated under subsection (a) equals or exceeds $25,000.

"(2) Local educational agencies, area vocational schools or intermediate educational agencies may form consortia and aggregate the amounts such agencies or schools would be eligible to receive under subsection (a) in order to comply with the provisions of paragraph (1).

"(3) The provisions of paragraph (1) shall not apply to State correctional agencies.

"(d) In the case that an area vocational school and a local educational agency served by such area vocational school offer comparable vocational education programs, the State agency may distribute funds to both an area vocational school and a local educational agency served by such area vocational school on the basis of the enrollment of students in vocational educational programs, provided the provisions of subsection (c)(1) are met for each area vocational school and the local educational agency.

"(e) In applying the provisions of subsection (a), no State board receiving assistance under this Act shall allocate funds to a local educational agency which only serves elementary schools.

"STATE RESERVE FOR AREAS WITH SEVERE PROBLEMS

"SEC. 222. (a) Each State receiving financial assistance under this part may reserve not to exceed 10 percent of such amount for distribution to local educational agencies, area vocational schools, or intermediate educational agencies experiencing particularly severe hardships such as severe unemployment, a severe poverty concentration, a high dropout problem, a high crime rate, a high incidence of drug abuse or a high con-

centration of limited English proficient students, all of which are above the statewide average.

"(b)(1) If a State elects to reserve funds pursuant to subsection (a) the State shall match such funds, on a dollar-for-dollar basis to each local recipient, from State sources or from private sources.

"(2) In no event shall a State reserving funds pursuant to subsection (a) use funds from local educational agencies, area vocational schools, or intermediate educational agencies to meet the requirements of paragraph (1).

"POPULATIONS TO BE SERVED

"SEC. 223. (a) Each local educational agency, area vocational school, intermediate educational agency, or State agency responsible for carrying out correctional educational programs receiving funds under this subpart shall use such funds to provide vocational education services and activities designed to meet the special needs of, and to enhance the participation of—

"(1) the economically disadvantaged;

"(2) individuals with disabilities;

"(3) individuals who participate in programs designed to eliminate sex bias and stereotyping in vocational education;

"(4) students with limited English proficiency; and

"(5) criminal offenders, both juvenile and adults, who are serving in a correctional institution.

"PROGRAMS FOR ECONOMICALLY DISADVANTAGED STUDENTS

"SEC. 224. (a) Each local educational agency, area vocational school, or intermediate educational agency receiving financial assistance under this subpart shall provide to disadvantaged individuals—

"(1) equal access in recruitment, enrollment, and placement activities; and

"(2) equal access to the full range of vocational programs available to nondisadvantaged individuals, including occupationally specific courses of study, cooperative education programs and apprenticeship programs.

"(b) For the purpose of this section the term 'disadvantaged student' means a student who is economically or educationally disadvantaged.

"PROGRAMS FOR STUDENTS WITH DISABILITIES

"SEC. 225. (a) Each local educational agency, area vocational school, or intermediate educational agency receiving financial assistance under this subpart shall provide to all individuals with disabilities within the jurisdiction of the recipient an equal opportunity for an appropriate vocational education. Such recipients shall use such funds, in combination with State and local funds, to provide to individuals with disabilities—

"(1) equal access to recruitment, enrollment, and placement activities;

"(2) equal access to the full range of vocational programs available to nonhandicapped individuals, including occupationally specific courses of study, cooperative education programs and apprenticeship programs;

"(3) vocational education programs and activities in the least restrictive environment in accordance with section 612(5)(B) of the Education of the Handicapped Act;

"(4) the vocational education component of the individualized education plan required under sections 612(4) and 614(a)(5) of the Education of the Handicapped Act;

"(5) supplementary services including curriculum modification, equipment modification, classroom modification, supportive personnel, and instructional aids and devices; and

"(6) vocational education planning for individuals with disabilities which shall be—

"(A) coordinated with appropriate representatives of vocational education and special education, and

"(B) reviewed by the head of the State office responsible for administering part B of the Education of the Handicapped Act.

"(b) Each local educational agency, area vocational school, or intermediate educational agency receiving financial assistance under this subpart shall comply with the provisions of section 504 of the Vocational Rehabilitation Act and the Education of the Handicapped Act regarding equal access to programs.

"PROGRAMS FOR STUDENTS WITH LIMITED ENGLISH PROFICIENCY

"SEC. 226. Each local educational agency, area vocational school, or intermediate educational agency receiving financial assistance under this subpart shall provide to students with limited English proficiency—

"(1) equal access in recruitment, enrollment, and placement activities;

"(2) equal access to the full range of vocational programs including occupationally specific courses of study, cooperative education programs and apprenticeship programs;

"(3) supplementary services to ensure full and equitable participation in programs, such as—

"(A) providing adapted vocational instruction simultaneously with English language instruction;

"(B) utilizing appropriate agencies and community-based organizations to communicate in, and to provide counseling in, the students' language; and

"(C) bilingual and cultural counseling; and

"(4) vocational education planning which shall be reviewed by the head of the State administrative office responsible for the education of students with limited English proficiency.

"PROGRAMS TO ELIMINATE SEX BIAS

"SEC. 227. (a) Each local educational agency, area vocational school, or intermediate educational agency receiving financial assistance under this subpart shall provide to women and men—

"(1) equal access in recruitment, enrollment, and placement activities in education and training programs in nontraditional occupations;

"(2) equal access to the full range of vocational programs including occupationally specific courses of study, cooperative education programs and apprenticeship programs;

"(3) programs to overcome sex bias, stereotyping and other barriers which inhibit the participation of women and men;

"(4) programs to expand outreach and orientation to nontraditional occupations for women and men;

"(5) supplementary services including, but not limited to, curriculum modification, equipment modification, classroom modification, supportive personnel, instructional aids and devices, and subsidized employment opportunities; and

"(6) programs to increase and provide support services.

"(b) Programs and services provided pursuant to subsection (a) shall be reviewed by the sex-equity coordinator consistent with the provisions of section 111(b)(1)(A).

"PROGRAMS FOR CRIMINAL OFFENDERS

"SEC. 228. Each State agency responsible for carrying out correctional education programs receiving financial assistance under this Act shall—

"(1) administer programs for criminal offenders, both juvenile and adults, in correctional institutions; and

"(2) provide vocational education programs for women who are incarcerated;

"(3) use funds provided pursuant to the provisions of section 221(b)(1)(A) to update equipment; and

"(4) distribute funds of services to correctional institutions in proportion to the number of individuals served by each facility, giving special emphasis to ensure services for women who are incarcerated.

"USE OF FUNDS

"SEC. 229. (a)(1) Each local educational agency, area vocational school, intermediate educational agency, and State agency responsible for corrections education receiving financial assistance under this subpart shall use such funds to—

"(A) provide to individuals described in section 223 the supplementary services necessary to ensure full and equitable participation in vocational education programs;

"(B) ensure that programs for the individuals described in section 223 are of the highest quality and are state-of-the-art; and

"(C) support supplemental or additional staff, equipment, materials, and services for the individuals described in section 223.

"(2) Each local educational agency, area vocational school, intermediate educational agency, or State agency responsible for correctional education receiving funds under this section shall use no more than 5 percent of such funds for administrative costs.

"(3) Local recipients receiving funds under this section may use such funds to develop programs in consortia or in cooperation with community-based organizations.

"(b)(1) Each local educational agency, area vocational school, intermediate educational agency, and State agency responsible for corrections education receiving financial assistance under this subpart shall, to the extent practicable, use such funds for individuals described in section 223 to—

"(A) integrate academic and vocational training which—

"(i) provides a sequential course of study that uses an applied context based on broad and specific job training and which reinforces and enhances academic skills and motivates students to excel in both academic and vocational courses; and

"(ii) encourages utilization of a business-industry model of applied learning techniques;

"(B) provide program improvement, including instructional services, curriculum and materials development and state-of-the-art equipment designed specifically to upgrade instruction;

"(C) designate a special populations coordinator who shall be a qualified counselor or teacher to ensure that special populations are receiving adequate services and job skill training; and

"(D) provide comprehensive guidance and counseling to the individuals described in section 263 who have not entered grade 9 and to the parents of such individuals concerning—

"(i) the course of study in each vocational program offered;

"(ii) the occupational opportunities for employment after graduation, as well as summer and part-time employment during the school year;

"(iii) information about postsecondary opportunities;

"(iv) information about apprenticeship opportunities; and

"(v) guidance and counseling at the prevocational level and during the vocational program.

"(2) Each local recipient receiving assistance under this subpart may use such funds for technical preparation education programs described in part B of this title for special populations described under section 223.

"(3) The individual described in paragraph (1)(C) shall be compensated in whole or in part through funds reserved pursuant to subsection (b)(2) for administrative costs.

"(4) Funds used to carry out the provisions of paragraphs (1)(A) and (1)(B) may be used to benefit other populations providing the needs of the individuals described in section 223 are being met.

"LOCAL APPLICATION

"SEC. 230. (a) Any local educational agency, area vocational school, intermediate educational agency, and State agency responsible for corrections education desiring financial assistance under this subpart shall, according to requirements established by the State board, submit to the State board an application, covering the same period as the State plan, for the use of such assistance. The State board shall determine requirements for local applications, except that each such application shall—

"(1) contain a description of the vocational education programs to be funded;

"(2) contain a report on the number of individuals in each of the special populations categories contained in section 223;

"(3) assess the needs of the special populations and planned use of funds to meet such needs;

"(4) identify the planned use of resources allocated to meet such needs;

"(5) ensure full and equitable participation in a vocational educational program of quality;

"(6) provide assurances that the programs funded under this subpart shall be carried out according to the criteria for programs for each special population described in section 223;

"(7) describe the performance evaluation standards the applicant will use to measure its progress;

"(8) demonstrate that in using funds in accordance with the provisions of sections 229 (b)(1)(A) and (b)(1)(B) the local recipient has first met the needs of the individuals described in section 223 as required by section 229 (b)(3);

"(9) describe methods to coordinate vocational education services with relevant programs conducted under the Job Training Partnership Act, including cooperative arrangements established with private industry councils established under the Job Training Partnership Act, in order to avoid duplication and to expand the range of and accessibility to vocational education services;

"(10) describe methods to be used to develop vocational educational programs in consultation with parents and students of special populations described in section 223; and

"(11) provide a description of coordination with community-based organizations.

"(b) The individual described in section 229(a)(1)(C) shall review and comment on the application submitted pursuant to subsection (a) regarding the assurances contained in such application and the services to be provided to the special populations described in section 223.

"PERFORMANCE EVALUATION AND IMPROVEMENT

"SEC. 231. (a) Each local educational agency, area vocational school, intermediate educational agency, and State agency responsible for corrections education receiving financial assistance under this subpart shall develop goals for, and evaluate the effectiveness of, the program conducted pursuant to this subpart with respect to—

"(1) progress in the achievement of basic skills;

"(2) progress in achieving occupational skills necessary to obtain employment;

"(3) the ability to meet the needs of the special populations described in section 223; and

"(4) any other measures the recipient includes to reflect accurately the success of the program.

"(b) Each entity described in subsection (a) shall consult with the State board in determining measurement indicators pursuant to the criteria set forth in subsection (a).

"(c) Each entity described in subsection (a) shall annually evaluate such entity's ability to meet the criteria developed under subsection (a). If any entity described in subsection (a) determines that such entity is not making substantial progress in meeting the criteria set forth in subsection (a), such entity shall develop a plan for program improvement.

"(d) Each entity described in subsection (a) shall regularly review programs, with the full and informed participation of representatives of the special populations described in section 223, to identify and to adopt measures to overcome any barriers which are resulting in lower rates of access or success for special populations.

"PROGRAM IMPROVEMENT PLAN

"SEC. 232. (a) The plan developed pursuant to section 231(c) shall describe how the local educational agency, area vocational school, intermediate educational agency, or State agency responsible for corrections education will identify and modify programs funded under this subpart including—

"(1) a description of vocational education strategies designed to achieve the criteria set forth in section 231(a); and

"(2) a description of measures designed to improve supplementary services provided to special populations described in section 223.

"(b) If after one year of implementation of the plan described in subsection (a), sufficient progress in meeting the criteria described in section 231 has not been made, the State shall work jointly with the local educational agency, area vocational school, intermediate educational agency, or State agency responsible for corrections education to develop a plan for program improvement. Each such plan shall contain—

"(1) a description of the technical assistance and program activities the State will provide to enhance the performance of the recipient;

"(2) set forth a reasonable timetable to improve the school performance under the plan;

"(3) a description of vocational education strategies designed to improve the performance of the program as measured by the evaluation; and

"(4) a description of measures designed to improve supplementary services provided to special populations described in section 223.

"Subpart 2—Postsecondary and Adult Programs

"POSTSECONDARY AND ADULT PROGRAMS

"SEC. 240. (a) From amounts reserved under section 102(a)(3)(B) the State board shall make grants, on a competitive basis, or on the basis of a formula as determined by the State board, to—

"(1) postsecondary educational institutions;

"(2) programs for adults in secondary schools;

"(3) area vocational schools serving postsecondary students or adults;

"(4) community-based organizations providing vocational education to adults;

"(5) any of the entities set forth in paragraphs (1) through (3) in partnership with business and industry; and

"(6) consortia of the entities described in paragraphs (1) through (5);

to improve vocational education programs for postsecondary students, adults, and single parents, homemakers, and single pregnant women.

"(b) In awarding grants under this section the State agency shall give priority to—

"(1) programs serving economically disadvantaged individuals, individuals with disabilities, individuals with limited English proficiency and traditionally underserved populations;

"(2) apprenticeship programs, especially programs that serve the individuals described in paragraph (1);

"(3) programs that are strongly tied to economic development efforts within the State;

"(4) programs which—

"(A) train adults and students for all aspects of the occupations in which job openings are projected or currently available;

"(B) are developed in conjunction with business and industry, the community, the State board, and local eligible recipients; and

"(C) focus on the most salable, highest placement aspects of the industry; and

"(5) partnerships described in subsection (a)(5).

"(c) Grants awarded under this section shall coordinate programs and services provided under this Act with programs and services provided pursuant to—

"(1) the Job Training Partnership Act,

"(2) the Adult Education Act, and

"(3) the Welfare Reform Act,

to avoid duplication of effort and to ensure maximum effective utilization of funds under this subpart.

"POSTSECONDARY AND ADULT USE OF FUNDS

"SEC. 241. (a) Grants awarded under this subpart may be used for—

"(1) vocational programs for training or retraining adults, including programs for older individuals;

"(2) the costs of serving adults in other vocational education programs, including paying the costs of instruction or the costs of keeping school facilities open longer;

"(3) education and training programs designed cooperatively with employers, such as institutional programs, workplace literacy programs, worksite programs, including apprenticeship training programs (or combinations of such programs);

"(4) industry-education partnership training programs in high-technology occupations (including programs providing related instruction to apprentices) and projects to train skilled workers needed to produce, install, operate, and maintain high-technology equipment, systems, and processes; and

"(5) technical preparation education programs described in part B of title II.

"(b) The State shall use funds provided pursuant to this subpart for apprenticeship training programs especially tailored to—

"(1) the needs of an industry or groups of industries for skilled workers, technicians, or managers, or

"(2) enable the existing work force to adjust to changes in technology or work requirements.

"(c) Grants awarded under this subpart may be used to provide educational training through arrangements with private vocational training institutions, private postsecondary educational institutions, and employers whenever such institutions or employers can make a significant contribution to obtaining the objectives of the State plan and can provide substantially equivalent training at a lesser cost, or can provide equipment or services not available in public institutions.

"(d)(1) From funds available under this section, the State board may establish and support, through grants to institutions of higher education offering comprehensive programs in teacher preparation, statewide mentoring programs to—

"(A) fully use the skills and work experience of individuals employed or formerly employed in business and industry who are interested in becoming classroom instructors; and

"(B) meet the needs of vocational educators who wish to upgrade their teaching competencies.

"(2) Any mentoring program established under this program shall—

"(A) establish partnerships among State certification agencies, institutions of higher education offering comprehensive vocational education programs, and local educational agencies to deliver a professional development program aimed at preparing and supporting vocational educators;

"(B) provide competency-based vocational teacher education programs; and

"(C) provide assessment of professional education skills and develop a plan leading to probationary certification within 3 years;

"(D) employ as mentors highly qualified classroom educators who shall be selected by a process collaboratively developed by the institution of higher education and local educational agencies within the State, and the State board, who shall assist in—

"(i) developing and demonstrating competence in planning, teaching, evaluating, and managing classrooms;

"(ii) supervising vocational students' organizations;

"(iii) working with advisory committees;

"(iv) understanding cooperative vocational education programs;

"(v) understanding the foundations of vocational education; and

"(vi) identifying other sources of educational support and information to assist the new vocational educators in becoming effective teachers.

"PROGRAMS FOR SINGLE PARENTS, DISPLACED HOMEMAKERS, AND SINGLE PREGNANT WOMEN

"SEC. 242. (a) From amounts reserved under section 102(b)(2) each State board shall provide vocational and prevocational educational programs and services for single parents, displaced homemakers, and single pregnant women.

"(b)(1) From amounts reserved under section 102(b)(2) each State board may provide vocational and prevocational education programs and services in postsecondary or secondary school settings, including area vocational schools serving single parents, displaced homemakers and single pregnant women.

"(2) Programs and services provided pursuant to this subpart shall be administered by the sex equity coordinator as described in section 111(b)(1)(A).

"(c) From amounts reserved under section 102(b)(2) each State may—

"(1) provide, subsidize, reimburse or pay for vocational and prevocational education and training activities, including basic literacy instruction and necessary educational materials, that will furnish single parents, homemakers, and single pregnant women with marketable skills;

"(2) make grants to single parents, displaced homemakers, and single pregnant women for expanding vocational and prevocational education services when such expansion directly increases the capacity of eligible recipients for providing single parents, homemakers, and single pregnant women with marketable skills;

"(3) make grants to community-based organizations for the provision of vocational and prevocational education services to single parents, homemakers, and single pregnant women, if the State determines that the community-based organization has demonstrated effectiveness in providing comparable or related services to single parents, homemakers, and single pregnant women, taking into account the demonstrated performance of such an organization in terms of cost, the quality of training and the characteristics of the participants;

"(4) make vocational and prevocational education and training more accessible to single parents, homemakers, and single pregnant women by assisting such individuals with child care or transportation services, or adult dependent care by organizing and scheduling the programs so that such programs are more accessible; or

"(5) provide information to single parents, homemakers, and single pregnant women to inform them of vocational education programs and related support services.

"Subpart 3—General Provisions

"STATE PERFORMANCE EVALUATION AND IMPROVEMENT

"SEC. 250. (a) Each State desiring financial assistance under this part shall develop criteria for, and evaluate the effectiveness of, programs under this part with respect to—

"(1) progress in the achievement of basic skills;

"(2) progress in achieving occupational skills necessary to obtain employment;

"(3) the program's ability to meet the needs of special populations; and

"(4) any other measures the State shall deem necessary.

"(b) In developing the criteria required in subsection (a), the State board shall make every effort to develop criteria consistent with the standards and evaluations developed pursuant to section 231 by recipients of financial assistance under subpart 1. If after 2 years the State board determines that the local recipient of financial assistance under subpart 1 is not making progress in meeting the goals set forth by such recipient, the State shall work in conjunction with such recipient as prescribed in section 231 by providing program and technical assistance from funds provided under part A of title II.

"ADMINISTRATIVE PROVISIONS

"SEC. 251. (a)(1)(A) Funds made available under this part shall be used to supplement, and to the extent practicable increase the amount of State and local funds that would in the absence of such Federal funds be made available for the uses specified in the application, and in no case supplant such State or local funds.

"(B) Notwithstanding subparagraph (A), funds made available under this part may be used to pay for the costs of vocational education services required in an individualized education plan developed pursuant to sections 612(4) and 614(a)(5) of the Education of the Handicapped Act, in a manner consistent with section 614(a)(1) of such Act, and services necessary to meet the requirements of section 504 of the Rehabilitation Act of 1973 with respect to ensuring equal access to vocational education.

"(2) No State shall take into consideration payments under this Act in determining, for any educational agency or institution in that State, the eligibility for State aid, or the amount of State aid, with respect to public education within the State.

"(3) The Secretary may waive, for each of the fiscal years 1991, 1992, and 1993 on an annual basis, the requirements of paragraphs (1) and (2) with respect to any State that expended for postsecondary education programs more than 75 percent of the funds available under this title in fiscal year 1989.

"(b) Any project assisted with funds made available under this part shall be of sufficient size, scope, and quality to give reasonable promise of meeting the vocational education needs of the students involved in the project.

"(c)(1) Vocational education services and activities described in this part may include work-site programs such as cooperative vocational education, programs with community-based organizations, work-study, and apprenticeship programs.

"(2) Vocational education services and activities described in this part may include placement services for students who have successfully completed vocational education programs.

"(d) Each State board receiving financial assistance under this part may consider granting academic credit for vocational education courses which integrate core academic competencies.".

TITLE III—SPECIAL PROGRAMS

SEC. 301. SPECIAL PROGRAMS AMENDMENTS.

Title III of the Act is amended—

(1) in section 302(b) by—

(A) redesignating paragraphs (6) and (7) as paragraphs (7) and (8), respectively; and

(B) inserting the following new paragraph (6) after paragraph (5):

"(6) model programs for school dropouts;";

(2) in section 311 by inserting "individual and family health," after "nutrition,";

(3) in section 312—

(A) in subsection (b)(1) by—

(i) striking "managing home and work responsibilities" and inserting "balancing work and family";

(ii) inserting "(including family violence and child abuse)" after "family crisis";

(iii) inserting "(especially among teenage parents), preventing teen pregnancy," after "parenting skills";

(iv) inserting "assisting at-risk population (including the homeless)," after "handicapped individuals,"; and

(v) striking "improving nutrition" and inserting "improving individual child and family nutrition and wellness";

(4) in section 313 by—

(A) in subsection (a) by inserting "educational" after "experience and";

(B) redesignating subsection (b) as subsection (c); and

(C) inserting the following new subsection (b) after subsection (a):

"(b) Funds available under this part may be used to provide full-time State leadership

and administrators with educational preparation in home economic education."; and

(5) by striking parts C, D, and E.

SEC. 302. SUPPLEMENTARY GRANTS.

Title III of the Act is amended by inserting at the end thereof the following new part F:

"PART F—SUPPLEMENTARY GRANTS

"SUPPLEMENTARY GRANTS

"SEC. 351. (a) The Secretary of Education shall allocate funds available under this section among the States according to each State's share of allocations under section 1006 of the Elementary and Secondary Education Act of 1965 to make supplementary grants to needy areas.

"(b) There are authorized to be appropriated $100,000,000 in fiscal year 1991 and such sums as may be necessary for each of the fiscal years 1992, 1993, 1994 and 1995 to carry out the provisions of this section.".

TITLE IV—NATIONAL PROGRAMS

SEC. 401. NATIONAL ASSESSMENT.

Section 403 of the Act is amended to read as follows:

"NATIONAL ASSESSMENT OF VOCATIONAL EDUCATION

"SEC. 403. (a)(1) The Secretary shall conduct a national assessment of vocational education programs assisted under this Act, through studies and analyses conducted independently through competitive awards.

"(2) The Secretary shall appoint an independent advisory panel, consisting of vocational education administrators, educators, researchers, representatives of business and industry, and other relevant groups, to advise the Secretary on the implementation of such assessment, including the issues to be addressed, the methodology of the studies, and the findings and recommendations. The panel, at its discretion, may submit to the Congress an independent analysis of the findings and recommendations of the assessment. The application of the Federal Advisory Committee Act is waived for the provisions of this paragraph.

"(b) The assessment required under subsection (a) shall include descriptions and evaluations of—

"(1) the effect of this Act on State administration of vocational education programs and on local vocational education practices, including the capacity of State and local vocational education systems to address the priorities identified in this Act;

"(2) expenditures at the Federal, State, and local levels to address program improvement in vocational education, including the impact of Federal allocation requirements (such as within-State allocation formulas) on the delivery of services;

"(3) preparation and qualifications of teachers of vocational and academic curricula in vocational education programs, as well as shortages of these teachers;

"(4) participation in vocational education programs, including, in particular, access of special populations identified in this Act to high-quality vocational education programs and the impact, on the delivery of services to these populations, of Federal legislation giving States flexibility in allocating funds to serve these populations;

"(5) academic and employment outcomes of vocational education, including analyses of—

"(A) the impact of educational reform on vocational education;

"(B) the extent and success of integration of academic and vocational curricula;

"(C) the success of the school-to-work transition; and

"(D) the degree to which vocational training is relevant to subsequent employment;

"(6) employer involvement in, and satisfaction with, vocational education programs;

"(7) the impact of performance standards and other measures of accountability on the delivery of vocational education services;

"(8) the impact of Federal requirements regarding criteria for services to special populations identified in this Act, participatory planning in the States, and articulation between secondary and postsecondary programs; and

"(9) coordination of services under this Act, the Adult Education Act, the Family Support Act of 1988, the Job Training Partnership Act, the National Apprenticeship Act, the Rehabilitation Act of 1973, and the Wagner-Peyser Act.

"(c) The Secretary shall consult with the Committee on Labor and Human Resources of the Senate and the Committee on Education and Labor of the House of Representatives in the design and implementation of the assessment required under subsection (a). The Secretary shall submit an interim report no later than January 1, 1994, to the Congress. The Secretary shall submit a final report, summarizing all studies and analyses completed after the assessment, to the Congress not later than July 1, 1994. Notwithstanding any other provision of law or regulation, such reports shall not be subject to any review outside of the National Institute of Education before their transmittal to the Congress, but the President and the Secretary may make such additional recommendations to the Congress with respect to the assessment as they deem appropriate.

"(d) There is authorized to be appropriated $3,000,000 for each of fiscal years 1991 and 1992 to carry out the provisions of this section. Such funds shall remain available until expended.".

SEC. 402. OFFICE OF EDUCATIONAL RESEARCH AND IMPROVEMENT.

(a) Section 404 of the Act is amended to read as follows:

"SEC. 404. (a) The Office of Educational Research and Improvement shall contract for the establishment and operation of 3 or more vocational education research centers, of which 1 shall be a research center on Native Americans.

"(b) The Secretary shall continue to honor the provisions of the grant award to the National Center for Research in Vocational Education located in Berkeley, California, through December 31, 1992.

"(c) The Secretary shall establish an educational research center to conduct research on the educational participation, needs and performance of Native Americans. The Center shall consider teaching and learning for Native American students from childhood through adulthood. Specific priorities shall include, not be limited to—

"(1) early childhood education;

"(2) home, family, and cultural influences on education;

"(3) vocational education and training; and

"(4) participation in postsecondary education, especially the factors that limit participation of Native Americans.".

(b) The amendment made by subsection (a) shall not affect contracts made by the National Center for Research in Vocational Education prior to the date of enactment of this Act.

SEC. 403. FORMULA STUDY.

Part A of title IV of the Act is amended by inserting at the end thereof the following new section:

"STUDY OF CARL D. PERKINS VOCATIONAL EDUCATION ACT FORMULA

"SEC. 405. (a) The Secretary shall, through grant or contract conduct a study of the distribution of Federal vocational education funds to the States. The study shall consider the distributional effects of the within State allocation formula set forth in section 102 including the age cohorts and the per capita income allotment ratios and shall also examine the impact that various other factors such as State tax capacity, tax effort, per capita income, poverty and educational achievement, could have in achieving the Federal goals and policy objectives of this Act. The study shall specifically address the appropriate distribution mechanism to serve the target populations of the Act.

"(b) The study shall explore the use of other possible methods of targeting funds to special populations of the Act, particularly the economically disadvantaged, including but not limited to the poverty rate of the school-aged population, the gross State product per school-aged child, relative tax capacity, and tax effort of the State, unemployment figures, and dropout rates.

"(c) The findings of the study shall be used to formulate recommendations on the most appropriate criteria and methods to direct Federal funds to the States and to achieve the Federal goals and policy objectives of this Act.

"(d) The study required under subsection (a) shall be completed by January 1, 1994.".

SEC. 404. DEMONSTRATION PROGRAMS.

Part B of title IV of the Act is amended to read as follows:

"PART B—DEMONSTRATION PROGRAMS

"PROGRAMS AUTHORIZED

"SEC. 411. (a) From amounts available pursuant to section 101(a)(1)(A) in each fiscal year the Secretary shall reserve—

"(1) 10 percent for demonstration programs in accordance with the provisions of section 416; and

"(2) 25 percent for demonstration programs in accordance with the provisions of section 419.

"(b) From the remainder of funds available under section 101(a)(1)(A), the Secretary shall make demonstration grants in accordance with the provisions of this part.

"DEMONSTRATION PROJECTS FOR THE INTEGRATION OF VOCATIONAL AND ACADEMIC LEARNING

"SEC. 412. (a) The Secretary is authorized to make grants to institutions of higher education, area vocational schools, local educational agencies, State boards, public or private nonprofit organizations, or any consortia thereof, to develop, implement and operate programs using different models of curricula which integrate vocational and academic learning by—

"(1) designing integrated curricula and courses;

"(2) providing inservice training for teachers and administrators in integrated curricula; and

"(3) disseminating information regarding effective integrative strategies to other school districts through the National Diffusion Network;

"(b) In awarding grants under this section, the Secretary shall ensure—

"(1) an equitable geographic distribution of funds awarded pursuant to this section;

"(2) that programs supported under this section offer significantly different approaches to integrating curricula;

"(3) that the programs supported under this section serve special populations;

"(4) that programs supported under this section serve vocational students in secondary schools, at postsecondary institutions, individuals enrolled in adult programs, and programs for single parents, homemakers, and single pregnant women; and

"(5) that adequate evaluation measures will be employed to measure the effectiveness of the curriculum approaches supported under this section.

"BUSINESS AND INDUSTRY PARTNERSHIPS

"SEC. 413. (a) The Secretary is authorized to make grants to partnerships among—

"(1) an area vocational school, a State agency, a local educational agency, an institution of higher education, or an adult learning center; and

"(2) business and industry, or apprenticeship programs.

"(b) Grants awarded under this section may be used to—

"(1) increase the access to, and quality of, programs for special populations described in section 223;

"(2) strengthen coordination between vocational education programs, and the labor and skill needs of business and industry;

"(3) address the economic development needs of the area served by the partnership;

"(4) provide training that will enable workers to retain their jobs;

"(5) provide training that will enable workers to upgrade their jobs; and

"(6) address the needs of new and emerging industries, particularly those in high-technology fields.

"(c)(1) In awarding grants under this section, the Secretary shall give priority to partnerships whose programs provide job training in areas or skills where there are significant labor shortages.

"(2) In awarding grants under this section, the Secretary shall ensure an equitable geographic distribution of funds awarded pursuant to this section.

"MODEL PROGRAMS OF REGIONAL TRAINING FOR SKILLED TRADES

"SEC. 414. (a) The Secretary is authorized to make grants to regional model centers which provide—

"(1) training for skilled tradesmen within a region serving several States, and

"(2) technical assistance for programs which train such tradesmen within a region serving several States.

"(b) The regional model centers established pursuant to subsection (a) shall—

"(1) provide training for skilled tradesmen in areas of skill shortages or projected skilled shortages;

"(2) provide pre-job and apprenticeship training in skilled trades;

"(3) upgrade specialized craft training; and

"(4) improve the access of women, minorities, the economically disadvantaged, and individuals with disabilities to trade occupations and training.

"(c) In awarding grants under this section, and to the extent practicable, the Secretary shall ensure an equitable distribution of funds available under this section to the various skilled trades.

"BLUE RIBBON VOCATIONAL EDUCATION PROGRAMS

"SEC. 415. (a) The Secretary shall disseminate information and exemplary materials regarding effective vocational education.

"(b) The Secretary shall, in consultation with the National Centers for Research in Vocational Education (hereafter in this section referred to as the 'National Centers for Research'), the National Diffusion Network, and the Blue Ribbon Schools Program, carry out programs to recognize secondary and postsecondary schools or programs which have established standards of excellence in vocational education and which have demonstrated a high level of quality, to be known as 'Blue Ribbon Vocational Programs'. The Secretary shall competitively select schools and programs to be recognized from among public and private schools or programs within the States and schools operated for Indian children by the Department of the Interior.

"(c)(1) The Secretary, in consultation with the National Centers for Research and the National Occupational Information Coordinating Committee (hereafter in this section referred to as the 'Committee'), shall designate each fiscal year several categories of vocational education, including technology preparation education, in which Blue Ribbon Applied Technology Education Program will be named. Such categories shall include participation of special populations and may include any of the following:

"(A) program improvement;

"(B) academic and occupational competencies; and

"(C) other categories determined by the Secretary in consultation with the National Centers for Research and the Committee.

"(2) Within each category, the Secretary shall determine the criteria and procedures for selection. Selection for such awards shall be based solely on merit. Schools or programs selected for awards under this section shall not be required to be representative of the States.

"(d)(1) The Secretary shall carry out the provisions of this section, including the establishment of the selection procedures, after consultation with appropriate outside parties.

"(2) No award may be made under this section unless the local educational agency, area vocational school, intermediate educational agency, or appropriate State agency with jurisdiction over the school or program involved submits an application to the Secretary at such time, in such manner and containing such information as the Secretary may reasonably require.

"MATERIALS DEVELOPMENT IN TELECOMMUNICATIONS

"SEC. 416. (a) From amounts reserved under section 411(a)(1) the Secretary is authorized to make grants to nonprofit educational telecommunications entities to pay the Federal share of the costs of the development, production, and distribution of instructional telecommunications materials and services for use in local vocational and technical educational schools and colleges.

"(b)(1) The Federal share shall be 50 percent.

"(2) The non-Federal share of the costs of programs assisted under this part shall be provided from non-Federal sources.

"(c) Grants awarded pursuant to this section may be used to provide—

"(1) a sequential course of study that includes either preproduced video courseware or direct interactive teaching delivered via satellite, accompanied by a variety of print and computer-based instructional materials;

"(2) the development of individual videocassettes or a series of videocassettes that supplement instruction, distributed both via broadcast and nonbroadcast means;

"(3) videodiscs that produce simulated hands-on training; and

"(4) teacher training programs for vocational educators and administrators.

"(d) In awarding grants under this section the Secretary shall give priority to programs or projects which serve—

"(1) out of school adults in need of basic skills improvement or a high school equivalency diploma to improve such individual's employability;

"(2) college students, particularly those working toward a 2-year associate degree from a technical or community college;

"(3) workers in need of basic skills or vocational instruction to retain employment;

"(4) workers who need to upgrade their skills to obtain jobs in high growth industries.

"PROFESSIONAL DEVELOPMENT

"SEC. 417. (a) From sums available for this title, the Secretary shall provide, through grants to institutions of higher education or State educational agencies, opportunities for teacher education and professional development.

"(b) Grants awarded pursuant to this section shall be used for—

"(1) leadership development stipends for experienced vocational educators to participate in advanced study of vocational education;

"(2) teacher education fellowships for individuals who are—

"(A) currently employed in vocational education who need to update or maintain currency in their technological skills;

"(B) employed in agriculture, business, or industry who have skills and experiences in vocational fields for which there is a need for vocational educators; or

"(C) certified teachers with skills related to vocational fields who can be trained as vocational educators, especially minority instructors and those with experience in teaching the economically disadvantaged, individuals with disabilities, students with limited English proficiency, and criminal and juvenile offenders; and

"(3) internships for gifted and talented vocational education students to intern in related Federal and State agencies, vocational education research centers, or recognized vocational education associations.

"(c) In carrying out this section, the Secretary shall, based on information from the National Occupation Information Coordinating Committee and other appropriate sources, publish a listing of—

"(1) the areas of vocational education which are in need of additional personnel; and

"(2) the areas of teaching in which technological upgrading may be especially critical.

"EDUCATIONAL PROGRAMS FOR FEDERAL CORRECTIONAL INSTITUTIONS

"SEC. 418. (a) The Secretary is authorized to make grants to Federal correctional institutions in consortia with educational institutions, community-based organizations of demonstrated effectiveness, or the private sector, to provide education and training for criminal offenders in such institutions.

"(b) Grants awarded pursuant to this section may be used for—

"(1) basic education programs with an emphasis on literacy instruction;

"(2) vocational training programs;

"(3) guidance and counseling programs; and

"(4) supportive services for criminal offenders, with special emphasis on the coordination of educational services with agencies furnishing services to criminal offenders after such offenders release.

"VOCATIONAL EDUCATION LIGHTHOUSE SCHOOLS

"SEC. 419. (a) From amounts reserved under section 411(a)(2) the Secretary shall make grants to local schools to establish and

operate vocational education lighthouse schools.

"(b) Grants awarded under this subsection shall be used to establish vocational education lighthouse schools which—

"(1) serve as a model vocational education program—

"(A) to provide each student with the knowledge and experience in all aspects of the industry or enterprise the student is preparing to enter;

"(B) to provide each student with basic and higher order skills and develop problem solving abilities in the vocational setting;

"(C) to offer exceptionally high quality programs for disadvantaged and minority students;

"(D) to provide the special services and modifications necessary to help individual students successfully complete the program;

"(E) which is planned, developed and implemented with the participation of staff, local employees and local community; and

"(F) which offers a full range of programs for students who plan to seek employment upon graduation or who will enroll in a 2- or 4-year college;

"(2) provide information and assistance to other grant recipients, vocational programs, vocational education personnel, parents, students, other educators, community members and community organizations throughout the State regarding—

"(A) curriculum materials;

"(B) curriculum development, especially the integration of vocational and academic education;

"(C) inservice and preservice staff development, training and assistance, through off-site activities and through a range of short-term and long-term opportunities to participate in activities at the demonstration site;

"(D) opportunities to systematically observe the model program; and

"(E) other technical assistance and staff development as appropriate.

"(3) use funds received under this section, together with funds from non-Federal sources, to develop and implement model programs containing the elements described in paragraph (1);

"(4) develop comprehensive linkages with other local schools, community colleges, 4-year colleges, private vocational schools, community organizations, labor unions, employers, and other business groups, as appropriate; and

"(5) develop and disseminate model approaches—

"(A) for meeting the education and training needs of minority, disadvantaged, disabled, and limited English-proficient students, and

"(B) to reduce and eliminate sex bias and stereotyping.

"CAREER AND GUIDANCE COUNSELING PROGRAMS

"SEC. 420. (a) The Secretary is authorized to make grants to any State board for programs (organized and administered by certified counselors) designed to improve, expand, and extend career guidance and counseling programs, to meet the career development, vocational education, and employment needs of vocational education students and potential vocational education students. Such program shall be designed to assist individuals to—

"(1) acquire self-assessment, career planning, career decisionmaking, and employability skills;

"(2) make the transition from education and training to work;

"(3) maintain marketability of current job skills in established occupations;

"(4) develop new skills to move away from declining occupational fields and enter new and emerging fields in high-technology areas and fields experiencing skill shortages;

"(5) develop midcareer job search skills and to clarify career goals; and

"(6) obtain and use information on financial assistance for postsecondary and vocational education and job training.

"(b) The programs authorized by this section shall include services and activities to ensure the quality and effectiveness of career guidance and counseling, including, but not limited to, career information delivery system development and implementation, and the establishment of student/client outcome standards against which the effectiveness of future career guidance and counseling programs can be measured.".

SEC. 405. DATA SYSTEMS AUTHORIZED.

Section 421 of the Act is amended to read as follows:

"DATA SYSTEMS AUTHORIZED

"SEC. 421. (a)(1) The Secretary shall, directly, or by grant, contract or cooperative agreement, implement and develop a vocational educational data system (hereafter in this section referred to as the 'system') using comparative information elements and uniform definitions, to the extent practicable.

"(2) The Secretary shall establish the system not later than 6 months after the enactment of this Act.

"(3) The National Center for Education Statistics (hereafter in this section referred to as the 'National Center') shall coordinate the development and implementation of the system.

"(b) Through the system, the Secretary shall collect and analyze data in order to provide—

"(1) the Congress with information relevant to policy making, and

"(2) Federal, State and local agencies with information relevant to program management, administration and effectiveness with respect to education and employment opportunities.

"(c)(1)(A) The system shall include information—

"(i) describing the major elements of the vocational education system on at least a national basis, including information with respect to teachers, administrators, students, programs, and to the extent practicable, facilities and equipment; and

"(ii) describing the condition of vocational education with respect to the elements described in clause (i).

"(B) The information described in subparagraph (A) shall be provided, to the extent practicable, in the context of other educational data relating to the condition of the overall education system.

"(C) The Secretary, in consultation with the Task Force, the National Center, and the Office of Adult and Vocational Education (hereafter in this section referred to as the "Office"), shall modify existing general purpose and program data systems to ensure that an appropriate vocational education component is included in their design, implementation and reporting in order to fulfill the information requirements of this section.

"(2) The information system shall include data reflecting the extent of participation of the following populations:

"(A) economically disadvantaged students (including information on students in rural and urban areas);

"(B) individuals with disabilities;

"(C) individuals of limited English proficiency;

"(D) individuals who participate in programs designed to eliminate gender bias and sex stereotyping in vocational education;

"(E) adults who are in need of training and retraining;

"(F) youths incarcerated in juvenile detention or correctional facilities or criminal offenders who are serving time in correctional institutions;

"(G) single parents and displaced homemakers; and

"(H) minorities.

"(3) The Secretary, through the National Center and the Office, shall maintain and update the system at least every 3 years and ensure that the system provides the highest quality statistics and is adequate to meet the vocational education information needs of this Act. In carrying out the requirements of this paragraph, the Secretary shall ensure that appropriate methodologies are used in assessments of students of limited English proficiency and students with handicaps to ensure valid and reliable comparisons with the general student population and across program areas. With respect to standardized tests and assessments administered under this Act, test results shall be used as 1 of multiple independent indicators in assessment of performance and achievement.

"(d) The Center shall carry out an assessment of data availability and adequacy with respect to international competitiveness in vocational skills. To the extent practicable, the assessment shall include comparative policy-relevant data on vocational education in nations that are major trade partners of the United States. The assessment shall at a minimum identify available internationally comparative data on vocational education and options for obtaining and upgrading such data. The results of the assessment required by this paragraph shall be reported to the appropriate committees of the Congress not later than August 31, 1994.

"(e)(1) In establishing, maintaining, and updating the system, the Secretary shall—

"(A) use existing data collection systems operated by the Secretary and, to the extent appropriate, data collection systems operated by other Federal agencies;

"(B) conduct additional data collection efforts to augment the data collection systems described in subparagraph (A) by providing information necessary for policy analysis required by this section; and

"(C) use any independent data collection efforts that are complementary to the data collection efforts described in subparagraphs (A) and (B).

"(2) In carrying out the responsibilities imposed by this part, the Secretary shall cooperate with the Secretary of Commerce, the Secretary of Labor, and the National Occupational Information Coordinating Committee established under section 422 of this Act with respect to the development of an information system under section 463 of the Job Training Partnership Act to ensure that the information system operated under this section is compatible with and complementary to other occupational supply and demand information systems developed or maintained with Federal assistance. The Secretary shall also ensure that, to the extent feasible, the system allows international comparisons.

"(3) The Secretary shall ensure that the system, to the extent practicable, uses data definitions common to State plans, performance evaluations, and other evaluations required by this Act. The data in the system shall be available for use in preparing such

plans, standards, applications, and evaluations.

"(f) The Secretary shall report to the Congress at least biennially with respect to—

"(1) the performance of the system established under subsection (a); and

"(2) strategies to improve the system and expand its implementation.

"(g)(1) The Secretary, in consultation with the National Center and the Office, shall convene a vocational education data task force (hereafter in this section referred to as the 'Task Force').

"(2) The Secretary shall establish the Task Force before the expiration of the 90-day period beginning on the date of the enactment of this Act, and shall terminate upon the expiration of the 2-year period beginning on such date.

"(3) The Task Force shall advise the Secretary on the development and implementation of an information reporting and accounting system responsive to the diverse programs supported by this Act.

"(4) The membership of the Task Force shall be representative of Federal, State, and local agencies affected by technological information, representatives of secondary and postsecondary vocational institutions, representatives of vocational education student organizations, representatives of special populations, representatives of adult training programs funded under this Act, and representatives of apprenticeships, business, and industry.

"(5) The National Center shall provide the Task Force with staff for the purpose of carrying out its functions.

"(h) As a regular part of its assessments, the National Assessment of Educational Progress shall collect and report information for at least a nationally scientific subsample of applied technology education students, including students who are members of special populations, which shall allow for fair and accurate assessment and comparison of the educational achievement of applied technology students and other students in the areas assessed. Such assessment may include international comparisons.

"(i) Of the amounts available pursuant to section 3(e) for any fiscal year for this part, there shall be available not less than $1,000,000 to carry out the purposes of this section.".

SEC. 406. NATIONAL OCCUPATIONAL INFORMATION COORDINATING COMMITTEE.

(a) AMENDMENT TO SECTION HEADING.—The heading for section 422 of the Act is amended to read as follows:

"NATIONAL OCCUPATIONAL INFORMATION COORDINATING COMMITTEE".

(b) AMENDMENT TO TEXT.—Section 422 of the Act (20 U.S.C. 2422) is amended—

(1) in subsection (a)—

(A) by inserting after "Coordinating Committee" the following: "(hereafter in this section referred to as the 'Committee')";

(B) by inserting after "Office of Bilingual Education and Minority Language Affairs," the following: "the Assistant Secretary for Post Secondary Education,";

(C) by striking "(Manpower, Reserve Affairs, and Logistics)" and inserting "(Force Management and Personnel)";

(D) in paragraph (2), by inserting before the semicolon the following: "including regularly updated data on employment demand for agribusiness";

(E) in paragraph (3)—

(i) by striking "conduct studies on" and inserting the following: "conduct studies to improve the quality and delivery of occupational information systems to assist economic development activities, and examine"; and

(ii) by striking "and" at the end thereof;

(F) by redesignating paragraph (4) as paragraph (6); and

(G) by inserting after paragraph (3) the following new paragraphs:

"(4) continue training, technical assistance activities to support comprehensive career guidance, and applied technology counseling programs designed to promote improved career decisionmaking by individuals (especially in areas of career information delivery and use);

"(5) coordinate the efforts of Federal, State, and local agencies with respect to such programs; and ";

(2) by adding at the end thereof the following new subsections:

"(c) LONGITUDINAL OCCUPATIONAL INFORMATION DEMONSTRATION PROGRAM.—

"(1) The Committee, in consultation with the National Center for Research in Vocational Education, appropriate Federal agencies, and the States, shall establish a demonstration program to monitor educational outcomes for applied technology education using wage and other records. The Committee shall develop procedures for establishing and maintaining nationally accessible information on a sample of wage and earning records maintained by States on earnings, establishment and industry affiliation and geographical location, and on educational activities. This information shall be collected on at least an annual basis. The program shall ensure that a scientific sample of applied technology education students and nonapplied technology education students, local educational agencies, and States participate in the program. The Committee shall maintain, analyze, and report data collected under the program and shall provide technical assistance to States, local educational agencies, and others that wish to participate in the study.

"(2) The program shall provide for an independent evaluation conducted by the Office of Technological Assessment to assess the validity, fairness, accuracy, and utility of the data it produces. The report shall also describe the technical problems encountered and a description of what was learned about how to best implement and utilize data from the program.

"(3) The Executive Director of the Committee, in consultation with the Secretary, shall ensure that all personally identifiable information about students, their educational performance and their families and information with respect to individual schools shall remain confidential in accordance with the provisions of section 552 of title 5, United States Code. The data gathered under this subsection shall not be used to rank, compare, or otherwise evaluate individual students or individual schools. No individual may be included in the program without that individual's written consent. At least once every 3 years the Secretary shall remind participants in writing of their inclusion in the program.

"(d) AVAILABILITY OF AMOUNTS.—Of the amounts available pursuant to section 3(e) for each fiscal year for this part, there shall be available in each fiscal year not less than $6,000,000 to carry out the provisions of this section. Of such amounts, the Committee shall use—

"(1) to support State occupational information coordinating committees for purposes of operating State occupational information systems and career information delivery systems, the greater of—

"(A) amounts appropriated or otherwise made available for that purpose for the fiscal year 1989; and

"(B) an amount equal to not less than 75 percent of the amounts available to carry out this section; and

"(2) for purposes of carrying out subsection (c)—

"(A) an amount equal to not less than 10 percent of the amounts available to carry out this section; or

"(B) if the amount remaining after carrying out paragraph (1) is insufficient to provide the amount described in subparagraph (A), such remaining amount.".

SEC. 407. NATIONAL NETWORK FOR CURRICULUM COORDINATION IN VOCATIONAL AND TECHNICAL EDUCATION.

Part C of title IV of the Act (20 U.S.C. 2421 et seq.) is amended by adding at the end the following new section:

"NATIONAL NETWORK FOR CURRICULUM COORDINATION IN VOCATIONAL AND TECHNICAL EDUCATION

"SEC. 424. (a) From the sums allocated to carry out this section, the Secretary shall establish through grants or contracts a National Network for Curriculum Coordination in Vocational and Technical Education consisting of six regional curriculum coordination centers. The Network shall encourage the designation of a State liaison representative in each of the States. It shall be the purpose of the Network to—

"(1) provide leadership and technical assistance in vocational and technical education curriculum design, development, and dissemination;

"(2) coordinate vocational and technical education curriculum information sharing among all the States and territories;

"(3) reduce duplication of effort in vocational and technical education curriculum development activities among the States and territories; and

"(4) promote the use of vocational and technical education curriculum research findings.".

SEC. 408. REPEAL.

Part D of title IV of the Act is repealed.

SEC. 409. GENERAL PROVISIONS.

Section 451 of the Act is amended—

(1) in subsection (a)(1)—

(A) by striking "35 percent" and inserting "at least $10,000,000"; and

(B) by striking the comma at the end thereof and inserting a semicolon;

(2) in subsection (a)(2), by striking "35 percent" and inserting "at least $16,000,000";

(3) in subsection (a)(3), by striking "30 percent" and inserting "at least $1,000,000";

(4) in subsection (b) by striking paragraph (1) and inserting the following new paragraph (1):

"(1) there shall be available in fiscal year 1991 not more than $500,000 to carry out the provisions of section 405, relating to the study of the within State allocation formula set forth in section 102;";

(5) in subsection (b)(2), by striking "$3,500,000" and inserting "$6,000,000"; and

(6) by amending subsection (b)(3) to read as follows:

"(3) no less than $950,000 shall be reserved for section 424.".

TITLE V—GENERAL PROVISIONS

SEC. 501. CERTIFICATION REQUIREMENTS.

Section 502 of the Act is amended to read as follows:

"CERTIFICATION REQUIREMENTS

"SEC. 502. (a) As part of the State application required by section 113, each State board desiring to receive assistance under this Act shall certify that the State board agrees—

"(1) to provide assurances that the State board, or local educational agencies within the State, will not engage in discrimination based upon race, religion, color, national origin, sex, or handicap in the hiring, promotion, or assignment of employees of the agencies or other personnel for whom the agencies have any administrative responsibility;

"(2) to provide assurances that the State board or the local educational agencies within the State will not engage in discrimination based upon race, religion, color, national origin, sex, or handicap in the enrollment of students in schools or in courses of instruction within schools of such agencies except to carry out the approved plan; and

"(3) to provide assurances that the State agency or local educational agencies within the State will not engage in discrimination based upon race, religion, color, national origin, sex, or handicap in designing or operating extracurricular activities for students.

"(b) No application may be approved under section 113 unless the Secretary, through the Assistant Secretary of Education for Civil Rights, determines that the assurances described in paragraphs (1), (2), and (3) of subsection (a) will be met.".

SEC. 502. REGIONAL MEETINGS ON REGULATIONS.

Part A of title V of the Act is amended by inserting at the end thereof the following new section:

"REGIONAL MEETINGS ON REGULATIONS

"SEC. 507. (a) The Secretary shall convene regional meetings to obtain public involvement in the development of proposed regulations under the Carl D. Perkins Vocational Education Act Amendments of 1989. Such meetings shall include individuals and groups involved in vocational education programs under this Act, such as Federal, State, and local administrators, parents, teachers, and members of local boards of education.

"(b) During each such meeting, the Secretary shall provide for a comprehensive discussion and exchange of information on at least 4 key issues, selected by the Secretary, concerning implementation of the Carl D. Perkins Vocational Education Act Amendments of 1989. The Secretary shall take into account information received at these meetings in the development of proposed regulations, and shall publish a summary of such information in the Federal Register together with such proposed regulations.

"(c) Once such regulations have been finalized, the Secretary shall convene regional meetings to share information regarding implementation of the final regulations under the Carl D. Perkins Vocational Education Act Amendments of 1989. Such meetings shall include individuals and groups involved in vocational education under this Act, such as Federal, State, and local administrators, parents, teachers, and members of local boards of education.".

SEC. 503. DEFINITIONS.

Section 521 of the Act is amended—

(1) in paragraph (2), by striking "training program";

(2) by amending paragraph (3) to read as follows:

"(3) The term 'area vocational education school' means—

"(A) a specialized high school used exclusively or principally for the provision of vocational education to individuals who are available for study in preparation for entering the labor market;

"(B) the department of a high school exclusively or principally used for providing vocational education in no less than 5 different occupational fields to individuals who are available for study in preparation for entering the labor market;

"(C) a school that offers both secondary and postsecondary instruction, but where secondary instruction is provided in no less than 5 different occupational fields to individuals who are available for study in preparation for entering the labor market.";

(3) by striking paragraph (10) and redesignating paragraph (11) as paragraph (10);

(4) by striking paragraphs (12) and (13) and redesignating paragraphs (14), (15), (16), and (17) as paragraphs (11), (12), (13), and (14), respectively;

(5) in paragraph (12) (as redesignated in paragraph (5)) by striking the "term 'handicapped', when applied to individuals, means" and inserting "terms 'individual with a disability or individuals with disabilities' mean";

(6) by inserting the following new paragraph (15) after paragraph (14) (as redesignated in paragraph (5)):

"(15) The term 'intermediate educational agency' means a combination of school districts or counties (as defined in section 1471(5) of the Elementary and Secondary Education Act of 1965) as are recognized in a State as an administrative agency for such State's vocational or technical education schools or for vocational programs within its public elementary or secondary schools. Such term includes any other public institution or agency having administrative control and direction over a public elementary or secondary school.";

(7) by redesignating paragraphs (18) through (32) as paragraphs (16) through (30), respectively; and

(8) by inserting the following new paragraphs at the end thereof:

"(31) the term 'all aspects of the industry' means strong experience in, and understanding of, all aspects of the industry the students are preparing to enter, including planning, management, finances, technical and production skills, underlying principles of technology, and health and safety;

"(32) the term 'local eligible recipient' means a local educational agency, an area vocational school, and intermediate educational agency, or the State agency responsible for the administration of corrections education;

"(33) the term 'supplementary services' means curriculum modification, equipment modification, classroom modification, supportive personnel, and instructional aids and devices.

"(34) the term 'displaced homemaker' means an individual who—

"(A) is an adult; and

"(B)(i) has worked as an adult primarily without remuneration to care for the home and family, and for that reason has diminished marketable skills;

"(ii) has been dependent on public assistance or on the income of a relative but is no longer supported by that income;

"(iii) is a parent whose youngest dependent child will become ineligible to receive assistance under part A of title IV of the Social Security Act Aid to Families With Dependent Children within 2 years of the parent's application for assistance under this Act; or

"(iv) is unemployed or underemployed and is experiencing difficulty in obtaining any employment or suitable employment, as appropriate.

"(35) the term 'prevocation services' means services, programs, or activities designed to assist individuals who are not enrolled in vocational education programs in the selection of, or preparation for participation in, an appropriate vocational education program, such as—

"(A) services, programs, or activities related to outreach to or recruitment of potential vocational education students;

"(B) career counseling and personal counseling;

"(C) vocational assessment and testing; and

"(D) other appropriate services, programs, or activities.".

TITLE VI—CORRECTIONAL EDUCATION

SEC. 601. SHORT TITLE.

This title may be cited as the "Office of Correctional Education Act of 1989".

SEC. 602. CORRECTIONAL EDUCATION.

Title II of the Department of Education Organization Act is amended by—

(1) redesignating sections 213 and 214 as sections 214 and 215, respectively; and

(2) inserting the following new section 213 after section 212:

"OFFICE OF CORRECTIONAL EDUCATION

"SEC. 213. (a) FINDINGS.—The Congress finds and declares that—

"(1) education is important to, and makes a significant contribution to, the adjustment of individuals in society; and

"(2) there is a growing need for immediate action by the Federal Government to assist State and local educational programs for criminal offenders in correctional institutions.

"(b) STATEMENT OF PURPOSE.—It is the purpose of this title to encourage and support educational programs for criminal offenders in correctional institutions.

"(c) ESTABLISHMENT OF OFFICE.—The Secretary of Education shall establish within the Department of Education an Office of Correctional Education.

"(d) FUNCTIONS OF OFFICE.—The Secretary, through the Office of Correctional Education established under subsection (a) of this section, shall—

"(1) coordinate all correctional education programs within the Department of Education;

"(2) provide technical support to State and local educational agencies on correctional education programs and curricula;

"(3) provide an annual report to the Congress on the progress of the Office of Correctional Education and the status of correctional education in the United States;

"(4) cooperate with other Federal agencies carrying out correctional education programs to ensure coordination of such programs; and

"(5) advise the Secretary on correctional education policy.

"(e) DEFINITIONS.—As used in this section—

"(1) the term 'criminal offender' means any individual who is charged with or convicted of any criminal offense, including a youth offender or a juvenile offender;

"(2) the term 'correctional institution' means any—

"(A) prison,

"(B) jail,

"(C) reformatory,

"(D) work farm,

"(E) detention center, or

"(F) halfway house, community-based rehabilitation center, or any other similar institution designed for the confinement or rehabilitation of criminal offenders;

"(3) the term 'Secretary' means the Secretary of Education;

"(4) the term 'State' means any State of the United States, the District of Columbia, and the Commonwealth of Puerto Rico; and

"(5) the term 'State educational agency' means the State board of education or other agency or officer primarily responsible for the State supervision of public elementary and secondary schools, or, if there is no such officer or agency, an officer or agency designated by the Governor or by State law.".

TITLE VII—AUTHORIZATION OF APPROPRIATIONS

SEC. 701. AUTHORIZATION OF APPROPRIATION.

Section 3 of the Act is amended to read as follows:

"SEC. 3. (a) There are authorized to be appropriated $1,500,000,000 for fiscal year 1991 and such sums as may be necessary for each of the fiscal years 1992, 1993, 1994, and 1995 to carry out the provisions of titles I, II, III and IV of this Act.

"(b)(1) There are authorized to be appropriated $14,000,000 for the fiscal year 1991 and such sums as may be necessary for each of the fiscal years 1992, 1993, 1994, and 1995 to carry out part A of title III, relating to State assistance for vocational education support programs by community-based organizations.

"(2) There are authorized to be appropriated $37,000,000 for the fiscal year 1991 and such sums as may be necessary for each of the fiscal years 1992, 1993, 1994, and 1995 to carry out part B of title III, relating to consumer and homemaking education.

"(c) There are authorized to be appropriated $10,000,000 for the fiscal year 1991 and such sums as may be necessary for each of the fiscal years 1992, 1993, 1994, and 1995 for section 112 of title I, relating to State councils on vocational education.

"(d) There are authorized to be appropriated $4,000,000 for the fiscal year 1991 and such sums as may be necessary for the fiscal years 1992, 1993, 1994, and 1995 to carry out part E of title IV, relating to bilingual vocational training programs.

"(e) From the funds appropriated pursuant to subsection (a) for each fiscal year, 2.75 percent shall be available to carry out the provisions of title IV (other than part D), relating to national programs.".

TITLE VIII—TECHNICAL AMENDMENTS

SEC. 801. AMENDMENTS TO THE TABLE OF CONTENTS.

The table of contents of the Act is amended by—

(1) striking the item relating to section 115 and inserting "State Assessment";

(2) striking out the items relating to title II and inserting the following:

"TITLE II—BASIC STATE GRANTS FOR VOCATIONAL EDUCATION

"PART A—STATE PROGRAMS

"Sec. 201. State programs and State leadership.
"Sec. 202. Sex equity programs.

"PART B—TECHNOLOGY PREPARATION

"Sec. 211. Program authorized.
"Sec. 212. Technical preparation education programs.
"Sec. 213. Applications.
"Sec. 214. Definitions.

"PART C—SECONDARY, POST-SECONDARY, AND ADULT VOCATIONAL PROGRAMS

"Subpart 1—Secondary School Programs

"Sec. 221. Within State allocation.
"Sec. 222. State reserve for areas with severe problems.
"Sec. 223. Populations to be served.
"Sec. 224. Programs for economically disadvantaged students.
"Sec. 225. Programs for students with disabilities.
"Sec. 226. Programs for students with limited English proficiency.
"Sec. 227. Programs to eliminate sex bias.
"Sec. 228. Programs for criminal offenders.
"Sec. 229. Use of funds.
"Sec. 230. Local applications.
"Sec. 231. Performance evaluation and improvement.
"Sec. 232. Program improvement plan.

"Subpart 2—Postsecondary and Adult Programs

"Sec. 240. Postsecondary and adult programs.
"Sec. 241. Postsecondary and adult use of funds.
"Sec. 242. Programs for single parents, displaced homemakers and single pregnant women.

"Subpart 3—General Provisions

"Sec. 250. State performance evaluation and improvement.
"Sec. 251. Administrative provisions.";

(3) inserting the following at the end of title III:

"PART F—SUPPLEMENTARY GRANTS

"Sec. 351. Supplementary grants.";

(4) striking the item relating to section 404 and inserting "Office of Educational Research and Improvement";

(5) inserting the following at the end of part A of title IV:

"Sec. 405. Study of Carl D. Perkins Vocational Education Act Formula.";

(6) striking the items relating to part B of title IV and inserting the following:

"PART B—DEMONSTRATION PROGRAMS

"Sec. 411. Programs authorized.
"Sec. 412. Demonstration projects for the integration of vocational and academic learning.
"Sec. 413. Business and industry partnerships.
"Sec. 414. Model programs of regional training for skilled trades.
"Sec. 415. Blue ribbon vocational education programs.
"Sec. 416. Materials development in telecommunications.
"Sec. 417. Professional development.
"Sec. 418. Educational programs for Federal correctional institutions.
"Sec. 419. Vocational education lighthouse schools.
"Sec. 420. Career and guidance counseling programs.";

(7) striking the item relating to section 421 and inserting "Data Systems Authorized";

(8) striking the item relating to section 422 and inserting "National Occupational Information Coordinating Committee";

(9) striking the heading and section relating to part D of title IV;

(10) striking the item relating to section 502 and inserting "certification requirements"; and

(11) inserting at the end of title V the following:

"Sec. 507. Regional meetings on regulations.".

SEC. 802. THE DEPARTMENT OF EDUCATION ORGANIZATION ACT.

(a) TABLE OF CONTENTS.—Section 1 of the Department of Education Organization Act is amended by striking the items relating to section 213 and 214 and inserting the following:

"Sec. 214. Office of Correctional Education.
"Sec. 215. Federal Interagency Committee on Education.".

(b) REPEALER.—Section 213 of the Department of Education Organization Act is repealed.

SEC. 803. HIGHER EDUCATION ACT.

Section 621 of the Higher Education Act of 1965 is repealed.

TITLE IX—EFFECTIVE DATE

SEC. 901. EFFECTIVE DATE.

Except as otherwise provided, the amendments made by this Act shall take effect on July 1, 1991.

The PRESIDING OFFICER. Under the previous order, the bill will be considered under a 2-hour time limit with 1 hour under the control of the Senator from Rhode Island [Mr. PELL]; 1 hour under the control of the Senator from Kansas [Mrs. KASSEBAUM] or their designees.

The Chair recognizes Senator PELL.

Mr. PELL. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. PELL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PELL. Mr. President, I want at the outset to express my gratitude for the strong bipartisan subcommittee and committee consensus on this very important reauthorization. I know that has involved many hours of hard work at the staff level. That applies to every member of the committee regardless of party.

I know also that this accomplishment would not have been possible had it not been for the leadership provided by Senator KASSEBAUM, our subcommittee's ranking Republican. I am indebted to her and her staff for the close, cooperative relationship that has been forged at both the Member and the staff level. The results before us are due in no small measure to her commitment to quality legislation in vocational education.

Also, I would be remiss if I did not acknowledge the important contributions that many of our colleagues have made to this reauthorization bill. That is particularly true of the work of Senators INOUYE, DOMENICI, BURDICK, CONRAD, BINGAMAN, and DASCHLE with respect to programs for Indians and native Hawaiians.

Further, I cannot proceed without acknowledging the important part the

Bush administration, Secretary Cavazos, and the U.S. Department of Education have played in this area. The administration's proposals were on the table early and in detail and we have given them careful consideration. Officials from the Department have met on several occasions at the staff level, and those sessions, as I understand it, have been positive and productive. This is a change, indeed, from some of the experiences we have had in recent years, and it is a change we find refreshing and that we welcome in the spirit of partnership.

The legislation before us is the product of seven reauthorization hearings and months of conferences and meetings with interested parties. One theme has been dominant throughout this period, and that has been the overwhelming need to make sure that vocational education and training in America is of the highest quality possible. To do anything less with the Federal dollar is not only to cheat the people who seek and need these services but also to cheat our Nation and its ability to compete on an equal footing in the international marketplace.

At the beginning of this process, I stressed five goals that I thought must be addressed. They were targeting the money to those who need Federal help the most, stressing a linkage between secondary and postsecondary education, integrating academic and vocational education, making sure that our programs are state of the art, and adherence to the principle that what we do is not just job training, but vocational education and training. We do not simply prepare a person for a job; we prepare them for a lifetime.

With those goals in mind, I want to review briefly some of what I consider to be the most important provisions of the bill we today bring to the floor. First, for the first time in Federal vocational education history, we would send money directly to local education agencies or area vocational schools serving those agencies. We would do so on the basis of the chapter 1 formula in the Elementary and Secondary Education Act. Further, we would stipulate a minimum grant of sufficient size to produce change, and to avoid a frittering away of the Federal dollar.

Second, we would require that the money flowing to these areas would serve four important populations: the economically disadvantaged, the disabled, the limited English proficient, and the equity needs and concerns of training women and men in nontraditional occupations.

Third, of particular interest to me, we would count and consider the incarcerated as a local education agency to receive funds under this act. This, we hope, will result in an increased flow of funds to provide education and training to end the horror of the revolving door from prison to society and back to prison.

Fourth, we would emphasize that funds at the local level would be spent on supplementary services for the targeted populations, and in two very important areas: the integration of academic and vocational training and program improvement, as an ongoing effort to deliver state-of-the-art vocational education and training to all students.

Fifth, we would provide a strengthened emphasis on the importance of guidance and counseling. This means both prevocational counseling and comprehensive guidance and counseling when the student is pursuing a course of study in vocational education. It means not only counseling for jobs or postsecondary education after graduation from secondary school but also part time and summer job counseling and assistance while the student is in secondary school.

Sixth, we stress the importance of the Federal dollar in terms of upgrading vocational education at the secondary level. That is where the majority of our students are, and that should be the primary thrust of the Federal dollar. It is also the area where quality vocational education programs are most necessary in terms of combating the dropout rate, overcoming the wrenching effect poverty can have on the pursuit of an education, and preparing young people either for the workplace or for additional education.

At the same time, however, we cannot neglect the important part the Federal program plays in both the adult and the postsecondary areas. We cannot pursue one course without recognizing and coming to grips with the other. Our legislation, therefore, breaks new ground in specifying a range of spending for secondary education on the one hand and another range for adult and postsecondary education. We also stress in the adult and postsecondary programs the need to serve the same traditionally underserved populations we target at the secondary level, as well as to provide programs tied to areas where employment opportunities exist and to the State economic development plans.

Seventh, we retain and protect the sex equity programs and the programs for single parents, displaced homemakers and single pregnant women. These programs have produced remarkable results, and we must insure that they continue to do so in the future.

Eighth, we provide a new, expanded and strengthened role for the State in vocational education. The dramatic change in sending money directly to local areas requires, we believe, guarantees from those areas that they will provide the programs we believe important and deliver the services to the targeted populations. Similarly, it requires that we give the State a new role and new powers in monitoring and evaluating what goes on at the local level. It requires also that we give the Secretary of Education more authority in the approval or rejection of State plans.

Ninth, we acknowledge that the State plays a critical role in curriculum development, in teacher and administrator training and retraining, and in the support of student vocational clubs. We continue Federal support for those important efforts.

Tenth, we provide new support for the tech-prep concept linking secondary and postsecondary education, but we go beyond that as well. We would include not only postsecondary education in the linkage but also apprenticeship training. In fact, our amendment pays special attention to support for apprenticeship training not only in the tech-prep provisions but also in local programs, adult and postsecondary programs, and national demonstration projects.

Mr. President, this is a highlight of the major changes we seek to make in vocational education. Our legislation makes significant changes in other areas as well, such as the collection of data on vocational education, vocational education research, and strengthening the relationship between vocational education and private industry and business.

Make no mistake about the importance of the work we do in this area. The Federal vocational education dollar accounts for only about 10 percent of all vocational education spending. But it is without question the engine that pulls the train. The Federal Government has been involved in this area since 1917 and the passage of the Smith-Hughes Act. We are no strangers to the field and to just how critical a role we play. It is within that framework that we have gone about our work in reauthorization, for it is truly as Georgia Congressman Dudley Hughes said when the original Smith-Hughes Act was passed:

> The greatest resource of any nation is the undeveloped skill and vocational education possibilities of its population. We must work this as industriously as we have worked our water power, our mines, our fields. Vocational training is especially needed to prevent waste of human labor, which is the most destructive form of extravagance of which a nation can be guilty.

Mr. President, this message is timeless, and its meaning is extremely poignant today. As we begin this last decade of the 20th century, we can see clearly that economic leadership in the world will be a contest among three areas: Japan and Asia; Europe, and the United States. Where we eventually stand in that competition will depend directly upon the quality of the education and training provided our citizens. If we are to have a world-

class work force, we must have a world-class education. It is to the realization of that goal that this legislation is devoted, and it is in that spirit that it has been written.

The PRESIDING OFFICER. The Chair recognizes Senator KASSEBAUM from Kansas.

Mrs. KASSEBAUM. Mr. President, it has been a great pleasure to work with my colleague from Rhode Island [Mr. PELL], who is chairman of the Education Subcommittee, in shaping what I think is a very strong bill reauthorizing the Carl D. Perkins Vocational Education Act. It is legislation that I care a great deal about. I think we all do.

We have come to recognize the importance of vocational education not only because it is important to us in maintaining competitiveness in international markets and in maintaining our standard of living, but it also has, I think, increased our awareness of the importance of training skilled workers.

It is unfortunate, Mr. President, that vocational education is too often regarded as a stepchild of our overall education system. In fact, we should be taking quite the opposite view. Strong vocational programs are a critical component of the economic machinery which will assure our continued world leadership and prosperity.

Federal support plays a small, but critical, role in vocational education. It enhances substantial State and local efforts in this area by encouraging broad program improvement activities and targeting aid toward populations which might otherwise be neglected.

This legislation that we are putting forward today for a vote attempts to meld the traditional purposes of Federal education assistance by emphasizing program improvement for special populations. It recognizes that expanding the access of disadvantaged populations is meaningless unless that access is provided to high quality programs.

The chairman of the subcommittee has really laid out many of the details, but I would like to reiterate a few, Mr. President.

Overall, the bill strikes a good balance among often competing concerns. It preserves a strong State leadership role in areas such as teacher training and curriculum development, which are most effectively conducted on a statewide basis. At the same time, it strengthens local efforts by directing assistance to local school districts based on a formula which focuses on those in greatest need of Federal support.

It increases flexibility through the elimination of most set-asides while maintaining accountability for assuring that special needs are met. Although I would have preferred eliminating all set-asides, I acknowledge the strong feelings expressed both by my colleagues and by many of our hearing witnesses that there is not yet sufficient sensitivity to the needs of single parents, displaced homemakers, and those seeking nontraditional training to assure these individuals will be fully included in the system. I do believe that a great deal of progress has been made, and I hope to see the day when these interests are so fully incorporated into our thinking that special treatment will no longer be necessary and required in legislation.

The legislation emphasizes the need for better coordination of vocational education programs through the establishment of so-called 2-plus-2 programs, which link the last 2 years of high school with 2 years of postsecondary training. It also recognizes the important role which apprenticeship programs and area vocational schools play in the delivery of vocational education.

It also stresses the importance of the linkage between academic and vocational training, attempting to dispel the notion that the two are somehow at odds with one another. They are, indeed not.

At a time when the computer is a main tool for all of us—some have become greater experts than others—we recognize technical competence demands a strong command of academic subjects.

The measure underscores the need for strong counseling programs and the need to more effectively tie occupational training to real opportunities in the workplace. Stronger emphasis is placed on accountability for results. In addition, separate vocational education councils are maintained in order to assure the continued input of the business community which is paramount.

The legislation attempts to assure that Federal assistance is provided in grants of sufficient size to make an identifiable impact. Concentrating assistance is essential to our efforts to evaluate the impact of Federal support and to promote more generous levels of that support. I believe that the $25,000 maximum grant included in this measure will serve this purpose.

Finally, the bill emphasizes the importance of reaching high school students, many of whom will not go on for further education, by assuring that 65 percent to 75 percent of the funds available to schools are sent to the secondary level.

I think it is important that we send a strong signal regarding the need to have quality vocational programs available to students in their high school years. In response to concerns about the need for State flexibility in this area, the bill provides that States would have an opportunity to request a waiver of these provisons.

All in all, Mr. President, I believe this is a strong piece of legislation. Our sights are on a new century in which both technological and demographic changes will profoundly alter the world in which we live. I hope this measure will enhance our capability to address these challenges.

Mr. DURENBERGER. Mr. President, I compliment the distinguished chairman of the subcommittee, the manager and author of this bill, and the distinguished ranking member of the Subcommittee on Education for the time and effort they have put into this bill. Vocational education is the keystone for providing the job-related training and education that is so critically important if we are to maintain and improve our economic competitiveness around the world.

I congratulate both of them on the initiative as well as the hard work that went into the bill that is before us today.

The bill makes some very significant changes in the Carl D. Perkins Act by channeling money to the local level, establishing a new Tech-Prep Program and eliminating a complicated set of setasides that were created in the 1984 authorization. These changes are long overdue and much needed, and they are essential if we are to improve technical education in the United States.

I am pleased also that the committee has agreed to accept several of my amendments, and particularly the amendment to change the one area in the bill that would cause me the gravest concern. Current law gives the States, all 50 of them, complete discretion over how to distribute funds between postsecondary and secondary programs.

The bill, as reported out of committee, would have required the States to spend between 65 and 75 percent of their Federal program money on secondary vocational education programs.

The Durenberger amendment would allow States to apply for a waiver to increase postsecondary funding to 50 percent to serve economically disadvantaged individuals, minorities, persons with disabilities, and persons who are limited English proficient.

In addition, my amendment allows for a demonstration waiver program for up to five States to increase postsecondary funding to 65 percent based on damand within a State for postsecondary programs.

I am also pleased that the committee accepted an earlier amendment of mine that would allow States putting greater than 75 percent of their current funding into postsecondary programs to waive the supplement, not supplant language. This will help ease the transition period for States with the highest proportion of funds going into postsecondary programs.

Mr. President, I am pleased with the progress we have made in changing at least some of the provisions of the

committee's bill and the impact that those provisions, in my opinion, would have had on postsecondary vocational education in my State of Minnesota and in many other States. Without my amendment, Minnesota's technical colleges could lose as much as $8 million in very necessary Federal funding.

I appreciate very much the cooperation the chairman has given me in my efforts to make sure that that tragic loss of funding will not take place in my State of Minnesota, but I must say, Mr. President, that I continue to be alarmed with what I perceive to be serious contradictions this bill represents with a very wise—and very broad-based—education reform movement that is now going on in the United Staes.

It is time, Mr. President—we have all heard this before from others—for a new national commitment to education, but it is also time that the Congress link arms with the President and with the Governors and with the legislatures in designing and carrying out that new national commitment.

This legislation is an opportunity to begin that process in affirming the national Government's commitment to vocational education.

While the legislation takes a number of steps in that direction, I think it also misses some very important opportunities and, in some cases, heads us backward. There are several reasons this is the case.

First, and most important, if we are to improve education in this country, we need State flexibility. At the recent Governor's Conference on Education, the overriding theme was that States need greater flexibility at the State level and at the local level if they are to improve the quality of education.

I will read you just a few excerpts from the National Education Goals as established in collaboration between all 50 of our States' Governors and the President. I quote:

> Educators must be given greater flexibility to devise challenging and inspiring strategies to serve the needs of a diverse body of students.
>
> Governors will work within their own States to develop strategies for restructuring their education systems to achieve those goals. Because States differ from one another, each State will approach this in a different manner.
>
> It is only by maintaining this balance of flexibility and accountability that we can truly improve our schools.

But before the dust had even cleared, we were once again putting new restrictions on the States. I will use Minnesota as an example. I would like to show you the problems that result due to this funding split.

Back in the 1970's, Minnesota made a conscious decision through the Minnesota Legislature as part of its overall efforts to improve education to channel most of its Federal money into its postsecondary program and then the State supplemented its secondary program through the use of State funds.

The State itself raised at least as much, if not more, money for its secondary vocational programs as were coming from the Federal level.

This bill would reverse that decision and it would shift over $8 million of the current $13 million Minnesota receives from this act. My amendment would allow Minnesota to restore part of that loss, I think probably half. But, in effect, the bill itself is saying that Minnesota's system of education and training is wrong, that it does not meet our Federal goals, when in fact, Mr. President, the State of Minnesota is an acknowledged national leader in education reform. It has one of the best educational systems in the country, as evidenced by a 3.2-percent dropout rate, the lowest in the country, its third-place ranking in ACT scores, and its second-place ranking of the number of students going on to postsecondary institutions.

Minnesota has made a significant commitment to improving education, and it has experimented with a variety of innovative programs aimed at raising the educational achievements of all Minnesotans, the difficult to educate, which this program is aimed at, and the less difficult.

This includes its enactment of the first statewide open enrollment program which allows students to move freely between districts searching for the best education.

It also includes Minnesota's Postsecondary Options Program that allows 11th- and 12th-grade students to begin taking higher education credits during high school. It was also a decision by the State legislature way back in the seventies to transfer its Federal vocational money into its technical college system and to supplement secondary vocational education through State funds.

The point, Mr. President, is simple. The people of Minnesota have a clear, long-term education plan that encompasses all areas of education. Their plan best represents the needs of the people of Minnesota in the area of education, and we at the Federal level should not be telling a State like Minnesota that their plan is wrong, especially when that State is already leading the Nation in the goals this bill is trying to accomplish.

So, Mr. President, I would argue, too, that Minnesota is not an exception. There are many States out there in a similar situation as Minnesota, each with a differing need that we cannot begin to define in one national goal.

The second point, Mr. President, about this split is that it does not account for the changing economic and demographic trends of the work force for the year 1990 and beyond. Along with the distinguished chairman of the Labor and Human Resources Committee, the distinguished Senator from Maryland and I and others have spent the last year looking at what we as a Nation need to do to prepare ourselves for the challenges of the workplace of the future.

What we have learned so far is that to be competitive in that future, we need to have in place a strong infrastructure to train and to educate all of our potential workers. Demographics tell us that 85 percent of the work force at the turn of the century are already in the work force to date.

We also know that the skills of a large number of these workers are becoming obsolete or soon will be made obsolete by changes in technology. Workers, threatened by dislocation due to plant closures, industrial relocation, and increasing technology will become more dependent on vocational education and the community college system for the training and retraining they need to keep their skills in line with changing technology.

We have just spent the last several years trying to improve the training and retraining efforts of poorest citizens through the Family Support Act and the JTPA Program. These programs rely heavily on the infrastructure provided in the vocational education system. Eliminating or reducing funding to postsecondary vocational education programs seriously undermines the the success of these other Federal programs.

The Durenberger amendment establishes a strong link and facilitates coordination in serving individuals under these other Federal programs by allowing States to use the additional 15 percent received under the waiver to serve this population in postsecondary vocational programs.

Finally, the funding split is bad policy because if solves a very real problem with only a segment of the solution. I do not think any of us here would disagree with the goals my distinguished colleague from Rhode Island is trying to accomplish. I agree 100 percent with his goal—to increase funding for secondary schools and to reduce the dropout rate in this country. We must agree on that. They are very laudable goals. In fact, lowering the dropout rate is a national goal which was also established by the Governors and the President.

Where I think we would disagree is how that goal should be achieved. The solution of my colleague from Rhode Island is to put additional money into vocational education at the secondary level from the Federal program. I would say that that is only part of the problem and that if we are going to fix the problem of secondary schools, let us do it right. Let us give the money to States in a flexible manner that allows them to feed into a number of proven

existing programs and to try new innovative means of reform.

In trying to accomplish this goal of lower dropout rates, we should not punish those States who have attained a high graduation rate. States with a high graduation rate also have a high demand for postsecondary education. In fact, 9 of the 10 States with the highest graduation rate put 35 percent or more of their funds toward their postsecondary programs. It is true that Minnesota puts more of its Federal Perkins money into postsecondary programs than all but one other State. But I would contend that it is simply a matter of Minnesota doing a commendable job of matching the demand in the State with supply based on its low dropout rate and its high demand for postsecondary programs.

Mr. President, the bill before us makes many positive changes that will help improve vocational education in this country and I am going to vote for it here today. It makes one change, however, that I believe is simply bad policy. The inclusion of my amendment that will allow States to apply for a waiver and restore some of a State's ability to control the allocation of funding and secondary programs is a necessary step to correct that policy. I hope, however, that we will look closely at the House-passed legislation that retains current law and gives States the flexibility to meet individual State needs.

Mr. President, I yield the floor.

Mr. COCHRAN addressed the Chair.

The PRESIDING OFFICER. Who yields time to the Senator from Mississippi.

Mrs. KASSEBAUM. I yield whatever time the Senator from Mississippi would like to take.

The PRESIDING OFFICER. The Senator from Mississippi.

Mr. COCHRAN. Mr. President, I thank the distinguished Senator from Kansas for yielding me time.

Mr. President, I am very pleased to be a member of the Subcommittee on Education and to have worked with Chairman PELL, Senator KASSEBAUM, and the other members of the committee in developing this legislation.

I feel this may be the most important education bill to be considered by the 101st Congress. There are others that are very important, but I do not know of any bill that better channels and targets the available resources to equip our Nation with a talented and well qualified work force to make us competitive in the global environment developing around the world.

I do not know of a more important way to marshal our resources and our program efforts to do something really worthwhile in terms of the long-range competitiveness of the United States.

President Bush has said:

Education can be our most powerful economic program, our most important trade program, our most effective urban program, our best program for producing jobs and bringing people out of poverty.

I believe this. Education holds the key to the future of our country. If we fail to provide quality education programs, we risk not only the lives of our children but also our Nation's place in an increasingly competitive world.

If I could sum up this bill into a single message it would be, "our children deserve an opportunity to make the most of their lives—and through these opportunities to become partners in a world class work force, serving to preserve and strengthen the Nation's well being."

We did not take a timid approach in this bill. We faced the reality that:

In terms of global economic competitiveness, we are not on top;

Twenty-five percent of U.S. students do not graduate from high school, meaning that 600,000 students are dropping out of school each year;

There are not enough skilled entry-level workers to meet the needs of business and industry, and the problem is getting worse;

Eighty percent of the new jobs in the year 2000 will be in service areas, such as professional services, and information specialties; and

Twenty-seven million adults are functional illiterates who are unemployed or on welfare; if they do get employment, they are often locked into jobs that require only minimal skills and pay low wages.

The bill before us represents an earnest effort to confront these problems and to fulfill our obligation to the American people to use Federal dollars to strengthen the educational system, provide our students with opportunities to become productive citizens, and to prepare a work force capable of meeting the needs of the next century.

Traditional occupationally oriented programs are given a new emphasis to provide state-of-the-art marketable skills with a strong basic skills foundation.

I am pleased to have worked with the chairman and ranking Republican member, Senators PELL and KASSEBAUM and the other members of the Education Subcommittee in developing this legislation. It includes a bill that Senator PELL and I introduced a year ago, the Tech-Prep Education Act, designed to provide Federal assistance to local educational agencies and postsecondary institutions to foster the development of 4-year technical-education preparation programs linking the last 2 years of high school with the first 2 years of postsecondary education. States are encouraged to develop a coordinated curriculum of mathematics, science, and technology courses to meet local and regional occupation needs, training students to do the jobs that exist in their areas of the country.

Tech-Prep model programs have been developed in Mississippi and other States. They are important links to career opportunities for young people who are at risk of dropping out of school or might otherwise not go to college. Sometimes referred to as "2-plus-2," so well described by Senator KASSEBAUM earlier today, Tech-Prep has become the cornerstone of S. 1109, which requires States to reserve a minimum of 5 percent of their Federal allocation for Tech-Prep programs.

Another important component of S. 1109 is a provision authorizing grants to States to be used to improve and expand vocational programs in areas with high concentrations of disadvantaged students.

States experiencing high incidence of student dropouts, teen pregnancies, unemployment, or poverty generally do not have resources adequate to serve the disadvantaged student population.

Since vocational education programs offer the potential for employment and self reliance, I believe it appropriate to target additional Federal funds to these States to help break the cycle of low job potential or welfare dependency.

S. 1109, the bill before the Senate, strengthens the role of the State Councils on Vocational Education. They serve as very important links with the private sector. In Mississippi, for example, the State council has worked with State government to improve the quality of vocational education. Valuable contributions of the Mississippi Council include recommendations to the State board to improve its system of evaluation in order to improve consistency and effectiveness; assistance in developing better coordination between the Job Training Partnership Act and the vocational program; and cooperation with the State Vocational Rehabilitation Office to establish a vocational program for hearing-impaired students through the community college system.

The National Association of State Councils of Vocational Education has compiled a booklet entitled "Private Sector Successes in Improving and Modernizing Vocational Technical Education."

This booklet describes the significant contributions State councils make in every State. It indicates that over one-third of the State councils are involved in activities in four key areas: accessibility for targeted populations, finance, strategic and visionary planning, and private sector participation.

The bill before the Senate encourages greater involvement by the private sector, trade organizations, student clubs, and school board members. In addition, State boards are required to consult with the State council in developing the State's vocational educa-

tion plan. State councils are given authority to review State plans and to register formal objections, if they disagree with those plans.

Mr. President, let me also note that the Department of Education has worked closely with our subcommittee in developing this legislation. Several themes advanced by the administration are included in the bill, such as accountability for program quality, student achievement, and program improvement.

I want to thank especially Chairman PELL and his staff for working with me to develop some language that would improve the involvement of business and industry representatives in the vocational program. They offer vitally important perspectives, in my opinion, and should be partners in decisions affecting our future work force.

The committee also included, at my request, a study of the vocational education funding formula which has not been reviewed since 1963, when the formula was first enacted. The study to be submitted to Congress will tell us whether the current mechanism sufficiently targets funds to States having the greatest need for Federal assistance under this act. It will examine alternative methods for directing Federal funds to States to meet the objectives of the bill.

The committee also adopted language to make it clear that there will be more flexibility for local administrators to decide how equipment purchased with Federal funds may be used. For example, some community college administrators in my State were not permitted to use equipment purchased by Federal funds under the vocational education program for additional purposes. These might include night classes for adult literacy programs in which that equipment could serve a very useful purpose to enhance the teaching of skills of those not directly involved in the vocational eduation program.

Under this legislation, there will be more flexibility for administrative decisions of that kind. I appreciate very much the committee listening to the suggestions passed on to me by an administrator from my State on that point.

Mr. President, Abraham Lincoln once summed up the importance of education when he said:

> A child is a person who is going to carry on what you have started. * * * He will assume control of your cities, States, and nations. He is going to move in and take over your churches, schools, universities, and corporations. * * * The fate of humanity is in his hands.

I think with the passage of this bill we are going to have a better equipped, better educated, more talented group of young people who will be ready to take over and run this country to ensure our competitiveness in the years ahead and to help us regain areas of lost advantage in our businesses and in our industries.

Mr. President, I commend this committee for the hard work it has done, especially the two leaders, Chairman PELL and Senator KASSEBAUM. I hope the Senate will pass this legislation unanimously.

Mr. PELL. Mr. President, I thank the Senator from Mississippi for his kind words. I yield such time as the Senator from Illinois desires to use.

Mr. SIMON. I thank my colleague, Mr. President.

My colleagues, I am pleased to rise in support of this legislation. It is part of an overall effort that we have to make to put a greater emphasis on education.

We read figures almost daily about the huge trade deficit we have. We have to compensate for that trade deficit in some way, and there are only two ways to compensate for it. Either we eventually reduce our standard of living and our quality of life, or we increase our productivity. Those are the only two options.

Clearly, the better option is to increase our productivity. I commend the chairman of the subcommittee, Senator PELL, as well as the ranking member, Senator KASSEBAUM, for their work in this area.

I have to tell you, in connection with Senator KASSEBAUM, I was concerned when our former colleague, Senator Stafford of Vermont, left and I wondered who can possibly take his place, because he made much a great contribution. But the Senator from Kansas has moved in and is doing very, very well. She has been an asset to the Senate for some time, but she has moved into this area that is somewhat new to her and has done a superb job. We are very grateful for that.

There is no question that we have to do better in this area. While the formula that is involved does not please everyone, you can never get formulas that please everyone. I think it is practical; I think it is a reasonable, commonsense compromise.

One other point that I make, Mr. President, that I think is important is I am a little concerned by the image some people have out there of those who participate in vocational education. I think there is a little putting down of people who participate in vocational education that should not be there.

Michelangelo, my guess is, would have been a great student of vocational education. He had a great gift with his hands and still became a great artist. This is very interesting to me. In southern Illinois we have an auto parts plant, in Nashville, IL. The person who runs it went to school in Germany and was a vocational education student. He now is in charge of a major factory in our country.

Those who go into vocational education should not consider that their horizons are limited, that we have gifts with our hands, and to combine those gifts with the gift of our minds is a natural thing. We ought to be proud of those who participate in this process.

In general, Mr. President, I think this is one small step in a direction that we have to take as a nation.

Excluding the School Lunch Program, we spend less than 2 percent of our Federal budget on education. I do not know of another Nation, rich or poor, that spends that little on education.

I heard the chairman, our colleague, Senator BOREN of Oklahoma, of the Senate Intelligence Committee, say a few weeks ago the greatest security threat to this Nation is our failure to develop the human resource that we have. I think he is correct. This bill is an attempt to help develop those human resources, to continue a program that is good and to encourage its growth.

Again I commend Senator PELL and Senator KASSEBAUM for their leadership in this. I have been pleased to play a small part in this whole process.

Mr. President, I am very pleased to support S. 1109, the Carl D. Perkins Vocational Education Act Amendments of 1989. I want to thank Senator PELL, Senator KASSEBAUM, and Senator KENNEDY for their leadership in this area, and for their work in putting together a bill to help address the vocational education and job training needs of our Nation.

As we enter the 1990's, the United States finds itself faced with fierce worldwide economic competition, the likes of which we have never seen before. In the last decade we have gone from being the nation with the highest net trade surplus, to the nation with the highest net trade debt. We cannot let this trend continue: We must do better. In order to be competitive in a global economy we must commit ourselves to training our workers. We must make job training and education a national priority—it is time to reinvest in America. I am strongly committed to this issue and I have made it a personal priority.

In February, the Senate passed S. 1310, the National Literacy Act of 1989, a bill I authorized to focus attention on the problem of illiteracy in this country. There are over 23 million functionally illiterate adults in this Nation. This population is ill-prepared to enter a job force that continues to demand higher and higher skills. Our workers must at least have access to basic skills education, and literacy is one of the most basic skills of all.

In addition, the Senate will soon consider, S. 543, the Job Training and Basic Skills Act of 1989. I sponsored

this legislation to amend the Job Training Partnership Act [JTPA] to help redirect our job training resources. The JTPA amendments will ensure that the individuals served under the program will not simply be placed in a job, but instead will be provided the training and basic skills necessary for a lifetime of productive work. The JTPA amendments direct our limited funds to those most in need—the populations who face the most barriers in employment. Indeed 80 percent of the Nation's work force growth in this decade will be a result of increases in the numbers of women minorities and immigrants entering the work force. These groups have historically been disadvantaged in education and in the workplace, and typically face more barriers to employment. I sincerely hope that S. 543 will come before the full Senate in the near future.

The bill before us today is another step in the right direction. The focus of S. 1109, the Carl D. Perkins Vocational Educational Act of 1989, is on basic skills training, and on targeting needy populations. The bill also emphasizes the need to provide advanced technical training. S. 1109 will help train students to become valuable members of our evolving work force, and help our Nation become more competitive in the global economy.

In addition, I would like to thank the prinicipal sponsors for addressing some specific concerns I had regarding flexibility in the secondary-postsecondary split, the need to encourage apprenticeships and other marketable skills, the importance of funding the National Network for Curriculum Coordination Centers—a valuable resource to all vocational and technical education programs, and for the extra protections added for students with disabilities and other special populations. Students with disabilities, in particular, must be guaranteed access to these important programs and the supplementary services necessary for successful participation. Frankly, I have some concern that the removal of a set-aside for this population could have a detrimental effect on services. I have worked closely with the principal sponsors to prevent such an occurrence. I am pleased that the bill targets the basic grant money solely to special populations. The targeting should ensure services to students with disabilities and other special populations. I am also pleased that the sponsors included clarifying and technical amendments I suggested to help protect service to special populations.

I strongly support this legislation, and I am proud to be a cosponsor. Once again, I would like to thank Senators PELL, KASSEBAUM, and KENNEDY for their tireless work on this bill. I would also like to extend my gratitude to David Evans, and Ann Young of Senator PELL's staff, Susan Hattan and Becky Rogers Voslow of Senator KASSEBAUM's staff, and Terry Hartle of Senator KENNEDY's staff. They have all contributed a great deal of time and effort to this legislation, and they have performed admirably.

The PRESIDING OFFICER. The Senator from Kansas.

Mrs. KASSEBAUM. I thank the Senator from Illinois. He has been a very valuable member of the Labor Committee as we shaped this legislation.

Mr. COATS. Mr. President, I am pleased to support the Carl D. Perkins Act of 1989. I think this vocational education reauthorization bill reflects the effort by both parties to overcome differences and work together to support vocational education. This issue is vitally important to our Nation's future. The students that we help today will contribute their training, talent, and energy to our country's future. This is a good investment and I am pleased to offer my support.

I spoke with students last month who attend a technical college in Gary IN [Ivy Tech]. These students expressed to me the opportunities that were made available to them through vocational education funds from Washington. These students are obtaining degrees that will enable them to compete in the job market and provide a better future for their families. The option of a 2-year trade school was attractive to these students because they could not afford to be away from a job or children as long as a four-year college would require.

I have also spoken with secondary providers of vocational education and I am encouraged by their tenacity to educate these young people with skills that allow them to participate immediately and effectively in the work world after high school.

I am convinced that the job market will continue to demand a more technological work force and that our Nation must support vocational education as a means to meet these demands.

I am pleased to support the reauthorization of the Carl Perkins Act and look forward to the fruits that it will bring in the form of a prepared work force for our future.

Mr. SYMMS. Mr. President, the true purpose of Federal assistance in vocational education is that of providing quality programs to those with the greatest need.

Currently, the Carl D. Perkins Vocational Education Act appropriates vocational education funds within each State into two parts: funds for special populations and funds for program improvement. Unfortunately, this division of funds has not always led to the implementation of quality programs for the disadvantaged, but rather it has created an artificial distinction between quality and access. Perkins funds for the handicapped and the disadvantaged have often been used to provide special populations with programs that met the State requirements, but did not provide quality vocational education.

On the other hand, funds for program improvement have gone toward purchasing state-of-the-art equipment for schools in wealthy areas with existing vocational education programs. Our present system does not target our Federal resources toward those disadvantaged individuals with the greatest need for vocational education.

I support S. 1109 because it requires that 100 percent of Perkins funds be spent on program improvement efforts for traditionally underserved populations. Furthermore, S. 1109 targets the money to those who need Federal help the most. The legislation seeks to integrate academic and vocational education, stressing that vocational education is not simply job training, but vocational education training.

The House version, H.R. 7, aims at targeting vocational education funds toward the schools with the most poor and handicapped students. The legislation looks fairly good in theory, however, the new formula that H.R. 7 uses to appropriate funds to those with the greatest need for vocational education, removes funding from many important areas.

The legislation removes funding from the current seven set-asides for special populations in the Carl D. Perkins Vocational Education Act. It proposes a new formula which would distribute 70 percent of the funds to the economically disadvantaged, 20 percent to those with handicapped conditions, and 10 percent to those schools with the most vocational education students. This formula is driven by the number of the students in the school, and not by the number of programs that the school provides for the students.

Under H.R. 7, smaller school districts will receive fewer funds to improve vocational education programs, such as the rural areas.

Finally, by eliminating the State council on vocational education, H.R. 7 will remove the State-administered focus on vocational education. The State council will be replaced by a human resources council with broader responsibility, but less specialization.

Clearly, the House version of the Carl Perkins reauthorization will not address our needs, but only exaggerate the problem. The Education Subcommittee labored hard over this issue to come up with a solution which will benefit the most individuals and I am happy to lend my support.

Mrs. KASSEBAUM. Mr. President, I ask unanimous consent that Senator

SPECTER be added as a cosponsor to the legislation.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Rhode Island.

Mr. PELL. Mr. President, I wish to endorse the words of the Senator from Illinois [Mr. SIMON] and say how glad I am that the Senator from Kansas is the ranking minority member. As to those with whom we have worked on this subcommittee, Senators Dominick, Javits, Stafford, and now KASSEBAUM, I think all this period of time when it reversed back and forth who was ranking member, who was chairman, there has been virtually no partisanship. I look forward to the continuation of what has become a tradition.

Ms. MIKULSKI. I rise in support of S. 1109, the Carl Perkins Vocational Education Act amendments because it is an excellent bill that revises and rejuvenates a needed education function, also, it is one of the best opportunities we have to focus our education resources on America's needs for the future.

I am an original cosponsor of the vocational education amendments. This bill sets a Federal priority on vocational programs that provide the technologically up-to-date, high demand, job skills that this country needs for our industries and what kids need for an employable future.

Under this bill the school system will be evaluated on how well reading and writing skills are taught along with the nuts and bolts of business skills. More than ever, students will be provided with basic skills that can be adapted to changing job market and industry demands.

S. 1109 places a strong emphasis on improving vocational education where there is the greatest need, at the high school level. However, this bill will also require school districts to combine vocational and academic skills to encourage students to go on to continue their education at a community college, or at a 4-year academic institution. This will help a lot of kids who can't afford to go on to college immediately after high school or can't go full time.

The kid that majors in auto mechanics in a comprehensive program may be motivated to go on to college to become an engineer. Especially if they can get credit in college for their high school work.

I especially commend the Senate Labor and Human Resources Committee for targeting Federal funds to school districts with high numbers of the disadvantaged.

This bill will help the kids that need it most, the kids in the inner city that need extra skills to get out and get a job or go on to college. But the Federal assistance is not limited to just the urban areas. It will also help the kids in small school districts and rural areas where the school resources are scarce, or the job opportunities are limited due to economic decline.

I especially commend my colleagues on the Senate Labor and Human Resources Committee and the committee staff, for their hard work and diligence which has resulted in this reauthorization bill. The vocational education amendments will help our youth prepare themselves for the future, and help schools adapt to new education demands.

Mr. MATSUNAGA. Mr. President, I am in strong support of S. 1109, the Vocational Education Act Amendments of 1989, and urge its passage by the Senate.

Aid for vocational education has been provided by the Federal Government since 1917 and played a major role in the U.S. transition from an agrarian to an industrial economy early in this century. Today, we are challenged in a similar manner to meet the needs of a changing workforce, an economy based on high technology and service-oriented businesses, and greatly increased global competition.

Since its inception, vocational education has been a people-oriented program. As Georgia Congressman Dudley Hughes, one of the sponsors of the original act said in 1917:

> The greatest resource of any nation is the undeveloped skill and vocational education possibilities of its population. We must work at this as industriously as we have worked (at) our water power, our mines, our fields. Vocational training is especially needed to prevent waste of human labor, which is the most destructive form of extravagance of which a nation can be guilty.

Congressman Hughes' statement is as true today as it was in 1917. By the end of the 20th century it is estimated that 85 percent of the new entrants into the work force will be women and minority group members, and others in special need of education and training. Vocational education will again play a critial role in expanding productivity and in insuring the full utilization of our precious human resources.

S. 1109 seeks to meet the needs of the future by directing Federal vocational education resources—which constitute only 10 percent of all vocational education funding—to local school districts or area vocational schools serving such districts. It would directly link vocational training with existing Federal education programs such as the chapter I program for disadvantaged children, thus assuring that funds are targeted to those most in need, and that they are distributed in sufficient amounts to provide programs that are of adequate size, sbope and quality. This new method of delivery also would emphasize the integration of academic and vocational education.

As a cosponsor of S. 1109, I am particularly pleased that the special needs of American Indians and Native Hawaiians have again been recognized. The bill retains an existing requirement that a portion of State program funds be allocated to Indians and Native Hawaiian. The set aside also was retained in the House-passed version of this measure, but S. 1109 would increase the allocation to 2.25 percent of State program moneys.

Native Americans are not only one of the poorest segments of the U.S. population. Studies show that because of their unique culture, they frequently fail to benefit from programs designed to meet the needs of other economically disadvantaged Americans. In Hawaii, for example, we are just beginning to develop new and innovative methods to motivate Native Hawaiian students in our public schools and to encourage them to seek vocational training or higher education.

Fully 20 percent of Hawaii's population—about 208,000 people—is of Native Hawaiian ancestry and potentially eligible for assistance under this program. The designated recipient of funds, a private, nonprofit corporation called Alu Like, has targeted the modest funding received under the Carl Perkins Vocational Education Act to meet the needs of the most disadvantaged Native Hawaiians, and those who are single parents, unemployed, or underemployed. Alu Like has been very successful in placing program participants in jobs, and, since 1984, has won very broad acceptance in the business community in Hawaii. By extending the American Indian/Native Hawaiian set aside for another 5 years, Congress will enable this important work to continue.

Mr. President, our young people need the changes mandated by S. 1109. I hope that favorable action will be taken on the bill by the Senate and the administration.

Mr. HARKIN. Mr. President, I support S. 1109, the Carl Perkins Vocational Education Act Amendments of 1989.

Today America is at a crossroads in the world economy: We can continue down the path toward losing our competitive edge, or we can redouble our efforts and be on the cutting edge. The bill before us today, I believe, will help us maintain our eminent place in the world economy.

I have just read with dismay a report issued by the President last month called "National Security of the United States." Looking through the table of contents, I saw a chapter entitled "Relating Means to Ends: Our Economic Agenda." Reading through that chapter, I expected to find some discussion of the importance of a skilled, educated work force if we are to meet the increasing challenges of a technological age, and remain competitive in the world economy. Yet no-

where in that chapter, nor elsewhere in that report could I find any reference to the relationship between national security and a highly skilled, educated populace.

I have to say, I find that astounding. Certainly, the national security of the United States is a matter of crucial importance, and many endeavors are undertaken in this country in the name of national security. Yet it is not just a matter of maintaining a strong defense, or of preventing the export of militarily sensitive technology abroad.

The fact is, national security is also a matter of preparing our students and our displaced workers for the jobs of tomorrow. I believe it does this Nation little good to have secure borders and peace abroad, if our human resources are deteriorating from within. We simply cannot afford, in humane or economic terms, to allow this country to stagnate in terms of economic productivity. We must continue to move forward or we will lose our place as a world power. And that takes education, job training and retraining, in addition to military strength.

That is why I believe this bill is so important. For example, we know that by the year 2000, 85 percent of the entrants into the work force will be minorities, women, and others who are currently underserved by existing vocational education—particularly individuals with disabilities. Clearly, we need to do more than we have in ensuring that these populations possess the basic skills necessary to enter the work force, and once they have done so, that they are not consigned to the lowest rung of the economic ladder. So, I am particularly pleased that the purpose of S. 1109 is to emphasize the need to serve those who are disadvantaged, those of limited English proficiency, individuals who have disabilities, those who are in correctional facilities, and to ensure that occupational sex stereotyping has no place in an equal opportunity society.

It is also not enough to prepare students for particular occupations. Students must obtain the basic academic skills and be able to place new information in a conceptual framework that will enable them to adapt successfully to work environments that will change dramatically in their lifetimes. I believe the emphasis in the bill on integration of academic skills into vocational education programs is clearly a positive step toward ensuring work preparedness.

I am also particularly pleased with the inclusion in the bill of the tech-prep, or "2-plus-2" provisions. These provisions will allow States to create linkages between secondary and postsecondary vocational instruction, with 2 years of high school training, plus 2 years of postsecondary training. The strengthened coordination that will result from these linkages is consistent with recently passed Iowa State legislation which requires that secondary vocational education curriculum be articulated with postsecondary programs, and Iowa will be ready and able to put these new funds to good use.

I would also like to express my appreciation to Senators PELL and DURENBERGER for their diligent efforts to address the issue of the split between secondary and postsecondary programs contained in S. 1109 as reported by the Labor and Human Resources Committee. In Iowa, Perkins Act funding currently is spent largely at the postsecondary level, with about 74 percent of the funds the State receives under the basic State grant being spent on postsecondary programs. As a result of intensive discussions, that provision has been modified to permit greater State flexibility in determining how to allocate funds between secondary and postsecondary programs, while maintaining the focus of the act on targeting services to individuals with limited English proficiency, individuals with disabilities, minorities, and disadvantaged students. Under the modification included in the committee amendments, States may submit a request for a waiver, along with their State plan, to allow it to spend up to 50 percent of its Perkins funds on postsecondary programs. In the case of Iowa, that would allow the State, if it so desires, to use up to an additional 15 percent of its basic grant for postsecondary programs. Those funds would have to be used to more effectively serve the populations identified above.

I realize that, as with most compromises, there will be some dissatisfaction on the part of those who both supported the split as it was agreed to by the Labor and Human Resources Committee, and those who would have preferred maintaining the total flexibility permitted under current law. However, these modifications will maintain the focus of the legislation in ensuring the availability of increased funding for secondary school programs, while reducing the potential for disruption in postsecondary program funding. It will allow Iowa to determine for itself how much of its Perkins Act funds it would like to devote to postsecondary programs, within the parameters of 25 and 50 percent of the total available funds, consistent with the goal of better serving the special populations.

In sum, I am pleased to support S. 1109, and again want to thank my colleagues on the Labor Committee, including the subcommittee and full committee chairmen, Senators PELL and KENNEDY, and the ranking members of the subcommittee and full committee, Senators KASSEBAUM and HATCH, for their excellent work on this legislation.

Mr. METZENBAUM. Mr. President, I am proud to be an original cosponsor of S. 1109, legislation to reauthorize the Carl D. Perkins Vocational Educational Act through fiscal year 1995.

This is crucial legislation. The need for accessible, high-quality, state-of-the-art vocational education programs is more critical than ever before at this time of increasing concern about American productivity, international competition, and the need to educate and train workers to meet the changing nature of the American workplace.

Vocational education can be one key to keeping pace in our global economy and retaining and building our competitive edge. It can also open doors for participants, providing opportunities for students who are economically disadvantaged or disabled, and a chance for girls and women to be trained in a nontraditional field. Our economy depends on these young people, and this legislation will help to ensure their access to quality vocational education.

Vocational education can also provide a special opportunity to address the alarming dropout problem, and I am pleased that the legislation we are considering today includes my proposal to create dropout prevention demonstration programs, utilizing vocational education strategies.

As we are all aware, the dropout situation is critical. Natiowide, the annual dropout rate averages 25 percent, and in some urban districts it is a shocking 50 percent or more. Quality vocational programs can offer a unique means of reaching these students and keeping them in school. A well-designed vocational program can often capture the interest of a student otherwise turned off by school, and make academic instruction more appealing while providing training in an employable skill. In addition to integrating academic and vocational skills, quality vocational programs are also ideally suited to provide the individual attention, mentoring, and special support services which can be so important in encouraging at risk students to remain—and succeed—in school, or perhaps decide to pursue postsecondary education. My amendment will allow funding for model programs which utilize these unique characteristics of vocational education to prevent dropouts.

S. 1109 makes a number of significant changes in our Federal vocational education efforts. It will send the majority of funds directly to local school districts and area vocational schools, and will target Federal resources on areas of greatest need. Funds will be used to ensure that needed services are provided to traditionally underserved populations: The economically disadvantaged, the disabled, those with limited English proficiency, and

women and men training for work in nontraditional fields. The bill also provides support for statewide leadership activities, such as teacher training, curriculum development, and program improvement and evaluation.

A major emphasis is placed on the integration of academic and vocational skills to ensure that students have the strong foundation in academic skills which will be needed to meet the changing nature of the workplace of the future. The important set-asides for sex equity and displaced homemakers and single parents are retained, to ensure services for these groups. The bill also places increased emphasis on the importance of guidance and counseling, the integration of secondary and postsecondary education, and apprenticeship programs.

In addition, S. 1109 will help to enhance the research and development efforts so essential to improving vocational education through the establishment of three or more national vocational education research centers. Of these, one will be a research center focusing on native American education, and one will conduct applied research and provide technical assistance for vocational education and training programs. A third center will be established to provide comprehensive direct technical assistance and outreach activities to enhance the ability of personnel in the fields of vocational education and training. These efforts will help to provide vocational education teachers and administrators with the information and technical support that will assist them in providing quality vocational programs that meet the needs of students and the workplace.

Mr. President, I believe this excellent legislation will be of critical importance in assisting our Nation's young people and adults acquire the skills they will need to meet the challenges of the workplace as we move toward the 21st century. I commend the distinguished chairman of the Education Subcommittee and the distinguished ranking member for their leadership and cooperation in developing this measure, and I urge my colleagues to support the bill.

Mr. PELL. Mr. President, our committee amendment makes a series of changes to S. 1109 that strengthen our reauthorization bill. Among these changes, we have enhanced the provisions for displaced homemakers and single parents. We have provided protection for current allocations to the territories, and have directed that additional amounts reserved for the territories be distributed in the form of discretionary grants. We have strengthened the language for guidance and counseling and made specific provision for technology education. We have added language to ensure that labor is represented in the planning, development, and assessment of vocational education programs in each State, just as business and industry are represented. We have inserted language to clarify distribution of funds for corrections education, and language that would permit local educational agencies and area school to serve adults. We have also increased the authorization for the Bilingual Training Program. Further, we have accepted a series of technical amendments proposed by the Department of Education, and have addressed concerns expressed by the Department of Labor regarding the sharing of wage and earnings information.

Finally, we have made several additions to accommodate the interests expressed by other Members of the Senate. We have incorporated technical amendments suggested by Senators INOUYE, DOMENICI, and BURDICK with respect to the provisions for Indians and native Americans. We have added language on behalf of Senator KOHL that would permit the States to use their Perkins dollars to serve secondary school students in community college programs. We have accommodated the interests of Senator HARKIN with respect to the formula for the State councils on vocational education. On behalf of Senators DASCHLE and PRESSLER, we have specified that program improvement can include construction. We have addressed Senator DODD's concern that intermediate educational agencies be eligible to receive payments in accordance with the eligibility provided for area vocational schools.

I am also very pleased we were able to address concerns expressed by Senator CRANSTON with respect to school districts in California which contain only secondary schools. We have added language on behalf of Senator COCHRAN with respect to the use of equipment. We have agreed to language proposed by Senator METZENBAUM to create a new demonstration program using vocational education programs to prevent school dropouts. Finally, we have added a series of amendments on behalf of Senators SIMON, HARKIN, and METZENBAUM augmenting the language on parental involvement, supplementary services and equal access.

Mr. President, this committee amendment most certainly enhances the important work we have accomplished in S. 1109. I am pleased that we have been able to develop this modification in the spirit of bipartisan cooperation which is the hallmark of our committee work, and I am grateful to the members of our committee and their staff for their efforts.

LOCAL USES OF FUNDS

Mr. SIMON. I would like to establish further clarification concerning the uses of funds at the local level and the targeting of such funds to special populations. How are the basic grant funds to be used?

Mr. PELL. The basic grant funds under subpart 1 of part C of title II are to be used for special populations.

Mr. SIMON. This means that the funds are to be used solely for the benefit of individuals described in section 223 and 224 of the act, including providing them with the supplementary services necessary for successful participation and for ensuring that the programs they receive are of the highest quality, including integration of academic and vocational training under the terms of section 229(b)(1)?

Mr. PELL. That is correct.

Mr. SIMON. Is it also correct that, while other students may derive some benefit from the funds expended for this purpose, that exception is very limited? For example, where equipment is bought specifically to meet the needs of special populations, it may be used for other students when not in use for the special populations. Is this a proper interpretation of the extent to which the funds may benefit other students?

Mr. PELL. Yes.

Mr. SIMON. The same is true, then, with the provisions in section 229(b)(1)(A) and (B), concerning the use of funds for special populations to integrate vocational and academic training and carry out program improvement activities. Under section 230(a)(8), the State may allow use of funds for these purposes only after the the needs of these populations have first been met. The bill thus demonstrates concern for the quality of the programs serving these students, and ensures that the Federal funds are first concentrated on meeting special needs.

Mr. PELL. That is correct.

Mr. SIMON. In light of the recognition that special populations have a need for high quality programs as well as access and and supplementary services, am I correct in understanding that the requirement in section 230(a)(3) for assessing the needs of the special populations and the planned use of funds to meet such needs includes assessment of the needs set forth in section 229(b)(1)(A) and (B) relating to integration of academic and vocational training and program improvement?

Mr. PELL. Yes, the assessment includes an assessment of the special populations needs under section 229(b)(1)(A) and (B) as well as their needs under section 229(a)(1) concerning supplemental services.

Mr. SIMON. I thank the Senator for clarifying these issues. I look forward to working together to oversee the implementation of this legislation, and monitor its effect on the delivery of quality vocational education services.

PROGRAMS TO ASSIST DISABLED STUDENTS

Mr. CRANSTON. Mr. President, I would first like to thank the chairman of the Education Subcommittee, Mr. PELL, for the outstanding work he and his staff have done in bringing this legislation to the floor. Vocational education has proven to be extremely successful in preparing students for a lifetime of work and future education, and the Carl Perkins Act funds have made an invaluable contribution toward making such programs available to young and adult Americans.

Mr. President, in recent months I have been contacted by a number of individuals from my home State of California who have expressed concerns about certain provisions of S. 1109 regarding vocational educational needs of disabled students. I would like to clarify with the distinguished chairman that support for vocational education programs that serve disabled students would not be diminished under this legislation.

I understand that during review of this act the committee found that the vocational education needs of special populations, including disabled individuals, were not being adequately met. A major study conducted by the National Institute of Education on vocational education indicated that, among other things, setasides in the current program contributed to the fragmentation of resources and were being viewed as the maximum rather than the minimum amount of funding for targeting various populations. As a result, fewer individuals were being well-served under this program than intended.

This is my understanding that, in order to address some of the identified shortcomings, the committee sought to create a more effective method for targeting the money directly to students most in need. Mr. Chairman, am I correct in my understanding that the committee bill would remove the setasides and provide that funds under the Perkins Act are distributed to the local level for secondary school vocational rehabilitation services in order to ensure that these funds are better used to serve special populations—such as people with disabilities—and that these changes are in no way intended to provide a means by which States might escape their responsibilities in addressing the needs of these special populations?

Mr. PELL. Mr. President, the Senator from California [Mr. CRANSTON] is correct. The committee believes that the provisions in S. 1109 regarding the responsibilities of the State would strengthen and expand services for disadvantaged populations. The committee further believes that directing money to local providers would help ensure that local areas provide essential services to the targeted populations. In addition, S. 1109 contains safeguards requiring each recipient of dollars to provide the supplementary services necessary to ensure that the needs of special populations are being served. For example, with respect to students with disabilities, this bill requires that the head of each State special education department review the individual education plans of all students with disabilities, as well as the local education agency's plan for serving the special needs of this group, before the agency's proposal can be approved and funding granted. With respect to allocation of postsecondary and adult funding, the committee has included language in S. 1109 directing States to give priority to programs which serve special populations, including persons with disabilities, in awarding funds.

Mr. CRANSTON. I thank my distinguished colleague for that clarification and would like to follow up with one more question about the State matching requirements of the bill. I understand that a previous provision requiring a match at the local level has been removed. Am I correct in my understanding that the decision to remove this provision was made based on findings that many of the poorest school districts, unable to come up with sufficient matching funds, were forced as a result to forgo assistance altogether, thereby further penalizing already disadvantaged students in those areas?

Mr. PELL. The Senator is correct on that point? I want to emphasize that the Federal funds appropriated for vocational education programs under this act are intended to be used to supplement, and not to supplant crucial State funds for these important programs. It should be made very clear that securing sufficient funding for vocational education programs is a critical responsibility of States and that the Federal dollars authorized under the Carl Perkins Act are intended to boost, not replace, States' efforts in that regard.

Mr. CRANSTON. I thank the chairman for his time and again want to congratulate him on the outstanding job he has done in fine tuning this important legislation.

Mr. PELL. I thank my colleague for his interest in this matter and for his kind remarks.

Mr. KOHL. Mr. President, I want to commend my distinguished colleague and friend from Rhode Island, Mr. PELL, for his leadership in bringing before the Senate the Carl D. Perkins Vocational Educational Reauthorization Act.

Our Nation is faced with the challenge of ensuring that we will continue to have a work force with the education and training necessary as we move into a technologically demanding society. Enhanced academic skills are needed. The great majority of workers must be able to read, write, and perform basic mathematical operations, as well as have problem-solving skills. In addition, advanced skills and occupational training are essential. Vocational education is a vital component in meeting the requirements necessary for developing a skilled and competitive work force.

In looking at the language in S. 1109, I have a few questions for my colleague concerning the language in title II, and would appreciate it if my friend from Rhode Island would comment upon the kinds of programs included under two sections of the bill. The first, in section 222, concerns the State reserve for areas with severe problems, and says that "a State may distribute funds under this section for high school programs in community colleges for 16-18 years olds and which provide high school diplomas." The second, in section 241, concerns grants awarded for postsecondary and adult programs which may be used for programs at postsecondary institutions serving high school students age 16-18 and providing a high school diploma.

Mr. PELL. I will be happy to help my colleague from Wisconsin [Mr. KOHL] in clarifying the committee's intent in adding this language.

Mr. KOHL. I thank the Senator. In Wisconsin, we have a program which was created to stem the increasing numbers of students dropping out of high school. The program is coordinated by a postsecondary institution, MATC [the Milwaukee Area Technical College], but works solely with high school dropouts, ages 16, 17, and 18. The program is called Second Chance. In the past, Project Second Chance, coordinated by the Milwaukee Area Technical College, has qualified for Federal funding under the Perkins Vocational Education Program. I want to be certain that Project Second Chance will remain eligible for funds under this bill.

In this program, outreach specialists work cooperatively with about 60 high schools in the Milwaukee area, including public and private community-based organizations in order to identify dropouts. A key to the success of the program has been the role of a counselor, who works together with program participants to design an individualized educational and training plan for each student and then follows each student's progress as they work through the program. In addition, each student is provided with a support system, which may include his or her family members, peers, educators, and counselors, as they progress through the program. As a result of this attention, and as a result of the fact that grading is done every 4 weeks, rather than once a semester, academic difficulties are identified early on. Counselors quickly become aware of problems: If a student starts

to miss class or if his or her grades begin to fall, the counselor knows about it and is ready to ask "Why?"

Mr. PELL. I understand that the program brings together the resources of a college, high schools, community-based organizations, and local businesses.

Mr. KOHL. That is right. The program has been quite successful. It has received national recognition, and has been cited as an exemplary program. It is a program which would be useful for other communities seeking ways of reaching those who have dropped out of high school. In the last 4 years, Project Second Chance had identified and contracted over 3,000 students, encouraging them to return to school; 669 have reenrolled in MATC's high school or in community-based organizations. Over 970 have reenrolled in the Milwaukee public schools. Over 300 have received job training and/or job placement; 38 students have received their GED and 82 have received high school diplomas. Of those receiving a high school diploma, over 50 percent have gone on to a postsecondary education program.

Mr. PELL. This is exactly the type of program the committee had in mind when drafting this language. I would hope that with the language we have added, which discusses the use of funds for postsecondary institutions having programs for secondary students, a program such as Second Chance will be able to continue to receive Perkins funding.

Mr. KOHL. I appreciate the assistance of my colleague in helping the people of Wisconsin understand the intent of the Senate in adding this language.

TECH-PREP PROGRAMS

Mr. SIMON. Mr. President, I would again like to compliment the distinguished chairman of the subcommittee for his leadership in crafting this thoughtful and farsighted measure. Among the many laudable aspects of the bill is its encouragement of tech-prep programs. These so-called 2-plus-2 programs combine 2 years of secondary with 2 years of postsecondary education, thus serving as an added incentive for students to continue their education beyond secondary school, while also providing the students with valuable and marketable job skills. I would be grateful if the chairman would help me clarify the intent of one provision in the technical preparation section of the bill.

Mr. PELL. I would be pleased to help my good friend the Senator from Illinois.

Mr. SIMON. I thank the chairman of the subcommittee. Some concern has been raised that the term "business" as used in section 214(3)(C) may be interpreted to mean only programs in a school's business department. Is it true that, for example, programs in food service, fashion merchandising and design, child care, and interior design could qualify as a business program under this section, even if the programs were under the school's home economics department?

Mr. PELL. The Senator is correct. Such programs could qualify as business programs. Of course, however, the program would have to qualify under the other provisions of the bill as well.

Mr. SIMON. I thank the Senator.

CAREER COUNSELING AND JOB PLACEMENT

Mr. LEVIN. Mr. President I commend my colleague Senator PELL for the fine work he has done on this bill. The overall provisions of the proposed legislation are good for students. However, only through combining job placement with comprehensive career guidance and counseling can Congress be sure that the educational program of a given student has been planned in relation to the career opportunities.

Mr. President I had hoped that this issue would have been addressed more fully in the substitute proposal currently before us. However, I am pleased that Senator PELL will attempt to raise the issue further in the conference.

Mr. PELL. Mr. President I understand that my colleague from Michigan [Mr. LEVIN], has some concerns regarding the ability of students to obtain jobs after their vocational training. He has informed the committee that he would like to see greater emphasis in S. 1109 upon career counseling and job placement for each student.

Senator LEVIN's interests are very much in keeping with the important goals we set out to achieve in reauthorization. We have worked to put strong language in our reauthorization bill that would coordinate vocational education programs with the needs of the workplace, so that upon graduation, students would be prepared for jobs that are available.

In addition, we have added language in the guidance and counseling section that would require career counseling for each student with respect to jobs upon graduation, as well as summer and part-time employment while still enrolled in school

I greatly appreciate Senator LEVIN's interest in this area. We will continue to work on his concerns as we undertake our work in conference. Senator LEVIN has identified one of the most central missions of vocational education, that of providing training and education for good jobs that are in the mainstream of economic growth and productivity. I know that this is critical to the economy of Michigan as it is to my own State of Rhode Island, and to the rest of the Nation.

AMENDMENT NO. 1465

Mr. PELL. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment.

The assistant legislative clerk read as follows:

The Senator from Rhode Island [Mr. PELL], for himself, Mrs. KASSEBAUM, Mr. KENNEDY, and Mr. HATCH, proposes an amendment numbered 1465.

Mr. PELL. Mr. President, Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The text of the amendment (No. 1465) is printed in today's RECORD under "Amendments Submitted.")

Mr. PELL. Mr. President, my understanding is that we are now considering the committee amendment; is that correct?

The PRESIDING OFFICER. We are considering the substitute to the committee substitute.

Mr. PELL. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. THURMOND. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Who yields time to the Senator?

Mr. THURMOND. Mr. President, I ask the manager of the bill if he will yield me just about 3 minutes.

Mr. PELL. I yield as much time as he may desire to the Senator from South Carolina.

The PRESIDING OFFICER. The Senator from South Carolina is recognized.

Mr. THURMOND. Mr. President, I rise in support of S. 1109 the Carl D. Perkins Vocational Education Reauthorization Act of 1989. Since its enactment into law in 1984, when it replaced the Vocational Education Act of 1963, the Perkins Act has proven to be an important vehicle for Federal involvement in the area of vocational education in our country.

I am a strong supporter of vocational education. I found great fulfillment in teaching vocational education for 6 years. As the Governor of South Carolina, I worked to establish the area trade school system, which was the forerunner of the comprehensive vocational and tec(nical education network that is doing such fine work in my State today.

Mr. President, education is the key to our future as a nation. Vocational education has a vital role to play in preparing our citizens for the emerging technologies of the 21st century. S.

1109, alters current law to provide for the delivery of education and training programs that are designed to ensure that Americans possess the skills that are necessary to meet the challenges presented by an increasingly competitive marketplace.

As a member of the Subcommittee on Education, Arts, and Humanities of the Committee on Labor and Human Resources, I have had the opportunity to work with my colleagues to improve and strengthen this legislation, so that the Perkins Act will be even more effective. Much negotiation and compromise has taken place since this bill was introduced last June. I am especially pleased that, through this process, a strong State role has been maintained and State flexibility has been expanded.

Mr. President, I extend my appreciation to Senator PELL, the chairman, and Senator KASSEBAUM, the ranking member, of the Subcommittee on Education, Arts, and Humanities of the Committee on Labor and Human Resources, for the cooperation and dedication that they, and the subcommittee staff, have demonstrated during the consideration of this legislation. I am confident that this reauthorization of the Perkins Act will serve to enhance the effectiveness of programs that have the very important mission of training a sizeable segment of our population to be productive citizens.

Mr. President, I yield the floor.

Mr. PELL. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mrs. KASSEBAUM. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONSTRUCTION PROVISION

Mr. PRESSLER. Mr. President, I rise to commend the managers of the bill for their outstanding work and leadership on this legislation and to thank them for incorporating one of my proposals into the bill.

In South Dakota, we have a strong vocational education program, with four regional postsecondary vocational technical institutes serving some 7,600 students. At the secondary level, more than 15,000 students are served. Participation in these programs in South Dakota is increasing. Therefore this reauthorization is particularly important to our State.

After consulting with vocational education leaders in my State, it came to my attention that there was no language in S. 1109 which would allow Perkins funds to be used for any construction or renovations of vocational education facilities. Under current law this is allowed.

I contacted the Senator from Kansas regarding this problem, and it is my understanding that the managers of the bill now have incorporated the appropriate language in the committee modification to allow the continued use of these funds for construction purposes. Is this correct?

Mrs. KASSEBAUM. Yes, it is my understanding that construction is one of the allowable activities under use of funds.

Mr. PRESSLER. I thank the Senator for her assistance and for her leadership in this regard. This is a very important provision to those in South Dakota who have launched certain projects with the understanding these funds would be available. I greatly appreciate the attention of the managers to my request.

Mr. President, I ask unanimous consent that letters from Dr. Ken Gifford and Ron Rosenboom from Western Dakota Vocational-Technical Institute regarding this legislation be printed in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

WESTERN DAKOTA VOTECH INSTITUTE,
Rapid City, SD, February 23, 1990.

Hon. LARRY PRESSLER,
U.S. Senate, Hart Senate Office, Washington, DC.

DEAR SENATOR PRESSLER: It is our understanding that the Senate may be voting on S. 1109 today or sometime next week. We do support this version of vocational education reauthorization as it came out of committee, but we have one concern. We do not find wording in S. 1109 which would allow for the funding of vocational educational facilities.

South Dakota currently uses and needs to be able to continue to use Carl D. Perkins funds to help fund construction or remodeling of vocational facilities in our state. If there is no allowance for this type of funding in S. 1109, we request that specific workding be included in the Bill so states may continue to fund facility construction or remodeling through the Perkins Act.

Thank you for your support in this matter and if you have any questions, please feel free to contact Larry P. Zikmund, State Director, Office of Adult, Vocational and Technical Education (605) 773-5090.

Sincerely,

RON ROSENBOOM,
President Elect, South Dakota Vocational Association.

WESTERN DAKOTA VOTECH INSTITUTE,
Rapid City, SD, February 23, 1990.

Hon. LARRY PRESSLER,
U.S. Senate, Hart Senate Office, Washington, DC.

DEAR SENATOR PRESSLER: I have been informed that the wording in S. 1109 and H.R. 7 does not include any provision for the construction of vocational education facilities. It is very important that specific wording be included in the Bill which would allow states to fund construction and remodeling of our facilities.

South Dakota is currently using part of the Carl D. Perkins Federal funds as a part of the funding for facility construction and/or remodeling. Without these funds, we would not be able to expand the technical training for our state's citizens. Our funding does not rely on local tax dollars so it becomes very difficult to budget facility expansions.

Vocational Education in South Dakota is growing. We are working hard to provide the people of South Dakota with the highest quality of technical training possible. I therefore urge you to support the reauthorization version of the Carl D. Perkins Vocational Education Act as it came out of committee.

If you have questions or desire further clarification on the status of vocational education in South Dakota, please contact Mr. Larry Zikmund, State Director of Vocational Education at 605-773-5090.

Thank you for your continued support.

Sincerely,

DR. KEN GIFFORD,
Director, Western Dakota Vo-Tech.

Mr. PELL. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. LAUTENBERG. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. LIEBERMAN). Without objection, it is so ordered.

AMENDMENT NO. 1466 TO AMENDMENT NO. 1465

(Purpose: To provide for establishment of community education employment centers)

Mr. LAUTENBERG. Mr. President, I call up an amendment that is at the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment.

The legislative clerk read as follows:

The Senator from New Jersey [Mr. LAUTENBERG], for himself, Mr. BRADLEY, Mr. HEFLIN, Mr. MOYNIHAN, and Mr. KOHL, proposes an amendment numbered 1466 to amendment No. 1465.

Mr. LAUTENBERG. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

In the pending amendment at the end of title III:

On page 87, between lines 3 and 4, insert the following:

SEC. 303. COMMUNITY EDUCATION EMPLOYMENT CENTERS.

Title III of the Act (as amended by section 302) is further amended by inserting at the end thereof the following new part:

"PART G—COMMUNITY EDUCATION EMPLOYMENT CENTERS

"SEC. 361. SHORT TITLE.

"This part may be cited as the 'Community Education Employment Center Act of 1989'.

"SEC. 362. PURPOSE.

"It is the purpose of this part to establish and evaluate model high school community education employment centers to meet the education needs of low-income urban and rural youth by awarding grants to eligible recipients to establish community education

employment centers to provide students with the education, skills, support services, and enrichment necessary to ensure—

"(1) graduation from secondary school;

"(2) successful transition from secondary schools to a broad range of postsecondary institutions: and

"(3) employment, including military service.

"SEC. 363. PROGRAM AUTHORIZED.

"(a) IN GENERAL.—The Secretary is authorized, in accordance with the provisions of this part, to make grants to eligible recipients having applications approved pursuant to section 10 to establish and operate not more than 10 community education employment centers nationwide.

"(b) GRANT PERIOD.—Grants awarded under this section may be for a period of 5 years.

"SEC. 364. PROGRAM REQUIREMENTS.

"Each eligible recipient receiving a grant under this part shall—

"(1) operate a community education employment center on an extended year and extended day basis;

"(2) establish a collegial working environment, with substantial opportunities for staff training and development and shared decisionmaking;

"(3) maintain small class sizes, and to the extend possible, maintain an average class size of 15 students or less;

"(4) have the option to organize community education and employment centers into one or more programs, specializing in different areas of study of particular interest and employment opportunities for the student population;

"(5) offer a broad array of secondary school coursework, including, to the extent possible—

"(A) English, mathematics, history, geography, biology, chemistry, physics, and computer science;

"(B) opportunities for student participation in a wide range of extracurricular activities, including community service and exploration, sports, fine and performing arts and tutorial study sessions;

"(C) a comprehensive vocational-technical education program developed through regular consultation with employer-labor panels, with knowledge of relevant industries, and which offers skills in planning, management, finances, technical and production skills, underlying principles of technology, labor and community issues, economic development and health, safety, and environment issues;

"(D) courses in health, nutrition, and parenting;

"(6) offer students on-site opportunities for assistance with career planning and decisionmaking, employability, entrepreneurial abilities, interpersonal communication skills, and remedial studies;

"(7) maintain an emphasis on the development of academic skills, regardless of student career objectives;

"(8) provide technical assistance and training to staff from other schools and local education agencies within the State who wish to replicate community education employment center capabilities; and

"(9) seek to utilize community organizations to provide support for educational activities and services to parents and students.

"SEC. 365. SUPPORT SERVICES REQUIREMENTS.

"Each eligible recipient receiving a grant under this part shall establish in each community education employment center a support system to coordinate services for students, including—

"(1) a comprehensive program of confidential guidance counseling, providing—

"(A) guidance for career and personal decisionmaking and postsecondary institution placement;

"(B) mentoring and referral to appropriate social services; and

"(C) an accessible counseling service to help parents to focus on the enhancement of student education;

"(2) an on-site job service office to offer students—

"(A) career guidance, development, and employment counseling, which provides information about a broad range of occupations and alternative career paths;

"(B) labor market information, job development, career testing, and occupational placement services for part-time and summer employment, internships, cooperative programs, and part-time and full-time employment opportunities upon graduation; and

"(C) assistance in arranging part-time employment, so long as such employment does not reduce academic performance;

"(3) assistance in arranging a summer program of work, education, or enrichment sessions;

"(4) to the extent possible, providing transportation to and from the community education employment center and part-time job sites; and

"(5) access to day care services for children of participating students.

"SEC. 366. PARENTAL AND COMMUNITY PARTICIPATION.

"(a) IN GENERAL.—Each eligible recipient receiving a grant under this part shall employ a parent/community coordinator to provide for the active and informed participation of parents and appropriate community representatives in each community education employment center by—

"(1) encouraging parents and students to make informed decisions in reviewing and selecting the choice of community education employment center programs for their children;

"(2) conducting regular parent seminars to—

"(A) inform parents about community education employment center operations;

"(B) obtain parent input; and

"(C) disseminate information on how parents can encourage student performance;

"(3) providing the parents of each student with a regular opportunity to meet with counselors, teachers, and the student to discuss student progress, plans, and needs;

"(4) providing a range of roles in which parents may work with students at home or as class assistants or volunteer coordinators;

"(5) establishing an advisory Council of Advisors (hereinafter referred to as the 'Council') consisting of one individual representing each of the following entities:

"(A) the local educational agency;

"(B) the State Council on vocational education; and for the State agency responsible for secondary vocational education;

"(C) the student body;

"(D) the local teacher organization;

"(E) guidance counselors;

"(F) community-based organizations; and

"(G) parents.

"(b) FUNCTIONS OF THE COUNCIL.—(1) Council shall provide recommendations to, and work with, eligible recipients to—

"(A) establish annual community education employment center priorities, programs, and procedures;

"(B) establish student selection criteria to ensure that all students in the school district have an equal opportunity to attend the community education employment center and that participants will be representative of the secondary school population in the school district;

"(C) promulgate a student code of conduct that shall be developed in consultation with the students and teachers;

"(D) assist in the selection of the community education employment center principal, administrators, department chairpersons, and teachers;

"(E) assist in the selection and application of assessment tools for continuous evaluation of student learning progress; and

"(F) make recommendations for the selection of curriculum textbooks, software, and other learning resources and equipment.

"SEC. 367. PROFESSIONAL STAFF.

"(a) IN GENERAL.—Each eligible recipient receiving a grant under this part shall only employ professional staff who demonstrate the highest of academic, teaching, guidance, or administrative standards.

"(b) TEACHERS.—(1) Each eligible recipient receiving a grant under this part shall ensure that community education employment center teachers receive inservice training at least annually in techniques, procedures and policies relevant to the community education employment center.

"(2) Each eligible recipient receiving a grant under this part shall employ a sufficient number of full-time certified or licensed guidance and career counselors to assist, enhance and monitor student progress.

"SEC. 368. ELIGIBILITY AND APPLICATIONS.

"(a) ELIGIBILITY.—An eligible recipient shall be eligible to receive a grant under this part if—

"(1) the eligible recipient is located in or serves one or more local educational agencies that are eligible for assistance under section 1006 of the Elementary and Secondary Education Act of 1965:

"(2) the eligible recipient demonstrates that it will serve a student population which is predominantly educationally and economically disadvantaged.

"SEC. 369. APPLICATION.

"(a) APPLICATION REQUIRED.—Each eligible recipient desiring to participate in the demonstration grant program authorized by this part, shall prepare and submit an application to the Secretary at such time, in such manner, and containing or accompanied by such information as the Secretary may require.

"(b) CONTENTS OF APPLICATION.—Each application submitted pursuant to subsection (a) shall—

"(1) demonstrate that the area where the center is to be located has a high concentration of children from low-income families, relative to the county and State as a whole:

"(2) describe the activities and services for which assistance is sought:

"(3) provide assurances that the eligible recipient will comply with the provisions of sections 364, 365, 366, 367, and 368:

"(4) contain assurances that the State and local educational agency will, in any fiscal year, at least supply the same fiscal effort per student with respect to the free provision of public education to community education employment center students as such local educational agency provides for students attending secondary school in such local educational agency;

"(5) utilize funding available from appropriate employment, training, and education programs in the State;

"(6) contain assurances that the community education employment center will coordinate the operations of such center to help meet local economic needs; and

"(7) provide such additional assurances as the Secretary may reasonably require.

"SEC. 370. EVALUATION AND REPORT.

"(a) LOCAL EVALUATION.—Each community education employment center shall submit annually to the Secretary a comprehensive and continuous evaluation of student learning progress, including—

"(1) academic and vocational competencies;

"(2) dropout rates;

"(3) information concerning employment and earnings while the students are attending a community education employment center and upon the graduation of such students from such center;

"(4) information concerning student attendance at postsecondary institutions or student enlistment into military service upon the graduation of such students from the community employment education center; and

"(5) parental, student and community participation in the activities of the community employment education center.

(b) REPORT.—The Secretary shall report to the Congress on the evaluations submitted pursuant to subsection (a) by October 1, 1995.

"SEC. 371. DEFINITIONS.

"As used in this part—

"(1) the term 'eligible recipient' means a secondary school or an area vocational school; and

"(2) the term 'parent' includes a legal guardian or other person standing in loco parentis.

"SEC. 372. AUTHORIZATION OF APPROPRIATIONS.

"There are authorized to be appropriated $16,000,000 for fiscal year 1991 and each of the fiscal years 1992, 1993, 1994, and 1995 to carry out the provisions of this part.".

The PRESIDING OFFICER. If the Senator will withhold.

Under the previous order, the amendment will be considered now under a 1-hour time limit with the time controlled equally by Senator LAUTENBERG and Senator PELL.

Mr. LAUTENBERG. Mr. President, this amendment would create a demonstration program to establish and evaluate model high school programs called community education employment centers. It is designed to help to address the significant barriers to education that confront so many of our Nation's low-income youth. I am pleased that Senators BRADLEY, HEFLIN, MOYNIHAN, and KOHL have joined as original cosponsors of this amendment.

The amendment would authorize funds to establish no more than 10 model centers throughout the Nation. The centers would be established in areas with especially high concentrations of children from low-income families. Operated by the local school district or area vocational school district in which they are located, the schools would provide expanded services for these children in great need. While originally designed to address the needs of city youth, rural areas would also be eligible for funding.

The amendment is based on a bill I introduced along with Senators BRADLEY, MOYNIHAN, and SPECTER in August, S. 1477, the Community Education Employment Center Act of 1989.

I testified before the Education Subcommittee in the Labor and Human Resources Committee on that bill. And I appreciate very much the input and the cooperation of Senators PELL and KENNEDY and the Labor and Human Resources Committee and staff in crafting this amendment.

I understand that they both intended to support the amendment.

This legislation has the support of vocational educators: The American Vocational Association and the National Association of State Directors of Vocational Education. It has the support of professional educators: The American Federation of Teachers. It has the support of people in the counseling profession, people who realize that we need to give these disadvantaged kids confidence and direction if they are going to make the most of their education.

Kids like those who benefit from the national "I Have a Dream" Program. Through this program in my old hometown of Paterson, NJ, my former business colleagues and I made a commitment to a class of disadvantaged students. If they stay in and do well in school, apply and get accepted to colleges, their tuition will be fully paid by a fund that I and my former business associate provided.

And we found out something very, very interesting. Even though the funds were made available, these kids still need counseling. They need advice. They need role models. They need guidance to better understand the opportunities that this legislation would provide these things.

This program has been very successful in New Jersey and elsewhere. We are very hopeful that the dropout rate, which seems to have been stemmed or lowered considerably, will continue to improve.

The American Association for Counseling and Development supports this legislation that we are proposing. It has the support of those who are on the front lines of urban poverty, trying to cope. It has the support of the National Urban League and the U.S. Conference of Mayors. It is supported by business.

In my State, business are facing labor shortages, and while they have jobs that go begging for workers, there are workers begging for jobs. But they can't get jobs if they do not have the education, if they do not have the skills. And that is why the Business and Industry Association supports the legislation.

This legislation had the support of the New Jersey Department of Education under New Jersey's former Governor, Thomas Kean, who has a national reputation for his commitment to educating low-income youth.

Mr. President, the centers that would be created by this amendment are specifically designed to address the barriers to education for all of our Nation's poor children. The concept for the centers was developed after extensive consultation with numerous individuals who have been actively involved with education and education policy for many year. It responds to their specific concerns and recommendations.

The need to establish and test these model schools could not be greater. Although the Nation as a whole has enjoyed economic growth, not everyone has shared in this prosperity. Minority and minority youth unemployment is topping 30 percent, and while many suburban areas are booming, many once great cities are overwhelmed by unrelenting poverty, homelessness, and joblessness.

If young people from poor families are to be integrated into America's main stream, they have to meet the education and skills requirements for tomorrow's jobs. But they cannot do that if they drop out of school. And they cannot do that if they cannot read or write.

Students in schools in poverty-stricken areas are confronted with considerable barriers to graduation. Too many lack good role models. Too many have parents on welfare, struggling to make ends meet. Too many do not have the encouragement and support that they need to have to get through school.

America's poor teens are more than three times as likely to drop out of school to help support themselves and their families. Dropout rates in many urban schools are 50 percent and more. Dropout rates in many rural schools average almost 16 percent, which greatly exceeds the average for suburban schools. Employment prospects for these kids are dismal at best. Too many lack basic skills necessary to find jobs.

Traditional inner-city schools have been unable to surmount the formidable barriers to urban education. Urban school expenditures fall far below national averages. While our inner cities pay a higher than average proportion of their income to support schools, a shrinking tax base and poverty deny them the resources needed to launch the kind of effort required.

Rural schools in poor areas suffer as well. Those students who do graduate from many rural schools in poor areas are less prepared to deal with the demands of working life than many from the more affluent areas. Many rural students from poor areas consistently

perform more poorly in reading and writing.

We cannot let them become a permanent urban and rural underclass. We must assume a greater responsibility for the education of low-income youth.

Mr. President, the centers authorized in this bill would have the resources to address and help combat these problems. They would test a comprehensive program that gives disadvantaged students not just what they need in the classroom, but also the services and support they need to make the most of what they learn in the classroom. It would pull together a variety of educational programs and social service programs. It would try to link these youngesters up with jobs.

To do all this, the centers would operate on an extended year and an extended day basis. They could operate from 7 in the morning until 7 in the evening. That would help keep young people off the streets and provide them with maximum opportunities to learn and become productive members of society.

These centers would maintain small class sizes. Too many young people in our inner-city schools are expected to learn in classes with 30 and 40 other kids, and we know that that is not possible. Research shows that class sizes of 15 students can make an important difference in student learning. Centers would have small classes, ideally on an average of 15.

Students in these centers would be offered both academic and vocational education training, regardless of their career objectives. A strong emphasis on guidance and counseling services, which I noted before, is a key component of the model program.

The centers would establish comprehensive guidance counseling services for students and for their parents. These kids frequently lack role models. In many cases, both parents have been unemployed, have been on welfare. They need guidance and they need motivation to break out of the kind of life their parents have led.

Center students would be referred to appropriate social services. And young mothers would have access to day care services for their children. How can a teenage mother learn, get the skills to make a decent life for herself, without care for her child?

The centers would also operate a job service office to offer students career guidance, development, and employment opportunities, and information about a broad range of occupations and career paths.

The job service office would provide labor market information, job development, and career testing. This office would assist students in arranging part-time employment, summer employment, and employment upon graduation.

The centers would encourage community involvement. They would have a parent-community coordinator to keep parents involved in the activities of these centers. A council of advisers would be created to seek active participation and input from local teacher organizations, guidance counselors, the students themselves, parents and community-based organizations, business, and labor representatives.

If the community takes an interest in the students, the chances are greater that the students will take more of an interest in learning and become productive members of society. If the community takes an interest, the chances are better that these kids will find jobs because the community will have a stake in their success and they will be willing to give these young people a chance.

Mr. President, the money we spend on CEEC's is a wise investment that could lead to savings down the road.

Each year in our country, 1 million kids drop out of school. America's dropouts cost $240 billion in earnings and foregone taxes over their lifetimes. Lost productivity and the remedial programs cost business $25 billion a year.

Our economy needs these kids trained. It needs them educated. Business leaders are concerned because they cannot find skilled, educated workers. And everyone knows that the competitiveness of our industry depends on our ability to maintain a skilled work force. By the year 2005, most 18- to 24-year-old entry level workers will come from the public schools of distressed urban districts. When it comes to educating the disadvantaged in our society, we are not just talking about a social obligation, we are talking about an economic imperative. If we make bold investments in the education of young people in low-income areas, they will pay us back many times with increased productivity and employment, and reduced need for safety net and law enforcement expenditures.

Mr. President, we can begin to make that investment in our future, in the development of our young people who are now left out by adopting this amendment.

I would like to say in closing how much I appreciate the consideration of the managers of this bill. We had some considerable discussion about it. We discussed the question of resources, and I know that it is not an easy mission. All of us involved with budgeting and the allocation of resources recognize how tough it is to find resources to invest in the future. It is so much easier to deal with the current problems. I can say that when I talked to my colleagues, the distinguished Senator from Rhode Island as well a the distinguished Senator from Kansas, that they understand that we have to invest in the future of our society by making those decisions today.

I am hopeful that this experiment, this example, this model, in the amendment I am proposing will enable us to find out whether or not we have been doing things correctly or if there is just another avenue to approach with education. I hope, by providing this opportunity for quiet study, by providing an avenue to get away from distressed homes, from unstable environments, maybe—just maybe—we can pull more groups of students, more youngsters into the mainstream of society.

Everyone here knows how important it is. We have too many young people dropping out, contributing to lawlessness, committing crimes, creating enormous expense for us wherever we look. If this model of ours shows any way at all to reduce those problems, keep kids in school and help them make a transition to college or the working world, it will be a worthwhile expenditure.

Mr. President, we are talking about a significant sum of money. It is $16 million. That is not insignificant. But compared to the problem, compared to the investments we make in other programs, I frankly think it is an experiment certainly worth taking. Once again, I thank my colleagues for their consideration and their support.

The PRESIDING OFFICER. Who yield time?

Mr. KENNEDY. Will the Senator from Rhode Island yield me 7 or 8 minutes?

Mr. LAUTENBERG. I will be happy to yield to the distinguished Senator from Massachusetts, assuming we have that much time.

The PRESIDING OFFICER. The Senator from New Jersey has 14 minutes, 22 seconds.

Mr. LAUTENBERG. I will be happy to yield 7 or 8 minutes, as needed.

Mr. KENNEDY. Mr. President, first of all, I want to congratulate my friend and colleague, Senator PELL, from Rhode Island, and Senator KASSEBAUM, from Kansas, for bringing this matter to the attention of the Senate today. This legislation reaches back into the early part of the 1960's, and each and every time that we have had a reauthorization of the program, I think it has been strengthened and perfected. Mostly we have made small, measured alterations and changes, not to disrupt the program. But I think the targeting that has been achieved and worked out through this new legislation is excellent and that we have continued to make progress.

So, I rise particularly to congratulate both of my colleagues and to indicate, as the chairman of the Labor and Human Resources Committee, how proud we are of the combined effort of both those Senators and all members

of our committee in brining this legislation to the floor. I also want to commend the Senator from New Jersey for his comprehensive approach in trying to provide a range of different social services, to students enrolled in vocational education.

We tried to utilize the concept of comprehensive social services with the comprehensive child development programs. This small program gets roughly $25 million as a pilot program. It provides services to children from prenatal care through 5 years of age. What we have seen in the past, in the various studies that have been made and the various other pilot programs that have been done is that it has had a dramatic impact, as the Senator from New Jersey has pointed out and others have pointed out. That effort, which is now still in its formative stage will have an important impact and I believe the proposal of the Senator from New Jersey will also have a beneficial impact.

So I welcome the chance to add a word in favor of his particular amendment. I am delighted that it will be a part of this legislation and that he was willing to make some adjustment in those total amounts of resources, given the scarce resources that we do have available.

Vocational education is a central part of Federal aid to education. President Kennedy encouraged the enactment of a Federal initiative in this area and the Vocational Educational Education Act of 1963 was the result. In the years since, the vocational education program has been revised and extended on several occasions.

A central thrust of the changes over the last 27 years has been to target Federal assistance on special populations: the disadvantaged, handicapped, and those with limited English proficiency.

In addition, the Congress has increasingly sought to ensure that men and women will have access to high-quality training in fields in which they have historically been underrepresented.

This bill continues that tradition. Our bill will distribute vocational education funds by the chapter 1 formula—this will target Federal funds on the neediest students.

In addition, the bill greatly strengthens provisions to ensure that the handicapped, disadvantaged, and those with limited English proficiency are adequately served. Federal funds must be used to provide supplementary services to at-risk students. Federal funds must also be used to encourage an integration of academic and vocational training, to improve the quality of existing programs, and to provide comprehensive guidance and counseling to students.

At the same time that we have increased the focus on these special populations, we have taken steps to increase the flexibility that States and local schools will have in spending Federal resources. I believe that this bill draws an excellent balance between the Federal Government's need to ensure that services are provided to special populations and State and local needs for flexibility and autonomy to best serve the students.

I am especially pleased with the two new parts of this bill. First, I am glad that we have taken steps to ensure that more efforts are made to establish tech-prep programs. These programs combine the last 2 years of post-secondary education. We are all aware of the need to integrate high quality education and training programs and these programs are an excellent way to accomplish this.

In addition, this bill authorizes a program of vocational education lighthouse schools. Federal matching grants to excellent vocational education schools will do two things.

First, they will let the schools act as laboratory schools and encourage them to experiment with new programs, curricula, and instructional programs. Second, the schools will become a focal point for technical assistance and teacher training within the State. In this fashion, successful practices developed at the lighthouse school will be replicated in other schools.

I believe that this bill is an excellent piece of educational policy. I commend Senators PELL and KASSEBAUM and their staffs—David Evans and Ann Young for Senator PELL and Susan Hatton and Becky Rogers for Senator KASSEBAUM—for all they have done on this bill. I urge my Senate colleagues to join me in voting to pass this extremely important education initiative.

The PRESIDING OFFICER. Who yields time? The Senator from Rhode Island.

Mr. PELL. I thank the Senator from Massachusetts for his generous words. As chairman of the full committee, he has given us the privilege of managing this bill.

In connection with the amendment of the Senator from New Jersey, which is before us at this time, I am glad to say that the ranking member and I have discussed it within our subcommittee and on the floor, and, I for one, am prepared to accept the amendment of the Senator from New Jersey.

The PRESIDING OFFICER. Who yields time?

The Chair recognizes the Senator from Kansas [Mrs. KASSEBAUM].

Mrs. KASSEBAUM. Mr. President, I very much appreciate the efforts of the Senator from New Jersey [Mr. LAUTENBERG] to try to meet some of the concerns of the committee. He started out with a request for an authorization of $40 million annually over 5 years. He then agreed in his presentation to the committee to ask $25 million, and he now is putting forward the amendment with a $16-million authorization.

I realize this is a significant compromise. I am very appreciative, because I had some grave concerns about the amendment. I pointed these concerns out to him and would just like to mention some of them now. First, the total of all demonstration programs now in this bill is only $16 million.

While I doubt that anyone would quarrel with the focus of the amendment of Senator LAUTENBERG and his goals for education, I feel it is very important to point out that we are already addressing many of these needs and goals. For example, we have provided authority in the demonstration project portion of S. 1109 for the establishment of "lighthouse schools"—which deal specifically with model vocational education programs. In addition, we have, of course, the JTPA, the JOBS program, as well as dropout prevention demonstrations, and so forth.

I think all of us want to give focus to those things that we believe are important to education. Yet, with limited resources, we should not be duplicative. That is why I very much appreciate the willingness of the Senator from New Jersey to further refine and refocus his proposal.

I would suggest, Mr. President, the whole thrust of the vocational education program we are supporting is to devise quality programs with strong guidance and counseling and with ties to the real needs of the workplace. These are our efforts for all schools receiving vocational education funds. We must not forget that this indeed, is the thrust of this legislation.

With the demonstration projects we are supporting, I think we will be better able to assess what the needs might be when we look to future reauthorization of vocational education programs. I am prepared to accept the amendment of the Senator from New Jersey.

The PRESIDING OFFICER. Who yields time? The Senator from New Jersey.

Mr. LAUTENBERG. Mr. President, I thank the distinguished Senator from Kansas for her support, essentially, of this amendment. Even though I think it is apparent that her concerns are registered in terms of resources, I did not hear any argument against trying this approach to the program. I would also have to admit that though the Senator from Kansas talks with a soft voice, she does, indeed, carry a big stick. I do not want to suggest that I volunteered the reduction in the size of the program but was persuaded by the might of her words that it might be a fruitless

effort. So we arrived at a compromise, Mr. President.

I close by thanking the Senator from Kansas and the Senator from Rhode Island, both of whom have long, distinguished records on behalf of education in our country. The fact is that we have this, let me call it, minor difference, because we are so constrained by resources. We just do not make the investment in the future as generously as we have at times for other needs, particularly military needs, or other programs with which I might have some disagreement.

But one thing is certain, on which all of us will agree, that whatever we have done to this date has been at best a Band-aid approach. We have not yet solved the problem. No matter how much money we have spent, we have established one thing: We have not yet figured out a way to come to the kind of conclusion we want, and that is to get everybody into the mainstream, to get qualified workers, to provide the leaders for tomorrow.

So I once again defend, if I must, the fact we are going ahead with this program to enhance the possibility that we will be more successful in the future with our investments in education.

I do thank the managers of the bill and my distinguished colleague from Massachusetts, whose unflagging efforts on behalf of the education of our society are virtually unmatched. He and his family have spoken on behalf of better education for our citizens. So, Mr. President, I conclude by asking that the amendment be adopted.

The PRESIDING OFFICER. Who yields time?

Mr. HEFLIN. Mr. President, I rise to speak in favor of the vocational education programs authorization.

I am delighted that this legislation provides for distribution of funds to States and requires officials of the U.S. Department of Education to study the distribution aspects of the State allocation formula and to report to Congress whether funds are targeted adequately to the more needy educational systems.

I am particularly supportive of the amendment authored by Senator LAUTENBERG to establish 15 model community education employment centers across the country which are targeted at urban and rural areas with an especially high concentration of children from low-income families.

There is a great need to establish one of these models in the State of Alabama. Many students from areas of great poverty confront barriers to graduation. The dropout rate is inacceptable.

I wholeheartedly support the inclusion of rural high schools in this legislation which will have a tremendous impact on my State and indeed, the Nation. Many of our rural high schools in Alabama do not have any of the facilities that are available to students in urban areas such as museums, theaters, city parks, and other such facilities which may broaden the mental horizons of our students.

The bill we are considering today reauthorizes the Carl D. Perkins Vocational Act programs through fiscal year 1995. This legislation modifies the vocational education funding allocations and targets the funds toward the traditionally underserved populations. It emphasizes coordination of academic and vocational education training to include technical preparation programs.

The legislation requires that funds for secondary school programs must be distributed within the State based on the chapter 1 formula to local education agencies, area vocational schools, and intermediate educational agencies providing vocational education.

Clearly, the vocational education programs authorization ushers in new opportunities for local providers to serve economically disadvantaged students, individuals with disabilities, those with limited English proficiency, juvenile and adult prisoners. Above all the legislation provides for program improvement in instructional services, curriculum and materials development, and equipment.

Mr. President, vocational education plays an integral role in ensuring the availability of a skilled work force. It is my dream that this legislation will allow us to emphasize the need for renewed Federal support for vocational education programs and their importance to economic development of our Nation.

Mr. President, vocational education is occupational education, which prepares young people, as well as adults, for the world of work. We have an opportunity here to continue the Federal investment in vocational education to ensure our young people the opportunity to succeed as qualified wage earners and tax paying citizens.

I wholeheartedly endorse this vocational education bill.

Thank you, Mr. President.

Mr. BRADLEY. Mr. President, I am pleased to join Senator LAUTENBERG in offering this amendment to the Perkins Act Reauthorization for Vocational Education.

Mr. President, the community education employment centers established by this amendment will serve as models for urban and poor rural high school programs. The centers, to be open on an extended day and extended year basis, will offer small class sizes and extensive educational coursework including english, mathmatics, history, geography, biology, chemistry, physics, and computer science. The centers would also have the option of specializing in different areas of study of particular interest and employment opportunities for the student population.

We are all aware of the limitations that inner cities and low-income rural areas have to offer our kids in the way of opportunity. Our young minds need care and nurturing, support and counselling, and a chance to be educated and trained to be the best they can be. The legislation will demonstrate—that with all the right tools, and the support of the community, employers, parents, and counsellors—our disadvantaged youth can become a valuable, productive force in our society.

Mr. President, I commend Senator LAUTENBERG for his leadership on this amendment. I urge my fellow colleagues to join me in supporting this amendment and in expanding opportunity to our youth who are most in need.

Mr. PELL. I urge adoption of the amendment.

The PRESIDING OFFICER. If all time is yielded back, then the question is on agreeing to the amendment of the Senator from New Jersey.

The amendment (No. 1466) was agreed to.

Mr. LAUTENBERG. I move to reconsider the vote by which the amendment was agreed to.

Mr. PELL. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. Who yields time. The Senator from Rhode Island.

Mr. PELL. Mr. President, I urge that we adopt the committee substitute, as amended by the Lautenberg amendment.

The PRESIDING OFFICER. The Chair would advise the Senator that all time—and there is considerable time remaining—must be yielded back before the question can be put to the Senate.

Mr. PELL. Mr. President, I yield 6 minutes to the Senator from Alabama.

The PRESIDING OFFICER. The chair recognizes the Senator from Alabama for 6 minutes.

Mr. SHELBY. Mr. President, I appreciate the Senator from Rhode Island yielding.

Mr. President, I, too, rise in support of this bill, the vocational education bill. This Nation, and my State of Alabama is part of it, needs this bill.

Mr. President, if enacted—and I am sure it will be—this bill gives the States needed flexibility and funding to improve vocational education. This bill shifts more emphasis to the secondary level. This bill improves the integration between academic, vocational, and tech-prep programs and it prepares our disadvantaged students and high school dropouts to become contributing members to society.

Mr. President, we need this bill. Half of America's students do not go on to college. One quarter of our youth never finish high school. Today, almost 20 million students are enrolled in vocational education programs in the United States. Many of these students dropped out of traditional academic programs. These students have been attracted to the special curriculum of vocational education and are now staying in school.

Vocational education, Mr. President, is no longer just home economics and shop. Let me name just a few of the numerous courses now available for the vocational education program, courses such as agribusiness, child care, computer technology, electronics, masonry, photo offset printing, commercial foods, business education, and auto mechanics.

Vocational educators think at least half of all workers rely on the training they receive in vocational classes I just listed. Also numerous studies indicate there is a shortage of skilled workers who can be trained and retrained on the job. Vocational and technical subjects are keeping many of our children in school while simultaneously preparing them for the workplace.

Mr. President, the education subcommittee focused much of its attention on the dropout problem when considering this legislation before the Senate. In fact, the decision to allocate most of the vocational education funds to secondary schools was an effort by the subcommittee to prevent dropouts.

Mr. President, the national dropout rate is over 25 percent and with well over 50 percent in our country's largest urban areas.

Twenty-five percent of high school seniors drop out in this country. Fifty percent of teenaged girls drop out due to pregnancy, and they never return to school.

Mr. President, the number of students dropping out of Alabama schools in my State during the 1988–89 school year was 10,887, That is roughly about 17 percent below the national average. But bad.

When a student drops out of school we all pay a price. The dropout is virtually giving up all hope of realizing the American dream. Dropouts cost the American taxpayer a lot of money. For example: Dropouts cost the Nation $77 billion annually, $71 billion in lost taxes and revenue, $3 billion in expenditures, and $3 billion in crime-related costs.

Mr. President, almost 50 percent of all families receiving public assistance in this country are headed by high school dropouts.

Dropouts are 2½ times more likely than high school graduates to be unemployed.

Up to 80 percent of some prison populations are high school dropouts, and 85 percent of juveniles in the court systems are dropouts.

Though there is no easy answer to the dropout problem, vocational education seems to be one workable solution.

In another area, adult education programs can improve the lives of individuals and at the same time contribute to strengthening our Nation's economy.

For example, last year in my State of Alabama: 37,000 adults enrolled in the adult basic education program.

Nine thousand adults received the GED certificate.

More than 3,000 adults entered another education training program after completing the GED test.

Over 5,000 adults learned to read. And almost 2,000 adults learned to write.

More than 2,000 adults obtained jobs as a result of the adult basic education experience.

I believe there is a consensus among my colleagues that a bill like this that helps to improve the Nation's economy is a good bill. We are also improving people's lives.

I yield the remainder of my time.

Several Senators addressed the Chair.

Mr. NUNN. Mr. President, will the Senator from Rhode Island yield me 5 minutes?

Mr. PELL. I yield 5 minutes to the Senator from Georgia.

The PRESIDING OFFICER. The Senator from Georgia is recognized.

Mr. NUNN. I thank the Chair.

Mr. President, I want to thank and commend Senator PELL and Senator KASSEBAUM for their efforts to expand and improve vocational education and training offered in the United States. The Carl D. Perkins Vocational Education Act amendments are fashioned to help ensure that our work force will meet our future economic needs. In today's highly competitive global economy we must place our limited resources where we will get the greatest benefit. In my opinion, today that area is human capital. If we do not prepare our future work force to operate in the technical workplace of today and tomorrow, we will jeopardize our ability to compete internationally.

A study which I have requested—I am particularly thankful to the committee for building this into their committee amendment, which I understand has been accepted by the Senate, and I think it is a very important study. I am not sure what the outcome will be. But this provision that is now part of the committee amendment that has been accepted would require the General Accounting Office to conduct a thorough evaluation of the dual system of vocational education in the Federal Republic of Germany, and to determine whether this system or a version of this system, could be replicated in the United States.

Germany has long used—this has gone on for many years as part of their culture—school-based apprenticeship systems to help their noncollege bound youth get the skills they need for rewarding jobs and careers. While U.S. high schools typically have close connections to colleges, they usually have very weak links to the business world and to employers. A wide gap exists between the world of knowledge and learning and the world of skilled and rewarding work.

In assessing the German system and the ability to establish a similar program in the United States, this amendment would require the General Accounting Office to evaluate: existing job apprenticeship programs and their ability to prepare workers for the technical workplace; the future need for skilled workers and the extent to which job apprenticeship programs could meet these future work force needs; the appropriate age or grade level for students to enter job apprenticeship programs; the potential for such programs to reduce the dropout rate, to place more qualified workers in the workplace, and to increase the lifetime earnings of those who participate in such apprenticeship programs; the training wage appropriate for an apprentice; the estimated value and productivity of apprentices to business; the Federal and State role in regulating and funding such programs; and the direct and indirect costs/benefits of such programs to the Federal and State government to the business world, and to the company, as well as the individual.

To improve job prospects and productivity of what some have called the "forgotten half" of American young people, that is those who do not attend to college, I believe we need to create a national skill-building partnership between America's public schools and America's businesses.

Mr. President, I would like to insert in the CONGRESSIONAL RECORD a recent report issued by the Progressive Policy Institute. This report by Robert I. Lerman and Hillard Pouncy urges the creation of a 3-year apprenticeship program which would combine classroom education and on-the-job training.

I ask unanimous consent that be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Progressive Policy Institute, Policy Report, March 1990]

WHY AMERICA SHOULD DEVELOP A YOUTH APPRENTICESHIP SYSTEM

(By Robert I. Lerman, the American University, and Hillard Pouncy, Swarthmore College and Brandeis University)

EXECUTIVE SUMMARY

America faces a fundamental domestic challenge in the 1990s: reversing the stark and growing disparity between the fates of college-bound and non-college youths in our society.

In recent years, the latter have suffered a dramatic decline in real wages and income. Further limiting their economic prospects are the disappearance of high-skill jobs in traditional industries, and the failure of our nation's education system to impart even basic skills and competencies to many. If we permit these trends to continue, the promise of upward mobility will ring hollow for the "forgotten half" of young Americans who do not finish or go beyond high school.

The United States needs to give urgent priority to expanding the career options of non-college youth. Already, the country is losing a tragically large number of young black men to crime and drugs. The drop in real wages of young high school graduates of all races is weakening the commitment of young men to the economic mainstream and to family life. And the lack of job-ready skills, together with the declining number of young workers, is limiting the nation's productive growth and thus its ability to raise living standards.

The root of the problem is that the capabilities of the work force, especially non-college workers, are not keeping up with the rising demand for skilled labor. As a result, U.S. productivity and wage growth remain low, while the gap widens between the earnings of college and noncollege workers.

Between 1973 and 1987, the ratio of wages for college graduates to wages for high school graduates rose from 1.49 to 1.81, for young men with 5-9 years of work experience. In fact, in terms of purchasing power, the earnings of high school graduates actually declined over the last 15 years.

Defining the problem in this way inevitably calls attention to the American school system and its poorly designed system for integrating non-college youth into meaningful careers. Typically, high schools have close connections with colleges but weak links with employers. After leaving high school, non-college workers usually rely on informal contracts to obtain a full-time position. Many test the labor market by moving from one employer to another before settling into a long-term job.

High school students who are not going to college see little if any relationship between what they learn in school and their future careers. Nearly 60 percent of vocational students end up in jobs that have nothing to do with the training they receive in high schools. For America's non-college youth, a large and widening gulf separates the world of school and le rning from the world of skilled and rewarding work.

This reality poses particularly serious problems for disadvantaged youth. While most non-college youth see little gain from performing well in high school, they tend to stay in school anyway, if only because of social and family constraints. Disadvantaged youth, however, are more likely to fall prey to pressures from the street, including peers encouraging them to leave school altogether. And the absence of formal connections between employer and schools imposes special hardships on inner-city black youth, because they have few informal links to jobs.

In many ways, public policies have reinforced the growing tendency for academic skills to determine career success. Governments spend enormous amounts on grants and loans for low-income students to attend college. These help the most academically capable, but do nothing for the vast majority of low-income youth. Far less is spent on vocational education, which, in any event, is often divorced from labor market realities.

The natural impulse of policy makers is to develop highly targeted programs for the poor and for minority youth. Yet such a strategy can easily backfire. When programs deal only with the most disadvantaged and least educated, the participants easily become stigmatized. Many employers are unwilling to take a chance on the graduates and the youth themselves see such training programs as a weak substitute for existing jobs in the regular or underground economy. Funding is often unstable and difficult to sustain; at best, the programs provide only a marginal addition to the existing systems of education, training and career placement.

This paper makes the case for an alternative strategy—a job apprenticeship system for non-college youth beginning in the late high school years. Such a system would embed the job market difficulties of minority youth within the broader problems faced by non-college youth.

The apprenticeship system is elaborate and widely used throughout Germany, Switzerland, and Austria. But U.S. policy makers are only now beginning to take a serious interest in this method of integrating young people into jobs and careers. Our proposal would adapt the German model to American conditions, making due allowance for differences in culture and in the kinds of social problems our society faces.

We call for a national skill-building partnership between public schools and business. It would focus on four primary goals:

Expanding the nation's supply of skilled workers;

Narrowing the earnings gap between college and non-college youth;

Creating a powerful new incentive for youths to do well and stay in high school; and,

Offering disadvantaged youths a realistic alternative to early parenthood, crime and drugs.

How would a U.S. youth apprenticeship system work? Our approach envisions a five-step process:

1. change school curricula to expose students in the 8th through 10th grades to information about various occupations, including visits to businesses.

2. offer 10th grade students a choice between pursuing a job apprenticeship or remaining on a purely academic track. Those choosing the former option would sign formal contracts with specific employers.

3. create a three-year apprenticeship, starting in the 11th grade, during which students could earn skill certifications as they combine on the job training with school courses.

4. give apprentices a comprehensive test at the end of the 12th grade to ensure both job and educational proficiency.

5. spend at least 75 percent of the third year of apprenticeship on the job, and the remainder either in high school or community college to supplement technical training.

We propose a national Youth Apprenticeship Institute through which representatives of schools, businesses, governments and labor organizations can work together to specify the necessary skills required to enter and succeed in an occupation, to develop a system for certifying trainers as well as apprentices, and to monitor the quality of work site training. Washington's role is chiefly to act as a catalyst for efforts by local school systems and business to harmonize their curricula, job training and hiring practices. We further recommend $500 million in federal matching grants to fund apprenticeship demonstration projects in 10 cities.

Ultimately, the purpose of these efforts is to gain national credibility for apprentices as highly trained workers whose skills are occupationally specific, portable enough to be valuable for a variety of employers, and critical for taking effective advantage of additional training. It is also possible that apprenticeship will inspire youths who otherwise might not have finished high school to go on to college, in order to enlarge their prospects.

Youth apprenticeship is a progressive strategy for stimulating growth with equity—for boosting our nation's productivity while equalizing opportunities for young Americans. It can radically improve the preparation of youths for the skill demands of a global economy. At the same time, it offers minority youth an avenue into the economic mainstream. Youth apprenticeship answers the need for broad-based programs that reach the disadvantaged but avoid the stigma associated with welfare-type programs.

AMERICA'S SKILLS GAP

There is nearly unanimous agreement that America's high schools are doing a poor job of preparing many young people for work. There is less agreement over solutions. To some, better schools mean parental choice; to others, it may be merit pay for teachers, school-based management, more effective racial integration, or simply large increases in the budget to raise teacher salaries, reduce class size, and improve facilities. While these and other school-based reforms have merit, they overlook the central resource in the school system: student time.

The time and intensity of effort put in by students has an enormous impact on their performance. Unfortunately, today's students spend far too little time on school work. Only about half the time at school is devoted to active involvement in a learning activity. High school students in 1980 spent an average of 3.5 hours per week on homework, far less than the 10 hours per work devoted to a part-time job and the 25 hours per week watching television.

Low motivation is most acute among non-college students, who see little immediate gain from working hard in high school. They realize that earning a high school degree will affect their access to jobs, but they see little connection betwen their specific performance at school and their chances for good jobs or careers. High schools typically do not have elaborate job placement services; employers rarely rely on the recommendations of high school teachers; and those hiring new students generally do not request academic transcripts.

The connection between high school achievement and subsequent success is much closer in other countries, including Germany and Japan. Companies in these countries base their hiring and acceptance

of apprentices on grades and other indicators of school performance. Firms recognize that their substantial investments in training will only pay off if employees have the ability to learn. Conversely, the ability of firms to screen effectively for capable workers gives them the confidence they need to spend significant sums on training.

American managers increasingly recognize the importance of improving incentives for young students to learn while in high school. Employers have become so concerned about screening unqualified high school graduates that the American Business Conference and the National Alliance of Business recently decided to develop a standardized skills test for high school graduates. Roger Johnson, chief executive of Western Digital Corporation, sees the test as ". . . a great opportunity to make a direct impact and to signal to young people that there are benefits to doing well and penalites for not doing well in school."

While desirable, a national test may not be enough to motivate students and assure that they learn enough to become effective, productive workers. Many high school students are school-weary by the time they reach 11th or 12th grade. Over 70 percent of today's droputs leave high school because they do not like, or feel that do poorly with, an academic approach to learning.

Another barrier to good school performance is peer pressure against academic achievement. The problem is especially severe in many inner-city black communities. A study conducted in Washington, D.C. found that students who work hard and get good grades are often derided by peers for "acting white." The pressure to conform forces good students to disguise their efforts to achieve academic success. Even in high schools outside minority inner-city areas, the limited rewards for academic performance (especially for non-college youth) are rarely enough for many students to withstand mocking by their peers.

Student alienation from academic modes of learning is another barrier that limits educational achievement. Lauren Resnick, a past President of the American Educational Research Association, has observed that schools use learning methods that differ enormously from the way people learn at work and in other life contexts. For example, schools stress individual rather than team approaches; schools manipulate symbols and abstract thoughts while outside of school people use tools and deal with specific situations. Not surprisingly, many students do better when learning in a contextual environment.

The experience of the armed forces offers solid evidence that some students, particularly recruits with limited abilities, succeed better in courses taught under the "functional context" approach than through standard methods. For example, many students learn electronics most effectively in the context of how equipment functions and how it is maintained.

Differences in learning styles lead many students to choose vocational programs over academic ones. This option prevents some students from dropping out of high school. Moreover, non-college students can improve their academic skills by taking vocational education courses that stress learning through applications.

Unfortunately, however, the current vocational education system in U.S. high schools has some serious weaknesses. The most important is the mismatch between the students' course of study and their subsequent jobs. Less than three of 10 vocational education students work on jobs using the skills from their school programs.

The postsecondary vocational education system is also beset with problems. Although many of these vocational schools train students effectively and place them with employers, the training is largely school-based and often responds more to the number of school slots than to the number of jobs. This leads to frequent mismatches between the training and the jobs in which students are placed.

The postsecondary vocational system has also been marred by widespread abuses. Some for-profit "proprietary" vocational schools aggressively seek low-income students who qualify for federal student loans. A recent Congressional hearing focused on the case of a Florida correspondence school that employed nearly three times as many loan processors as instructors. Not surprisingly, the value of the training such schools provide is frequently dubious. Often, students default on the loans they were encouraged to take out—in 1986, the default rate for these loans was 40 percent.

The basic flaw in the existing vocational education system is its tenuous connection to the labor market. The people who operate vocational schools have few incentives to ensure that their training is relevant to specific employers' needs. While a reputation for high quality can obviously be valuable, potential customers often lack accurate information about the school's record. The situation is far different when employers spend their own money on workers who they expect to remain with the firm for many years. For them, the incentive to perform well is directly related to the employer's long-term success.

THE GERMAN MODEL

Germany's "dual system" of youth apprenticeship is built upon formal and intimate ties between schools and businesses. German employers believe their training system provides a major competitive advantage over firms in other countries. An employer who sponsors youth apprentices has a chance to observe potential workers during try-out periods, and sees a return on his training investment in terms of the worker's long-term productivity.

The investments and expected returns vary, especially with firm size and industry. Large employers, especially in the manufacturing fields, spend more on training than most small firms, but expect a high return because 80–90 percent of apprentices remain with the firm and often stay for many years. Small firms generally invest less and expect lower returns since they employ only about half of the apprentices and retain them for fewer years.

German students learn in detail about occupations from seventh through ninth grade. School tracking begins around the seventh grade, with students going into a unviersity-bound, an academic-technical, or a vocational program aimed at semi-skilled occupations. By ages 16–18, over half sign contracts with employers that specify the details of the training and compensation. Students receive on-the-job training and stipends from employers but must attend school part-time. Apprentices must take interim and final examinations to demonstrate their competencies. Boards of examiners made up of employer and worker organizations hold the examinations. After receiving their certification, over half of apprentices remain with the firm that provided the training and a large share of the others stay in the same occupation.

Overseeing the system is the Federal Institute for Vocational Training (Bundesinstitut fur Berufsbildung), which is not a government agency, but rather an entity governed by a board drawn from employers, unions, and the government. Through the Institute, competency standards are developed for nearly 400 occupational areas, a processs that often takes years of research and negotiation among the parties. The standards specify the minimum competencies for an occupation as well as a training plan that guides the timing, sequencing, and organization of the training. Regional chambers, made up of business and union representatives, govern the program at the local level. They check the suitability of firm training, organize exams, deal with complaints, provide technical assistance, and help match trainees with training firms.

Decisions by individual companies determine the supply of apprenticeship positions, without any national or regional plan. This insures a responsiveness to the needs of employers. In practice, the system has also proved capable of dealing with large increases in students wanting positions. Between the mid-1970s and early 1980s, the demand for apprenticeships jumped by 50 percent, largely because of a demographic bulge of youth. German employers were able to meet most of this unusually large increase in demand. New apprenticeship contracts rose by over 50 percent at a time when total employment fell by 6 percent.

A COMPETITIVE EDGE

The German experience offers the most striking demonstration of the success of the apprenticeship model. In Germany's modern, dynamic and high-growth economy, about 70 percent of young people enter the job market through the apprenticeship system. Only six months after passing the German apprenticeship examination, the majority (over 68 percent) of graduates were working in occupations for which they were trained. German executives attribute much of their business success to their sophisticated work force, trained largely under the apprenticeship program.

Studies confirm their convictions. French sociologists compared the performance of selected French and German firms in the same industries with similar physical plants and equipment. They found that higher productivity in the German firms stems largely from the German system of training and certifying workers. German factory workers not only attained higher skills, but also developed closer working relationship with other workers, including supervisors. Many managers and supervisors were formerly apprentices and thus know from experience what takes place in entry and middle level jobs.

A productivity advantage for German firms also shows up clearly in comparisons with similar British firms. The primary reason is the higher vocational qualifications of the German work force. In five major skill occupations, including electrician, construction and office workers, Germany trained about four times as many workers as Britain and without any sacrifice in quality. Overall, about 60 percent of the German work force obtains an intermediate level skill, or twice the rate in Britain. The high skill levels improve production and quality in many ways, including the implementation of new technology and the ability

of employees to organize production and undertake complex and varied tasks.

Workers in the lower half of the distribution of academic abilities gain most from the German approach to education and skill acquisition. Only 10 percent of German students leave school without a certificate of competency in a variety of basic subjects. One reason for this success in the educational realm is that students are aware of the large array of occupational outlets available to them through the apprenticeship system.

In "Schoolworks," a study of European education and job training programs issued by the German Marshall Fund, author William E. Nothdurft notes:

". . . the formalized credential-building that lies at the core of the dual system is the source of Germany's low youth unemployment levels and stands in stark contrast to America's 'Forgotten Half' problem—the low incomes and limited economic prospects of those who do not attend college.

"Today, persuading American employers to hire disadvantaged individuals who have completed any of the hundreds of training courses in the haphazard system of government-assisted job training currently in place is an uphill battle. Not surprisingly, they avoid what they perceive to be 'damaged goods' and seek known commodities.

"As a consequence, college degrees have become requirements for thousands of jobs that, in fact, require far less formal education. A universally recognized, noncollege credential-building system would provide the kind of assurance employers seek and customers demand."

LINKING SCHOOL TO WORK

How can an American youth apprenticeship system overcome problems that limit the productive capabilities of today's youth? To work effectively, the system must offer opportunities for rewarding careers. The initial training, say in a service station, bank, or factory, must be serious and yield certifiable skills; the apprentice must realize that the program's training can ultimately help him or her reach such high level occupations as mechanical specialist, service station owner, financial service representative, or bank manager.

Once operational, their new system would give non-college bound students greater incentive to perform well in high school. Those with solid achievement by their sophomore year would have the widest pick of apprenticeship opportunities. Proper guidance or even street knowledge about placements would alert students by the seventh or eighth grade about the potential rewards from learning key academic skills.

After learning about occupations, students would enter apprenticeships in the 11th grade. For example, bank trainees would learn the significance of responsibility; of mathematics in the calculation of interest rates and financial returns; of reading comprehension in understanding contracts; and of laws that banks must follow. Landscape apprentices would have to become competent in tasks as varied as the basis of fertilizers, how to budget, and how to present proposals. In these and other cases, apprentices will quickly recognize the relevance of their school work to the successful completion of their apprenticeship and securing a good job and carrer.

For students, the incentives to do well are the potential gains from entry into a successful career and the potential costs from spending three years with an employer without learning the competencies required in the occupation. Poor performance in the apprenticeship would mean forfeiting time and energy, giving up a potentially rewarding career, and having to start their job search all over again.

The effects of apprenticeships on peer relationships could prove as important as the direct rewards from an attractive career. By drawing juniors and seniors into an adult work environment, apprenticeships would expose participants to a new peer group and to expert workers who could serve as mentors. While most students already work part-time, their jobs are usually in low skill positions, often at fast food restaurants or retail stores, that have little to do with long-term career success and provide minimal skills training. In fact, the spending money earned often reinforces a youth culture in which education is a low priority.

There is growing recognition of the need for adult mentors, especially for the large number of adolescents who lack ties with their fathers and other adults in mainstream occupations. Some managers and professionals volunteer to help adolescents finish school, identify career goals, and avoid trouble with crime, drugs, or unwanted parenting. Although these mentoring programs can be constructive, the links they create are somewhat artificial, developed chiefly out of concern for the failure of the young person.

In contrast, the mentoring that accompanies apprenticeships would be routinely available through a school-employer system. Moreover, it would reflect the mutual interest of the trainer and the student in teaching and learning concrete tasks. After all, the apprentice aspires to enter the same occupation (and often the same company) as the trainers and other workers.

Another advantage of youth apprenticeship is that its teaching methods are more effective for many young people than are traditional school-based methods. When training takes place at work, the learning occurs in a functional context, the theoretical material has immediate practical application, and students can generally use all available tools to achieve the relevant tasks. Completing the tasks successfully requires more emphasis on cooperation among workers than takes place among students in school settings.

Youth apprenticeship programs have surface similarities to existing vocational education programs, but the differences are so significant that the two approaches can yield widely divergent outcomes. Vocational education takes place within schools, with little or no specialization, and without a serious certification procedure developed with and agreed to by employers and worker representatives. Another major difference is the way that training options arise under the two systems. The quality and quantity of vocational school courses are driven mostly by school budgets and by the interests of teachers, not primarily by the needs of employers.

In practice, this approach has left nearly 60 percent of vocational education students receiving training in fields unrelated to their future careers. In contrast, the apprenticeship system relies on the availability of specific jobs. Few employers will sponsor apprenticeships if they do not expect any long-term need for the workers in fields for which training is provided.

THE U.S. EXPERIENCE

Although the overall impact of vocational education in the United States is limited, some students who do find jobs in fields related to their studies achieve significant gains, through reduced unemployment as well as increases in hourly wages.

Increases are particularly large for black youth. In fact, black workers earn as much as whites, when studies control for vocational concentration, the training-related nature of the jobs, and personal characteristics.

Vocational education courses have also helped non-college students learn basic skills, such as math. Some high schools are developing programs of applied learning, which integrate academic with vocational subjects and thus assist students to learn in context and through hands-on techniques.

Formal apprenticeship programs within the U.S. have operated for many years but have trained only a small share of the labor force. The typical U.S. program differs substantially from the youth apprenticeship approach we propose. Under existing programs, unions restrict the number of apprenticeships and limit the available positons to experienced workers in their mid- to late-20s.

Economists have criticized union rules on grounds that they lower the number of future skilled workers. Critics also say that such restrictions have been used to benefit relatives and friends, and exclude others, including minorities.

Nonetheless, existing apprenticeship programs have demonstrated their effectiveness in training productive workers. A study of the construction industry (where current apprenticeship programs are especially widespread) found that union firms had higher productivity than non-union firms, partly because of the higher quality training delivered through union apprenticeship programs.

The U.S. experience with apprenticeship programs in the high school years, such as those operating in Austria, Germany, and Switzerland, is extremely limited. A demonstration project sponsored by the U.S. Labor Department in the late 1970s encouraged local school districts, state education agencies, community colleges and nonprofit corporations to operate in-school apprenticeship projects at eight sites. In general, the projects were highly successful. The sites trained over 3,000 youths and nearly all (95 percent) expressed satisfaction with the project. Although the working collaborations between schools, apprenticeship agencies and employers took a few years to develop, most employers approved of the program and 63 percent had already recommended that other employers join. The added government costs were extremely low, averaging only $1,384 per apprentice.

AN AMERICAN YOUTH APPRENTICESHIP SYSTEM

Can it work outside Europe? Can the U.S. build a comprehensive and successful apprenticeship system without a long historical and cultural tradition linking the state, education and work, such as exists in Austria, Switzerland, and Germany? Will U.S. firms participate in their own interest? Can employer associations, together with schools and other state agencies, achieve adequate cooperation and staying power to develop a major youth apprenticeship system?

Considering the alternative, which is to permit the less educated half of our youth population to fall farther behind, in effect dividing our society into two educational classes, the answer to these questions must be "yes."

Of course, a comprehensive system will require sustained, long-term effort. Employers must treat apprenticeship as a critical ele-

ment of their business and competitive strategy, not merely as an altruistic gesture. Judging by the German experience, U.S. firms will come to understand that they benefit from assuring quality preparation for their workers and a system of try-out employment. The investment patterns may vary, with large firms investing and recouping more value from the training and small firms drawing more from the work effort of trainees. But, it will be employers themselves that finance the stipends and training.

Establishing an effective program in the U.S. will mean major changes in the school system as well as the job market. Schools need to include vocational preparation in their curriculum, create complementary education programs for apprentices, and help in job placement.

Students would encounter the new vocational education track in the following sequence:

7th–9th Grade. Learning about various occupations through course modules, site visits, job sampling, and visits by employers to schools;

10th Grade. Application and interviews for apprenticeships; choices include a wide variety of occupations or staying in a purely academic tract; apprentices would sign agreements with employers at the end of the academic year;

11th and 12th Grade. Apprentices mix training at work sites with courses at high schools; the time spent at work sites will typically increase from 30 percent to 75 percent depending on the occupation; late in 12th Grade, apprentices take interim examination. High schools continue to design their general courses.

Post High School. Students spend 75–80 percent of their time at work sites but draw on community colleges for some supplementary theory and skills courses. Many students in technical fields take enough courses to obtain an associate degree.

Link to College Education. Some students, especially in technical fields, choose to go beyond apprenticeship education and attend college.

Perhaps the most difficult and extensive preparatory work will be to define the occupational areas and to specify the skill competencies and training standards. Employers, employer associations, and labor representatives will have to work with government education and labor agencies to achieve solid programs in each career field. Employers should provide the trainers, who themselves would have to undergo training and demonstrate their capacities. It will take time, perhaps two to three years, to build each occupational program. Certifications will have to be convincing to potential employers and have portability so that young workers are not tied to a single firm.

Employers would provide, and bear the direct costs of, occupational training. Governments would pay for technical assistance in the development and operation of programs, for monitoring the trainees' performance, and for testing the competencies of graduates. Savings from existing vocational education programs could fund these public functions as well as the school's new responsibilities for counseling and staging visits to work sites.

Government and labor representatives might have to agree to accept a training wage that is below the market wage and may sometimes fall below the minimum wage. Alternatively, apprentices might receive a training allowance in lieu of a wage for at least part of the student's time at the work site.

Although few training schemes of intensity and depth are currently available to high school students, a number of schools are beginning to experiment with such programs. Theme schools have been organized around occupational fields in the health professions, the travel industry, and the entertainment industry. In addition, the Pittsburgh school system is forging closer links with employers who can offer apprenticeships for students specializing in a vocational field. While promising, these initiatives must expand to cover a wide range of occupations and training programs designed to teach and test the key competencies in each career field.

A PLAN OF ACTION

Developing a new structure will require bold leadership within the public and private sectors. The federal government can act as a catalyst by launching a major youth apprenticeship demonstration project. It should consist of several steps:

1. Presenting the Vision. The President, Governors, and key Congressional leaders should announce their intention to join in a national skill-building partnership.

2. The Institute for Youth Apprenticeship. To promote apprenticeship, the federal government should create a public-private institute with representatives from business, labor, education and state governments. It would oversee the development of competency standards for apprenticeships and trainers in specific occupational fields, monitor training, provide technical assistance, and collect data on and engage in strategic planning for the system.

3. Demonstration Projects. Washington should allocate $500 million and require state matching grants totaling $250 million to undertake apprenticeships demonstration projects in 10 U.S. cities. Qualifying for funding would depend on the ability of states and cities to draw on local business, labor and school officials in working closely with the Institute. Their joint efforts would focus on developing competencies that have credibility with employers, training rules, model contracts, and monitoring and certification systems for a variety of job paths. A second goal of the demonstration projects would be to test the effect of the program on young workers, on student academic performance, and on the structure of jobs and career ladders.

4. Technical Assistance. The Institute should work in concert with national business and trade associations to develop procedures certifying that apprentices have achieved competency in their occupational area.

5. Removing Obstacles. Congress and state legislatures should grant waiver authority to ensure that existing government regulations and laws do not stand in the way of a fair test of the apprenticeship idea. For example, funding formulas linked to school attendance should instead be based on performance in imparting marketable skills. Current rules on liability, child labor, and minimum wages must also be adapted to permit apprenticeships.

6. Research and Evaluation. The Institute should gauge the effects of apprenticeship on a) students' career options and expected earnings; b) the academic performance of pre-apprentice and apprentice students; c) job ladders and productivity; and, d) the number of work-based training and career positions available to non-college youth. It should also study the processes for creating competencies, for monitoring training, and certifying skills.

CONCLUSION

Does the promise of youth apprenticeship warrant such a dramatic restructuring of our school and job training systems? How can combining job-based education with other school reforms affect the nation's domestic problems?

We believe youth apprenticeship can help us fulfill four urgent national goals:

First, offering serious training and entry-level jobs to large numbers of non-college youth will increase the supply of skilled workers. The opportunity to acquire marketable skills will be particularly important to minorities and women, who will make up a disproportionately large part of new entrants to the workforce.

Since employers will be providing and paying for most of the training, the skills will be in fields they expect to need. The increase in relevant skills will raise productivity as well as improve efficiency in the implementation of new technologies. In fact, quality and relevant training will do more to raise productivity than increased physical capital. However, it will take time before the cohorts trained through the new system make up a large share of the nation's labor force.

Second, as the productivity of non-college youth increases, a rise in their wages will follow. Their increased earning power will reduce the income gap between them and the college-educated workers. We can expect employers to build on the capacities of apprentices by developing new job ladders and providing additional career training. These steps will, in turn, create more professionalized careers for non-college workers and thus raise their social status.

Third, word of promising new career options and the chance to begin job training by 11th grade will filter down to high school and junior high school students. This could well achieve more improvement in academic skills than most school reforms currently under discussion, because of the new incentives to learn, especially among those students not planning to attend college. Raising the proportion of non-college youth who take their studies and mainstream career options seriously could change the school atmosphere so that student peers no longer discourage good students from succeeding academically.

Fourth, the enhanced education, training, and careers of non-college youth will revive hope among youth who today are harming themselves through drugs and early parenthood. Over the last century, sexual activity has been occurring at younger ages while entry into responsible jobs has been taking place at older ages. These changes have no doubt contributed to the decline in marriage rates and to the tragic rise in one-parent families. Within the black community, the situation is so serious that the absence of fathers has become the primary cause of child poverty.

If apprenticeships draw large numbers of young people, especially disadvantaged minority youth, into serious training as early as 11th grade, early parenting will become less attractive and marriage more attractive. Making appealing careers a realistic option will be one factor, but perhaps as important will be the mentoring and acculturation that takes place in an adult work environment.

Ultimately, these effects will cumulate and penetrate the urban underclass. It is

conceivable that a large, effective youth apprenticeship program will help bring today's urban underclass into the mainstream of economic and social life. Large impacts could take place quickly, since the program will primarily benefit noncollege youth, the group that accounts for most neighborhood crimes and a large part of the drug problem. However, only a strategy aimed at a broad spectrum of young people can make a significant difference. Both young people and potential employers will view programs geared toward the poor as providing second-rate jobs and inferior workers.

This brings us to a final and crucial advantage of the youth apprenticeship strategy—its natural appeal to a broad public. Unlike other initiatives, this job-based education strategy is inclusive, not exclusive; it is productivity-enhancing, not simply redistributive; and it promotes the incentives to learn and earn instead of discouraging work. The program can perhaps do the most for young minority workers, yet in a way that neither stigmatizes them nor gives them advantages over white workers.

Now is the time to bring the apprenticeship idea to center stage for the public, business and labor leaders, and government policy makers. Once people understand the program and its potential future benefit, large scale implementation can proceed. It might take years before youth apprenticeships are sufficiently widespread to begin to generate major effects. But we believe the public will support the program and, most importantly, will recognize that long-term problems require long-term solutions.

Mr. NUNN. Mr. President, under such an approach high school juniors and seniors would divide their time between the classroom and work at local businesses. The curriculum would emphasize theory and technical knowledge to complement on-the-job training at local businesses. Students would actually sign contracts with the employers who would bear the direct costs of job training.

Finally, apprentices would have to pass competency tests in order to become certified in an occupational field. In Germany they have considerably more pride in these occupational fields than we have been able to instill in America. I think that is a very, very important part of this productivity as a nation.

In addition, similar apprenticeship programs could be developed between technical institutes and industry.

Agreements reached between these two parties would allow current workers to further develop their academic skills in the classroom and would provide on-the-job training on modern machinery for those already enrolled in our technical institutes. Through this effort, our technical institutes would graduate students better prepared to meet the real needs of the business community.

I believe this idea holds special promise for minority and immigrant youth who will be entering the work force in disproportionately high numbers in the 1990's. By connecting success in the classroom with the chance to acquire marketable skills, young people would really have a chance to develop a powerful new incentive to stay in school and to do well.

Mr. President, the Senate passed the Community and National Service Act on March 1, 1990. Senator PELL was a joint sponsor of that act. This is a demonstration program that would offer young people who are willing to serve their country the opportunity to earn education and skilled training benefits. I hope the House will act on that legislation this year.

Taken together, youth apprenticeship and voluntary national service I believe can create an upward mobility track for all young Americans, a way for every young person willing to put out the effort to earn job skills or a chance for a college education.

I believe this strategy for youth education and skilled training should be the centerpiece of efforts to expand on opportunities for our citizens, and to restore America's economic power in the world economy.

We all agree that increasing the brainpower and skills of our Nation's young people and our work force is an essential goal. We must explore innovative new ways to close the growing skills and earnings gap between college-bound and noncollege youth in our society.

I hope the GAO study required by this bill will help us to determine if this German dual system of vocational training may be effectively implemented to the benefit of our Nation, our businesses, and particularly our young people.

I thank the Senator from Rhode Island, and the Senator from Kansas for their leadership in this overall area, which I think is splendid. I particularly am grateful to them for accepting this study amendment which I believe will give us an awful lot of information that can help us in the future to make these decisions. I thank the Chair.

The PRESIDING OFFICER. Who yields time?

Mrs. KASSEBAUM. Mr. President, I would be happy to yield whatever time the Senator from Utah would request.

The PRESIDING OFFICER. The Senator from Utah [Mr. HATCH] is recognized.

Mr. HATCH. Thank you, Mr. President.

I, too, want to stand on my feet and give appreciation to the distinguished Senator from Rhode Island and to the distinguished Senator from Kansas for their work in the whole education area, especially and specifically with this particular bill.

Mr. President, I appreciate the opportunity to speak about this bill, of which I am a cosponsor.

I want to complement not only the two Senators that have been leading

on this bill but the staffs of all of the members of the Labor and Resources Committee, particularly, though, the staffs of Senator PELL and Senator KASSEBAUM and, of course, my own staff, Laurie Chivers, who worked long and hard on this particular bill.

This bill is the result of a lot of hard work and compromise on both sides of the aisle. This reauthorization takes into account many of the changes which have been proposed as a result of the hearings held throughout the United States, and the studies conducted by the National Assessment of Vocational Education.

I have received letters from many national groups such as the National Association of State Directors of Vocational Technical Education, the National School Boards Association, the National Conference of State Legislators, the National Governors' Association, and the Council of Chief State School Officers, all praising this legislation. I commend Senators PELL and KASSEBAUM for the time they and their staffs have spent studying this testimony and making sure that this legislation is representative of the concerns of these diverse groups.

I would like to comment on one concern that I have about this bill. It involves the funding split between secondary and postsecondary funds. I would have preferred the original amendment proposed by Senator DURENBERGER as I think that the Federal Government should provide States with maximum flexibility. However, I will support the compromise amendment which has been worked out by Senator DURENBERGER and Senator PELL, so that we can proceed expeditiously with this legislation.

The Carl Perkins legislation is some of the best education legislation that this body has produced. In the last few years the national understanding of the value and significance of vocational education has grown tremendously. No longer is there a stigma attached to the idea of vocational education. People who are trained in fields typically referred to as vocational are accorded the respect and admiration which is appropriate for individuals with such technical and complex skills. Our increasingly technical society recognizes individuals trained with these skills by providing them with the high salary levels which unfortunately are still the measurement we use to determine how valuable one's skills are in our society.

The impact of this legislation on increasing opportunities for women in the job market has been very significant. Many displaced homemakers who have suddenly had to be the primary source of support for their families have been trained as a result of the funds available through this act. These women can then provide their children with a higher standard of living and more opportunities through the increased self-esteem they are able to build in themselves and their children, and through the increased salary which they are able to command because of their new job skills. The growing number of single-family homes mandate that we make this training available if we are to protect the future of our country, and the increasing number of children who live in one-parent families.

Utah data shows that of the clients participating in the Single Parents and Homemakers Program, 68 percent had no postsecondary training, most had two children although 34 percent had three or more children, and the annual income of 82 percent of the participants was less than $10,000 prior to their participation in the program. The number of participants in the program the second year was nearly twice the number participating the first year.

Let me read you a letter I received from a woman in Kanab, UT. She was involved in a Utah program called Turning Point which is funded through Carl Perkins. She says:

In April of 1987, I was contacted by Sue Rasmussen, the local director of Turning Point.

At that time, I had just filed for a divorce after 32 years of married life and raising ten children. * * * I was 75 pounds over my desired weight and felt that life had failed me and that I had failed life completely. I had no idea of what to do next. I was on state welfare and terribly frightened.

My exposure to the "Turning Point" program * * * was indeed the turning point in my life. The positive atmosphere, the valuable material presented in such a caring way, all lent itself to my need for a new beginning. It gave me hope! The real change however, came as a result of a confident, courteous, yet warm woman, looking at me, one on one, and telling me that I could become anything that I wanted to be, that I could accomplish anything with the proper attitude and preparation. That gave me faith in myself to go along with my new found hope.

Today I am manager of a furniture store. I believe now, that I am of worth in today's society. In short, I have found "me." Programs for women today can and will change the future for our daughters. This I believe.

Sincerely,

EVAUNE G. WINSOR.

Letters like this one are an inspiration to me and encourage me to fight for effective programs which help citizens of this country attain new skills and go from the ranks of welfare recipients to confident and competent workers. They also make me aware of the thousands of people at the local level who are the backbone of successful Federal programs.

This legislation which is before us today will ensure that outstanding programs like the Turning Point Program in Utah will continue. This bill maintains the strong State role that is vital to the success of any good program. The State councils are maintained as a major source of input for vocational education in the States. I know that in Utah our State council for vocational education is a very visible force in the education circles. Anytime that vocational education looks like it may be shortchanged, the members of the council point out the problems and get the needed results to keep vocational education a strong member of the educational structure.

I realize that there are some concerns about whether the needs of special populations will be met as a result of changes which have been made in this legislation. This legislation has been amended to increase the mainstreaming of these people into regular courses without jeopardizing their access to services. This will result in better training programs and increased employability for these people who are in the best position to upgrade their skills.

The bill also requires the State to make assurances in the State plan that the needs of special populations such as individuals with disabilities, the economically disadvantaged, and students with limited English proficiency, are met in the regular course offerings provided by the local districts and institutions participating in Carl Perkins funding. The State and local providers must also build in assessment criteria to measure the effectiveness of programs offered in terms of their ability to meet the needs of the special populations and their ability to provide a quality program to all students. State sanctions must be available in case local providers do not provide the needed quality and access.

A new program which is provided for in this bill is the tech-prep or 2-plus-2 program. This program provides funds to States to set up 4-year technical preparation programs which consist of 2 years of training in secondary school and 2 years of training in postsecondary institutions. This legislation requires that a minimum of 5 percent of the funds be used for this purpose. Programs of this nature help to meet the needs of our increasingly complex technological society. Students graduating from these programs enter the work force better prepared and at a lower cost to themselves and to the taxpayers. This is increasingly important in a time of high education costs in our society.

I urge my colleagues to support this bill. Vocational education will be enhanced as a result of the passage of this legislation. Students trained under the programs outlined will benefit from the new assessment criteria and new program requirements which are an integral part of the proposal outlined in this legislation. I am proud to once more have my name as a cosponsor of this far-reaching legislation, and look forward to hearing from my constituents about the many suc-

cesses of this new and better legislation.

Again, I think that this bill is a compliment to that person for whom it is named, Carl Perkins. I want to pay tribute to him, although he has passed on. I remember working with him when I was chairman of this committee. Working with him was a real pleasure. I think this bill is very appropriately named, and I want to pay tribute to him at this time, as well as to my dear colleagues and friends, Senator PELL and Senator KASSEBAUM, who have done such a good job on this bill.

Again, one more compliment to the staffs who do such wonderful work on the Labor and Resources Committee. I think we have the best staffs of anybody. I want to personally praise them. This is a difficult area to work in, and it is difficult to accomplish the things that need to be accomplished, but I think the Education Subcommittee does as good a job as any subcommittee in Congress. I compliment my colleagues and their staffs for it.

Mrs. KASSEBAUM. Mr. President, I second the comment made about the staff by the ranking member of the Labor Committee. We all have, I know, very much appreciated his support in our efforts to move this legislation through the committee.

I know that Senator WILSON wants to speak. We were waiting for someone else. If he is ready, he may proceed.

I am happy to yield to the Senator from California any time he may wish.

The PRESIDING OFFICER. The Senator from California [Mr. WILSON].

Mr. WILSON. Thank you very much, Mr. President.

I thank my dear friend, the Senator from Kansas, and join in the congratulations that have been extended to her and the Senator from Rhode Island for their very distinguished work in managing this important legislation.

Mr. President, I rise in support of the Carl D. Perkins Act reauthorization legislation. It builds upon our successes and reaffirms our Nation's commitment to helping those who most need it to become productive members of the work force.

I am particularly proud of provisions within the legislation based upon a concept developed nearly a decade ago by the chancellor's office of the California community colleges and the California Department of Education. It is popularly known as the "2+2 tech-prep" programs; "2+2" programs not only encourage our youth to stay in school, but also to continue their education at the postsecondary level.

In California, we have taken the tech-prep program a step further, and I am happy to report that several community colleges have developed what they now term the "2+2+2" program to link students to the California State university system.

I am also pleased that the committee bill includes provisions to ensure that the fine research work being performed by the National Center for Research in Vocational Education, located at the University of California, Berkeley, will continue.

But for all the long hours and well-intentioned efforts spent on the legislative package before us today, I believe our work remains unfinished on one specific issue and that is, what level of flexibility should we allow the States in determining support for secondary and postsecondary vocational education programs?

While the legislation does contain a carefully crafted waiver provision to provide greater flexibility to the States, I believe present law is preferable.

Currently, there are 32 States which now allocate more of their Perkins Act funds to postsecondary institutions than the committee funding threshhold would allow. In California, for example, there has been a longstanding 47-53 funding split between the California community colleges and the K through 12 education.

I urge my colleagues on the House-Senate Perkins Conference Committee to maintain current State funding flexibility.

Finally, Mr. President, I am pleased that I was able to reach agreement on an amendment I had intended to offer to provide for greater coordination of children's services at our Nation's schools.

As the colloquy which will follow indicates, the chairman of the Senate Committee on Labor and Human Resources, Senator KENNEDY, has pledged his support in joining me in developing a proposal to help our children and youth get a healthy start in life.

Mr. President, I see the committee chairman, Senator KENNEDY, on the floor and wonder if I might clarify several matters regarding a Healthy Start amendment I had intended to offer to the vocational education legislation before us.

Specifically, am I correct in understanding that the committee chairman is prepared to give me a commitment to work together in drafting legislation which incorporates provisions of both S. 2095, the Healthy Start Demonstration Grant Program, and S. 2363, the Head Start Transition Project Act of 1990?

Mr. KENNEDY. The Senator from California is correct. I have consulted the chairman of the Senate Subcommittee on Children, Family, Drugs, and Alcoholism, Senator DODD, who has been a strong advocate for the coordination of children's services, and I believe we can reach consensus on a legislative package which combines both proposals.

Mr. WILSON. I thank the Chairman.

Am I also correct in understanding that the committee chairman and I will cosponsor the new legislative proposal during floor consideration of the Head Start reauthorization?

Mr. KENNEDY. The Senator is correct.

Mr. WILSON. I thank the Senator for his comments. With the assurances I have received from Senator KENNEDY, I see no reason to offer my Healthy Start amendment at this time. I am pleased that we were able to work out this agreement. In the end, I think we will have taken an important step toward getting America's children the support and assistance they need to become confident, caring adults.

Mr. PELL. If the Senator would yield, I would just add that I am glad we were able to reach a consensus on this matter. I wish to thank the committee chairman for his efforts.

Mr. WILSON. Mr. President, before I close, I again thank the distinguished manager for the majority, Senator PELL, and my very good friend, the ranking member of the Senate Subcommittee on Education, Senator KASSEBAUM, for their extraordinary assistance on this matter.

I look forward to final passage of the Carl D. Perkins Act reauthorization legislation.

I think those who have been so hardworking in their resolve to see that it is brought to passage can justifiably take great pride and enjoy the satisfaction they are going to make as a result for a great difference in the lives of a number of young Americans.

Mr. President, I thank the Chair and relinquish the floor.

The PRESIDING OFFICER. Who yields time?

Mr. HUMPHREY. Mr. President, some concerns have been raised that S. 1109 would have unintentional ramifications in the area of abortion. Specifically, these fears revolve around the following questions:

First, that the prohibition on sex bias in support services contained in inserted section 227 might be used to require abortions, abortion counseling, and abortion referral.

Second, that the mandated provision of services to single pregnant women under inserted section 242 might be used to provide abortions, abortion counseling, and abortion referral.

Third, that the prohibitions on sex discrimination contained in section 501 might be used to require abortions, abortion counseling, and abortion referral, on the basis of the fact that only women can have abortions.

Fourth, that any other program funded by S. 1109 could be used to pro-

vide abortions, abortion counseling, and abortion referral.

If funds under this bill were intended to facilitate abortion in any way—from counseling abortion to funding it—it would be opposed by the House and surely by the President. For that reason, I asked that the managers of the bill to assure the Senate this is not the intent of the legislation.

In response to this request, the managers—the Senator from Rhode Island [Mr. PELL] and the Senator from Kansas [Mrs. KASSEBAUM]—have provided me with a letter clarifying the legislative intent. Without that clarification, as a well-known opponent of abortion, I could not have agreed to the unanimous-consent request under which the bill is being considered.

I thank the managers for this statement, and I ask unanimous consent that the letter from the Senator from Rhode Island and the Senator from Kansas be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

COMMITTEE ON LABOR AND
HUMAN RESOURCES,
Washington, DC, April 4, 1990.

Hon. GORDON HUMPHREY,
U.S. Senate, Washington, DC.

DEAR GORDON: We appreciate your calling to our attention your concerns about S. 1109, legislation reauthorizing the Carl D. Perkins Vocational Education Act.

We want to assure you that there is no intent to use any of the funds authorized by this bill to counsel for or facilities abortion.

Sincerely,

CLAIBORNE PELL,
Chairman,
NANCY LANDON KASSEBAUM,
Ranking Minority Member,
Subcommittee on Education,
Arts and Humanities.

Mr. DOMENICI. Mr. President, I am pleased to rise today in support of S. 1109, the Carl D. Perkins Vocational Educational Reauthorization Act. The Federal commitment we have made over the years supporting vocational education has had a tremendous positive impact.

Through the Carl Perkins Act, the Federal Government has made critical contributions to the network of State and local vocational education programs by helping improve the quality of programs, and by improving the access to vocational education by special needs students.

The reauthorization bill we have before us today makes important improvements to the Carl Perkins program that will enable it to better meet the vocational education needs of today's students. The economy of the future will require an even more highly trained work force than it does now, and workers need to be able to adjust rapidly to new technologies and changing economic demands.

This reauthorization bill moves to improve the integration of vocational education with academic education, and thereby improve the basic skills of vocational education students. In addition, much attention is given in this bill to assuring that the program serves the needs of the most disadvantaged, helping vocational education address the alarming high number of youth and young adults who are at risk of failing in education and in work.

The heart of this legislation is a basic Federal grant for State and local programs, on which 95 percent of the bill's $1.5 billion authorization would be spent. Under this grant funding would be targeted to disadvantaged students through a new formula that would track the need-based chapter 1 education program. Part of the funds would be used for statewide programs, while most would go directly to assist local programs. Another, special, part of the basic State grant is set aside for what is called tech-prep programs that link the final years of high school with postsecondary or apprenticeship training.

In addition, efforts are made in this bill to target funds to serve four groups: the economically disadvantaged, the disabled, those with limited English proficiency, and men and women in nontraditional occupations.

The final 5 percent of funding is set aside for national programs, and programs to serve native Americans and Native Hawaiians.

In both 1984 and 1989 I introduced legislation reauthorizing the Carl Perkins Act because I felt strongly that our country needs a quality system of vocational education. I coauthored the 1984 bill with Senator CHILES and S. 799, which I introduced last year, was very similar to the 1984 bill. Those bills proposed making the basic vocational eduction grant to States as flexible as possible—providing States with the ability to craft programs recognizing the particular needs of their States. Those bills also attempted to assure that Carl Perkins helped students meet the high-technology needs of our evolving economy.

I am pleased to see in this reauthorization bill that both of these important goals are being addressed. Much attention has been given to assuring students have access to training with state-of-the-art technologies. In addition, a good effort was made to remove spending restrictions in the program that have inhibited the effectiveness of those implementing vocational education programs in my State from meeting the needs of New Mexicans.

There is, however, a part of this bill about which I am still very concerned. This bill imposes on States a new requirement that at least 65 percent of a State's basic grant be spent at the secondary school level, and 35 percent be spent at the postsecondary level. This is a new requirement intended to assure services are made available to at-risk high school students.

Unfortunately, the requirement would override efforts made by individual States to meet the special needs of students in their States. This requirement will create a particular problem in my State of New Mexico which is the only State to spend 100 percent of its Carl Perkins funds at the postsecondary level. In New Mexico secondary education funds are equalized across the State, and vocational programs are considered as part of the allocation made by the State to secondary schools.

Those very helpful, Federal Carl Perkins funds represent only a small amount of funding spent on vocational education—about $6 million in New Mexico. Since the New Mexico allotment is so small, the State believes Carl Perkins funds are used for more effectively by focusing on helping postsecondary programs, rather than spreading funds around to the point where individual programs are helped only slightly. These funds support a network of 17 public postsecondary programs across New Mexico, enabling 95 percent of New Mexicans to be within 25 miles of such an institution.

I strongly support effective vocational education at the secondary level, but I believe States like New Mexico ought to be given the ability to use Carl Perkins funds in ways that are most effective for New Mexico.

I understand the managers of the bill are including today a modification to this provision that will allow States to apply for waivers enabling them to spend up to 50 percent, and in some cases up to 65 percent, of Carl Perkins funds at the postsecondary level. The chairman of the Education Subcommittee Mr. PELL, has been very gracious in trying to accommodate concerns I and others have on this issue, and I thank him and Senator DURENBERGER for working out this new provision. However, I still believe we should give States complete flexibility on this point.

Finally, Mr. President, I commend Senators PELL and KASSEBAUM for their hard work on this bill, and the attention they and their staffs have given to my concerns about vocational education. In whole, this bill makes substantial improvements to a highly important program.

INDIAN PROGRAMS IN S. 1109

Mr. President, I am most grateful for the very cooperative and supportive attitudes of Senators PELL and KASSEBAUM in accepting several much needed improvements in vocational education for Indian and Native Hawaiian programs.

As many of my colleagues are aware, I have sponsored two Indian economic summits—one for the largest Indian tribe in America, the Navajo Nation

and 1 for the 19 Pueblos and 2 Apache tribes of New Mexico. In both economic summits we concluded that vocational education opportunities are a vital key to employment for many talented Indian students.

S. 1109 increases the current allocation for Indian and Native Hawaiian programs from 1.5 to 2 percent. It will be primarily used to fund programs in Indian-controlled postsecondary vocational education institutions such as Crownpoint Institute of Technology in Crownpoint, NM.

In dollar terms, there will be an increase of at least $6 million and at most $18 million, depending on appropriations. Indians currently receive about $12 million from the Carl Perkins Act. With these changes, they will be receiving between $18 million and $30 million.

Of the 2-percent set-aside, seven-twelfths will be used to fund programs administered by Indian tribes. One-twelfth will be used for the first time to provide grants to 52 secondary schools funded by the Bureau of Indian Affairs of the U.S. Department of the Interior.

Two-twelfths of the set-aside will go to Indian postsecondary schools with at least 100 students, and the final two-twelfths is for Native Hawaiian vocational education.

This distribution of the 2-percent set-aside is excellent for Indian and Native Hawaiian vocation education, and I fully support the manner in which S. 496, the Bingaman-Domenici bill for expanding and improving Indian vocational education, has been incorporated into S. 1109.

I am very pleased to report that my amendment to move the effective date for Indian progarms up to October 1, 1990, from July 1, 1991, has been accepted by the floor managers of the bill.

I again thank Senators PELL, INOUYE, KASSEBAUM, BINGAMAN, and MCCAIN for their excellent work to improve the conditions and potential for Indian and Native Hawaiian vocational education.

Mrs. KASSEBAUM. Mr. President, I am happy to yield such time as the Senator from Vermont may desire.

The PRESIDING OFFICER. The Senator from Vermont [Mr. JEFFORDS].

Mr. JEFFORDS. Mr. President, I appreciate the Senator yielding. I am certainly here in support of the act. There are serious problems in the area of vocational education.

Mr. President, I support S. 1109, a bill to amend the Carl D. Perkins Vocational Education Act. I commend my colleagues Senators PELL and KASSEBAUM of their success in crafting a bipartisan bill.

Vocational education has been referred to as the "latchkey kid" of the educational system. Often neglected in budget packages and left behind by the back-to-basics reform movement of the past decade, this program has received little attention.

Such treatment is both unjustified and outdated. Unjustified because the programs offered to students by vocational education programs are not a second choice to traditional 4-year programs. Outdated because our world has changed and with it the demands on our future work force.

Vocational education has not recieved the recognition it deserves. Too many still hold the notion that vocational education is hobby education—learning a hobby such as wood working or sewing. Nothing could be further from the truth.

In my own State of Vermont there are 16 area vocational centers. These centers offer programs ranging from aviation mechanics to the performing arts. Vocational education is far from what it used to be and the programs in Vermont demonstrate how drastically these programs have changed over the years.

For example, the aviation mechanics class in the Burlington Area Vocation School—one of the few in the country—has rebuilt a severely damaged helicopter salvaged from the Korean war. The school has another program which combines both education and community service. In a creative effort to confront the rising costs of housing in the area, vocational students work cooperatively to build low-income housing projects. This effort not only gives students a hands-on work experience, it also provides a very needed service to our community.

In both of these classes and all the others—from stone cutting to auto mechanics to culinary classes—students are working with the real thing. Real cars are fixed, real helicopters are rebuilt, real food is prepared and served to real customers, and real granite is used to cut real headstones and monuments.

Clearly, vocational education has changed. It is preparing students—not for hobbies—but for real work experience.

But the classes for students are not the only changes which are occuring. In an effort to bring qualified individuals from business and relevant fields into vocational classrooms, Vermont has embarked upon an alternative teacher training program.

The Vermont Mentor Program encourages highly qualified teachers to serve as mentors to less experienced teachers. This program has been successful in helping instructors upgrade their teaching competencies via the mentor teacher as well as attract individuals who were formerly employed or are currently employed in business to become vocational education teachers.

Essentially, this program provides teacher training in the classroom. Mentor teachers not only serve as advisers to less experienced teachers they also provide classes for skills upgrading and alternative methods of certification. Individuals working in relevant businesses who wish to become teachers but cannot afford the time to return to university classes can begin their certification process through the Mentor Program.

The subcommittee adopted my amendment to the Perkins Act to encourage mentor programs. Grants will be made on a competitive basis to institutions of higher education which offer comprehensive programs in teacher preparation. Finding and retaining qualified teachers is a problem nationwide—this program offers a means of upgrading, recruiting and retaining teachers for vocational study.

States across the country are embarking on similar programs. Such dedication and innovation has kept vocational education successful in keeping at risk students in school. Vocational education has encouraged and targeted the disadvantaged and those with disabilities. It has encouraged sex equity and nontraditional employment opportunities for women as well as training for dislocated homemakers and other adult populations.

Yet, even with such reform, recent reports allege that the U.S. education system unfairly favors its college-bound students over those unlikely to attend a traditional college. Some reports conclude that Federal, State, and local governments, and private entities spend $45 billion a year subsidizing college students, but no more than $7 billion annually on postsecondary training of those who don't go to traditional colleges.

S. 1109 puts the Federal Government firmly on the record in favor of improving our vocational education system. It dramatically changes the current Perkins Vocational Education Act in a number of important respects.

First, it adapts old-line vocational programs to meet the needs of our future work force. It places a strong emphasis on the integration of academic and vocational curricula which is essential not only to reduce the stereotype of vocational education as a nonacademic track but also to ensure that our work force is adequately prepared for the challenges of the future.

The bill also takes a dramatic departure from past bills by eliminating the set-asides for special populations. While the specific monetary set-asides have been abolished the commitment to these populations are not. Perkins funds serve four important populations: economically disadvantaged, disabled, limited-English proficient, and men and women with interests in nontraditional jobs. S. 1109 allows for flexibility of funding while providing for the necessary accountability meas-

ures to ensure that the populations are served.

The bill acknowledges that Federal funds must continue to be targeted to the disadvantaged. Federal funds make up only 10 percent of total vocational education funding; the money available must therefore reach those most at need. S. 1109 achieves that mandate by directing money according to our chapter 1 count which serves the economically disadvantaged.

The formula in S. 1109 has been created in order to safeguard the directing of funds to area vocational centers. While both the House and Senate versions of reauthorization provide that funds be directed to the local level, S. 1109 ensures that funds may go either to area vocational centers or local education agencies. This provision has allowed Vermont, which has adopted a system of area vocational centers because of its rural nature, to better use funds and serve its population.

The bill establishes a tech-prep program to develop consortia linking local education agencies or area vocational centers with community colleges or postsecondary vocational technical schools to offer a 2-year degree or apprenticeship program. These partnerships offer a degree or certificate program in a condensed timeframe to encourage students to remain in school and force institutions to work together to reduce duplication of classwork.

Our world is rapidly changing and the future needs of our work force will be great. Greater skills will be required to remain competitive and vocational education is geared to handle such training. S. 1109 further encourages this goal.

What remains to be done is to educate our society that vocational education is not for those unwilling or unable to go on to a traditional 4-year institution of higher education—is a viable and worthy choice and essential to maintaining America's competitive edge in the future.

Mr. President, I am strongly in favor of this bill. I yield the floor.

Mrs. KASSEBAUM. Mr. President, I commend the Senator from Vermont for his work in education on the Labor Committee. It has been very valuable to us in shaping the legislation, and I appreciate it.

Mr. JEFFORDS. I appreciate the grand words. The Senator has done an outstanding job, along with the chairman of the subcommittee, and I deeply appreciate the cooperation and efforts they have given us.

Mrs. KASSEBAUM. Mr. President, I am happy to yield the Senator from Minnesota however much time he may wish.

Mr. BOSCHWITZ. Mr. President, I rise today to speak on the Carl D. Perkins Vocational Education Act Amendments of 1989, S. 1109.

I believe that this act on balance improves the vocational education program. It better coordinates high school vocational programs with postsecondary institutions, increases research on vocational education and fosters local control.

However, Mr. President, the bill, in my opinion, has two serious shortcomings. First, it states that no grant under the allocation formula shall be less than $25,000. While I know that the bill allows local school districts to form consortia in order to meet the minimum grant threshold, in doing so it will undoubtedly force several small school districts to combine programs to receive these funds. For this reason, I hope that the House figure of $5,000 will prevail in conference.

My State of Minnesota has numerous school districts that will have to combine programs. I believe that this provision does not take into account the fact that many small schools have excellent vocational education programs. It also overlooks the fact that large rural States like Minnesota may have to transport students over long distances to the next school. I do not believe that riding on a schoolbus is a good way to use the academic day.

Minnesota does an excellent job of educating its youth. We have the highest graduation rate in the Nation, over 90 percent, and ranks third in the American College Testing [ACT] Program. In fact, Mr. President, 66.5 percent of Minnesota's 1988 graduates enrolled in a postsecondary education program. That's higher than the high school graduation rate in several States.

I do not believe we should enact legislation that will hamper schools operating successful programs. I have always supported local control and believe that a one-size-fits-all program from Washington is a poor way to draft legislation.

The second flaw in this bill is the mandate that States must spend at least 65 percent of their Federal vocational education moneys on secondary programs. I recognize that the intent of the legislation is to reduce the dropout rate and to ensure that more students receive better vocational training in high school, but it takes away the flexibility of a State to use its funds in a way that best serves its students.

Minnesota spends 91 percent of its vocational education funds on its postsecondary program. This bill will almost completely reverse the funding of our vocational program. My distinguished colleague from Minnesota [Mr. DURENBERGER] serves on the Labor and Human Resources Committee, and has worked long and hard to eliminate this funding mandate. While he has convinced the committee to modify the funding formula, he has not been able to convince them to follow current law, which gives the State full discretion.

Senator DURENBERGER and I have been working together to amend the bill so States that meet certain requirements will have discretion over 50 percent of their funds. The amendment further allows the Secretary of Education to establish a demonstration project for five States that have successful secondary and postsecondary vocational education programs, and would be adversely effected by the bill's funding formula. These five States would have discretionary control over 65 percent of their vocational education funds. I am happy that the committee has adopted this proposal.

But Mr. President, this bill's funding formula is still a step back for my State. In fact, at least 12 other States would also have to alter their funding allocations in some way. The House has passed its vocational education bill which maintains the current State discretion.

I am going to vote for the reauthorization of the Carl D. Perkins Vocational Education Act amendments of 1989. The committee has accepted language which improves the bill, but I would urge my Senate colleagues who participate in the conference to recede to the House on two issues; the minimum grant level of $5,000 and State discretion on the distribution of vocational education funds.

I thank you, Mr. President, and I yield the floor.

The PRESIDING OFFICER (Mr. GORE). Who yields time?

Mrs. KASSEBAUM. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mrs. KASSEBAUM. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mrs. KASSEBAUM. Mr. President, I ask unanimous consent that a statement by Senator GRASSLEY be printed in the RECORD. Unfortunately, he is absent today due to a death in his family.

● Mr. GRASSLEY. Mr. President, there is an old Malay proverb that says "Clapping only with the right hand will not produce a noise."

In much the same way that you must have two hands to generate applause, high schools and community colleges need to cooperate and work together to prepare our young people for the vast technological challenges which lie ahead in employment opportunities.

The need for bridging the gap is clear for several reasons.

The Department of Labor estimated that the fastest growing jobs in this

country require some technical literacy.

While most of us support such technological advances, if current trends continue, we may find ourselves without an educated, experienced labor force to assume the positions.

Meanwhile, each year 1 million of our high school students drop out of school and subsequently many end up dependent on public assistance.

Clearly, there must be a solution which would address both concerns: Joblessness and the prospective lack of trained professionals in technological fields.

This gap has been getting much attention recently, and today there is an answer—and a good answer—within this bill.

It has been dubbed the Tech-Prep Education Act, and I was pleased to have been the first cosponsor to sign on after its introduction by my colleagues, Senator PELL and Senator COCHRAN.

It establishes a program of grants to local school districts and community, colleges for cooperative and shared programs in technical education.

The grants would fund programs and projects that establish joint education and job preparation ventures.

Tech-prep will foster cooperation between secondary, community and technical schools in order to increase the number of technically trained workers and, in turn, spark a new interest among young people in education and thus reduce the dropout rate.

In short, tech-prep is a fresh and exciting approach to keeping the kids in school who otherwise might walk out the door without sufficient training to support their livelihood.

With this legislation, we also have a wonderful opportunity to reach out to many who might never be inspired to study past high school.

Tech-prep focuses on this specific group of students who perhaps do not have a real understanding of their future—young people who need a little extra direction and encouragement.

This program will make it possible for high schools and community colleges to join hands, creating a different kind of future for our young people and for their society.

Before yielding the floor, I would also like to express my appreciation to my colleagues—Senator DURENBERGER and Senator PELL—for working out an agreement on the funding allocation between secondary and postsecondary programs.

The waiver system would give States, like Iowa, with a low high school dropout rate, the option of applying more funds to the postsecondary level of education, if the State qualifies for waivers authorized in the amendment.

I applaud the compromise and the work of my colleagues.

I am happy that we will be able to retain some of the current flexibility which enables States to address the needs and conditions which are unique.●

Mr. FOWLER. Mr. President, I rise in support of the reauthorization of vocational education. For over 70 years, vocational education has been an essential part of our educational system. This kind of education is more important today then ever before.

For many young people, a traditional college education does not fit their needs or desires. Over 60 percent of our young people will never attend college, and a higher percentage will never complete college. Vocational education gives these young people an opportunity to be trained and prepared for productive and fulfilling careers in the work force.

Vocational education is extremely important to our economy. As our society continues to become more technologically advanced, it is essential that our educational programs effectively prepare future workers in this new technology. Vocational education allows students to enter the work force already knowledgeable in the skills needed for these technical jobs.

Vocational education is also important in retraining individuals who are already in the work force. It is estimated that the average worker will change jobs at least five times during his working career, and each new job will involve the learning of new skills. Keeping our work force updated on the skills required for the latest in changing technology is absolutely essential if we are to effectively compete in the international marketplace in the 21st century.

Vocational education can also play a role in rural economic development. We have all spoken many times about the economic development needs of our rural areas. If the rural areas in Georgia and throughout the Nation are to lure more business and industry to their communities, they must have trained workers ready to be employed. Vocational education is essential in reaching this goal.

This reauthorization makes necessary changes in vocational education programs. Studies over the last several years have shown that currently Federal vocational education dollars are not being efficiently spent. This legislation does a good job in ensuring that we get the most from our Federal resources in this area.

The bill targets the people who can benefit from vocational education the most—low-income and disabled individuals, single parents, and displaced homemakers. The bill authorizes effective new programs, such as tech-prep. Finally, the bill for the first time would send vocational secondary education funds directly to local school districts, where the educators know best how to use the funds to meet the needs of their local areas.

I am very pleased that this legislation has reached the floor, and I am confident that our vocational education programs will build on their strong tradition and effectively train the working men and women of this country for productive careers in our rapidly changing economy.

Mr. CONRAD. Mr. President, I rise to support the Carl D. Perkins Vocational Education Act Amendments of 1989. Vocational education is one of the best examples of education programs that make a profound difference in students' lives. Increasing America's productivity and competitiveness should be our top domestic priority. With today's shift to a high technology and service-oriented economy, new challenges are clearly ahead for vocational education. This reauthorization meets those challenges by increasing the emphasis on the integration of academic and occupational skills.

With an enrollment of nearly 70,000 in North Dakota, vocational education programs reach 19 million students nationwide. Vocational education is a very dynamic force in my State. Programs address the rural nature of the State by offering cooperative arrangements between school districts. The multidistrict centers in North Dakota—located in Jamestown, Valley City, Oakes, Wahpeton, Grafton, and Devils Lake—provide high quality services to small school districts. I had the privilege of visiting the Lake Area Vocational Center in Devils Lake, ND on March 13. I was very impressed by the facility and the array of programs offered to students. This would not be possible without the Perkins Act.

Federal funding provides only 13 percent of the cost of vocational education in North Dakota, but it is a very crucial 13 percent. Federal funds spell the difference between providing the basics and the ability to be innovative and meet emerging demands. As the economy of North Dakota has declined, vocational education programs have been able to fill in some of the gaps, easing the transitions to new jobs for those who must change careers.

Vocational education programs in my State strive to adapt to changes in employment opportunities providing excellent training for emerging occupations. In addition, the program provides quality retraining programs with special emphasis on adults at risk who have been displaced due to the recent sluggishness in the North Dakota economy.

The bill makes essential resources available to Indian vocational education programs by increasing the Indian set-aside from 1.5 to 2 percent. These funds will support programs in-

stituted by tribes, secondary schools operated by the Bureau of Indian Affairs, and native Hawaiians. In addition, language has been incorporated into the bill which prioritizes grants for vocational education programs offered by these important institutions.

One such institution, United Tribes Technical College, is located in Bismarck. United Tribes, which was founded in 1969, has a 10-year average placement rate of 80 percent. An average of 275 adult students and 180 children from as many as 39 reservations pass through its doors from August to May of each year.

The bill will also assure that tribally controlled community colleges will receive assistance under the act. The impact of tribal community colleges on reservation life was recently documented by the Carnegie Foundation for the Advancement of Teaching. Carnegie also highlighted the fact that these institutions have made a difference in the face of harsh conditions. They are forced to survive with less than half the per-pupil funding of small State institutions, and with less than one-sixth of the funding per student provided, for example, to Howard University.

I have seldom seen institutions make such an impact despite such limited resources. However, the ability of these institutions to carry out their mission has been hampered by inadequate funding and unnecessary Federal restrictions. This bill will help ensure that these institutions can continue to fill a most vital educational need.

I wish to acknowledge the invaluable work of Senators BURDICK, BINGAMAN, DOMENICI, DASCHLE, and INOUYE on this portion of the bill. I also wish to thank Senator PELL and his staff for their willingness to accommodate my concerns regarding the ability of tribal community colleges to take advantage of the act.

The State leadership provision in the bill is also essential for North Dakota. Statewide planning and projects are crucial in a small State. The flow of funds to local teachers for curriculum development is necessary to avoid duplication and assure that teachers throughout North Dakota are able to take advantage of information and projects. I endorse that provision in the bill.

The tech-prep provision of the bill provides the necessary emphasis on these 2-plus-2 models. The great need for more highly qualified craftspeople makes this component indispensable. The partnerships between secondary and postsecondary schools allow a cohesive program for those who want it. Clearly this provision will be of great assistance to North Dakota schools which have such programs.

I am pleased to support this bill and look forward to its speedy enactment.

Mr. MACK. Mr. President, I would like to state for the record that I support the final passage of the Carl D. Perkins Education Act, S. 1109, even though I was unable to be present for the vote.

Vocational education is an important element of our Nation's educational system. A well-educated work force is essential to maintaining America's economic vitality and competitiveness in the world market. I am proud to represent a State which has an 84-percent statewide average job placement rate from vocational education schools.

Mr. ADAMS. Mr. President, I want to express my support for this bill and my thanks to Senators KENNEDY and PELL for their leadership in this very important area of vocational education.

Vocational education is a critical component of a national strategy to prepare people for the jobs of the future. It must become an integral part of the effort to revitalize our educational system. It is central to an effort to reach out to the at-risk population in our secondary schools and keep them from dropping out.

The bill before us contains many worthwhile reforms. While the Federal vocational dollar constitutes only 10 percent of overall national vocational education spending, it is often critically important to innovation and to positive change in vocational education efforts around the Nation.

Changes included in this bill are generally strongly supported by the Washington State Council on Vocational Education. This council includes representatives from our Office of the Superintendent of Public Instruction, the State Board for Community College Education, the State Board for Vocational Education, the State Council on Vocational Education, and the Washington Vocational Association.

The issue which has caused some difficulty in our State has been the mandate included in the committee bill to allocate funds between secondary and postsecondary institutions. Under the committee-approved bill, States are required to allocate between 65 and 75 percent of their Federal vocational education dollars to secondary schools and between 25 and 35 percent to postsecondary institutions. In Washington State we currently allocate 68 percent of our Carl Perkins money to postsecondary institutions and 32 percent to secondary institutions. Thus, adoption of the committee position on this issue would require extensive changes in the use of Federal vocational education dollars in Washington State.

Since committee action on this bill, I have talked in great detail with individuals from both the secondary and postsecondary institutions in my State. What I have learned is that both would welcome some additional flexibility at the State level in determining the allocation of these resources between secondary and postsecondary vocational education efforts. As a result, I want to express my support for the compromise which is being put forth during floor debate on this issue. I know hard work went into the development of this compromise. I want to especially thank Senators KENNEDY and PELL for working with me to fashion a compromise which takes all interests in account.

The compromise achieves the goal of added flexibility for the States. Under this provision, a State can seek a waiver from the Secretary of Education on the 65-35 mandated split in the committee bill to go to as much as a 50-50 split between secondary and postsecondary institutions. In addition to this, five States can seek to conduct demonstration projects in their States wherein they would be permitted to allocate as much as 65 percent to postsecondary spending.

Throughout debate on this bill, I have been concerned that the changes we make are sensible for all States. This added flexibility included in this compromise should help us achieve that goal.

This is an important bill. I hope that we will pass it quickly and move into conference with the House without delay. If we are to be in the best position to begin to implement the reforms in this bill in the next fiscal year, we should have a bill to the President for his signature prior to action by the Appropriations Committees this year.

Mr. BINGAMAN. Mr. President, I rise today in support of S. 1109, legislation to reauthorize the Carl Perkins Vocational Education Act. I also want to commend Senator PELL, the chairman of the Senate Subcommittee on Education, Arts, and Humanities, and Senator KASSEBAUM, the subcommittee's ranking minority member, for their excellent leadership today. They are the skilled, dedicated architects of our united effort to ensure that vocational education and training in the United States is of the highest quality possible.

I. INTRODUCTION

This bill will lead to dramatic and important changes in the delivery of Federal vocational education assistance. And in so doing, it will help ensure that our Nation's work force has access to the education and skills needed to be successful in the competitive world of the 21st century.

In that world, the key to success will be education, so I am pleased that this legislation embodies the idea that vocational education is not simply job training. It is education and training.

Without a good, solid education, the youth of today will be unable to compete for the jobs of the 21st century.

And without maximum participation in the work force by all our citizens, our Nation's social and economic structure will suffer untold damage.

Indeed, by the end of this decade, estimates are that 85 percent of new entrants into the work force will be women and minorities—a report of the Hudson Institute, entitled "Work Force 2000." And in my home State of New Mexico, that statistic is easy to believe. According to 1980 census data, nearly 37 percent of our population was Hispanic 10 years ago and nearly 10 percent was native American. In our public schools today, well more than half—about 57 percent—of the students in grades K-12 are minorities—National Center for Education Statistics.

Clearly, their success will be the strength of our future economic competitiveness. But in our efforts to ensure their success, we must be ever cognizant of their unique needs, both individually and culturally.

The two-part vocational education strategy contained in S. 1109 conveys this sensitivity, and thus provides the opportunity—at this critical time in our Nation's history—to expand U.S. productivity and ingenuity. Importantly, the strategy focuses on promoting state-of-the-art programs and ensuring that needy populations have access to them.

II. INDIAN VOC-ED PROVISIONS

Mr. President, I would like to speak for a moment about some specific provisions of the bill—provisions dealing with native American vocational education, which exemplify both these strategies.

I must begin by extending my deep gratitude to Senator PELL and his staff for their enthusiastic willingness to include these provisions in this landmark bill. I and the native Americans in New Mexico and throughout the country are indebted to the Senator from Rhode Island for his efforts on our behalf.

The provisions I am speaking of originally were introduced by me and several of my distinguished colleagues as S. 496, the Indian Vocational Education Act.

I introduced this legislation in both the 100th and 101st Congresses with my distinguished colleagues, Senator INOUYE, chairman of the Select Committee on Indian Affairs, and Senators DOMENICI, CONRAD, and BURDICK.

The Select Committee on Indian Affairs, with Senator CONRAD chairing, held a hearing on S. 496 and native American vocational education last fall, at which I had the honor of testifying. The commitment demonstrated by Senator CONRAD, Senator INOUYE, Senator BURDICK, and all the members of the Select Committee to improving education opportunities for native Americans is truly admirable, and I commend each one of them and their fine staffs.

By including S. 496 in this reauthorization bill and making the native American provisions effective as of October 1, 1990, we are ensuring more native Americans of their right to a quality vocational education. And as I stated earlier, this is a vitally important goal for Indian people and for our entire Nation as we prepare for the internationally competitive economy of the 21st century.

Native American people, like all minority groups, are growing in number. Yet tragically, some of the highest unemployment rates in the Nation are recorded on their lands, and some of the highest high school dropout rates are found among their youths.

Unfortunately, the Indian tribes of New Mexico know the personal pain of these statistics too well.

The Navajo Nation, the largest Indian tribe in the United States suffers an unemployment rate of more than 40 percent.

According to the New Mexico Department of Education, more than 13 percent of our native American students dropped out of high school during the 1988-89 school year. As it has been for several years, this the highest percentage of any group. At the same time, the native American college-entrance rate remains woefully low.

These grim statistics must be turned around. Each Indian youth, no less than any other young person in this country, deserves the opportunity to achieve as much as he or she is able.

That is why the native American provisions of this legislation are so important. One component of the bill will authorize the establishment of a national American Indian center for research in vocational-technical training to help tribes and tribal institutions formulate important economic development policies and strategies and develop critical education and training programs.

Importantly, other provisions will provide a stable, basic funding source during the upcoming fiscal year and beyond for the two institutions nationwide that are committed solely to providing quality vocational educational opportunities for Indian students—the Crownpoint Institute of Technology in New Mexico, and the United Tribes Technical College in Bismarck, ND.

A. CROWNPOINT INSTITUTE—ADVERSITIES

These are good schools, with important training opportunities in high-demand fields such as accounting, computer technology, health care, masonry, carpentry, and mechanics.

They also are schools operating on meager budgets, built largely by the Federal Government, but without Federal authorizing statutes to provide stable funding sources.

The problems they must grapple with are many. Without dependable funding from Federal, State, or tribal governments, the schools exist year by year. Long range planning is difficult, because their administrators often do not know whether they will be able to operate into the future. Critical structural repairs remain undone and course curriculum sometimes suffers. Yet despite these adversities, these two schools are successes.

B. CROWNPOINT INSTITUTE—SUCCESSES

Since first opening its doors in 1979, Crownpoint Institute of Technology has graduated more than 1,200 skilled workers into the Nation's work force. Nearly all of these graduates were unemployed and without job skills when they enrolled into Crownpoint.

Now, they have the education and training needed to leave the welfare rolls forever and assume active roles in their tribe's labor force and in our Nation's future.

III. CONCLUSION

Mr. President, the native American provisions are not the only examples in the bill of the Senate's sensitivity to the variety of needs unique to different States and groups.

I am pleased that Senator PELL and his staff were willing to work with Senator DURENBERGER, myself, and other interested Senators to ensure optimum flexibility in distributing vocational education funding among secondary and postsecondary institutions.

I believe the balance struck—which would allow all States to apply with the Department of Education for a waiver to bring postsecondary funding up to 50 percent and, in some cases, up to 65 percent—is important and justifiable.

It is important to ensure maximum State flexibility because of the diversity of the citizenry of our States. New Mexico's multicultural population is unique in many ways and our education system reflects—and preserves—our diversity. Our vocational education programs extend throughout our 88 public school districts and into 17 public postsecondary institutions. The bulk of Federal vocational education assistance currently is distributed among these 17 2-year schools.

With the help of the Federal Government, our State has developed an outstanding postsecondary vocational education network, and our State's economy is dependent on the educational opportunities the network provides. It is important to note that 95 percent of our population lives within 25 miles of a postsecondary school.

Without question, accessible, affordable vocational education is critical to our State's and our Nation's future work force. All our people deserve equal access to the same basic education opportunities. This legislation goes a long way toward ensuring that

access, and once again, I commend Senator PELL and Senator KASSEBAUM for their leadership in this important reauthorization.

Mr. KERRY. Mr. President, I rise in support of S. 1109, the Carl Perkins Vocational Education Act. By ensuring adequate funding for important Perkins programs through 1995, this legislation will go a long way in providing the kind of vocational training and education which has become increasingly necessary in today's work force.

A disturbing paradox has existed in the United States in recent years. The increasing diversification of the American economy and the increasing emphasis of technology oriented jobs has created a swelling demand for professionally trained workers. Yet, as it is widely known and lamented, our efforts at educational system is failing to keep pace and is becoming increasingly inadequate. Thus, as the demand for trained workers increases, the supply is dwindling.

S. 1109 seeks to reverse this damaging trend. By reauthorizing the Carl Perkins Vocational Education Act, and increasing the availability of Perkins programs, this legislation will greatly increase the opportunity available to those who seek training.

S. 1109 authorizes $1.5 billion in fiscal year 1991 and such funds as necessary for fiscal years 1992 through 1995 for vocational education programs. In addition, it increases the scope and effectiveness of these programs by directing secondary school vocational education funds directly to local educational providers.

In enabling States to improve the quality of numerous vocational education programs, S. 1109 seeks to stem the dropout crisis at the secondary level and enable schools to graduate an increasing number of students with marketable skills.

Mr. President, at a time when work force quality is of major concern to every American, we simply must do a better job of training our workers if we are going to compete in the global marketplace. Failure to meet this challenge would result in a decline in our standard of living that we cannot tolerate. I see vocational education as having a central role in meeting our work force preparation needs and securing our economic position in the world for decades to come.

I urge my colleagues to support the passage of the Carl Perkins Vocational Education Act.

Mr. DODD. Mr. President, I rise in strong support of S. 1109, the Carl D. Perkins Vocational Education Act Amendments of 1990. My colleague from Rhode Island, Senator PELL, deserves the utmost praise for his leadership on this important legislative initiative. When the United States can least afford to lose its competitive edge, when the United States can least afford an unskilled work force, I have joined members of the Labor and Human Resources Committee in supporting efforts to dramatically alter the Federal role in vocational and technical education.

The changes outlined in S. 1109 are the results of months of research, hearings, and deliberations. Throughout the process there has been a strong bipartisan effort to redefine the Federal role in vocational education. Senators KASSEBAUM and PELL have worked hand-in-hand to craft the reauthorization package to best meet the needs of students, the work force, and communities. Federal support for vocational education has been given a facelift—one endorsed by extensive research findings and testimony.

As the Federal contribution to vocational education programs has declined in reltionship to overall funding for vocational education, it has become more necessary for Federal moneys to be better directed to those who need the Federal dollars the most. S. 1109 would direct Federal funds for secondary programs directly to the local education agencies [LEA's]. At least 65 percent of Federal dollars targeted for program costs must be used for secondary school programs—except when a State qualifies for a special waiver.

How did we determine that secondary students are in greatest need? The high dropout rates, the drug and alcohol abuse, and high unemployment rates among teenagers are three reasons why secondary students are in greatest need of Federal support. If we lose a student to the streets, drugs, teen pregnancy, and unemployment before they graduate from high school, we are jeopardizing both their futures and the future of American business and competitiveness. In the next decade, 85 percent of new workers will be minorities and women. Traditionally, the dropout rates for these groups have been higher than the national average. We need to keep these youth in the education pipeline.

Foresight is of the utmost importance at this juncture. We need to be prepared now to educate future workers. We cannot waste the human resources our Nation is so dependent on for its economic strength. As the median age of Americans climbs, each new entrant into the work force becomes more vital to the economic competitiveness and stability of our Nation.

The demand for workers will continue to increase well into the next century. Sections of our country are already experiencing shortages of qualified workers. In Connecticut, businesses have great difficulty filling jobs requiring some technical knowledge.

These are all good reasons why the Federal Government needs to make our vocational education programs the best they can be. To accomplish this goal, S. 1109 eliminates many of the set-asides currently in law. Every Federal dollar must be used to serve those in greatest need. Every Federal dollar must be used for program improvement. To guarantee that the Federal dollars have the greatest impact, a minimum grant amount is set at $25,000. If an individual school does not qualify under the formula for the minimum grant amount, schools are encouraged to coordinate programs that would serve students from more than one school or city. Many States already have area vocational schools or intermediate education agencies that will receive Federal vocational education dollars if they meet the minimum grant requirements. The key is to optimize the utility of each Federal dollar.

While the majority of Federal dollars will go to secondary schools, S. 1109 stipulates that at least 25 percent of the Federal dollars go to postsecondary and adult vocational education programs. To expose secondary students to the benefits of higher education and to facilitate the transition to postsecondary programs, S. 1109 provides for a tech-prep program. Students at the secondary level will be able to participate in programs that coordinate the curricula of the last 2 years of high school with a 2-year postsecondary program. This cooperation between the secondary and postsecondary systems creates a bridge for students not traditionally attracted to the benefits of higher education.

An investment in improved vocational education programs is prudent. The demands of the workplace are changing. Today, many more jobs require workers to be computer and technologically literate. With technology changing so rapidly, equipment and techniques become obsolete in a matter of years. More than ever before, workers must be prepared to adapt and be retrained. More than ever before, a vocational education program must include the basics to prepare students for the workplace.

With a solid foundation in the basics of education, a student can learn almost anything. A vocational or technical education must be built on a foundation, to provide students with an education for a lifetime, not just a skill that may become obsolete. We are failing the students if we cannot give them the skills to be employable the day they graduate and 40 years later.

S. 1109 is an example of how serious the Congress is about improving the Federal role in education. I applaud the changes being made to current law. This measure is one of many proactive steps we must take to prepare the next generation for the challenges of the 21st century. We can no

longer afford to let the talent of young Americans slip through the cracks of our society. A great deal of human talent and potential has not yet been tapped in our Nation. State-of-the-art vocational programs will not only provide for the education and training of students, they may serve to keep the traditional dropouts in school.

For these reasons, I urge my colleages to endorse our efforts and show their support for the measure by unanimously voting to adopt S. 1109.

Mr. SPECTER. Mr. President, I am pleased to support the passage of S. 1109, the Carl D. Perkins Vocational Education Act Amendments, which I have cosponsored. This legislation authorizes more than $1.6 billion in fiscal year 1991 to provide vocational education and training to traditionally underserved populations.

As we seek to restructure and reauthorize the Perkins Vocational Education Act, we do so recognizing that at present our education system is not preparing many of our young people to meet the current or future challenges of the work force. Twenty-five percent of our students, perhaps as many as 1 million young people each year, drop out of school. Seventy percent of all high school seniors cannot write a basic letter seeking employment. Sixty percent of these same students cannot correctly add up their own lunch bills.

Even areas which have long been noted as labor surplus regions are discovering that the pool of qualified workers is drying up. For example, Pittsburgh, PA, has perhaps since the end of the 19th century, been a city with a surplus of able workers. Pittsburgh is now moving into a labor shortage—a mismatch between job skill requirements and the available, qualified pool of workers.

In Philadelphia and surrounding counties, a similar situation exists. Employers are now faced with the problems of helping individuals become employable who read and compute below the eighth grade level. As available jobs require more reading, writing, computation, and flexibility of skills, those individuals with poor academic preparation will find themselves locked out of the mainstream of long-term employment opportunities. The bill before us today seeks to address this critical issue.

S. 1109 accomplishes five important goals: targeting Federal aid to populations most in need of assistance; stressing the linkage between secondary and postsecondary education; integrating academic and vocational education; ensuring that vocational education programs are state-of-the-art; and the recognition that vocational education is not just job training, but vocational education and training.

To ensure that Federal assistance reaches secondary level students most in need, funds are allocated in accordance with the chapter I formula in the Elementary and Secondary Education Act, which is based on poverty. Under the provisions of S. 1109, funds provided are targeted to four populations: the economically disadvantaged; the disabled; the limited-English proficient; and women and men being trained in nontraditional occupations.

For the first time, a split in Federal spending between secondary education and adult and postsecondary education is specified. States can apportion a range of 65–75 percent of funds for secondary school programs and between 25–35 percent for postsecondary and adult programs. By designating most of the Federal resources to secondary school programs, it is anticipated that a greater impact can be made on the dropout problem, and the adverse effects of poverty, drugs, and crime upon the educational achievement of young people.

An important new initiative authorized in this bill is the tech-prep or 2-plus-2 concept which links 2 years of secondary education with 2 years of postsecondary education. The tech-prep provision allows States to make grants to consortia linking local educational agencies, area vocational schools, or intermediate educational agencies with community colleges, postsecondary vocational technical schools offering a 2-year degree, an apprenticeship program, or an institution of higher education offering a 2-year degree, an associate degree or a 2-year postsecondary certificate. Apprenticeship programs are included as part of the 2-plus-2 model because of the Nation's increasing need for more highly skilled craftsmen. As defined in the legislation, the tech-prep model includes training in engineering technology, applied science, mechanical, industrial or practical arts or trades, and agriculture, health, communications, and business.

Under the postsecondary and adult education provisions, funds may be allocated to postsecondary institutions, to programs for adults in secondary schools or area vocational schools serving postsecondary students or adults, community-based organizations, or consortia of these eligible recipients.

Priority for funding is placed on apprenticeship programs, programs closely tied to economic development efforts, including initiatives developed with business and industry, and upon programs training students for all aspects of the occupations in which job openings are projected or currently available.

Given my longstanding interest in ensuring that incarcerated individuals receive education and training, I am pleased to note that within the secondary school programs provision, States are required to factor in the State correctional education agency as though it were a local educational agency. Thus, States can apportion up to 5 percent of its secondary school programs for corrections education targeted to persons from 9 to 25 years of age.

In addition, acknowledging the serious need for increased vocational education and training programs in Federal correctional facilities, S. 1109 authorizes the Secretary of Education to make grants to such institutions for basic education, literacy programs, vocational training, guidance and counseling, and support services for inmates.

Investing in enabling incarcerated persons to have productive long-term employment opportunities can be a major weapon in breaking the high rate of recidivism in our penal institutions. This is an issue which I discussed with Secretary Cavazos during the February 21, 1990, hearing on the fiscal year 1991 budget for the Department of Education. I believe this increased emphasis on preparing incarcerated individuals to meet the challenges of the work force can be an important aspect of our war against crime.

I am particularly pleased that S. 1109 retains title III A, the community-based organizations provision. This initiative, based on S. 2289, the Vocational Education and Community-Based Organizations Act of 1984, which I introduced in the 98th Congress, was included in the manager's amendments package on August 8, 1984, when the Carl D. Perkins Vocational Education Act was approved by the Senate. The community-based organizations title sought to include community-based organizations like Opportunities Industrialization Centers of America Inc. [OIC], the National Urban League, the National Council of LaRaza, the National Puerto Rican Forum, and 70,001 in the mainstream of vocational education in this country.

This initiative, which was introduced at the request of Rev. Leon H. Sullivan, and included in the 1984 legislation with the support of the American Vocational Association, authorized joint initiatives between local school districts and community-based organizations. This collaboration has led to greater inclusion of disadvantaged youth in many vocational education programs and to partnerships between the vocational education leadership and community-based organizations.

As a result of greater collaboration between community-based organizations and the vocational education establishment, the National Association of State Directors of Vocational Technical Education Consortium [NASDVTEC] is forming a consortium of State

vocational technical education agencies to develop model partnerships between community-based organizations [CBO's], business organizations, and local education agencies to better meet the needs of hard to serve and/or at-risk students. Through demonstration projects in consortium member States, at-risk students will receive vocational education and training which will enable them to emerge from the education system as qualified, employable individuals. These demonstration projects are expected to last from 3 to 5 years.

I commend the National Association of State Directors of Vocational Technical Education for developing this collaborative initiative with community-based organizations which seeks to ensure that populations most in need of vocational education and training are targeted for those services.

I would also like to commend the American Vocational Association for its continued support of maintaining and expanding the role of community-based organizations in the vocational education system. Many of these community-based organizations—OIC, the National Urban League, 70,001, the National Council of La Raza, and the National Puerto Rican Forum—have a long history of serving disadvantaged populations, and have been strong advocates of targeting Federal assistance to those most in need.

Mr. President, the shift from an industrial to a high technology and service-oriented economy demands improvements in the quality and structure of our vocational education system. The new challenge for vocational education is to ensure that the 61 percent of students who do not go to college are prepared not only for a job, but for a lifetime of work. Students must graduate with the vocational and academic skills which will enable them to learn new skills, new trades, or wholly different vocations, so that they can maintain employment in an increasingly competitive work force.

This is the thrust of S. 1109, the Carl D. Perkins Vocational Education Act amendments, and I strongly support this effort.

I urge my colleagues to give this measure their full support.

Mr. GORTON, Mr. President, vocational education provides a vital choice for our youth. Numerous education leaders from my home State have shared success stories of students educated in vocational programs. I am happy to hear of these successes, and I strongly support the reauthorization of the Carl D. Perkins Vocational Education Act.

People succeed in life by acquiring the knowledge and basic skills needed to enter and succeed within a changing work force through vocational education. For the United States to remain competitive with other industrialized countries we must continue to educate and train our youth in specific areas of expertise. Aiding in this task are our vocational education programs across the country. Occupational training is a critical ingredient for success—an additive that would benefit all of our young people.

S. 1109, the vocational education reauthorization bill should be supported by my colleagues. It enhances the effectiveness of programs by providing strong State flexibility and reaching out to the local school districts and communities. It would also link vocational education and the State's labor market needs. Access of high-quality programs for our country's disadvantaged will be expanded by the passage of the Vocational Education Reauthorization Act.

We must provide options to young people who chose specific occupational training. As global competition increases, we must ensure that all Americans are brought upward—we cannot afford to close doors of any of our youth. The Vocational Reauthorization Act furnishes grants for special programs including technical preparation, single parents, homemakers, native Americans, and sex equity. These programs are vitally important in our continued efforts to maintain our national independence.

I appreciate the work of Senator KASSEBAUM and Senator PELL on this issue and urge its immediate passage.

Mr. BURNS. Mr. President, I want to thank the managers of this bill, Senators KASSEBAUM and PELL, for their outstanding leadership in resolving this important legislation.

I applaud the language that was adopted in committee that allows States to apply for a waiver in order to distribute the basic State grant funds as they see fit between secondary and postsecondary education programs.

In my home State of Montana, the act has helped the ones that need it the most. It helps people who don't want to go on to college but want to better themselves, their lives, and their families.

I would like to illustrate my point by using two important programs in Montana that teach subjects that are very near and dear to my heart. The May schools for broadcasting and business in Billings, MT, is a school that has received grant money from the act. The May schools and those similar institutions show a higher rate of educating high-risk students than the traditional 4-year institutions.

The second example is the Fromberg Public School in Fromberg, MT, that offers classes in vocational agriculture. Being a former agriculture broadcaster, I find the work done by these two schools, as well as the rest of the schools in Montana, are essential to offering an alternative way to receive an education. This act helps bridge the education gap in America and allows the Nation to be more competitive in a global market.

Again, Mr. President, I thank the managers of the bill and I yield back the balance of my time.

Mr. DASCHLE. Mr. President, vocational education remains an integral part of the educational system in South Dakota's high schools and postsecondary schools, and I am pleased today to rise in support of S. 1109, the Carl Perkins Vocational Education Authorization Act. This important piece of legislation has received the endorsement of the South Dakota Department of Education and Cultural Affairs, the South Dakota Board of Education, the Office of Adult, Vocational and Technical Education, the South Dakota Council on Vocational Education, and the South Dakota Vocational Association, and I am hopeful that it will be enacted into law as expeditiously as possible.

South Dakotans have long recognized the importance of vocational education. They are extremely proud of their fine vocational and technical schools located in Watertown, Sioux Falls, Rapid City, and Mitchell, and the contributions of those institutions' graduates to our State's economic efforts in communities throughout the State are well recognized. The fact that many of our vocational and technical schools have expanded their facilities and programs, during the past 2 years in response to increasing demand for vocational education in our State is testament to the important role vocational education plays in South Dakota.

South Dakota's vocational and technical schools have relied heavily in the past on Carl Perkins Vocational Education funds not only to construct long-overdue facilities, but also to purchase classroom equipment. Thus, I was disappointed to learn that the bill reported by the Labor and Human Resource Committee did not initially allow vocational and technical schools to use Carl Perkins funds to help finance equipment acquisition and construction or remodeling projects for their facilities. Unless States are allowed to continue using Carl Perkins funds for both equipment acquisition and remodeling, and construction projects where there is a demonstrated need, and student access to quality vocational education programs and facilities in South Dakota could be seriously undermined.

I am pleased that Senator PELL, the distinguished chairman of the Subcommittee on Education, Arts and Humanities, shares my assessment of the importance of Carl Perkins funds for vocational and technical schools throughout the country and has agreed to my request to amend the bill

language to allow vocational educational facilities to use Carl Perkins funds to help finance equipment acquisition and construction or remodeling projects. Continued use of Carl Perkins funds for these purposes will ensure that South Dakota's students remain on the cutting edge of the latest technological developments.

The benefits of single parent/homemaker programs funded by the Carl Perkins Vocational Education Act have been articulately described by many South Dakotans who have expressed to me their support of these important programs. Hundreds of South Dakotans have successfully obtained meaningful employment as a result of their participation in the single parent/homemaker programs offered by our vocational and technical schools. I hope this program will be fully funded to ensure the access to all eligible citizens interested in furthering their education.

With an increasing number of adults returning to school to enhance their vocational and technical skills, I am pleased that S. 1109 supports the delivery of adult vocational education by both secondary and postsecondary agencies. Vocational and technical school's adult education programs remain an important part of my State's economic development efforts. Many businesses have located in our State largely because of the availability of exemplary vocational education programs that serve to train and retrain workers.

Adult education programs are also extremely important for the farmers in my State enrolled in adult education programs, like the Winner Farm Ranch Business Management Program. These programs allow farmers to diversify and enhance their business skills to successfully compete in today's competitive agricultural environment.

Finally, I want to thank Chairman PELL for recognizing the need to allocate funds for Indian and Native Hawaiian programs. S. 1109 provides a minimum grant of $50,000 for vocational education programs at Bureau of Indian Affairs secondary schools and institutions of higher education eligible for assistance under the Tribally Controlled Community College Assistance Act. This bill will help stem the tide of rampant unemployment that exists on Indian reservations throughout our country.

Mr. RIEGLE. Mr. President, I would like to express my strong support for the reauthorization of the Carl Perkins Vocational Education Program. Vocational education is very important to many, many students in Michigan and I am pleased that we are moving ahead to strengthen and extend this program.

In building a strong educational system, we must recognize that students have a wide variety of talents, interests, and educational needs. There are many ways a student can gain the skills and knowledge they will need to participate fully in the modern world. Vocational education programs teach not only important trade and job skills at the high school level, but can also help students gain better understanding of basic math and science, for example, through vocational applications. Many academically successful students take vocational classes. In Michigan, about 48 percent of high school vocational-technical education students choose to continue their education.

Vocational education serves not only high school aged students, but is also important for many who go on to postsecondary schools or return to school to gain skills, including homemakers and senior citizens. The program serves more than 162,000 community college students in Michigan.

I am particularly pleased that this bill contains a new tech-prep initiative to encourage the formation of consortia among high school vocational education programs and postsecondary institutions to strengthen technical training. These kinds of programs are urgently needed to help prepare skilled workers for our increasingly technically oriented workplace.

Michigan has many strong vocational education programs across the State in 56 area vocational centers, 401 high schools and middle schools, and in 29 community colleges. I have heard many success stories about Michigan students who have gained the skills they needed through vocational education to get good jobs. Statewide surveys have shown that many employers prefer to hire vocational-technical education graduates.

For all of these reasons, I strongly support the legislation we are considering today, and I encourage my colleagues to join me in voting for its passage.

Mr. PELL. Mr. President, I am prepared to yield back the remainder of my time.

Mrs. KASSEBAUM. I am prepared to yield back any time I may have remaining.

The PRESIDING OFFICER. All time is yielded back.

The question is on agreeing to the amendment.

The amendment (No. 1465), as amended, was agreed to.

The PRESIDING OFFICER. The question is on agreeing to the committee substitute, as amended.

The committee amendment in the nature of a substitute, as amended, was agreed to.

The PRESIDING OFFICER. The question is on the engrossment and the third reading of the bill.

The bill was ordered to be engrossed for a third reading and was read the third time.

The PRESIDING OFFICER. Under the previous order, the Senate will now proceed to H.R. 7.

All after the enacting clause is stricken and the text of S. 1109, as amended, is deemed read a third time.

Mr. PELL. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The bill, having been deemed read a third time, the question is, Shall the bill pass?

The yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Hawaii [Mr. MATSUNAGA] is necessary absent.

Mr. SIMPSON. I announce that the Senator from New York [Mr. D'AMATO] and the Senator from Florida [Mr. MACK] are necessary absent.

I also announce that the Senator from Iowa [Mr. GRASSLEY] is absent due to a death in the family.

I further announce that, if present and voting, the Senator from New York [Mr. D'AMATO], the Senator from Iowa [Mr. GRASSLEY], and the Senator from Florida [Mr. MACK] would each vote "yea."

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 96, nays 0, as follows:

[Rollcall Vote No. 57 Leg.]

So the bill (H.R. 7), as amended, was passed.

Resolved, That the bill from the House of Representatives (H.R. 7) entitled "An act to amend the Carl D. Perkins Vocational Education Act to improve the provision of services under such Act and to extend the authorities contained in such Act through the fiscal year 1995, and for other purposes," do pass with the following amendment:

Strike out all after the enacting clause and insert:

SECTION 1. SHORT TITLE.

This Act may be cited as the "Carl D. Perkins Vocational Education Act Amendments of 1989".

TITLE I—VOCATIONAL EDUCATION ASSISTANCE TO THE STATES

SEC. 101. ALLOTMENT.

(a) IN GENERAL.—Section 101(a)(1) of the Carl D. Perkins Vocational Education Act (hereinafter referred to as the "Act") is amended—

(1) in subparagraph (A) by—

(A) striking "2" and inserting "2.75"; and

(B) striking "part E" and inserting "part D"; and

(2) by striking subparagraph (B) and inserting the following new subparagraphs:

"(B) 2 percent for the purpose of carrying out section 103; and

"(C) .25 percent for the purpose of carrying out section 104.".

(b) TERRITORIES.—Section 101 of the Act is amended by inserting at the end thereof the following new subsection (d):

"(d) For the purpose of this section, the term 'State' means any one of the fifty States, the Commonwealth of Puerto Rico, the District of Columbia, and the Virgin Islands.".

(c) TECHNICAL AMENDMENT.—(1) Section 101(a)(3)(C) of the Act is amended by striking ", Guam, American Samoa, the Northern Mariana Islands, and the Trust Territory of the Pacific Islands,".

(2) Section 101(c)(1)(B) of the Act is amended by striking ", Guam, American Samoa, the Virgin Islands, the Northern Mariana Islands, and the Trust Territory of the Pacific Islands" and inserting "and the Virgin Islands".

SEC. 102. WITHIN STATE RESERVATION.

Section 102 of the Act is amended to read as follows:

"SEC. 102. (a) Each State shall reserve from its allotment of funds appropriated under section 3(a) for each fiscal year an amount that does not exceed—

"(1) 20 percent for State programs and State administration of which—

"(A) 75 percent of such 20 percent shall be available for State programs and State leadership; and

"(B) the remainder of such 20 percent shall be available for State administration;

"(2) 5 percent for technical preparation education under part B of title II; and

"(3) 75 percent for basic programs under part C of title II of which—

"(A) 65 to 75 percent of such 75 percent shall be available for subpart 1 of part C of title II; and

"(B) the remainder of such 75 percent shall be available for subpart 2 of part C of title II.

"(b) SPECIAL RULES.—(1) From the amount reserved pursuant to subsections (a)(1)(A) and (a)(1)(B) each State shall reserve 20 percent for sex equity programs carried out in accordance with section 202.

"(2) From the amount reserved pursuant to subsection (a)(3)(B) each State shall reserve for single parents, displaced homemakers, and single pregnant women programs carried out in accordance with section 242 an amount which equals or exceeds 10.5 percent of the total amount reserved pursuant to subsection (a)(3) for subparts 1 and 2 of part C of title II.

"(c) MATCHING REQUIREMENT.—Each State receiving financial assistance under this Act shall match, on a dollar-for-dollar basis, the funds reserved pursuant to subsection (a)(1)(B) from non-Federal sources.

"(d) HOLD HARMLESS PROVISION.—The requirements of subparagraphs (A) and (B) of subsection (a)(3) shall only apply to—

"(1) 20 percent for fiscal year 1991,

"(2) 36 percent for fiscal year 1992, and

"(3) 51 percent for fiscal year 1993,

of the funds available under subsection (a)(3) to each State for basic programs under part C of title II.".

SEC. 103. INDIAN AND HAWAIIAN PROGRAMS.

Section 103 of the Act is amended to read as follows:

"INDIAN AND NATIVE HAWAIIAN PROGRAMS

"SEC. 103. (a)(1)(A) From 1/12 of the amount of funds reserved under section 101(a)(1)(B), the Secretary shall award grants to, or enter into contract with—

"(i) Indian tribes that are eligible to receive a grant from, or to enter into a contract with, the Secretary of the Interior under—

"(I) the Indian Self-Determination and Education Assistance Act, or

"(II) the Act of April 16, 1934 (48 Stat. 596, chapter 147; 25 U.S.C. 452, et seq.), and

"(ii) tribal organizations of such Indian tribes,

to plan, conduct, and administer programs, or portions of programs, that provide vocational-technical training and related activities.

"(B) Grants awarded, and contracts entered into, under subparagraph (A) shall—

"(i) be subject to the terms and conditions of section 102 of the Indian Self-Determination and Education Assistance Act, and

"(ii) be conducted in accordance with those provisions of sections 4, 5, and 6 of the Act of April 16, 1934 (48 Stat. 596, chapter 147; 25 U.S.C. 455, 456, 457) that are relevant to the programs for which the grant or contract is provided.

"(C) In awarding grants and entering into contracts under this section, the Secretary shall give special consideration to applications from tribally controlled community colleges which—

"(i) are accredited or candidates for accreditation by a nationally recognized accreditation organization as an institution of postsecondary vocational education; or

"(ii) operate vocational education programs that are accredited or candidates for accreditation by a nationally recognized accreditation organization; and

"(iii) issue certificates for completion of vocational education courses.

"(2)(A) From 1/12 of the funds reserved under section 101(a)(1)(B), the Secretary shall provide a grant to each Bureau funded school that is a secondary school for the purpose of providing vocational education programs for secondary students attending the school.

"(B)(i) The amount of each grant provided under subparagraph (A) shall equal or exceed $35,000.

"(ii) If the amount of funds available for any fiscal year for grants under subparagraph (A) exceeds the amount necessary to provide each Bureau funded school a grant of $35,000 for the fiscal year, the excess shall be used to increase the amount of the grants as follows:

"(I) 80 percent of such excess funds shall be allocated among Bureau funded schools in accordance with the formula used to distribute funds under section 1128 of the Education Amendments of 1978 (25 U.S.C. 2008), and

"(II) 20 percent of such excess funds shall be allocated among Bureau funded schools in accordance with the formula used in allocating funds under section 611 of the Education of the Handicapped Act (20 U.S.C. 1411).

"(C) Where a grant provided under subparagraph (A) is awarded on behalf of a school operated directly by the Bureau of Indian Affairs, the Secretary of the Interior is authorized and directed to accept and use such grant for the purposes for which the grant is awarded.

"(D) For purposes of this paragraph, the term 'Bureau funded school' has the meaning given to such term under section 1139(3) of the Education Amendments of 1978 (25 U.S.C. 2019(3)).

"(3)(A) From 3/12 of the funds reserved under section 101(a)(1)(B), the Secretary shall award grants for vocational-technical training, and related activities, to two or more schools of vocational-technical education, each of which—

"(i) is governed by a board of directors or trustees, a majority of whom are Indians,

"(ii) has been in operation for 5 or more years,

"(iii) enrolls the full-time equivalent of not less than 100 students, of whom a majority are Indians, and

"(iv) is accredited, or a candidate for accreditation for not less than five years, as a postsecondary vocational education institution by a nationally recognized accrediting agency for postsecondary vocational education institutions.

"(B) If any portion of the funds that are authorized to be used to provide grants under subparagraph (A) for any fiscal year remains after all schools eligible for the grant that submitted acceptable applications for the grant have been awarded a grant under subparagraph (A) for the fiscal year, the Secretary may use the remaining funds—

"(i) to award grants under subparagraph (A) to institutions of higher education that are eligible for assistance under the Tribally Controlled Community College Assistance Act of 1978, and

"(ii) if funds remain after all grants authorized under clause (i) have been awarded to eligible institutions that submitted acceptable applications for the grant, to fund grants and contracts provided under paragraph (1).

"(C) Each grant awarded under subparagraph (B)(i) shall equal or exceed $50,000.

"(D) The Secretary shall, subject to the availability of appropriations, provide for each program year to each school of vocational-technical education having an application approved by the Secretary under subparagraph (A), an amount necessary to pay expenses associated with—

"(i) the maintenance and operation of the program, including development costs, costs

of basic and special instruction (including special programs for individuals with handicaps and academic instruction), materials, student costs, administrative expenses, boarding costs, transportation, student services, day care and family support programs for students and their families (including contribution to the costs of education for dependents);

"(ii) capital expenditures, including operations and maintenance and minor improvements and repair, physical plant maintenance costs; and

"(iii) costs associated with repair, upkeep, replacement, and upgrading of the instructional equipment.

"(4) For purposes of this Act, the Bureau of Indian Affairs of the Department of the Interior shall be considered to be a State board.

"(5) Programs funded under this subsection shall be in addition to such other programs, services, and activities as are made available to eligible Indians under other provisions of this Act.

"(b)(1) From 7/12 of the funds reserved under section 101(a)(1)(B), the Secretary shall enter into contracts with organizations primarily serving and representing Native Hawaiians which are recognized by the Governor of the State of Hawaii to plan, conduct, and administer programs, or portions of programs, that provide vocational-technical training, and related activities, for the benefit of Native Hawaiians.

"(2) For purposes of this section, the term 'Native Hawaiian' means any individual who has any ancestors that were natives, prior to 1778, of the area which now constitutes the State of Hawaii.

"(c) Grants awarded, and contracts entered into, under this section shall be subject to such terms and conditions as the Secretary may prescribe relating to satisfactory performance of the grant or contract.

"(d) Nothing in this section shall be interpreted as affecting or limiting the ability, or eligibility, of any person or agency to which this section applies to apply for, or receive assistance from, any other source, including assistance provided by the Federal Government under any provision of law other than this title.".

SEC. 104. THE TERRITORIES.

Part B of title I of the Act is amended by inserting at the end thereof the following new section:

"THE TERRITORIES

"SEC. 104. (a) THE TERRITORIES.—From funds reserved pursuant to section 101(a)(1)(C), the Secretary shall make grants to—

"(1) both Guam and the Federated States of Micronesia in an amount which is the same as the amount provided to Guam in fiscal year 1990 for vocational education programs under this Act; and

"(2) each of American Samoa, Palau, the Marshall Islands and the Commonwealth of the Northern Mariana Islands in an amount which is the same as the amount provided to American Samoa in 1990 for vocational education programs under this Act.

"(b) REMAINDER.—Subject to the provisions of subsection (a), the Secretary shall make a grant of the remainder of funds reserved pursuant to section 101(a)(1)(C) to the Center for the Advancement of Pacific Education, Honolulu, Hawaii, or its successor entity or entities to make vocational education and training grants in Guam, American Samoa, Palau, the Commonwealth of the Northern Marianas, the Federated States of Micronesia, and the Republic of the Marshall Islands, or cooperative efforts involving two or more of these entities for the purpose of—

"(1) teacher and counselor training and retraining;

"(2) curriculum development; and

"(3) improving vocational education and training programs in secondary schools and institutions of higher education, or improving cooperative programs involving both secondary schools and institutions of higher education.

"(c) LIMITATION.—The Center for the Advancement of Pacific Education may use no more than 5 percent of the funds received pursuant to subsection (b) for administrative costs.".

SEC. 105. STATE ADMINISTRATION.

Section 111 of the Act is amended—

(1) in subsection (a)(1)(A) by striking "113(b)(9)" and inserting "113(b)(14), section 115 and section 232(b))";

(2) in subsection (a)(1)(C) by inserting ", including business and industry" before "involved";

(3) in subsection (b)(1) by—

(A) redesignating subparagraphs (C), (D), (E), (F), and (G), as subparagraphs (D), (E), (F), (G), and (H), respectively, and

(B) inserting the following new subparagraph (C) after subparagraph (B):

"(C) reviewing and commenting upon, and making recommendations concerning, the plans of local educational agencies to ensure that the needs of women and men for training in nontraditional jobs are met and recommending programs concerning equity, single parents, and displaced homemakers, for funding by the State board;";

(4) in subsection (b)(3) by inserting "from funds allocated under section 102(a)(1)(B)" before "expend";

(5) by redesignating subsections (c), (d), and (e) as subsections (f), (g), and (h), respectively; and

(6) by inserting the following new subsections after subsection (b):

"(c)(1) Any State desiring to participate in the programs authorized by this Act shall designate or assign the head of the State office responsible for administering part B of the Education of the Handicapped Act to—

"(A) review all plans of local eligible recipients to ensure that students with disabilities are receiving vocational educational services required by their individual educational program pursuant to Public Law 94-142;

"(B) ensure that the plans of the local educational agency, area vocational school, or intermediate educational agency provide assurances of compliance with the provisions of section 504 of the Vocational Rehabilitation Act of 1973 and the Education of Handicapped Act regarding equal access to programs;

"(C) review all plans of local eligible recipients to ensure that local educational agencies, area vocational schools or intermediate educational agencies have—

"(i) identified the number of students with disabilities enrolled in vocational programs operated by the local eligible recipient,

"(ii) assessed the vocational needs of the students identified pursuant to clause (i), and

"(iii) developed an adequate plan to provide supplementary services sufficient to meet the needs of such students; and

"(D) evaluate the plans of all local eligible recipients with respect to the appropriateness of the program and the quality of the program.

"(2) For purposes of this subsection and subsections (d) and (e), the term 'State' means any one of the 50 States and the District of Columbia.

"(d) Any State desiring to participate in the programs authorized by this Act shall assign the individual responsible for coordinating services under chapter 1 of title I of the Elementary and Secondary Education Act of 1965 to review the plans of the local eligible recipients to ensure that the number of economically disadvantaged students have been identified, and that the needs of such students are being met as outlined by such plans.

"(e) Any State desiring to participate in the programs authorized by this Act shall designate or assign the head of the State office responsible for administering programs for students with limited English proficiency to review the plans of the local educational agencies, area vocational schools, or intermediate educational agencies to ensure that the number of students with limited English proficiency have been identified and that the needs of such students for participation in vocational education programs are being met as outlined by such plans.

"(f) The State board shall consult with parents, students, and teachers in the planning of programs funded under this Act.".

SEC. 106. STATE COUNCIL ON VOCATIONAL EDUCATION.

Section 112 of the Act is amended—

(1) in subsection (a)(1)(A) by inserting "trade organizations," after "industry,";

(2) in subsection (a)(2) by striking the period at the end thereof and inserting in lieu thereof "and may include members of vocational student organizations and school board members.";

(3) in subsection (a) by inserting the following new sentence after the matter following paragraph (2): "No employee of the State board shall serve on the State council.";

(4) in subsection (d)(2) by—

(A) striking "advise" and inserting "make recommendations to";

(B) redesignating subparagraphs (A) and (B) as subparagraphs (B) and (C), respectively; and

(C) inserting the following new subparagraph (A) immediately preceding subparagraph (B) (as redesignated in subparagraph (B)):

"(A) the State plan;";

(6) in subsection (d)(8) by—

(A) striking "201(b)" and inserting "223"; and

(B) striking "and" at the end thereof;

(7) by striking subsection (d)(9) and inserting in lieu thereof the following new paragraph:

"(9) analyze and review corrections education programs; and

"(10)(A) evaluate at least once every 2 years—

"(i) the extent to which vocational education, employment and training programs in the State represent a consistent, integrated, and coordinated approach to meeting the economic needs of the State,

"(ii) the vocational educational program delivery system assisted under this Act, and under the Job Training Partnership Act, in terms of such delivery systems' adequacy and effectiveness in achieving the purposes of each of the two Acts, and

"(iii) make recommendations to the State board on the adequacy and effectiveness of

the coordination that takes place between vocational education and the Job Training Partnership Act;

"(B) comment on the adequacy or inadequacy of State action as put into practice;

"(C) make recommendations to the State board on ways to create greater incentives for joint planning and collaboration between the vocational education system and the job training system at the State and local levels; and

"(D) advise the Governor, the State board, the State job training coordinating council, the Secretary, and the Secretary of Labor regarding such evaluation, findings, and recommendations.";

(8) in subsection (e) by inserting the following new sentences at the end thereof: "Each State Council may submit a statement to the Secretary reviewing and commenting upon the State plan. Such statement shall be sent to the Secretary with the State Plan.";

(9) by amending subsection (f)(1)(A) to read as follows:

"(f)(1)(A) Except as provided in subparagraph (B), from the sums appropriated pursuant to section 3(c) the Secretary shall first make grants of $150,000 to each State council. From the remainder of such sums the Secretary shall allot to each State council an amount in accordance with the method of allotment set forth section 101(a)(2) of this Act, provided that—

"(i) no State council shall receive more than $250,000 for each fiscal year; and

"(ii) no State council shall receive less than $150,000 for each fiscal year; and

"(iii) no State council shall receive less than such State council was allotted in fiscal year 1990;"; and

(10) in subsection (f) by amending paragraph (1)(B) to read as follows:

"(B) From the amounts appropriated pursuant to section 3(c), for each fiscal year, the Secretary shall make grants of—

"(i) $60,000 to each of the State councils of the Virgin Islands, Guam, and the Federated States of Micronesia; and

"(ii) $25,000 to each of the State councils of American Samoa, Palau, the Marshall Islands, and the Commonwealth of the Northern Mariana Islands.".

SEC. 107. STATE PLANS.

Section 113 of the Act is amended to read as follows:

"SEC. 113. (a)(1)(A) Any State desiring to receive funds from its allotment under this Act for any fiscal year shall submit to the Secretary a State plan for a 3-year period in the case of the initial plan, and a 2-year period thereafter, together with such annual revisions as the State board determines to be necessary.

"(B) The planning periods required by paragraph (1) of this subsection shall be coterminous with the planning program periods required under section 104(a) of the Job Training Partnership Act.

"(2)(A) In formulating the State plan (and amendments thereto) the State board shall meet with and utilize, before the development of such plan, the State Council, established pursuant to section 112 of this Act.

"(B) The State board shall conduct public hearings in the State, after appropriate and sufficient notice, for the purpose of affording all segments of the public and interested organizations and groups an opportunity to present their views and make recommendations regarding the State plan. A summary of such recommendations and the State board's response shall be included with the State plan.

"(3) In developing the State plan, the State shall conduct a State assessment according to section 115.

"(b) Each State plan shall—

"(1) describe the procedures and the results of each of the assessments required by paragraphs (A) through (F) of section 115(a)(1), including the needs identified by such assessments; and

"(2) describe how uses of funds reflect the needs described in paragraph (1);

"(3) provide assurances that, and where necessary a description of the manner in which eligible recipients will comply with the requirements of titles I, II, and III of this Act including—

"(A) a description of the manner in which the State will comply with the criteria required for programs for the special populations described in section 223;

"(B) assurances that the State board will develop measurable goals and accountability measures for meeting the needs of special populations;

"(C) an assurance that the State board will conduct adequate monitoring of programs in local educational agencies, area vocational schools, intermediate educational agencies, and other eligible recipients to ensure that programs within the State are meeting the goals described in subparagraph (B); and

"(D) assurances that, to the extent consistent with the number and location of individuals described in section 223, who are enrolled in private elementary and secondary schools, provision is made for the participation of such individuals in the vocational education program assisted under subpart 1 of part C of title II;

"(4) set forth the planned distribution to local educational agencies, area vocational schools, correctional institutions, or intermediate educational agencies as prescribed by section 221;

"(5) provide assurances that the State will comply with the provisions of section 102;

"(6) set forth the criteria the State board will use—

"(A) in approving applications of eligible recipients, and

"(B) for spending the 20 percent reserve for the State as authorized under section 102(a)(1);

"(7) provide assurances that if the State exercises the option to redistribute the 10 percent reserve described in section 222, the State will match the reserve as prescribed under section 101(c);

"(8) describe how funds expended for occupationally specific training will be used only for occupations in which job openings are projected or available;

"(9) provide assurances that the goal of each program shall be to give a student experience in, and understanding of, all aspects of the industry in which the student is preparing to enter;

"(10) describe in each State plan submitted after fiscal year 1991, the progress the State has made in achieving the goals set forth in previous State plans;

"(11) provide such methods of administration as are necessary for the proper and efficient administration of the Act;

"(12) provide assurances that, in the use of funds available for single parents, displaced homemakers, and single pregnant women under section 242, the State will emphasize assisting individuals with the greatest financial need, and that the State will give special consideration to displaced homemakers who because of divorce, separation, or the death or disability of a spouse must prepare for paid employment;

"(13) provide assurances that the State will furnish relevant training and vocational education activities to men and women who desire to enter occupations that are not traditionally associated with their sex;

"(14) describe how the State is implementing performance evaluations with eligible recipients as prescribed in section 231;

"(15) provide a description of how the State will—

"(A) develop measures of the effectiveness of programs assisted under this Act in meeting the needs described in paragraph (1), including evaluative measurements of factors such as—

"(i) the occupations to be trained for, which will reflect a realistic assessment of the labor market needs of the State;

"(ii) the levels of skills to be achieved in particular occupations, which will reflect the hiring needs of employers; and

"(iii) the basic employment competencies to be used in performance outcomes, which will reflect the hiring needs of employers;

"(B) as a component of the measures under subparagraph (A) of this paragraph, establish appropriate measures for evaluating the effectiveness of programs for the special populations described in section 223 assisted under this Act; and

"(C) evaluate the projects, services, and activities supported under this Act of not less than 20 percent of the participating eligible recipients within the State in each fiscal year;

"(16) describe the methods proposed for the joint planning and coordination of programs carried out under this Act with programs conducted under the Job Training Partnership Act, the Adult Education Act, chapter 1 of title I of the Elementary and Secondary Education Act of 1965, the Education of the Handicapped Act, and the Rehabilitation Act of 1973, and with apprenticeship programs;

"(17) provide assurances that programs of personnel development, and curriculum development shall be funded to further the goals identified in the State plan;

"(18) provide assurances that the vocational education needs of identifiable segments of the population in the State that have the highest rates of unemployment have been thoroughly assessed, and that such needs are reflected in and addressed by the State plan;

"(19) provide assurances that the State board will cooperate with the State council in carrying out its duties under this part;

"(20) provide assurance that none of the funds expended under this Act will be used to acquire equipment (including computer software) in any instance in which such acquisition results in a direct financial benefit to any organization representing the interests of the purchasing entity or its employees or any affiliate of such an organization;

"(21) provide assurances that Federal funds made available under this Act will be used so as to supplement, and to the extent practicable increase the amount of State and local funds that would in the absence of such Federal funds be made available for the uses specified in the State plan, and in no case supplant such State or local funds;

"(22)(A) provide assurances that the State will provide leadership, supervision, and resources for comprehensive career guidance, vocational counseling, and placement programs;

"(B) as a component of the assurances described in subparagraph (A), annually assess and report on the degree to which expenditures aggregated within the State for career

guidance and vocational counseling from allotments under title II are not less than such expenditures for such guidance and counseling within the State in the fiscal year 1988;

"(23) provide assurances that the State will provide for such fiscal control and fund accounting procedures as may be necessary to assure the proper disbursement of, and accounting for, Federal funds paid to the State (including such funds paid by the State to eligible recipients under this Act); and

"(24) specify for each of the programs assisted under subpart 2 of title II—

"(A) the methods by which the special needs of the individuals described in section 223 shall be assessed and met; and

"(B) the number of individuals in each of the categories set forth in section 223 for each occupationally specific program.

"(c) When changes in program conditions, labor market conditions, funding, or other factors require substantial amendment to an approved State plan, the State board, in consultation with the State council, shall submit amendments to such State plan to the Secretary. Any such amendments shall be subject to review by the State job training coordinating council, and the State council.".

SEC. 108. APPROVAL.

Section 114 of the Act is amended—

(1) in subsection (a)(1) by inserting ", the chief executive officer of the State" after "legislature" each place such term appears; and

(2) redesignating subsection (c) as subsection (d); and

(3) inserting the following new subsection after subsection (b):

"(c)(1) The State board shall develop the portion of each State plan relating to the amount and uses of any funds proposed to be reserved for adult education, postsecondary education, technical preparation education and for secondary education after consultation with the State agency responsible for supervision of community colleges and the State agency responsible for secondary education, respectively. The State board shall, in developing such plan, take into consideration the relative training and retraining needs of secondary, adult and postsecondary students. If a State agency finds that a portion of the final State plan is objectionable, such agency shall file such objections with the State board. The State board shall respond to any objections of such agency in submitting such plan to the Secretary. The Secretary shall consider such comments in reviewing the State plan.

"(2) Each State plan shall be submitted to the Secretary by May 1 preceding the beginning of the first fiscal year for which such plan is to be in effect. The Secretary shall approve each plan before the expiration of the 60-day period beginning on the date the plan is submitted if the plan meets the requirements of section 113 and is of sufficient quality to meet the objectives of this Act (including the objective of developing and implementing performance evaluations and improvements), and shall subsequently take appropriate actions to monitor the State's compliance with the provisions of its plan and the requirements of this Act. The Secretary shall not finally disapprove a State plan except after giving reasonable notice and an opportunity for a hearing to the State board.".

SEC. 109. STATE ASSESSMENT.

Section 115 of the Act is amended to read as follows:

"STATE ASSESSMENT

"SEC. 115. (a)(1) Each State board receiving assistance under this Act shall develop measurable objective criteria by which to assess the quality of, and standards for, State and local programs. Such criteria shall be developed in consultation with local educational agencies, area vocational schools, intermediate educational agencies, correctional institutions, postsecondary institutions, business and industry, union and trade representatives, vocational educators, counselors, superintendents, community-based organizations, parents, representatives of special populations described in sections 223 and 242, the sex equity administrator, the head of the State correctional education agency, the head of the State office responsible for administering part B of the Education of the Handicapped Act, the individual responsible for coordinating services under chapter 1 of title I of the Elementary and Secondary Education Act of 1965, and the head of the State agency responsible for administering programs for students with limited English proficiency, guidance counselors and the State council. Each State board shall widely disseminate such criteria. State boards shall develop such criteria no later than the beginning of school year 1993, and shall use criteria to assess program quality. Assessment criteria shall include—

"(A) student improvement in basic skills;

"(B) gains in learning and educational outcomes;

"(C) competence in all aspects of the industry the students are preparing to enter;

"(D) student improvement in life skills, problem solving skills and career decision making;

"(E) the ability of local educational agencies, area vocational schools and intermediate educational agencies, postsecondary institutions and other local recipients under subpart 2 of part C of title II to meet the needs of special populations such as the economically disadvantaged, students with disabilities, students with limited English proficiency, and women and men in programs for training in nontraditional occupations, and criminal offenders in correctional institutions, for access to vocational education and vocational services in terms of labor market needs;

"(F) the quality of vocational education in terms of—

"(i) the pertinence of programs to the workplace and to new and emerging technologies;

"(ii) the technological and educational capacity of vocational curricula, equipment, and instructional materials to enable vocational students and instructors to meet the challenges of increased technological demands of the workplace;

"(iii) the capability of vocational education programs to meet the needs for general occupational skills and improvement of basic academic skills in order to address the changing content of jobs;

"(iv) the capability of vocational education programs to—

"(I) give students experience in, and understanding of, all aspects of the industry in which the student is preparing to enter; and

"(II) provide job placements; and

"(v) measuring the state-of-the-art quality of the vocational education provided; and

"(G) setting measurable goals to meet the needs of special populations.

"(2) In developing assessment criteria pursuant to the provisions of paragraph (1)(E), the head of the special education office, the sex equity administrator, the individual responsible for coordinating services under chapter 1 of title I of the Elementary and Secondary Education Act of 1965, and the individual designated under section 111(e) to monitor programs for students with limited English proficiency shall each develop data collection procedures appropriate to the special populations being served. Data collected should include information about program services and outcomes, as well as which individuals are being served.

"(b) Each State board receiving assistance under this Act shall assess improvements needed in vocational education programs and may conduct such assessment through the use of Federal funds provided under this Act and State and local vocational education funds. Such assessment shall utilize the following factors:

"(1) integration of academic and vocational education;

"(2) instruction and experience in all aspects of the industry the students are preparing to enter;

"(3) sequential course of study;

"(4) increased student job placement;

"(5) increased linkages between secondary and postsecondary educational institutions;

"(6) ensuring that special populations obtain assistance necessary to enroll and succeed in upgraded programs; and

"(7) raising the quality of vocational education programs in schools with high concentrations of poor and low achieving students.

"(c) Each State board shall complete the assessment under this section pursuant to a timetable consistent with the State plan.".

TITLE II—BASIC STATE GRANTS

SEC. 201. BASIC STATE GRANTS.

Title II of the Act is amended to read as follows:

"TITLE II—BASIC STATE GRANTS FOR VOCATIONAL EDUCATION

"PART A—STATE PROGRAMS

"STATE PROGRAMS AND STATE LEADERSHIP

"SEC. 201. (a) From amounts reserved under section 102(a)(1)(A) each State shall conduct State programs and State leadership activities.

"(b)(1) State programs conducted pursuant to subsection (a) may include—

"(A) training and retraining programs for teachers, administrators and counselors, including corrections educators and counselors, and educators and counselors in community-based organizations, which may include—

"(i) training in the integration of academic and vocational studies and programs that give students experience in, and understanding of, all aspects of the industry the student is preparing to enter; and

"(ii) retraining of vocational teachers in modern instructional techniques and new technologies;

"(B) curriculum development, curriculum dissemination and field-testing of curriculum;

"(C) instructional programs in technology education, including curriculum development and teacher training; and

"(D) supporting vocational student organizations, with every effort made to increase minority participation in such clubs.

"(2) Training and retraining programs conducted pursuant to paragraph (1)(A) shall give particular emphasis to recruiting and training minority teachers and counselors and shall encourage the utilization of

business and industry equipment and personnel.

"(3) In carrying out the provisions of paragraph (1)(B) the State—

"(A) shall give priority to curriculum which integrates academic and vocational studies;

"(B) shall provide special emphasis on curriculum which incorporates the needs of business, industry and labor in high skilled occupations;

"(C) may award contracts to the Corporation for Public Broadcasting; and

"(D) may provide grants for technical preparation education programs as described in part B of this title.

"(c)(1) Leadership activities conducted pursuant to subsection (a) may include—

"(A) monitoring and evaluation, including technical assistance to local recipients;

"(B) development and implementation of performance evaluations and improvement plans required under section 250, including technical assistance;

"(C) development and implementation of the State assessment required under section 115;

"(D) promoting business, industry, labor and interagency linkages;

"(E) promoting technology education courses and instruction particularly courses and instruction which integrate mathematics, science, and technology studies;

"(F) establishing guidelines for the development of local plans;

"(G) the creation and maintenance of a public awareness program;

"(H) developing linkages with community-based organizations; and

"(I) building collaboration and joint efforts among education, labor, job training, public assistance, and other State agencies to improve vocational education services to traditionally underserved populations.

"(2) Each State receiving financial assistance under this Act shall match, on a dollar for dollar basis and from non-Federal sources, the funds received pursuant to section 102(a)(1)(A) for leadership activities.

"SEX EQUITY PROGRAMS

"SEC. 202. (a) From amounts reserved under section 102(b)(1) the State shall, under the administration of the sex-equity administrator described in section 111(b)(1)—

"(1) support programs, services, comprehensive career guidance and counseling, and activities to eliminate sex bias and stereotyping in secondary and postsecondary vocational education;

"(2) support vocational and prevocational education programs, services, comprehensive career guidance counseling, and activities for girls and women, aged 14 through 25, designed to enable the participants to support themselves and their families; and

"(3) provide support services for individuals participating in vocational education programs, services, and activities described in paragraphs (1) and (2) including dependent-care services and transportation.

"(b) The requirement with respect to age limitations contained in subsection (a)(2) may be waived whenever the sex equity administrator determines that the waiver is essential to meet the objectives of this section.

"PART B—TECHNOLOGY PREPARATION

"PROGRAM AUTHORIZED

"SEC. 211. From amounts reserved under section 102(a)(2) the State board shall award competitive grants, or grants on the basis of a formula as determined by the State board, for activities carried out under this part to consortia of—

"(1) local educational agencies, intermediate educational agencies serving secondary school students, area vocational schools serving secondary school students, or secondary schools funded by the Bureau of Indian Affairs; and

"(2) community colleges (including post-secondary vocational technical schools), apprenticeship programs, or institutions of higher education offering—

"(A) a two-year degree,

"(B) an associate's degree, or

"(C) a two-year post-secondary certificate.

"TECHNICAL PREPARATION EDUCATION PROGRAMS

"SEC. 212. (a) Each consortium receiving a grant under this part shall use amounts paid under this part to develop and operate a 4-year technical preparation education program.

"(b) Each such program shall—

"(1) be carried out under an articulation agreement among the participants in the consortium;

"(2) consist of the 2 years of secondary school preceding graduation followed by 2 years of higher education, or a 2-year apprenticeship program, with a curriculum based on a common core of material intended to develop a student's proficiency in mathematics, science, communications and technologies designed to lead to an associate degree in a specific career field;

"(3) include the development of a technical preparation education program curriculum appropriate to the needs of the student's participating in the consortium; and

"(4) include in-service training for teachers and counselors that—

"(A) is designed to train teachers and counselors to implement effectively technical preparation education curriculum;

"(B) provides for joint training for teachers and counselors from all participants in the consortium; and

"(C) may provide such training in weekend, evening and summer sessions, institutes or workshops;

"(5) provide equal access to the full range of technical preparation programs to the individuals described in sections 223 and 242, including the development of technical preparation education program services appropriate to the need of participants described in sections 223 and 242; and

"(6) provide for prevocational programs which assist the participants described in sections 223 and 242.

"(c) Each such program may—

"(1) provide for training programs for counselors designed to enable counselors more effectively to recruit students for technical preparation education programs, and ensure their successful completion of such programs and their placement in appropriate employment;

"(2) provide for the acquisition of technical preparation education program equipment; and

"(3) as part of the program's planning activities, acquire technical assistance from State or local entities that have successfully designed, established and operated technical preparation education programs.

"APPLICATIONS

"SEC. 213. (a) Each consortium that desires to receive a grant under this part shall submit an application to the State board at such time and in such manner as the State board shall prescribe.

"(b) Each application submitted under this section shall contain a 3-year plan for the development and implementation of activities under this Act.

"(c) The State board shall approve applications based on their potential to create an effective technical preparation education program as described in section 212.

"(d) The State board shall give special consideration to applicants whose applications—

"(1) provide for effective employment placement activities or transfer of students to 4-year baccalaureate degree programs; and

"(2) are developed in consultation with business, industry, and labor unions.

"DEFINITIONS

"SEC. 214. For purposes of this part—

"(1) the term 'articulation agreement' means a commitment to a program designed to provide students with a nonduplicative sequence of progressive achievement leading to competencies in a technical preparation education program;

"(2) the term 'community college'—

"(A) has the meaning provided in section 1201(a) of the Higher Education Act of 1965 for an institution which provides not less than a 2-year program which is acceptable for full credit toward a bachelor's degree; and

"(B) includes tribally controlled community colleges (within the meaning of section 2(4) of the Tribally Controlled Community College Assistance Act of 1976 (25 U.S.C. 1801(4))); and

"(3) the term 'technical preparation education program' means a combined secondary and postsecondary education program which—

"(A) leads to an associate degree;

"(B) provides technical preparation in at least 1 field of engineering technology, applied science, or mechanical, industrial, or practical art or trade;

"(C) builds student competence in mathematics, science, and communications (including through applied academics) through a sequential course of study; and

"(D) leads to placement in employment.

"PART C—SECONDARY, POSTSECONDARY AND ADULT VOCATIONAL PROGRAMS

"Subpart 1—Secondary School Programs

"WITHIN STATE ALLOCATION

"SEC. 221. (a) From amounts reserved under section 102(a)(3)(A), the State board shall, subject to subsection (b), allocate to each local educational agency an amount that bears the same relationship to such funds as the amount such local educational agency was allocated under sections 1005 and 1006 of the Elementary and Secondary Education Act of 1965 in the preceding fiscal year bears to the total amount received under such section by local educational agencies in the State in such year.

"(b)(1)(A) In the case of criminal offenders who are in State correctional institutions the State board shall ratably reduce the percentages obtained under subsection (a) in order to make available to the State correctional education agency an amount which is substantially equivalent to the amount which such agency would have been eligible to receive under section 1005 of the Elementary and Secondary Education Act of 1965 for the previous fiscal year if the State correctional education agency were a local educational agency.

"(B) For the purpose of subparagraph (A) the age of individuals in correctional institutions to be counted shall be ages 9 through 35.

"(C) The amount determined pursuant to subparagraphs (A) and (B) shall not exceed 5 percent of the amount reserved under section 102(a)(3)(A), or shall not exceed the amount allocated for corrections education pursuant to this Act in the fiscal year 1990, whichever is greater.

"(2) In the case of an area vocational school the amounts calculated under subsection (a) that are available to local educational agencies served by that area vocational school shall be made available to that area vocational school.

"(3) In the case of an intermediate educational agency the amounts calculated under subsection (a) that are available to local educational agencies served by that intermediate educational agency shall be made available to that intermediate educational agency.

"(c)(1) No local educational agency, area vocational school or intermediate educational agency, shall be eligible for an allocation unless the amount calculated under subsection (a) equals or exceeds $25,000.

"(2) Local educational agencies, area vocational schools or intermediate educational agencies may form consortia and aggregate the amounts such agencies or schools would be eligible to receive under subsection (a) in order to comply with the provisions of paragraph (1).

"(3) The provisions of paragraph (1) shall not apply to State correctional agencies.

"(4) Any amounts which are not allocated by reason of paragraph (1) shall be redistributed to local educational agencies in accordance with the provisions of this section.

"(d) In the case that an area vocational school and a local educational agency served by such area vocational school offer comparable vocational education programs, the State agency may distribute funds to both an area vocational school and a local educational agency served by such area vocational school, provided the provisions of subsection (c)(1) are met for each area vocational school and the local educational agency.

"(e) In the case that an intermediate educational agency and a local educational agency served by such an intermediate educational agency offer comparable vocational education programs, the State agency may distribute funds to both an intermediate educational agency and a local educational agency served by such intermediate educational agency provided the provisions of subsection (c)(1) are met for both the intermediate educational agency and the local educational agency.

"(f) In applying the provisions of subsection (a), no State board receiving assistance under this Act shall allocate funds to a local educational agency that serves only elementary schools, but shall distribute such funds to the local or regional educational agency which provides secondary school services to secondary school students in the same attendance area.

"STATE RESERVE FOR AREAS WITH SEVERE PROBLEMS

"SEC. 222. (a)(1) Each State receiving financial assistance under this subpart may reserve not to exceed 10 percent of such amount for distribution to local educational agencies, area vocational schools, or intermediate educational agencies in areas experiencing particularly severe hardships such as severe unemployment, a severe poverty concentration, a high dropout rate, a high crime rate, a high incidence of drug abuse or a high concentration of limited English proficient students, all of which percentages or concentrations of which are above the statewide average.

"(2)(A) In addition to the distributions described in paragraph (1), a State may distribute funds reserved pursuant to paragraph (1) to community colleges to enable such community colleges to conduct programs which provide high school diplomas to individuals aged 16 through 18.

"(B) In the event a State distributes funds pursuant to the provisions of paragraph (1) to a community college pursuant to the provisions of subparagraph (A), such community college shall match such funds on a dollar for dollar basis.

"(b)(1) If a State elects to reserve funds pursuant to subsection (a) the State shall match, on a dollar-for-dollar basis, such funds provided to each local educational agency, area vocational school or intermediate educational agency from State sources or from private sources.

"(2) In no event shall a State reserving funds pursuant to subsection (a) use funds from local educational agencies, area vocational schools, or intermediate educational agencies to meet the requirements of paragraph (1).

"POPULATIONS TO BE SERVED

"SEC. 223. (a) Each local eligible recipient receiving funds under this subpart shall use such funds to provide vocational education services and activities, including comprehensive career guidance and counseling, designed to meet the special needs of, and to enhance the participation of—

"(1) the economically disadvantaged;

"(2) individuals with disabilities;

"(3) individuals who participate in programs designed to eliminate sex bias and stereotyping in vocational education;

"(4) students with limited English proficiency;

"(5) economically disadvantaged adults; and

"(6) criminal offenders, both juvenile and adults, who are serving in a correctional institution.

"(b) Notwithstanding any other provision of this section, each local educational agency with a student enrollment exceeding 100,000 which served economically and educationally disadvantaged adults in fiscal year 1990 pursuant to the provisions of this section may continue to serve such adults in each fiscal year with funds available under this section in an amount which bears the same relationship to the total amount of funds available under this section in each fiscal year as the amount available to carry out such programs for such adults in fiscal year 1990 bears to the total amount available under this section in fiscal year 1990.

"PROGRAMS FOR ECONOMICALLY DISADVANTAGED STUDENTS

"SEC. 224. (a) Each local educational agency, area vocational school, or intermediate educational agency receiving financial assistance under this subpart shall provide to disadvantaged students—

"(1) equal access in recruitment, enrollment, and placement activities;

"(2) equal access to the full range of vocational programs available to nondisadvantaged individuals, including occupationally specific courses of study, cooperative education programs, apprenticeship programs, and comprehensive career guidance and counseling services; and

"(3) the supplementary services necessary to ensure full and equitable participation in vocational education programs.

"(b) For the purpose of this section the term 'disadvantaged student' means a student who is economically or educationally disadvantaged.

"PROGRAMS FOR STUDENTS WITH DISABILITIES

"SEC. 225. (a) Each local educational agency, area vocational school, or intermediate educational agency receiving financial assistance under this subpart shall provide to all students with disabilities within the jurisdiction of the recipient an equal opportunity for an appropriate vocational education. Such recipients shall provide to students with disabilities—

"(1) equal access to recruitment, enrollment, and placement activities;

"(2) equal access to the full range of vocational programs available to nondisabled individuals, including occupationally specific courses of study, cooperative education programs, apprenticeship programs, and comprehensive career guidance and counseling services;

"(3) vocational education programs and activities in the least restrictive environment in accordance with section 612(5)(B) of the Education of the Handicapped Act;

"(4) the vocational education component of the individualized education plan required under sections 612(4) and 614(a)(5) of the Education of the Handicapped Act;

"(5) supplementary services including curriculum modification, equipment modification, classroom modification, supportive personnel, and instructional aids and devices; and

"(6) vocational education planning for individuals with disabilities which shall be—

"(A) coordinated with appropriate representatives of vocational education and special education, and

"(B) reviewed by the head of the State office responsible for administering part B of the Education of the Handicapped Act.

"(b) Each local educational agency, area vocational school, or intermediate educational agency receiving financial assistance under this subpart shall comply with the provisions of section 504 of the Rehabilitation Act of 1973 and the Education of the Handicapped Act regarding equal access to programs.

"PROGRAMS FOR STUDENTS WITH LIMITED ENGLISH PROFICIENCY

"SEC. 226. Each local educational agency, area vocational school, or intermediate educational agency receiving financial assistance under this subpart shall provide to students with limited English proficiency—

"(1) equal access in recruitment, enrollment, and placement activities;

"(2) equal access to the full range of vocational programs including occupationally specific courses of study, cooperative education programs, apprenticeship programs, and comprehensive career guidance and counseling services;

"(3) supplementary services to ensure full and equitable participation in programs, such as—

"(A) providing adapted vocational instruction simultaneously with English language instruction;

"(B) utilizing appropriate agencies and community-based organizations to communicate in, and to provide counseling in, the students' language; and

"(C) bilingual and cultural counseling; and

"(4) vocational education planning which shall be reviewed by the head of the State administrative office responsible for the education of students with limited English proficiency.

"PROGRAMS TO ELIMINATE SEX BIAS

"SEC. 227. (a) Each local educational agency, area vocational school, or intermediate educational agency receiving financial assistance under this subpart shall provide to women and men—

"(1) equal access in recruitment, enrollment, and placement activities in education and training programs in nontraditional occupations;

"(2) equal access to the full range of vocational programs including occupationally specific courses of study, cooperative education programs, apprenticeship programs, and comprehensive career guidance and counseling services;

"(3) programs to overcome sex bias, stereotyping and other barriers which inhibit the participation of women and men;

"(4) programs to expand outreach and orientation to nontraditional occupations for women and men;

"(5) supplementary services including, but not limited to, curriculum modification, equipment modification, classroom modification, supportive personnel, instructional aids and devices, and subsidized employment opportunities; and

"(6) programs to increase and provide support services.

"(b) Programs and services provided pursuant to subsection (a) shall be reviewed by the sex-equity administrator consistent with the provisions of section 111(b)(1)(A).

"PROGRAMS FOR CRIMINAL OFFENDERS

"SEC. 228. Each State correctional education agency receiving financial assistance under this Act shall—

"(1) administer vocational education programs for criminal offenders, both juveniles and adults, in correctional institutions;

"(2) provide vocational education programs for women who are incarcerated;

"(3) use funds provided pursuant to the provisions of section 221(b)(1)(A) to update equipment; and

"(4) distribute funds for services to correctional institutions in proportion to the number of individuals served by each facility, giving special emphasis to ensure services for women who are incarcerated.

"USE OF FUNDS

"SEC. 229. (a)(1) Each local eligible recipient receiving financial assistance under this subpart shall use such funds to—

"(A) provide to the individuals described in sections 223 and 224 the supplementary services and prevocational programs necessary to ensure full and equitable participation in vocational education programs;

"(B) ensure that programs for the individuals described in section 223 are of the highest quality and are state-of-the-art; and

"(C) support supplemental or additional staff, equipment, materials, and services for the individuals described in section 223.

"(2) The necessary services described in paragraph (1)(A) shall be identified and designed through an assessment of the interests, abilities and needs of the students, and shall reflect the participation of the student and parent, and the guidance and counseling activities carried out under subsection (b)(1)(D).

"(3) Each local eligible recipient receiving funds under this section shall use no more than 5 percent of such funds for administrative costs.

"(4) Each local eligible recipient receiving funds under this section may use such funds to develop programs in consortia or in cooperation with community-based organizations.

"(b)(1) Each local eligible recipient receiving financial assistance under this subpart shall, to the extent practicable, use such funds for individuals described in section 223 to—

"(A) integrate academic and vocational training in a manner which—

"(i) provides a sequential course of study that—

"(I) uses an applied context based on both broad and specific job training;

"(II) reinforces and enhances academic skills;

"(III) motivates students to excel in both academic and vocational courses; and

"(IV) provides students with experience in, and understanding of, all aspects of the industry such students are preparing to enter; and

"(ii) encourages utilization of a business-industry model of applied learning techniques;

"(B) carry out program improvement activities, including instructional services, curriculum and materials development and state-of-the-art equipment and construction to upgrade instruction;

"(C) designate a special populations coordinator who shall be a qualified counselor or teacher to ensure that special populations described in section 223 are receiving adequate services and job skill training; and

"(D) provide comprehensive guidance and counseling to the individuals described in section 223 who are participating in correctional education programs and who have not entered grade 9, and to the parents of such individuals, concerning—

"(i) the course of study in each vocational program offered;

"(ii) the occupational opportunities for employment after graduation, as well as summer and part-time employment during the school year;

"(iii) information about postsecondary education opportunities;

"(iv) information about apprenticeship program opportunities;

"(v) guidance and counseling at the prevocational level and during the vocational program;

"(vi) career guidance and counseling;

"(vii) assessment of interest, abilities, and special needs with respect to successful completion of the vocational education program;

"(viii) guidance, counseling, and career development activities conducted by professionally trained counselors who are associated with the provision of such services;

"(ix) counseling services designed to facilitate the transition from school to post-school employment and career opportunities; and

"(x) a career plan or career assessment for the student.

"(2) Each local eligible recipient receiving assistance under this subpart may use such funds for technical preparation education programs described in part B of this title for special populations described under section 223.

"(3) The individual described in paragraph (1)(C) shall be compensated in whole or in part through funds reserved pursuant to subsection (a)(2) for administrative costs.

"(4) Funds used to carry out the provisions of paragraphs (1)(A) and (1)(B) may be used to benefit other populations providing the needs of the individuals described in section 223 are being met.

"(5) Equipment purchases pursuant to paragraphs (1)(A) and (1)(B), when not being used to carry out the provisions of this Act, may be used for other instruction purposes if—

"(A) the acquisition of the equipment was reasonable and necessary for the purpose of conducting a properly designed project or activity under this title;

"(B) is used after regular school hours or on weekends; and

"(C) such other use is—

"(i) incidental to the use of that equipment under this title;

"(ii) does not interfere with the use of that equipment under this title; and

"(iii) does not add to the cost of using that equipment under this title.

"(6) Each local eligible recipient receiving funds under this subpart may only use such funds if such agency or school has provided for consultation with members of special populations, students, parents, teachers, workers and members of community-based organizations in the planning of the programs provided pursuant to this subpart, particularly with respect to the quality of the programs and supplementary services provided.

"LOCAL APPLICATION

"SEC. 230. (a) Any local eligible recipient desiring financial assistance under this subpart shall, according to requirements established by the State board, submit to the State board an application, covering the same period as the State plan, for the use of such assistance. The State board shall determine requirements for local applications, except that each such application shall—

"(1) contain a description of the vocational education programs to be funded;

"(2) contain a report on the number of individuals in each of the special populations categories contained in section 223;

"(3) contain a description of how the needs of the special populations will be assessed and a description of the planned use of funds to meet such needs;

"(4) identify the planned use of resources allocated to meet such needs;

"(5) ensure full and equitable participation in a vocational educational program of quality;

"(6) provide assurances that the programs funded under this subpart shall be carried out according to the criteria for programs for each special population described in section 223;

"(7) describe the performance evaluation standards the applicant will use to measure its progress;

"(8) demonstrate that in using funds in accordance with the provisions of sections 229 (b)(1)(A) and (b)(1)(B) the local eligible recipient has first met the needs of the individuals described in section 223 as required by section 229(b)(4);

"(9) describe methods to be used to coordinate vocational education services with relevant programs conducted under the Job Training Partnership Act, including cooperative arrangements established with private industry councils established under the Job Training Partnership Act, in order to avoid duplication and to expand the range of and accessibility to vocational education services;

"(10) describe methods used to develop vocational educational programs in consultation with parents and students of special populations described in section 223; and

"(11) provide a description of coordination with community-based organizations.

"(b) The individual described in section 229(b)(1)(C) shall review and comment on the application submitted pursuant to sub-

section (a) regarding the assurances contained in such application and the services to be provided to the special populations described in section 223.

"PERFORMANCE EVALUATION AND IMPROVEMENT

"SEC. 231. (a) Each local eligible recipient receiving financial assistance under this subpart shall develop goals for, and evaluate the effectiveness of, the program conducted pursuant to this subpart with respect to—

"(1) the progress of students in the achievement of basic academic skills;

"(2) the progress of students in achieving occupational skills necessary to obtain employment in the field for which the students have been prepared, including occupational skills in all aspects of the industry the students are preparing to enter;

"(3) the ability of the local eligible recipient to meet the needs of the special populations described in section 223; and

"(4) any other measures the local eligible recipient includes to reflect accurately the success of the program.

"(b) Each entity described in subsection (a) shall consult with the State board in determining measurement indicators pursuant to the criteria set forth in subsection (a).

"(c) Each local eligible recipient shall annually evaluate whether such entity is meeting the criteria developed under subsection (a). If any entity described in subsection (a) determines that such entity is not making substantial progress in meeting the criteria set forth in subsection (a), such entity shall develop a plan, in consultation with teachers, parents and students, for program improvement for the subsequent school year.

"(d) Each local eligible recipient shall regularly review programs, with the full and informed participation of representatives of the special populations described in section 223, to identify and to adopt measures to overcome any barriers which are resulting in lower rates of access or success for special populations.

"PROGRAM IMPROVEMENT PLAN

"SEC. 232. (a) The plan developed pursuant to section 231(c) shall describe how the local eligible recipient will identify and modify programs funded under this subpart including—

"(1) a description of vocational education and career development strategies designed to achieve the goals set forth in section 231(a); and

"(2) a description of measures designed to improve supplementary services provided to special populations described in section 223.

"(b) If after one year of implementation of the plan described in subsection (a), sufficient progress in meeting the criteria described in section 231 has not been made, the State shall work jointly with the local eligible recipient and teachers, parents and students to develop a plan for program improvement. Each such plan shall contain—

"(1) a description of the technical assistance and program activities the State will provide to enhance the performance of the local eligible recipient;

"(2) a reasonable timetable to improve the school performance under the plan;

"(3) a description of vocational education strategies designed to improve the performance of the program as measured by the evaluation; and

"(4) a description of measures designed to improve supplementary services provided to special populations described in section 223.

"Subpart 2—Postsecondary and Adult Programs

"POSTSECONDARY AND ADULT PROGRAMS

"SEC. 240. (a) From amounts reserved under section 102(a)(3)(B) the State board shall make grants, on a competitive basis, or on the basis of a formula as determined by the State board, to—

"(1) postsecondary educational institutions;

"(2) local educational agencies for programs for adults in secondary schools;

"(3) area vocational schools serving postsecondary students or adults;

"(4) community-based organizations providing vocational education to adults;

"(5) any of the entities set forth in paragraphs (1) through (3) in partnership with business, industry and labor; and

"(6) consortia of the entities described in paragraphs (1) through (5);

to improve vocational education programs, including comprehensive career guidance and counseling, for postsecondary students, adults, and single parents, displaced homemakers, and single pregnant women.

"(b) In awarding grants under this section the State board shall give priority to—

"(1) programs serving economically disadvantaged individuals, individuals with disabilities, individuals with limited English proficiency and traditionally underserved populations, including women and men in non-traditional programs;

"(2) apprenticeship programs, especially programs that serve the individuals described in paragraph (1);

"(3) programs that are strongly tied to economic development efforts within the State;

"(4) programs which—

"(A) train adults and students for all aspects of the occupations in which job openings are projected or currently available;

"(B) provide comprehensive career guidance and counseling for adults and students;

"(C) are developed in conjunction with business, industry, labor, the community, the State board, and other local eligible recipients; and

"(D) focus on the most salable, highest placement aspects of the industry; and

"(5) partnerships described in subsection (a)(5).

"(c) Grants awarded under this section shall be coordinated with programs and services provided through—

"(1) the Job Training Partnership Act,

"(2) the Adult Education Act, and

"(3) the Family Support Act of 1988,

to avoid duplication of effort and to ensure maximum effective utilization of funds under this subpart.

"POSTSECONDARY AND ADULT USE OF FUNDS

"SEC. 241. (a) Grants awarded under this subpart may be used for—

"(1) vocational programs for training or retraining adults or career counseling, including programs for older individuals;

"(2) the costs of serving adults in other vocational education programs, and paying the costs of instruction or the costs of keeping school facilities open longer;

"(3) education and training programs designed cooperatively with employers or labor, such as workplace literacy programs, worksite programs, and apprenticeship training programs (or combinations of such programs);

"(4) ndustry-education-labor partnership training programs in high-technology occupations (including programs providing related instruction to apprentices) and projects to train skilled workers needed to produce, install, operate, and maintain high-technology equipment, systems, and processes;

"(5) programs at postsecondary institutions to which provide high school diplomas to individuals aged 16 through 18; and

"(6) technical preparation education programs described in part B of title II.

"(b) The State shall use funds provided pursuant to this subpart for apprenticeship training programs especially tailored to—

"(1) the needs of an industry or groups of industries for skilled workers, technicians, or managers, or

"(2) enable the existing work force to adjust to changes in technology or work requirements.

"(c) Grants awarded under this subpart may be used to provide education and training through arrangements with private vocational training institutions, private postsecondary educational institutions, and employers whenever such institutions, employers or labor organizations can make a significant contribution to obtaining the objectives of the State plan and can provide substantially equivalent training at a lesser cost, or can provide equipment or services not available in public institutions.

"(d)(1) From funds available under this section, the State board may establish and support, through grants to institutions of higher education offering comprehensive programs in teacher or counselor preparation, statewide mentoring programs to—

"(A) fully use the skills and work experience of individuals employed or formerly employed in business and industry who become classroom instructors;

"(B) meet the needs of vocational educators who wish to upgrade their teaching competencies; and

"(C) meet the needs of counselors who wish to upgrade their counseling competencies.

"(2) Any mentoring program established under this program shall—

"(A) establish partnerships among State certification agencies, institutions of higher education offering comprehensive vocational education programs, and local educational agencies to deliver a professional development program aimed at preparing and meeting the continuing training needs of vocational educators and counselors;

"(B) provide competency-based vocational teacher education programs; and

"(C) provide assessment of professional education skills and develop a plan leading to probationary certification within 3 years;

"(D) employ as mentors highly qualified classroom educators who shall be selected by a process collaboratively developed by the institutions of higher education and local educational agencies within the State, and the State board, who shall assist in—

"(i) developing and demonstrating mentor competence in planning, teaching, evaluating, and managing classrooms, particularly for the special populations described in section 223;

"(ii) supervising vocational students' organizations;

"(iii) working with advisory committees;

"(iv) understanding cooperative vocational education programs;

"(v) understanding the foundations of vocational education; and

"(vi) identifying other sources of educational support and information to assist new vocational educators in becoming effective teachers.

"PROGRAMS FOR SINGLE PARENTS, DISPLACED HOMEMAKERS, AND SINGLE PREGNANT WOMEN

"SEC. 242. (a) From amounts reserved under section 102(b)(2) each State board shall provide vocational and prevocational educational programs, including comprehensive career guidance and counseling, and services for single parents, displaced homemakers, and single pregnant women.

"(b)(1) From amounts reserved under section 102(b)(2) each State board shall provide vocational and prevocational education programs and services in postsecondary or secondary school settings, including area vocational schools serving single parents, displaced homemakers and single pregnant women.

"(2) Programs and services provided pursuant to this subpart shall be administered by the sex equity administrator as described in section 111(b)(1)(A).

"(c) From amounts reserved under section 102(b)(2) each State may—

"(1) provide, subsidize, reimburse or pay for vocational and prevocational education and training activities, including basic academic skills, necessary educational materials, and career guidance and counselings that will furnish single parents, displaced homemakers, and single pregnant women with marketable skills;

"(2) make grants to local recipients for expanding vocational and prevocational education services when such expansion directly increases the capacity of local recipients for providing single parents, displaced homemakers, and single pregnant women with marketable skills;

"(3) make grants to community-based organizations for the provision of vocational and prevocational education services and career counseling to single parents, displaced homemakers, and single pregnant women, if the State determines that the community-based organization has demonstrated effectiveness in providing comparable or related services to single parents, displaced homemakers, and single pregnant women, taking into account the demonstrated performance of such an organization in terms of cost, the quality of training and the characteristics of the participants;

"(4) make vocational and prevocational education and training more accessible to single parents, displaced homemakers, and single pregnant women by providing support services including dependent care, transportation services, special services and supplies, books and materials, and by organizing and scheduling the programs so that such programs are more accessible; or

"(5) provide information to single parents, displaced homemakers, and single pregnant women to inform such individuals of vocational education programs and related support services and career counseling.

"SERVICES FOR MEMBERS OF SPECIAL POPULATIONS

"SEC. 243. Each recipient of a grant under this subpart shall—

"(1) provide to individuals who are members of the populations described in section 223—

"(A) equal access in recruitment, enrollment, and placement activities, and to vocational programs available to other individuals, including occupationally specific courses of study, cooperative education programs, and apprenticeship programs;

"(B) the supplementary services needed by such students to successfully complete and master all aspects of the program in the most integrated setting possible; and

"(2) regularly review the programs assisted under this subpart, in consultation with members of the populations described in section 223, to identify any barriers which are resulting in lower rates of access or success for special populations and to adopt measures to overcome such barriers.

"Subpart 3—General Provisions

"STATE PERFORMANCE EVALUATION AND IMPROVEMENT

"SEC. 250. (a) Each State desiring financial assistance under this part shall develop criteria for, and evaluate the effectiveness of, programs under this part with respect to—

"(1) student progress in the achievement of basic academic skills;

"(2) student progress in achieving occupational skills necessary to obtain employment in the field for which the student has been prepared, including occupational skills in all aspects of the industry the student is preparing to enter;

"(3) the program's ability to meet the needs of special populations; and

"(4) any other measures the State shall deem necessary.

"(b) In developing the criteria required in subsection (a), the State board shall make every effort to develop criteria consistent with the standards and evaluations developed pursuant to section 231 by local eligible recipients of financial assistance under subpart 1. If after 2 years the State board determines that the local eligible recipient of financial assistance under subpart 1 is not making progress in meeting the goals set forth by such local eligible recipient, the State shall work in conjunction with such local eligible recipient as prescribed in section 231 by providing program and technical assistance from funds provided under section 102.

"ADMINISTRATIVE PROVISIONS

"SEC. 251. (a)(1)(A) Funds made available under this part shall be used to supplement, and to the extent practicable increase the amount of State and local funds that would in the absence of such Federal funds be made available for the uses specified in the application, and in no case supplant such State or local funds.

"(B) Notwithstanding subparagraph (A), funds made available under this part may be used to pay for the costs of vocational education services required in an individualized education plan developed pursuant to sections 612(4) and 614(a)(5) of the Education of the Handicapped Act, in a manner consistent with section 614(a)(1) of such Act, and services necessary to meet the requirements of section 504 of the Rehabilitation Act of 1973 with respect to ensuring equal access to vocational education.

"(2) No State shall take into consideration payments under this Act in determining, for any educational agency or institution in that State, the eligibility for State aid, or the amount of State aid, with respect to public education within the State.

"(3) The Secretary may waive, as necessary, for each of the fiscal years 1991, 1992, and 1993 on an annual basis, the requirements of paragraphs (1) and (2) with respect to any State that expended for postsecondary education programs more than 70 percent of the funds available under this title in fiscal year 1989.

"(b) Any project assisted with funds made available under this part shall be of sufficient size, scope, and quality to give reasonable promise of meeting the vocational education needs of the students involved in the project.

"(c)(1) Vocational education services and activities authorized in this part may include work-site programs such as cooperative vocational education, programs with community-based organizations, work-study, and apprenticeship programs.

"(2) Vocational education services and activities described in this part may include placement services for students who have successfully completed vocational education programs.

"(3) Vocational education services and activities described in this part may include programs which involve students in addressing the needs of the community in the production of goods or services which contribute to the community's welfare or which involve the students with other community development planning, institutions, and enterprises.

"(d) Each State board receiving financial assistance under this part may consider granting academic credit for vocational education courses which integrate core academic competencies.

"(e)(1) In addition to the State plan, the State may submit a petition to waive the percentage requirements of section 102(a)(3). Such petition for a waiver shall be filed together with the State plan. The Secretary may approve the petition for a waiver only if the State adequately demonstrates that—

"(A) the waiver is necessary to serve more effectively the vocational education needs of economically disadvantaged families or individuals, minorities, individuals with limited English proficiency, or individuals with disabilities, if such individuals are—

"(i) students enrolled in secondary schools or area vocational schools;

"(ii) students who have dropped out of high school;

"(iii) adult individuals who have not earned high school diplomas; or

"(iv) adult individuals who are participating in programs assisted under the Job Training Partnership Act, the JOBS program under title II of the Family Support Act of 1988, the Adult Education Act, or adult literacy programs;

"(B) funds made available pursuant to a waiver under paragraph (1) shall be used—

"(i) to encourage and assist the individuals described in subparagraph (A) to prepare more effectively to enter or reenter the job market and compete for jobs in an increasingly technological workplace;

"(ii) to assist in the coordination of postsecondary vocational programs and secondary vocational programs serving the individuals described in subparagraph (A);

"(iii) to serve the individuals described in subparagraph (A) who seek to improve their employability through retraining programs which upgrade or update skills in accordance with changed work requirements, or through training for high-skilled occupations;

"(iv) to the extent practicable, by postsecondary schools and colleges to enable the students of such schools and colleges to earn high school diplomas or certificates of General Education Development; and

"(v) by postsecondary schools and colleges to serve the students of such schools and colleges through strengthened coordination among programs supported under this subsection and programs assisted under the Job Training Partnership Act, the JOBS program under title II of the Family Support Act of 1988, the Adult Education Act, or adult literacy programs.

"(2) Funds made available pursuant to a waiver under paragraph (1) shall only be used in postsecondary schools and colleges of the State serving high concentrations of economically disadvantaged families or individuals, minorities, individuals with limited English proficiency, or individuals with disabilities, if—

"(A) at least 30 percent of the population of the postsecondary school or college are economically disadvantaged individuals, minorities, individuals with limited English proficiency, or individuals with disabilities; or

"(B) the State provides assurances that it will rank-order postsecondary schools and colleges on the basis of need as determined by the number of Pell Grant recipients attending such schools and colleges, and shall limit assistance under this subsection to schools in the top 25 percent of such ranking.

"(3) In the case of a disagreement concerning an application for a waiver under this subsection pursuant to paragraph (4) between the State agency or department responsible for vocational education at the postsecondary level and the State agency designated as the sole State agency responsible for the administration or supervision of the State vocational education program under section 111 of this Act, the State agency or department responsible for vocational education at the secondary level shall file such objections with the State Board. The State Board shall respond to any objections of the such agency in submitting its State plan to the Secretary. The Secretary shall consider such comments in reviewing and approving the State plan and the provision for a waiver under this subparagraph.

"(4) Each State desiring a waiver under this subsection shall submit an application to the Secretary at such time, in such manner, and accompanied by such information as the Secretary may reasonably require.

"(f) Notwithstanding the provisions of section 102(a)(3), not more than 50 percent of funds available under such section shall be available to carry out the provisions of subpart 2 of part C of title II.

"(g)(1) The Secretary may waive the provisions of subsection (f) on a demonstration basis for not more than 5 States and make available not more than 65 percent of the funds available under section 102(a)(3), if the State demonstrates that the requirements of subsection (f) would adversely effect the vocational educational programs in the State based on the demand for postsecondary programs within the State as demonstrated by—

"(A) the State's average dropout rate, as reported by the State in accordance with the definition of a school dropout developed pursuant to section 6201(a) of the Elementary and Secondary Education Act of 1965;

"(B) the number of local educational agencies in the State which have dropout rates in excess of 10 percent;

"(C) the number of applications in the State for postsecondary vocational and technical programs as compared with the number of applications for vocational education programs in secondary schools or area vocational schools;

"(D) the unemployment rate of the State as compared with the average unemployment rate of all the States;

"(E) the demand for participation in the JOBS program under title II of the Family Support Act of 1988 or programs assisted under the Job Training Partnership Act; and

"(F) any other information the Secretary determines necessary for awarding such waiver.

"(2) Each State desiring a waiver under this subsection shall submit an application to the Secretary at such time, in such manner and accompanied by such information as the Secretary may reasonably require. Each such application shall—

"(A) include a description of the dropout rates in all local educational agencies in the State; and

"(B) contain such other information and assurances as the Secretary may reasonably require to ensure compliance with the provisions of this subsection.".

TITLE III—SPECIAL PROGRAMS

SEC. 301. SPECIAL PROGRAMS AMENDMENTS.

Title III of the Act is amended—

(1) in section 302(b) by—

(A) redesignating paragraphs (6) and (7) as paragraphs (7) and (8), respectively; and

(B) inserting the following new paragraph (6) after paragraph (5):

"(6) model programs for school dropouts;";

(2) in section 311 by inserting "individual and family health," after "nutrition,";

(3) in section 312—

(A) in subsection (b)(1) by—

(i) striking "managing home and work responsibilities" and inserting "balancing work and family";

(ii) inserting "(including family violence and child abuse)" after "family crisis";

(iii) inserting "(especially among teenage parents), preventing teen pregnancy," after "parenting skills";

(iv) inserting "assisting at-risk populations (including the homeless)," after "handicapped individuals,"; and

(v) striking "improving nutrition" and inserting "improving individual child and family nutrition and wellness";

(4) in section 313 by—

(A) in subsection (a) by inserting "educational" after "experience and";

(B) redesignating subsection (b) as subsection (c); and

(C) inserting the following new subsection (b) after subsection (a):

"(b) Funds available under this part may be used to provide full-time State leadership and administrators with educational preparation in home economics education."; and

(5) by repealing parts C, D, and E.

SEC. 302. SUPPLEMENTARY GRANTS.

Title III of the Act is amended by inserting at the end thereof the following new part F:

"PART F—SUPPLEMENTARY GRANTS

"STATEMENT OF PURPOSE

"SEC. 351. It is the purpose of this part to provide additional resources to local educational agencies, area vocational schools, and intermediate educational agencies in economically depressed areas to improve the quality of their vocational education programs.

"ALLOTMENT TO STATES

"SEC. 352. (a) Except as provided in subsection (b), from amounts appropriated to carry out the provisions of this part, the Secretary shall allot to each State an amount which bears the same ratio to such amounts as the amount the State received in the previous fiscal year under section 1006 of the Elementary and Secondary Education Act of 1965 bears to the total amount received by all States under such section in such year.

"(b)(1) In any fiscal year in which the amount appropriated to carry out the provisions of this part does not equal or exceed $50,000,000, the Secretary shall, in accordance with the provisions of this part, make grants to States.

"(2) In awarding grants pursuant to this subsection the Secretary shall—

"(A) give priority to States which have—

"(1) high percentages of children eligible to be counted under section 1006 of the Elementary and Secondary Education Act of 1965,

"(2) high percentages of individuals living below the poverty level, and

"(3) high percentages of school dropouts;

"(B) take into consideration the State's commitment to education as demonstrated by the total elementary and secondary educational expenditures of the State divided by the total personal income of the State; and

"(C) ensure an equitable distribution of assistance among geographic regions of the country.

"ALLOCATION OF FUNDS TO ELIGIBLE RECIPIENTS

"SEC. 353. Each State receiving funds under this part shall use not less than 95 percent of such funds to award grants, on a competitive basis, to eligible recipients within the State to improve vocational education programs in the areas served by the eligible recipient.

"STATE APPLICATIONS

"SEC. 354. (a) Each State that desires to receive an allotment or a grant under this part shall submit an application to the Secretary at such time, and containing or accompanied by such information as the Secretary may reasonably require. Each such application shall—

"(1) designate the sole State agency described in section 111(a)(1) as the State agency responsible for the administration and supervision of activities carried out with assistance under this part;

"(2) provide for a process of consultation with the State Council on Vocational Education established under section 112;

"(3) describe how funds will be allocated in a manner consistent with section 323 that will serve eligible local educational agencies with the greatest need, especially—

"(A) eligible recipients in areas with the highest percentages of children eligible to be counted under section 1006 of the Elementary and Secondary Education Act of 1965; or

"(B) eligible recipients that have—

"(i) high percentages of individuals living below the poverty level,

"(ii) high percentages of school dropouts,

"(iii) high unemployment rates,

"(iv) high percentages of limited English speaking individuals,

"(v) a need to address community economic or employment issues; or

"(vi) a combination of conditions described in subparagraphs (A) through (E);

"(4) provide for an annual report of data concerning the use of funds and students served with assistance under this part;

"(5) provide that the State will keep such records and provide such information to the Secretary as may be required for purposes of financial audits and program evaluations; and

"(6) contain assurances that the State comply with the requirements of this part.

"(b) An application submitted by the State under subsection (a) shall be for a period of not more than 3 years.

"LOCAL APPLICATIONS AND LOCAL USE OF FUNDS.

"SEC. 355. (a) Each eligible recipient that desires to receive a grant under this part shall submit an application to the State at such time, and containing or accompanied by such information, as the State may reasonably require.

"(b) Each eligible recipient receiving funds under this part shall use such funds to meet the vocational education needs of economically disadvantaged students in a manner consistent with the goals and objectives of this Act.

"(c) Each eligible recipient receiving funds under this part shall use such funds to supplement and not supplant vocational education resources available in the area served by the eligible recipient.

"DEFINITIONS

"SEC. 356. For the purpose of this part—

"(1) the term 'eligible recipient' means a local educational agency, area vocational school or intermediate educational agency in an economically depressed area that is eligible to receive funds under section 221; and

"(2) the term 'State' includes each of the 50 States, the District of Columbia and the Commonwealth of Puerto Rico.".

SEC. 303. COMMUNITY EDUCATION EMPLOYMENT CENTERS.

Title III of the Act (as amended by section 302) is further amended by inserting at the end thereof the following new part:

"PART G—COMMUNITY EDUCATION EMPLOYMENT CENTERS

"SEC. 361. SHORT TITLE.

"This part may be cited as the 'Community Education Employment Center Act of 1989'.

"SEC. 362. PURPOSE.

"It is the purpose of this part to establish and evaluate model high school community education employment centers to meet the education needs of low-income urban and rural youth by awarding grants to eligible recipients to establish community education employment centers to provide students with the education, skills, support services, and enrichment necessary to ensure—

"(1) graduation from secondary school;

"(2) successful transition from secondary schools to a broad range of postsecondary institutions; and

"(3) employment, including military service.

"SEC. 363. PROGRAM AUTHORIZED.

"(a) IN GENERAL.—The Secretary is authorized, in accordance with the provisions of this part, to make grants to eligible recipients having applications approved pursuant to section 10 to establish and operate not more than 10 community education employment centers nationwide.

"(b) GRANT PERIOD.—Grants awarded under this section may be for a period of 5 years.

"SEC. 364. PROGRAM REQUIREMENTS.

"Each eligible recipient receiving a grant under this part shall—

"(1) operate a community education employment center on an extended year and extended day basis;

"(2) establish a collegial working environment, with substantial opportunities for staff training and development and shared decisionmaking;

"(3) maintain small class sizes, and to the extent possible, maintain an average class size of 15 students or less;

"(4) have the option to organize community education and employment centers into one or more programs, specializing in different areas of study of particular interest and employment opportunities for the student population;

"(5) offer a broad array of secondary school coursework, including, to the extent possible—

"(A) English, mathematics, history, geography, biology, chemistry, physics, and computer science;

"(B) opportunities for student participation in a wide range of extracurricular activities, including community service and exploration, sports, fine and performing arts and tutorial study sessions;

"(C) a comprehensive vocational-technical education program developed through regular consultation with employer-labor panels, with knowledge of relevant industries, and which offers skills in planning, management, finances, technical and production skills, underlying principles of technology, labor and community issues, economic development and health, safety, and environment issues;

"(D) courses in health, nutrition, and parenting;

"(6) offer students on-site opportunities for assistance with career planning and decisionmaking, employability, entrepreneurial abilities, interpersonal communication skills, and remedial studies;

"(7) maintain an emphasis on the development of academic skills, regardless of student career objectives;

"(8) provide technical assistance and training to staff from other schools and local education agencies within the State who wish to replicate community education employment center capabilities; and

"(9) seek to utilize community organizations to provide support for educational activities and services to parents and students.

"SEC. 365. SUPPORT SERVICES REQUIREMENTS.

"Each eligible recipient receiving a grant under this part shall establish in each community education employment center a support system to coordinate services for students, including—

"(1) a comprehensive program of confidential guidance counseling, providing—

"(A) guidance for career and personal decisionmaking and postsecondary institution placement;

"(B) mentoring and referral to appropriate social services; and

"(C) an accessible counseling service to help parents to focus on the enhancement of student education;

"(2) an on-site job service office to offer students—

"(A) career guidance, development, and employment counseling, which provides information about a broad range of occupations and alternative career paths;

"(B) labor market information, job development, career testing, and occupational placement services for part-time and summer employment, internships, cooperative programs, and part-time and full-time employment opportunities upon graduation; and

"(C) assistance in arranging part-time employment, so long as such employment does not reduce academic performance;

"(3) assistance in arranging a summer program of work, education, or enrichment sessions;

"(4) to the extent possible, providing transportation to and from the community education employment center and part-time job sites; and

"(5) access to day care services for children of participating students.

"SEC. 366. PARENTAL AND COMMUNITY PARTICIPATION.

"(a) IN GENERAL.—Each eligible recipient receiving a grant under this part shall employ a parent/community coordinator to provide for the active and informed participation of parents and appropriate community representatives in each community education employment center by—

"(1) encouraging parents and students to make informed decisions in reviewing and selecting the choice of community education employment center programs for their children;

"(2) conducting regular parent seminars to—

"(A) inform parents about community education employment center operations;

"(B) obtain parent input; and

"(C) disseminate information on how parents can encourage student performance;

"(3) providing the parents of each student with a regular opportunity to meet with counselors, teachers, and the student to discuss student progress, plans, and needs;

"(4) providing a range of roles in which parents may work with students at home or as class assistants or volunteer coordinators;

"(5) establishing an advisory Council of Advisors (hereinafter referred to as the 'Council') consisting of one individual representing each of the following entities:

"(A) the local educational agency;

"(B) the State Council on vocational education, and for the State agency responsible for secondary vocational education;

"(C) the student body;

"(D) the local teacher organization;

"(E) guidance counselors;

"(F) community-based organizations; and

"(G) parents.

"(b) FUNCTIONS OF THE COUNCIL.—(1) The Council shall provide recommendations to, and work with, eligible recipients to—

"(A) establish annual community education employment center priorities, programs, and procedures;

"(B) establish student selection criteria to ensure that all students in the school district have an equal opportunity to attend the community education employment center and that participants will be representative of the secondary school population in the school district;

"(C) promulgate a student code of conduct that shall be developed in consultation with the students and teachers;

"(D) assist in the selection of the community education employment center principal, administrators, department chairpersons, and teachers;

"(E) assist in the selection and application of assessment tools for continuous evaluation of student learning progress; and

"(F) make recommendations for the selection of curriculum textbooks, software, and other learning resources and equipment.

"SEC. 367. PROFESSIONAL STAFF.

"(a) IN GENERAL.—Each eligible recipient receiving a grant under this part shall only employ professional staff who demonstrate the highest of academic, teaching, guidance, or administrative standards.

"(b) TEACHERS.—(1) Each eligible recipient receiving a grant under this part shall ensure that community education employment center teachers receive inservice training at least annually in techniques, procedures and policies relevant to the community education employment center.

"(2) Each eligible recipient receiving a grant under this part shall employ a sufficient number of full-time certified or li-

censed guidance and career counselors to assist, enhance and monitor student progress.

"SEC. 368. ELIGIBILITY AND APPLICATIONS.

"(a) ELIGIBILITY.—An eligible recipient shall be eligible to receive a grant under this part if—

"(1) the eligible recipient is located in or serves one or more local educational agencies that are eligible for assistance under section 1006 of the Elementary and Secondary Education Act of 1965;

"(2) the eligible recipient demonstrates that it will serve a student population which is predominantly educationally and economically disadvantaged.

"SEC. 369. APPLICATION.

"(a) APPLICATION REQUIRED.—Each eligible recipient desiring to participate in the demonstration grant program authorized by this part, shall prepare and submit an application to the Secretary at such time, in such manner, and containing or accompanied by such information as the Secretary may require.

"(b) CONTENTS OF APPLICATION.—Each application submitted pursuant to subsection (a) shall—

"(1) demonstrate that the area where the center is to be located has a high concentration of children from low-income families, relative to the county and State as a whole;

"(2) describe the activities and services for which assistance is sought;

"(3) provide assurances that the eligible recipient will comply with the provisions of sections 364, 365, 366, 367, and 368;

"(4) contain assurances that the State and local educational agency will, in any fiscal year, at least supply the same fiscal effort per student with respect to the free provision of public education to community education employment center students as such local educational agency provides for students attending secondary school in such local educational agency;

"(5) utilize funding available from appropriate employment, training, and education programs in the State;

"(6) contain assurances that the community education employment center will coordinate the operations of such center to help meet local economic needs; and

"(7) provide such additional assurances as the Secretary may reasonably require.

"SEC. 370. EVALUATION AND REPORT.

"(a) LOCAL EVALUATION.—Each community education employment center shall submit annually to the Secretary a comprehensive and continuous evaluation of student learning progress, including—

"(1) academic and vocational competencies;

"(2) dropout rates;

"(3) information concerning employment and earnings while the students are attending a community education employment center and upon the graduation of such students from such center;

"(4) information concerning student attendance at postsecondary institutions or student enlistment into military service upon the graduation of such students from the community employment education center; and

"(5) parental, student and community participation in the activities of the community employment education center.

(b) REPORT.—The Secretary shall report to the Congress on the evaluations submitted pursuant to subsection (a) by October 1, 1995.

"SEC. 371. DEFINITIONS.

"As used in this part—

"(1) the term 'eligible recipient' means a secondary school or an area vocational school; and

"(2) the term 'parent' includes a legal guardian or other person standing in loco parentis.

"SEC. 372. AUTHORIZATION OF APPROPRIATIONS.

"There are authorized to be appropriated $16,000,000 for fiscal year 1991 and each of the fiscal years 1992, 1993, 1994, and 1995 to carry out the provisions of this part.".

TITLE IV—NATIONAL PROGRAMS

SEC. 401. RESEARCH ACTIVITIES.

Section 402 of the Act is amended—

(1) in subsection (a) by striking "National Institute of Education or any other division of the Department of Education which the Secretary determines to be appropriate" and inserting "Office of Educational Research and Improvement";

(2) in subsection (a)(1) by striking "individuals who are single parents or homemakers" and inserting "single parents, displaced homemakers, single pregnant women";

(3) by amending subsection (b) to read as follows:

"(b) In addition, the Secretary shall support meritorious, unsolicited research proposals from individual researchers, community colleges, State advisory councils, and State and local educators relating to the goals of this Act.";

(4) in paragraph (1) of subsection (d) by striking "(1)"; and

(5) by striking paragraph (2) of subsection (d).

SEC. 402. NATIONAL ASSESSMENT.

(a) AMENDMENT TO TITLE.—The heading to section 403 of the Act is amended by striking "PROGRAMS ASSISTED UNDER THIS ACT".

(b) AMENDMENT TO TEXT.—Section 403 of the Act is amended to read as follows:

"SEC. 403. (a)(1) The Secretary shall conduct a national assessment of vocational education programs assisted under this Act, through studies and analyses conducted independently through competitive awards.

"(2) The Secretary shall appoint an independent advisory panel, consisting of vocational education administrators, educators, researchers, representatives of business, industry, labor, and other relevant groups, to advise the Secretary on the implementation of such assessment, including the issues to be addressed, the methodology of the studies, and the findings and recommendations. The panel, at its discretion, may submit to the Congress an independent analysis of the findings and recommendations of the assessment. The application of the Federal Advisory Committee Act is waived for the provisions of this paragraph.

"(b) The assessment required under subsection (a) shall include descriptions and evaluations of—

"(1) the effect of this Act on State and Tribal administration of vocational education programs and on local vocational education practices, including the capacity of State, Tribal, and local vocational education systems to address the priorities identified in this Act;

"(2) expenditures at the Federal, State, Tribal, and local levels to address program improvement in vocational education, including the impact of Federal allocation requirements (such as within-State allocation formulas) on the delivery of services;

"(3) preparation and qualifications of teachers of vocational and academic curricula in vocational education programs, as well as shortages of these teachers;

"(4) participation in vocational education programs, including, in particular, access of special populations identified in this Act to high-quality vocational education programs and the impact, on the delivery of services to these populations, of Federal legislation giving States flexibility in allocating funds to serve these populations;

"(5) academic and employment outcomes of vocational education, including analyses of—

"(A) the impact of educational reform on vocational education;

"(B) the extent and success of integration of academic and vocational curricula;

"(C) the success of the school-to-work transition; and

"(D) the degree to which vocational training is relevant to subsequent employment;

"(6) employer involvement in, and satisfaction with, vocational education programs;

"(7) the impact of performance standards and other measures of accountability on the delivery of vocational education services;

"(8) the impact of Federal requirements regarding criteria for services to special populations identified in this Act, participatory planning in the States, and articulation between secondary and postsecondary programs; and

"(9) coordination of services under this Act, the Adult Education Act, the Family Support Act of 1988, the Job Training Partnership Act, the National Apprenticeship Act, the Rehabilitation Act of 1973, and the Wagner-Peyser Act.

"(c) The Secretary shall consult with the Committee on Labor and Human Resources of the Senate and the Committee on Education and Labor of the House of Representatives in the design and implementation of the assessment required under subsection (a). The Secretary shall submit an interim report no later than January 1, 1994, to the Congress. The Secretary shall submit a final report, summarizing all studies and analyses completed after the assessment, to the Congress not later than July 1, 1994. Notwithstanding any other provision of law or regulation, such reports shall not be subject to any review outside of the Office of Educational Research and Improvement before their transmittal to the Congress, but the President, the Secretary, and the independent advisory council established under subsection (a)(2) may make such additional recommendations to the Congress with respect to the assessment as they deem appropriate.".

SEC. 403. OFFICE OF EDUCATIONAL RESEARCH AND IMPROVEMENT.

(a) AMENDMENT TO TITLE.—The heading to section 404 of the Act is amended by striking "CENTER" and inserting "CENTERS".

(b) AMENDMENT TO TEXT.—Section 404 of the Act is amended to read as follows:

"SEC. 404. (a)(1) The Office of Educational Research and Improvement shall conduct a competition for the establishment and operation of 3 or more vocational education research centers (hereinafter referred to as the 'National Centers') of which—

"(A) one National Center shall be a research center on Native American education;

"(B) one National Center shall be a research center which conducts applied research and provides technical assistance for vocational education and training programs serving youths and adults; and

"(C) one National Center shall have as its primary purpose conducting applied research and providing comprehensive direct technical assistance and outreach activities

to enhance the ability of personnel in the fields of vocational education and training to deliver programs that meet the needs of learners and the workplace.

"(2) Each entity selected to establish and operate a National Center pursuant to paragraph (1) shall operate such National Center for a period of 5 years.

"(3) Beginning after December 31, 1992, the Office of Educational Research shall award an annual grant to each National Center selected pursuant to paragraph (1) for each of the five years such National Center is operated. After the third year in which a National Center receives a grant under this section the Secretary shall review the research priorities of such National Center.

"(4) Each National Center may reserve not more than 10 percent of the grant awarded in each fiscal year for the purposes of addressing field-initiated projects which had not been foreseen in submitting the annual budget described in subsection (c).

"(5) Each National Center shall appoint a Director for such National Center.

"(b) The Secretary shall continue to honor the provisions of the grant awarded to the National Center for Research in Vocational Education located in Berkeley, California, through December 31, 1992.

"(c) Each entity desiring to establish and operate a National Center shall submit an application for each fiscal year to the Office of Educational Research and Improvement at such time, in such manner, and accompanied by such information as the Office of Educational Research and Improvement may require. Each such application shall—

"(1) describe the activities and services for which assistance is sought;

"(2) contain an annual budget; and

"(3) contain such additional assurances as are necessary to ensure compliance with the provisions of this section.

"(d) The National Centers shall, directly or through contracts, conduct research and development projects and programs with other public agencies and public or private institutions of higher education. The National Centers shall disseminate information on the results of the research and development activities funded by the National Center as well as other available research. The National Centers shall conduct applied research and development on—

"(1) economic changes that affect the skills which employers seek and entrepreneurs need;

"(2) integration of academic and vocational education;

"(3) efficient and effective practices for addressing the needs of special populations described in section 223;

"(4) efficient and effective methods for delivering vocational education;

"(5) articulation of school and college instruction with high quality work experience;

"(6) recruitment, education, and enhancement of vocational teachers and other professionals in the field; and

"(7) such other topics as the Secretary may designate.

"(e) The National Center described in subsection (a)(1)(C) shall give priority to projects, programs, and activities which include—

"(1) teacher and administrator training and leadership development;

"(2) technical assistance to programs serving special populations described in section 223;

"(3) needs assessment, design, and implementation of new and revised programs, with related curriculum materials; and

"(4) evaluation and follow-through to maintain and extend quality programs.

"(f) The National Center described in subsection (a)(1)(A) shall conduct research on the educational participation, needs and performance of Native Americans. The Center shall consider teaching and learning for Native American students from childhood through adulthood. Specific priorities shall include, but not be limited to—

"(1) early childhood education;

"(2) home, family, and cultural influences on education;

"(3) vocational education and training, particularly services for special populations described in section 223; and

"(4) participation in postsecondary education, especially the factors that limit participation of Native Americans.

"(g) For the purposes of this section, the term 'Native American' includes American Indians, Native Alaskans, Native Hawaiians, and indigenous people of the Pacific Basin including American Samoans.".

(c) The amendment made by subsection (b) shall not affect contracts made by the National Center for Research in Vocational Education prior to the date of enactment of this Act.

SEC. 404. FORMULA STUDY.

Part A of title IV of the Act is amended by inserting at the end thereof the following new section:

"STUDY OF CARL D. PERKINS VOCATIONAL EDUCATION ACT FORMULA

"SEC. 405. (a) The Secretary shall, through grant or contract conduct a study of the distribution of Federal vocational education funds to the States. The study shall consider the distributional effects of the within State allocation formula set forth in section 102 including the age cohorts and the per capita income allotment ratios and shall also examine the impact that various other factors such as State tax capacity, tax effort, per capita income, poverty and educational achievement, could have in achieving the Federal goals and policy objectives of this Act. The study shall specifically address the appropriate distribution mechanism to serve the target populations of the Act.

"(b) The study shall explore the use of other possible methods of targeting funds to special populations of the Act, particularly the economically disadvantaged, including but not limited to the poverty rate of the school-aged population, the gross State product per school-aged child, relative tax capacity, and tax effort of the State, unemployment figures, and dropout rates.

"(c) The findings of the study shall be used to formulate recommendations on the most appropriate criteria and methods to direct Federal funds to the States and to achieve the Federal goals and policy objectives of this Act.

"(d) The study required under subsection (a) shall be completed by January 1, 1994.".

SEC. 405. DEMONSTRATION PROGRAMS.

Part B of title IV of the Act is amended to read as follows:

"PART B—DEMONSTRATION PROGRAMS

"PROGRAMS AUTHORIZED

"SEC. 411. (a) From amounts available for this part pursuant to section 101(a)(1)(A) in each fiscal year the Secretary shall reserve—

"(1) 5 percent for demonstration programs in accordance with the provisions of section 416; and

"(2) 20 percent for demonstration programs in accordance with the provisions of section 419.

"(b) From the remainder of funds available under section 101(a)(1)(A) for this part, the Secretary shall make demonstration grants in accordance with the provisions of this part.

"DEMONSTRATION PROJECTS FOR THE INTEGRATION OF VOCATIONAL AND ACADEMIC LEARNING

"SEC. 412. (a) The Secretary is authorized to make grants to institutions of higher education, area vocational schools, local educational agencies, secondary schools funded by the Bureau of Indian Affairs, State boards, public or private nonprofit organizations, or any consortia thereof, to develop, implement and operate programs using different models of curricula which integrate vocational and academic learning by—

"(1) designing integrated curricula and courses;

"(2) providing inservice training for teachers and administrators in integrated curricula; and

"(3) disseminating information regarding effective integrative strategies to other school districts through the National Diffusion Network;

"(b) In awarding grants under this section, the Secretary shall ensure—

"(1) an equitable geographic distribution of funds awarded pursuant to this section;

"(2) that programs supported under this section offer significantly different approaches to integrating curricula;

"(3) that the programs supported under this section serve special populations;

"(4) that programs supported under this section serve—

"(A) vocational students in secondary schools and at postsecondary institutions;

"(B) individuals enrolled in adult programs; and

"(C) single parents, displaced homemakers, and single pregnant women; and

"(5) that adequate evaluation measures will be employed to measure the effectiveness of the curriculum approaches supported under this section.

"BUSINESS, INDUSTRY AND LABOR PARTNERSHIPS

"SEC. 413. (a) The Secretary is authorized to make grants to partnerships among—

"(1) an area vocational school, a State agency, a local educational agency, a secondary school funded by the Bureau of Indian Affairs, an institution of higher education, a State correctional education agency or an adult learning center; and

"(2) business, industry, labor, or apprenticeship programs.

"(b) Grants awarded under this section may be used to—

"(1) increase the access to, and quality of, programs for the special populations who are described in section 223;

"(2) strengthen coordination between vocational education programs, and the labor and skill needs of business and industry;

"(3) address the economic development needs of the area served by the partnership;

"(4) provide training and career counseling that will enable workers to retain their jobs;

"(5) provide training and career counseling that will enable workers to upgrade their jobs; and

"(6) address the needs of new and emerging industries, particularly those in high-technology fields.

"(c)(1) In awarding grants under this section, the Secretary shall give priority to

partnerships whose programs provide job training in areas or skills where there are significant labor shortages.

"(2) In awarding grants under this section, the Secretary shall ensure an equitable geographic distribution of funds awarded pursuant to this section.

"MODEL PROGRAMS OF REGIONAL TRAINING FOR SKILLED TRADES

"SEC. 414. (a) The Secretary is authorized to make grants to regional model centers which provide—

"(1) training for skilled tradesmen within a region serving several States, and

"(2) technical assistance for programs which train such tradesmen within a region serving several States.

"(b) The regional model centers described in subsection (a) shall—

"(1) provide training and career counseling for skilled tradesmen in areas of skill shortages or projected skilled shortages;

"(2) provide prejob and apprenticeship training and career counseling in skilled trades;

"(3) upgrade specialized craft training; and

"(4) improve the access of women, minorities, economically disadvantaged individuals, individuals with disabilities and ex-criminal offenders to trade occupations and training.

"(c) In awarding grants under this section, and to the extent practicable, the Secretary shall ensure an equitable distribution of funds available under this section to the various skilled trades.

"BLUE RIBBON VOCATIONAL EDUCATION PROGRAMS

"SEC. 415. (a) The Secretary shall disseminate information and exemplary materials regarding effective vocational education.

"(b) The Secretary shall, in consultation with the National Centers for Research in Vocational Education (hereafter in this section referred to as the 'National Centers for Research'), the National Diffusion Network, and the Blue Ribbon Schools Program, carry out programs to recognize secondary and postsecondary schools or programs which have established standards of excellence in vocational education and which have demonstrated a high level of quality, to be known as 'Blue Ribbon Vocational Programs'. The Secretary shall competitively select schools and programs to be recognized from among public and private schools or programs within the States and schools funded by the Department of the Interior.

"(c)(1) The Secretary, in consultation with the National Centers for Research and the National Occupational Information Coordinating Committee (hereafter in this section referred to as the 'Committee'), shall designate each fiscal year a category or several categories of vocational education, which may include technology preparation education, in which Blue Ribbon Vocational Education Program awards will be named. Such categories shall emphasize the expansion or strengthening of the participation of special populations and may give special consideration to any of the following:

"(A) program improvement;

"(B) academic and occupational competencies; and

"(C) other categories determined by the Secretary in consultation with the National Centers for Research and the Committee.

"(2) Within each category, the Secretary shall determine the criteria and procedures for selection. Selection for such awards shall be based solely on merit. Schools or programs selected for awards under this section shall not be required to be representative of the States.

"(d)(1) The Secretary shall carry out the provisions of this section, including the establishment of the selection procedures, after consultation with appropriate outside parties.

"(2) No award may be made under this section unless the local educational agency, area vocational school, intermediate educational agency, Bureau of Indian Affairs, or appropriate State agency with jurisdiction over the school or program involved submits an application to the Secretary at such time, in such manner and containing such information as the Secretary may reasonably require.

"MATERIALS DEVELOPMENT IN TELECOMMUNICATIONS

"SEC. 416. (a) From amounts reserved under section 411(a)(1) the Secretary is authorized to make grants to nonprofit educational telecommunications entities to pay the Federal share of the costs of the development, production, and distribution of instructional telecommunications materials and services for use in local vocational and technical educational schools and colleges.

"(b)(1) The Federal share of the cost of each project assisted under this section shall be 50 percent.

"(2) The non-Federal share of the cost of each project assisted under this section shall be provided from non-Federal sources.

"(c) Grants awarded pursuant to this section may be used to provide—

"(1) a sequential course of study that includes either preproduced video courseware or direct interactive teaching delivered via satellite, accompanied by a variety of print and computer-based instructional materials;

"(2) the development of individual videocassettes or a series of videocassettes that supplement instruction, which shall be distributed both via broadcast and nonbroadcast means;

"(3) videodiscs that produce simulated hands-on training; and

"(4) teacher training programs for vocational educators and administrators and correctional educators.

"(d) In awarding grants under this section the Secretary shall give priority to programs or projects which serve—

"(1) students in area vocational and technical schools;

"(2) teachers, administrators, and counselors in need of training or retraining;

"(3) out of school adults in need of basic skills improvement or a high school equivalency diploma to improve such individual's employability;

"(4) college students, particularly those working toward a 2-year associate degree from a technical or community college;

"(5) workers in need of basic skills, vocational instruction, or career counseling to retain employment; and

"(6) workers who need to upgrade their skills to obtain jobs in high growth industries.

"PROFESSIONAL DEVELOPMENT

"SEC. 417. (a) The Secretary shall make grants to institutions of higher education, State educational agencies or State correctional education agency for teacher education, career counselor education, and professional development.

"(b) Grants awarded pursuant to this section shall be used for—

"(1) leadership development stipends for experienced vocational educators to participate in advanced study of vocational education;

"(2) teacher education fellowships for individuals who are—

"(A) currently employed in vocational education who need to update or maintain currency in their technological skills;

"(B) employed in agriculture, business, or industry who have skills and experiences in vocational fields for which there is a need for vocational educators; or

"(C) certified teachers with skills related to vocational fields who can be trained as vocational educators, especially minority instructors and those with experience in teaching the economically disadvantaged, individuals with disabilities, students with limited English proficiency, and criminal and juvenile offenders; and

"(3) internships for gifted and talented vocational education students to intern in Federal and State agencies, vocational education research centers, or recognized vocational education associations.

"(c) In carrying out this section, the Secretary shall, based on information from the National Occupation Information Coordinating Committee and other appropriate sources, publish a listing of—

"(1) the areas of vocational education which are in need of additional personnel; and

"(2) the areas of teaching in which technological upgrading may be especially critical.

"EDUCATIONAL PROGRAMS FOR FEDERAL CORRECTIONAL INSTITUTIONS

"SEC. 418. (a) The Secretary is authorized to make grants to Federal correctional institutions in consortia with educational institutions, community-based organizations of demonstrated effectiveness, or the private sector, to provide education and training for criminal offenders in such institutions.

"(b) Grants awarded pursuant to this section may be used for—

"(1) basic education programs with an emphasis on literacy instruction;

"(2) vocational training programs;

"(3) guidance and counseling programs; and

"(4) supportive services for criminal offenders, with special emphasis on the coordination of educational services with agencies furnishing services to criminal offenders after such offenders are released from incarceration.

"VOCATIONAL EDUCATION LIGHTHOUSE SCHOOLS

"SEC. 419. (a) From amounts reserved under section 411(a)(2) the Secretary shall make grants to local schools to establish and operate vocational education lighthouse schools.

"(b) Grants awarded under this subsection shall be used to establish vocational education lighthouse schools which—

"(1) serve as a model vocational education program—

"(A) to provide each student with knowledge of, and experience in, all aspects of the industry or enterprise the student is preparing to enter;

"(B) to provide each student with basic and higher order skills and develop the student's problem solving abilities in a vocational setting;

"(C) to offer exceptionally high quality programs for disadvantaged and minority students;

"(D) to provide the special services and modifications necessary to help individual students successfully complete the program;

"(E) which is planned, developed and implemented with the participation of staff, local employers and local community; and

"(F) which offers a full range of programs, including comprehensive career guidance and counseling, for students who plan to seek employment upon graduation or who will enroll in a 2- or 4-year college;

"(2) provide information and assistance to other grant recipients, vocational programs, vocational education personnel, parents, students, other educators, community members and community organizations throughout the State regarding—

"(A) curriculum materials;

"(B) curriculum development, especially the integration of vocational and academic education;

"(C) inservice and preservice staff development, training and assistance, through off-site activities and through a range of short-term and long-term opportunities to participate in activities at the demonstration site;

"(D) opportunities to systematically observe the model program; and

"(E) technical assistance and staff development as appropriate.

"(3) use funds received under this section, together with funds from non-Federal sources, to develop and implement model programs containing the elements described in paragraph (1);

"(4) develop comprehensive linkages with other local schools, community colleges, 4-year colleges, private vocational schools, community-based organizations, labor unions, employers, and other business groups, as appropriate; and

"(5) develop and disseminate model approaches—

"(A) for meeting the education training needs and career counseling needs of minority, disadvantaged, disabled, and limited English-proficient students, and

"(B) to reduce and eliminate sex bias and stereotyping.

"CAREER AND GUIDANCE COUNSELING PROGRAMS

"SEC. 420. (a)(1) The Secretary is authorized to make grants to State boards for programs designed to improve, expand, and extend career guidance and counseling programs, to meet the career development, vocational education, and employment needs of vocational education students and potential vocational education students. Such program shall be designed to assist individuals to—

"(A) acquire self-assessment, career planning, career decisionmaking, and employability skills;

"(B) make the transition from education and training to work;

"(C) maintain marketability of current job skills in established occupations;

"(D) develop new skills to move away from declining occupational fields and enter new and emerging fields in high-technology areas and fields experiencing skill shortages;

"(E) develop midcareer job search skills and to clarify career goals; and

"(F) obtain and use information on financial assistance for postsecondary and vocational education and job training.

"(2) Programs assisted under paragraph (1) shall be organized and administered by certified counselors.

"(b) The programs authorized by this section shall include services and activities to ensure the quality and effectiveness of career guidance and counseling, including, but not limited to, career information delivery system development and implementation, and the establishment of student/client outcome standards against which the effectiveness of future career guidance and counseling programs can be measured.

"DROPOUT PREVENTION

"SEC. 420A. (a) The Secretary is authorized to make grants to partnerships between—

"(1) local educational agencies or area vocational schools; and

"(2) institutions of higher education and/or public or private nonprofit organizations which have an established record of vocational education strategies that prevent students from dropping out of school.

"(b) Grants awarded under this section shall be used to develop, implement, and operate vocational education programs designed to prevent students from dropping out of school. Such programs shall—

"(1) serve special populations, including significant numbers of economically disadvantaged dropout-prone youth;

"(2) provide inservice training for teachers and administrators in dropout prevention; and

"(3) disseminate information relating to successful dropout prevention strategies and programs through the National Dropout Prevention Network and the ERIC Center on Adult, Career and Vocational Education.

"(c) In awarding grants under this section, the Secretary shall give priority to partnerships which—

"(1) provide the special support services necessary to help individual students successfully complete the program such as mentoring, basic skills education, and services which address barriers to learning; and

"(2) utilize measures to integrate basic and academic skills instruction with work experience and vocational education.".

SEC. 407. DATA SYSTEMS AUTHORIZED.

Section 421 of the Act is amended to read as follows:

"SEC. 421. (a)(1) The Secretary shall, directly, or by grant, contract or cooperative agreement, implement and develop a vocational educational data system (hereafter in this section referred to as the 'system') using comparable information elements and uniform definitions, to the extent practicable.

"(2) The Secretary shall establish the system not later than 6 months after the enactment of this Act.

"(3) The National Center for Education Statistics (hereafter in this section referred to as the 'National Center') shall coordinate the development and implementation of the system.

"(b) Through the system, the Secretary shall collect and analyze data in order to provide—

"(1) the Congress with information relevant to policy making, and

"(2) Federal, State and local agencies and Tribal agencies with information relevant to program management, administration and effectiveness with respect to education and employment opportunities.

"(c)(1)(A) The system shall include information—

"(i) describing the major elements of the vocational education system on at least a national basis, including information with respect to teachers, administrators, students, programs, and to the extent practicable, facilities and equipment; and

"(ii) describing the condition of vocational education with respect to the elements described in clause (i).

"(B) The information described in subparagraph (A) shall be provided, to the extent practicable, in the context of other educational data relating to the condition of the overall education system.

"(C) The Secretary, in consultation with the Task Force described in subsection (g), the National Center, and the Office of Adult and Vocational Education (hereafter in this section referred to as the "Office"), shall modify existing general purpose and program data systems to ensure that an appropriate vocational education component is included in their design, implementation and reporting in order to fulfill the information requirements of this section.

"(2) The information system shall include data reflecting the extent of participation of the following populations:

"(A) economically disadvantaged students (including information on students in rural and urban areas);

"(B) individuals with disabilities;

"(C) individuals of limited English proficiency;

"(D) individuals who participate in programs designed to eliminate gender bias and sex stereotyping in vocational education;

"(E) adults who are in need of training and retraining;

"(F) youths incarcerated in juvenile detention or correctional facilities or criminal offenders who are serving time in correctional institutions;

"(G) single parents and displaced homemakers; and

"(H) minorities.

"(3) The Secretary, through the National Center and the Office, shall maintain and update the system at least every 3 years and ensure that the system provides the highest quality statistics and is adequate to meet the vocational education information needs of this Act. In carrying out the requirements of this paragraph, the Secretary shall ensure that appropriate methodologies are used in assessments of students of limited English proficiency and students with handicaps to ensure valid and reliable comparisons with the general student population and across program areas. With respect to standardized tests and assessments administered under this Act, test results shall be used as 1 of multiple independent indicators in assessment of performance and achievement.

"(d) The Center shall carry out an assessment of data availability and adequacy with respect to international competitiveness in vocational skills. To the extent practicable, the assessment shall include comparative policy-relevant data on vocational education in nations that are major trade partners of the United States. The assessment shall at a minimum identify available internationally comparative data on vocational education and options for obtaining and upgrading such data. The results of the assessment required by this paragraph shall be reported to the appropriate committees of the Congress not later than August 31, 1994.

"(e)(1) In establishing, maintaining, and updating the system, the Secretary shall—

"(A) use existing data collection systems operated by the Secretary and, to the extent appropriate, data collection systems operated by other Federal agencies;

"(B) conduct additional data collection efforts to augment the data collection systems described in subparagraph (A) by providing information necessary for policy analysis required by this section; and

"(C) use any independent data collection efforts that are complementary to the data collection efforts described in subparagraphs (A) and (B).

"(2) In carrying out the responsibilities imposed by this part, the Secretary shall cooperate with the Secretary of Commerce, the Secretary of Labor, and the National Occupational Information Coordinating Committee established under section 422 of this Act with respect to the development of an information system under section 463 of the Job Training Partnership Act to ensure that the information system operated under this section is compatible with and complementary to other occupational supply and demand information systems developed or maintained with Federal assistance. The Secretary shall also ensure that, to the extent feasible, the system allows international comparisons.

"(3) The Secretary shall ensure that the system, to the extent practicable, uses data definitions common to State plans, performance evaluations, and other evaluations required by this Act. The data in the system shall be available for use in preparing such plans, standards, applications, and evaluations.

"(f) The Secretary shall report to the Congress at least biennially with respect to—

"(1) the performance of the system established under subsection (a); and

"(2) strategies to improve the system and expand its implementation.

"(g)(1) The Secretary, in consultation with the National Center and the Office, shall convene a vocational education data task force (hereafter in this section referred to as the 'Task Force').

"(2) The Secretary shall establish the Task Force before the expiration of the 90-day period beginning on the date of the enactment of this Act, and shall terminate upon the expiration of the 2-year period beginning on such date.

"(3) The Task Force shall advise the Secretary on the development and implementation of an information reporting and accounting system responsive to the diverse programs supported by this Act.

"(4) The membership of the Task Force shall be representative of Federal, State, and local agencies and Tribal agencies affected by technological information, representatives of secondary and postsecondary vocational institutions, representatives of vocational education student organizations, representatives of special populations described in section 223, representatives of adult training programs funded under this Act, and representatives of apprenticeships, business, and industry.

"(5) The National Center shall provide the Task Force with staff for the purpose of carrying out its functions.

"(h) As a regular part of its assessments, the National Assessment of Educational Progress shall collect and report information for at least a nationally representative subsample of vocational education students, including students who are members of special populations, which shall allow for fair and accurate assessment and comparison of the educational achievement of vocational education students and other students in the areas assessed. Such assessment may include international comparisons.".

SEC. 408. NATIONAL OCCUPATIONAL INFORMATION COORDINATING COMMITTEE.

(a) AMENDMENT TO TITLE.—The heading for section 422 of the Act is amended to read as follows:

"NATIONAL OCCUPATIONAL INFORMATION COORDINATING COMMITTEE".

(b) AMENDMENT TO TEXT.—Section 422 of the Act is amended—

(1) in subsection (a)—

(A) by inserting after "Coordinating Committee" the following: "(hereafter in this section referred to as the 'Committee')";

(B) by inserting after "Office of Bilingual Education and Minority Language Affairs," the following: "the Assistant Secretary for Post Secondary Education,";

(C) by striking "(Manpower, Reserve Affairs, and Logistics)" and inserting "(Force Management and Personnel)";

(D) in paragraph (2), by inserting before the semicolon the following: "including regularly updated data on employment demand for agribusiness";

(E) in paragraph (3)—

(i) by striking "conduct studies on" and inserting the following: "conduct studies to improve the quality and delivery of occupational information systems to assist economic development activities, and examine"; and

(ii) by striking "and" at the end thereof;

(F) by redesignating paragraph (4) as paragraph (6); and

(G) by inserting after paragraph (3) the following new paragraphs:

"(4) continue training, technical assistance activities to support comprehensive career guidance, and vocational counseling programs designed to promote improved career decisionmaking by individuals (especially in areas of career information delivery and use);

"(5) coordinate the efforts of Federal, State, and local agencies and Tribal agencies with respect to such programs; and";

(2) by adding at the end thereof the following new subsections:

"(c)(1) The Committee, in consultation with the National Centers for Research in Vocational Education, appropriate Federal agencies, and the States, shall establish a demonstration program to monitor educational outcomes for vocational education using wage and other records. The Committee shall develop procedures for establishing and maintaining nationally accessible information on a sample of wage and earning records maintained by States on earnings, establishment and industry affiliation and geographical location, and on educational activities. This information shall be collected on at least an annual basis. The program shall ensure that a scientific sample of vocational education students and nonvocational education students, local educational agencies, and States participate in the program. The Committee shall maintain, analyze, and report data collected under the program and shall provide technical assistance to States, local educational agencies, and others that wish to participate in the study.

"(2) The program shall provide for an independent evaluation conducted by the Office of Technology Assessment of the Congress to assess the validity, fairness, accuracy, and utility of the data it produces. The report shall also describe the technical problems encountered and a description of what was learned about how to best implement and utilize data from the program.

"(3) The provision of wage and other records to the Committee by a State employment security agency shall be voluntary and pursuant to an agreement between the Committee and the agency. Such agreement shall take into consideration issues such as—

"(A) reimbursing the State employment security agency for the costs to the agency of providing the information; and

"(B) compliance with safeguards established by the State employment security agency and determined by the Secretary of Labor to be appropriate to insure that the information disclosed to the Committee is used only for the purposes of this subsection.

"(4) The Executive Director of the Committee, in consultation with the Secretary, shall ensure that all personally identifiable information about students, their educational performance and their families and information with respect to individual schools shall remain confidential in accordance with the provisions of section 552 of title 5, United States Code. The data gathered under this subsection shall not be used to rank, compare, or otherwise evaluate individual students or individual schools. No individual may be included in the program without that individual's written consent. At least once every 3 years the Secretary shall remind participants in writing of their inclusion in the program.

"(d) Of the amounts available pursuant to section 3(e) for each fiscal year for this part, 22 percent shall be reserved to carry out the provisions of this section. Of such amounts, the Committee shall use—

"(1) to support State occupational information coordinating committees for the purpose of operating State occupational information systems and career information delivery systems, the greater of—

"(A) amounts appropriated or otherwise made available for that purpose for the fiscal year 1989; and

"(B) an amount equal to not less than 75 percent of the amounts available to carry out this section; and

"(2) for purposes of carrying out subsection (c)—

"(A) an amount equal to not less than 10 percent of the amounts available to carry out this section; or

"(B) if the amount remaining after carrying out paragraph (1) is insufficient to provide the amount described in subparagraph (A), such remaining amount.".

SEC. 409. NATIONAL NETWORK FOR CURRICULUM COORDINATION IN VOCATIONAL AND TECHNICAL EDUCATION.

Part C of title IV of the Act is amended by adding at the end thereof the following new section:

"NATIONAL NETWORK FOR CURRICULUM COORDINATION IN VOCATIONAL AND TECHNICAL EDUCATION

"SEC. 424. (a) From the sums allocated to carry out this section, the Secretary shall establish through grants or contracts a National Network for Curriculum Coordination in Vocational and Technical Education consisting of six regional curriculum coordination centers. The Network shall encourage the designation of a State liaison representative in each of the States, and where appropriate, a Tribal liaison. It shall be the purpose of the Network to—

"(1) provide leadership and technical assistance in vocational and technical education curriculum design, development, and dissemination;

"(2) coordinate vocational and technical education curriculum information sharing among all the States, tribes, and the territories;

"(3) reduce duplication of effort in vocational and technical education curriculum development activities among the States, Tribes, and territories; and

"(4) promote the use of vocational and technical education curriculum research findings.".

SEC. 410. NATIONAL COUNCIL.

(a) APPOINTMENTS AND VACANCIES.—The first sentence of section 431(a)(2) of the Act is amended to read as follows: "The members of the Council shall be appointed and serve for such terms as the Council shall prescribe. A vacancy in the Council shall be filled in such manner as the Council shall prescribe".

(b) REPEAL.—Part D of title IV of the Act is repealed.

(c) EFFECTIVE DATES.—(1) The amendment made by subsection (a) shall take effect on September 30, 1991.

(2) The amendment made by subsection (b) shall take effect on October 1, 1992.

SEC. 411. GENERAL PROVISIONS.

Section 451 of the Act is amended to read as follows:

"SEC. 451. (a) Subject to the provisions of subsection (b), of the amounts available pursuant to section 3(e) for any fiscal year for this title—

"(1) 35 percent shall be available for part A, relating to research;

"(2) 33.5 percent shall be available for part B, relating to demonstration projects; and

"(3) 31.5 percent shall be available for part C, relating to vocational education in occupational information data systems.

"(b) From amounts available pursuant to subsection (a)(3)—

"(1) at least 3.5 percent of the total amount appropriated pursuant to the authority of section 3(e) shall be available in each fiscal year to carry out section 421; and

"(2) at least 1.75 percent of the total amount appropriated pursuant to the authority of section 3(e) shall be available in fiscal year 1991 to carry out the provisions of section 405, relating to the study of the within State allocation formula set forth in section 102;

"(3) at least 3.5 percent of the total amount appropriated pursuant to the authority of section 3(e) shall be available in each fiscal year to carry out the provisions of section 424.".

TITLE V—GENERAL PROVISIONS

SEC. 501. CERTIFICATION REQUIREMENTS.

(a) AMENDMENT TO TITLE.—The heading to section 502 of the Act is amended to read as follows:

"CERTIFICATION REQUIREMENTS".

(b) AMENDMENT TO TEXT.—Section 502 of the Act is amended to read as follows:

"SEC. 502. (a) As part of the State plan required by section 113, each State board desiring to receive assistance under this Act shall—

"(1) provide assurances that the State board, or local educational agencies within the State, will not engage in discrimination based upon race, religion, color, national origin, sex, or handicap in the hiring, promotion, or assignment of employees of such State board, such local educational agencies or other personnel for whom such State board or such local educational agencies have any administrative responsibility;

"(2) provide assurances that the State board or the local educational agencies within the State will not engage in discrimination based upon race, religion, color, national origin, sex, or handicap in the enrollment of students in schools or in courses of instruction within schools of such State board or such local educational agencies except to carry out the approved plan; and

"(3) to provide assurances that the State board or local educational agencies within the State will not engage in discrimination based upon race, religion, color, national origin, sex, or handicap in designing or operating extracurricular activities for students.

"(b) No plan may be approved under section 113 unless the Secretary, through the Assistant Secretary of Education for Civil Rights, determines that the assurances described in paragraphs (1), (2), and (3) of subsection (a) will be met.".

SEC. 502. REGIONAL MEETINGS ON REGULATIONS.

Part A of title V of the Act is amended by inserting at the end thereof the following new sections:

"REGIONAL MEETINGS ON REGULATIONS

"SEC. 507. (a) The Secretary shall convene regional meetings to obtain public involvement in the development of proposed regulations under the Carl D. Perkins Vocational Education Act Amendments of 1989. Such meetings shall include individuals and groups involved in vocational education programs under this Act, such as Federal, State, Tribal and local administrators, parents, teachers, members of local boards of education and special populations described in section 223.

"(b) During each such meeting, the Secretary shall provide for a comprehensive discussion and exchange of information on at least 4 key issues, selected by the Secretary, concerning implementation of the Carl D. Perkins Vocational Education Act Amendments of 1989. The Secretary shall take into account information received at these meetings in the development of proposed regulations, and shall publish a summary of such information in the Federal Register together with such proposed regulations.

"(c) Once such regulations have been promulgated as final, the Secretary shall convene regional meetings to share information regarding implementation of the final regulations under the Carl D. Perkins Vocational Education Act Amendments of 1989. Such meetings shall include individuals and groups involved in vocational education under this Act, such as Federal, State, Tribal, and local administrators, parents, teachers, and members of local boards of education.

"FEDERAL MONITORING

"SEC. 508. The Secretary shall make every effort to provide adequate monitoring of compliance by recipients of assistance under this Act with the provisions of this Act. Such monitoring activities shall be developed by the Secretary in consultation with parents, students, and advocacy organizations, and shall—

"(1) consider items such as whether the provisions of the State plan are being fully implemented;

"(2) consider items such as whether the State board's monitoring of local recipients of assistance under this Act is adequate to assure full compliance with the provisions of this Act by such recipients;

"(3) consider items such as whether the State-level coordinators for each of the special populations described in section 223 are able to review the local plans for serving such special populations;

"(4) consider items such as whether the other State responsibilities under this Act are being implemented; and

"(5) provide for input from students, parents, teachers, and special populations in the States".

SEC. 503. DEFINITIONS.

Section 521 of the Act is amended—

(1) in paragraph (2), by striking "program";

(2) by amending paragraph (3) to read as follows:

"(3) The term 'area vocational education school' means—

"(A) a specialized high school used exclusively or principally for the provision of vocational education to individuals who are available for study in preparation for entering the labor market; or

"(B) the department of a high school exclusively or principally used for providing vocational education in no less than 5 different occupational fields to individuals who are available for study in preparation for entering the labor market; or

"(C) a school that offers both secondary and postsecondary instruction, but where secondary instruction is provided in no less than 5 different occupational fields to individuals who are available for study in preparation for entering the labor market.";

(3) by striking paragraph (10) and redesignating paragraphs (8) and (9) as paragraphs (9) and (10), respectively;

(4) by inserting the following new paragraph (8) after paragraph (7);

"(8) the term 'State correctional education agency' means the State agency or agencies responsible for carrying out correctional education programs in the State;

(5) by striking paragraphs (12), (13), and (14) and redesignating paragraphs (15), (16), and (17) as paragraphs (11), (12), and (13), respectively;

(6) in paragraph (12) (as redesignated in paragraph (4)) by striking the "term 'handicapped', when applied to individuals, means" and inserting "terms 'individual with a disability or individuals with disabilities' means";

(7) by inserting the following new paragraph (14) after paragraph (13) (as redesignated in paragraph (4)):

"(14) The term 'intermediate educational agency' means a combination of school districts or counties (as defined in section 1471(5) of the Elementary and Secondary Education Act of 1965) as are recognized in a State as an administrative agency for such State's vocational or technical education schools or for vocational programs within its public elementary or secondary schools. Such term includes any other public institution or agency having administrative control and direction over a public elementary or secondary school.";

(8) by redesignating paragraphs (18) through (32) as paragraphs (15) through (29), respectively; and

(9) by inserting the following new paragraphs at the end thereof:

"(30) the term 'all aspects of the industry' means strong experience in, and understanding of, all aspects of the industry the students are preparing to enter, including planning, management, finances, technical and production skills, underlying principles of technology, labor issues, and health and safety;

"(31) the term 'local eligible recipient' means a local educational agency, an area vocational school, and intermediate educational agency, or the State correctional education;

"(32) the term 'supplementary services' means curriculum modification, equipment modification, classroom modification, supportive personnel, and instructional aids and devices.

"(33) the term 'displaced homemaker' means an individual who—

"(A) is an adult; and

"(B)(i) has worked as an adult primarily without remuneration to care for the home

and family, and for that reason has diminished marketable skills;

"(ii) has been dependent on public assistance or on the income of a relative but is no longer supported by that income; or

"(iii) is a parent whose youngest dependent child will become ineligible to receive assistance under part A of title IV of the Social Security Act Aid to Families With Dependent Children within 2 years of the parent's application for assistance under this Act; or

"(iv) is unemployed or underemployed and is experiencing difficulty in obtaining any employment or suitable employment, as appropriate.

"(C) is described in subparagraph (A) or (B) and is a criminal offender;

"(34) the term 'prevocation services' means services, programs, or activities designed to assist individuals who are not enrolled in vocational education programs in the selection of, or preparation for participation in, an appropriate vocational education program, such as—

"(A) services, programs, or activities related to outreach to or recruitment of potential vocational education students;

"(B) career counseling and personal counseling;

"(C) vocational assessment and testing; and

"(D) other appropriate services, programs, or activities;

"(35) the term 'sequential course of study' means an integrated series of courses which are directly related to the educational and occupational skills preparation of individuals for jobs, or preparation for postsecondary education;

"(36) the term 'technology education' means an applied discipline designed to promote technological literacy which provides knowledge and understanding of the impacts of technology including its organizations, techniques, tools and skills to solve practical problems and extend human capabilities in areas such as construction, manufacturing, communication, transportation, power and energy; and

"(37) the term 'specific job training' means training and education for skills required by the employer that provides the individual student with the ability to obtain employment and to adapt to the changing demands of the workplace.".

TITLE VI—CORRECTIONAL EDUCATION

SEC. 601. SHORT TITLE.

This title may be cited as the "Office of Correctional Education Act of 1989".

SEC. 602. CORRECTIONAL EDUCATION.

Title II of the Department of Education Organization Act is amended by—

(1) redesignating section 214 as section 215; and

(2) inserting the following new section 214 after section 212:

"OFFICE OF CORRECTIONAL EDUCATION

"SEC. 214. (a) FINDINGS.—The Congress finds and declares that—

"(1) education is important to, and makes a significant contribution to, the readjustment of incarcerated individuals to society; and

"(2) there is a growing need for immediate action by the Federal Government to assist State and local educational programs for criminal offenders in correctional institutions.

"(b) STATEMENT OF PURPOSE.—It is the purpose of this title to encourage and support educational programs for criminal offenders in correctional institutions.

"(c) ESTABLISHMENT OF OFFICE.—The Secretary of Education shall establish within the Department of Education an Office of Correctional Education.

"(d) FUNCTIONS OF OFFICE.—The Secretary, through the Office of Correctional Education established under subsection (a) of this section, shall—

"(1) coordinate all correctional education programs within the Department of Education;

"(2) provide technical support to State and local educational agencies and schools funded by the Bureau of Indian Affairs on correctional education programs and curricula;

"(3) provide an annual report to the Congress on the progress of the Office of Correctional Education and the status of correctional education in the United States;

"(4) cooperate with other Federal agencies carrying out correctional education programs to ensure coordination of such programs; and

"(5) consult with, and provide outreach to, State directors of correctional education and correctional educators.

"(e) DEFINITIONS.—As used in this section—

"(1) the term 'criminal offender' means any individual who is charged with or convicted of any criminal offense, including a youth offender or a juvenile offender;

"(2) the term 'correctional institution' means any—

"(A) prison,

"(B) jail,

"(C) reformatory,

"(D) work farm,

"(E) detention center, or

"(F) halfway house, community-based rehabilitation center, or any other similar institution designed for the confinement or rehabilitation of criminal offenders; and

"(3) the term 'State educational agency' means the State board of education or other agency or officer primarily responsible for the State supervision of public elementary and secondary schools, or, if there is no such officer or agency, an officer or agency designated by the Governor or by State law.".

TITLE VII—AUTHORIZATION OF APPROPRIATIONS

SEC. 701. AUTHORIZATION OF APPROPRIATION.

Section 3 of the Act is amended to read as follows:

"SEC. 3. (a) There are authorized to be appropriated $1,500,000,000 for fiscal year 1991 and such sums as may be necessary for each of the fiscal years 1992, 1993, 1994, and 1995 to carry out the provisions of titles I, II, III and IV of this Act.

"(b) There are authorized to be appropriated $10,000,000 for the fiscal year 1991 and such sums as may be necessary for each of the fiscal years 1992, 1993, 1994, and 1995 for section 112 of title I, relating to State councils on vocational education.

"(c)(1) There are authorized to be appropriated $14,000,000 for the fiscal year 1991 and such sums as may be necessary for each of the fiscal years 1992, 1993, 1994, and 1995 to carry out part A of title III, relating to State assistance for vocational education support programs by community-based organizations.

"(2) There are authorized to be appropriated $37,000,000 for the fiscal year 1991 and such sums as may be necessary for each of the fiscal years 1992, 1993, 1994, and 1995 to carry out part B of title III, relating to consumer and homemaking education.

"(d) There are authorized to be appropriated $100,000,000 for the fiscal year 1991 and such sums as may be necessary for each of the fiscal years 1992, 1993, 1994, and 1995 to carry out the provisions of this part F of title III.

"(e) There are authorized to be appropriated $3,000,000 for each of fiscal years 1991 and 1992 to carry out the provisions of section 403. Such funds shall remain available until expended.

"(f)(1) There are authorized to be appropriated $350,000 for fiscal year 1991 to carry out part D of title IV relating to the National Council on Vocational Education.

"(2)(A) There are authorized to be appropriated $200,000 for fiscal year 1992 to carry out part D of title IV relating to the National Council on Vocational Education.

"(B) Amounts available from any amount appropriated pursuant to the authority of subparagraph (A) shall be limited to an amount equal to 200 percent of the services and funds received pursuant to section 431(c)(4) and 431(c)(5) during such fiscal year.

"(g) There are authorized to be appropriated $7,000,000 for the fiscal year 1991 and such sums as may be necessary for the fiscal years 1992, 1993, 1994, and 1995 to carry out part E of title IV, relating to bilingual vocational training programs.

"(h) From the funds appropriated pursuant to subsection (a) for each fiscal year, 2.75 percent shall be available to carry out the provisions of title IV (other than part E), relating to national programs.".

TITLE VIII—TECHNICAL AMENDMENTS

SEC. 801. AMENDMENTS TO THE TABLE OF CONTENTS.

The table of contents of the Act is amended by—

(1) striking the item relating to section 115 and inserting "State Assessment";

(2) striking out the items relating to title II and inserting the following:

"TITLE II—BASIC STATE GRANTS FOR VOCATIONAL EDUCATION

"PART A—STATE PROGRAMS

"Sec. 201. State programs and State leadership.

"Sec. 202. Sex equity programs.

"PART B—TECHNOLOGY PREPARATION

"Sec. 211. Program authorized.

"Sec. 212. Technical preparation education programs.

"Sec. 213. Applications.

"Sec. 214. Definitions.

"PART C—SECONDARY, POST-SECONDARY, AND ADULT VOCATIONAL PROGRAMS

"Subpart 1—Secondary School Programs

"Sec. 221. Within State allocation.

"Sec. 222. State reserve for areas with severe problems.

"Sec. 223. Populations to be served.

"Sec. 224. Programs for economically disadvantaged students.

"Sec. 225. Programs for students with disabilities.

"Sec. 226. Programs for students with limited English proficiency.

"Sec. 227. Programs to eliminate sex bias.

"Sec. 228. Programs for criminal offenders.

"Sec. 229. Use of funds.

"Subpart 2—Postsecondary and Adult Programs

"Sec. 240. Postsecondary and adult programs.
"Sec. 241. Postsecondary and adult use of funds.
"Sec. 242. Programs for single parents, displaced homemakers and single pregnant women.

"Subpart 3—General Provisions

"Sec. 250. State performance evaluation and improvement.
"Sec. 251. Administrative provisions.";

(3) inserting the following at the end of title III:

"PART F—SUPPLEMENTARY GRANTS

"Sec. 351. Supplementary grants.
"Sec. 352. Allotment to States.
"Sec. 353. Allocation of funds to eligible recipients.
"Sec. 354. State applications.
"Sec. 355. Local applications and local use of funds.
"Sec. 356. Definitions.";

(4) in the item relating to section 403 by striking "programs assisted under this Act";

(5) in the item relating to section 404 by striking "Center" and inserting "Centers";

(6) inserting the following at the end of part A of title IV:

"Sec. 405. Study of Carl D. Perkins Vocational Education Act Formula.";

(7) striking the items relating to part B of title IV and inserting the following:

"PART B—DEMONSTRATION PROGRAMS

"Sec. 411. Programs authorized.
"Sec. 412. Demonstration projects for the integration of vocational and academic learning.
"Sec. 413. Business and industry partnerships.
"Sec. 414. Model programs of regional training for skilled trades.
"Sec. 415. Blue ribbon vocational education programs.
"Sec. 416. Materials development in telecommunications.
"Sec. 417. Professional development.
"Sec. 418. Educational programs for Federal correctional institutions.
"Sec. 419. Vocational education lighthouse schools.
"Sec. 420. Career and guidance counseling programs.
"Sec. 420A. Dropout prevention.";

(8) striking the item relating to section 422 and inserting "National Occupational Information Coordinating Committee";

(9) inserting the following new item after the item relating to section 423:

"Sec. 424. National network for curriculum coordination in vocational and technical education.";

(10) striking the item relating to section 502 and inserting "Certification requirements"; and

(11) inserting after the item relating to section 506 the following:

"Sec. 507. Regional meetings on regulations.".

SEC. 802. THE DEPARTMENT OF EDUCATION ORGANIZATION ACT.

(a) TABLE OF CONTENTS.—Section 1 of the Department of Education Organization Act is amended by striking the items relating to section 213 and 214 and inserting the following:

"Sec. 214. Office of Correctional Education.
"Sec. 215. Federal Interagency Committee on Education.".

(b) REPEALER.—Section 213 of the Department of Education Organization Act is repealed.

SEC. 803. HIGHER EDUCATION ACT.

Section 621 of the Higher Education Act of 1965 is repealed.

TITLE IX—EFFECTIVE DATE

SEC. 901. EFFECTIVE DATE.

(a) IN GENERAL.—Except as otherwise provided, the amendments made by this Act shall take effect on July 1, 1991.

(b) INDIAN PROGRAMS.—(1) Except as provided in paragraph (2), the amendments made by sections 101(a)(2) and 103 of this Act shall take effect on October 1, 1990.

(2) The provisions of section 101(a)(1)(C) of the Carl D. Perkins Vocational Education Act, as added by this Act, shall not apply before July 1, 1991.

TITLE X

SEC. 1001. (a) The General Accounting Office (GAO) shall conduct a thorough study of the Dual System of Vocational Education in the Federal Republic of Germany.

(b) Furthermore, the GAO shall conduct a thorough study of the desirability, advantages, and disadvantages of establishing a nationwide job apprenticeship program in the United States similar to the Dual System of Vocational Education in the Federal Republic of Germany.

(c) In studying the West German Dual System of Vocational Education, the GAO shall assess:

(1) the ability of such a system to prepare workers for the technical workplace;

(2) the level of academic skills an apprentice in the Dual System acquires;

(3) the effectiveness of combining on-the-job training with classroom instruction;

(4) the dropout rate of West German students;

(5) the construction and oversight of skill certification tests;

(6) the labor mobility of apprentices;

(7) if such a system has helped West Germany maintain a competitive workforce and a competitive edge in the world economy;

(8) the value and productivity of apprentices to business;

(9) the direct and indirect costs/benefits to the country, industry, company and individual that result from the Dual System of Vocational Education.

(d) In assessing the ability of a similar program to be replicated in the United States, the GAO shall evaluate such factors as:

(1) existing job apprenticeship programs and their ability to prepare workers for the technical work place;

(2) the future need for skilled workers and the extent to which job apprenticeship programs could meet these future workforce needs;

(3) the appropriate age or grade level for students to enter job apprenticeship programs (i.e., secondary v. postsecondary students or both);

(4) the potential for such programs to reduce the dropout rate, place more qualified workers in the work place, and increase the lifetime earnings of those who participate in such a job apprenticeship program;

(5) the training wage appropriate for an apprentice;

(6) the estimated value and productivity of apprentices to business;

(7) the federal and state role in regulating and funding such programs;

(8) the direct and indirect costs/benefits of such a program to the federal and state governments, industry, the company and the individual.

(e) The study, together with comments and recommendations, shall be completed and presented to Congress no later than one year from the date of enactment of this Act.

Mr. PELL. Mr. President, I move to reconsider the vote by which the bill, as amended, was passed.

Mrs. KASSEBAUM. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. PELL. Mr. President, I move that the Senate insist on its amendments and request a conference with the House and that the Chair be authorized to appoint conferees on the part of the Senate.

The motion was agreed to; and the Presiding Officer (Mr. GORE) appointed Mr. KENNEDY, Mr. PELL, Mr. METZENBAUM, Mr. MATSUNAGA, Mr. DODD, Mr. SIMON, Ms. MIKULSKI, Mr. HATCH, Mrs. KASSEBAUM, Mr. COCHRAN, Mr. JEFFORDS, and Mr. THURMOND conferees on the part of the Senate.

Mr. PELL. Mr. President, I would like to thank Senator KASSEBAUM for her excellent work on S. 1109. We have framed this bill under the spirit of cooperation and consensus, and that is due in large part to her leadership. In addition, I would like to commend the chairman of our full committee, my colleague from Massachusetts, for his able assistance in moving this landmark legislation. Special thanks are also due to Senator HATCH for his fine work. Our solid bipartisan work on this legislation is indication of the commitment of this Congress to advancing the quality of education throughout the Nation.

In addition, I thank the staff of each of the members of our committees. They have spent many hours in working together on this package. I know I speak for all my colleagues when I extend our sincere appreciation for their efforts.

In that regard, I am most appreciative of the work of my own staff, including: David Evans, Ann Young, Marisa Quinn, Merry Richter, Mike Epstein, Charlie Bouthot, Craig Cerrito, and Tony Lisa. In addition, I thank Susan Hattan, Becky Rogers, and Lydia Spencer of Senator KASSEBAUM's staff, Terry Hartle of Seantor KENNEDY's staff, and Laurie Chivers of Senator HATCH's staff.

There are many others who have contributed to this legislation, and though I shall not read their names at this point, I would ask that they be inserted in the RECORD as if read.

We are most appreciative of the work of committee staff including: Cheryl Birdsall, Irvin Queja, Joan Gillman, Cheryl Smith, Pat Fahy, Brian Kennedy, Terry Muilenberg, Maryanne Richardson, Karen Calmeise, Pam Kurse, Judith Nolan, Craig Metz, Carolyn Boos, and Doris

Dixon. Paul Irwin, Richard Appling, and Wayne Riddle from the Congressional Research Service have been of their usual invaluable assistance to our work, and we are most appreciative of the efforts of Mark Sigurski in legislative counsel.

Mrs. KASSEBAUM. Mr. President, I just want to say how pleased I am that the Senate has approved this legislation. The changes we are seeking in Federal assistance to vocational education programs will, I believe, inspire reforms which are needed to assure a skilled and adept work force.

We have placed emphasis on the integration of academic and technical training, encouraged a logical progression from high school to postsecondary training, and targeted resources on individuals who might not otherwise receive the quality programs they need to become productive workers.

Quality vocational training programs are truly key to the future we hope to build for ourselves and our children. It has been a pleasure to work with Chairman PELL and other members of the committee in developing this legislation, and I look forward to working with the House in shaping a final bill which will meet the challenges before us.

I also commend and recognize the hard work done by members of my staff and other staff of the subcommittee on this bill. They have all put in very long hours, and I appreciate all that they have done.

Many thanks to Susan Hattan, Becky Rogers Voslow, and Lydia Spencer of my sfaff; David Evans, Ann Young, and Merry Richter of Senator PELL's staff; Laurie Chivers with Senator HATCH; Terry Hartle and Rusty Barbour with Senator KENNEDY; Pam Kruse with Senator JEFFORDS; Cheryl Birdsall and Meg Thale with Senator METZENBAUM; Judith Nolan with Senator COATS; Irvin Queja with Senator MATSUNAGA; Craig Metz and Deanne Folse of Senator THURMOND's staff; Joan Hogan Gilman with Senator DODD; Carolyn Boos with Senator DURENBERGER; Cheryl Smith, Judy Wagner, and Brian Kennedy with Senator SIMON; Karen Calmeise with Senator MIKULSKI; Doris Dixon and Lee Sanders with Senator COCHRAN; and Terry Muilenberg with Senator HARKIN's staff.

I would just like to add the Senate has spoken with a unified voice and a unanimous voice on behalf of vocational education.

That is a strange signal to send and I think it will inspire reforms throughout the educational system that will help us continue to assure that there will be a skilled and adept work force.

I yield the floor.

The PRESIDING OFFICER. The Senator from Vermont.

Mr. LEAHY. Mr. President, I notice the majority leader is seeking recognition. I, of course, yield.

The PRESIDING OFFICER. The majority leader.

ORDER OF PROCEDURE

Mr. MITCHELL. Mr. President, if I might have the attention of Members of the Senate, I have discussed with the distinguished Republican leader our continuing effort to clear for approval by the Senate the Panama-Nicaragua assistance authorization bill, reported by the Foreign Relations Committee and with respect to which the President has made repeated requests for prompt action.

We had cleared that matter on this side of the aisle, Democratic Senators, earlier this week, to proceed without amendment and subject to a brief time limit. So far, we have been unable to gain clearance on the Republican side, but I understand that the distinguished Republican leader is continuing to work on that and that we may be able to get that clearance sometime later today. I would like to ask him to comment on that.

Mr. DOLE. Mr. President, if the Senator will yield, it is my understanding we are very close to an agreement on this side. If we can achieve that—I think we could dispose of it very quickly—it would be my hope that we would do that before we adjourn for the day. I will get back to the majority leader as quickly as I can. I know staff is working right now with Senator HELMS.

Mr. MITCHELL. Then, Mr. President, for the information of Senators, we hope shortly to be in a position to make an announcement with respect to the schedule for the remainder of the day. If we can complete action on that matter, then it is my intention that the Senate not be in session tomorrow.

Mr. President, the Senator from Vermont had previously gained recognition and I thank him very much for yielding to me to permit me to make this announcement.

Mr. President, I yield the floor.

MORNING BUSINESS

Mr. LEAHY. Mr. President, I ask unanimous consent that there be a period for morning business with Senators permitted to speak therein.

The PRESIDING OFFICER. Without objection, it is so ordered.

MEASURE INDEFINITELY POSTPONED—S. 1109

Mr. MITCHELL. Mr. President, I ask unanimous consent that S. 1109 be indefinitely postponed.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Vermont is recognized.

Mr. LEAHY. I thank the Chair.

(The remarks of Mr. LEAHY pertaining to the introduction of S. 2426 and S. 2427 are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

The PRESIDING OFFICER. The Senator from Indiana is recognized.

Mr. LUGAR. I thank the Chair.

(The remarks of Mr. LUGAR pertaining to the introduction of S. 2426 and S. 2427 are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

The PRESIDING OFFICER. The Senator from Texas is recognized.

Mr. GRAMM. I thank the Chair.

(The remarks of Mr. GRAMM pertaining to the introduction of S. 2428 are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

The PRESIDING OFFICER. The Senator from New Mexico is recognized.

Mr. DOMENICI. I thank the Chair.

(The remarks of Mr. DOMENICI pertaining to the introduction of S. 2428 are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

Mr. DIXON addressed the Chair.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. DIXON. Mr. President, I ask unanimous consent to proceed as though in morning business for 10 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

CHANGING NATIONAL SECURITY THREAT

Mr. DIXON. Mr. President, I congratulate the distinguished chairman of the Senate Armed Services Committee on his important efforts over the past couple of weeks to stimulate, and continue focusing, debate on our Nation's defense policy.

I entirely agree with the chairman that the world is changing dramatically. It is clear to me that the Warsaw Pact threat to NATO security has been drastically reduced. I am especially persuaded by the comments of my old law school friend—CIA Director Bill Webster—on the degree and significance of the startling, yet welcome, events in the Soviet Union and Eastern Europe. As I have said before, these events require Congress, in conjunction with the President and his adminstration, to look hard at fundamental U.S. defense strategy.

Unfortunately, the Department of Defense has not yet taken this hard look. I agree with the chairman that the Bush administration's fiscal year 1991 defense budget request now before Congress simply does not re-

flect a world in transition. I know that we all are uncertain about the future of U.S. national security interests. Yet, I am convinced that we can at this time seriously reconsider our current approach to defense policy in budget areas directly and obviously related to the changing situation in the Soviet Union and Eastern Europe.

Mr. President, my good friend, the distinguished chairman of the Armed Services Committee, did an outstanding job this past Thursday outlining the nature of the changing national security threat in the 1990's.

We are in basic agreement that the threat of a Warsaw Pact conventional invasion in Europe has all but disappered, while at the same time potential conventional or unconventional threats remain outside the United States-Soviet context and outside Europe.

I am also pleased that the chairman addressed the favorable linkage between the reduced conventional threat in Europe and the risk of strategic nuclear war. As he pointed out, many imagined scenarios for a nuclear war begin with the escalation of a conventional war. For this reason, the threat of nuclear war decreases as the threat of a conventional war in Europe fades. Although I agree with this agrument, I would go one step further. I believe that it is the perceived likelihood of a specific type of nuclear war that is most directly reduced by the changes we are witnessing.

Throughout the 1980's, one fundamental underpinning of United States strategic nuclear policy has been the assumption that in order to extend credibly our nuclear umbrella over Europe, we must be able to target Soviet missile silos and other military assets. According to the 1983 Scowcroft Commission report, which provided the departure point for much of today's strategic modernization efforts:

> The Soviets must continue to believe what has been NATO's doctrine for three decades: that if we or our allies should be attacked—by massive conventional means or otherwise—the United States has the will and the means to defend with the full range of American power. * * *. Our strategic forces must be modernized, as necessary, to enhance to an adequate degree their overall survivability and to enable them to engage effectively the targets that Soviet leaders most value.

Importantly, the accurate weapons supposedly required for this task are primarily land based. Thus, the Republican administrations of the 1980's have believed it particularly imperative to protect the land-based leg through modernization.

Though I am not sure that I ever accepted any of this reasoning, my question now is: If Europe no longer has the same need for our nuclear guarantee of its security, or in other words if extended deterrence is no longer as critical a requirement, must we continue to place the same urgent emphasis on modernizing all of our strategic nuclear forces—especially land-based forces?

Mr. President, I would like to point out that I am not alone in making this type of argument. For example, former Chairman of the Joint Chiefs of Staff, Gen. David C. Jones, mentioned in his testimony before the Armed Services Committee earlier this year that:

> As the conventional threat reduces in Europe, extended deterrence critically comes down somewhat. I am not suggesting that we are at that point now, but what I am suggesting is, there is some sort of linkage between what happens in the conventional area and in the strategic area. In the debate on resources, the strategic forces should not be inviolate in the competition for defense resources.

Later, he said that "behind all of my thinking is less concern on the so-called vulnerability of our land-based forces."

General Jones makes a good argument. Also, let us not forget that at this same hearing he went on to suggest that the United States should place far less emphasis on the Midgetman and MX rail garrison programs, and was joined to some degree in this recommendation by the two most recent former JCS Chairmen—General Vessey and Admiral Crowe. Needless to say, these men are not to be taken lightly in their viewpoints on military matters.

Mr. President, we all agree that the world is changing. I believe that this change significantly affects the threat at the strategic nuclear level, not just the threat of a conventional war in Europe. I have argued before, I am arguing now, and I will argue throughout this budget process, that strategic nuclear modernization programs must—I repeat must—be on the table as we reformulate our Nation's defense policy. If we take all of our reductions from the conventional side, we are, I believe, jeopardizing the conventional strength that will be critical to meeting our future national security needs.

Having said this, I am encouraged by the recent report in the Washington Post that the Pentagon is planning future cuts in funding for strategic nuclear weapons programs. If true, this is undoubtedly a positive development, so long as it is focused on the strategic modernization programs most directly related to the change in threat. However, according to this report, the new planning only relates to the 5-year period beginning in 1992. In contrast, the President's defense budget request for fiscal year 1991 now before Congress continues to seek significant funding increases for all the major strategic programs.

Mr. President, the administration's insistence on holding all strategic programs sacrosanct in the fiscal year 1991 budget is simply not acceptable. I hope the Pentagon is listening because this Senator, for one, is not going to support a fiscal year 1991 defense budget that refuses to recognizes a changing world.

There is a time to sow and a time to reap, but the adage also implicitly recognizes that there is no need to sow a lot of dollars for a crop that will be of no use to us in a far different world than the one we knew a few short months ago. Any good Illinois farmer can tell us that the kind of crop we can expect in the fall is based on the best estimate of conditions and expectations in the spring. There is no need to waste seed, resources, or equipment to get a decent crop. The same principles applies to defense. When the climate is right, let us use good common sense and fiscal restraint to guide us. Let us start with the fiscal year 1991 budget, where we will be able to see immediate results from the crop we sow.

PROTECTION OF THE CHINESE STUDENTS

Mr. DIXON. Mr. President, let me say that the White House has now acknowledged that President Bush never issued a promised Executive order to protect the Chinese students. Sadly, this failure to act has caused great concern in the Chinese student community in the United States.

When the administration vigorously urged this body not to override the President's veto of H.R. 2712, the Chinese student protection bill, we were told the President would take care of the situation through an Executive order. I am most confident, because I was a leader in that struggle, that if the President had not provided such assurance, this body would have overridden the President's veto of H.R. 2712 by a substantial majority. But it did not happen that way, because the President made a promise.

No one, to my recollection, ever told anybody here that a directive by the Attorney General would suffice. Had Congress thought the Attorney General could do the job, we could have passed a resolution asking him to do so, or we could have passed a bill compelling him to do so. That is not what we wanted or needed. Our goal was to protect the Chinese students in the United States who risk their lives if they are forced to return to China so long as the Chinese regime remains in its present repressive state of mind.

We passed the legislation protecting the students who fear for their lives if we force them to go back to China. The President prevailed in his veto, and you will remember the House had overridden him. He narrowly prevailed here when we were promised that he

could accomplish the same results we wanted to achieve by issuing an Executive order.

There is nothing more permanent in policy matters, as the President knows, than a law. But the administration prevailed back in January of this year, when we in Congress were trying to make a law by saying the President would give the Chinese students all the protection we had included in the legislation, and more. Now we know that more is less, Mr. President. A promise of an Executive order suddenly translates into a directive by the Attorney General.

What the administration has not done in this situation is far more serious than what it has done; more serious because we in Congress and the Chinese students in the United States thought we had a solemn pact with the President when he made a commitment to issue an Executive order assuring Chinese students that their continued stay in this country would not be endangered by our immigration laws and rules.

The Chinese students, the Congress, and the American people were promised one thing by the administration, but the administration, Mr. President, has not delivered.

It is now April 5. It is a long time since January. But, Mr. President, it is never too late to issue that Executive order. I choose to believe that the White House spokesman misspoke for the President when he said the President really intended to protect the Chinese students through a directive from the Attorney General rather than through an Executive order.

I would like to believe the President still intends to offer the Executive order promised the Chinese students in this country. I heard the President say he would offer the Executive order he promised. There is no one in the Nation's Capital who would say they heard anything different from the President back in January. Senators on the other side, including my friend from New York State, came in here and said, "We were prepared to vote to override, but we believe the President, and because of the Executive order, we are not going to vote to override." The only person who may have heard differently, as I see it now, is the White House spokesman himself.

Mr. President, the escape from China in recent days of Chai Lin, one of the top leaders in the student uprising in China, urgently underscores the importance of protecting the Chinese students from reprisals and from oppression by their leaders. She is now in France. Let us hope the French do a better job of protecting her and her colleagues than we appear to be doing here in the United States.

Freedom of person and freedom of expression are what this dilemma boils down to. If the administration cannot assure the safety of the Chinese students in our midst, then it is time, once again, I think, that the Congress look at the matter. I do not perceive that the concern of Congress is any less forceful now in April than it was in January. There has been no thaw in the repressive actions in China. There can be no thaw in our resolve to protect and nurture the Chinese students who have sought haven in the United States.

I look forward to a further clarification from the White House as to its intention to issue the Executive order. It is still needed. If the administration indicates it has no plans to issue the Executive order, then I will reintroduce the legislation I previously introduced that provided the Chinese students with protection under the laws of this country. This bill passed the Congress; it was vetoed by the President and overridden in the Houes, but sustained in the Senate by the closest of margins.

If it is necessary to reintroduce this bill, assurances from the White House will have to be backed up immediately with actions, if the White House does not wish to engage in this debate once again.

Mr. President, I ask unanimous consent to print in the RECORD the article from Today's Washington Post entitled "Bush Never Issued Executive Order Protecting Chinese Students in United States"

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Apr. 5, 1990]

BUSH NEVER ISSUED EXECUTIVE ORDER PROTECTING CHINESE STUDENTS IN UNITED STATES

(By David Hoffman)

President Bush promised in January to issue an executive order protecting Chinese students in the United States but never did so, relying instead on a directive by the attorney general that some students say has led to confusion and uncertainty about their status.

Bush vowed earlier this year that "no Chinese student will be returned to China against his or her own will." He made the promise as part of a successful effort to defeat congressional legislation protecting the students.

In a handwritten note Jan. 24 to Sen. Connie Mack (R-Fla.), the president said he would issue an "executive order" that "does better by the students" than the proposed congressional legislation. Bush later reiterated several times that he had issued such an order to protect the students.

Yesterday, White House press secretary Marlin Fitzwater said that, although Bush "used that term," referring to the executive order, "in fact what he meant was the instructions to the Justice Department."

Fitzwater, questioned about a report in the New York Times that Bush had never issued the order, said "the executive order is not the right tool" and "what he did do was order the attorney general to take the legal steps necessary to assure that that was the case. . . ."

Attorney General Dick Thornburgh wrote a letter to Gene McNary, director of the Immigration and Naturalization Service, Dec. 1 directing him to protect the students.

Rep. Nancy Pelosi (D-Calif.), a sponsor of the Chinese students legislation, said the administration had not fulfilled its promise.

"It's typical of a syndrome in this administration of 'let's not do anything about it and say we did. . . . Let's say my executive order will protect the Chinese students but not do one,' " she said.

"He was talking about an executive order," Pelosi added. "He didn't say a letter I wrote to the attorney general."

Pelosi said that, as a result, nothing has been published in the Federal Register that would provide firm procedures for the INS to follow with regard to the students, many of whom did not want to return to China after the Tiananmen Square massacre last June. In dealing with the students, she said, this has led to confusion and uneven practices. Some students, an aide said, have been asked to fill out lengthy waiver forms that include categories in which many would not qualify under normal circumstances, while others had been told no waiver application is necessary.

Haiching Zhao, chairman of the National Committee on Chinese Student Affairs, said some Chinese students have traveled outside the United States and had difficulty returning. In addition, he said, some students who apply for a change of status are being rejected on grounds that they cannot prove that they do not intend to remain indefinitely. Also, he said, the Chinese government is resisting passport renewal for some students.

"Right now, there is no written executive order, and people don't know what to do," he said. "There are always tricky questions and problems, and people don't know what to follow." Zhao said "we appreciate the public announcement that nobody will be sent back against his or her will. We trust that." But, he said, it has been suggested to the students that they not travel outside the United States.

"They are concerned," he said, "Many people are postponing their own research plans or whatever. I don't know how many cases, but there is a general tendency that people are having a hard time coming into the United States.

Mr. DIXON. I yield the floor.

The PRESIDING OFFICER (Mr. KERREY). The Senator from Colorado.

THE DEFICIT AND DEFENSE

Mr. WIRTH. Mr. President, over the last few days, Senator NUNN and other members of the Senate Armed Services Committee have delivered very welcomed speeches on our overall defense strategy and the direction which we should be in, given the rapidly changing world. These speeches are, I hope, not going unnoticed in the Pentagon.

I am proud to be a member of the Committee on Armed Services and to be able to support the effort being made by my colleagues. Today, I would like to add a little bit on the subject of the defense budget and the Federal deficit.

In March I entered the testimony of the Comptroller General of the United States, Mr. Charles A. Bowsher, into the RECORD. In that testimony Comptroller General Bowsher assessed the true Federal deficit for fiscal year 1991 as $270 billion, rather than the $64 billion that the Bush budget would lead us to believe.

I know that it is unusual for us in the Government to be honest about the budget, and I would just commend to my colleagues that quite remarkable statement by the Comptroller General about what the deficit really amounts to. It is $270 billion, Mr. President, not $65 billion that is advertised by the phony bookkeeping in the White House.

In his testimony Mr. Bowsher went on to speculate that by 1995, unless we make some fundamental changes, interest on the national debt will constitute the single largest element of the Federal budget at $335 billion.

That means, Mr. President, if we continue the current pattern; unless we make some fundamental changes, interest on the debt will be greater than Social Security payments. It already is greater than defense spending. And what do we get for all this money, Mr. President? You know we get nothing. We do not get any schools, hospitals, or housing. Nothing.

Mr. Bowsher's testimony also addressed the challenges that we face in reducing defense spending in the years ahead. I direct my colleagues' attention to his message as it relates to the defense budget.

To conform to President Bush's defense budget, the Comptroller General estimates that the Pentagon must identify $138 billion in additional budget authority reductions in the next 3 years—roughly $45 billion each year for fiscal years 1992, 1993, and 1994. That corresponds to approximately $25 billion in outlay cuts in each of the next 3 years, just to match the Bush administration's defense budget topline.

To reverse the disasterous deficit scenario painted by Mr. Bowsher, we will have to cut defense outlays even further than envisioned by the Bush budget. Given that many Americans believe we can and should make even deeper cuts in defense spending than those proposed by the President, we must pursue a course that recommends a much more realistic assessment of defense funding than the administration's fiscal year 1991 proposal for defense.

Mr. President, we have two related tasks in managing the defense build-down of the 1990's. The first is the short-term requirement under Gramm-Rudman-Hollings to reduce the Federal deficit. This drives us to find outlay savings in the coming fiscal year. The second task is going to be even more difficult: to develop a long-term set of goals which match budget and strategy through the mid-1990's. This requires us to get the budget authority acquisition "bow wave" under control. It is this "bow wave" that the Comptroller General estimated would have to be cut by nearly $140 billion just to get down to the current baseline.

In addition to the "bow wave" we also ought to be thinking about the sequester strategy that has been much discussed.

If a sequester were applied to the fiscal year 1991 budget to reach the Gramm-Rudman-Hollings target, defense outlays would be cut to $288 billion—roughly $18 billion below the CBO baseline and $15 billion below the Cheney request of $303 billion, a 5-percent cut. As the administration appears ready to accept another sequester in fiscal year 1991, a sequester of this magnitude represents the baseline from which to weigh decisions on where and how much to cut.

Mr. President, we also need a road map to help guide us in building down the defense budget over the next 5 years. Unfortunately, the Department of Defense has not yet submitted its 5-year plan to the Congress. The Pentagon claims that they cannot provide the 5-year plan because of the rapid changes in the world. That is fine, but what the Pentagon is not saying is that the mismatch between weapons and wallet in the Department of Defense has been well understood for the last 4 years. The procurement "bow wave" problem continues to choke the Pentgon, and the problem will only become worse unless we act this year.

Prior to the Reagan defense buildup, the U.S. post-WW II peacetime defense budgets averaged $230 billion in constant 1991 dollars—an average which was in fact attained in the fiscal year 1980 defense budget. The Bush administration budget request for fiscal year 1991 would provide $70 billion more for defense in real terms than the postwar peacetime average—$70 billion more in real terms than we were spending in 1980. In 1995 we will be spending nearly $40 billion more in constant dollars under the administration's plan than we were in 1980 and $40 billion more than the peacetime norm.

The threat facing America today is certainly no greater than at the height of the cold war—in fact it is substantially diminished and, according to CIA Director Webster's recent testimony to the House Armed Services Committee, is not likely to be reconstituted. At a minimum, we should seek to manage a defense build-down to the postwar peacetime average of $235 billion—1991 dollars—by 1995. That will require deeper cuts than the Pentagon has proposed and will force us to make hard choices this year about where to make those cuts.

In the absence of a 5-year defense plan, and with the understanding that an additional $138 billion will have to be trimmed from the fiscal year 1992-94 budget just to reach the Bush targets, we will have to make decisions based on less-than-perfect information. With the help of the defense budget project, I have assembled several tables outlining a range of options for cutting defense costs, from terminating new programs to cutting force structure. The CBO testimony to the Budget Committee yesterday also contained valuable data on major R&D and procurement programs. I ask unanimous consent that these tables be printed in the RECORD following my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. WIRTH Mr. President, throughout the cold war, we have defined our military budgets, strategy, and force structure by reference to the Soviet nuclear threat and the conventional threat posed by the Warsaw Pact. Our challenge in the 1990's will be to reconfigure our forces, budgets, and strategies to deal with a different set of military challenges emanating from a more multipolar world. This will require greater attention to light and mobile forces, and less emphasis on the forces we have designed to deal with a central European conflict. This strategy was very well laid out by Senator NUNN earlier this week and last week.

As the military threat declines, America faces profound and growing challenges to national economic security in the 1990's. If we hope to remain a superpower in a period when that status will be defined more by economic strength than military might, we must take steps today to put our fiscal and commercial house in order. That will require real deficit reduction and meaningful investments in America's future—in education, infrastructure, savings, research, and development. The collapse of the Warsaw Pact and continuing changes in the Soviet Union provide an opportunity to meet these demands by redirecting resources away from military spending and toward pressing national priorities. We must capture the peace dividend and reinvest it in America's future.

Finally, Mr. President, as we approach Earth Day, the 22d of April, we must also remember that our global security is now defined more by our relationship with the environment than it is by our relationship with the Soviet Union. And the faster we come to redesign our institutions of government, to redesign our energy policy, to redesign our tax programs, and to re-

design our environmental programs, the faster we will come to grips with that real national security threat.

In all cases, budget authority calculations assume that reductions are phased in gradually during FY 1991. As a result, FY 1991 savings would be only 50 percent of the amount that would eventually be saved annually through these cuts. FY 1992 savings would be 90 percent of eventual annual savings, due to a lag in achieving some indirect savings.

Savings for Army divisions and Air Force wings include troops assigned to units and their support personnel.

Source: RDT&E Programs (R–1), Department of Defense budget for fiscal year 1991. CBO testimony to Senate Budget Committee, March 8, 1990.

Mr. MOYNIHAN. Mr. President, if the able and learned Senator from Colorado would stay on the floor just another moment, I would like to thank him for his remarks, for the clarity and moderation and at the same time the sense of urgency which he brings to this issue. I believe it was Albert Einstein who, after the first explosion of a nuclear weapon, said everything has changed but our way of thinking.

As we encounter the end of the age of totalitarian conflict, as we deal with the threats to world peace that arise from the fragmentation of the Soviet Empire rather than its aggression, we are going to have to change our way of thinking. And it can be done as a collective effort. It need not be something that only a very limited number of people agree to as has been the characteristics of a national security state.

We are continually asked to do things on the basis of information which is withheld. Opening this up, thinking about it the way the Senator from Colorado has done, bringing in the counsel of persons like the Comptroller General, who he cited, and our very distinguished chairman of the Armed Services Committee and his own expertise in this matter is refreshing. It is important. And the fact that it comes at the end of the day only means it is a good thing to start with the first morning we reconvene.

I congratulate him and say I learned from what he had to say and I hope he will keep saying it.

Mr. WIRTH. Mr. President, I greatly appreciate those remarks, especially given that they come from somebody with the background of the distinguished Senator from New York. I feel we have this enormous disconnect. On the one hand, we are being asked to commit 50 percent more money to defense than we did at the height of the cold war and at a time when the cold war is over. We are being asked to do that, and yet we are starving the institutions that are necessary for our survival in a new globe, which are environmental, income security, which the Senator has been so involved with, and education.

We are being asked to spend $300 billion, almost 50 percent more than the cold war average, but we are not spending any money on education or the environment or housing. It just does not fit together. It is our job as members of the loyal opposition, it seems to me, to point out these difficulties and to try to do it as dispassionately and carefully as we can.

Mr. MOYNIHAN. Of the $70 billion the Senator from Colorado refers to, more than at the height of the cold war, every penny of that could be ascribed to the raiding and the looting of the Social Security trust fund. The surplus this year will be $70 billion. We are using pension money to buy B–bombers at a billion dollars a copy that we do not need.

The PRESIDING OFFICER. The Senator from Colorado is recognized.

Mr. WIRTH. I thank the Chair.

(The remarks of Mr. WIRTH pertaining to the introduction of S. 2433 legislation are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

RELATIVE TO VACANCIES ON THE SOCIAL SECURITY BOARD OF TRUSTEES

Mr. MOYNIHAN. Mr. President, I rise once again to submit a resolution to express the sense of the Senate that the President ought promptly to send to us nominations for the vacancies on the Social Security Board of Trustees. These are the public members as the statute provides.

I do so, Mr. President, in the company of the distinguished chairman of the Committee on Finance, Senator BENTSEN; Senator BRADLEY, and Senator HEINZ, also distinguished members of our committee.

As the Chair knows, in the Social Security amendments of 1983, Congress made provision for two members of the public, one a Democrat and one a Republican, to serve on the Board of Trustees of the Federal old-age and survivors insurance and disability insurance trust funds. The public trustees are nominated by the President and confirmed by the Senate for 4-year terms. The other trustees are the Secretaries of the Treasury, Labor, and Health and Human Services who serve ex officio.

In accordance with this arrangement, in September 1984, President Reagan nominated the first public trustees and these nominees were duly and promptly confirmed by the Senate. We had begun what seemed to us a useful innovation in the protection and the oversight and holding in trust of these trust funds.

The terms of the original members, their statutory terms, expired September 28, 1988. But subsequent recess appointments of the same individuals expired at the end of the last session of Congress, as provided in the Constitution, with the consequence that the posts of public trustees to the Social Security trust funds have been vacant ever since.

On June 13, 1989, after almost half a year had passed in this situation, Senator BENTSEN, our chairman, and I, as chairman of the Subcommittee on

Social Security, wrote to the President, President Bush, and recommended that Dr. Alicia Munnell, who is senior vice president and director of research of the Federal Reserve Bank of Boston, be nominated as the Democratic public trustee.

I state with more than the usual senatorial confidence that we sometimes invoke hereabouts, that we would not find in the country a better qualified person. Dr. Munnell is an economist, a banker—central banker—but also a person who, in her scholarly work, has paid special attention to the Social Security System and to the Social Security trust funds, and would be just the ideal public representative. She is the kind of person we had in mind when we created the post.

The statutory duty of the board of trustees is to hold the trust funds, and their most public act each year is to submit to Congress an annual report on the status of the funds, not just the funds but the system itself.

We seek to keep the trust funds in close actuarial balance for a 75-year period, three-quarters of a century into the future. There is no other such exercise made in American government. It is not an affair of amateurs. Maintaining this system is a task that I think it could be said when we first undertook to do it, we were not really that sure how it ought to be done. But over 25 years we have learned a great deal.

Eminent public men such as Robert J. Myers have served as chief actuary. The chief actuaries of the system have been persons of great eminence, and that distinction, if I may say, continues to this day.

Under the Social Security Act, the annual report of the trustees is to be submitted no later than April 1. I regret to say that it is now April 5. We have no report. The trustees have not reported. In a private trust fund this would at every minimum raise eyebrows, if not alarms.

I grant, Mr. President, that the date has slipped before. But the fact is the law says April 1, and for a report on a very large amount of money. A quarter of a trillion dollars, and we have no report.

One of the reasons I dare to think that the report is late is that there are no public trustees to attest to it. This is clearly the case. Whether it is the reason that we have a delayed report, I do not know. But it is inexplicable to this Senator that public trustees have not been nominated.

I do not wish to raise any partisan concerns here. This is a bipartisan concern in this body. The sense-of-the-Senate resolution I shall shortly send to the desk is a bipartisan resolution in the sense that Members from both sides of the aisle have supported it.

But at a time when the very gravest questions have arisen about the ongoing use of these funds as if they were general revenue, it seems to me singularly inappropriate that the trustees have not sent forward their report.

I have to assume that a majority of the trustees are sufficient for transmitting a report to the Congress with simply the positions of public trustees vacant. But I would like to suggest, Mr. President, that the Treasury Department does not seem to comprehend the alarm that is spreading in the country about this issue.

It would be some 8 weeks since the occasion when the distinguished Senator from Pennsylvania [Mr. HEINZ] and I appeared on the "Today Show," NBC television, and the moderator of that morning television show observed that I had referred to an editorial in the Rochester Democrat and Chronicle, which said what is taking place with the trust funds is thievery: "There is a word for this, thievery."

The moderator said to Senator HEINZ, would you agree with that characterization? And with the sort of bluntness—clarifying bluntness, if I can put it that way—that he often brings to debate on this floor, he said, "Certainly not. What is going on with the trust funds is not thievery. It is embezzlement."

Mr. President, we do not often hear the word embezzlement used on this floor with respect to the internal workings of the Federal Government. But, indeed, on five occasions in the 1980's, trust fund bonds were cashed in by the Secretary of the Treasury to obtain money to spend for non-Social Security purposes. They spent it to pay bills, pass out appropriations. They cashed in these trust funds. And, the Congress was not notified. In 1985, a total of $28 billion. And the public trustees then in office were not notified, as best we can tell.

We had to legislate to restore the funds lost during the period this "disinvestment"—a characteristicly disingenuous term—took place. What is disinvestment? They were cashed and the money was used for something other than benefits. That money is only to be used for benefits. Or let me say should only be so used. It is a technical fact the Treasury can use them for other purposes and does now. And it ought not. At least in the judgment of this Senator, it ought not. At the very minimum we have the right to hear the views of two public trustees whose position is established by law but which position is vacant.

The Treasury must know it is trifling with the confidence of the American public. If it cannot read the editorials, it can surely look at the cartoons, which are often more illuminating, in any event. This very morning, Her Block, the incomparable Herb Block has yet another cartoon in which he depicts three trust funds: The highway trust fund, the aviation trust fund, and the Social Security trust fund, the largest of all, broken into by his incomparable bank robbers with black eyeshades and sacks over their shoulders with the loot.

As I recall the caption, it was one of the robbers, the administration, saying to a bystander, "Don't be irresponsible—if you want us to stop robbing banks, tell us where else we can get this kind of money." There is a certain and particular quality to Herb Block's humor, but an underlying truth, invariably an underlying truth.

We will shortly be asking are there no public trustees, for fear that the trustees might go public, might object to the use of trust funds as if they were general revenues. They are not.

Mr. President, these are not general revenues. If you look at your paycheck, as Americans will do, the deduction for Social Security—disability insurance, survivors insurance, and retirement benefits—is next to a designating FICA, which stands for Federal Insurance Contributions Act, set there in 1935 by the Congress, and at the very specific insistence of President Roosevelt that these be separate funds, put into a special bond. It is a Treasury bond, and is never redeemed below par.

But be that as it may, Mr. President, the law provides for public trustees. It says that the President ought to nominate such trustee and allow us to consider their confirmation. We can assure, I can speak on behalf of the Finance Committee, we will hear these appointments immediately and promptly report to the full Senate the judgment of the committee and get this job done.

If ever there was a public trust, it is the Social Security trust funds. Public trustees are provided for by law. It verges on something less than seeing that the laws are being carefully executed. But those persons' nominations have not been received for these positions.

Accordingly, Mr. President, I send to the desk for myself, Mr. BENTSEN, Mr. BRADLEY, and Mr. HEINZ a sense-of-the-Senate resolution and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the resolution for the information of the Senate.

The legislative clerk read as follows:

A resolution (S. Res. 269), to express the sense of the Senate that the President ought promptly send to the Senate nominations for the vacancies on the Social Security Board of Trustees.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the resolution? The Senator from North Carolina.

Mr. HELMS. Reserving the right to object.

Mr. MOYNIHAN. And I do hope my friend will say that he will not object.

Mr. HELMS. I cannot say that, because Senators on this side have asked me to interpose an objection and express for them, to the Senator from New York the hope that as soon as we get back, language agreeable to them and to the Senator can be agreed to.

Mr. MOYNIHAN. Will the Senator yield for a question?

Mr. HELMS. Certainly. I was going to yield the floor in just a minute, after I object.

Let me say to the Senator from New York, Mr. President, that he has served this Nation well by raising this general question.

For many, many years, predating my coming to the Senate 17 years, 3 months, and 2 days ago, I was frequently condemned for having pointed out on our television and radio stations that there was no money in the Social Security trust fund, just a bunch of IOU's. People did not seem to understand that then. They could not believe it, just as I am sure the Senator has experienced himself. He has found people in total disbelief that the money is not there.

So I want the Senator to know that on the general proposition of 'fessing up about this charade about a trust fund, that he has served the public well, and I commend him for it.

Mr. President, I am constrained to object.

The PRESIDING OFFICER. Objection is heard. The resolution is placed on the calendar under the headline of Resolutions and Motions Over, Under the Rule.

Mr. MOYNIHAN. Mr. President, I would like to thank the Senator from North Carolina for his generous remarks, characteristic-generous remarks. May I ask him, do I understand him to have said that there are Members on the Republican side who would like to propose changes in the language of our resolution?

Mr. HELMS. That is my understanding. The Senator has served in an acting leadership role many times, just as I am, and I am told that Senators on this side wish to discuss the language of the resolution with the Senator from New York and hope that some compromise can be achieved.

Mr. MOYNIHAN. Mr. President, I am heartened by that information, and I am, of course, available for any consultations. The day is not done, and I am sure before it is over we will agree to some happy conclusion.

I yield the floor.

Mr. HELMS. Mr. President, I thank the Senator. Again, I commend him for the effect he has had on the consciousness of the people of this country. I think he has gotten the attention of a lot of people who were not even aware of what was going on. This has been going on on a bipartisan basis, administration after administration afer administration.

CHINA'S BOUQUET OF BARBED WIRE

Mr. HELMS. Mr. President, yesterday's Financial Times of London reported that a French company, Remy-Martin, is using Chinese slave laborers to produce the grapes that go into its wine produced at a plant near Beijing, and that this wine is being sold in the United States and in Europe under the "Dynasty" brand name.

Ms. Colina MacDougall, the Financial Times' China specialist, suggested that her readers "spare a thought for the people who have grown the grapes" the next time they go into a Chinese restaurant.

The Presiding Officer and other Senators, those who may be watching television in their offices, may be interested in examining an enlargement of the design of the label for this Dynasty brand white table wine as sold in the United States. I have had it enlarged so that it can be seen by the Chair and also by those watching the television.

This is a white table wine as sold in the United States. I am informed that this same Chinese wine may also be sold in the United States under the label using the Chinese word for Dynasty, which is "Wangsau." That is spelled W-a-n-g-s-a-u.

You can easily see, Mr. President, with this lively scene portrayed on the label, the green mountains and the neatly kept fields, what impression that makes. It says, "A medium dry wine which derives its refreshing flavour from Muscat grapes grown in the Tianjin region of China," and it says in smaller letters, "Product of China," and in even smaller letters, "Produced and Bottled by the Sino-French Joint Venture Winery, Ltd.," and so forth and so on.

Now, then, this wine and this label need to be examined because, if you look at that beautiful label and the rolling hills and the neatly kept fields, you have no hint of the cruel conditions which the slave laborers must endure in order to produce the wine.

Remy's Hong Kong manager calls the prison camp well-disciplined, and no doubt it is because the Communists and their camp followers in the Western business community prefer order and discipline because to them freedom and democracy are kind of missing. They do not want to interfere with making that money off of slave labor.

Now, like all other slave labor camps in the Communist Chinese gulag, the Tuanhe camp is in fact a death camp. As long ago as 1971, the Senate Judiciary Committee estimated that 25 million people had gone to their deaths in camps just like this one, death by exhaustion and inhumane living conditions.

The practice did not end in 1971. If anything, it has gotten worse. Ms. MacDougall, of the Financial Times of London—and she is regarded as a respected specialist on China—Ms. MacDougall quotes a human rights worker as saying to her, "Labor reform camps around Peking are absolutely stuffed with people since the Tiananmen crackdown last year." That provides an answer to the question of what became of all those students and teachers and workers and ordinary Chinese people who have absolutely disappeared without a trace during the past 10 months.

Consider this, Mr. President. The Chinese Communists, just like every other Communist regime in history, are desperate for money, hard cash. That is what brought Gorbachev and the Soviet Union to its knees. It was not a failure of anything except their economy. If their economy had blossomed, then there would be no reform anywhere in Europe, I can guarantee you that.

But the Chinese Communists, by using slave labor at no cost, obviously can undercut prices of products on the international market produced by free workers. For their Communist masters, these slaves also produce textiles which are coming into this country. We addressed this question on this floor yesterday. These slaves also produce steel and coal and electronics and industrial chemicals and machinery and other agriculture products, all for export.

Ms. MacDougall, of the Financial Times of London, reports that grape workers in China receive $10 per year—I repeat, $10 per year—for their work in producing the grapes of this wine. Slave laborers working in other sectors are no doubt paid at approximately the same rate, and that is the only way Communist China can be competitive, by using slave labor.

There are laws in the United States and in Britain and in Canada and perhaps even in France—I am not sure about France—against importing slave labor produce imported from countries like China, but these laws are by no means being enforced. These laws are filled with loopholes.

Mr. President, I am at this moment in the process of drafting a new bill to close the loopholes, so far as the United States is concerned, and increased enforcement of the law. Surely we, as a free nation, are not going to be party to the misery of the slaves in Communist China or anywhere else. Senators will be invited to cosponsor this legislation when I have completed it.

As a practical matter, I recognize that there may be very little we can do to close those slave labor camps in Communist China, but this much we must bear in mind. We are not and never should be obliged to provide a market for the products of these

camps and thereby make them all the more profitable.

Mr. President, I ask unanimous consent that the front page article from the April 4, Financial Times of London be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

CHINA'S BOUQUET OF BARBED WIRE

(By Colina MacDougall)

Next time you go to your local Chinese eatery and order Dynasty wine, spare a thought for the people who have grown the grapes. They may be inmates of one of China's forced labour camps.

Vineyards at the Tuanhe "labour re-education camp" south of Peking supply fruit to the Sino-French wine-making venture at Tianjin, which exports about 400,000 bottles to the US, UK and around the world. A bottle of Dynasty costs about £4.20 in London's Chinatown.

Imports produced by forced labour are forbidden by both US and UK law if they compete with items made domestically. This legislation as it affects China has been pretty much ignored in both countries. "This has never crossed our desks at all," said officials at the Foreign Office and Department of Trade and Industry.

"I wouldn't stop drinking it just because the grapes were grown by prisoners," said one London restaurateur whose fashionable restaurants in Chelsea stock it. "I'd rather they were growing grapes than in the salt mines."

But in the US, Jesse Helms, Republican senator for North Carolina, is drafting an act which will cover products made in circumstances which infringe human rights. If the draft becomes law—and debate on the issue is expected in May—many US imports and US joint ventures with China could come under scrutiny.

The venture, set up by Remy Associates (whose European company Remy Martin makes the cognac) and the Tianjin wine-makers co-operative, last year produced 1m bottles of Dynasty.

It is to be sold under a Chinese name in the US, according to Remy executives, to give it more appeal in Chinese restaurants. Of the 60 per cent sold in China, most goes to hotels.

The operation has grown steadily since its beginning in 1980 and the partners plan to renew their agreement for another 10 years. The venture also produces a Chinese style medicinal beverage, Dragon and Phoenix Three Wine, exported to Hong Kong.

"Yes, we get grapes from the Tuanhe prison farm," said Mr. John Wong, zone manager for north-east Asia for Remy and Associates, the Hong Kong company. "I went there a few years ago. It's a well-disciplined place, though I didn't see much—mostly just the reception room."

Harry Wu, now in California, spent 1962-1968 there, out of a total of 19 years in labour camps. His crime, he says, was to criticize Sino-Soviet relations when he was a student during the Hundred Flowers free-speech movement in 1957. In his time, Tuanhe exported 8m lb of grapes to Hong Kong and Japan.

The grapes come from 3,000 hectares of vineyards, cereals and other fruit cultivated by about 2,000 prisoners. Liu Shili, the camp commandant, said in 1986 that the prison made a net profit of $326,000, of which 60 per cent went to the state, 80 per cent of the rest to the staff and the final 20 per cent to the prisoners—about $10 each.

Dynasty is only one of thousands of exports made or partly made in China's prisons. Tuanhe also resported selling lamp wicks to Australia last year. Prison-produced textiles, machinery, pigs, meat, rice, steel products, tea—all appear to be exported.

Many small items are repackaged in Hong Kong. Mr. Wu recalled mining coal at a camp in Shanxi province which he says was sold to the UK. The Yingde black tea he can buy in California comes from a labour camp in Guangdong province.

"Labour reform camps around Peking are absolutely stuffed with people since the Tiananmen crackdown last year," said a human rights worker. "What makes the use of labour from Tuanhe particularly depressing is that most prisoners are there on 'labour re-education' " (to which people can be sentenced without trial).

Mr. Wu estimates that there may be up to 20m prisoners in Chinese labour camps. Human rights organizations say many slave in very harsh conditions.

Shandong province recorded that in 1957-87 prison-made exports went to 81 countries. Anhui claimed in 1989 to have earned $3.7m by prison exports, while Hubei sold prison-made silk, cotton, plate glass and machine tools to Europe and the US.

Mr. HELMS. Mr. President, I thank the Chair very much. I yield the floor, and I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. KERREY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. BRYAN). Without objection, it is so ordered.

CAMBODIA

Mr. KERREY. Mr. President, in a few days I will be leaving for a week-long trip to Southeast Asia. Most of my time on this trip will be spent in the nation of Cambodia.

I believe it is terribly important for our Nation's strategic health and our moral well-being that we take a long and hard look at our policies in Indochina and that our policymakers find out for themselves what the people of Cambodia want and need so that they can live in peace and with dignity.

Most of us have only a hazy image of who the Cambodian people are. If we think of them at all, we imagine a nation of victims, of nameless peasants. In fact, the Cambodian people possess a rich cultural heritage that celebrates and nurtures the family, community, and the spiritual life. Their tradition teaches them to revere the memory of their ancestors and to hallow the places in which they lived. We in our technological and fast-paced society could learn a great deal from the rootedness and continuity celebrated by the Cambodian people. Today their lives and culture are wracked by war and violence. And our current policies, Mr. President, are not helping them.

Ever since it gained its independence from France in 1953, Cambodia has played the unlucky role of political football in the deadly game of East Asian politics. Our ill-advised invasion of 1970 was part of a long history of interventions by foreign powers, as was the Soviet-backed Christmas invasion by Vietnam in 1978. Aggressive and expansionist though that action was, it brought some measure of deliverance to the people of Cambodia from the genocidal horrors that were inflicted on them by the xenophobic Khmer Rouge since 1975.

Following the invasion, the Khmer Rouge took to the hills on Cambodia's border with Thailand, where, with the help of Chinese arms and money, they have been waging guerrilla war ever since on the Vietnamese-backed government of Hun Sen, himself a former Khmer Rouge commander. They have been joined by two other resistance groups who, unlike the Khmer Rouge, are not Communists and to whom our Government has been sending covert aid: The followers of the elusive Prince Norodom Sihanouk and the Khmer People's National Liberation Front led by former Prime Minister of Cambodia Son Sann.

Mr. President, our Cambodia policy is a textbook example of cold war diplomacy. Trying to play the Chinese off against the Russians, we send covert aid to the Chinese client busy shooting at the Soviet client, on the theory that thugs they may be, but at least they are our thugs. The problem with that way of thinking, Mr. President, is that the cold war is over.

The problem with that way of thinking is that the cold war is over. I know that this particular area and this particular policy causes many Americans some confusion, and there is a great emotional barrier that separates many of us from even looking into China in 1990.

Mr. President, there is an excellent article written by Mr. Peter Grier, who is the State Department and Pentagon correspondent for the Christian Science Monitor, that appeared in the April 1990 edition of the Washington Monthly, that is entitled "Dealing With the Devil." It is an excellent article. It seems to me that it lays out with good detail some of the history, and I think sorts out in rather clear fashion the details of our own policy there, and how we have managed to arrive where we are in 1990. I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article is ordered to be printed in the RECORD, as follows:

[From the Washington Monthly, April 1990]

DEALING WITH THE DEVIL

(By Peter Grier)

On April 11, 1975, the chief of the United States mission in Beijing, George Bush, asked a storied prince to return to his homeland.

The exile was Prince Norodom Sihanouk of Cambodia, a small man given to nervous giggles and strangely effective political theatrics. Placed in power by the French in 1941, Sihanouk ruled Cambodia with vigor and inconsistency before being ousted by right-wing legislators in 1970.

Now he was living in a Beijing mansion and filling his time with cooking experiments. In Cambodia, the government of his replacement, General Lon Nol, was tottering as the fighters of the leftist Khmer Rouge battered their way toward Phnom Penh. Bush, through a French diplomat, offered to fly Sihanouk back to his capital if he would agree to once again become head of state. The United States felt that Sihanouk, a nationalist figure still beloved by peasants, was the only one who could head off a Khmer Rouge victory.

For Sihanouk it must have been a moment of supreme irony. His relations with the U.S. had often been poor, and U.S. officials had given tacit support to the rebels who had toppled him. Furthermore, he was in China as the nominal representative of the Khmer Rouge guerrillas, though in fact he detested and feared them and was as much prisoner as emissary.

But the American change of heart had been too long delayed. By the morning of April 12, the Khmer Rouge were in the Phnom Penh suburbs, and no one could guarantee Sihanouk's safety if he returned. He turned down the U.S. offer. "It was just too late," Sihanouk later told an interviewer.

ZEALPOLITIK

Today the former U.S. chief of mission is president. Sihanouk is still in exile. The murderous Khmer Rouge, having triumphed and fallen, are once again fighting their way toward Phnom Penh. And once again the United States may act too late to stop them.

The Cambodian killing fields, the emptying of the cities, the mindless xenophobia—all that may yet return. If it does, the United States will bear heavy responsibility for the tragedy. State Department officials say they don't want the Khmer Rouge back in power. But in one of those strange twists that gives geopolitics a bad name, the United States is for all practical purposes a Khmer Rouge ally.

Why a nice country like America got on the same side of the table with the worst killers since the Nazis is a complicated story. But the fundamental reason is that America's long-standing fascination with China was transformed by Henry Kissinger's realpolitik into a religion, one which leads its many zealots to bend over backward, in the face of all kinds of contravening developments, just to be China's friend. Kissinger's decision to play the China against the Soviets was in its day brilliant, establishing a reapproachment with a country showing some domestic promise while giving much pause to a menacing Soviet Union. But in the last decade the United States has frequently found itself blindly doing things for China that not only make no strategic sense but are also morally disastrous. Under the guidance of would-be China hand George Bush, this past year the fixation became particularly absurd and embarrassing: What was the point after Tiananmen Square and the triumph of glasnost? Nowadays China doesn't even amount to a glimmer of a reason for supporting the Khmer Rouge. At last, after years of moral complexity in the Far East, the United States has found a place where it can remove all ambiguity from its actions: In Cambodia we are doing a bad thing for a bad reason.

Playing the China card in Cambodia fits beautifully with what might be called the Metternich Fallacy—the belief that morality plays only a bit part in foreign policy and that it's the country with the most ingenious schemes that wins.

The current flurry of international diplomatic activity over Cambodia may yet produce some sort of workable, UN-sponsored peace plan. More likely it won't, and fighting will continue in a nation already as traumatized as any on earth.

Admittedly the situation in Cambodia is far from simple. The Khmer nation has long served as a regional Belgium, a battleground for larger neighbors who don't want to fight on their own territory. For those who have preferred to ignore Indochina since the Vietnam war, here is a quick glossary of the players and their positions:

Khmer Rouge.—Still the unspeakable thugs they used to be, still apparently headed by the notorious Pol Pot and his henchmen, the Khmer Rouge are the strongest faction in the tripartite force fighting the incumbent Cambodian government.

China.—Main patron, banker, and armorer of the Khmer Rouge, China is motivated by a desire to inflict as much pain as possible on a nation it views as an ungrateful upstart and regional rival, Vietnam.

Prince Sihanouk.—Head of one of two noncommunist resistance factions, and main political spokesman for the tripartite resistance, Sihanouk is continuing his uneasy associations with the Khmer Rouge, who are probably responsible for the death of at least 15 of his relatives.

United States.—Provider of aid for Sihanouk and his fellow noncommunist leader Son Sann, the U.S. hopes the Khmer Rouge role in the resistance somehow will disappear or be contained by Sihanouk political magic.

Hun Sen.—Prime minister of the current Cambodian government, which was installed by the Vietnamese after they conquered Cambodia in 1979; a former Khmer Rouge commander who defected to Vietnam in 1977.

Vietnam.—Having invaded Cambodia in the wake of brutal Khmer Rouge border raids, Vietnam has apparently now withdrawn its occupying forces but continues to provide arms and aid to Hun Sen.

USSR.—Once Vietnam's main backer, the Soviet Union may well have pushed for the Vietnamese troop withdrawal.

American officials have no illusions about the Khmer Rouge. They say they don't want them back in Phnom Penh. But the U.S. policy is a strange one of quasi-alliance with a group that is officially an anathema. The United States strongly backs Sihanouk and the Association of South East Asian Nations (ASEAN), both of whom consider the Khmer Rouge a military tool and a bad guy who is easier to deal with if he's on your side. The Khmer Rouge have an estimated 30–40,000 fighters, far more than the other resistance factions. Sihanouk calls siding with them a "terrible choice" he is obliged to take.

"We can't disagree with Sihanouk," says a State Department official. "Maybe there are other solutions, but we haven't found any."

The vision held in Foggy Bottom and ASEAN embassies goes like this: We'll be able to defang the Khmer Rouge with a comprehensive political solution. Either through a direct agreement between the resistance coalition and the Hun Sen government or under UN auspices, all the different political factions in Cambodia will agree to free elections. Military units will move to quarantine zones in the country and voluntarily give up their arms. The Khmer Rouge will get .01 percent of the vote in an election, providing their main backer, China, a face-saving excuse to drop them. With no money, no support, and no bullets, the last of the Khmer Rouge will live out their days as guerrillas, easily handled by Sihanouk or whatever democrat wins the vote.

Khmer Rouge leaders have indicated their willingness to go along with parts of this political vision. At last year's Paris peace talks, to everyone's astonishment, the Khmer Rouge said OK to quarantine zones.

But do we really believe this? Abiding by the ballot box? Voluntary disarmament? This is the Khmer Rouge, not the Boy Scouts of America. This is one of the most inexplicable horrors of modern times, a guerrilla group from Stephen King. In the three-and-a-half year period they ruled Cambodia, the Khmer Rouge killed more than a million people through execution, starvation, and overwork. They took the country back to a proclaimed "Year Zero" and made grass grow in the streets of Phnom Penh.

If the Khmer Rouge are to be kept from ever again seizing Cambodia, they will have to be defeated in war. The only questions are: When do you fight them, and who does the fighting? If you wait too long, it could be just like 1975—too late to stop them.

"If the Khmer Rouge take over, we'll share complicity," says Jeremy Stone, son of I.F. Stone, president of the Federation of American Scientists and a fierce critic of U.S. Cambodia policy.

TANKS AGAIN

Three problems combined with the overarching China fixation to dog the U.S. policy towards postwar Cambodia from the outset: overemphasis on superpower involvement, too much Washington intramural politics, and a considerable desire for revenge against Vietnam.

When Vietnamese Soviet-built tanks rolled into Cambodia on Christmas Day 1978, the invasion could have been seen as a nationalist struggle best avoided by the United States. Some high U.S. officials—notably, Secretary of State Cyrus Vance and his assistant secretary for East Asia, Richard Holbrooke—throught exactly that.

Cambodia and Vietnam, after all, had been vacillating between uneasy cooperation and war for centuries. Enmity was deep-rooted, particularly on the part of Cambodians, who had seen much of their territory gradually swallowed up in greater Vietnam. In his excellent history of 1970 Indochina, former Far East Economic Review correspondent Nayan Chanda tells a story he heard countless times in Khmer Rouge Cambodia, involving three Khmer forced laborers in 1820 who were punished by their Vietnamese overlord for not working hard enough. "The Vietnamese buried the hapless Khmers to their necks, so the story

runs, and used their heads to support a kettle for boiling water," writes Chanda.

But Jimmy Carter's National Security Advisor Zbigniew Brzezinski saw the new Indochina war as a black-and-white struggle between superpower proxies. In his view, Vietnam was a client state urged on by the Soviets in an effort to make a strategic thrust against the Chinese, Cambodia's ally. True, the Khmer Rouge were somewhat distasteful and hard to paint as aggrieved innocents. But it seemed that siding with a two-bit regional villain was surely defensible if it meant standing nobly against Soviet expansionism.

In his memoir, "Power and Principle," Brezezinski writes that in a January 1979 letter President Carter "reminded Moscow of its special responsibility for Hanoi's action and stressed that continued Vietnamese aggression could lead to serious problems for the USSR. These warnings went unheeded." And what might those threatened "serious problems" be? Mostly one—a united U.S.-Sino front. Brezezinski cautioned the Soviets that "their actions might have some impact on the nature of the American-Chinese relationship." In other words, get your friend to leave Cambodia to its genocidal maniac rulers or we'll tip the global geostrategic balance against you.

Besides anti-Soviet sentiment, the other main reason for taking this line was the, above all else, U.S. Far Eastern policy had become obsessed with keeping China happy. And the Chinese wanted the United States to support the Khmer Rouge. China saw the new Indochina war as a Soviet-backed move against their own region of influence. During his visit to Washington in January 1979, Deng Xiaoping spoke ominously of teaching Vietnam a lesson, foreshadowing the punitive Chinese attack against Vietnam that was to follow shortly thereafter. One major lesson of this move was that outmoded Chinese tactics were little match for a battle-hardened army, but that didn't stop Brezezinski from admiring Deng's style in his memoirs. In words that subsequent events have given more meaning than he intended, Brezezinski wrote that "I secretly wished that Deng's appreciation of the uses of power would . . . rub off on some of the key U.S. decisonmakers."

Milquetoast on China, the United States was anything but when it came to Vietnam. A trade embargo had been placed on Vietnam after the fall of Saigon, and the American public and Congress had no interest in extending a hand to a nation that had so recently bested them on the battlefield. Brezezinski considered relations with Vietnam a minor issue—one that threatened better ties with China.

So he scuttled the State Department vision of balanced openings to China and Vietnam in favor of the tilt to Beijing. The illogical outcome of this approach, as applied to Cambodia, became apparent in late 1979. By then the Khmer Rouge were reduced to desperate guerrillas, and Vietnam firmly controlled the Cambodian nation. But the United Nations Credential Committee voted 6-to-3 to let the Pol Pot regime keep its UN seat. The United States voted with the majority. Even though President Carter, human rights advocate, had called the Khmer Rouge the "greatest violator of human rights" in the world, his administration voted to give them international recognition. Similar votes transpired in subsequent years.

This policy rolled along unchanged through the early, firecely anticommunist years of the Reagan administration. With domestic tax and budget cuts high on the Reagan agenda, Nicaragua was the only non-Soviet foreign issue that got much attention in the White House.

In 1982 Secretary of Defense Caspar Weinberger swung through the region and took the opportunity to reiterate U.S. coldness to Vietnam as long as Cambodia was occupied. "We will not reward Vietnamese aggression of any kind," he said. At the same time, there was still reluctance on the part of the State Department to be drawn into a greater role in the Cambodian conflict. In 1985, then-Assistant Secretary of State for East Asian Affairs Paul Wolfowitz was testifying before Congress that military aid for the noncommunist rebel factions was a bad idea, and that the U.S. wouldn't even indirectly aid the Khmer Rouge.

But that same year a new Washington intramural battle over Cambodia broke out. This one wasn't between executive branch factions. It began in Congress, with Rep. Stephen Solarz as its instigator, and it ended by opening a pipeline of U.S. aid for the Khmer Rouge.

THE SOLARZ SYSTEM

Foreign affairs is not traditionally popular on Capitol Hill, due to its inherent lack of vote-getting potential. Legislators who take to it always face the danger of the "Chuck Percy Syndrome," after the former GOP senator from Illinois who was defeated partly because voters thought he was spending too much time hobnobbing with foreign dignitaries and not enough time in Alton or Chicago.

In this climate of low interest, Solarz has risen easily to power. He's smart, energetic, and meddlesome—reportedly, during last December's Philippine coup attempt he requested an Air Force plane so he could fly to Manila to criticize administration actions on site.

On Capitol Hill he is widely considered Mr. Asia, even by those who wish it weren't so. In 1985, Solarz decided that the logical end of the U.S. approach to Cambodia could be the horror of the return to power of the Khmer Rouge. His solution: Arm the noncommunist factions of the tripartite resistance. Even though the administration hadn't requested it, Solarz pushed for $5 million in aid to the fighters of Prince Sihanouk and Son Senn.

Ultimately the aid package passed by a large margin. In the House, the feeling among some members was that the Democrats needed an opportunity to look tough in the context of their opposition to arming the Nicaraguan contras and Ronald Reagan's continuing diatribes about the evil empire. Rep. Jim Leach, a moderate Republican and ranking minority member of Solarz's subcommittee, opposed the aid. "I have a sense that this committee is trying to make a mark on this town, that we're going to be more anticommunist than Ronald Reagan. That is tough competition," he said at the time.

Between 1985 and 1988, Congress voted $5 million a year in aid to the resistance. Largely due to Leach's efforts, the money was supposed to be for "nonlethal" aid—bandages and food as opposed to bullets. But as the experience with the Nicaraguan contras shows, the concept of "nonlethal" aid is a convenient fiction. Every dollar not spent on food is one freed up for AK-47s.

In 1989 the issue of forthright lethal aid arose: The White House went to the Senate and House Intelligence Committees with a request for covert funds to arm the Sihanoukist factions. With strong White House backing—including Dan Quayle's presence in the Senate chamber in case his tie-breaking vote was needed—the concept of lethal aid for Cambodia was approved by both the House and Senate last July.

STOOGE OF THE ROUGE

Ignited by an obsession with China and superpower politics, fueled by congressional macho posturing, it seems to be something driven by people who aren't watching where they're going. In July 1988, a senior administration official, briefing reporters on a trip by Secretary of State Shultz to Asia, was asked what measures the United States had in mind to keep Pol Pot from returning to power. "This is not anything that we have carefully worked out, by any means, or thought about to the degree, or extent of what is possible," he said, displaying a startling lack of follow-through.

Surely this is geopoliticism run amuck. Set aside for a moment whether Cambodia should have been seen as a superpower cockpit at all. Where else in the world are we continuing to pursue a policy which began as anti-Soviet and pro-Chinese? Not only have these two powers since swapped images—they're not even that mad at each other anymore. Remember that it was Gorbachev's visit to Beijing that forestalled the crackdown on the Tiananmen protesters.

While Vietnamese troops remained in Phnom Penh, the policy had some cover. It might have been asking too much of the U.S. body politic for it to condone the aggressive occuption of a neighbor by a country that had only lately been killing GIs. But it's 1990 now, and the Vietnamese have apparently pulled out and gone, leaving the Hun Sen regime they installed in their wake. It used to be that U.S. officials held out such a withdrawal as the goal they were after. As late as July 1988, Assistant Secretary for East Asian and Pacific Affairs Gaston Sigur was telling Congress: "We have refrained from establishing normal diplomatic relations with Vietnam as a demonstration of our opposition to Vietman's illegal occupation of Cambodia."

Is any change in U.S. attitude imminent? Probably not, if Secretary of State James Baker's comments on the subject early this year are indicative. At the Senate Foreign Foreign Relations Committee annual kickoff hearing. Sen. John Kerry questioned the continued full support of the tripartite resistance: "I'm deeply concerned that our current policy . . . is perhaps playing a greater role in facilitating the return of the Khmer Rouge than we would like." In reply, Secretary Baker held out the promise of a UN-negotiated political settlement. "I don't think that simply saying, well, let's recognize Hun Sen, let's talk to him now that Vietnam has left, is an answer that will get the U.S. where we want to go," said Baker. Where Baker, sponsor of two secret post-Tiananmen, high-level China missions, wants to go is Beijing.

Perhaps all parties involved will reach agreement on a transitional UN administration, and elections that cause the Khmer Rouge to fade gently into history will follow. Perhaps. But Sihanouk himself has said that a UN role could require that a multinational peacekeeping force—presumably to protect against the Khmer Rouge—remain in the country for 10 years or more.

Equally unlikely is a peace agreement calling for a transitional power-sharing arrangement among the three resistance factions and Hun Sen. Such an all-party coali-

tion would be "extremely fragile and easily shattered so that it would not last long," judges a U.S. Army War College study.

Gathering evidence indicates that Hun Sen is neither an abandoned puppet nor a closet Khmer Rouge but the closest thing to a legitimate leader that the traumatized nation has had in many years.

Joel Charny, the regional director of Oxfam America, a nonprofit international agency that funds development and disaster relief in poor countries, was impressed by a visit to Cambodia earlier this year. As far as he could see, all Vietnamese troops and advisers had indeed left. In Phnom Penh "whole streets that were blocked off because Vietnamese advisers lived there are now open. People bicycle down them," he said. Charny says the most important thing is that Hun Sen has struggled to rebuild the country and shows little evidence of Khmer Rouge like brutality. Compared to the tripartite resistance, "I'll take Hun Sen," says Charny.

START A WAR, LOSE A TURN

Throughout the years of the Reagan and Bush administrations, rhetoric against the Khmer Rouge has increased, but the policy of tacit support has persisted, as China continues to cast its large shadow over the problem. In deference to China, the ASEAN nations have taken a strong stand against Vietnam from the first days of the Cambodian operation.

Even so, Thailand, the ASEAN nation closest to the action, has shown more courage on this point than the United States has. Thai Prime Minister Chatichai Choonhaven has hosted three Hun Sen visits, and in January, 90 Thai MPs delivered Chatichai a petition calling for the ouster of Cambodian guerrillas, including the Khmer Rouge, from Thai territory.

As for Prince Sihanouk, he is no longer the man he was. He seems a captive of the Khmer Rouge even as he denounces them. "The Prince's entourage is penetrated by the Khmer Rouge . . . his army is likewise penetrated in key positions. So it would be grossly imprudent not to regard him as to all intents and purposes a Khmer Rouge stooge," concludes John Pedler, a British journalist.

Somewhere along the way, the concept of morality was left out of U.S. approaches to Cambodia. There doesn't seem to be much weighing as to whether it is right to grope for a perceived advantage in the superpower game by allowing the most evil political faction in the world to continue to exist, not to mention to support it. It is not enough to say we abhor it and will throw it away when it is no longer militarily useful; the thing to be disposed of may not cooperate. Will they really just wither away, these men who have killed millions? In Washington, assistant secretaries like to think they are tough. In reality, they are men with drivers who cannot imagine the toughness of those in the jungle.

The problem is that so often there is legitimate moral ambiguity in foreign policy. Was it right to invade Panama, killing civilians and U.S. troops, if democracy was the result? Is it moral to take bread from the mouth of a worker in South Africa through economic sanctions, if the end is pressure on the white regime? Is covert lethal aid always wrong? If it is, what about our role in Afghanistan? These are arguable questions, and the Fletcher School of Diplomacy types who run U.S. foreign policy learn to set them aside to prevent paralysis so that they can focus on perceived national interest. That's what realpolitik is all about. If an ethical impact statement had to be compiled for every U.S. action in the world, there wouldn't be any.

As a result, the Fletcher class leaves its "moral judgment" switch off. When a policy rolls in that is clearly wrong, it still gets waved right on through the planning department. Most officials just aren't used to thinking in moral terms. The very phrase makes them uncomfortable, or impatient, or angry. They call it a simplistic way of looking at the world. It is, but that doesn't mean some policies aren't just plain wrong.

In Cambodia the U.S. has been playing "Diplomacy: The Exciting Game of International Intrigue." This is a real board game published by Avalon Hill—a classic, in which every participant can play Metternich with his schemes. "Diplomacy" appeals to the Washington policy class. (I know. I play it with them myself.) It is set in the year 1901, in Europe. Players become one of the Great Powers, and negotiate with the others to strike alliances, make attacks, and divide up the spoils. It is full of conversations such as this: "If you support my Army Ruhr into Belgium, Bill's Army Gascony will be forced to cover Brest, thereby preventing him from building a fleet and allowing you to move into the Mid-Atlantic in two turns to make a strategic thrust at Portugal and Spain."

The glow of laying schemes is the thing. They never work out—but, oh, weren't they brilliant?

This fallacy of statesmanship animates the U.S. approach to Cambodia. We have a scheme. The problem is, the Khmer Rouge have guns.

Mr. KERREY. There is an interesting piece in this article, Mr. President. And I will read a couple of paragraphs about it. That is:

On April 11, 1975, the chief of the United States mission in Beijing, George Bush, asked a storied prince to return to his homeland.

The exile was Prince Norodom Sihanouk of Cambodia, a small man given to nervous giggles and strangely effective political theatrics. Placed in power by the French in 1941, Sihanouk ruled Cambodia with vigor and inconsistency before ousted by right-wing legislators in 1970.

Now he was living in a Beijing mansion and filling his time with cooking experiments. In Camobodia, the government of his replacement, General Lon Nol, was tottering as the fighters of the leftist Khmer Rouge battered their way towards Phnom Penh. Bush, through a French diplomat, offered to fly Sihanouk back to his capital if he would agree to once again become head of state. The United States felt that Sihanouk, a nationalist figure still beloved by peasants, was the only one who could head off a Khmer Rouge victory.

Mr. President, this particular episode led, in my judgment, to the unbalanced nature of our current policy. It is an attitude that assumes that all we need to do is choose a racehorse, to pick one individual over another, to have a policy that will work.

As a veteran journalist put it to me recently, today in Indochina, the Soviets are in retreat in Asia as well as Europe, which means that the Chinese who have become increasingly active, end up calling the shots while America remains basically passive, allowing events to proceed of their own accord as if we had no real influence in the region.

Technically, Mr. President, our nonlethal covert aid which journalists and congressional observers estimate to be somewhere between $30 and $20 million this year is going to the two noncommunist groups in the resistance coalition. But the plain fact is most of the fighting is being done by the Khmer Rouge, who also wield the diplomatic muscle in the resistance coalition. While we say we do not want anything to do with the Khmer Rouge, who killed one out of five Cambodians between 1975 and 1978, our money is going to the coalition that they effectively lead.

This administration's policy is in conflict with itself. One day we say the Khmer Rouge participation in any future Cambodia settlement is unacceptable. And the next day we say that we will play ball with them, if Sihanouk insists.

Mr. President, our leaders owe the American people an open accounting and an honest explanation of what we hope to accomplish in Cambodia. We are making a terrible mistake when we become more concerned with who may or may not rule Cambodia than with how that nation ought to be ruled.

A thoughtful assessment of our policies in Cambodia must begin with a definition of our interests there. There are, to my mind, three overarching and compelling reasons for us as a nation to take a continuing and active interest in the fate of Cambodia, and its people.

First, Mr. President, I believe we should take an interest because it is the right thing to do. As human beings we cannot stand back and watch a nation languish under authoritarian rule and civil war. The exact nature of Cambodia's strategic value to the United States is often debated by the members of the defense and intelligence communities. What is not subject to debate is the importance to us of the well-being and friendship of the Cambodian people.

The second reason is because Vietnam is a significant military power in this region. We must understand and tame its expansionism for the sake of our friends and interests in the Pacific. It is always in our interest to encourage free countries with free markets, not just for business' sake but because it is our democratic faith and our will to use that faith to make a better world that gives our own endeavors meaning and purpose.

The third reason is because we will be facing up squarely to what we are doing in Cambodia. It is absolutely essential, if we ever hope to come to grips with our experience in Vietnam, that we do this. We must do this if we

hope to function as a mature and responsible world power.

Mr. President, by now it is clear beyond any doubt that we are entering a new phase of world history. The universal values and beliefs upon which our country was founded and which guided our decisions for 200 years are triumphing around the globe, not because we have imposed them with military advisers and gunboats, but because they are compelling in their own right, and they are just.

We still, as a nation, have a great role to play on the world stage, but first we must understand exactly what we can and cannot do. Cambodia, for me, is a good place to start.

I do not believe that we can just go over there with some magical chess move and solve everybody's problems. Before we can do anything, we have to find out just what is going on in that particular region. For example, on September 26 of last year, Vietnam announced the complete and final withdrawal of all of its troops from Cambodia. Yet, there are persistent rumors of several thousand Vietnamese troops that are still there. It would be a good thing to know if in fact they are still in that country. I believe it is crucial and critical to our policy for us to make that determination.

We do not even know how many people of voting age live in Cambodia; yet, we are rushing quickly to a policy that hinges upon a free and open election in that nation. We do not know how many people would even vote for the Khmer Rouge, who, incredible though it may sound, have adroitly played on anti-Vietnam sentiment and exploited their marriage-of-convenience to Sihanouk to portray themselves as the standard bearers of Cambodian nationalism.

Their return to power in 1975, their defeat of Lon Noll in 1975 was in no small measure, as a consequence of the support Sihanouk gave them saying that the people should rise up against Lon Noll and support the Khmer Rouge as their liberators.

There are many other things we do not know about Cambodia, such as how much popular support the existing government enjoys, and whether it would be possible to construct any future government at all without them. We do not know whether or not the resistance coalition is viable without the Khmer Rouge.

So it seems to me, Mr. President, we blunder about providing assistance to a coalition we hope will itself fall apart, bewildering our friends in the region and spending precious tax dollars to further the goals of some of the greatest mass murderers in history.

I am personally going to Cambodia, not to preach, or stand with a magic wand trying to wave away the problems, not to score, finally, any debating points. I am not going there with some idea that I hope to win an argument upon this floor. I am going there to listen, to learn, hopefully, to understand.

When I return, I hope to further explore the various policy options open to us; whether it would be changing course and refusing to allow the Khmer Rouge their customary seat at the United Nations, as we have up until now, encouraging the non-Communist resistance groups to stand on their own feet, or making use of our trade policy to shore up our relations with our friends in the region.

Unless we change course, our policy will unravel of its own incoherence and demonstrate once again to the people of Southeast Asia that America is a confused and heedless giant whose understanding is too shallow and whose attention span is too short to be of any help in bringing peace to the region.

If, instead, we can formulate an alternative, one that does honor to our deepest values and safeguards our interests, now and in the future, we will have earned the friendship of the Cambodian people and proven to ourselves that we can wield our stength with good sense, compassion, and integrity.

PROTECTION OF THE CHINESE STUDENTS

Mr. KERREY. Mr. President, I want to associate myself with the remarks made earlier this afternoon by the Senator from Illinois [Mr. DIXON].

It seems to me, Mr. President, that President Bush did not in fact in the end issue an Executive order protecting the Chinese students, as was represented to many of us during the debate after we came back from the Christmas recess in January.

The President's veto was sustained at that time, and I believe it is entirely possible that that veto would have been overridden had Congress understood clearly, had the Members of the Senate understood clearly that the Executive order had in fact not been issued, and that what occurred instead was a simple directive to the U.S. Department of Justice.

It seems to me, Mr. President, that the United States has, in this past decade, been blindly doing things for China that not only make no strategic sense, but are also morally disastrous. We must take care in the nineties, when the world will be looking to the United States as a country which—as President Havel said to us in the joint meeting—has had 200 years of uninterrupted progress toward the goal of democracy. They will be looking to us not only for our leadership, but for our words and our moral guidance.

We have provided far more than just words and moral guidance in the past, Mr. President. At times we have responded with our lives and with our help in the defense of individuals whose freedom is being denied them. It is incumbent upon us today, with the possibility of having to give our lives, which is now a remote possibility, that we be prepared to stand with our words in the defense of individuals on this Earth of ours, whose freedom is being denied as a consequence of military dictatorship.

With that, I yield the floor.

The PRESIDING OFFICER. The senior Senator from West Virginia [Mr. BYRD] is recognized.

LITHUANIAN INDEPENDENCE

Mr. BYRD. Mr. President, on February 25, the Republic of Lithuania held the first multiparty elections anywhere in the Soviet Union in 72 years. Candidates supported by the Sajudis independence movement captured an overwhelming majority of seats in the legislature. On March 11, that new legislature met and unanimously passed a declaration of Lithuanian independence. What a courageous act on the part of those men and women!

I have heard people suggest that the situation between Lithuania and the Soviet leadership is somehow comparable to the crisis that faced President Abraham Lincoln at the outset of the War Between the States, that Gorbachev is simply trying to keep the Soviet Union together, and that their internal affairs are none of our business. I submit that a more accurate historical analogy would be to our own Continental Congress and America's declaration of independence from England. The Lithuanians are not trying to destroy a freely formed, homogenous union because they have a policy disagreement with the current regime. The Lithuanians, like our own Founding Fathers, are declaring their independence from an authoritarian, imperial power that is occupying their country and denying them their own sovereignty.

Mr. President, the people of the Baltic nations have been subjugated by the rule of Soviet Empire for almost half of a century. During that time the United States steadfastly refused to recognize Soviet sovereignty over these nations. We referred to the Baltic States of Estonia, Latvia, and Lithuania as "captive nations." And they are still politically captive, despite the recent elections, and despite the Lithuanian declaration of independence.

Freedom for those nations, which was traded like so much feed grain between Hitler and Stalin during the Second World War, is not yet secured, not yet won, but suddenly we have begun to waver in our support for the restoration of full international sovereignty for those nations. Are we so

concerned not to offend the sensitivities of the Soviet Politburo? Is it inconvenient for the Lithuanians to demand their freedom at this time?

The Lithuanians have taken bold and courageous steps toward securing self-determination. In the wake of these historic events, the United States seems suddenly to have lost sight of what we had hoped for all of these years and lost sight of our own fledging country and the drives and ambitions and hopes and aspirations of our own forefathers in the late 1700's. Suddenly, it is not convenient for us to continue to support the cause of freedom for the captive nations. Have we decided that the freely elected governments of Lithuania and the other Baltic nations must meet some higher test before they can count on our support? The State Department says the new government must be in effective control of its territory before we can establish diplomatic relations. What does that mean? Do we intend to wait until the Soviets have withdrawn all of their troops and relinquished any claim on Baltic territory before we state clearly our support? Does the administration plan to wait until every Soviet soldier has been withdrawn from East Germany before we recognize the newly elected government there? Did President Endara have control of Panamanian territory before we recognized his government? Why, then, have we lost the will to speak out plainly, clearly and unequivocally in the case of the Baltic republics? These people deserve our support. They have pleaded for international recognition, and we ought to make our position clear.

Some may say President Gorbachev has accepted the right of republics to secede and is trying to enact a law to allow secession to go forward in an orderly manner. The People of Lithuania see it otherwise. They believe that this is only a delaying tactic. Mr. Gorbachev's proposition will require a 75 percent approval vote, followed by a 5-year waiting period, and then approval of the Soviet Union. The people of the Baltic countries have good reason to doubt that will ever happen.

They know that immigration patterns over the past 45 years, including the influx of ethnic Russians, have changed the demographics of their countries, and that these changes would make it difficult, if not impossible, to reach the 75-percent hurdle. And they also remember that their countries were forcibly incorporated into the Soviet Union and have been illegally occupied since the Second World War. They want their freedom. They deserve their freedom.

America, the Senate of the United States, the Congress of the United States, and the White House should stand clearly, unequivocally, and visibly for that process to move forward now. We should rejoice in the freedom of these valiant courageous people, rejoice in their courage, in their faith, and their aspirations. America has become the dream which so many other peoples and so many other parts of the world have sought to emulate. Let us not disappoint the Lithuanians.

I am worried that we are losing the will to speak out in support of oppressed people struggling throughout the world. It seems to be more important to maintain smooth relations and it is important that we maintain smooth relations with regimes.

But it is also important and even more important that we not hide from expressing the faith in freedom and expressing support for other people who have been denied freedom so long and who want it now.

It seems that we have learned to take freedom for granted here in our own country, forgetting the sacrifices that our forebears were willing to make that we, their sons and daughters, could enjoy.

The United States cannot stand up for self-determination in Poland, Hungary, and the rest of Eastern Europe where it is easy now to do so and then remain silent on the Baltic question because it poses a more serious problem for Gorbachev. If we ignore the Lithuanian struggle for self-determination after calling for it for over four decades our credibility is reduced throughout the world, particularly in the emerging democracies of Eastern Europe and the Third World.

So I urge the President to take action in support of the Lithuanians and to make the United States position clear to Mr. Shevardnadze, and I urge him to make it clear to the Soviet leadership at every opportunity.

What we think, if we express it with conviction, can have an impact on the thinking of the Soviet leadership and on its actions. We do not have to rattle any swords. We simply need to speak out and let the world know what our conscience is. After all, the world looks to America for leadership and we ought to demonstrate that we are capable of it and worthy of it.

We are obligated to do whatever we can to encourage the Soviets to grant the Baltic nations their freedom.

What does America stand for if we do not stand for freedom in Lithuania? What does America stand for if we do not stand for freedom in Estonia? And what does America stand for if we do not stand for freedom in Latvia and are willing to say so? Have we lost faith in ourselves? What is wrong with America and America's leadership in this hour of Lithuania's need?

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The absence of a quorum having been suggested, the clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. EXON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

NEBRASKA KIDS HELP REDUCE THE DEFICIT

Mr. EXON. Mr. President, I would like to take a moment to recognize the great work of the kids in Nebraska School District 60 in Hastings, NE. After completing a monthlong study of the Federal budget, they decided to do something about the national debt.

By collecting dimes and quarters from their parents for good grades and organizing an aluminum can collection drive, the students sent a check for $115 to President Bush to be used to reduce the national debt.

The students also participated in posture and essay contests and learned a great deal about the Federal budget.

Soon after the Senate returns from its break to observe religious holidays, the effort to craft a 1991 budget will be one of the first orders of business.

The hard work, good study, and public service of the kids, teachers, and parents of district 60 serve to remind the Senate of its mission in the budget debate. The Congress must reduce the deficit for the sake of America's young people. The national debt is a burden on their economic future.

The Hastings Tribune printed an excellent story on the work of the students of district 60 and reprinted some of their award winning essays. I ask unanimous consent that the text of these articles be printed in the RECORD at the close of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. EXON. I urge my colleagues to review the thoughtful work of the students of district 60 and keep their good advice in mind as the Senate begins work on the 1991 budget.

EXHIBIT 1

[From the Hastings (NE) Tribune, Feb. 22, 1990]

LOCAL STUDENTS STUDY U.S. DEBT

(By Julia McCord)

A poster, one of several in a brightly-colored display on the bulletin board of District 60 gymnasium, says it all: "I hate the (national) debt. It is stupid."

The 100 students at District 60, located one mile south of U.S. Highway 6 on U.S. Highway 281, came to this conclusion after completing a month's study of the federal government.

The study included talks by Lloyd Brown, business and management instructor at Central Community College-Hastings Campus, Dennis Storer, professor of political science at Hastings College and Conrad Grothen, a local parent.

After getting all the facts, they took action.

They decided to help reduce the national debt by raising money and sending it to President George Bush.

The 18 fourth-graders, whose teacher is Kelli Trausch, started it all.

They choose to collect aluminum cans. Then they challenged the fifth-graders to an aluminum can count-down. The challenge spread to other grades.

They also thought up a creative way to collect money from their parents.

They contracted with them to earn a certain amount of money for grades they earned in each subject. And they came through, Mom and Dad shelled out 10 to 25 cents for each A or B.

The children collected $90 for their good grades. They added $15 from can collections (the fifth grade won 1,700 to 1,560)

Soon a letter and a check for $115 will be on their way to the President. The money is earmarked for deficit reduction.

The children said they will ask President Bush to write and tell them how he used the money.

The school also conducted poster and essay contests. Hastings Mayor Phyllis Lainson presented awards Tuesday to first-place essay winners. They are: Abbey Bruntz, Grade 3; Jason Buss, Grade 4; Paige Miller, Grade 5, Stacy Mousel, Grade 6.

The first-place poster winners were Scott Pauly, Grade 1; Casey Marsh, Grade 2; Julia Grothen, Grade 3; and Lanette Grothen, Grade 4.

The fourth-graders said they have learned a lot. They had several suggestions for reducing the debt.

They are: cut aid to Japan by 50 percent; reduce military forces in South Korea and Western Europe now that the Communist threat has diminished; ban the import of goods we can make ourselves; increase social security taxes by 1 percent, state income tax by 2 percent, and federal income tax by 3 percent; raise luxury taxes; tax the rich; raise taxes on cigarettes and alcohol; cut military spending; and cut the number of federal jobs.

They also had ideas on how money should be spent.

Erica Rudolf, 9, said more needs to be allocated to the needy.

Maricela Espinosa, 10, said financing the drug war is critical.

Another voted for education. Still another favored putting the money in a savings account.

At least one student doesn't mind studying subjects that are usually not the fare of fourth-graders.

Derrick Schwabauer, 9, said he wants to study about the deficit until it stops.

ESSAYS ENCOURAGE A BALANCED BUDGET

The following are some of the award-winning essays by District 60 students:

ABBEY BRUNTZ, GRADE 3

I would like to relieve the deficit by encouraging people to not waste natural resources and to spend less money.

I would do this by telling people to not live so fancy. The government should build up a savings account. We should all learn to make better use of who we have at home. The government should spend less money on other countries so we can have more money to help the homeless and stop drug abuse here in America.

JASON BUSS, GRADE 4

My essay is about some of my ideas on how to lower the deficit. It consists of ideas I have heard from teachers from the community college and from other various speakers.

The budget deficit of the United States government is large each year because the government spends more money than it gets from taxes. Each year the government does not get enough money to pay what it borrowed the year before. So each year the national debt gets larger. The government has to pay more money each year for interest on the money it has borrowed in the years before.

The first thing to do is to stop waste at the Pentagon. We give other countries such as Panama billions of dollars even though they can't ever pay it back. They can't even pay back the interest. We give so much support when they have never and will never give us things such as military aid.

The second thing we should do is raise taxes on the wealthy who can certainly pay more taxes. Government officials should be included in these taxes. They go home with thousands of dollars as their paycheck.

The third thing we should do is lower our weapons. We spend billions of dollars on weapons. We have bought many weapons already but then if something new comes out they are thrown away even though they cost so much.

Another problem is we are borrowing billions of dollars from social security when we all know that then the baby boomers will not be covered.

Taxes will eventually be raised to the point when people cannot pay them. That will make problems into the future that kids like us will have to deal with. Kids are the leaders of tomorrow. I think that the money from some of this should go to grants to gifted programs or research on AIDS.

In conclusion I think America should be smart with their money and when trying to solve a problem they should listen to their people.

RYAN SHUEEY, GRADE 4

I think that the best way to balance the budget is to increase the budget of those agencies that raise money for the government.

One of these agencies is the Internal Revenue Service. Right now their budget is being cut and they may need to lay off over 5,000 workers this year.

I don't understand this because my mother was reading from a newsletter from where she works. It said: "In New Jersey alone, close to $696 million from about 41,000 tax returns that haven't been filed or are in a holding file because there are not enough people to do this work."

If it is like this in New Jersey it is about the same in all the states.

It's too bad that there aren't more people to collect this money. When the Internal Revenue collects money, they tell the states so they can collect their taxes and increase their revenue too.

I think instead of lowering their budget we should get more people to work there because for every $1 they spend they make $6. So this would help to balance the federal budget without hurting other budgets like education and welfare.

PAIGE MILLER, GRADE 5

The biggest problem our government has is a very large national debt. We are adding to this problem by borrowing money from the social security fund. If we can't repay the money borrowed from the social security fund, then older people won't be able to collect social security payments when they qualify.

My solution to the problem is to cut back on military spending and to cut back on the number of government jobs. The military buys more equipment and services than are necessary. We could have a strong military without spending so much money. Our government could also save money by cutting back on the number of government jobs. We need better managers in the military and in our government who can decide what is necessary and what is a waste of money. Our government needs to start living within a budget just as most families do. If we spent a lot less on the military and on government jobs we would have more money to pay off the national debt.

STACY MOUSEL, GRADE 6

Our nation is in debt. The problem is the government is spending more money than they have to spend. There are lots of ways we can cut spending like stop buying so many expensive weapons. Another way is that we can stop giving money away to help foreign countries.

There are things we should not cut like drug programs. If we don't have drug programs so many people will be able to use drugs and get no help.

Another thing we should not cut is education. We all need an educated life. If we are not educated it will be hard to live in the future. Some of these things are very important to many people. They should not be taken away.

We can find ways to solve this problem. The government could raise taxes to get the money they need or they can just stop spending so much money.

If government overspending does not subside we will have to put up with high taxation. We can help solve this problem by working together to reduce the national debt.

Mr. EXON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. COATS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

LITHUANIA

Mr. COATS. Mr. President, several years ago, when the late Soviet diplomat Andrei Gromyko nominated Mikhail Gorbachev to head the Communist Party, he warned that the new leader had "a broad smile, but teeth of steel."

Today those teeth have left scars in tiny Lithuania. Incidents of aggression, even violence, raise urgent questions about Soviet promises of peaceful change in the Baltic States.

The Congress waits on events in sombre expectancy. We could simply be seeing Soviet posturing aimed at gaining the upper hand in future negotiations. Or we could be witnessing an escalating contest between intimi-

dation and defiance in which Lithuanian hopes will end in cataracts of violence and fire.

In either case, I believe American commitments are clear. We have an historic role as defender of freedom in times of maximum peril. And we have a specific commitment, championed since Franklin Roosevelt, to an independent Lithuania.

In the last year or so, we have lived through a new springtime of nations in Eastern Europe. It has been a welcome relief to those who've grown weary of the long twilight struggle. But we cannot forget that our strength and commitment remain the motive for this momentum.

Soviet rationalizations are transparent. Spokesmen have defended their actions in Lithuania in the language of law. They claim as their primary motivation the prevention of anarchy. They mouth the words of peace and security.

But for 50 years the Lithuanians have known the stability of membership in the Soviet Empire. And they have only found the peace of the grave or the security of the slave.

Now, with insistent voices, they demand what is theirs by right. They make a claim we've recognized for generations.

I am told that since the Nazi-Soviet pact, which set the lock on Lithuania's prison, the flag of a free Lithuania has flown at the Department of State. I am informed that 10 administrations, of both political parties, have maintained diplomatic relations with the free Lithuanian legation in Washington.

It was our consistent commitment to Lithuanian freedom that helps explain that Nation's heroic assertiveness. We guided them down a path and nurtured their just indignation. Any failure to uphold this commitment would be to extinguish our credibility before a watching world.

Duff Cooper, a Member of the British Parliament in the 1930's, once advised, "It is of first importance that we should know our minds; it is of almost equal importance that the world should make no mistake about our intentions."

What should be done? At the very least, we should make sure the Soviets know the stakes for which they are playing. That should mean promising an end to talks negotiating new trade agreements if Lithuania is not given a plan for its freedom. It should mean appointing a U.S. Representative to the Lithuanian Government, formalizing a commitment that we have already given. And we in the Congress should strike economic development funds for the Soviet Union in any legislation sent to us, until the situation in Lithuania is peacefully resolved.

In any case, we cannot allow a scheme of partial pardons to guarantee the Soviet Union remains a prison of nations. Words of unequivocal support for Lithuania can make a difference to a people who have survived on the hope of those words for five decades.

The crisis in Lithuania is a test. It is a test, first, to see if Soviet leaders remain Stalin's children.

But it is also a test of American character. It will determine our willingness to remain the leader in freedom's cause. And if we fail that test, we will be haunted once again by pleading voices. Voices we heard after Yalta. Voices we heard in Hungary in 1956, and Czechoslovakia in 1968.

None of us want to hear those voices again.

STATE JUSTICE INSTITUTE NOMINATIONS

Mr. HEFLIN. Mr. President, I rise in support of the President's nomination of six highly qualified individuals to the board of directors of the State Justice Institute. The six nominees who were cleared by the Senate Judiciary Committee earlier today include four new appointments and two incumbents.

The four new directors are:

Malcolm M. Lucas, Chief Justice of the Supreme Court of California (replacing Ralph J. Erickstad, Chief Justice of the Supreme Court of North Dakota);

Vivi Dilweg, circuit judge, Brown County, WI (replacing Rodney A. Peeples, judge, second judicial circuit, South Carolina);

Carl F. Bianchi, Administrative Director of the Idaho Courts (replacing Larry P. Polansky, former Executive Officer of the District of Columbia Courts); and

Terrence B. Adamson, of Dow, Lohnes & Albertson, Atlanta, GA (filling the vacancy left by Lawrence H. Cooke, former chief jugde of the New York Court of Appeals, in 1988).

The two reappointments are:

James Duke Cameron, Justice, Supreme Court of Arizona; and

Janice L. Gradwohl, judge, County Court, Third Judicial District, Lincoln, NE.

Both Justice Cameron and Judge Gradwohl have served on the Board of Directors since the inception of the institute in 1986. Judge Gradwohl will soon leave full-time status but she will remain eligible for judicial assignments under the provisions of Nebraska law.

The State Justice Institute is making an increasingly important contribution to the administration of justice in this country. The institute made its first grant less than 3 years ago; since that time, it has awarded over $25 million to support more than 250 projects serving the most critical needs of the State courts across the Nation.

The institute is at the forefront of helping judges respond more effectively to the Nation's drug crisis, to the needs of victims and witnesses, and to the crisis in America's families. SJI has greatly enriched judicial education and demonstrated new applications of technology that should lead to lasting improvements in both the State and Federal courts. I believe that the great experience and insights of the directors to be confirmed today will enable the institute to continue to find effective ways to help the State courts respond to the many serious challenges confronting them.

I also would like to express my sincere appreciation to the three departing directors who served the institute so well since its creation. Judge Peeples, the vice chairman of the Board of Directors, Chief Justice Erickstad, and Mr. Polansky, the treasurer of the board, made unique contributions to the success of the institute. I thank them for their great help in establishing SJI as an integral part of the Nation's justice system.

PROPOSED AMENDMENT TO S. 543, JOB TRAINING AND BASIC SKILLS ACT

Mr. HEINZ. Mr. President, I rise at this time to inform my colleagues of my interest in offering an amendment during Senate consideration of S. 543, the Job Training and Basic Skills Act amending the title II of Job Training Partnership Act [JTPA].

My amendment seeks to reserve 9 percent of the JTPA title II State funds for the Governor. This reserve allows States to respond to unanticipated fluctuations in unemployment and economically disadvantaged populations.

As proposed under S. 543, it maybe virtually impossible to assist service delivery areas [SDA's] that find themselves with an unpredicted increase of eligible title II recipients and without the available resources to serve them. This amendment, supported by the National Governors' Association, [NGA] empowers States to target resources toward areas with unmet need.

I urge you to join me in helping our Governor's respond to unanticipated fluctuations in unemployment and economically disadvantaged adult, older workers, and youth.

Mr. President, I ask unanimous consent to print in the RECORD my proposed amendment to S. 543, and letter from NGA supporting it.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

AMENDMENTS INTENDED TO BE PROPOSED BY MR. HEINZ

On page 91, line 3, insert "(i)" after "(c)(1)".

On page 91, line 4, strike "91" and insert "82".

On page 91, between lines 10 and 11, insert the following:

"(ii) After determining the amounts to be allotted under subsections (a) and (b), 9 percent of the remainder shall be reserved for allocation by the Governor. The Governor shall determine which service delivery areas within the State shall receive funds pursuant to this clause and shall allocate all of such reserved funds to such service delivery areas.

On page 91, lines 12 and 13, strike "this subsection" and insert "subsection (c)(1)(i)".

On page 104, line 21, insert "(i)" after "(c)(1)".

On page 104 line 22, strike "91" and insert "82".

On page 105, between lines 2 and 3, insert the following:

"(ii) After determining the amounts to be allotted under subsections (a) and (b), 9 percent of the remainder shall be reserved for allocation by the Governor. The Governor shall determine which service delivery areas within the State shall receive funds pursuant to this clause and shall allocate all of such reserved funds to such service delivery areas.

On page 105, lines 4 and 5, strike "this subsection" and insert subsection "(c)(1)(i)".

NATIONAL GOVERNORS ASSOCIATION,
Washington, DC, April 4, 1990.

Hon. JOHN HEINZ,
U.S. Senate, Russell Senate Office Building, Washington, DC.

DEAR SENATOR HEINZ: I am writing on behalf of the National Governors' Association to convey the Governors' support for your proposed amendment to enable each Governor to reserve up to nine percent of his state's service delivery area [SDA] Job Training Partnership Act [JTPA] allocation so that he may respond to unanticipated fluctuations in unemployment or other local emergency needs.

We commend the amendments proposed in S. 543, which would result in greater targeting of JTPA funds to individuals with multiple barriers to employment, and have urged only that these provisions result in changes that we can effectively implement at the state and local levels. Specifically, the Governors consider it essential that the amendments acknowledge that definitions of those most in need or most at risk in local populations will vary across the country and even within any single state.

Similarly, the Governors support amendments which would result in greater resources being targeted to the areas with the greatest incidence of poverty and consider these changes to be an important recognition that allocation of funds must be consistent with policy changes.

At the same time, however, it is important to acknowledge that the economic circumstances within a state are subject to change. A Governor should have the capacity to respond to communities that are unexpectedly in need of additional resources to serve their economically disadvantaged population, specifically where the need is not adequately reflected in aging national data (for example the Census). This will be particularly important if the proposed changes to the formula are enacted. Whereas currently, JTPA funding allocations are determined two-thirds by unemployment factors which are easily captured through timely unemployment rates, under the proposed construct only 25 percent of the formula will be driven by unemployment levels. Seventy-five percent will be based on the size of the economically disadvantaged population. Our understanding is that it will be extremely difficult for the Department of Labor to incorporate timely data; therefore distributions within the state may be based on out of date information unreflective of the true incidence of poverty.

By enabling the Governor to reserve 9 percent of the Service Delivery Area allocation, we will most effectively ensure that the most needy sub-state areas are in receipt of an adequate level of JTPA funds.

As you know, there is precedent for this set-aside in the amendments passed to Title III of the Job Training Partnership Act, the Economic Dislocation and Worker Adjustment Assistance Act [EDWAAA]. Under EDWAAA, a Governor may reserve up to 10 percent of his state's allocation so that he may then distribute this amount to the substate areas on the basis of unexpected need. The Governor must allocate this money within nine months of the program year.

We support your proposal to incorporate a similar provision in the amendments to Title II. Please let me know if I can be of assistance. On behalf of the Governors, I thank you for your efforts.

Sincerely,

RAYMOND C. SCHEPPACH,
Executive Director.

COMMENDING R. MARSHALL WITTEN

Mr. LEAHY. Mr. President, there are many citizens who perform public service to their State and country with very little recognition. Until recently, few Vermonters knew the history of R. Marshall Witten, son of a Texas oil driller, who came to Vermont in the sixties. He served as Bennington County State's attorney, was elected to the Vermont General Assembly, and has chaired the board of trustees of the Vermont State Colleges for 12 years.

A profile of Mr. Witten, written by Allen Gilbert, appeared in the Sunday Rutland Herald of April 1, 1990. I ask that it be reprinted in the RECORD so Members of Congress and the general public can read about this extraordinary Vermonter and good friend. I have always treasured my friendship with him and his advice and help.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Rutland Herald and the Sunday Times Argus, Apr. 1, 1990]

MARSHALL WITTEN WINS RESPECT FOR PUTTING STATE COLLEGES ON EVEN KEEL

(By Allen Gilbert)

To look at R. Marshall Witten is to see Eastern Establishment Ivy League: bow tie, wire-rim glasses, Oxford button-down pinstripe shirt, gray flannel suit and the visage of an Andover preppie. He's trim and healthy-looking, like he just stepped off a sailboat.

There's a good deal of reality behind the image. But the true Marshall Witten comes from Texas ranch land and oilfields—not as George Bush, who was bankrolled before he went there—but as the son of an oil driller who worked his way up to foreman and superintendent. His father's father had been a rancher, "a genuine cowboy," Witten says, complete with spurs and 10-gallon hat. No one in Witten's family had ever been to college.

Last month, in San Diego, Calif., Witten was honored by the Association of Governing Boards of Universities and Colleges for his "extraordinary qualities of leadership and dedication" in serving 13 years as trustee for the Vermont State Colleges, 12 of them as chairman.

Witten's personal story—from his early years in the small Texas town of Poteete, to his college and law school education, his legal career, his service in the Legislature and his time with VSC—is, he says, the story of what VSC is all about.

"I'm the person that education made," he says.

Witten's success story is also, to a large degree, a parallel for the Vermont State Colleges. To see the colleges now—there are five in the system, Lyndon, Johnson, Castleton, Vermont Technical and Community College—is to see stable enrollment, new facilities and a growing appreciation of their role in Vermont higher education.

The image hides the fact that 13 years ago VSC was a squabbling, disorganized collection of five schools that was, some felt, on the brink of ruin. Disorganization and questionable bookkeeping had led to a $2-million deficit. It appeared a campus might have to close.

Witten is credited with turning the system around.

There just isn't any question that they've come a long way since then (1977), and the person who deserves much of the credit for that is Marshall Witten," says former Gov. Phil Hoff, who, as lawyer for the colleges' faculty union, has often tangled with Witten.

The VSC system still has its problems. Faculty salaries are low (the latest union contract talks have reached an impasse), tuition is high (the highest of any state school in the country), and there is never enough of anything (last year Johnson ran out of dorm space and housed students in a motel and later the president's house).

But the colleges are survivors and have, in a sense, come from nowhere—just like Marshall Witten.

Witten was in 10th grade in Hammond, Ind., (his father had transferred there to work at petrochemical plants), when, one day as he was walking down the hall, the school guidance counselor popped out of her office and asked, "How'd you like to go to college?"

The Ford Foundation wanted to send some sophomores to college to see if the last two years of high school were really necessary. The guidance counselor thought Witten, a hard worker, might be a good candidate.

Witten took the Scholastic Aptitude Test (SAT) that spring and scored in the 97th percentile. He applied to Yale and was accepted. In September 1952, at the age of 15, he was in New Haven, Conn.

The beginning months were a bit tough. But after the first semester. "You couldn't have found" the 50 young Ford scholars at Yale, Witten says. Social problems? "You simply learned after the first date to keep your mouth shut."

If Witten's experience is any indication, the last two years of high school are indeed superfluous. He finished Yale in four years and went straight to Columbia Law School.

After law school he worked for awhile as an assistant in the Manhattan district attorney's office. But then, one very hot, windless Labor Day weekend in New York City, he telephoned a former law school friend ("his name was Williams, so the alphabet put me next to him in all my classes") who had married a Vermont woman, and he went to visit them in Bennington. Witten stayed.

He established a criminal law practice, and eventually, in 1967, became Bennington County state's attorney. He was elected to the Legislature in 1969, and within two years had been appointed to one of the most powerful positions in the House: Appropriations Committee chairman. He had quickly developed a reputation for organization, detail and toughness.

Gov. Madeleine M. Kunin, who served in the House beginning in 1972 and later also chaired the Appropriations Committee, remembers that she knew Witten first by reputation. At a recent awards ceremony in her office for Witten, Kunin said, "I'd always heard how tough he was." Then, she said, "I met him."

He seemed a calm and compassionate person, not quite the bulldog she had expected. She and others came to realize he was a gentle man but one who held strong convictions, for which he would fight.

When Gov. Richard A. Snelling had to fill an unexpired term on the VSC board in August 1977, he turned to Witten. Already cracks had appeared at VSC. The five schools fought for turf, offering competing courses and arguing their own self-interested financial cases before the Legislature. In truth, there was no system. The chancellor held titular power, while the five presidents went to bat for themselves.

Snelling prodded the system to define its "mission" and to coordinate its courses. Then in October 1977 reports surfaced of a $2 million operating deficit, which had actually been concealed for several years by tapping bond reserves. Politicians argued with college administrators over who was to blame. The administrators said the system was underfunded, while politicians charged mismanagement. Finally the Legislature bailed the system out with a special appropriation.

By appointing Witten, then a Snelling ally, the governor was seen as sending in a disciplinarian to handle a wayward child. Sen. Graham Newell, chairman of the Senate Education Committee and a Lyndon State College professor, managed to hold up confirmation of the appointment at least for a while.

Newell "was not going to let a minion of Gov. Snelling go unscathed," said Hoff.

Witten's appointment finally was confirmed, of course, but several years later the Snelling-Witten alliance would wither somewhat over the freezing of some funding for the colleges and over the colleges' general level of state support. "Witten took on Dick Snelling," says Hoff. "It indicates how strongly he felt about the state colleges."

Although new to the board, Witten plunged into the system's problems. He chaired an ad hoc panel that organized a committee structure for the board—the trustees had before always met as a whole—and clarified the board's role in setting policy. He initiated a re-examination of the structure of the VSC system, which led to revised by-laws and a new chain of command from the presidents to the chancellor of the board.

At one point he floated the idea of eliminating the presidents, but after further study the board decided that wouldn't work.

"My appointment, and my early years, were to impose a fiscal control over the schools," Witten says now. If that meant cutting top administrative jobs, he'd consider it.

Witten also pushed for recognition of the system's mission for the entire state. Before, the individual campuses had been seen largely as small comprehensive colleges serving local regions. When a new chancellor, Richard Bjork, was hired in May 1978, one of the first things he did was to restructure the entire system.

No longer would each school offer general courses and reach out mainly to its immediate area; instead, the "colleges should develop distinctive abilities and play to their strengths" and offer specialized professional training programs, Bjork said. Castleton, for example, would stress nursing, criminal justice and physical education therapy; Johnson, environmental studies, the performing and creative arts and human services; and Lyndon, meteorology, media services and recreation. VTC already had its niche as a technical training school school (and indeed served as a model for the entire restructuring, says Witten), as did CCV, which catered to adults wanting courses that would help them with their jobs.

Witten, who was elected trustee chairman in February 1979, and Bjork became a team. Witten's hallmark was asking a series of basic questions: "Who are we? Where are we going? How do we get there? How do we know when we've arrived?" After getting the answers, he insisted that the board and Bjork act on them.

The administrative reorganization and campus restructuring led to some angry confrontations. In May 1979 more than 100 students and faculty hanged Bjork in effigy at VCS's Waterbury headquarters. Castleton President Donald Wilson resigned that same month to head up a Long Island college; he said the campus restructuring was based on "a hardness of soul and a sclerosis of imagination." CCV President George Bilicic also resigned.

The confrontations were heightened by Witten and Bjork's desire for tighter management control of the VSC system. They collided head on with the VSC faculty union. Through contract negotiations, labor board hearings and court cases, the two sides slugged it out. One Lyndon professor called on the other VSC board members to "silence" Chairman Witten because he was "fomenting hatred" between teachers and the colleges, administration. Another professor said Witten was "obviously an embarrassment" to the trustees.

Witten's response was, "Let there be conflict. It is inevitable in light of what VSC management is trying to do."

Looking back on those years, Witten says calmly, "The boat was leaking and sinking, and we were in an emergency situation."

"It was simply, 'You take this bucket and bail now. We really don't have time to discuss the dimensions of the bucket, or where you will bail. Just bail."

"We stopped the lead," he says, "we floated the hull and tied it up at a safe dock."

The administrative reorganization had transformed the board into an efficient, productive body that established policy and passed on to the chancellor to carry out. The chancellor now stood as the chief administrator of the entire system, with the five college presidents reporting to him. Tighter administration had also led to tighter finances; it was no longer possible to hide overspending by raiding other accounts, and the college presidents stopped making their separate, competing pitches to the Legislature.

By 1981, Bjork could announce the system was again financially stable. Also in that year he said VSC would move to serve nontraditional students—a prescient strategy that positioned VSC in the forefront of a major demographic shift, that of more adults attending college.

"We entered a second phase," says Witten, "where we could stop bailing and ask, 'Where should we sail this boat? What crew shall we have? What cargo shall we have? How do we design the superstructure? What kind of sails shall we have"?

Witten himself seemed to adopt a new management tack. From confrontation he moved to conciliation. Hoff says the union also saw "the time had come" to explore whether union and management could "work together to keep the college going," Contract negotiations went more smoothly in 1982, and in 1983 the two sides met informally to discuss cooperating to meet mutual goals.

It was a turning point, says Hoff. "There's no question there's been cooperation since that date, with success on certain things."

"I wouldn't want to suggest they (union and management) are off dancing together," he says, "but certainly there is more cooperation now."

The new relationship continued into the later 1980s, leading to a 1988 meeting of management and union with Albert Shanker, president of the American Federation of Teachers, which is the VSC professors' parent union.

"Shanker's message was that if you want educational improvement, you work outside the collective bargaining process to do so," says current Chancellor Charles I. Bunting. Faculty were asked to join the trustees' Futures Task Force, which had been established in 1985 to evaluate VSC's mission.

In July 1984 VSC suffered another setback, the death from cancer of its energetic chancellor, Bjork. Lawyer and banker Hilton Wick agreed to serve as interim chancellor, and in 1985 Bunting was hired.

VSC still faces serious problems. Faculty salaries are low; part-timers, who teach a quarter of the courses, earn little more than substitute high school teachers. The general economic slowdown threatens the system's requested state appropriation of $18.2 million, which means tuition could rise at double-digit speed. That, in turn, could choke enrollments.

Current union leaders respect Witten, even though they might not always see eye-to-eye with VSC management.

The faculty union president, Assoc. Prof. Tim Sturn of Lyndon State College, says, "There's no question Marshall Witten loves VSC and acts in what he believes are its interests. I don't think anyone doubts his sincerity, although at times we might disagree with his judgment."

Sturn applauds Witten "for his energy and persistence" but cautions "(I) hope he and the board have additional energy to give to VSC because it appears we're headed into difficult times again."

The staff union president, Castleton circulation librarian Jean DeVoe, says her dealings with Witten are minimal but that he is

clearly "a good leader. He's done a lot for the leadership of the state colleges."

Bunting sees VSC's big challenges as "Keeping going on the road to improvement of the quality of our programs" and working with the State "to come to terms with what it (the state) really wants in terms of its investment in higher education."

Despite a continued financial squeeze, Witten tries hard to find a way to bring about, for Vermont students, " that wonderful magic" of the classroom.

An important part of the campus restructuring was to put more emphasis on job training programs so students and their families could see the direct, financial advantage of going to college. During their four days students also could be given a hefty dose of traditional liberal arts courses.

"We're going to have to find more efficient ways to get the job done," says Witten. But his commitment remains: "We want all Vermonters to be able to experience that wonderful magic, regardless of where they live in the state or how much money they have or how much academic preparation they've had or regardless of any psychological or emotional fear they might have in going back to the classroom."

He says he sees an educated citizenry as key to the state and country's health, and feels the necessary minimum level of education has moved beyond completion of high school. That's why, he says, access to college is essential.

Currently Vermonters constitute 78 percent of the VSC student body. The system enrolls 85 percent of all adult learners outside Chittenden County, and adults are a majority of students on all campuses.

Witten is modest about the award he received in San Diego. "If the success story of the state colleages in the last 13 years says anything, it says what a group of people can do if they work together. It's not the story of any one person, or even the board of trustees alone. It's the story of a lot of folks."

Union president Sturn echoes that view, "Everyone, from the board on down to the dorm doorkeepers, deserves credit for improving the VSC. * * * People worked collaboratively."

It's clear, though, that Witten has been a personal dynamo in that story. The dedication shows in his 100-percent attendance record at VSC board meetings, despite the 250-mile round trip from his home in Bennington. (His record for committee and planning meetings slips to 97 percent.)

During his 13 years on the board, he has kept up a personal regimen of doing "something athletic everyday," although he admists he has had less time for hobbies such as hunting, fishing and flying (he has a commercial pilot's license). He does sail, though, and he says he hopes at some point to get back to playing piano.

THE DEATH OF OTHA WEARIN

Mr. HARKIN. Mr. President, Otha Wearin had a pioneer spirit that led him to Washington, DC, as the youngest Member of the U.S. House of Representatives. That same spirit guided him as he experimented with farming practices that conservationists came to praise, and as he wrote a series of books and essays.

As a Congressman from the Fifth District of Iowa, Otha served his State with conviction and a sense of history. When he spoke of his time in Washington, DC, in the 1930's, the listener left with a special understanding of the Roosevelt era. He was an important part of the Progressive movement and was an inspiration to many other young Iowans who dreamed of a life in public service.

Otha Wearin has a rightful place in Iowa history. But he also has a special place in my personal history. I too served as the Representative of the Fifth District and Otha Wearin was a learned teacher as well as a valued friend. Many days, I would stop at Nishnavale Farm to share a meal with Otha and his wife Lola and talk about politics, philosophy, and life on the prairie.

Otha was a great lover of history and possessed a keen insight into people. I considered—and still do—his advice and understanding invaluable.

On a personal level, I will miss Otha Wearin's fellowship, but I will remember—as all Iowans will—how effectively our State was served by Otha's wisdom and dedication to Midwest values.

THE TEXTILE, APPAREL AND FOOTWEAR TRADE ACT OF 1990

Mr. HEFLIN. Mr. President, I rise today to express my strong support for the Textile, Apparel and Footwear Trade Act of 1990 which my friend from South Carolina, Senator HOLLINGS, introduced yesterday. I am proud to be one of the 54 original cosponsors of this important legislation.

It is not often that legislation is introduced in this body with 54 original cosponsors. But I would urge each of the 165 countries which export textiles into our Nation each year to note the level of interest and concern in the Congress for immediate action to protect what remains of this vital domestic industry.

Since coming to the Senate in 1978, I have seen textile legislation pass the Congress by an overwhelming majority on three separate occasions. Each time, that legislation has been vetoed, as various Administrations have been largely unwilling to vigorously enforce the trade laws and agreements meant to protect our domestic industry.

During that time, thousands of jobs have been lost in this country, many of them in Alabama. Over the course of the past decade, imports have continued to grow on average 12 percent per year while our domestic market has grown only about 1 percent per year. So our industry has lost 11 percent market share annually this decade.

Mr. President, this situation in getting worse, not better. In 1989, we saw a 13-percent increase in imports, as import penetration of clothing and clothing fabric reached 58 percent and as import penetration of footwear reached 70 percent. If this trend continues, we will not have a textile industry left in this country in the year 2000.

I therefore urge my colleagues to support this bill which squarely addresses the problem faced by our domestic industry by imposing global quotas on textiles and apparel with 1 percent growth annually, freezing footwear imports at the 1989 levels, providing for a quota auctioning pilot program in 1991 for one-fifth of the imported textiles and apparel, and by giving increases in quotas to countries which increase their purchases of U.S. farm products.

We must let this administration know early on that we will no longer tolerate lackadaisical enforcement of our trade agreements—that the textile, apparel and footwear workers in Alabama, in South Carolina, in Georgia, in Maine and all over our country deserve more than lipservice when it comes to their futures and to the future of our textile, apparel and footwear industry.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

MASS TRANSIT

Mr. PELL. Mr. President, I rise today to bring to the attention of my colleagues a column that recently appeared in the Rhode Island Providence Journal. The column, "Ride mass transit and see how it grows," by Barry Schiller and Sarah Gleason of the Rhode Island Sierra Club, is a call to arms to various groups in Rhode Island: Federal, State and local government, public transportation agencies, the private sector, environmental groups, and citizens to increase the use of mass transportation while decreasing pollution of the environment. Although this particular column is directed at the people of Rhode Island, I commend it to my colleagues as guide for similar action in other States.

In particular, I would point out the comments of the authors regarding proposals by the Bush administration to cut Federal funding of transportation and to, once again, eliminate all funding for Amtrak. While States and localities should not expect a blank check, continued reductions in transportation aid are counterproductive.

I ask unanimous consent that the column be printed in the CONGRESSIONAL RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD. as follows:

RIDE MASS TRANSIT AND SEE HOW IT GROWS

(By Barry Schiller and Sarah Gleason)

All Rhode Islanders should be concerned about the continuig decline of mass transit in our state. The latest blow is $300,00 in cuts to be implemented between now and June 31 as part of the governor's deficit saving package for the remainder of this fiscal year. The governor has proposed further cuts for fiscal 1991.

The decline of mass transit means more congested roads and more pressure to build new highways through our remaining rural areas. The proposed $40 million for a new Route 138 through South County is a recent example.

The decline of mass transit means more pollution: Not incinerators, not power plants, but motor vehicles are the main source of air pollution in Rhode Island, contributing approximately 84 percent of the carbon monoxide and seven percent of the gases that form smog. Our state does not meet the health-based federal air quality standards for these pollutants; increased use of mass transit was one way the state hoped to meet these standards.

The decline of mass transit also means more energy is used for transportation, contributing to global warming and to pressures for oil drilling in environmentally sensitive areas. More of our dollars go to out-of-state oil companies and to OPEC; RIPTA fares remain in Rhode Island.

Ten years ago state planners targeted a 20 percent increase in RIPTA ridership, from 20.8 to 25 million annually, as one means of reducing air pollution. But the opposite has happened: Ridership dropping by 28 percent to 14.9 million. Nothing should be done that would reduce ridership even more. Bus fares and advertising contribute $7.7 million to RIPTA's present budget of $24.5 million, while the state contributes $11.7. Increasing RIPTA's state subsidy, projected to grow to $16.3 million by 1993, is unrealistic. Something must be done to stop this downward spiral. The Sierra Club proposes the following:

To RIPTA: Give up your "give-up" attitude. Market RIPTA's services aggressively to attract more riders. Through monthly pass programs, promotions, better information services, and cooperation with RIPTA drivers and caring employees. RIPTA can increase use throughout the state. Other systems have proved it can be done. The MBTA, for instance has increased its ridership by 23 percent in this decade. If RIPTA had done the same, we would not be in this mess today.

To the State: Operating subsidies to RIPTA have been generous, but alternative means of funding, not dependent upon the state's economy, must be found. In Connecticut, bus service is financed from a dedicated fund created from gasoline taxes, fines, and other income. In Rhode Island, a one-cent increase in gasoline taxes would generate about $3 million for this purpose. With better service we would have fewer cars on the road and have to spend less on highway repairs.

Promotion of RIPTA must be coordinated with that of other transport such as vanpooling and ride-share. In Connecticut, a statewide campaign, "Ride Together Connecticut, It's The Best Way To Work," has reduced use of single occupancy vehicles significantly in only 18 months. Money must be found to promote mass transit, as with any business losing market share, failure to advertise effectively is false economy.

State employees, like others, should be encouraged to use public transit. Surveys indicate that state employees do so less than other workers, encouraged to use their cars by subsidized parking paid for, finally, by the taxpayers. The state can start promoting RIPTA by making bus schedules and books of RIPTIKs available to state workers, and other employees, through their place of work.

The state must also support rail transport. Not a penny of state money is spent on rail though millions go to aviation, a fuel-expensive way to travel. In the $9-million transportation bond issue approved by voters in 1988, about 30 percent went for airports and nearly 70 percent for highways. Only two percent went for RIPTA, and nothing at all for rail or bikeways.

To the City: Providence pays nothing for RIPTA, so has all the more responsibility to encourage downtown workers to use the bus for commuting and business whenever possible. Transit planners encourage intermodal connections, but the city has done nothing to mitigate the effect of moving the train and bus stations away from downtown and from each other. The new train station has an out-of-date bus schedule, no maps, and no short-term parking for those needing to make a quick stop for tickets or schedules.

To the federal government: Incredibly, President Bush has proposed a further 23 percent cut in federal transit aid and the elimination of all AMTRAK train service. Congress must resist these irresponsible proposals. Federal aid to transit, however, should not be a blank check, but should reward those systems that attract more riders.

To the private sector: If you provide free parking for employees or customers, you should also provide incentives for using public transit. Fewer parking lots will not only save you money but will help preserve green spaces and lessen water-polluting surface runoff. RIPTA can assist you through its RIPTIK program. Some employers do offer this service, including Textron and Amica.

To environmental groups: Help save transit by educating your members and the public to the many environmental advantages of a good public transit system.

To the people of Rhode Island: Many ask the Sierra Club what they can do to protect the environment. One way is to use buses and trains wherever feasible. RIPTA and AMTRAK service is usually pretty good; try it. Using public transit will help us get better service that will attract more riders. This is the only way we can reverse the present downward spiral.

THE NEW AMERICAN WORKER

Mr. MOYNIHAN. Mr. President, Mr. Paul F. Cole, secretary-treasurer of the New York State chapter of the AFL-CIO, has written an excellent and hugely well-researched piece on the changing education needs of our Nation's work force, entitled "The New American Worker." The article is particularly apt on the day that we have just voted to reauthorize the Carl D. Perkins Vocational Education Act. Mr. Cole provides a cogent analysis of the change in the "very nature of work" and calls for restructuring our educational system.

I ask unanimous consent that Mr. Cole's paper "The Changing American Worker" be printed in the RECORD at this point, and I would urge Senators to read it with careful attention.

There being no objection, the paper was ordered to be printed in the RECORD, as follows:

THE NEW AMERICAN WORKER

(By Paul F. Cole)

The United States is in the midst of a great national debate over the future of its economic role in the world and how America's education system should respond. The fortunes of both are interwined and the solution to each is the same—restructuring. The very changes that are taking place in America's most progressive corporations must be mirrored in her schools if the United States is to remain a world leader. The economic restructuring requires an educational restructuring.

America is experiencing a transformation not witnessed since the Industrial Revolution.

An increasingly competitive global economy is challenging America's economic preeminence.

Fundamental changes are rapidly taking place in the nature of work and of the workplace requiring new and different skills.

Demographic trends and societal changes are transforming America and presenting new concerns about the workforce of tomorrow.

Our ability to respond will have a major impact on the economic, social and political future of our nation.

A CHANGING ECONOMY

Following World War II, the American economy emerged as the undisputed leader in the world. The United States enjoyed a huge domestic market. It was the world leader in technology. It possessed a workforce more skilled than most other countries. It was wealthier than other nations and had the best managers in the world.

Since the war, America's economic primacy has waned as other nations rebuilt their industries, made improvements in technology, upgraded their education systems and adopted new and innovative management practices. For example, while American management continued its traditional strategies, the Japanese adopted the management system of W. Edwards Deming that is widely credited with improving the quality and productivity of Japanese industry.

Demings, an American, told U.S. businessmen following World War II that unless they changed their approach to productivity and quality, our economy would suffer.

Fundamental to Deming's approach was his belief that workers were not simply flesh and blood robots, but thinking, creative human beings who could make major contributions to improving production quality and efficiency.

Using Deming's strategy, the Japanese began to out perform American industry and gain increasing market share in auto, electronics and other fields. American management was quick to blame taxes, regulations, unions, societal problems or anything other than how their corporations were run.

The American production system was based upon principles developed by Frederick W. Taylor called "scientific management." It is characterized by the division of production work into simple, repetitive tasks performed by unskilled workers under

strict control of supervisors. The system is highly authoritarian.

In addition, many place the blame for American corporate failure squarely on U.S. management's preoccupation with their personal welfare and on short-term profits, while ignoring more long-run investments in technology and workers. Robert Hayes and William Abernathy in the *Harvard Business Review* charged the economic decline to "the failure of American managers to keep their companies technologically competitive over the long run." They argued that the failures were in large part due to a concentration on short-term marketing and financial concerns and a neglect of production improvements (Hayes and Abernathy, 1980).

This philosophy was a major contributor to the decline of America's economic leadership. The United States has gone from the world's largest creditor nation to its largest debtor nation in less than a decade. We are experiencing the largest budget and trade deficits in our history.

The impact on America's workers and families has been devastating. Hundreds of thousands of manufacturing jobs have been lost, entire industries have been gutted and opportunities to build new industries in such fields as electronics have been squandered.

Since the early 1970s, real wages and incomes have stagnated and declined as a result of a weakening U.S. economy. In take-home pay, U.S. workers in 1986 were 14 percent worse-off in real terms as they were in 1973. The real earnings are lower today than in 1961. American families are working more hours yet earned 11 percent less in 1984 than they did in 1967 taking inflation into account (*Crossroads for America,* 1987).

Much of America's economic strength was based on mass production techniques that made it possible to employ workers with modest skills to rurn out low-cost, high quality products in large volume. The benefits were good profits, good wages and an ever expanding market. Using machinery and the assembly line, most jobs could be done by unskilled or semi-skilled workers with skilled craft workers performing some functions.

Today, however, that machinery is available virtually anywhere in the world where workers are willing to work longer hours at lower pay than American workers.

American can no longer compete at prevailing world wage levels for low-skilled or semi-skilled labor without suffering a massive decline in its standard of living.

Today, high industrial wages require highly skilled workers interacting with the latest technology. In today's world, it is easy to move machinery, capital and technology, but it is difficult to sustain a large and well educated workforce.

According to Thomas Bailey, the successful corporations of tomorrow will be those able to respond to ever changing markets for goods and services. Consumers are increasingly demanding more variety, style, quality and service. As a result, firms are attempting to increase their variety and reduce the time it takes to make their products or services available. To accomplish this, they are not only taking advantage of new technology but restructuring their production process to one where "the relationships among individuals within firms, among the departments and divisions of firms, and among firms in the overall supply chain are more integrated, interactive, immediate and complex" (Bailey, 1989). These trends are already occurring in the more progressive corporations in textile and other industries.

THE CHANGING NATURE OF WORK

Current efforts by American corporations to restructure are having a far reaching impact on the nature of work and the workplace.

Bailey argues that the changes have resulted in occupational upgrading and not "deskilling." The very lowest level jobs are being eliminated and middle level jobs are becoming more demanding. Increasing intellectual and skill demands are being placed on lower and middle level workers. These personnel will require greater specific technical skills as well as the know-how to manage and operate in interactive environments.

Bailey points out that workers will need a greater ability to work in an environment that is more uncertain and non-routine.

Sue E. Berryman of the National Center on Education and Employment at Columbia University also describes dramatic changes in the nature of work. Citing the work of Bailey and Thierry Noyelle, she notes that "The key change in the economy for both the manufacturing and service sectors is a shift from mass production to flexible production" (Berryman, 1988). Citing changes in the textile and banking industries, Berryman concludes that the traditional methods of work are being altered.

"Ever since Henry Ford mobilized the labor of low skilled factory workers through the assembly line to replace teams of skilled workers, technology innovations, at least in the United States, have almost always been synonymous with specialization of labor and mass production. Flexibility has usually been achieved by reversing Ford's process, moving back up the range of skill levels, shifting from specialized to general purpose tools and machines, and reorganizing how people get the work done" Berryman declared.

Both in banking and textiles, workers are more likely to be engaged in a greater variety of activities and thus need to know more than just the particular task they are assigned. Workers are also becoming involved in contributing to ways production techniques can be improved.

The advanced technology, which is increasingly characterizing new machinery, is also having an impact. Historically, machines and production methods were basically simple. How machines operated could be visually observed and with some additional skills, could be repaired.

That is rapidly changing, Berryman asserts. Today's machines have microprocessors and other electronic components. It is impossible to directly observe how they function. As a result, workers and repair technicians must be able to process information symbolically which requires not only higher literacy skills to read complicated manuals and diagrams, but the ability to think and reason differently. As Berryman notes:

"Productivity gains are coming as much from changing the way that workers work together, their orientation towards their work and the nature of their responsibility and involvement in the firm's changing strategy and orientation towards the markets as from applications of new technology. While many jobs used to be based on the repetition of a particular set of well-defined tasks, jobs are now more likely to demand varied and unpredictable responses to a variety of stimuli and information. Employment now involves interaction in constantly changing ways with production technology. The spread of micro-electronics and related technologies does not just result in new machines that must be mastered, but in a much deeper change in the ways that workers relate to the production process and to each other."

Former Secretary of Labor Ray Marshall also maintains that America's ability to compete in a global economy will depend upon basic restructuring of how we produce. The traditional mass production system is obsolete and will have to become less bureaucratic, more decentralized and rely more on advanced technology.

Mass production technology was a standard, stable technology. Information technology is much less standardized and stable which needs constant improvement. It has greatly changed what people need to know and how they work (Marshall, 1987).

Marshall suggests there are three ways to attempt to compete internationally.

First, use standardized technology and unskilled workers—a system under which the United States will lose. Second, try what both General Motors and the Defense Department tried—use higher technology and unskilled workers. They both found out that didn't work. Third, use higher skilled workers and leading edge technology—a system that is most likely to succeed. It will succeed because those workers who use the technology will be able to improve the technology itself and make most effective use of it.

With information technology, work becomes very different than in the mass production system and more of the work becomes indirect because the machines do the direct work. Indirect work also has very different characteristics.

New technology makes more information available and requires the worker to know what to do with it. The use of the new information technology tends to be group work and not individual which is characteristic of mass production work. Group work requires new skills such as the ability to communicate with precision. Working in a team also requires better interpersonal skills and the ability to learn in a different way.

In the mass production system, workers learned by seeing and observing. Information technology learning, on the other hand, is abstract and not directly observable. For example, you can't see what is happening inside a computer.

Marshall argues that creative thinking depends on one's ability to do abstract thinking. By definition, Marshall says, "creativity is what can only be seen in the mind's eye" (Marshall, 1989).

Thus, only by combining leading edge technology with higher order thinking skills will America be able to advance productivity and effectively compete in the international market place.

Shoshana Zuboff, of the Harvard Business School, in her book *In The Age of The Smart Machine: The Future of Work and Power,* underscores the work of Bailey, Berryman and Marshall.

New technology, computers in particular, can transform work in two different ways. It may simply "automate" which will achieve speed and consistency. That will rob workers of whatever skills they have, and any gratification they gain from their work, as well as increase the remoteness and impersonality of management. Or, Zuboff maintains, it may "informate" and empower workers with broad knowledge of production systems and enhance their capability of

collaborative and critical judgment about both production and distribution (Zuboff, 1988).

Zuboff examined a variety of settings from high-tech papermaking plants to insurance offices and a pharmaceutical manufacturer and concluded that the nature of work is undergoing a fundamental revolution. Traditional work skills based upon the human senses of touching, feeling, seeing, hearing and smelling of real objects were being replaced by skills that are "abstract, symbolic and ethereal."

UNIONS AND THE CHANGING WORKPLACE

Teamwork, or worker participation, employee involvement or jointness, as it is also known, is also reshaping the American workplace. Frequently the result of new labor-management cooperation, teamwork efforts are more commonplace if not universally embraced by every corporation or union leader. The trend is clearly in the direction of increased worker participation, however.

According to Robert Kuttner, the old industrial relations system that began in the 1930s is one in which unions largely refrained from challenging management prerogatives. The basic goal was to "take wages out of competition" and provide for relative stability within an industry (Kuttner, 1987).

Today, however, all that has changed since wages are very much part of the competition, not only within industries but especially because of increased competition from both foreign and American firms who are manufacturing abroad using low paid workers.

Some critics, particularly Jane Slaughter and Mike Parker in their book, *Choosing Sides: Unions and the Team Concept*, suggest that worker participation, which they refer to as "management by stress," should be rejected in favor of a traditional trade union role. (Slaughter and Parker, 1988). The mainstream of American labor, however, increasingly endorses the concept and works to implement it in a variety of settings. The Amalgamated Clothing and Textile Workers (ACTWU), the United Steel Workers (USWA) and the United Auto Workers (UAW) are among the leaders.

In their seminal study *Worker Participation and American Unions: Threat or Opportunity?* Thomas A. Kochan, Harry C. Katz and Nancy R. Mower concluded that there is a strong potential for worker participation especially where actual changes were made in the organization of work and unions served as full joint partners in the process (Kochan, Katza and Mower, 1984).

Perhaps the best known example is the experiment at the New United Motor Manufacturing Inc. (Nummi), the Toyota Motor Corporation—General Motors Corporation joint venture in Fremont, California.

Bruce Lee, director of the UAW western region who was involved in the creation of the Nummi joint venture, called the team system introduced there a "spectacular success . . . not due to advanced robotics or sub-union wages . . . (but) a revolutionary team production system run by workers themselves" (Lee, 1988).

The system, according to Lee, "is based on the principle that workers build cars; managers don't. He pointed out that the team system at Nummi is based on shifting control over the production process to the workers on the assembly line who know if the job is being done right.

At Nummi, workers are given new responsibilities. Teams of workers handle a series of related assembly operations and are encouraged to develop ways to improve the system. Lee maintains that the UAW has been telling auto industry management for years that their members take pride in their workmanship. "We have said workers will cooperate enthusiastically in finding ways to do a job better if managers are smart enough to tap into their pride and expertise," he said.

At their recent convention in Anaheim, UAW President Owen Bieber declared: "I think those who say that workers don't want change in the workplace—who insist that the old ways were always the best ways—are insulting the intelligence of UAW members" (*UAW Washington Report*, 1989).

Workers are "stakeholders" in their corporations and want them to be successful. Unions have the long term interest of workers in mind and want them to have the skills needed to work productively. They are not focused on maximizing short-term profits.

Cooperative labor-management strategies will fail if the goal of management is to create docile workers and weak unions or a "union-free environment." There must be genuine sharing of responsibility and authority and a prospect for mutual gain if it is to succeed.

According to Kochan, Katz and Mower, employers must accept the legitimacy of the union if they expect labor's support to be viable. Union representation is the vehicle through which employees can secure and define their right to participation. Employers may choose to give non-union workers a greater voice but only legal union representation provides equal representation and independent power (Kochan, Katz, Mower, 1984).

In non-union settings, the employers decide what the rules are going to be and can unilaterally decide to alter the arrangements at any time, particularly if new management takes over. Unions are accountable to the members who created them and are more likely to have the resources to allow them to participate effectively. If Americans want more teamwork and true labor-management cooperation to help make the U.S. economy competitive, the relentless anti-union crusade among many employers must end.

In a cover story entitled "Go Team! The Payoff from Worker Participation," *Business Week* praised a number of recent efforts to incorporate worker participation or employee involvement (EI) (July 10, 1989).

Business Week states that worker participation in the United States has evolved from some small scale efforts in the 1920s and 1930s at "problem-solving teams," to "special-purpose teams" in the 1980s to "self-managing teams" which they argue "appear to be the wave of the future."

Under "self-managing teams," usually from 5-15 in number, employees produce an entire product instead of various sub-units. Under the system, team members learn all tasks and rotate from job to job and take over certain managerial duties. It fundamentally changes how work is organized and gives employees greater control over their jobs.

The employee involvement movement "has unleashed enormous energy and creativity stored up in (workers) who like the idea of using their brains, as well as their bodies, on the job. It increases their feelings of dignity and self-worth," *Business Week* notes (July 10, 1989).

In fact, if America is to be a world-class manufacturing country, they argue, companies will have to be able to produce in small lots and customize their products. Teamwork provides the flexible work practices that enable firms to respond to these demands. One manager quoted in the same article said that when "you combine automation with new systems and work teams, you get a 40 percent to 50 percent improvement in productivity."

The *Business Week* article also quotes Harvard University theorist Richard E. Walton who said, "To have world-class quality and the ability to assimilate new technology, we must have the world's best ability to develop human capabilities."

THE BUSINESS CONCERN

While America faces dramatic new challenges as a result of a changing global economy, and attempts to respond by restructuring the means by which it produces goods and services, the question that comes to the forefront is "Do we have the human resources available now or in the future to win the battle?" The alarming conclusion of most economists, government and corporate leaders, and educators is a resounding "No!" As a result, labor force policy is replacing traditional economic topics as the central economic issue around the world. Human resource development is being more and more recognized as the key to economic survival. Because of demographic trends and an inadequate system of education and training, there is a growing mismatch between skills and jobs, and unless something is done, the United States will quickly fade as a world economic power.

A *Business Week* "Special Report" examined the growing mismatch between jobs and the ability of Americans to do them. Citing work done by the U.S. Department of Labor and the Hudson Institute, *Business Week* found that more than three-quarters of new workers will have limited verbal and writing skills (the lowest level on a sliding scale measuring levels of reading, writing and vocabulary needed to perform a wide range of jobs) but will be competing for only 40 percent of the new jobs. Fewer than one in four new employees will have the needed skills to perform at the higher end of the scale where the majority of jobs will be (*Business Week*, September 19, 1988).

Many leading American corporate officers have begun to focus on human resource development and are urging others to do as well. Owen B. Butler, retired chairman of Proctor and Gamble; David Kearns, Chairman and Chief Executive Officer of Xerox; Kay Whitmore of Eastman Kodak Company; and John Creedon, president and chief executive officer of Metropolitan Life are but a few. In addition, numerous business organizations are entering the human resource arena led by the Committee for Economic Development.

A number of conferences have been held, reports and books have been published, and CEOs have both spoken out and taken concrete action to meet the problem head on. The Committee for Economic Development has been in the forefront by disseminating some thoughtful and thorough studies on what America needs to do to stay competitive. In large part, the various reports focus on demographic trends and strategic for enchancing human resource development.

Charles Marshall of the American Telephone and Telegraph Company told a Congressional panel, "We are not interested in education simply for altruistic reasons; we need knowledgeable, well-educated, highly

skilled employees if our business is to succeed" (quoted in Jennings, 1987).

DEMOGRAPHIC TRENDS

A number of studies have been completed on what the future of the American workforce is likely to look like and what the implications are for the economy.

A U.S. Department of Labor commissioned study by Hudson Institute entitled "Workforce 2000" estimates that 25 million entrants to the labor force will be needed by the year 2000. Most of these will be nonwhite, female or immigrant workers. Native white males, who now constitute 47 percent of the labor force will account for only 15 percent of the new entrants into the labor force by the year 2000 (Johnston, 1987).

The American workforce is also growing older. In the 1990s, the labor force will be dominated by "middle-aged" workers aged 25-54.

The number of young Americans is shrinking dramatically. Between 1980 and 1996, our youth population (15-24) is expected to drop by 21 percent or from 43 to 34 million. Young people as a percentage of the nation's population will also drop from 18.8 percent to 13 percent during the same period. In addition, the composition of the new entrants is changing rapidly to include a higher percentage of minorities who have historically not been well served by society.

Also, according to *The Forgotten Half: Non-College Youth In America*, published by the W.T. Grant Foundation, approximately four million young people between 15 and 24 years of age are challenged by some sort of impairment, either a permanent physical or psychological condition that limits their activities (W.T. Grant Foundation, 1988).

According to a study entitled *All One System* by Harold L. Hodgkinson, published by the Institute for Educational Leadership, "Changes in the composition of the group moving through the educational system will change the system faster than anything else except nuclear war . . . By knowing the nature of those coming into first grade in the U.S., one can forecast with some precision what the cohort of graduating seniors will be like 12 years later" (Hodgkinson, 1985).

According to the report, the birth rate of whites and Cubans is below the stay-even point, while that of blacks and Mexican-Americans is well-above. Thus, the latter two groups will be a larger part of the future population. "All these young people have to do is grow older and we have the future," Hodgkinson declares.

Hodginson notes that in 1955, 60 percent of the households in the U.S. consisted of a working father, a housewife mother and two or more school-aged children. In 1980, that family unit was only 11 percent of our homes and in 1985 it is 7 percent, "an astonishing change".

A key point that Hodgkinson and other demographers frequently emphasize is that 20 percent of the students currently in public elementary and secondary schools are economically disadvantaged. By the year 2000, one-third of all students will be economically disadvantaged and these students do less well in school. In addition, Hodgkinson points out that the "normal" childhood experience is becoming a thing of the past with increasing numbers of children born out of wedlock, being born to parents who divorce before the child is 18 or to parents who separate. In fact, he asserts, only 41 of 100 will reach 18 "normally."

One major impact on the schools and the workforce of the future will be the huge increase in children born out of wedlock, half of them born to teenage mothers. Indeed, Hodgkinson asserts, every day 40 teenage girls give birth to their third child. "To be the third child of a child is to be very much 'at risk' in terms of one's future," he states. An important aspect of this trend is that teenage mothers tend to give birth to children who are premature because of poor diet and lack of physical exams. This leads to low birth weight which is a good predictor of major learning difficulties when a child gets to school. The effect is that about 700,000 babies of the annual cohort of around 3.3 million births are almost assured of being either educationally retarded or "difficult to teach."

The W.T. Grant study points out that growing up inpoverty will have a dramatic impact on a young person's chance of having weak basic skills. The report notes that "Nearly half of all poor youth score in the bottom fifth of the basic skills distribution, while over three-fourths of all poor youth have below average basic skills." The combination of poverty and weak basic skills, and not ethnicity or race, correlates highly with dispartities in teen childbearing rates.

TRADITIONAL AMERICAN EDUCATION

The American education system has historically served our nation well. At the founding of our republic, Thomas Jefferson said that a more general diffusion of knowledge was necessary to create "an aristocracy of virtue and talent" that would help to ensure the great American experiment with democracy and liberate the energies and imagination from within the "common man." For our nation's first century, our economy was basically rural and formal education was limited. In the 1820s, the American labor movement intensified its efforts to establish a free, universal, public education system "that shall unite under the same roof the children of the poor man and the rich, the widow's charge and the orphan, where the road to distinctions shall be superior industry, virtue and acquirement without reference to descent" (*Labor: Champion of Public Education*, 1986).

Following the Industrial Revolution, our elementary and secondary education system reflected the needs of an economy based on mass production. The system was modeled on the factories, where many of the students would one day work, and placed emphasis on following instructions, discipline and routine tasks—all hallmarks of factor work. Unfortunately, the system has not changed much since. It is larger, more children attend and graduate, but the typical pattern of "chalk and talk" with one teacher lecturing to 25 students five times a day remains true in most schools.

By some measures, our schools have been very successful. Over three-quarters of the adult population has a high school diploma and the figure is 87.5 percent for younger adults. Nearly two-thirds of all high school graduates begin post-secondary education and 17.4 percent of American adults have a college degree, which is twice the number in 1960. One in four younger Americans are now receiving college degrees.

In 1940, only about 25 percent of Americans earned a high school diploma. In 1953, a majority of high school students graduated, 66 percent in 1980 and 75 percent today. Despite the nation's preoccupation with the drop-out rate, one of American education's great successes has been its ability to retain a larger number of students through high school and onto postsecondary education. A generation ago and before, however, young people who left school after the eighth or ninth grade were likely to find a job in a mass production industry such as auto or steel. Since the work was unskilled or low-skilled, these workers were able to earn a middle class living, buy a home and send their children to college.

All of that, of course, has changed. It is not that our schools are less competent than they once were, but that work is more complex that it ever was, and so there is a growing mismatch between jobs and skills. Declining numbers in our workforce mean that our economy and our standard of living will not be maintained unless we are successful with more students.

Recent studies of the National Assessment of Educational Progress (NAEP) including *The Reading Report Card and Crossroads In Education* report some interesting findings. The positive news is that virtually everyone has mastered the "basics." Students can read simple material and add, subtract, multiple and divide whole numbers. Also, while an unacceptable gap still remains, blacks and Hispanics have been successful in narrowing the distance between their scores and those of white students in reading and math.

The problem is that beyond these minimum basics, large percentages of students do not perform very well. Only about 6 percent of 17 year olds can solve a multi-step math problem and only 7 years are able to infer relationships and draw conclusions from detailed scientific knowledge. Only 20 percent can write an "adequate" letter applying for a job at a local swimming pool demonstrating a little critical thinking and persuasive ability. And only 20 percent of a total sample of 3,600 individuals between the ages of 21 and 25 could correctly answer a question that involved reading a bus schedule.

A study recently concluded by the Educational Testing Service, *A World of Difference*, compares the math and science performance of 13-year-old students from the U.S. and 11 other countries and Canadian provinces. The American students perform at the very bottom (LaPointe, Mead, Philips, 1989).

Paralleling NAEP findings, U.S. students did very well at the easiest and lowest levels in math, e.g. 97 percent of U.S. students are able to add and substract with others scoring 98, 99 or 100 percent.

The results were essentially the same in science. Almost all students in all countries knew simple everyday facts but applying simple scientific principles once again found the U.S. near the bottom. At the highest level tested—applying scientific principles—33 percent of the Koreans showed proficiency while only 12 percent in the U.S. did and only three countries scored lower.

One reason for the poor performance of U.S. students has been the lowering of high school diploma and college entry standards, which have recently begun to turn around.

Ironically, 23 percent of the Korean students tested said they thought they were good in math while 68 percent of the American students answered yes to the same questions.

The conclusion is that American students have mastered the basics but they are no longer sufficient. Increased competiton from foreign workers, many of whom are better educated, and the increasing complexity of the workplace, are leaving those without advanced skills out in the cold. While most Americans realize there is a

problem with the nation's educational system, most believe their local schools are good and that their children are doing well. The Gallup poll reports that Americans give higher marks to the schools their children attend than they do schools-in-general. And by the most frequently used measurements, parents have reason to believe that their own children are doing well. States and local school districts contribute to the sense that all is well by citing standardized test results. All of their own students are "above average," as John J. Cannell demonstrated. Japanese mothers give their children's schools much lower approval ratings. It is also generally believed that Japanese parents believe that school success is the result of effort while American parents attribute success largely to ability. That basic difference has profound implications on how hard U.S. students work and what is expected of them by both parents and schools.

What Americans and parents expect of their schools and students is an important part of any effort to make the education system meet the demands of the workplace of tomorrow.

SKILLS FOR TOMORROW

Public education in a democratic society should prepare students to be productive and contributing members of the nation's economic life but also to be responsible citizens who can make informed decisions on issues affecting their personal lives and those affecting public policy. Increasingly, those skills have more in common than not.

As Sue Berryman has pointed out, the transformation of work currently underway is requiring not necessarily "more" or "less" skill but new and differnt skills. "Employment now involves interaction in constantly changing ways with production technology. The spread of micro-electronics and related technologies does not just result in new machines that must be mastered but in a much deeper change in the way production is organized and the ways workers relate to the production process and to each other," Berryman asserts (Berryman 1988). She says there is still a need for good basic skills but there is now also the need for higher order thinking. She argues that there is also "a stunning parallel between changes in the structure of work and the defining characteristics of higher order thinking," and that it is important to include thinking, problem-solving and reasoning skills for all students and not just those destined for college. She suggests that making thinking and problem solving a regular part of the curriculum for everyone and cites the work of cognitive psychologist Lauren Resnick of the University of Pittsburgh for a description of higher order thinking as well as the work of CUNY Professor Dr. Sylvia Scribner who explores the relationship between school-based and non-school-based learning.

Scribner's work, notes Berryman, challenges implicitly the traditional distinctions between "head" and "hand," between "academic" and "vocational" and between school-based and work-based learning.

In summary, Resnick concludes that, in school, a student's success or failure is essentially independent of what other students do (except for grading on a curve) while activity in the "real world," depends a great deal on working interdependently with others. School-based-learning is also based a great deal on "pure thought" as opposed to reliance on calculators and other "tools" often found in life and work settings. In addition, school learning is most often "symbol-based" but with little connection from any meaningful or wordly content. Finally, the kind of "generalized" learning in schools is rarely linked to the "situation-specific competencies" required in out-of-school environments, Resnick notes.

These findings have major implications for how schools should teach according to Berryman. In sum, she argues for more team and co-operative learning with the student being held accountable for their individual as well as team performance; situations where students are taught *how* to get the right answer and not just *having* the right answer (and situations where teachers, as well as students, do not know the answers); and "contextualized learning" where instruction would more closely mirror real life, for example, more apprenticeship-like and simulated experiences.

In a speech delivered to the business community in Kansas City last year, SUNY at Delhi professor Vincent Ryan Ruggiero echoed the findings of Berryman, Resnick and Scribner. "Business and the professions don't need walking encyclopedias—they need problem solvers and decision makers. And the only way they will get them is if thinking instruction is made the central objective at all levels of education," Ruggiero told the group. Schools need to replace "mindstuffing" with "mindbuilding" he argued (Ruggiero 1988).

Ruggiero also noted that intellectual skills are really no different from physical skills and that there is a difference in telling students *what* to think as opposed to teaching them *how* to think. He criticized schools for assuming that thinking skills are automatically learned as a byproduct of amassing facts.

A number of studies have been completed recently that outline the knowledge, skills and attitudes those entering postsecondary education or the world of work need. *Academic Preparation for College: What Students Need To Know And Be Able To Do* by the College Board is a fairly comprehensive outline of the basic academic competencies and academic subjects required of college entrants. A more recent publication, *Workplace Basics: The Skills Employers Want* summarizes a two-year research project of the American Society for Training and Development and the U.S. Department of Labor (Carnevale, Gainer, Meltzer, n.d.).

Workplace Basics reinforces the findings that there is a trend in the "upskilling" of work in the United States that is being driven by technical changes, innovation and competition. Companies are requiring adaptive and innovative workers with strong interpersonal skills. New business strategies such as collaboration, emphasis on quality, and exemplary customer service are demanding better listening and problem-solving skills and of attention to teamwork, creativity and the ability to set goals.

The *Workplace Basics* prescription for a well-rounded worker includes the basic skills associated with formal schooling but, in addition:

"Employers want employees who can learn the particular skills of an available job—who have 'learned how to learn.'

"Employers want employees who will hear the key points that make up a customer's concerns (listening) and who can convey an adequate response (oral communications)."

Employers want employees who can think on their feet (problem-solving) and who can come up with innovative solutions when needed (creative thinking).

Employers want employees who have pride in themselves and their potential to be successful (self-esteem); who know how to get things done (goal setting motivation); and who have some sense of the skills needed to perform well in the workplace (personal and career development);

Employers want employees who can get along with customers, suppliers or co-workers (interpersonal and negotiations skills); who can work with others to achieve a goal (teamwork); who have some sense of where the organization is headed and what they must do to make a contribution (organizational effectiveness); and who can assume responsibility and motivate co-workers when necessary (leadership).

RESTRUCTURING SCHOOLS

The American education system offers the best hope to improve American productivity as has been the case for at least sixty years. As Anthony Patrick Carnevale noted:

"People, not machines, are the well-spring of productivity. Since 1929, growth in on-the-job know-how, the reallocation of labor through retraining, and increased labor quality through education, training, and health care consistently have accounted for more than three-quarters of productivity improvements and most of our growth in national income. By comparison, over the same period, machine capital has contributed a consistent and disappointing 20 percent or less (Carnevale, 1983)."

The convergence of an increasingly competitive global economy, transformations in the nature of work and the workplace and the skills they demand, and disturbing demographics trends call for a redefinition of the purpose of schooling and the way schools are organized. A fundamental restructuring of American public education is not only desirable, it is imperative if the United States is to remain a nation of economic, social and political vitality.

American Federation of Teachers president Albert Shanker frequently draws the analogy between education in the 1980s and the auto industry in the 1960s and 1970s. Until fairly recently the American auto industry had little to worry about. The cars produced in the 25 years following World War II were considered the best in the world and U.S. automakers faced little competition. In the 1970s, Japanese automakers began to penetrate the American market with high quality, low cost cars and earned a steady increase in its share of the American market. The American automakers responded by denying that any problem existed and turned to Madison Avenue to solve the problem. Meanwhile, the Japanese, who were joined by the Koreans and West Europeans, continued to produce cars of higher quality at a price American consumers were willing to pay. The result was the near bankruptcy of Chrysler and serious problems for both Ford and General Motors. Only recently have U.S. automakers responded by attempting to revitalize the industry by adopting strategies employed by its foreign competitors. Today the GM, Chrysler and Ford cars are much better than those produced in the 1960s and 1970s. Unfortunately, that's not good enough. People don't buy cars because they are better than the ones we used to make. They buy the best car for the money (Shanker, *The College Board Review*, 1988).

The same lesson applies to American education, Shanker argues. A generation ago, our schools were meeting the demands of our economy. Even though there was a 75 percent drop-out rate in 1940 and 50 percent drop-out in 1950, the labor market was able

to absorb those drop-outs and those who went on to school were sufficient to meet the skilled needs of industry. As a result, public schools enjoyed wide approval.

Now, everyone is alarmed by a 25 percent drop-out rate—and should be. The reason is that there are new demands on the labor force that were not there were not there 20 or 30 years ago. As former Maryland Superintendent of Schools David Hornbeck remarked, "It used to be the case that the victim of our failure with youngsters was only the youngster. Today, because we need all the kids, we all become the victims. The demographics no longer permit throw away or disposable children."

The problem, then, is not that the schools are worse or are doing a poorer job—the evidence is to the contrary—but that much more is demanded of them if our workforce is to be "world-class."

Just as GM has launched the Saturn project and hundreds of American corporations have restructured the way they produce, so too, does the American education system need restructuring. Xerox's David Kearns said that in restructuring his company, he realized that incremental changes were no substitute for structural reforms. "At Xerox, we realized we couldn't beat our Japanese competitors just by tinkering with our production methods . . . So we revolutionized the way we do things . . . We restructured everything—the way we manufacture, the way we design, the way we think." Kearns then concluded, "That's what our public schools have to do, too . . . " (Kearns, 1986).

Perhaps the leading charge for educational restructuring comes from AFT's Al Shanker. He says that the present system is based on the factory model. It is based largely on teacher talk which fails to reach the overwhelming number of students. Schools currently view the teacher as the worker and the student as the product—as passive receivers of knowledge, he argues.

There is a better way, he states, and that is essentially to view students as workers and teachers as managers. The "work environment" is not the factory floor of the past but the complex workplace of the future where students and teachers both are actively engaged in the learning process (Shanker, College Entrance Examination Board, 1989).

What would such a school look like? While the first wave of the education reform movement raised academic standards and focused on developing a quality teaching corps, the second wave is zeroing in on ways to "restructure." A number of experiments are underway in Rochester, Miami, Toledo, Cincinnati, Pittsburgh, New York City and dozens of other districts (David, 1989).

An excellent example of a restructured school is found in Cologne, West Germany. The Köln-Holweide school is a "comprehensive" school that grew out of a German education reform movement that began in 1963 with the publication *German Educational Disaster* which focused attention on an outmoded, class-based school system. The report concluded that the German school system was not producing enough qualified students to fill jobs in modern industry, technology and science (*American Educator*, Spring 1988).

The 2000-student school has a pupil population composed of a fairly equal mix of high, middle and low ability students including 35 percent who are foreign born, mostly Turks.

By virtually any measure, the school is succeeding. Only one percent of the students drop-out compared to the West German average of 14 percent. Sixty percent of its students score well enough to be admitted to a four-year college compared to a national average of 27 percent. In addition, there is practically no truancy, very little teacher absenteeism and only minor discipline problems.

According to headmistress Anne Ratzki, the Köln-Holweide school differs from most American schools in five ways. First, teachers work as part of a team of six to eight teachers that is responsible for the education of the three groups of twenty-seven to thirty students.

Second, teachers are responsible for the total education of the students making sure they are a success personally as well as academically.

Third, the teacher teams and students remain together for six years—from fifth grade until they earn their "leaving certificate" at the end of tenth grade.

Fourth, the teacher teams are empowered to make all the decisions regarding teaching, scheduling, inservice training, mentoring of new teachers and other responsibilities.

Finally, Köln-Holweide students do not compete against each other in traditional ways. In their groups, children are encouraged to cooperate and work with one another. They encourage one another, and in some instances, tutor teammates.

Classrooms look very different from traditional classrooms of five rows of five or six students facing a lecturing teacher. Students are engaged in solving problems, writing, talking with one another or preparing for a class presentation among other active endeavors. Teachers are more managers of a learning environment than dispensers of information.

Forty percent of the Köln-Holweide students, as opposed to 25 percent of all students, also pass the German national exam known as the *abitur*. Unlike standardized tests in the U.S. that rely on multiple choice questions, the *abitur* is a six hour written examination in two subjects, a three hour exam in one subject and one thirty minute oral examination. The test is developed by the teacher and approved by government authorities and must cover the curriculum.

There are approximately twenty similar schools in Germany today that incorporate many of the approaches of Köln-Holweide school. Since the number of applicants now far exceed the available spots of Köln-Holweide, that number is likely to grow.

Similar experiments are underway in the United States. For example, in the Twin Cities, the Chiron Middle School in Minneapolis and the Saturn School of Tomorrow in St. Paul are restructuring (Pearlman, 1989).

The Chiron Middle School, named after a newly discovered star in the universe, opened in September 1989. The school's 300 students will attend nine-week sessions at a series of learning centers in the community including government, manufacturing, communications, environmental, health, retailing, zoological, and information processing among others. Students will be involved in a variety of activities and projects. Students will work in teams and interact with community resources and make presentations, not only to fellow students, but to parents and the community as well.

St. Paul's Saturn School of Tomorrow, which grew out of a suggestion by AFT president Al Shanker, is named after GM's Saturn project. It opened in September 1989, with 150 students in grades 4–6 and additional grades will be added in subsequent years. The goal of Saturn is the "reformation and redesigning of the schooling process." The Saturn curriculum will consist of the district curriculum plus "the skills and knowledge necessary to succeed in the 21st century: world languages, global education, technologies, ethics, careers, mentorships."

Saturn students will work cooperatively in teams and will develop a personal portfolio of their work and projects. Teachers will also work in teams and be empowered to determine schedules and learning activities.

In addition to the St. Paul Public Schools and the St. Paul Federation of Teachers, other partners in the Saturn school include Apple Computer, Control Data, Pioneer Communications and a local college education department.

School restructuring is not limited to elementary and secondary education. The McMaster University Medical School in Hamilton, Ontario, has replaced its traditional lecture format with problem solving teams. The results to date indicate that students have improved not only their knowledge base but have improved skills needed to practice medicine as well.

The American Federation of Teachers has taken the lead nationally to promote school restructuring, Its Education Research and Dissemination Project links the latest research to classroom teachers. The 1989 AFT QuEST Conference was devoted entirely to retructuring and the AFT sponsored a Restructuring Academy on the campus of Michigan State University this summer. In addition, a large number of AFT affiliates are actively engaged in a wide variety of programs to redesign and restructure schools in addition to Minneapolis and St. Paul.

A NEW FOCUS ON THINKING SKILLS

Common to restructured schools is the effort not only to promote the mastery of a body of knowledge but the enhancement of thinking and reasoning skills as well. Indeed, an entire movement seems to have grown up in recent years around the theme "critical thinking." If workers are to be prepared for the future of work, the trend needs to be accelerated.

Jack R. Fraenkel, in his book *Helping Students Think and Value: Strategies For Teaching Social Studies* attacks a number of unwarranted assumptions about teaching thinking. Fraenkel makes the following observations:

Thinking skills can be taught.

Thinking involves an active transaction between an individual and the data with which he is working. Data (information) becomes meaningful only when an individual performs certain cognitive operations upon it. Thus students must be involved and actively working with data if thinking is to be encouraged.

The ability to think cannot be "given" by teachers to students. How well an individual thinks depends on the richness and significance of the content with which he works, his own interests and desire to participate in the endeavor, the processes he uses, and the initial assistance he is given in the development of such processes.

All subjects offer an appropriate context for thinking.

All children are capable of thinking, though the quality of individual thinking differs markedly.

Since thinking takes many forms, the specific thinking processes which are being developed should be clearly differentiated in the teacher's mind.

Precise teaching strategies can be developed which will encourage and improve students thinking (Fraenkel, 1980).

Fraenkel states that there are essentially four forms of thinking: convergent, divergent, critical and creative. Convergent thinking occurs when one organizes ideas so that they *converge* or point toward one logically correct answer. It is basically logical thinking or deductive reasoning of which the syllogism is probably the best example.

Divergent thinking is when there is no one right answer. One tries to come up with as many different answers, ideas, alternatives and conclusions as possible. One example is inductive reasoning which is frequently called the scientific method.

Critical thinking is the attempt to make an intelligent judgement to decide which among alternatives is better. It is the basis of evaluation and requires criteria of some sort.

Creative thinking is the attempt to create a new or novel idea and is not bound by logic. It has no set of rules or procedures and is actually a form of divergent thinking.

Fraenkel discusses eleven different "operations" he argues can be effectively taught. They include observing, describing, comparing and contrasting, developing concepts, differentiating, defining, generalizing, predicting, explaining, hypothesizing and offering alternatives. He offers a number of strategies for teaching these "thinking skills."

Thinking and reasoning skills cannot be taught, nor should they be, in a knowledge content vacuum. The mastery of a body of knowledge in not of greater or less importance but of equal importance. The mastery of content and the development of thinking and reasoning skill should be interdependent and taught simultaneously.

If students are to have the needed skills for tomorrow's workplace, the development of thinking and reasoning skills should become the "core curriculum" in grades K-12 and in every secondary subject. Restructuring schools should develop a comprehensive and systematic method for introducing and reinforcing thinking and reasoning skills throughout the curriculum.

TEAMWORK

Another key ingredient of the workplace of the future is the ability to work as a member of a team. Restructured schools are placing important emphasis on collaborative or cooperative learning. Learning to be an effective member of a group or team can be taught. A large number of teachers and schools already are employing cooperative learning strategies with a great deal of success. Working in a group supports the concept of the "student as worker" and is an excellent method for teaching the thinking and reasoning skills outlined by Fraenkel and others. It is a natural marriage.

Workplace Basics includes "Group Effectiveness" as one of its major recommendations for skills employers want. "Whenever people work together, successful interaction depends upon effective interpersonal skills, focused negotiations, and a sense of group purpose," the report says. It adds that training in group effectiveness also "includes techniques for separating people from the problem, focusing on interests not positions, inventing options for mutual gain and insisting on the use of objective criteria" (Carnevale, Gainer, Meltzer, n.d.). Team members should also have an understanding of group dynamics such as understanding consensus decision-making techniques, brainstorming, leadership functions and so on.

As is the case with thinking and reasoning skills, collaborative learning is not devoid of content mastery but one effective means to help master knowledge while developing a host of skills.

Restructuring schools around the concept of students as workers advanced by Shanker will incorporate these strategies. As Shanker points out, the idea of students as workers "is central to the improvement of education and schooling. Basically, all education is self-education. In order to learn, a student must work at it by listening, reading, writing, drawing, speaking, questioning, imagining, building, etc. We learn by doing, not merely through passive presence in a classroom, sitting in front of a teacher. Students must be actively engaged in their work" (Shanker, November 20, 1988).

THE AT-RISK: A SPECIAL EMPHASIS

Because of the labor shortage and demographic trends, special attention must be given to the category commonly referred to as the "at-risk" students. These are students who do not perform well and are "at-risk" of dropping out and not having the necessary skills to become a productive worker or member of society. While at-risk students come disproportionately from poor families, the category can and does include others.

The good news is that for the first time in recent history, the needs of the disadvantaged and the needs of the American workplace are merging. The efforts to increase productivity and competitiveness is changing the debate over social equality into one about economic growth (*Business Week*, September 19, 1988).

A large number of studies and reports have focused on this population and numerous recommendations have been advanced including improved efforts at pre-natal care, early childhood education, enhanced Headstart funding and special efforts by communities and schools to help at-risk children succeed.

The restructed school can go a long way to create an environment where these youngsters can enhance their self-esteem and learn. The Köln-Holweide experience is illustrative.

THE SCHOOL-TO-WORK TRANSITION

Business can also play an important role in improving the chances of at-risk students. If students sense that their work will pay off and can see themselves in a job, they are more likely to try harder in school. As *The Forgotten Half* states, "When [students] observe a direct relationship between what they do in school, their work experience, and accessible future careers, they are more willing to make present sacrifices in hopes of future gains" (W. T. Grant Foundation, 1988).

The Forgotten Half points out that many youngsters, irrespective of how well they do in school, are seldom hired out of high school by employers. Employers typically wait until young people reach the age of 20–22, or later, before hiring them, leaving recent graduates who are not college bound, to "alternate low paid work and unemployment with a growing frustration that erodes their confidence." The report suggests that employers seek out recent graduates so they can begin meaningful work sooner and also to offer hope to those currently enrolled.

Some very interesting research on school-to-work transition has been completed by Cornell professor John H. Bishop. Bishop contends that while evidence shows that there are benefits to staying in school, "most students do not benefit very much from working hard in school" (Bishop, 1987). The problem, Bishop asserts, is a lack of incentives. He argues that the labor market fails to reward effort and achievement in high school since employers do not pay attention to high school records beyond the granting of a diploma. If employers are competing for better workers, why don't they reward those who have achieved more in school? Why don't young workers who have achieved well in school receive higher wages? Japan, Germany and other nations demand a lot of students and have systems in place that reward school success. Admittance to the German apprenticeship system is a prime example.

Bishop also calls for a radical restructuring of schools and proposes a series of recommendations including better measures for academic measurement, cooperative learning, mastery learning, increased opportunities for outside of school learning and a better system for linking employment opportunities to school performances. The last recommendation is particularly important for at-risk youngsters.

Similar conclusions have been reached by James E. Rosenbaum of Northwestern University and Takehiko Kariya of the Japanese National Institute of Multimedia Education. Writing in the *American Journal of Sociology* they describe how the Japanese link success in school with employment. That system, they conclude, provides strong incentives for high school achievement (Rosenbaum and Kariya, 1989).

APPRENTICESHIP—A MODEL THAT WORKS

The most successful model for preparing a highly trained and competent workforce has been developed primarily in the building and construction industry—the joint apprenticeship program. Registered apprenticeship programs are responsive to the demand of the workplace because the standards for training are jointly set by employers and unions both of whom have a vested interest in a highly qualified workforce.

Quality apprenticeship programs combine strong academic education, skills development and on-the-job training. Curriculum is constantly updated to meet the demands of new technology. Apprenticeship programs are also designed to match the employment needs of the industry by limiting entrants for available jobs when the economy is slow and increasing the number as the economy expands.

Vocational education in secondary schools should support, and not undermine or compete with, apprenticeship programs. Educating students to directly enter industries that have existing apprenticeship programs undermines those programs and compromises the standards of the industry by providing workers whose skills do not measure up to those who successfully earn their journeyman card. They also can play havoc with the labor market by producing workers for industries where there are no jobs or are already trained apprentices and journeyman available.

The apprenticeship system should be expanded into the manufacturing, public, and service sectors. Some corporations have successfully emulated the apprenticeship system of the building and construction industries with great success by maintaining the same high standards typical of registered programs. Any new programs should

be required to meet these traditional high standards and those that are designed to circumvent or compromise these standards shold be rejected.

Schools have much to learn from the apprenticeship model which is particularly relevant given the needs the changing workplace in the manufacturing and service sectors.

THE ROLE OF VOCATIONAL EDUCATION

The first phase of the education reform movement treated vocational education with either hostility or neglect and focused on raising "academic standards." While the attention to academic standards was important, reformers missed important lessons from vocational education for restructuring schools and improving the school-to-work transition.

According to *The Unfinished Agenda: The Role of Vocational Education in the High School*, ". . . instruction in vocational classrooms offers an alternative—an avenue for breaking away from the all-too-similar characteristics of so many classrooms" (The National Commission on Secondary Vocational Education, n.d.). The report argued that the teaching-learning process characteristics of quality vocational education programs is able to respond to diverse learning styles.

The study notes that vocational programs teach problem solving and analytical skills and reinforces basic communications and interpersonal skills through applied and small-group learning activities. Vocational education teaches the ability to gather and analyze information, reasoning, applications of technology and an understanding of the American economic system.

In quality vocational courses, instruction is "individualized and cooperative and often emphasizes student mastery of specific skills or competencies," the study notes. In addition, students frequently work in teams and often on group projects. Vocational education also more closely reflects real life and provides opportunities for real life or simulated workplace experiences.

Ironically, then, vocational education, long viewed as an educational step-child, provides an excellent model for restructuring the academic learning environment.

There needs to be better articulation between academic and vocational education and between secondary and postsecondary vocational education as well as improved linkages between vocational education and the world of work, but educators involved in school restructuring will find that vocational education, in addition to meeting labor market needs, has a lot to offer as a process as well.

TOWARD A NEW AMERICAN WORKER

A recent survey by Louis Harris and Associates for the Carnegie Forum on Education and the Economy entitled *Redesigning America's Schools: The Public Speaks*, concluded "It is clear . . . that the American people and business leaders are both convinced that the way for this country to become competitive with foreign business, especially the Japanese, is not to try to revert back in time and try to compete with unskilled and low skilled labor. But instead, they believe, the U.S. should face up to exporting or automating such lower skill jobs and production activities and turn to creating whole new opportunities on a base of a labor pool that is far more sophisticated and far better trained to perform those highly skilled tasks that would once again make the U.S. competitive in the world" (Harris, 1986). Harris reported that large majorities are convinced that a whole new approach to educating and training the American workforce must be undertaken. New skills are required of everyone and they must be targeted in the public schools to all students. And Americans are willing to pay according to Harris. He reported that "77 percent of the public is willing to pay a tax increase to improve the quality of education, as are 65 percent of the top business leaders willing to pay higher corporate taxes to make the quality of education better."

American public education has historically responded to meet the needs of a changing American economy and society. In response to the Industrial Revolution, the United States developed an education system that prepared workers to function in mass production and emulated the factory system. Simultaneously, it produced a sufficient number of trained people for the professions, management and technical positions such as engineering.

Tomorrow, the challenge will be very different. The very nature of work and the workplace are dramatically changing requiring new sets of skills. The schools of tomorrow must prepare all students to be successful in the new work environment.

The "New American Worker" is really two people. The first is a worker who has the knowledge, skills and attitudes to successfully function as a member of a team and who interacts with everchanging technology in a decentralized and flexible *production* environment. The second is the student who functions as a member of a team and who interacts with everchanging technology in a decentralized and flexible *learning* environment. The characteristics of the new American worker and the new American student are merging into one and the same.

That is the lesson American corporations are quickly learning and restructuring to accommodate. The question remains as to whether the nation's public schools will learn the same lesson and restructure to meet the challenge.

The economic imperative is obvious. However, much more is at stake. The future of a nation and its people depend on how we respond. A new American worker can keep the American Dream alive.

REPORTS OF THREE NEW SOVIET VIOLATIONS OF THE INF TREATY SHOW A CONTINUING NEED FOR A UNITED STATES COMPLIANCE POLICY FOR PROPORTIONATE RESPONSE

Mr. McCLURE. Mr. President, as all my distinguished colleagues know very well, I was one of the supporters of the INF Treaty signed by former President Reagan in December 1987. The INF Treaty was given the advice and consent by the Senate for Presidential ratification on May 27, 1988, by a vote of 93 to 5.

I was 1 of the 93 Senators who voted in favor of the INF Treaty. Moreover, I argued in favor of the INF Treaty throughout the ratification process, while voting for some measures which I believe would improve the treaty. I also voted for some measures which were intended to help to detect and therefore deter potential Soviet violations of INF.

Mr. President, as a supporter of the INF Treaty, I am now deeply concerned about reports of three serious new Soviet violations of the INF Treaty. We should insist upon full Soviet treaty compliance, because without strict and full compliance on both sides arms control is meaningless.

Last October, the State Department published a long study which confirmed that Soviet President Gorbachev has continued his active measures campaign of Soviet diplomatic deception and disinformation aimed at disrupting American foreign policy, despite an earlier Gorbachev promise in 1987 to cease these negative activities.

Nevertheless, Gorbachev's diplomatic deception not only seems to continue through 1990, but it now also seems to include even serious Soviet violations of an arms control treaty signed by Gorbachev himself.

Recently, Mr. President, Soviet SS-23 missiles banned by the INF Treaty have been detected and are confirmed to be deployed in East Germany.

Even more significantly, Mr. President, the Soviets are denying the United States its INF Treaty monitoring rights by refusing to allow operation of our Cargo-scan x-ray system at the Soviet Votkinsk missile factory. Reportedly, they are also forcibly smuggling new type SS-25 ICBM's out of Votinsk.

The Soviets have now been publicly confirmed to have deployed at least 24 SS-23's in East Germany, for which the Soviets control the nuclear warheads, an apparent violation and irreversible "material breach" of the INF Treaty. Even the State Department reportedly regards this problem as a serious "breach of good faith" by the Soviets.

Mr. President, these Soviets SS-23's also seem to be positive confirmation of the existence of Soviet covert INF forces. But how should the United States deal with this positive confirmation of covert Soviet INF missile forces? Is there evidence of other covert Soviet INF missiles, such as covert SS-20's, covert SS-CX-4's and covert SS-4's? What are the implications of covert Soviet INF missiles for trying to ban covert forces in a possible START Treaty?

But, Mr. President, there is a second recent example of Soviet covert INF forces.

An unclassified Soviet military publication published in May 1989 revealed that in addition to the 239 Soviet SS-23's that were eliminated under the INF Treaty, there was also a total of 211 more Soviet SS-23's which had either been test-fired or had been transferred to Soviet allies in Eastern Europe.

Moreover, the distinguished reporter Robert Toth stated in the Los Angeles Times of March 8, 1990, that "In 1984 and 1985, the Soviet Union moved a number of SS-23's from its territory into Czechoslovakia and East Germany in an effort to intimidate Western Europe." This is the first known public reference to the presence of Soviet SS-23's in Czechoslovakia.

Based upon these two unclassified pieces of information on the Soviet transfer of SS-23's to Czechoslovakia, I would like to pose several questions.

Mr. President, were up to about 100 SS-23's probably test-fired by the Soviets?

I ask further, has the Czechoslovakian army recently admitted that it has nearly 80 Soviet SS-23 missiles?

Mr. President, if 211 Soviet SS-23's were test-fired or transferred to Soviet allies in Eastern Europe, then does this total comprise the following three categories: First, 24 Soviet SS-23's confirmed to be deployed in East Germany; second, nearly 80 Soviet SS-23's deployed in Czechoslovakia; and third, up to about 100 Soviet SS-23's test-fired?

Mr. President, since the above three categories total only about 204 of about 211 SS-23's reported to have been test-fired or transferred to Soviet allies, is there still another batch of SS-23's unaccounted for?

I have several more questions.

Did the Soviets ever tell the United States during the INF negotiations that they had transferred SS-23's to their allies?

Did the Soviets, in fact, propose during INF negotiations in 1987 that all U.S. Pershing IA missiles transferred to West Germany, and other INF missiles transferred to allies by either side, should be banned under the INF Treaty?

Finally, Mr. President, I ask, do Soviet SS-23's transferred to Czechoslovakia violate the INF Treaty? Do they constitute a material breach of the INF Treaty?

If so, what will the United States do about the Soviet INF violations, which then-Secretary of State Schultz promised in January 1988 to react strongly against?

In sum, Mr. President, are Soviet covert SS-23 INF forces in East Germany and Czechoslovakia further positive evidence of Soviet covert INF forces?

But, Mr. President, there is yet a third area of recent Soviet violation of the INF Treaty—the Soviet break out from our cargo-scan x-ray monitoring

rights at their Votkinsk missile factory.

Is the Soviet removal of 3 missiles from Votkinsk without our treaty-guaranteed x-ray scanning irreversible, and does this Soviet denial of our x-ray monitoring rights at Votkinsk also constitute a violation and a material breach of the INF Treaty?

Mr. President, have the Soviets actually admitted that they have a new type of SS-25 ICBM being produced at Votkinsk, but have they also admitted that this new Soviet missile was never discussed with the United States in the INF negotiations? Is there evidence that the Soviets have set up a second, covert, production facility to produce the new type SS-25 ICBM's? What effect will a new type SS-25—probably carrying 3 MIRV's—have on START warhead counting rules, START constraints on new type missile modernization, and START verification regimes for mobile ICBM's?

If the Soviet prevention of our x-ray monitoring rights at Votkinsk is a serious INF violation, it is still only a procedural violation of the INF Treaty. But if the purpose of this Soviet procedural violation is to prevent the United States from detecting by x-ray the probable new type, 3 MIRV SS-25 ICBM, then an even more serious violation of the INF Treaty may be taking place.

Thus the Soviets may not ever be able to allow us to see this new type SS-25 missile at Votkinsk at all, without confirming that they are engaged in committing an even more serious, military significant violation. Soviet break out from Cargo-scan for the forcible removal of the first three new type SS-25's is irreversible. Indeed, it is possible that these Soviet actions will have a negative impact upon START.

President George Bush has a sound policy of not signing a START Treaty unless the Soviet-admitted illegal Krasnoyarsk radar is full dismantled to American satisfaction. The Congress strongly supports this policy. I wonder whether it would also be wise for President Bush to refuse to sign a START Treaty unless these two new Soviet INF Treaty violations are corrected?

As one Senator interested in sound arms control and strict compliance, I believe that President Bush should not sign a START Treaty until Krasnoyarsk is satisfactorily dismantled, and further, he should not sign START until these three apparent new Soviet INF Treaty violations are either explained or corrected as well.

I would now like to have some important documentation supporting my views printed in the RECORD.

First, I ask unanimous consent that an excellent article by Sven F. Kraemer, in the winter, 1990 edition of Strategic Review, be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follow:

[From Strategic Review, Winter 1990]

THE KRASNOYARSK SAGA

(By Sven F. Kraemer)*

In brief: Soviet Foreign Minister Shevardnadze's admission that the giant radar at Krasnoyarsk represents a breach of the ABM Treaty climaxed a long and somber story. It is a story not only of elaborate and sustained Soviet deception, but also of efforts within the U.S. bureaucracy to hammer out an effective compliance policy, as well as of at-large attitudes in the United States of dogmatic faith in arms control and easy beguilement by Soviet professions, even in the face of incontrovertible evidence. The story is not over: the Krasnoyarsk radar may yet play a part in the end-game of hastened negotiations toward the conclusion of a START Treaty.

After years of denial and cover-up at the highest levels of the Soviet Government, Foreign Minister Eduard Shevardnadze acknowledged, in an October 23, 1989, address to the Supreme Soviet, that construction of the giant Soviet radar at Krasnoyarsk, first discovered and protested by the United States in 1983, marked a clear and deliberate violation of the ABM Treaty of 1972. "All these years," said Shevardnadze, "we have been fighting for preservation of the ABM Treaty as a basis for strategic stability. Yet, at the same time, the construction of this station equal in size to the Egyptian pyramids constituted an open violation of the ABM Treaty." Implying that responsibility lay elsewhere, he asserted that it had taken the Soviet leadership four years to "come to know the truth" and to "sort our matters."[1]

Whatever may have been the intent behind Shevardnadze's revelation in the context of accelerated U.S.-Soviet negotiations toward a treaty on mutual reductions in strategic arms (START)—or in the continuing Soviet offensive against the U.S. Strategic Defense Initiative (SDI)—his statement clearly was meant also to reinforce the image of the Gorbachev regime's domestic reforms and its "New Thinking" in foreign policy. It flaunted the new "openness" that supposedly applies not only to the Soviet Union's internal life, but also its dark, embarrassing past. It attributed the onus for the origin of the Krasnoyarsk transgression to the Brezhnev regime, which has been blamed for much of the Soviet Union's current ills. And it sought to absolve the Gorbachev regime of responsibility by implying that it had been duped for four years by its own senior military commanders.

Shevardnadze's message to the United States was in effect: "We have sinned. We have deceived you. But with this confession, let us close the book on this regrettable episode in our past relations."

Yet, that book cannot be closed. It is precisely for its import for the future of U.S.-Soviet relations that the story of the Krasnoyarsk radar needs to be rehearsed and pondered. That story reflects not only on a Soviet policy of deception, but also on the critical issue of a U.S. policy on arms control compliance, and thus on the continuing East-West "arms control process."

BACKGROUND IN THE 1970'S

The Krasnoyarsk violation must be placed historically within the larger context of Soviet violations of international agreements. It involved only one, albeit a particularly significant, breach by the Soviet Union of agreements reached with the United States during the 1970s. It is the legacy of a decade in which the U.S. Government increasingly ignored and/or excused Soviet transgressions of not only arms control and human rights treaties, but also regional agreements involving Vietnam, the Middle East, Africa and Central America.

Soviet violations continued to mount even as three successive U.S. Administrations, under Presidents Nixon, Ford and Carter, vainly sought to bring about a more constructive Soviet behavior through what Henry A. Kissinger had characterized as an "entangling web" of arms control, trade, regional and cultural agreements with Moscow. Typical of the spirit of the time, a report issued in 1978 by the Department of State on Soviet compliance with arms control agreements essentially absolved the Soviets of any violations.

In the latter 1970s, the increasingly glaring gap between official U.S. judgments of Soviet behavior and the reality of that behavior—particularly as it was expressed in an ever more aggressive extension of Soviet power into the Third World and a massive buildup of Soviet military power across the full spectrum of capabilities—provided the magnet for the coalescence of a small band of professionals in the Washington policy community. It was an informal and loose grouping of active and former Executive Branch officials, Congressional staffers and members of foreign policy "think tanks," including both "Jackson" Democrats and "Reagan" Republicans. They communicated with one another and met occasionally to discuss shared concerns on arms control and compliance issues. In this, they drew on analyses of the Armed Services, Intelligence and Republican Policy Committees of the U.S. Senate, on such private organizations as the Committee on the Present Danger, and on detailed criticisms of the arms control compliance process such as those by former Defense and ACDA officials Melvin Laird, Fred Iklé and John Lehman, and by ex-CIA analyst David Sullivan.[2]

The group's concerns rose as Congressional hearings on the SALT II Treaty, tabled by the Carter Administration, bared deep problems in that treaty, especially those related to definition, verification and enforcement—problems that were compounded by the loss of major U.S. monitoring sites in Iran following the revolution that overthrew the Shah, as well as by widening disparities in the U.S.-Soviet strategic balance in favor of the Soviet Union.

EARLY THRUSTS IN THE REAGAN ADMINISTRATION

Largely through the efforts of the group, many of whom joined the ranks of Ronald Reagan's foreign policy and defense advisers, their concerns became dominant themes in the 1980 Presidential campaign. The planks of the Republican Party Platform of

*The author: Sven Kraemer is Deputy Director of the Center for Security Policy in Washington. He served for a total of 16 years with the National Security Council under Presidents Johnson, Nixon, Ford and Reagan. As the NSC's Director of Arms Control in the Reagan Administration, from early 1981 until his resignation in August 1987, Mr. Kraemer represented the NSC in numerous interagency committees, with a focal role in the areas of arms control verification and compliance, including the policy issues described in this article.

[1] Footnotes at end of article.

1980 scored non-compliant and aggressive Soviet behavior and weak U.S. responses, warned of widening vulnerabilities in the U.S. defense and deterrence posture and urged the rapid modernization of U.S. deterrent forces. The Carter Administration was accused of a cover-up of Soviet arms control violations.[3]

Following Ronald Reagan's election victory, these concerns and themes were injected into the coming Administration's transition teams, notably those in the Departments of Defense and State, the Central Intelligence Agency and the Arms Control and Disarmament Agency. Although a number of the group's members were eventually denied positions in the Reagan Administration itself, others, including this writer, gained senior positions within the Government.[4]

By dint of their previous experience, these self-styled "realists" were well-versed in the issues as well as in the ways of the bureaucracy. In the arms control arena, they particularly benefitted from a strong bridge between the new officials dealing with arms control matters in the National Secruity Council (NSC) and the Defense Department, while they also found enclaves of support for their general perspective within the White House staff, at senior levels of the Central Intelligence Agency and in the Arms Control and Disarmament Agency's Verification Bureau.

During 1981 and 1982, this core network of officials pressed ahead on a broad front of arms control and defense issues. They were instrumental in the preparation and implementation of Presidential instructions to the dozen Interdepartmental Groups (IGs) working on a wide range of arms control issues. By mid-1982, the Reagan Administration had formulated farreaching, new arms control proposals for strategic and intermediate-range nuclear weapons reductions, and major reviews on nuclear weapons reductions, and major reviews on nuclear testing policy. Although new interagency efforts to assess Soviet violations of the SALT II agreement were blocked by the Department of State during 1981, extensive reports were issued in 1981 and 1982 on Soviet violations of chemical and biological weapons conventions.[5]

ADVENT OF COMPLIANCE MACHINERY

Late in 1982, the National Security Council established a new body for optimizing the decisionmaking process with respect to arms control negotiations: the Senior Arms Control Group (SACG). Meeting in the White House Situation Room, chaired by the National Security Adviser and supported by NSC arms control staff, the SACG embraced officials at undersecretary and assistant secretary levels in some seven government agencies. Through intensive senior-level discussion and centralized direction, even highly complex negotiations issues could now be brought into focus.

The same degree of clarity and effective decisionmaking grasp unfortunately could not be brought to bear on matters of verification and compliance. On these issues, the Senior Arms Control Group repeatedly became mired in technical complexities, policy dilemmas and, above all, delaying tactics and resistance from within the governmental bureaucracy, especially in the State Department, ACDA and parts of CIA.

At this stage, the National Security Council staff responsible for arms control issues came up with the design of additional instrumentalities which could give the President's arms control criteria—particularly those applying to verification and compliance—a better chance to prevail. First came the establishment of a new senior-level NSC group—the Arms Control Verification Committee (ACVC)—with the mandate of focusing exclusively on verification and compliance issues and of providing assessments and options to the National Security Council and the President.[6] The fact that the committee was chaired by the National Security Adviser or his representative lent assurance that the NSC would play a decisive role in its agenda, procedural arrangements and the framing of final drafts for Presidential decision.

The Presidential control function was enhanced by the creation of two major components of the Arms Control Verification Committee, one "technical" and the other "policy-oriented," each cochaired by at least one Reagan appointee strongly supportive of the President's objectives. Thus, the ACVC Technical analysis component was cochaired by the tough-minded head of ACDA's Verification Bureau, along with a senior intelligence expert from CIA. The chair of the ACVC Policy component was shared by the Director of the Department of State's Bureau of Political-Military Affairs and the Assistant Secretary of Defense for International Security Policy.

In this way, the Ams Control Verification Committee was able both to complement the Senior Arms Control Group and to reduce its burden of contentious verificaton and compliance issues. At the same time, a more effective meachanism was created for zeroing in on those issues.

TWO TASKS FOR THE VERIFICATION COMMITTEE

Early in 1983, the Arms Control Verification Committee was assigned two major tasks that would decisively shape the Administration's verification and compliance policy. First, the ACVC was asked systematically to evaluate and attest to the "effective" verifiability of any and all of the Administration's arms control proposals—i.e., to certify that every provision of such a proposal was clear in its definitions and its data base, and that there was high confidence that compliance could be monitored in a timely and unambiguous manner.

The "effective verification" criterion directly contested the prevailing bureaucratic view that arms control agreements required only "adequate" verification. "Adequate" had served in the past as a highly elastic standard, according to which verification was deemed satisfactory so long as it enabled the detection of violations of "major" military consequence or "breakout" potential. The criterion of "effective verification," along with the requirement of senior-level certification, meant more rigorous standards to be applied.

At the same time, the ACVC was directed to prepare for review by the National Security Council and the President a comprehensive report of major issues of Soviet noncompliance with arms control agreements. Initially, Department of State representatives and their allies in the Verification Committee proposed to respond to this directive by considering the total provisions of all major arms control agreements and then undertaking what amounted to a "net assessment" of Soviet compliance with each accord, based on an arithmetic count of whether or not the Soviet Union was adhering to a majority of its provisions. This was clearly a prescription for an endlessly drawn-out review process, along with a method that would have the effect of burying specific Soviet violations within a generalized judgment.

The NSC arms control staff ultimately prevailed against this proposal, arguing that it was analogous to declaring that the gangster Al Capone had been in net "compliance" with the U.S. tax code so long as he adhered to a majority of its detailed provisions, even while violating others. The Verification Committee was thereupon directed to concentrate on six major cases of suspected Soviet noncompliance: (1) chemical, biological and toxic weapons conventions; (2) the Helsinki Final Act; (3) encryption of missile tests under SALT II: (4) the development of the new Soviet SS-X-25 missile under SALT II; (5) Soviet SS-16 missile deployments under SALT II; and (6) the Threshold Test Ban Treaty.

In July 1983, when U.S. intelligence discovered the new Soviet radar facility under construction at Abolakova near Krasnoyarsk, Siberia, this issue was added to the six arealy under special review. Additional tasks and procedures were outlined, setting a pattern for all future compliance reports. The ACVC was directed to prepare:

Technical analyses of the intelligence data, monitoring capabilities, etc.

Legal analyses, to include the treaty language and negotiating record.

Policy recommendations for appropriate U.S. responses.

Diplomatic demarches and exchanges with the Soviet Union in the U.S.-Soviet Standing Consultative Commission (SCC) and other diplomatic forums in order to seek explanation or resolution of U.S. compliance concerns.

A classifed report on Soviet noncompliance for highest-level review.

Classified compliance briefings to Congress.

THE PRESIDENT'S GENERAL ADVISORY COMMITTEE

It was anticipated in the NSC that the imposition of the Verification Committee on a recalcitrant bureaucracy would not suffice to overcome the latter's by-now reflexive resistance and foot-dragging on compliance issues. What was needed, in addition to the new "inside" mechanism, were the objective views of independent experts—to assure that the President would receive assessments and policy options undistorted by interagency infighting.

This second instrument was the President's General Advisory Committee on Arms Control and Disarmament (GAC), a group of distinguished experts from the private sector chaired by Dr. William Graham. In the late fall of 1982, at a swearing-in ceremony in the White House, the President asked the GAC to prepare a comprehensive, independent review of noncompliant Soviet activites. The review was to be classified and to include the Committee's own policy recommendations.[7]

Although the GAC's independent effort was subsequently opposed by the State Department and the Director of the Arms Control and Disarmament Agency, it completed the review by October 1984. Detailing an extensive pattern of Soviet treaty violations covering a twenty-five year period, the GAC report strongly corroborated the assessments of the seven compliance issues undertaken by the Arms Control Verification Committee, including the Kasnoyarsk radar. The GAC's chairman subsequently briefed the President on the Committee's findings and recommendations. At Congressional request, the GAC report and briefings were provided to the Congress, and

summaries subsequently appeared in the press.

THE KRASNOYARSK VIOLATION

It was through such concerted mechanisms that the Reagan Administration was able to enforce a new governmental focus on the issue of Soviet compliance with existing obligations, including—after its discovery in July 1983—the Krasnoyarsk radar. The construction of the radar was a clear violation of several key provisions of the 1972 ABM Treaty.

First of all, the Treaty, as amended by subsequent protocol agreed-upon by the United States and the Soviet Union, banned the deployment of anti-ballistic missile defenses by either side except at one optional location: either around the national capital or at a selected area of ICBM deployment. The Soviets had designated Moscow as that single, permitted location. In behest of that choice, they deployed radars and up to 100 missile launchers around the national capital—systems which they steadily continued to improve. The United States, in contrast, had designated the Minuteman silos at Grand Forks, North Dakota, as its ABM site, but already by 1975 had abandoned all ABM deployment even there.

Second, the Krasnoyarsk construction breached the Treaty provisions applying to early-warning radars. In order to prevent the erection of a territorial ABM defense, the Treaty limited the deployment of Ballistic Missile Early Warning Systems (BMEWS), including Large Phased-Array Radars (LPARs) used for that purpose, to locations along the periphery of the territory of each party. It also required that such radars be oriented outward.

The ABM treaty did invite ambiguity by not restricting LPARs put up for the purpose of tracking objects in outer space or for use as national technical means to verify compliance with arms control agreements. It was this ambiguity that the Soviets deliberately set out to exploit in the Krasnoyarsk construction. Once the construction was discovered and could no longer be denied, the Soviets invoked the fiction that the radar was being erected for purposes of space-tracking. They maintained that fiction—and deliberate deception—until Shevardnadze's admission to the contrary in 1989.

Yet, the Soviet fiction was transparent from the outset. The phased-array-radar being put up at Krasnoyarsk was identical to a new class of Soviet radars, including the LPAR at Pechora, which had been explicitly identified by the Soviets as a Ballistic Missile Early Warning Radar. It was clearly designed for the detection and tracking of ballistic missiles. It is located remote from the "periphery" of the Soviet Union—more than 700 kilometers from the nearest border (with Mongolia). It faces not south toward that border, but across 4,000 kilometers of Siberia toward the northeast. Thus positioned, it is strategically sited near major Soviet ICBM bases and in a direct line between those bases and the one area which had remained a possible gap in the Soviet Union's BMEWS coverage.

It needs to be stressed that the actual operational status of the Krasnoyarsk facilities is not a factor or variable bearing upon its status as a violation. The record of the ABM Treaty negotiations makes it clear that the very construction of an LPAR is inconsistent with the terms of the Treaty. The intent was to prevent the components of a territorial ABM defense from being put into place over time toward a potential "breakout" from the Treaty.

It is precisely in a larger context of Soviet ABM activities, also involving probable or potential violations, that the Krasnoyarsk construction—serious enough in its own right—took on added magnitude. Such related Soviet activities have included the following:[8]

ABM component mobility: the development and testing of various components of a potential ABM system that could thereby be made deployable in a relatively short time.

Concurrent operation of air defense components and ABM components.

Air Defense with ABM capabilities: the development of modernized strategic air defense systems notably the SA-10 and SA-12 surface-to-air missiles that may have effectiveness against ballistic missiles.

ABM rapid reload: the demonstration of an ability to reload ABM launchers in a period of time short enough to cause the United States concern as to Soviet capabilities and intent with regard to rapid reload.

The Gomel Radars: as first noted in the President's December 1987 report, the deployment by the Soviets of a Flat Twin radar and a Pawn Shop radar-van at Gomel—i.e., at a prohibited location neither at the periphery of the Soviet Union nor at the Soviet ABM test site at Shary Shagan.

The sum of these Soviet activities led to a Presidential conclusion that the Soviets might be preparing a prohibited territorial defense against missiles. It needs to be noted that, given the scope of Soviet ABM efforts, this conclusion would remain valid even if the Krasnoyarsk radar were actually dismantled.

THE SCC AND THE PRESIDENT'S REPORTS

Critics of the Reagan Administration's position on the Krasnoyarsk radar and other compliance issues frequently accused the Administration of deliberately inflating the issue of Soviet noncompliance for domestic-political purposes and/or in order to "undermine" the arms control process. They charged that the Administration failed to use existing diplomatic mechanisms, particularly the U.S.-Soviet Standing Consultative Commission (SCC), for resolving compliance problems—indeed, that it broke diplomatic procedures by going public with the details of SCC deliberations and other confidential diplomatic exchanges.

These charges were totally off the mark. Insiders in the Reagan Administration can attest to the often grueling patience with which the Administration pursued existing diplomatic procedures in particular holding to the hope that compliance issues could be explained or resolved in the forum of the U.S.-Soviet Standing Consultative Commission (SCC).

The SCC had been established in 1972 in the context of the ABM Treaty, as well as the SALT I Interim Agreement Limiting Offensive Arms. Its mandate was later extended to the SALT II Agreement of 1979.[9] The Administration continued to raise SALT I and SALT II noncompliance issues in the SCC at least until 1986, when President Reagan made the decision that the United States would finally step away from these breached agreements.

For each semi-annual session of the SCC in Geneva, which usually spanned from four to six weeks, detailed options papers and instructions were reviewed at the NSC and Presidential levels. The objective was to seek explanation or resolution of each issue, and SCC reporting cables were carefully reviewed by a "backstopping" support group and the ACVC in Washington.

The SCC exchanges were never made public; extensive summaries of those exchanges were provided to the Congress only in classified form. The record of those exchanges establishes the accuracy of the President's statement in his initial compliance report: "We have discussed with the Soviets all of the activities covered in the report, but the Soviets have not been willing to meet our basic concerns which we raised in the Standing Consultative Commission in Geneva and in several diplomatic demarches. Nor have they met our requests to cease these activities."[10] Subsequent compliance reports continued to note that "the Soviet Union has failed to correct its noncompliant activities; neither have they provided explanations sufficient to alleviate our concerns. . . ."[11]

THE PRESIDENTIAL FINDINGS

Following the totally unproductive session of the SCC in the fall of 1983, and upon further review by the National Security Council, a Presidential finding was issued on the Krasnoyarsk radar and the other six major compliance issues as part of a report. In September 1983, the Congress had passed a legislative request for such a Presidential report.[12] On January 23, 1984, the President transmitted his first comprehensive, classified statement on compliance to the Congress. In some hundred pages, the report conveyed his findings, along with detailed description of the evidentiary base and the SCC discussions on each issue. The Presidential finding in the January 1984 report was that the Krasnoyarsk radar facility represented an "almost certain" violation of the ABM Treaty. The qualification "almost" reflected the hesitation of those in the Administration who had not yet confronted the fuller implications of the Soviet activity and urged diplomatic restraint.

By the time of the President's second compliance report to the Congress in February 1985, additional intelligence and legal analysis elevated the finding to that of a "certain" violation—a position that was supported by all the relevant agencies of the Government. This has remained the official U.S. judgment in subsequent, yearly reexaminations of the issue. In the last compliance report submitted by the Reagan Administration, issued on December 2, 1988, the Krasnoyarsk radar was described as "a singificant violation of a central element of the Treaty."[13] The report added that "the radar demonstrates that the Soviets were designing and programming a prospective violation of the ABM Treaty even while they were negotiating a new agreement on strategic offensive weapons with the United States."

The President's 1988 report, for the first time, also described the radar as a "material breach" of the ABM Treaty. Nevertheless, the Administration stopped short of the warranted conclusion that the U.S. Government should end continued compliance with the ABM Treaty (as it had finally done in late 1986 with respect to SALT I and SALT II accords).

CONGRESSIONAL CONCERNS

During the 1970s, Congressional interest in compliance issues had been limited to a relatively small core of members and staff who became concerned about both Soviet treaty violations and weaknesses in U.S. monitoring capabilities—concerns that came to the fore in the debates over the SALT II Treaty in 1979. Congressional interest rapid-

ly grew during 1981 and 1982 in pace with a rash of U.S. intelligence reports of mounting problems of Soviet noncompliance with major agreements. The rising concern on Capitol Hill was expressed, *inter alia*, in the September 1983 requirement for a Presidential report to the Congress on the subject.

Once briefed on the facts about the Krasnoyarsk radar, a large majority in the Congress accepted the Administration's position that the radar marked a clear violation of Soviet treaty obligations and thus constituted a serious obstacle to the mutual trust essential to new arms negotiations. By substantial majorities, the Congress repeatedly urged that the radar be dismantled. Thus, a Senate resolution, passed in February 1987 by a 93-2 vote, declared "that an important obstacle to the achievement of acceptable arms control agreements with the Soviet Union has been its violation of existing agreements, and calls upon it to take steps to rectify its violation of such agreements and, in particular, to dismantle the newly-constructed radar site at Krasnoyarsk, USSR, since it is a clear violation of the terms of the ABM Treaty." [14]

A Senate resolution dated September 16, 1987, and passed unanimously, repeated the call for dismantlement of the Krasnoyarsk radar, asserting that the Krasnoyarsk violation had to be corrected before any future U.S.-Soviet agreements on strategic arms could be concluded. The House of Representatives, on May 6, 1987, voted 416-0 in support of a resolution which expressed the recognition that in constructing the Krasnoyarsk radar the Soviet Union was in violation of its legal obligations under the ABM Treaty. In 1987 and 1988, the House overwhelmingly adopted amendments declaring Krasnoyarsk to be a "material breach" of the ABM Treaty.

There can be no doubt that Soviet officials were completely aware of the concerns in the U.S. Congress about the Krasnoyarsk radar, conveyed in such resolutions and amplified by individual members of Congress in numerous exchanges with senior Soviet officials, including Mikhail Gorbachev. A notable example was a letter addressed to Gorbachev by leading members of the House of Representatives headed by the Chairman of the Armed Services Committee, Les Aspin (D-WI). In the letter, dated March 20, 1985, the Congressmen warned that "adherence to existing treaties is a necessity in order for future agreements to be possible." [15]

SOVIET DENIAL AND COUNTERCHARGES

Notwithstanding the clear, physical evidence of the Krasnoyarsk radar's location and purpose—and despite numerous U.S. diplomatic initiatives and repeated expressions of Congressional concern—the Soviets for some six years played a game of cover-up and prevarication. The game involved the highest levels of the Soviet Government. In the ten Standing Consultative Commission sessions and other forums during the period—two ABM Treaty Review Conferences in 1983 and 1988 and four summit meetings—the Soviets adopted a two-pronged tactic vis-a-vis the U.S. charges.

One tactic was bland denial. Soviet officials, including successive foreign ministers and heads of state, notably Mikhail Gorbachev after he became General Secretary in 1985, categorically rejected all U.S. charges about the radar, declaring them to be completely without foundation and provocative and injurious to the arms control process and relations between the two superpowers. A typical example of this official denial was the following statement in a press release issued by the Soviet Embassy in Washington on April 23, 1985: "This radar, the construction of which was started but is not completed, has nothing to do with the obligations assumed by the sides under the ABM Treaty. Its purpose is to follow space objects." [16] What makes this statement of particular interest is that it must have been approved by the Soviet Ambassador at the time, Anatoli Dobrynin. Subsequently Dobrynin was recalled to Moscow to become a senior adviser to Mikhail Gorbachev on policy toward the United States.

The second Soviet tactic was to launch countercharges: Soviet officials went on the offensive with allegations of American violations of arms control compacts. Adding to the cynicism of this gambit was the fact that for years the Soviets had denied not only the purpose of the Krasnoyarsk radar, but the most basic facts concerning the massive Soviet program in strategic defenses—a program which included deployed missiles, as well as extensive research in advanced technologies, including space-based systems.[17] Still, following President Reagan's announcement on March 28, 1983, of his Strategic Defense Initiative (SDI), the Soviets launched a worldwide campaign spearheaded by the charge that the SDI program was being conducted in violation of the ABM Treaty. In fact, the Soviets were well aware, through their comprehensive intelligence coverage of the United States, that the SDI research and development program, as prescribed by both the Executive and Legislative branches of the U.S. Government, was being kept scrupulously within the Treaty limits—indeed, within a narrow definition of those limits.

To the false charges against SDI the Soviet Union added the allegation that long-planned improvements of the U.S. Ballistic Missile Early Warning System (BMEWS) radar facilities in Greenland and the U.K. were in violation of the ABM Treaty. In fact, however, as the United States made clear in rejecting a Soviet offer to consider a "trade" of the illegal Krasnoyarsk radar for these two legal U.S. radars, the construction of the U.S. radars had preceded the ABM Treaty, their upgrading was not barred by the Treaty and, unlike the Krasnoyarsk radar, those radars were remote from any U.S. missile fields.

INITIATIVE OF THE ARMS CONTROL ASSOCIATION

The Soviet campaign of denial and counteroffensive struck resonant chords in the American political scene, particularly among organizations that had gained influence during the "detente" years of the 1970s. Centered in Washington, these groups have styled themselves an "arms control community" or "arms control lobby." There can be, in the space of this article, no detailed nomenclature of this "community." Suffice it to say that its members are linked by an interest in promoting the cause of U.S.-Soviet arms agreements and encouragement of the arms control "process."

One prominent such organization is the Arms Control Association (ACA). In the context of the history of the Krasnoyarsk issue, it is of interest to note that leading spokesmen of the Association offered their pronouncements on the Krasnoyarsk radar as early as four days *before* the President's classified report was scheduled to be transmitted to the Congress and while senior National Security Council officials and President Reagan were still giving final consideration to the assessments of evidence, SCC exchanges and options presented by the Verification Committee and the Senior Arms Control Group.

In a January 18, 1984, press release issued on the letterhead of the Arms Control Association, three prominent former Government officials—Gerard Smith, Paul Warnke and Herbert Scoville—gave their view of the Krasnoyrask issue. They centered their concern not so much on the question of whether the Soviet radar was or was not in violation of the ABM Treaty, but on the risks of raising the issue at all. They warned:

"Any public pronouncement by the President that the Soviets are violating arms control agreements is irrevocable. It will certainly not induce them to change their position or to come to the negotiating table with a more positive attitude. . . . Such accusations can only add to the already widespread concern that President Reagan has not been truly interested in nuclear arms control. . . ."

A second theme of the Smith-Warnke-Scoville statement was to downgrade any military significance of a "potential" violation. They averred:

"This radar, *even if it were to become part of an ABM system*, would not provide the Soviet Union with a capability that could seriously downgrade our strategic deterrent. . . . It will not be completed or operational until the late 1980s. . . . There is still time to get the Soviets to stop the deployment through private negotiations in the SCC. . . . *They will never halt this deployment in the glare of an official charge of cheating. . . .*" [18]

This Arms Control Association perspective on Krasnoyarsk and the more general issue of a U.S. compliance policy remained unchanged even after an extensive, classified briefing on the report's evidence and findings was provided by Administration experts to senior ACA members. Paradoxically, however, the ACA's "preemptive strike" enable proponents of a strong policy on compliance within the Administration to argue successfully that the White House could not afford to rest its case behind veils of classification and leave unanswered the ACA's confusion about the facts and its challenge to the Administration's integrity. In short, the Administration had to "go public" with an unclassified version of the President's report.

Press guidance, an unclassified summary of the findings, as well as a declassified version of the President's transmittal letter to the Congress, were duly prepared by the NSC staff and ACVC representatives for release as a White House "Fact Sheet." When the State Department refused to publish the Fact Sheet as part of the Department's official document series, the NSC staff worked with the Congress to ensure that this product would set the precedent for an unclassified version of future compliance reports to the Congress.

As a postscript to the Arms Control Association's perspective on Krasnoyarsk and compliance, it should be noted that after four years of ACA critiques and complaints, an ACA staff review, cited in the Association's March 1987 newsletter, acknowledged, briefly and without reference to the ACA's previous allegations, that "the Administration's charge that Krasnoyarsk violates the ABM Treaty appears to be correct." Still, the review wound up with the stock judgment that the radar "does not fundamentally undercut the treaty's objectives. . . ." [19]

THE FEDERATION OF AMERICAN SCIENTISTS

The Federation of American Scientists (FAS) has established itself as a frequent and vigorous critic of U.S. defense policy. It clearly prides itself on the scientific basis of the analyses that it applies to its policy recommendations.

On March 7, 1984, the FAS issued an extensive attack on the President's January compliance report. In the FAS document, a group of scientists, headed by John Pike and Jonathan Rich, gave special attention to the Krasnoyarsk radar, developing arguments and themes that would become standard in the arguments of the "arms control lobby" on the issue.[20]

The FAS report acknowledged that the radar installation did raise a number of possible compliance problems. For example, "the Abolakova [Krasnoyarsk] radar is far from the periphery of the Soviet territory and has a primary coverage field that encompasses much of Siberia. Thus it does not meet the criteria established for early warning radars." Furthermore, "the proximity of Abalakova to Soviet ICBM facilities at Alyesk (SS-18), Gladkaya (SS-11), Itatka (SS-11), Uzhur (SS-18) and Zhangiztobe (SS-18) has also been cited as evidence for the ABM function. And, "it is clear [that] when completed, the radar will have a power aperture product far in excess of the three million figure . . . subject to the Treaty's limitations."

Having granted these incontrovertible facts, the FAS report then set out to denigrate their import. In the main reflecting acceptance of the Soviet position, the essential arguments in the lengthy document were that:

"Concern over the ABM potential of Abalakova [Krasnoyarsk], and suspicion aroused by the Soviet's explanation of this facility, are more a product of faulty deduction than of analysis of the facts.

". . . The Soviets do not claim that the radar satisfied the Treaty's definition of an early warning radar, they contend that the radar is for tracking satellites . . . [and] the Soviet explanation is fairly credible when viewed in the context of the Soviet anti-satellite (ASAT) program."

The FAS report drew two major policy conclusions from its ostensibly scientific analyses. First, according to the report, the radar "provides further incentive for the negotiations of limitations on anti-satellite weapons." Aside from rejecting the most salient technical and legal facts about the Krasnoyarsk violation, this puzzling policy recommendation was indicative of another prevalent theme in the response from the "arms control community" to violations of existing agreements: namely, that such breaches do not invalidate the arms control process, but call instead for still further agreements.[21]

Second, the report averred that, "since the radar will take some years to complete, there is ample time for negotiating a satisfactory solution to this grey area problem, with little danger to U.S. national security in the process." Again, this recommendation ignored the fact that the radar's construction, not operational status, constituted a violation. No "grey area" was involved.

THE STANFORD UNIVERSITY STUDY

In order to illuminate the Krasnoyarsk dialogue over time, we now take up the February 12, 1987, report of a Working Group of Stanford University's Center for International Security and Arms Control.[22] The study effort was headed by Gloria Duffy and was publicized as enjoying the support of such specialists on arms control as Sidney Drell, Philip Farley, Wolfgang Panofsky, Robert Buchheim, Raymond Garthoff, Sidney Graybeal and Michael Krepon.

By 1986, the data on the Krasnoyarsk radar was unchallengeable to the point where the Stanford Working Group acknowledged that the Soviet claim that the radar "is designed for space-tracking is contradicted by all available evidence." Still the violation was given an implicitly relative rating; it represented "a more clear-cut treaty violation" than any other compliance issue raised by the Reagan Administration. Moreover, notwithstanding the concessions to the accuracy of the U.S. Government's case against Krasnoyarsk, the Stanford group's report quoted with approval the judgment of RAND Corporation Sovietologist Arnold Horelick that the radar represented "no strategic threat in and of itself and probably at best only a marginal add-on to a breakout capability." The radar, concluded the report, was merely "a technical violation of the ABM Treaty, but is of little military significance by itself."

What made the Stanford Working Group's assessment all the more noteworthy is that they attest to the impact of Soviet countercharges of alleged U.S. violations of the ABM Treaty. The notion of an equivalence in non-compliance was implicit in the statement that "the radar raises the troubling possibility of each side chipping away at the ABM Treaty."

THE CONGRESSIONAL VISIT TO KRASNOYARSK

Perhaps the peak of irony in the "Krasnoyarsk saga" was reached in a visit to the radar facility on September 5, 1987, by a U.S. Congressional delegation including Representatives Thomas J. Downey (D-NY), Jim Moody (D-WI) and Bob Carr (D-MI) accompanied by Congressional staffers. The visit, ostensibly arranged under the new Soviet policy of *glasnost*, was facilitated by a private U.S. organization, the National Resources Defense Council. In evaluating the "findings" of the visit, it nees to be borne in mind that the Congressmen and their staff reached their conclusions despite access to extensive prior reports and briefings by the Administration on the Krasnoyarsk radar, including the detailed, classified record of unsatisfactory exchanges in the Standing Consultative Commission.

On September 8, 1987, Representatives Downey, Moody and Carr issued a press release to report on their tour of the facility.[23] They had been escorted by senior Soviet officials. Among them were Yevgeni Velikhov, a Soviet scientist reportedly active in Soviet strategic defense programs, as well as a leading propagandist against the U.S. SDI program, and Alexei Arbatov, the son of the prominent Soviet propagandist and expert on the United States, Georgi Arbatov, and himself a member of the Moscow Institute for the Study of the USA and Canada.[24]

The report by the Congressmen made it clear that, in a tour lasting but four hours, they had been given at best limited access to the facility. They had walked around the exterior of the huge installation. They were permitted to see an interior section of but one of at least seven floors, in one of the two radar buildings. Nevertheless, the Congressmen elected to characterize the visit as precedent-setting "on-site inspection."

The Congressmen's report indicated that, on the basis of their visit, they could not reach a definitive conclusion on whether the radar was there for early warning, as has been determined by the U.S. Government, or for space-tracking purposes, as the Soviets continued steadfastly to claim. Notwithstanding the limited access to the facility, as well as the detailed facts made available to him earlier on a classified basis by the U.S. Government, Congressman Downey stated in the press release: "We know a good faith effort when we see it." Presumably impressed by the Soviets' "good faith," the Congressional group concluded that U.S. claims about the radar were "exaggerated," that the radar was not yet "operable," and that "we judge it to be not a violation of the ABM Treaty at this time."

LESSONS UNLEARNED

The Krasnoyarsk violation casts profound and durable implications for U.S.-Soviet relations and U.S.policy. It puts into sharp and inescapable relief fundamental questions regarding the integrity of the arms control process and Soviet intentions—and does so at the very time that the U.S. Administration is accelerating efforts toward concluding a series of major new agreements at the U.S.-Soviet summit in June 1990.[25]

Those questions have not been dispelled by Shevardnadze's belated admission in October 1989, nor will they fade even if the radar is ever dismantled. The Krasnoyarsk case strikes to the heart of the arms control process and the vital national security interests invested in it by the United States. It demonstrates starkly that the "bottom line" of that process should not be verification—the ability to monitor compliance—but a compliance policy which conveys the ability, and more important the determination, to call the violator to account and take the necessary redressive steps in response to the violation.

In this latter respect, the story of the Krasnoyarsk radar illuminates not only Soviet deception, but even more poignantly a predisposition in the American body politic toward self-deception—even a willingness to be deceived. The history recounted here shows that the critical battle over the Krasnoyarsk violations—and over the core issue of compliance in the larger arms control context—took place not so much in the Standing Consultative Commisson and other U.S.-Soviet fora, but within the U.S. bureaucracy and the broader American political arena.

More specifically, the Krasnoyarsk story bares a seemingly reflexive tendency among American proponents of arms control to sidestep the issue of compliance—by denying and/or excusing clear-cut evidence of violations, by denigrating the implications of the breach, and by adducing a "solution" in the pursuit of still further arms control agreements. Irnoically, even in the wake of Shevardnadze's admission, the lessons not only are being denied, but turned on their head. A new "revisionism" has come to the fore averring that the Krasnoyarsk radar was an issue raised and exploited by the Reagan Administration largely in order to justify its own Strategic Defense Initiative.[26]

Still, the somber implications of the Krasnoyarsk saga apply to the Gorbachev regime, its objectives and intentions. The pyramid-sized radar installation, to use Shevardnadze's imagery, stands a a landmark to the longstanding Soviet policy of deception and breaches of treaty obligations that has been described above. Shevardnadze's suggestion that it took Soviet political leaders four years to "sort things out" with respect to the radar challenges all that has been

known about the Soviet system. If accepted at its face value, it would mean that the regime in Moscow does not control its own military—a notion that would not only devalue all existing and future arms agreements with the Soviet Union, but raise staggering implications for the U.S.-Soviet relationship more generally. Yet, if Gorbachev was duped by his military leaders, would he not have dismissed, rather than promoted, such as his current Defense Minister, Marshal Dmitri Yazov, and his senior arms control adviser, Marshal Sergei Akhromeyev, who clearly share responsibility for the erection of the radar? Not only has no Soviet officer or official been dismissed, but, according to U.S. sources, ranking Soviet military officers continue to express disagreement with the Soviet Foreign Minister's acknowledgement of the violation.[27]

There is the added irony that the U.S. Government's compliance policy has meanwhile been substantially watered down. In President Reagan's March 1987 compliance report, it was declared to be U.S. policy that: "Compliance with past arms control commitments is an essential prerequisite for future arms control agreements. . . . Strict compliance with all provisions of arms control agreements is fundamental, and this Administration will not accept anything less." Yet, at the December 1987 summit, the INF Treaty was signed, without the Soviet Union having corrected numerous major treaty violations. The December 1988 Compliance Report contained a statement of intent that was conspicuously qualified:

"We have informed the Soviets that the radar calls into question the viability of the AMB Treaty and makes it impossible to conclude future arms control agreements in the START or Defense and Space areas. The violation caused by the Krasnoyarsk radar will continue to raise the issues of material breach and proportionate responses until it has been resolved." [28]

There is every reason to expect that the story of Krasnoyarsk by no means has ended with Shevardnadze's statement. Indeed, as the United States and the Soviet Union are rushing toward the conclusion of a START agreement in the June summit, the radar is likely to play a prominent role in the Soviet "end-game" against what remains the central target of their negotiation strategy and political offensive: namely, the U.S. Strategic Defense Initiative.

Already in high-level meetings with Secretary of State James Baker in Wyoming in September 1989,[29] and at the Malta summit in December 1989, the Soviets "raised the ante" against SDI by warning that future Soviet compliance with a new START agreement, strongly pursued by the Bush Administration, would be hostage to continued U.S. compliance with the ABM Treaty.

With the Krasnoyarsk radar and the ABM Treaty issue now seen by U.S. and Soviet negotiators as the main remaining obstacles to START—on the assumption that such other contentious issues as those relating to sea-launched cruise missiles, missile-test data encryption, etc., will have been cleared out of the way by then—the Soviet Union's pre-summit gameplan can be expected to include the ostentatious gesture of beginning the dismantlement of the radar. The gesture would, of course, leave untouched the steadily expanded network of other Soviet programs destined for extensive Soviet strategic missile defenses. At the same time, it could assure the long-standing Soviet objective of enshrining a permanent, if essentially unilateral, U.S. adherence to the ABM Treaty, thereby foreclosing any future U.S. strategic defense. With SDI effectively blocked, so would be the best U.S. insurance against Soviet cheating in START, against a Soviet "breakout" from the ABM Treaty, as well as against potential missile threats from elsewhere on the globe.

In short, the shadow of Krasnoyarsk hangs heavily over the "new era" of U.S.-Soviet relations. It demonstrates that we may be entering a time of high expectations, but also a time of high stakes and risks—of clear and present danger.

[3] As Chairman of the GOP Convention's Resolutions (Platform) Committee, Senator John Tower (R-TX), had overall responsibility for conducting the platform hearings and for preparing the platform's draft text. This effort was coordinated through the senior staff of the Senate Republican Policy Committee. The author, the Policy Committee's Senior Staff Member for Defense and Foreign Policy, was assigned chief responsibility for preparing the final draft of the sections on arms control and on foreign policy. The defense section was drafted by John Lehman, Robert McFarlane and William Schneider.

[4] The author sought to ensure that the arms control section was placed with the defense section in the GOP Platform as well as in President Reagan's NSC Staff organization, thus signalling the importance of national security criteria in arms control.

[5] As a major compliance effort, the new Administration in 1981 and 1982 provided extensive analyses and reports on the Soviet use of "yellow rain" chemical weapons (CW) and toxins in Afghanistan and Laos, as well as of biological weapons (BW) at Sverdlovsk, inside the Soviet Union. The Soviets denied all charges. At least, however, they did not proffer the explanation adopted by a number of American arms control critics who denied the evidence both of laboratories and of Afghan and Southeast Asian refugees, and instead claimed that yellow clouds of bees and bee feces, rather than "yellow rain" CW, were the cause of the problem.

[6] The author, having earlier prepared the terms of reference for the Senior Arms Control Group, following extensive negotiations with senior arms control officials, also prepared the terms of reference for the Arms Control Verification Committee. Following approval of these terms by the National Security Adviser and the President, the author was chief NSC staff coordinator for the Committee's activities.

[7] The author worked with the Chairman of the GAC to develop the terms of reference and move the location of the ceremony from the ACDA/State Department building to the White House in order to facilitate the NSC role and the Presidential tasking.

[8] The most recent official summary available as of this writing is *The President's Unclassified Report to the Congress on Soviet Noncompliance with Arms Control Agreements.* The White House, December 2, 1988, pp. 15-18 [hereafter cited as *President's Report of 1988*]. For detailed depictions of Soviet strategic defense programs, see Department of Defense and Department of State, *Soviet Strategic Defense Programs*, October 1985; Department of Defense. The Soviet Space Challenge, November 1987; and the annual Department of Defense publication, *Soviet Military Power.*

[9] The SCC mandate also enabled other concerns affecting the strategic balance to be raised, including U.S. concerns about Soviet violations of chemical weapons conventions in Afghanistan and Southeast Asia and of biological conventions as Sverdlovsk in the USSR.

[10] *The President's Report to the Congress on Soviet Noncompliance with Arms Control Agreements. The White House*, January 23, 1984, 1984. p. 2.

[11] *The President's Unclassified Report to the Congress on Soviet Noncompliance with Arms Control Agreements*, March 10, 1987, p. 2.

[12] Urged on by Senators James A. McClure (R-ID) and Steve Symms (R-ID), the Senate passed this amendment to the Arms Control and Disarmament Act of FY 1984 by a vote of 93-0. Passage of the amendment provided new leverage within the Administration to press bureaucratic elements opposed to the Arms Control Verification Committee's compliance report to work vigorously on completing the President's requirement.

[19] Arms Control Association Staff, "Analysis of the President's Report on Soviet Noncompliance with Arms Control Agreements," *Arms Control Today*, April 1987, p. 2A.

[20] All citations are from the March 7, 1984, News Advisory and attached article, "Charges of Treaty Violations: Much Less Than Meets the Eye," FAS Public Interest Report, *Journal of the Federation of American Scientists*, March 1984, pp. 1-19.

[21] See Center for Security Policy, "Toward a U.S. Anti-Satellite Capability: Correcting 'America's Most Serious Military Deficiency'," Washington, DC, July 31, 1989, No. 89-43. Also see Henry F. Cooper, "Anti-Satellite Systems and Arms Control: Lessons from the Past," *Strategic Review*, Spring 1989. The Federation's scientists do not appear affected by the reality, as thoroughly documented in a 1984 Presidential report to the Congress, that no meaningfully definable or verifiable ASAT limitations regime has ever been identified. See *Report to the Congress on U.S. Policy on ASAT Arms Control*, submitted by President Reagan, March 21, 1984, pp. 6-7. Another example of those who sought to avoid the issue of the treaty violation by dismissing the importance of the radar came from a group of former senior officials. McGeorge Bundy, George Kennan, Robert McNamara and Gerald Smith. "The President's Choice: Star Wars or Arms Control," *Foreign Affairs*, Winter 1984-1985, dismissed the radar's significance, holding that: "A single highly vulnerable radar installation is of only marginal importance in relation to any large-scale breakout from the ABM Treaty."

[22] *Compliance and the Future of Arms Control*, op. cit.

[23] Press Release by Congressmen Downey, Moody and Carr dated September 7, 1987, as provided for September 8 press conference.

[24] According to Georgy Arbatov, the Director of the Soviet Institute for the Study of the USA and Canada, "What our specialists say is that when the radar is finished, everyone will see that it is designed for following space research and other space systems." Cited in R. Jeffrey Smith, "U.S. Experts Condemn Soviet Radar," *Science*, Vol. 227, p. 1442.

[25] Senior U.S. officials have indicated that at the June 1990 summit, the United States is seeking new trade and regional agreements as well as progress on far-reaching new arms control agreements including strategic, chemical and conventional weapons, nuclear testing and "open skies" and "open lands" confidence-building measures.

[26] See for example, Thomas J. Downey, "Krasnoyarsk and the Conservatives," *Washington Post*, December 4, 1989. According to Downey: "Those who now choose to boast of their role in turning the screws on the Soviets . . . are the very same people who, from the moment Ronald Reagan made his 1983 Strategic Defense Initiative speech, set out to eliminate the ABM Treaty because they saw it as inimical to the interests of SDI." Also see R. Jeffrey Smith, "Confession and Recriminations:

U.S. Arms Experts Trade Barbs After Soviets Admit to ABM Violations," *Washington Post*, November 24, 1989. According to Smith, a number of those in the arms control community who have been challenged to acknowledge their errors on Krasnoyarsk following Shevardnadze's admission, answer as follows: "Hogwash, say the targets of this ideological criticism, several of whom charge Gaffney with McCarthyism or 'outright lies' of his own." Smith quotes James P. Rubin, Associate Director of the Arms Control Association as saying: "In fact it is not the arms control community that should apologize for 'errors' but Gaffney and the rest of those who attempted to use Krasnoyarsk as an excuse to sabotage the ABM Treaty."

[27] As reported by U.S. officials in conversations with the author, January 1990. In a development that bears watching, the military members of Soviet arms control delegations reportedly began in November and December 1989 to become markedly more assertive toward U.S. officials and toward civilian members of their own delegations.

[28] *President's Report of 1988*, op. cit., p. 1.

[29] See "The Soviet Wyoming Formula on START Would Kill SDI," Center for Security Policy, September 29, 1989, No. 89-60. At this meeting, Secretary of State Baker made an additional major concession on SDI, when rather than rejecting outright any parallel between the Soviet Union's illegal Krasnoyarsk radar and the two legal U.S. radars in Greenland and Great Britain, he signed a Joint Statement which included the following sentences granting a measure of legitimacy to the Soviet claim: "The Soviet side stressed again the necessity of removing its concerns about the U.S. radar stations in Greenland and Great Britain. The U.S. side promised to consider these concerns, in consultations with its Allies." U.S. Department of State, Joint Statement, September 23, 1989.

Mr. McCLURE. Mr. President, this article is entitled "The Krasnoyarsk Saga," and it was authored by Mr. Sven F. Kraemer, who served a total of 16 years with the National Security Council staff, including 6 years as President Reagan's NSC Director of Arms Control. Sven's important article speaks for itself, and I agree with its thrust.

Sven almost singlehandedly overcame the State Department's strong and sustained resistance to dealing forthrightly with Soviet arms control violations. Without Sven, the United States Government would be even further away from having a compliance policy for dealing with Soviet arms treaty violations than we still are today.

Unfortunately, we still do not have any compliance policy at all, such as for example, a safeguards package of options to enforce compliance, agreed upon before ratification of an arms control treaty, or alternatively, a package of proportionate response options agreed upon to deal with Soviet material breaches after ratification. And thus we still cannot deter or deal with Soviet arms control violations even today, because Krasnoyarsk still stands, and there are reportedly now three new serious, uncorrected Soviet violations of the INF Treaty.

Second, as is my longstanding tradition since the first report of January 23, 1984, I ask unanimous consent that the text of a letter from the President to the Speaker of the House of Representatives and the President of the Senate, dated February 23, 1990, and signed by President George Bush, also be printed in the RECORD. The enclosed unclassified Presidential Report with the Bush letter is entitled "Soviet Noncompliance With Arms Control Agreements."

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE WHITE HOUSE,
February 23, 1990.

[Text of a letter from the President to the Speaker of the House of Representatives and the President of the Senate]

DEAR MR. SPEAKER (DEAR MR. PRESIDENT): Pursuant to section 1002 of Public Law 99-145 (22 U.S.C. 2592a), I am forwarding herewith the classified version of the Administration's report to the Congress on Soviet Noncompliance with Arms Control Agreements. Also enclosed is the unclassified version of the report.

This is the fifth in a series of reports on Soviet compliance with their international obligations. On the whole, our compliance policy has made progress since last year's report. The report notes certain constructive steps the Soviets have taken, such as the destruction of the radar illegally deployed at Gomel and Soviet Foreign Minister Shevardnadze's commitment to correct the Krasnoyarsk radar violation of the ABM Treaty. At the same time, the report details several issues that continue to concern the United States.

I intend to continue to press for scrupulous Soviet compliance with their arms control treaty obligations. The principle of scrupulous compliance is particularly important as we near completion of new arms control treaties.

I value the strong congressional support for our compliance policy to date, and look forward to working closely with the Congress on these issues in the future.

Sincerely,

GEORGE BUSH.

SOVIET NONCOMPLIANCE WITH ARMS CONTROL AGREEMENTS

As required by law, I am submitting this Report on Soviet Noncompliance with Arms Control Agreements. This Report is one of a series of Reports to Congress by the Executive Branch regarding these issues. In 1984 President Reagan submitted the Report on Soviet Noncompliance prepared by the independent General Advisory Committee on Arms Control. The series mandated by Congress includes Reports dated January 1984, February and December 1985, March and December 1987, the March 1988 Report (which dealt exclusively with the Threshold Test Ban Treaty (TTBT)), and most recently the December 1988 Report.

Previous Reports have documented Soviet violations of the major arms control treaties and agreements. These included the Anti-Ballistic Missile (ABM) Treaty, SALT I and II, the Geneva Protocol on Chemical Weapons, the Helsinki Final Act, the Biological Weapons Convention (BWC), the Limited Test Ban Treaty (LTBT), and the Intermediate-Range Nuclear Forces (INF) Treaty. Past evidence suggested that the Soviet Union also violated the TTBT. This year, however, while serious concerns about noncompliance remain, I am pleased to report that our uncompromising demand for strict adherence to arms control treaties is yielding positive results. The Soviet Union now appears to be willing to take significant action to resolve some U.S. concerns.

COMPLIANCE AND ARMS CONTROL

Without exception, the United States expects meticulous fulfillment of all existing and future arms control agreements and all obligations that they entail. Otherwise, the arms control process cannot benefit U.S. national security, nor can treaties be ratified. I am committed to ensuring that there is scrupulous compliance with all arms control agreements and related undertakings. We cannot and will not accept any lesser standard. Put simply, arms control commitments must be precisely defined and scrupulously observed. Nothing less will do.

My Administration is committed to the pursuit of new arms control agreements that reduce the threat of the outbreak of war and contribute to international stability. Those goals are closer to reality than ever before. However, they will be achieved only if effective verification and total compliance are integral elements of the process. We must be able to determine whether the other party is complying with the agreement. I will therefore continue to insist that our verification measures and our verification means be appropriate and robust.

I am hopeful that recent Soviet actions to correct treaty violations indicate a new willingness also to address and resolve our remaining concerns. Yet, hoping for compliance is not enough. When violations of arms control agreements are identified, we will continue to utilize the traditional consultative mechanisms, to seek the support of Congress, and to evaluate and take the appropriate responses.

SCOPE OF REPORT

This Report addresses issues of Soviet failure to comply with existing arms control agreements, including the 1987 Intermediate Range Nuclear Forces Treaty (INF), and the 1972 Anti-Ballistic Missile (ABM) Treaty. The 1974 Threshold Test Ban Treaty (TTBT), the 1963 Limited Test Ban Treaty (LTBT), the Biological and Toxin Weapons Convention (BWC) and the Geneva Protocol on Chemical Weapons are tested later in this section of the Report.

SOVIET ACTIONS

As I noted, during the past year, there has been an encouraging change in the Soviet approach toward arms control compliance. Recent remarks by Soviet Foreign Minister Shevardnadze appear to permit greater oversight responsibilities for foreign affairs to be assumed by the new Congress of Peoples' Deputies. Through the institutionalization of a more accountable Soviet government, we hope a lasting foundation will be laid for constructive Soviet behavior more compliant with international norms and agreements.

I welcome Soviet Foreign Minister Shevardnadze's statement in Wyoming that the Krasnoyarsk radar will be completely eliminated, as well as his frank admission to a plenary session of the Supreme Soviet on October 23, 1989, that the construction of the Krasnoyarsk radar was "a clear violation" of the ABM Treaty. The U.S. has told the Soviet Union that the United States will not conclude a START or Defense & Space Treaty until U.S. concerns about this violation are resolved. The Soviet commitment to eliminate the Krasnoyarsk radar completely will, if carried out in a verifiable manner that meets U.S. criteria, improve the atmosphere surrounding bilateral relations.

The Soviet Union's admission that the Krasnoyarsk radar was a "clear violation" was the direct result of strenuous U.S. ob-

jections to this violation and repeated demands for corrective action. Indeed, it was the persistence and consistently strong U.S. stance against violations in support of the principle that arms control agreements must be complied with strictly that has paid off. The support of the U.S. Congress on this issue was of immeasurable value in convincing the Soviet Union that this violation must be corrected. We must remember that it was not by shying away from the fact of a violation that we have moved toward its positive resolution.

During the past year the Soviet Union has also admitted to taking some other actions inconsistent with its arms control obligations. In these cases as well, the Soviet Union has taken steps toward resolution of U.S. concerns. With respect to the INF Treaty, for example, the Soviet Union admited certain technical errors and corrected them. In other cases, while the Soviet Union did not directly admit to taking actions inconsistent with its treaty oblibations, it nevertheless has been willing to take steps toward alleviating our concerns. Thus, while never formally admitting that the ABM radar deployment at Gomel violated the ABM Treaty, the Soviet Union has taken constructive steps, destroying the Flat Twin radar at Gomel and Pawn Shop vans there and at Vnukovo. We were concerned, however, that although the Gomel violation was eliminated, the Soviet Union failed to honor certain specific procedures agreed to in December 1988. We have concluded that the Flat Twin radar and the Pawn Shop van near Gomel are no longer deployed in violation of the ABM Treaty.

Although the Soviet Union does not acknowledge that its actions with regard to rapid reload are inconsistent with treaty obligations, there have been no detected instances of the activity of concern since 1983. Given the extended period of time since the last detected evidence of this activity, this issue is not addressed in this Report.

INF TREATY IMPLEMENTATION

The INF Treaty continues to meet its goal of eliminating an entire class of U.S. and Soviet missiles under conditions of strict verification. As of November 30, 1989, the U.S.S.R. has eliminated all 957 of its shorter-range missiles and all 238 of its launchers for such missiles. The Soviets have eliminated 433 of 809 intermediate-range missiles adn 299 of 581 launchers for such missiles. Elimination of remaining U.S. and Soviet missiles and launchers must occur by June 1, 1991.

One issue arose for which the U.S. has made a noncompliance finding:

Transit of Missiles on Launchers at Lebedin.—Beginning in December 1988, Soviet SS-20 missiles on launchers transited between Lebedin missile operating base and Lebedin missile/launcher repair facility, in violation of paragraph 8 of Article VIII of the INF Treaty. The Soviets notified the U.S. of the transit in accordance with the Treaty, and stated in the notification that the route was entirely within the boundary of the deployment area. After a U.S. demarche, the Soviets admitted that there had been a technical error in determining the actual boundaries of the deployment area by local officials, and that the error had been corrected. Since then, no further instances of missiles on launchers outside of deployment areas and missile support facilities have been noted.

Questions about compliance also arose, but did not result in conclusions of noncompliance. These include the SS-20 launch canister near Moscow and the welded SS-23 transporter-erector-launchers (TELs). The above noncompliance finding and compliance-related questions are addressed in greater detail in the findings below.

A generic cause for concern is the implementation of the "look-alike/count-alike" principle. On two occasions the Soviets restored to original outward configurations equipment eliminated either under terms of the Elimination Protocol or prior to Treaty entry into force. Whether or not restoration permits use of the items for purposes inconsistent with the Treaty, such activity complicates national technical means (NTM) monitoring of Treaty limitations on the items. These two incidents involved an SS-20 launch canister near Moscow, and SS-23 launchers, at Stan'kovo. In both cases the Soviets responded to U.S. concerns by displaying to U.S. NTM or inspectors the equipment in a configuration that removed questions about the status of these items.

THE ABM TREATY

Previous reports have detailed our deep concern about Soviet noncompliance with the ABM Treaty, in particular the Krasnoyarsk radar, which is a signification violation of a central element of the Treaty. The Soviet Union has now committed to complete elimination of the radar. Although the Soviets have not yet begun dismantlement of this radar, preparation for its dismantlement may have begun. The U.S. and U.S.S.R. are currently addressing its elimination. We look to a prompt follow-through on the Soviet Union's commitment, and we will follow Soviet actions closely.

While the elimination of the Krasnoyarsk radar will resolve a major U.S. concern, other concerns about Soviet ABM and ABM-related activity will remain. These are detailed in this report. The construction of new LPARs on the periphery of the Soviet Union and the upgrade of the Moscow ABM system, the only deployed system for defense against strategic ballistic missiles in the world, appear to be consistent with the ABM Treaty. LPARs, however, have always been considered to be the long lead-time element of a possible territorial defense. Krasnoyarsk is only one of a network of nine such radars. Because they have an inherent capability to track large numbers of objects accurately, these radars, depending on location and orientation, have the inherent technical potential to contribute to ABM battle management.

There are several other U.S. concerns treated in this report. They are:

The development and testing of components required for a mobile ABM system;

The concurrent operation of air defense components and ABM components;

The development of modern air defense systems that may have some ABM capabilities;

The totality of Soviet ABM and ABM-related activities which suggest that the USSR may be preparing a defense of its national territory.

CHEMICAL, BIOLOGICAL, AND TOXIN WEAPONS

The U.S. judges that the Soviets continue to be in violation of the 1972 Biological and Toxin Weapons Convention. As documented in previous Reports, the U.S. found that the Soviets had violated the 1925 Geneva Protocol and related rules of customary international law, we found no basis for amending the previous conclusion that the Soviet Union has been involved in the production, transfer, and use of trichothecene mycotoxins for hostile purposes in Laos, Cambodia, and Afghanistan in violation of its legal obligation under international law as codified in the Geneva Protocol of 1925 and the Biological Weapons Convention of 1972. These violations, together with ongoing Soviet activities in these areas, remain a cause for serious concern. Since the January 1984 Report, we have had no confirmed evidence of use of lethal agents.

The U.S. has determined that contrary to Soviet claims, the Soviet Union has maintained an active offensive biological warfare (BW) program and capability in violation of the 1972 Biological and Toxin Weapons Convention. We judge that the Soviet capability may include advanced biological and toxin agents of which we have little or no knowledge, and against which the U.S. has no defense.

As a result of the 1986 BWC Review Conference, States party to the Convention agreed to exchange information on facilities built for high-risk (high-containment) biological experiments and facilities engaged in other activities relating to the Convention. While the Soviet submission of data have been welcomed, the U.S. believes that activities continue at facilities which we believe to be associated with the offensive Soviet program, not all of which were contained in the Soviet declaration.

We continue to be dissatisfied with Soviet explanations regarding an outbreak of anthrax in Sverdlovsk in 1979. We have raised the issue repeatedly with the Soviets since March 1980, and have been told that the outbreak stemmed from the consumption of contaminated meat. However, based on information available to the U.S., we concluded that the outbreak occurred as a result of an accidental release of anthrax spores from a prohibited BW facility.

In April 1987, General Secretary Gorbachev announced that the Soviet Union had halted production of chemical weapons. In December 1987, the Soviets stated that they maintained a stockpile of 50,000 metric tons of chemical agents.

On September 23, 1989, the U.S. and the Soviet Union signed a Memorandum of Understanding (MOU) regarding a bilateral verification experiment and data exchange on chemical weapons. The MOU consists of a two-phase agreement, the first phase of which will be comprised of an exchange of data and visits to relevant CW facilities. The nature of the data to be exchanged includes the aggregate quantity of chemical weapons, the types of chemicals possessed, and the relative percentages in munitions and in bulk.

On December 29, 1989, the Soviets provided data pursuant to this agreement. These data are presently being studied; preliminary indications are that these data differ in a number of respects from our understanding.

LIMITED TEST BAN TREATY

Since the Limited Test Ban Treaty (LTBT) came into force over 20 years ago, the Soviet Union has conducted its nuclear weapons test program in a manner incompatible with the terms of the Treaty. Since publication of the December 1988 Report, that conduct has continued and still results in the release of nuclear debris into the atmosphere beyond the borders of the USSR. Even though the material from these Soviet tests does not pose calculable health, safety or environmental risks, and the infractions have no apparent military significance, in response to our repeated attempts to discuss these occurrences with Soviet authorities,

they have only denied that these events have occurred and rebuffed U.S. requests for technical discussions which might lead to prevention of further Soviet venting.

THRESHOLD TEST BAN TREATY

On November 9, 1987, the United States and Soviet Union began negotiations in which a priority is to agree on effective verification measures which will make it possible to ratify the U.S.-U.S.S.R. TTBT and the Peaceful Nuclear Explosions Treaty (PNET).

As part of those negotiations, the sides conducted a Joint Verification Experiment, with a Soviet-monitored nuclear explosion at the U.S. test site on August 17, 1988, and a U.S.-monitored nuclear explosion at the Soviet test site on September 14, 1988.

On September 23, 1989 at the Wyoming Ministerial, with regard to the verification protocol to the TTBT, the United States and Soviet Union agreed to a package approach that would include three verification methods: on-site hydrodynamic measurements, on-site inspections, and in-country seismic stations.

In the current round of the Nuclear Testing Talks (NTT), the sides are negotiating the detailed provisions necessary to implement the agreements reached during the Wyoming Ministerial. Our goal is to complete protocols to the two Treaties and submit them to the Senate for advice and consent as to ratification. Implementation of these two treaties with the provisions necessary to achieve effective verification, following their ratification, will provide the Soviets the opportunity and obligation to address our longstanding concerns regarding Soviet compliance with the 150 kt threshold.

SUMMARY

The U.S. demand for scrupulous compliance is not negotiable. We will continue to insist on effective verification of the provisions of these new agreements, respond appropriately to any Soviet noncompliance, and continue to make our strategic decisions based on the nature and magnitude of the Soviet threat. A double standard of compliance with arms control obligations is unacceptable.

During the past year, our insistence on scrupulous compliance, together with improved cooperation by the USSR, has enabled generally successful implementation of the INF Treaty, the removal of one ABM Treaty violation and positive movement toward Soviet correction of the Krasnoyarsk radar violation. This represents encouraging and significant positive movement in arms control Treaty compliance. We hope that the USSR will continue such cooperation in the future.

I look forward to continued close consultations with the Congress as we seek to make progress in resolving compliance issues and in negotiating sound arms control agreements.

The findings on INF Treaty implementation and the ABM Treaty follow.

THE FINDINGS

INF TREATY IMPLEMENTATION

Treaty status

The INF Treaty continues to meet its goal of eliminating an entire class of U.S. and Soviet missiles under conditions of strict verification. As of November 30, 1989, the USSR has eliminated all 957 of its shorter-range missiles and all 238 of its launchers for such missiles. The soviets have eliminated 433 of 809 intermediate-range missiles and 299 of 581 launchers for such missiles. Elimination of remaining U.S. and Soviet missiles and launchers must occur by June 1, 1991.

During the past year of Treaty implementation, a number of compliance issues have arisen, and in one instance, the U.S. has made a noncompliance finding. In every case, however, the issue or violation has been resolved or corrected after it was raised with the Soviets.

1. Transit of missiles on launchers at Lebedin

Obligation.—Paragraph 10 of Article II of the Treaty defines the term "transit" to include movement of an intermediate-range missile (such as an SS-20), or launcher of such a missile, between a deployment area and a missile support facility (such as a missile/launcher repair facility (MLRF). Paragraph 12 of Article II of the Treaty provides that the term "non-deployed missile" includes an intermediate-range missile located outside a deployment area. Paragraph 8 of article VIII provides that non-deployed intermediate-range missiles shall not be carried on their launchers, "except as required for maintenance conducted at repair facilities or for elimination by means of launching conducted at elimination facilities." This exception in paragraph 8 of Article VIII means that intermediate-range missiles may be carried on their launchers only while they are actually located at repair or elimination facilities and only for the purpose of maintenance or elimination by means of launching. Missiles may not be carried on their launchers while in transit to or from such facilities unless the transit route lies entirely within a deployment area (DA).

Background.—Beginning in December 1988, Soviet SS-20 missiles transition on their launchers between Lebedin deployment area and Lebedin MLRF. In notifications subsequent to these transits, the Soviets stated the transit route of the launchers lay entirely within the deployment area boundaries.

Alhough the deployment area is adjacent to the MLRF, analyses indicate that it is not possible for launchers to move from the deployment area to the MLRF without leaving the deployment area. (This has to do with the location of gates and roads.) These analyses were confirmed on June 30, 1989 by U.S. inspectors.

Based on the above analysis, the U.S. presented a demarche to the Soviet Union. The Soviets admitted that their mistake resulted from a "technical error" by local Soviet officials in determining the actual boundaries of the Lebedin deployment area. Due to this error, the Soviets thought the section of road used to transport their missiles was actually within the limits of the deployment area. The Soviets stated that this error had been corrected, and that in the future such transits of missiles on launchers would not occur on this road.

Findings.—Although the Soviets notified the U.S. of the transit of these SS-20 missiles on launchers at Lebedin, such transits violated paragraph 8 of Article VIII of the Treaty. Since the Soviets responded to the U.S. concerns this problem appears to have been corrected.

2. Welded SS-23 launchers at Stan'kovo

Paragraphs 7 and 8 of Article XI of the Treaty provide for on-side inspection to confirm the process specified for elimination has been completed, and further provides for confirmation of the process of elimination for missiles and launchers subject to the Treaty. Paragraph 1 of Section II of the Elimination Protocol provides for the general requirement to follow specific procedures delineated in the Elimination Protocol for each type of missile, missile launcher, etc., and further specifies "these procedures preclude the possibility of restoration of such items for purposes inconsistent with the provisions of the Treaty." Paragraph 10 of section II (SS-23) specifies that "a portion of the launcher body, at least 0.85 meters in length, shall be cut off aft of the rear axle." To ensure verification of compliance with the Treaty, paragraph 1 of Article XII recognizes the legitimate use of national technical means (NTM); and paragraph 2(b) of Article XII specifies that neither Party shall use concealment measures which impede verification of compliance with the provisions of this Treaty by national technical means of verification.

Following completion of the procedures to eliminate 30 SS-23 launchers at Stan'kovo in April 1989, U.S. inspectors asked and were allowed to inspect vehicles being stored outside and covered. They discovered that the Soviets had welded a rear portion onto 24 of the 27 eliminated launchers. The Soviets stated that the weld of the rear portion would make the vehicle watertight, so that it could continue to be used as an amphibious vehicle for the civilian economy. The inspection team chief declared an "anomaly." The Elimination Protocol requires the Soviets to remove a portion (0.85 meters) in length after the rear axle, to preclude the possibility of restoration of the vehicle for purposes inconsistent with the provisions of the Treaty as stated above. The Soviets agreed to re-cut all of the chassis and did so. The inspection procedure was formally completed on April 29, 1989 when the official inspection report was signed. The U.S has not seen any further evidence of reattachment.

3. SS-20 launch canister near Moscow

The Treaty requires in subparagraph 10(b) of Article VII that SS-20 launch canisters be counted as SS-20 missiles unless the Soviet Union proves to the satisfaction of the United States that the canister in question does not contain a missile. In accordance with paragraph 1 of Article VIII, SS-20 missiles must be located within deployment areas or at missile support facilities. Whether or not an SS-20 launch canister contains a missile, the canister itself is accountable under the terms of the Treaty as support equipment for which the Soviets are required to give an accurate count. Items eliminated prior to entry into force of the Treaty are not subject to provision of the Treaty.

In March 1989, the U.S. observed an object which appeared to be an SS-20 launch canister at a non-declared missile-associated facility near Moscow. This facility was not declared to be an INF facility in the Memorandum of Understanding (MOU) or in subsequent MOU data updates. After the U.S questioned the Soviet Union about the suspect item the Soviets stated the item in question did not contain an INF missile. They described the item as a former SS-20 launch canister which was eliminated prior to signing the Treaty by cutting it into three parts. The parts were placed together, but unattached, in what the Soviets describe as a museum.

The U.S. asked the Soviets to demonstrate that the canister had been eliminated by separating the three pieces to create a space between them that is at least the length of

the longest piece and leaving them in place for at least 30 days; the Soviets complied in July 1989. The fact that the canister has been in open storage for some time, apparently without environmental control, lends credence to the Soviet claim that this launch canister was destroyed prior to Treaty entry into force. The U.S. is satisfied that the former SS-20 launch canister had been eliminated by the Soviets.

THE ABM TREATY

Treaty status

The 1972 Anti-Ballistic Missile (ABM) Treaty and its Protocol ban deployment of ABM systems except that each party is permitted to deploy one ABM system around the national capital area or, alternatively, at a single intercontinental ballistic missile (ICBM) deployment area. The ABM Treaty is in force and is of indefinite duration. Soviet actions not in accord with the ABM Treaty are, therefore, violations of a legal obligation.

1. The Krasnoyarsk radar

Obligation.—To preclude the development of a territorial defense or providing the base for a territorial ABM defense, the ABM Treaty provides that radars for early warning of ballistic missile attack may be deployed only at locations along the periphery of the national territory of each party and that they be oriented outward. The Treaty permits deployment (without regard to location or orientation) of large phased-array radars (LPARs) for purposes of tracking objects in outer space or for use as national technical means (NTM) of verification of compliance with arms control agreements.

Background.—The Krasnoyarsk radar is assessed to be designed for ballistic missile detection and tracking but the Soviets have claimed it is intended for space tracking and NTM. An LPAR designed for ballistic missile detection and tracking could serve as a radar for warning of strategic ballistic missile attack but also has the inherent potential of supporting ABM battle management. LPARs were, and still are, considered to be long-lead time elements of a possible territorial defense. The Krasnoyarsk radar is about 740 kilometers from the U.S.S.R's nearest border—that with Mongolia. Moreover, the Krasnoyarsk radar is not directed outward as specified by the ABM Treaty but, rather, looks toward the Soviet Union's northeast border—almost 4,600 kilometers away.

This issue has been discussed with the Soviets since the fall of 1983 including during the 1988 ABM Treaty Review. Prior to the past year, Soviet responses have denied that the Krasnoyarsk radar violates the ABM Treaty. At the U.S.-Soviet Ministerial meeting, held a Jackson Hole, Wyoming on 22-23 September, however, the Soviets stated that they would eliminate the Krasnoyarsk radar, without preconditions. Although the Soviets have not yet begun dismantlement of this radar, preparations for dismantlement may have begun. And on October 23, 1989, in a speech to a plenary session of the USSR Supreme Soviet, Soviet Foreign Minister Shevardnadze acknowledged that the radar was a violation of the ABM Treaty.

The U.S. believes that a satisfactory solution to the Krasnoyarsk radar violation must reestablish the lead time acceptable to the United States that was the purpose of the LPAR provisions of the ABM Treaty; must verifiably remove all treaty-prohibited radar capability; should add no new obligations, requirements, or definitions to the ABM Treaty such as on-site inspections; and should not prejudice the sides' positions in the Defense and Space negotiations.

Finding.—The U.S. Government has determined that the large phased-array deployed near Krasnoyarsk constitutes a significant violation of a central element of the Anti-Ballistic Missile Trearty of 1972. Its associated siting, orientation, and capability are prohibited by this Treaty. While the Soviet Union has acknowledged that the radar violates the ABM Treaty, and has committed to eliminate the radar, no action has yet been taken that would correct this violation.

2. Mobility of ABM system components

Obligation.—Paragraph 1 of Article V of the ABM Treaty prohibits the development, testing or deployment of mobile land-based ABM systems or components. The Parties reached a general common understanding that they could not deploy ABM launchers and radars that were not permanent fixed types.

Background.—The ABM Treaty explicitly prohibits the development, testing, or deployment of mobile land-based ABM systems or components, including ABM interceptor missiles, ABM launchers, and ABM radars. The sides arrived at a Common Understanding indicating that an ABM Treaty prohibition on development, testing, and deployment of mobile land-based ARM systems and components would rule out deployment of launchers and radars which were "not permanently fixed types." The concern in this case was not tactical mobility but concern about "breakout." The term "mobile" used in the Treaty describes components which can be readily transported from one place to another as well as components designed to be moved frequently during their service life, as contrasted with permanently fixed installations, even if these components were not "mobile" in the sense of having wheels or being self-propelled.

In early December 1987, the U.S. accepted a Soviet invitation for a U.S. team to inspect the Pawn Shop vans at both Gomel and Moscow, and also to look at the Flat Twin "fragments" at Gomel. With regard to Pawn Shop mobility, the visit confirmed that the van was road-mobile.

The U.S. visit to Gomel also confirmed the modular design of the Flat Twin and potential for relocation of the Flat Twin modules.

Finding.—The U.S. Government judges that Soviet elimination of the Pawn Shop vans at Gomel and Moscow, the apparent elimination of the third Pawn Shop van and the dismantlement of the Flat Twin radar at Gomel has lessened U.S. concern regarding ABM component mobility. Two Flat Twin radars at the ABM test ranges, however, remain. These radars can be moved relatively quickly from one deployment area to another as demonstrated by the redeployment of the Flat Twin to Kamchatka, and the relocation of major parts of the Flat Twin to Gomel. In these moves the Soviets demonstrated a capability to transport and redeploy the radar in a matter of weeks or months. The two Flat Twin radars cannot be said to be truly mobile, but neither can they be considered to be immobile.

3. Concurrent testing of ABM and air defense components

Obligation.—The ABM Treaty and its Protocol limit the parties to one ABM deployment area. In addition to the ABM systems and components at that one deployment area, the parties may have ABM systems and components for development and testing purposes so long as they are located at agreed test ranges. The Treaty also prohibits giving components, other than ABM system components, the capability "to counter strategic ballistic missiles or their elements in flight trajectory" and prohibits the parties from testing them "in an ABM mode."

The United States and the Soviet Union agreed in the 1970s to prohibit concurrent testing of air defense components and ABM system components at the same test range.

Background.—In negotiating the ABM Treaty, the U.S. was determined to constrain the USSR's ability to upgrade its extensive surface-to-air missile (SAM) defense force to have ABM capabilities, and to constrain development of future SAM systems with ABM capabilities. Compliance questions arose with regard to the Treaty provision not to give missiles, launchers, or radars, other than ABM interceptor missiles, ABM launchers or ABM radars, capabilities to counter strategic ballistic missiles or their elements in flight trajectory, and not to test them in an ABM mode.

We are concerned about three general classes of activities involving SAM and ABM components: (1) SAM radars operating at about the same time as either strategic ballistic missile reentry testing or ABM missile testing; (2) ABM radars operating at about the same time as either SAM launches or SAM target flights; and, (3) SAM radars operating at about the same time as ABM radars. Such activities raise the possibility of testing SAM components "in an ABM mode." Since the signing of the ABM Treaty in 1972, there have been many instances of the activities of concern.

All three types of concurrent operations have been raised with the Soviets.

Finding.—The U.S. Government finds that the Soviet Union has conducted tests that have involved air defense radars in ABM-related activities. The large number, and consistency over time, of incidents of concurrent operation of ABM and SAM components, plus previous Soviet failure to accommodate fully U.S. concerns, indicate the USSR probably has violated the prohibition on testing SAM components in an ABM mode as defined in a 1972 U.S. Unilateral Statement on testing in an ABM mode (a statement which the Soviets did not reject) prior to the 1978 Agreed Statement. (The 1978 Agreed Statement refined the definition of testing "in an ABM mode.") In several cases, this may be highly probable. No known violations have occurred which meet the 1978 Agreed Statement's definition of testing "in an ABM mode." Recently, the sides appear to have moved closer to resolution of this issue since the Soviet Union has stated that it is willing to take steps to cease these activities.

4. ABM capability of modern SAM systems

Obligation.—Under subparagraph (a) of Article VI of the ABM Treaty, each party undertakes not to give non-ABM interceptor missiles, launchers or radars "capabilities to counter strategic ballistic missiles or their elements in flight trajectory, and not to test them in an ABM mode."

When the ABM Treaty was negotiated, the potential ABM capability of air defense systems was a major concern. Clearly, the phrase "capabilities to counter" as used in the ABM Treaty was intended to have the ordinary meaning of "blocking" or "stopping" a reentry vehicle. In the context of the ABM Treaty giving a SAM system "ca-

pabilities to counter strategic ballistic missiles" means giving them actual ABM capabilities.

Since virtually any air defense missile system has some level of ABM capability, the Treaty was not intended to preclude an incidental or insignificant ABM capability, but rather a meaningful or significant capability. Such a determination must ultimately be a factual determination taking into account the military significance of whatever ABM capability is present.

Background.—The ABM Treaty and its negotiating record reflect a long-standing and persistent U.S. concern that the USSR might upgrade its then-existing surface-to-air missile (SAM) defense systems into ABM systems or might, in the future, deploy air defense systems with ABM capabilities. The Soviets opposed a ban on SAM upgrade, but finally yielded to U.S. concerns after the U.S. agreed that SAM systems could be improved so long as they were not given ABM capabilities.

Concern has existed for some time about the possibility of a ballistic missile defense capability with the SA-10 and SA-12 air defense systems. Improving technology is blurring steadily the technical distinctions between air defense and ABM systems.

Finding.—The U.S. Government concludes that the evidence of Soviet actions with respect to SAM upgrade is insufficient to assess compliance with the Soviet Union's obligations under the ABM Treaty.

5. ABM territorial defense

Obligation.—The ABM Treaty and Protocol allow each party a single deployment area, explicitly permit modernization and replacement of ABM systems of their components, and explicitly recognize the existence of ABM test ranges for the development and testing of ABM components. The ABM Treaty prohibits, however, the deployment of an ABM system for defense of the national territory of the parties and prohibits the parties from providing a base for such a defense.

Background.—The Soviet Union has carried out a number of ABM activities, or activities that could be characterized as ABM-related, which have created concerns.

The objective of the allowed ABM activities is to increase the effectiveness of allowed ABM deployments; these activities also undoubtedly reduce the time for the deployment of an effective territorial defense. What must be determined is whether the totality of Soviet ABM and ABM-related activities have moved beyond acceptable ABM research, development, testing and deployment, and, therefore, can be concluded to have provided a base for a territorial defense.

The Soviet Union has carried out a number of ABM activities, or activities that could be characterized as ABM-related, which taken together have created concerns within the United States. Information on specific compliance concerns is presented in individual analysis papers on the Krasnoyarsk radar, ABM component mobility, concurrent testing of ABM and SAM components, and ABM capabilities of modern SAM systems. The issue of ABM rapid reload is discussed only in the introduction to the Report. Other concerns with respect to the totality of Soviet ABM and related activities include the construction of a network of nine large, phased-array radars (LPARs), including the one at Krasnoyarsk, which could constitute the deployment of a major long lead-time component of a nationwide ABM system and the Moscow ABM system which provides the world's only active production line for ABM interceptors.

Finding.—While many Soviet ABM or ABM-related activities appear to be consistent with the provisions of the ABM Treaty, such as their recent modernization of the world's only operational ABM system, the Krasnoyarsk radar remains a significant violation of a central element of the ABM Treaty and other Soviet activities are a cause for concern. The U.S. Government judged in the December 1988 Report that the aggregate of the Soviet Union's ABM and possible ABM-related actions suggests that the Soviet Union may be preparing an ABM defense of its national territory. Subsequent Soviet action to correct the Gomel ABM Treaty violation was a positive step. Moreover, the Soviet offer with regard to Krasnoyarks when carried out, and a cessation of the concurrent activities of concern to the U.S., could further affect our earlier judgment.

Mr. McCLURE. Mr. President, I strongly agree with President Bush's sound statement in this report that:

Arms control commitments must be precisely defined and scrupulously observed. Nothing less will do * * * When violations of arms control agreements are identified, we will continue to utilize the traditional consultative mechanisms, to seek the support of Congress, and to evaluate and take the appropriate responses.

I would emphasize that President Bush also stated in this report that:

The United States has told the Soviet Union that the United States will not conclude a START or Defense and Space Treaty until U.S. concerns about this [Krasnoyarsk] violation are resolved. The Soviet commitment to eliminate the Krasnoyarsk radar completely will, if carried out in a verifiable manner that meets U.S. criteria, improve the atmosphere surrounding bilateral relations * * * The support of the U.S. Congress on this issue was of immeasurable value in convincing the Soviet Union that this violation must be corrected * * * The U.S. demand for scrupulous compliance is not negotiable. We will continue to insist on effective verification of the provisions of these new agreements, respond appropriately to any Soviet non-compliance, and continue to make our strategic decisions based on the nature and magnitude of the Soviet threat.

I fully agree with these important policy statements.

Third, Mr. President, in regard to the public evidence of the three reported new Soviet INF Treaty violations, I ask unanimous consent that the following documentation be printed in the RECORD:

First. The Los Angeles Times, article entitled "East Germany Admits It has Missiles Banned by Treaty," dated March 8, 1990, by Robert Toth;

Second. The New York City Tribune, article entitled "U.S. Lodges a Protest With Soviets Against 'Blatant Violation' of INF Pact," datelined March 12, 1990, by Peter Samuel;

Third. Letter from Senator HELMS to Arms Control and Disarmament Agency Director Ronald F. Lehman, dated March 12, 1990, and hand delivered to ACDA on March 13, 1990;

Fourth. The Los Angeles Times, article entitled "U.S. Sends Arms Pact Protest to Soviets," dated March 15, 1990, by Robert Toth;

Fifth. The Washington Times, article entitled "Soviets Block U.S. Inspection at Missile Plant," dated March 16, 1990, by Warren Strobel;

Sixth. Human Events, article entitled "Soviets Fail to Comply With INF Treaty";

Seventh. The Washington Post, article entitled "Missile Crisis," dated March 16, 1990, by Rowland Evans and Robert Novak;

Eighth. The Washington Post, article entitled "Missile-Inspection Technicality Provokes Top-Level Protest to Soviets," dated March 19, 1990, by R. Jeffrey Smith; and

Ninth. The Washington Times, article entitled "U.S. May Cite Soviets for violation of Treaty," dated March 19, 1990, by Bill Gertz.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Los Angeles Times, Mar. 8, 1990]

E. GERMANY ADMITS IT HAS MISSILES BANNED BY TREATY

(By Robert C. Toth and John Broder)

WASHINGTON.—Dealing a potentially serious blow to confidence in U.S.-Soviet arms pacts, East Germany acknowledged Wednesday that it has 24 previously undeclared Soviet-made missiles that were banned by the 1987 medium-range missile treaty.

The East German government said that it will destroy the SS-23 missiles, which are capable of carrying nuclear warheads but apparently were equipped with conventional explosives or other non-nuclear devices. It said two launch platforms were destroyed last month.

The Bush Administration, which discovered evidence of SS-23 components in East Germany last week, has asked Moscow to explain how the Soviet-made missiles got there and why they were not disclosed when information was exchanged on missiles covered by the 1987 accord.

The intermediate-range Nuclear Forces (INF) Treaty called for elimination from superpower arsenals of all missiles with ranges from 300 to 3,400 miles. The SS-23 missiles have a range of 550 miles.

The East German SS-23s may not constitute a violation of the treaty, however, if ownership of the weapons was transferred from the Soviet Union before the pact took effect, because the agreement technically covers only U.S. and Soviet weapons.

Even so, the existence of the undeclared SS-23s will be viewed as an act of bad faith on the part of the Soviets, who demanded during negotiations of the 1987 accord the elimination of U.S.-made Pershing 1 missiles that had been purchased by West Germany.

"I can't say they (the SS-23s) are illegal," Ronald F. Lehman, director of the U.S. arms control agency, told a Senate Committee Wednesday, "But we didn't know they were there, so they were covert."

Lehman said it was "premature" to speculate on the impact of the disclosure on the strategic arms treaty expected to be completed this year. The far-reaching U.S.-Soviet accord calls for cuts of 30% to 50% in

long-range offensive nuclear warheads and bombs held by each superpower.

"The Soviets are going to look bad on this, even conniving," predicted a senior U.S. official. "Why didn't they come back to us on this earlier and say the East Germans had these weapons, particularly after they made such a fuss over the West Germans' Pershings during the negotiations?"

During the INF Treaty negotiations, Moscow demanded that the Pershing 1 missiles be dismantled because they fell within the banned missile range. The United States argued that it did not own the weapons, but West Germany unilaterally declared that it would destroy all 70 Pershing 1 missiles in its arsenal to resolve the impasse.

In 1984 and 1985, the Soviet Union moved a number of SS-23s from its territory into Czechoslovakia and East Germany in an effort to intimidate Western Europe. Moscow had broken off arms talks and wanted the Continent to reject deployment of U.S. Pershing 2 missiles.

At some point, ownership of the SS-23s stationed in East Germany apparently was transferred to the government in East Berlin during the hard-line regime of former East German Communist Party leader Erich Honecker, who resigned in disgrace late last year.

The Soviets never announced that they had transferred possession of the missiles to either country. The fate of the SS-23s in Czechoslovakia is unclear.

The disclosure of the hidden missiles raises questions about the effectiveness of U.S. surveillance efforts, which rely primarily on satellites to detect undeclared missiles.

The presence of the East German SS-23s was reported in a German newspaper last week. U.S. spy satellites then found "a couple (of) items associated with the SS-23 system, a launcher and a transporter, maybe a canister (in which a missile would be carried), but no missiles as such," one source said.

In making the disclosure, the reformist Communist government of East Germany said that it had begun the process of destroying the missiles and their launchers in February on the orders of new Prime Minister Hans Modrow.

East German Defense Ministry spokesman Uwe Hempel told the East German ADN news agency that two launch ramps already had been destroyed.

The entire SS-23 system in East Germany had consisted of four launch ramps, four transporters, 24 rockets equipped with nonnuclear warheads and technical infrastructure such as repair and maintenance facilities, Hempel said.

"The destruction of the entire weapons system will be completed in November, 1990," Hempel said, according to an Agence France-Press report from East Berlin.

East Germany reported that the SS-23s were equipped with non-nuclear warheads, but it did not provide details.

[From the New York City Tribune, Mar. 13, 1990]

U.S. LODGES A PROTEST WITH SOVIETS AGAINST "BLATANT VIOLATION" OF INF PACT

(By Peter Samuel)

WASHINGTON, March 12.—The United States has forcefully protested what one government official calls a "blatant violation" of U.S. monitoring rights at the Votkinsk missile factory in the Soviet Union, according to the source.

The official, who requested anonymity, says that Soviet personnel ran missile railcars through the U.S. perimeter monitoring station at the missile plant last Friday without allowing officials there to carry out X-ray and other inspections under the terms of the intermediate nuclear forces (INF) treaty.

A light barrier and a semaphore stop-and-go signal were reportedly damaged in the incident.

The official says that U.S. protests included a phone call to Secretary of State James Baker III to Soviet Foreign Minister Eduard Shevardnadze over the weekend, as well as protests by U.S. Ambassador to the Soviet Union Jack Matlock and additional complaints by the State Department in Washington.

An Arms Control and Disarmament Agency (ACDA) spokesman today confirmed that there is a problem at the inspection post at Votkinak and said that "we are looking into it."

He said he also believed that the State Department would be making a statement on the incident at today's daily noon briefing, but no statement was made.

State Department public affairs officer David Denny confirmed that the Soviet Union has recently sent a number of missile canisters out of the production facility at Votkinak "without allowing the U.S. to use the Cargoscan system (an x-ray system) to image those missile canisters. This Soviet action denies U.S. inspection rights under the INF treaty.

"The U.S. regards this as a very serious matter," he continued. "We have raised this issue at high levels in both Moscow and Washington including a communication from Secretary Baker to Foreign Minister Shevardnadze and are continuing to press the Soviets to solve this problem by allowing us to use the Cargoscan system."

Another government official told the New York City Tribune that the incident is indeed "very serious." A former Reagan administration official said it could be "as serious as Krasnovarsk," a reference to the large anti-ballistic missile (ABM) radar that the Soviets have admitted is a breach of the ABM treaty.

Though details of the incident are still incomplete, sources say that last Friday, March 9, the Soviets sent a locomotive through the U.S. monitoring station over a number of U.S. objections. It was then that a light barrier—apparently a break-off arm similar to those used at highway tollgates or parking station exits—and a semaphore signal were damaged.

The locomotive then reportedly hooked up with a disputed missile-carrying railcar and towed it out through the moniter again, while U.S. inspectors were prevented from using the X-ray machine to scan the missile inside.

On Saturday, reports say the Soviets sent two more missile carrying railcars through the monitoring station, while U.S. inspectors were again prevented from operating the X-ray machine.

The United States first insisted on the right to measure missiles departing the Votkinak factory in 1988 because the plant produced SS-20 and SS-23 intermediate range missiles that are banned by the INF treaty.

The missiles are transported inside protective canisters and the X-ray scanning is needed to "see" inside canisters and distinguish the shorter INF-banned missiles from the longer legal missiles.

The U.S. On Site Inspection Agency (OSIA) told the Soviets on February 6 that beginning 3 days later, on Feb. 9, the United States would exercise its rights under the INF Treaty to measure all missiles exiting the factory with the Cargoscan X-ray machine established at the U.S. Perimeter Portal Monitoring system (PPMS), as the inspection facility is known.

The United States was in fact entitled to operate the X-ray monitor from December 1, 1988, but a combination of Soviet objections, construction delays and technical problems had delayed its operation over 14 months.

Just a month ago, a few days after the X-ray monitor finally became operational, the Soviets raised new objections to use of the machine, and said it could not be used without further modifications. They demanded that the machine be modified so that it could not image interior secrets of the weapon system.

The Soviets also apparently laid down new limits on the use of computer tape from the X-ray imaging system.

U.S. officials said the Soviet demands were unacceptable, though a technical team was sent to Votkinsk to discuss the matter with the Soviets. Meanwhile, there was a standoff at Votkinsk between officials of the two nations from mid-February, when the Soviets shunted a railcar out of the factory and demanded to go through the monitoring post without use of the X-ray machine.

But U.S. inspectors apparently insisted on their right to inspect the railcar, so it remained in a shed just inside the monitoring post for nearly 4 weeks during the impasse, according to sources. The railcar was said to have been barred from leaving by the semaphore signal and the light barrier.

On March 5, an interagency arms control group in Washington agreed that if the Soviets did not allow the railcar to be inspected, the United States would formally declare the Soviet action an "anomaly" under the treaty—one step short of calling the Soviets in violation.

Ambassador Matlock reportedly conveyed the ultimatum to the Soviets by mid-week.

Following this threat, the Soviets apparently forced their way through the U.S. monitoring station, which sits astride the only rail line out of the factory.

The government official says the missiles being forced through the Votkinsk barrier are not thought to be illegal INF missiles, but a new more powerful SS-25 intercontinental missile with three warheads.

"We think they just don't want us to know about the three warhead version of the missile," he said.

The SS-25 is similar in size to the U.S. Minuteman III missile which carries three warheads, but has only been tested with one warhead and the draft Strategic Arms Reduction Treaty (START) counts it as single-warheaded.

If the Soviets reveal a 3-warheaded version of the SS-25, completion of the START treaty would be complicated.

"We think this incident is a START issue as well as an INF issue." said the official.

"Either way it is a major Soviet assault on arms control."

U.S. SENATE,
COMMITTEE ON FOREIGN RELATIONS,
Washington, DC, March 12, 1990.

Hon. RONALD F. LEHMAN II,
Director, U.S. Arms Control and Disarmament Agency, U.S. Department of State, Washington, DC.

DEAR RON: You did a good job responding to questions at the March 7 Committee

hearing on arms control. I appreciate your obvious desire to be as forthcoming as possible on some difficult issues. However, there are a few important aspects of these that need to be cleared up.

Both you and I have long been deeply concerned about Soviet non-compliance with arms control treaties, and I have recently become alarmed about reported new violations of the INF Treaty. In order to follow up on some of the issues that were developed in the Committee hearing, I request that you answer the enclosed questions, which are in addition to the questions which my staff gave you on START, the Kennedy-Khrushchev Agreement, and ACDA management, which are to be answered for the record.

I am disturbed by reports that, even as the hearing progressed on Wednesday, the Soviets were planning to take missiles out of the plant at Votkinsk without allowing the United States to X-ray the containers—even though Cargo-scan is presumably fully operational.

My additional questions cover four topics—the hundreds of clear violations in the Soviet non-compliance record, the newly discovered Soviet SS-23s in East Germany, the Cargo-scan impasse and the recent Soviet "break out" from Cargo-scan, and some new issues on Soviet ABM Treaty compliance.

Kindest personal regards,

Sincerely,

JESSE HELMS.

[Letter to ACDA Director Lehman, Mar. 12, 1990]

ATTACHMENT: FURTHER HELMS QUESTIONS ON INF AND ABM TREATY COMPLIANCE

I. HUNDREDS OF CONFIRMED SOVIET INF TREATY VIOLATIONS?

1. Has the President already reported to Congress the following six types of multiple confirmed Soviet violations of the INF Treaty and the following six types of INF compliance problems?

(a) Six Types of Confirmed Soviet INF Treaty Violations

First—Has the President reported that "since entry into force, the Soviets have conducted nearly 200 non-compliant transits of SS-20 missiles on their launchers between Missile Operation Bases, Missile/Launcher Repair Facilities, and elimination facilities?" Are these 200 transits characterized as clear "violations?"

Second—Has the President reported that the Soviets did not list about 50 of their Treaty-Limited Items and their locations in the data update to the INF Treaty Memorandum of Understanding on Data? Are these 50 serious omissions characterized as clear "non-compliance" and "violations?"

Third—Has the President reported that the Soviets conducted about 20 unnotified movements of training launchers? Did these 20 movements constitute clear "violations?"

Fourth—Has the President reported that the Soviets had 2 Treaty-Limited Items at a facility declared ready for elimination? Did these items constitute clear "violations?"

Fifth—Has the President reported that the Soviets had about 7 Treaty-Limited Items at non-declared locations? Did these items constitute clear "violations?"

Sixth—Has the President reported the transit of 8 SS-20 missiles on launchers at Lebedin? Were these transits characterized as clear "violations?"

(b) Six Types of Soviet INF Compliance Problems

First—Has the President reported 1 case in which the Soviets failed to provide complete and accurate technical data in the Memorandum of Understanding on Data? Was this case described as a Soviet failure "to provide true and accurate data?"

Second—Has the President reported that about 6 GLCM-like launchers were aboard a Soviet patrol boat?

Third—Has the President reported a Soviet cruise missile undergoing about 2 flight-tests which were not declared?

Fourth—Has the President reported about 5 cases of Soviet interference with U.S. National Technical Means of monitoring? Were these a cause of "concern?"

Fifth—Has the President reported 1 undeclared Soviet SS-20 canister near Moscow? Did the U.S. declare this a "suspect item?"

Sixth—Has the President reported 24 cases of rewelded SS-23 Transporter-Erector-Launchers? Did the U.S. declare this an "anomally?"

2. If there is a grand total of 287 confirmed, clearcut, separate Soviet violations of the INF Treaty, and if there is a grand total of 39 Soviet compliance problems, is it accurate to describe the Soviet INF compliance record as a record of "generally successful implementation of the INF Treaty," as the President did in his February 23, 1990 Report to Congress on Soviet Noncompliance with Arms Control Agreements?

3. While most of these violations and problems eventually seem to have been corrected by the Soviets, nevertheless is it not a fact that there have been an inordinate number of Soviet violations and problems in complying with the INF Treaty?

4. Why have the Presidential reports tended to obfuscate the excessive number of incidents of Soviet INF violations and compliance problems—a grand total of about 326?

II. SERIOUS NEW SOVIET INF VIOLATION—24 COVERT SS-23S?

1. An East German army spokesman publicly confirmed on March 7, 1990, that the East German army had begun destroying 24 SS-23 missiles and 4 launchers. This confirmation came less than 24 hours after the United States officially said it was investigating reports that the SS-23s newly detected in East Germany violated the INF Treaty. Now that the East German army has admitted that it has at least 24 Soviet SS-23 missiles and 4 launchers and 4 transporters, how long have these missiles been in East German army hands? Are there more SS-23s in East German hands? How can we rule this out?

2. How many other SS-23 missiles and launchers are in the hands of non-Soviet Warsaw Pact allies? How can we rule out the possibility that the Soviets have provided SS-23s to other non-Soviet Warsaw Pact armies? Are recent press reports that the Soviets have provided SS-23s to the Czech army correct?

3. How can we rule out the existence of more SS-23s in Soviet hands?

4. Does the detection of these Soviet SS-23s in East Germany positively confirm that there are some covert INF forces?

5. According to the East German official announcement on March 7, the East German army started destroying these SS-23 missiles and launchers in early February, 1990, on the orders of East German Prime Minister, Hans Modrow. This destruction evidently began before the United States detected them. The East Germans claimed that the SS-23s carried only conventional, non-nuclear warheads, and were not covered by the INF Treaty. But why would the East Germans have started destroying these SS-23s, unless they believed that they violated the INF Treaty?

6. Are Soviet SS-23s capable of carrying the following kinds of warheads: high explosive, and three kinds of "weapons of mass destruction"—chemical, biological, and nuclear?

7. Under Soviet military doctrine, do the Soviets control all "weapons of mass destruction," such as all SCUD, SS-21, and FROG CBW and nuclear warheads, and all CBW and nuclear artillery rounds and all CBW and nuclear bombs for air delivery, deployed in the Warsaw Pact?

8. Given the relatively high cost of each SS-23 missile and the relatively low destructive capability of a high explosive warhead for it, is it true that the least cost-effective and therefore the least likely warhead for this missile is the high explosive, conventional warhead?

9. Does U.S intelligence therefore estimate a nuclear warhead as the most likely and most common warhead for the SS-23, and further, that these warheads are all controlled by the Soviets, even if the missiles are deployed with a non-Soviet Warsaw Pact army?

10. Were the Soviets required to declare and destroy all SS-23s when they signed the INF Treaty on December 7, 1987, and when they updated their data after they ratified it on June 1, 1988? How many times have the Soviets declared or updated their data during INF negotiations or since the Treaty's entry into force, and failed to declare these 24 SS-23s in East Germany?

11. Would this requirement to declare fully be extended under the "good faith" provision of the Vienna Convention on the international law of treaties to include all Soviet SS-23 missiles and launchers which had previously been given to a Warsaw Pact ally, but for which the Soviet Union still controlled the nuclear warheads?

12. Why did the Soviets not declare and destroy these SS-23s in East Germany under the INF Treaty?

13. Did the Soviets insist in a secret protocol to the INF Treaty that the 70 Pershing IA missiles belonging to the Federal Republic of Germany had to be destroyed, even with Soviet on-site inspection at joint U.S./FRG sites in West Germany, and at sites in the United States, and that the United States take back the 70 Pershing IA nuclear warheads which the United States owned, in addition to destroying all 170 U.S. Pershing IA missiles?

14. Are the newly-discovered Soviet SS-23s in East Germany analogous to the West German Pershing IA missiles that the Soviets required the elimination of in a secret side agreement to the INF Treaty? Should the Soviets have declared the East German SS-23s, especially since they controlled their warheads, and they were demanding the elimination of similar missiles that the United States had given to the West Germans?

15. Has the United States already confirmed in multiple cases that the Soviets did not list all Treaty-Limited Items and their locations, kept Treaty-Limited Items at non-declared locations, and failed to provide complete and accurate technical data, in the INF data, MOU, and updates?

16. Given the confirmed inaccuracy of the Soviet INF data, how likely is it that the So-

viets could have retained other undeclared, covert INF forces?

17. Should the United States declare that these Soviet covert SS-23s discovered in East Germany violate the INF Treaty? Please give a full legal explanation for your answer.

18. If the fundamental purpose of the INF Treaty was to eliminate all shorter-range and intermediate-range missiles, should the United States consider these covert SS-23s a "material breach" of the INF Treaty? Please give a full legal explanation.

19. Does the Intelligence Community estimate that about 500 to 600 Soviet SS-23s were produced, of which only 239 were eliminated under the INF Treaty?

20. Because we have already positively confirmed a covert force of at least 24 Soviet SS-23s in East Germany, could the estimated 261 to 361 remaining Soviet SS-23s also constitute a covert force of illegal INF missiles? Can we rule this possibility out?

21. Has the United States ever detected covert Soviet mobile missile forces by National Technical Means, such as covert SS-16s, SS-25s, and SS-24 mobile ICBMs, or covert SS-20 IRBMs, or covert SS-CX-4 GLCMs, or covert SS-23 SRBMs?

22. Are not all Soviet mobile missile forces designed to be covert forces, by using camouflage, concealment, deception, and mobility?

23. Is it not a confirmed fact that we know that the Soviets have covert mobile missile forces?

24. Are the order-of-battle or deployment number estimates by U.S. Intelligence of all Soviet mobile missile forces inherently uncertain, because these forces use camouflage, concealment, deception, and mobility to hide from U.S. NTM?

25. Now that we have positively confirmed Soviet covert SS-23 forces in East Germany, what is the likelihood of similar Soviet covert forces of SS-20s, SS-4s, and SS-CX-4s? Is there strong evidence from non-technical sources of hundreds of covert Soviet SS-CX-4s?

26. Did U.S. Intelligence detect any deployment of Soviet SS-CX-4s before they were banned by the INF Treaty? Did U.S. Intelligence only fortuitously detect SS-23 deployment, by non-technical means? Have there always been large uncertainties in SS-20 deployment estimates? Have there often been lags in detecting SS-20 deployment, and continuous indications of undetected forces?

27. Does DIA estimate the following probable numbers of Soviet covert INF missiles?

About 300 to 550 covert SS-20 missiles;

About 1,000 covert SS-4s;

About 350 to 450 covert SS-CX-4s?

28. What are the implications of the positive U.S. detection of the covert Soviet INF forces on Soviet intentions, reliability, and good faith in START negotiations?

29. Should all Soviet camouflage, concealment, and deception measures be banned in START, so as to reduce the possibility for the maintenance of covert forces?

30. Because all Soviet mobile missile forces are inherently covert, can START be verifiable with any confidence unless all such forces are completely banned?

SECTION III. CARGO-SCAN IMPASSE AND SOVIET "BREAK OUT" FROM CARGO-SCAN—ANOTHER NEW SOVIET INF VIOLATION?

1. Has the United States used the Cargo-scan x-ray system at the Soviet Votkinsk missile factory to measure a Soviet missile yet, since we declared the system to be operational on February 9, 1990?

2. Have the Soviets insisted at the last moment that the United States must redesign the shutters on the Cargo-scan x-ray system, use only one computer tape permanently stored in the USSR for recording missile images, and refrain from making duplicate tapes to be sent back to the United States for further analysis? Is this Soviet insistence causing a protracted impasse in our first use of Cargo-scan?

3. Are the Soviets also refusing to allow the United States to measure by Cargo-scan their missile railcar brought out of the Votkinsk perimeter the week of February 19, 1990? Is there a stand-off on this issue at Votkinsk? Does this Soviet missile railcar probably contain a new follow-on to the SS-25, perhaps capable of delivering 3 MIRVs, in further violation of SALT II and the already agreed START warhead counting rules?

4. Is the new Soviet position consistent with the Memorandum of Agreement Regarding the Implementation of Verification Provisions of the INF Treaty signed on December 21, 1989, or have the Soviets imposed new demands?

5. Do the terms of the INF treaty, Article XI Paragraph 6(b), which state: "If, after the end of the second year after entry into force of this Treaty, neither Party conducts the process of final assembly described in subparagraph (a) for a period of 12 consecutive months, then neither Party shall have the right to inspect by means of continuous monitoring any missile production facility for the other Party unless the process of final assembly as described in subparagraph (a) is initiated again."

provide the Soviets the option of declaring a one year moratorium on all missile production at Votkinsk after June 1, 1990?

7. If the Soviets declared a one-year moratorium on all missile production at Votkinsk beginning on June 1, 1990, would the United States lose its rights under the INF Treaty to have a Perimeter-Portal Monitoring system at Votkinsk after June 1, 1991?

8. If the Soviet Union exercises its options to exclude the United States Perimeter-Portal Monitoring system from Votkinsk after June 1, 1991, would the INF Treaty still remain in effect for the next ten years?

9. Would the Soviets then be able to resume secretly their production of SS-20s and SS-23s—or even better, a 3-MIRV SS-25—at Votkinsk for the next 10 years of the INF Treaty from 1991 to 2000, without the United States being able to determine that this circumvention of the Treaty was occurring?

10. Would the result then be that all U.S. Pershing IIs and GLCMs would be permanently removed from NATO, but the Soviet Union could secretly reconstitute its entire INF missile force?

11. Would this situation result in "cutting the heart out" of the INF Treaty, by gutting the key verification provisions?

12. Is it likely that there are several new Soviet weapon systems being produced at Votkinsk which the Soviets, by raising obstacles to verification, are trying to keep the United States from seeing? Could it be possible that the Soviets are trying to keep the United States from using Cargo-scan until June 1, 1990, after which they may declare a one year "moratorium" on all missile production at Votkinsk?

13. Could the Soviets even now be secretly stockpiling illegal INF missiles at Votkinsk?

14. During the first two years of the Treaty, the United States has the right to sample Soviet missile canisters emerging from the Votkinsk factory for inspection. Eight times per Treaty-year, the United States can open a Soviet missile canister emerging from Votkinsk. But all we see is the bottom end of the missile. We can not tell visually whether the missile is a legal SS-25 or an illegal SS-20. The Soviets have designed and provided a so-called "stage mesuring device" for the United States to use in "measuring" the length and diameter of the missile's second stage during these open canister inspections, but this device is derisively called "the stick and mirrors" by U.S. inspectors. Does the United States believe that this device is adequate for the Intended purpose? Are U.S.-Soviet negotiations continuing in the INF Treaty Special Verification Commission aimed at perfecting this device so that we can be confident that it can not be spoofed, and so that it can accurately perform its intended purpose? Is the failure to provide an accurate stage measuring device in a timely fashion another example of Soviet efforts to obstruct and resist United States verification at Votkinsk?

15. Does this result—the probable Soviet attempt at cutting the heart out of the INF Treaty by gutting the key verification provision at the Votkinsk Portal—mean that the INF Treaty is dangerous to the security of NATO and the United States, and therefore dangerous to world peace?

16. Has the United States sent a recent demarche to the Soviets stating that if the Soviets try to move the missile railcar currently sitting outside the perimeter of Votkinsk, which the Soviets refused to allow the United States to measure using Cargo-scan, the United States will declare such return inside the perimeter and refusal to allow inspection an "anomaly"? Is the U.S. declaration of an "anomaly" tantamount to the declaration of a seventh area of clearcut Soviet violation of the INF Treaty?

17. Is the United States sending a "technical team" to Votknsk to try to negotiate resolution of the three new Soviet restrictions on the U.S. use of Cargo-scan? Is this in fact an attempt to convert a political and diplomatic problem into a mere technical problem?

18. Did the Soviets recently forcibly break through the seal on the environmental shelter outside the Votkinsk perimeter containing one of their missile railcars, forcibly send in a locomotive in a "break out" through Cargo-scan, and illegally haul the missile railcar through Cargo-scan without allowing the United States to turn on the X-ray?

19. Did the Soviets do the same thing again twice a day later, again in flagrant violation of the INF treaty?

20. Did the United States recently strongly protest these Soviet refusals to allow Cargo-scan X-ray measurements, in flagrant violation of the INF Treaty, at the Secretary of State Baker-Schevardnadze and Matlock-Dubinin levels last Friday and Saturday?

IV. QUESTIONS ON SOVIET ABM COMPLIANCE

1. Has ACDA requested that CIA do a thorough analysis and a detailed report on the information supplied by the Soviet defector from the Soviet "Astrophysica" project for launching space-based lasers capable of being used as Anti-Ballastic Missile weapons?

2. Has ACDA done its own analysis of the Soviet "Astrophysica" project?

3. Has ACDA obtained a copy of the CIA reports received from a Soviet military officer in the early 1980s, who was later imprisoned, describing how the Soviet Moscow ABM system violates the ABM Treaty?

4. Are the Soviets working on a ground-based laser or hyper-velocity railgun, or conventional gattling gun ABM weapons at their Kamchatka ICBM Re-entry Vehicle impact area?

5. Has ACDA done an analysis of a possible Soviet "Dome of Light" ABM system using covert SS-4 or covert SS-20 boosters, to give the USSR a temporary ABM capability in a crisis or a war?

I realize, Ron, that these are a large number of questions, but I believe that each is well worth answering.

Our national security may depend upon the answers.

As you can see, I am deeply concerned about Soviet non-compliance with the INF Treaty and the ABM Treaty, and I will continue to ask these questions until I get all the answers.

Thank you for your attention to these questions, and I hope that you and your agency can answer them promptly and can keep the answers un-classified and short. Most can be simple "yes" or "no" answers.

[From the Los Angeles Times, Mar. 15, 1990]

U.S. Sends Arms Pact Protest to Soviets

(By Robert C. Toth)

WASHINGTON.—In a second serious dispute over missile verification, the Bush Administration has officially protested the Soviet Union's refusal to allow X-rays of three missile containers at a plant monitored under the 1987 Intermediate-range Nuclear Forces Treaty, U.S. sources confirmed Wednesday.

Secretary of State James A. Baker III personally protested Soviet behavior in a letter to Foreign Minister Eduard A. Shevardnadze this week, a State Department official said.

Sources said the refusal occurred last weekend at the Votkinsk missile plant.

Last week, it was disclosed that East Germany has been secretly in posession of 24 Soviet-made SS-23 missiles. The INF treaty bans Soviet and American missiles with a rang of 300 to 3,400 miles, and the SS-23s have a range of 550 miles. U.S. sources said it would be a violation of the treaty if the missiles had been transferred to East German control after the agreement was reached. A State Department official said Wednesday that the Administration was dissatisfied with the Soviet's explanation of that incident.

Baker's personal intervention in the Votkinsk case indicates the Administration is concerned that unless the matters are quickly resolved, conservative critics will use the two episodes to attack new strategic arms treaties. Both a nuclear arms pact and a conventional arms reduction agreement are expected to be signed this year.

The protest, although rooted in a narrow technical dispute, is believed to be the highest-level complaint ever concerning the INF treaty.

The episode involves a controversial X-ray device called a "cargoscan." It is now installed at the Votkinsk assembly plant, where on-site U.S. inspectors monitor missile-containing canisters.

The purpose is to ensure that none of the intermediate-range SS-20 missiles are produced and sent out under the guise of SS-25 long-range missiles, which are not covered by the INF treaty.

The SS-25 is essentially a variation of the SS-20. The X-ray machine can differentiate between the two.

The INF treaty provided that such a machine could be used at Votkinsk after a memorandum covering its use was signed. Considerable delay was encountered in building and testing the machine. In the interim, the missile canisters were examined from the outside, and any eight of the canisters could be randomly opened and inspected by the Americans during one year.

Although the memorandum was signed over a year ago, the machine was put in place only last month. The United States declared it operational, but the Soviets protested that some technical factors did not conform precisely to the description in the memorandum.

In essence, the Soviets want to ensure that the machine does not photograph more of the missile than necessary to establish its dimensions.

The Soviets refused to allow the machine's use before ironing out the differences. They also delayed the departure of one missile canister for at least a day in apparent hopes of working out the dispute.

But on Saturday, they moved three canisters out of the plant. U.S. inspectors were allowed to examine them in the old manner, but the locomotives pulling the canisters in railroad cards were not stopped to permit the X-ray machine to be used.

In replying to a U.S. note regarding East Germany's possession of SS-33 missiles, Moscow claimed the weapons were transferred to East Germany before the U.S.-Soviet treaty took effect, U.S. officials said. Thus, the East Germans were not required to disclose the weapons because East Germany was not a party to the INF agreement, and the Soviets were not required to destroy the missiles because they no longer owned them.

[From the Washington Post, Mar. 16, 1990]

Soviets Block United States Inspection at Missile Plant

(By Warren Strobel)

In yet another dispute over the U.S.-Soviet medium-range missile treaty, the Soviet Union has refused to allow American monitors to inspect missile-carrying canisters shipped from a weapons factory in the central U.S.S.R., the Bush administration confirmed yesterday.

The incident last weekend at the Votkinsk factory, whose output the United States is allowed to monitor under terms of the 1987 Intermediate-range Nuclear Forces [INF] accord, prompted Secretary of State James A. Baker III to complain to Soviet Foreign Minister Eduard Shevardnadze.

It also led the U.S. inspection team to declare an "ambiguity" concerning Soviet compliance with the treaty—the most serious action the team could take.

The dispute follows the discovery by the British, first reported by The Washington Times last week, of the existence of as many as 24 SS-23 missiles and a smaller number of launchers, which must be destroyed under the pact, in East Germany.

Administration officials, however, sought to dispel any linkage between the two matters.

State Department spokeswoman Margaret Tutwiler confirmed yesterday that the Soviets shipped canisters from the Votkinsk plant without first allowing the U.S. team to X-ray their contents. Administration officials said three such canisters were forced past the U.S. checkpoint, reportedly in separate incidents last Friday and Saturday.

Because the factory produces the long-range Soviet SS-25 missile, which is not covered by the INF treaty but is nearly identical to a missile that is, the treaty gives the United States special monitoring rights to ensure that only SS-25s come out of the plant.

But the superpowers have had a running dispute over the U.S. X-ray system, called Cargoscan, and signed a memorandum on its use only last December—two years after the INF treaty was signed.

After extensive testing of the Cargoscan equipment, the United States recently declared it ready to enter service. The Soviet Union balked, maintaining that the sophisticated device will allow the U.S. team to gather more data than it is entitled to under the treaty.

Since the treaty was signed, U.S. inspectors have been able to monitor the factory's output by measuring the canisters and opening some of them on a random basis.

While the issue is technical, "it's also for us a question of political importance—whether we're allowed to exercise treaty rights," a U.S. official said.

Both superpowers have sent teams of experts to Votkinsk, just west of the Ural Mountains, to resolve the issue.

Miss Tutwiler said, "The US regards any question of compliance with the INF treaty as a very serious matter" and is "continuing to press the Soviets to solve this problem by allowing us to use the Cargoscan system." She added, however, that Mr. Baker and Mr. Shevardnadze agree "that this needs to be resolved as soon as possible."

The incident at Votkinsk was first reported in yesterday's editions of the Los Angeles Times.

U.S. officials, speaking on condition of anonymity, also said yesterday that the United States is unhappy with the Soviet explanation for the SS-23 missiles, whose status is ambiguous because they are in the possession of East Germany.

[From Human Events, Mar. 16, 1990]

Defense Experts Alarmed: Soviets Fail To Comply With INF Treaty

Soviet non-compliance with the Intermediate-Range Nuclear Forces Treaty, has become so serious that sources both inside and outside the Administration are saying that the strategic arms treaty that President Bush wants to conclude with the Soviets by the spring may have to be indefinitely delayed.

What particularly troubles U.S. officials and congressional lawmakers, as reported in these pages last week, is that the Soviets transferred at least 24 SS-23 missiles to East Germany in a secretive manner that has even disturbed liberal arms controllers within the Administration.

Moreover, Secretary of State James Baker has been so concerned about Soviet efforts to hamper our usage of monitoring equipment in Votkinsk—installed to X-ray Soviet missile canisters carried on railroad cars—that he has sent several protest notes to Soviet Foreign Minister Eduard Shevardnadze, so far to no avail. (The purpose of the machines is to ensure that the Soviets are no longer producing the SS-20 intermediate range missiles banned by the INF treaty.)

Indeed, Shevardnadze has responded by complaining about the monitoring machines, insisting they cannot be turned on

until the Soviets are satisfied that they do only what the U.S. claims they do.

Even more disturbing is that the Soviets are said to be illegally manufacturing at Votkinsk a three-warhead mobile ICBM, a new form of the SS-25, and have even used force to prevent our X-raying the canister reportedly carrying the missile.

Sen. Jesse Helms (R.-N.C.), the ranking Republican on the Foreign Relations panel, is extremely concerned about the reported Soviet violations as well, and on March 12 dispatched a 10-page letter to Ronald Lehman, the director of the Arms Control and Disarmament Agency, asked him pointed questions about Soviet actions in connection with the INF treaty.

Though Helms has friendly relations with Lehman, and complimented him on his forthright testimony on the SS-23 matter, he said he was "disturbed by reports that, even as the hearing progressed on Wednesday [March 7], the Soviets were planning to take missiles out of the plant at Votkinsk without allowing the United States to X-ray the containers. . ."

The Center for Security Policy, headed by a key Reagan defense expert on disarmament, Frank Gaffney, in the wake of what has happened, has asked the Bush Administration to "disclose publicly the full extent of Soviet violations of the 1987 INF Treaty" in light of the two instances of reported non-compliance within the last several weeks.

After the Bush Administration sent its sanguine INF compliance report to Capitol Hill, noted the Center, the U.S. government discovered in East Germany a number of launchers of SS-23 missiles, together with as many as 24 associated missiles.

This discovery, stressed the Center, "gave the lie to the assurances in the compliance assessment" that all was well with the treaty. What's more, the Center went on, "this covert mobile missile deployment was successfully concealed for over two years."

The Center also complained about events that triggered Secretary Baker's strong protests to Shevardnadze, subsequently rebuffed, concerning two separate incidents on March 9 and 10 when "Soviet personnel crudely breached their obligations under the INF accord bearing upon U.S. monitoring rights at the Votkinsk missile factory.

"As a result of conscious, and evidently *officially sanctioned*, actions of Soviet individuals, the United States was unable to exercise its right to scan canisters exiting this facility. The purpose of such scanning is to assure the United States that SS-20 missiles banned by the INF Treaty were no longer being assembled at this facility. . . ."

The Center went on: "Despite formal representations by the U.S. government, including a direct communication over last weekend by Secretary of State James Baker with Soviet Foreign Minister Eduard Shevardnadze, the Soviet Union has refused to permit American personnel at Votkinsk to utilize the treaty-authorized monitoring device, nicknamed 'Cargoscan.'

"Indeed, on March 9, they [the Soviets] actually rammed a locomotive towing a missile railcar through the U.S. treaty monitoring station without stopping for the mandated inspections. This action was repeated on March 10 with two more railcars bearing missile canisters. In the process of crashing through the U.S. portal-monitoring facility, the Soviets reportedly damaged a barrier and warning device."

Gaffney's group stressed they viewed this Soviet behavior "with alarm," and specifically recommended:

"First, that the United States revisit at once its ill-advised decision to permit mobile missiles under the emerging strategic arms reduction treaty. These missiles will also be unverifiable, will likely be covertly maintained by Moscow and will pose a vastly more significant strategic threat than do their shorter-range counterparts.

"The Bush Administration should closely reconsider the adequacy of its on-site inspection demands—both for the existing INF agreement and for upcoming accords regarding strategic, chemical and conventional forces and nuclear testing. Clearly, the Votkinsk experience has shown the shortfalls of the current standard, and of the practice of working out 'technical details' regarding such inspections after the treaties are signed (*as was done with the Votkinsk inspection arrangements*).

"Finally, the Center believes this evidence of unacceptable conduct at the highest [levels] of the Soviet government offers futher compelling evidence as to why a formal 'second opinion' on the prospects and implications of Soviet behavior is so urgently required. Director of Central Intelligence Webster's benign assessment of the current—and *all prospective*—Soviet regimes does not square with the evidence of Moscow's ongoing noncompliance. Neither is it likely to stand up to rigorous analysis and challenge from a new 'Team B' of independent, nongovernmental experts."

MISSILE CRISIS

(By Rowland Evans and Robert Novak)

Soviet guards drew their pistols against unarmed U.S. technicians in a standoff at the Votkinsk missile plant last Fri., Sat., Sunday night. Soon afterward, Ambassador Jack Matlock rushed to the Foreign Ministry near midnight in a crisis mood over relations with Moscow not felt in Washington since Mikhail Gorbachev took power.

Operating on presidential orders, Matlock warned that the United States may accuse the Soviets of violating the INF treaty. That a charge of such gravity would threaten the new amity between the superpowers made no difference. Pistols won the standoff, blocking the United States a second time from turning on its new X-ray to prevent production of illegal missiles.

The events in Votkinsk were first minimized by the White House on grounds Gorbachev was so busy acquiring presidential power that he was probably unaware of what was happening. But U.S. officials are coming to suspect something dangerous—exactly what they do not know.

A team of mid-level officials, on first learning the facts, decided to send Matlock an immediate SOS, demanding Moscow's backdown. But when the matter reached the White House, the order was countermanded—until last weekend.

Some Soviet specialists here still believe Gorbachev has not concentrated on Votkinsk and that when he does the crisis will blow away. But Foreign Minister Eduard Shevardnadze's initial reaction to the U.S. threat to accuse Moscow of violating the INF treaty was disturbing. He sided with the Soviet military and suggested it was the United States that was violating the treaty.

That raises two questions, both of which are unanswerable today. Is Gorbachev forced by political weakness to do the bidding of the military or of Stalinist holdovers aligned with the military? Or is Gorbachev, having seized supreme presidential power, consolidating hard-line support as unhappy reformers go on the attack against him?

The INF treaty outlawing the intermediate SS-20 was ratified in June 1988 with much fanfare over its new verification features, including the X-ray "cargo scan" designed to enforce Soviet compliance. Its sole purpose is to make certain no SS-20 missiles are produced at the Votkinsk plant.

The United States expected to have it in place by December 1988—16 months ago. But Moscow raised one objection after another in a full year of foot-dragging and nay-saying. Moscow finally signed an agreement last Dec. 21 to set the huge machine in its housing and start X-raying new missiles Feb. 9.

On Feb. 6, the Soviets wheeled out a missile. Insiders here believe that it was a powerful new type of SS-25—a lethal, railroad mobile, single-warhead intercontinental missile. For almost three years, U.S. intelligence has suspected that the Votkinsk plant was getting ready to produce an enhanced SS-25 with three warheads. Though not illegal, the missile would change the balance of nuclear terror, and Moscow would want to keep the production secret as long as possible.

Since the X-ray was not yet operating on Feb. 6, no objection could be raised. Two weeks later, when another new missile was rolled out on its railroad car, U.S. technicians tried to turn on the X-ray. They were stunned when the Soviets said no, raising three fresh objections.

Until last weekend, that missile sat at the entrance to the X-ray building surrounded by personnel from both sides. When the Soviets unlimbered their pistols, the U.S. technicians got out of the way, and it was rammed through the X-ray building with the machine turned off. Two more missiles followed the same path.

The long stall by Moscow may be explained as an effort to produce the new SS-25 without discovery. That would deny the United States essential information about Soviet missilery as the Geneva negotiations on the new strategic arms treaty reach a climax.

Defense Secretary Dick Cheney has warned that since nobody can predict where Gorbachev's revolution really is going, the United States must be prepared for anything. Last weekend at Votkinsk supports his theory.

[From the Washington Post, Mar. 19, 1990]

MISSILE-INSPECTION TECHNICALITY PROVOKES TOP-LEVEL PROTEST TO SOVIETS

(By R. Jeffrey Smith)

Secretary of State James A. Baker III sent an urgent letter of protest to his Moscow counterpart last week-end after the Soviet Union insisted on shipping a new strategic missile from a remote factory in the Ural Mountains without what U.S. technicians said was a proper inspection.

Baker's message was part of a long-running squabble between Washington and Moscow over highly technical aspects of a U.S. X-ray inspection device at the Votkinsk missile factory, an arcane dispute elevated to senior bureaucratic levels against the backdrop of warming U.S.-Soviet relations.

The protest, according to several U.S. officials, was not driven by sudden fear that the Soviets had violated the 1987 Intermediate-Range Nuclear Forces (INF) Treaty by sneaking a banned, SS-20 medium-range missile out of Votkinsk in the guise of a more powerful SS-25 long-range missile.

The decision to involve Baker was instead provoked largely by domestic political concerns, the officials said. The fear was that without a major demonstration of U.S. resolve, the incident could lead to criticism of President Bush by the Republican Party's conservative wing just as the administration nears completion of four new arms accords with Moscow, the officials said.

"We don't believe the Soviets are hiding anything," a senior official said. "But the incident got the arms control compliance buffs around town all wound up, and it was decided at a high level that we'd better get out front on it."

The episode exemplifies the political dynamic of the East-West arms control process, which, after years of complex and detailed negotiations may soon result in treaties on strategic, conventional, and chemical weapons, as well as underground nuclear tests.

These accords will be subjected to a congressional review that may not be completed before the start of the 1992 presidential campaign. Senior Bush aides are both enthusiastic and uneasy about that prospect.

But political analysts said that amid declining public fears of the Soviet threat almost any East-West arms treaty will be approved and that Bush is unnecessarily concerned about charges by conservatives of weakness on the issue of Soviet cheating.

The Votkinsk dispute involves differing U.S. and Soviet views of the capability of an immense, $30 million, U.S. X-ray machine known as Cargoscan, recently installed to help verify that Soviet workers are not hiding SS-20 missiles inside large cannisters for the SS-25 missile, which is not constrained by the INF Treaty but is monitored by U.S. inspectors.

Prospects that the Soviets would substitute the banned SS-20 for the much more capable SS-25 are considered negligible by administration officials and many independent arms experts.

But a U.S. delegation has been working with the Soviets for over a year to hammer out procedures for x-raying a "slice" of each SS-25 missile cannister as a supplement to periodic visual inspections of the canister interiors allowed under the INF Treaty. In the meantime, the administration has considered the visual inspections, in combination with routine exterior missile measurements, adequate to certify Soviet compliance with that portion of the INF Treaty.

The two sides appeared to reach accord last December, but the Soviets complained after a recent test that the machine was recording images that were too detailed—which they evidently feared would enable the United States to learn Soviet missile design secrets.

The dispute, according to one official, centers on a difference of several centimeters in the area of the missile that is to be subjected to the X-rays. The Soviets also have protested a U.S. demand that the X-ray images be stored on tape for later return to the United States, where they could be electronically enhanced. The INF Treaty is silent on both issues.

The discussions came to a boil several weeks ago when the Soviets barred use of the X-ray on an SS-25 cannister because they did not accept the U.S. interpretation of the test. Shipment of the Soviet missile was delayed, while the administration assembled a group of technicians to fly to Moscow to argue its case.

But last weekend, the Soviets insisted on shipping the missile before the U.S. group arrived, prompting the urgent, nighttime letter from Baker. Since then, the Soviets have shipped at least two more missiles from Votkinsk without X-ray inspection, and have said they expect to be financially compensated by the United States for the shipping delays.

After reports of the dispute, White House press secretary Marlin Fitzwater said last Friday "the president believes that we have a difference of interpretation here. We do consider the matter serious."

Administration officials said a key reason for their labors is the intense interest of INF Treaty opponent Sen. Jesse Helms (R-N.C.), the Senate Foreign Relations Committee's senior Republican, and a key conservative participant in future hearings on arms accords.

"We've been following the Cargoscan issue for a year-and-a-half," said Helms aide David Sullivan. "This is all good for us. We don't need anything more than this."

Officials said they prodded Baker to send the letter because they expected critical articles such as the account of the dispute in Friday's Washington Post by newspaper columnist Rowland Evans.

Evans wrote that "Soviet guards drew their pistols against unarmed U.S. technicians in a standoff at the Votkinsk missile plant last Sunday night," an account that was repudiated by Fitzwater, Pentagon spokesman Pete Williams, and various State Department officials. "We can't find any evidence of an altercation" or guns being pulled, Williams said.

Evans said, in a telephone interview, that "I have absolute confidence in the accuracy" of the column, which he said was "reported at . . . high levels."

U.S. officials said they did not know whether the team of technicans sent to Moscow had resolved the dispute by Friday evening. But they did not expect it to interfere with completion of additional arms accords or pose a serious problem in U.S.-Soviet relations.

One official said the decision to protest Votkinsk was also influenced by press accounts that the recent discovery of two dozen previously undeclared SS-23 missiles in East Germany was a blow to arms control. The missiles are banned by the INF accord and are now being destroyed.

The Soviets have told the administration that the missiles do not have nuclear warheads and were sent to the East Germans prior to signing of the INF accord, which both sides agree is legal.

[From the Washington Times, Mar. 19, 1990]

U.S. MAY CITE SOVIETS FOR VIOLATION OF TREATY

(By Bill Gertz)

Soviet refusal to permit U.S. inspectors to use special X-ray equipment at a missile factory in Votkinsk could lead to a U.S. declaration that Moscow is violating the 1987 intermediate-range nuclear forces treaty, Bush administration officials say.

"This is the most serious compliance issue since Krasnoyarsk," said one administration intelligence official. The official was referring to the discovery in the mid-1980s that the Soviets had built a radar at Krasnoyarsk, Siberia, in violation of the anti-ballistic missile treaty.

U.S. officials said privately that the Soviet refusal to permit the use of the special inspection equipment could jeopardize the conclusion of the more sweeping strategic arms reduction talks (START) or a conventional forces in Europe arms control treaty (CFE). The INF verification provisions are viewed as the model for similar measures to be included in the START and CFE pacts.

The dispute began last month when Soviet military officials refused permission for a team of U.S. INF inspectors at Votkinsk, a town several hundreed miles east of Moscow, to use special X-ray equipment to view the contents of missile cannisters leaving the factory there.

The factory produces Soviet SS-25 ICBMs and had produced SS-20 INF missiles. Both missiles are nearly identical in size, and the Soviets are oposing the use of X-ray equipment on SS-25 cannisters that leave the factory on rail cars.

Under the terms of a U.S.-Soviet memorandum of agreement reached in January, U.S. inspectors can use the X-ray equipment at Votkinsk for inspections. But after the equipment became operational in February, the Soviets refused to permit its use.

The Soviets say the X-ray equipment will permit the inspection team to see details of the SS-25 the Soviets want to remain secret.

According to administration officials, who asked not to be named, the Soviet reluctance to permit X-ray inspections has raised suspicions that the Votkinsk factory is producing a new, three-warhead version of the SS-25, now deployed with one warhead.

A test of a new missile, possibly the multiple-warhead version of the mobile ICBM, is set for later this month, officials said.

White House and State Department officials denied a report Friday in The Washington Post that Soviet guards at Votkinsk drew their pistols on U.S. inspectors during a recent showdown over X-ray inspections.

But a State Department arms controls specialist said the Soviets moved three new missiles out of the factory. Two missiles were inspected under rules that permit opening the cannisters, but the third was uninspected, the official said.

Another official said four more cannisters are ready to leave the plant.

Secretary of State James A. Baker III has written to Soviet Foreign Minister Eduard Shevardnadze protesting the Soviet opposition to the X-ray equipment, known as Cargoscan, the official said.

A team of U.S. technicians also was sent to Votkinsk more than a week ago to try to solve the problem. The report of the group will be used in determining what action the administration takes, the officials said.

White House spokesman Marlin Fitzwater said the administration "hasn't voiced any conclusion yet" on whether the Soviets violated the INF treaty by denying the technical inspections.

"It is a very serious matter and could lead to conclusions about a violation," Mr. Fitzwater said. "But we're not there at this point."

The Votkinsk standoff is the second INF compliance problem to come up in the past several weeks. Soviet-made SS-23 missiles were discovered recently in East German military units, in possible violation of the terms of the pact because the Soviets did not declare the missiles during negotiations.

CONGRATULATIONS TO THE ARKANSAS RAZORBACKS

Mr. BUMPERS. Mr. President, on behalf of myself and my colleague Senator PRYOR, I want to commend the University of Arkansas Razorbacks

for the great job they did in the NCAA semifinals on Saturday.

Our Razorbacks made us all proud, not just because of the NCAA tournament, but because a bunch of youngsters showed unbelieveable character in coming back time and time again. And while basketball has become a contact sport, and tempers flair more than in the old days, this season was also a demonstration of good sportsmanship.

Every player was superb in one or more games—and it would be unfair to pick any single player out for recognition. It was all a great team effort, and they have made this one of the most memorable years in Razorback sport history.

Coach Richardson, a great role model, has represented the team and our beloved State in an exemplary manner. I was never prouder of him than in his nationally televised interview following our loss to Duke. He was gracious to Duke, but as proud as a father of every one of his players. It's easy to be gracious when you win, but the mark of a champion is when you're gracious in defeat.

We almost went berserk in Washington when CBS switched from the Arkansas-North Carolina game to the Clemson-Connecticut game for about 10 minutes. When we got back to the Razorbacks, the Razorbacks had a comfortable lead, if there is such a thing.

Coach Richardson has a great bunch of players, many of whom will be back next year, and we can all look forward as proud alumni, and as proud Arkansans to a lot of excitement in 1991. And maybe, just maybe, that elusive title will be ours.

I would be remiss if I didn't also express our great pride in the Lady Razorbacks. Not only did they make the elite eight for the first time, they also brought us the Southwest Conference crown.

Now I just want to know what the "Big O" said to that guy Dudek in the Texas game.

Mr. MITCHELL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UNANIMOUS-CONSENT AGREEMENT—S. 2364

Mr. MITCHELL. Mr. President, I ask unanimous consent that when the Senate considers S. 2364 that it consider it under the following time limitations: 20 minutes for debate on the bill, including a managers technical amendment, equally divided between Senators PELL and HELMS or their designees; that no amendments except for the managers' technical amendment be in order, that no motions to recommit be in order; that when all time is used or yielded back the Senate, without any intervening action, proceed immediately to third reading and final passage of the bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

SCHEDULE

Mr. MITCHELL. Mr. President, for the information of Senators, this agreement now provides for prompt action and the legislation to provide economic assistance to Panama and Nicaragua and others. This is the authorization bill which we have been attempting to clear for such action throughout the week and I am gratified that we have been able to do so and will now be able to act on this legislation. We have no requests for a rollcall vote on this legislation. I want to check on the minority side and am advised that there is no request on that side either.

Does the acting minority leader agree with that?

Mr. McCAIN. I say to the majority leader we have no request for a rollcall vote. Also, if he would indulge me, I would like to express my appreciation for his very hard work in making this issue become a reality. We will be able to address it before adjournment. Without his intense commitment, this would not have happened.

Mr. MITCHELL. I thank the Senator.

Accordingly, Mr. President, not having received any request for a rollcall vote, it is my intention that this legislation, following the debate agreed to just moments ago, will be approved by voice vote. This does pass, then, the authorization bill and sets up the procedure by which the Appropriations Committee can now proceed promptly to consider this matter and report it to the full Senate.

That being the case, there will be no further rollcall votes this evening and the Senate will not be in session tomorrow. The Senate will return to session on Wednesday, April 18, which is 2 weeks from yesterday, at noon. There will be no rollcall votes on that day, although legislation will be laid down on that day. There will be rollcall votes and the possibility of many of them on that Thursday and on that Friday. So Senators should be aware of that schedule as they plan their travels around the Easter recess.

There will be no further rollcall votes this evening. The Senate will not be in session tomorrow. When we return to session on Wednesday, April 18, it will be at noon on that day. We will lay down a bill on that day. There will be debate with the possibility of amendments being offered. There will be votes and the possibility of several votes on that Thursday, April 19, and Friday, April 20.

Then of course the following week will begin on Monday.

I thank my colleagues for their cooperation in this regard. Mr. President, I now yield the floor.

I understand the distinguished chairman of the Foreign Relations Committee is prepared to proceed to manage this legislation, along with the distinguished Senator from Arizona, and gain enactment of it following the brief time for debate set forth in the agreement.

AUTHORIZING SUPPLEMENTAL ECONOMIC ASSISTANCE TO SUPPORT DEMOCRACY IN PANAMA, NICARAGUA, AND SUB-SAHARAN AFRICA

The PRESIDING OFFICER (Mr. ROBB). The Senator from Rhode Island.

Mr. PELL. Mr. President, I ask that the Senate proceed to the immediate consideration of S. 2364, which is presently at the desk.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (S. 2364) to authorize supplemental economic assistance to support democracy in Panama, Nicaragua, and so forth.

The Senate proceeded to consider the bill.

The PRESIDING OFFICER. The Chair recognizes the Senator from Rhode Island [Mr. PELL].

Mr. PELL. Mr. President, the United States and democracy have won a series of stunning victories around the globe in recent months. As we spend less on weapons serving no current purpose, we will have to spend more on waging peace. Freedom for Panama and Nicaragua comes with a price, one that the United States must, in part, be prepared to pay. The bill before the Senate provides the necessary authorization of funds to help the two emerging democracies in our own hemisphere, Panama and Nicaragua, build democracy and foster economic recovery.

S. 2364 authorizes a total of $870 million of supplemental assistance; $470 million for Panama, $300 million for Nicaragua, $30 million for sub-Saharan Africa, and $70 million for refugee programs. The inclusion of $30 million in authorization for sub-Saharan Africa reflects an agreement made between Congress and the administration at the time Congress approved the first package of assistance for Panama earlier this year, $30 million of which was transferred from unobligated funds in Africa.

The levels of authorization, with the exception of the above mentioned transfer of funds from Panama to Africa, are consistent with the levels requested by the administration on March 15. The administration intends

that this assistance be derived from funds transferred from appropriation accounts of the Department of Defense.

In addition, S. 2364 authorizes $400 million in guarantee authority under AID's Investment Guarantee Program to build housing and necessary infrastructure for the enormous influx of Soviet refugees in Israel. I would point out to my colleagues that this is a loan guarantee program with no budget impact. No direct appropriation of budget authority is necessary.

Let me take a moment to describe in slightly more detail the assistance package for Panama and Nicaragua. Section 2 of the bill authorizes $470 million of assistance to "jump-start" the Panamanian economy and help Panama regularize its relations with external creditors. Specifically, this section authorizes up to $170 million to help business finance a resumption of investment expenditures and restock inventories, with priority to be given to businesses that were looted after the invasion, and for export promotion activities; up to $125 million is authorized to be provided as budget support to the Government of Panama to finance construction in the transportation, education, agriculture, and health sectors; up to $45 million is authorized to assist the Government to facilitate judicial reform and the needs of the civilian police force, fiscal management and accountability, and the restoration of public services, and to support direct programs to protect the environment, particularly watershed protection for the Panama Canal; and up to $130 million to pay the one-third United States contribution to clear Panama's arrearages to the IMF, IBRD, and IDB so that Panama will be eligible for new lending.

Section 2 fences 20 percent of the amount appropriated for Panama until such time as the Secretary of the Treasury reports to Congress that the United States and Panama have reached an international currency transaction agreement and the Secretary of State reports that progress is being made towards signing a Mutual Legal Assistance Treaty, or alternatively, with respect to an international currency transaction agreement, the Secretary of the Treasury reports that Panama is negotiating in good faith. In addition, the committee bill conditions next year's narcotics certification for Panama under the full cooperation standard in the Foreign Assistance Act on a signed agreement between the United States and the Government of Panama that provides for mutual access to financial transactions records for purposes of drug-related law enforcement investigations and efficient mechanisms for obtaining bank records in drug-related proceedings.

Section 3 of the bill authorizes $300 million of economic assistance for Nicaragua to support the Chamorro Government's efforts to democratize, demilitarize, and develop the economy. Of this total amount, up to $128 million is authorized to support the efforts of the Government of Nicaragua and the private sector in Nicaragua to restore the productive capacity of the Nicaraguan economy through imports of agricultural equipment, petroleum and oil products, and materials and goods to rehabilitate existing facilities and stimulate new productive enterprise in the industrial and agricultural sectors; up to $50 million is authorized to assist Nicaragua in paying its $234 million in arrearages to international financial institutions; up to $75 million is authorized to assist in longer-term economic growth and development needs; and up to $47 million is authorized for assistance to support the demobilization and demilitarization process and to reintegrate former combatants, Nicaraguan refugees, and other Nicaraguans displaced by the conflict into the social, economic and political life of Nicaragua.

The longer-term economic growth and development assistance authorized includes programs to repair, improve, and maintain existing public infrastructure such as schools, health clinics, roads, and community facilities; provision of medical equipment, commodities, training, and other support for the health sector, provision of assistance and training to improve Government administration and strengthen democratic institutions; provision of technical assistance and training to the private sector to permit the rehabilitation and modernization of private enterprise; support for education programs; and support for the agricultural sector.

Let me provide one example of the kind of development assistance in the health sector which is contemplated by this authority. For the past several years, the Department of Family Medicine of Brown University and the Training Exchange, a Rhode Island-based, nonprofit organization, have worked to provide much needed training to Nicaraguan health teachers. They have established programs to teach primary care and family medicine to young physicians who in turn teach primary care to fourth and fifth year medical students. This exchange program in Leon is well established and is already at the stage of being turned over to Nicaraguan physicians for continued implementation. Nurse teachers have contributed significantly in areas of maternal-child care, midwifery, primary care and rehabilitation. In addition, the program is involved in an ambitious attempt to provide prostheses for the thousands of children whose limbs were lost during the conflict. This is the kind of program which should be maintained and expanded to continue helping our neighbors to help themselves in bringing improved health care to Nicaraguans.

Section 4 of the bill authorizes up to $10 million of the funds appropriated for Panama and Nicaragua under sections 2 and 3 to be used by AID for administrative expenses incurred in implementing those sections, not more than $60,000 of which may be used for administrative expenses associated with winding down the Resistance Task Force.

Section 5 sets forth Congressional policy that recognizes the significant environmental challenges facing Panama and Nicaragua, and prohibits any assistance under this act from being used for any project that is inconsistent with long-term, environmentally sustainable development or that would result in the destruction of tropical forests. In addition, up to $4 million of the amount authorized for Panama and Nicaragua under sections 2 and 3 is authorized to be used by AID to undertake education, policy training, research, technical and financial assistance, monitoring, and coordination, as may be requested by the Governments of Nicaragua or Panama, to protect the environment and strengthen public and private environmental institutions in those countries.

Section 5 further contains a statement of congressional support for the ongoing efforts of Nicaraguan and Costa Rican environmentalists to create the International System of Protected Areas for Peace [the SI-A-PAZ Program]. In 1988, Costa Rica's Minister of Natural Resources and Nicaragua's Director of IRENA [Nicaragua's environmental agency], signed a letter of intent to create an international biosphere reserve along their shared border. This proposed SI-A-PAZ is an integrated development project which aims to protect precious natural resources on both sides of the border while promoting economic development in surrounding zones. Costa Rica's President, Oscar Arias Sanchez, reflected this cooperative spirit in saying, "What do we do with this region of conflict? We make it into an area to study nature. We don't send soldiers with instruments of death. We send students, scientists and naturalists with the instruments they need for their intellectual work." It is my hope that AID and other Federal agencies will lend assistance to the SI-A-PAZ Program specifically, and to the peace park concept generally in the region.

I urge my colleagues to join me in supporting passage of this urgently needed authorization bill.

Mr. HELMS. Mr. President, before proceeding to a general discussion of S. 2364, let me state that I have reached an accord with the White House with regard to a provision of

this bill which I consider very unfair—namely that the requirement of laying down arms is imposed only upon the members of the Nicaraguan Resistance, and not upon the Sandinista paramilitary groups and militias which have been arming themselves to the teeth in the past few week.

This legislation proposes to give $30 million to the members of the Resistance—I prefer to call them freedom fighters—to induce them to lay down their arms. This is an outright bribe, which the leader of the Resistance, Commander Franklin, has strongly rejected in a telephone call to me.

However, the White House this afternoon, has sent me a letter, signed by General Scowcroft, the President's National Security Adviser, drafted after several conversations with the General and with Governor Sununu, Chief of the White House staff. Both agree that it is essential that all groups—not just the members of the Resistance—all groups should lay down their arms, except of course any army units which will be under the control of Mrs. Chamorro.

Mr. President, I ask unanimous consent that the text of the letter from General Scowcroft be printed in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

THE WHITE HOUSE,
Washington, April 5, 1990.

Hon. JESSE HELMS,
U.S. Senate, Washington, DC.

DEAR SENATOR HELMS: This Administration shares your concern for and commitment to the security and safety of the members of the Nicaraguan Resistance. We believe that security guarantees must be part of any demobilization process as the Central American peace process requires. We support the agreement reached by the Resistance, UNO, and the Catholic church at Toncintin which provides a framework for demobilization and believe it is the responsibility of the parties to implement the agreement, including provisions for the security and safety of Resistance members and means to verify both. We also believe that the full transfer of civil and military power to Mrs. Chamorro's government must take place on April 25 and that weapons distributed to armed militia and paramilitary groups should be reclaimed by the government. We believe that the collection of such weapons will contribute to an atmosphere of security in Nicaragua that will support demobilization.

Sincerely,

BRENT SCOWCROFT.

Mr. HELMS. Mr. President, we should take a close look at this letter. General Scowcroft says,

We support the agreement reached by the Resistance, UNO, and the Catholic church at Toncintin which provides a framework for demobilization and believe it is the responsibility of the parties to implement the agreement, including provisions for the security and safety of Resistance members and means to verify both.

Mr. President, as I will discuss in more detail in a few moments, the March 23 agreement referred to by the General, does not commit the Resistance to any demobilization or disarmament procedures while in Nicaragua. It commits them only to disarmament and demobilization procedures in Honduras—procedures which, for Honduras, have already been carried out. Most able-bodied members of the Resistance have already gone to Nicaragua.

As far as Nicaragua is concerned, the freedom fighters agreed only to the concentration of their Armed Forces in Nicaragua in security zones. The Resistance has made no commitment to laying down their arms in Nicaragua, although a commission will be set up to discuss such matters.

Furthermore, the General states that it is the policy of the U.S. Government that "the full transfer of civil and military power to Mrs. Chamorro's government must take place on April 25, and the weapons distributed to armed militia and paramilitary groups should be reclaimed by the government."

That is the heart of the problem, Mr. President, and I am pleased to learn that this policy will guide the United States Government in the implementation of assistance to Nicaragua. It should also be noted for the record, Mr. President, that the legislation itself, one-sided as it is, does not require any timetable for the laying down of arms. It speaks only of requiring an agreement, not the actual laying down of arms.

Mr. President, if the assistance is implemented in accord with this policy, then there is some hope that Mrs. Chamorro will have an atmosphere of peace in which to work, and the members of the Resistance will feel more confident of their security.

With those facts in mind, Mr. President, permit me to discuss the overall implications in the bill, as well as the particular problem in more detail.

Mr. President, S. 2364, the supplemental authorization bill to provide emergency aid to Panama and Nicaragua, would provide $770 million in aid to Panama and Nicaragua, $400 million in aid to Panama and Nicaragua, guarantees for up to $400 million to support housing for Soviet Jews in Israel, and $70 million for refugees. It also repays $20 million to the Southern African Development account, and $10 million to Namibia, a total of $30 million which had been temporarily reprogrammed for earlier emergency aid to Panama.

Mr. President, with regard to Panama, all Senators are familiar with the grave economic crisis facing that country after more than two decades of de facto military dictatorship. This bill would authorize $470 million in aid to Panama. We have been assured by the administration that this is a one-shot deal: The aid that this bill would provide should be sufficient to jump start the Panamanian economy.

The health of the Panamanian economy has a direct and immediate strategic impact upon the United States. If Panama is unable to become a strong and democratic country, the functioning of the Panama Canal would be put at risk. The criminal actions of Manuel Noriega destroyed the economy of Panama, crippled its democracy, and attacked the rights of the Panamanian people. Now that Noriega is out, we have a strong and immediate interest in helping to restore a strong and democratic government to the Panamanian people.

Mr. President, a week or two ago, I met with the distinguished Vice President of Panama, Mr. Billy Ford. He made impressive arguments for the need for this assistance. Mr. Ford was very thankful that the United States had liberated his country from the Noriega dictatorship. However, he had one more favor to ask—that the United States provide this one-shot aid. I think that the United States should respond. Through four administrations the United States Government gave inexplicable support to the drug-dealing dictator Noriega—despite evidence of drug trafficking by Torrijos and other members of his regime which I and other Senators presented on the Senate floor in 1978. We have created an obligation to undo the harm we have done.

Mr. President, this bill would also provide $300 million to Nicaragua. Of course, the subject of Nicaragua has been hotly debated for more than a decade. In 1980, and 1981, many Senators on this floor advocated millions of dollars in assistance to the Communist Sandinista government. We heard arguments that this money was to strengthen the private sector. But I strongly opposed that aid, because it was clear that giving a Communist government funds supposedly to strengthen the private sector actually gave more power to the Communist central authority, putting it in a position to give out bribes at the same time it instituted more controls.

Indeed, in the 2 years immediately following the Sandinista takeover, more aid was given to Nicaragua from Western countries than during the previous two decades combined. All this money was wasted. Much of it was transferred to Communist weapons-producing countries to pay for the huge army necessary to keep the regime in power. At the same time the economic needs of the people and of the economy in general were strangled. The Sandinistas used this support, which came both from the West and from the Soviet bloc nations, to entrench their totalitarian position and to destroy the free opposition.

However, on February 25, the people of Nicaragua voted overwhelmingly to throw out the Communist Sandinistas. It was a vote for freedom and against Communist oppression.

Yet, Ortega and the Sandinistas remain entrenched in the governmental apparatus. He has thousands of bureaucrats under Sandinista Party control. He is in control of 65,000 troops in the Sandinista Army, and he has organized at least 200,000 more of the party faithful in militia groups all over the country. Ortega has been distributing tens of thousands of rifles and pistols to Sandinista militants over the past few weeks. We have seen pictures of truckloads of arms being delivered to the party faithful. This is not the action of a man who expects to turn to a peaceful political process; it is the action of a man who expects to lie low until it is time to strike.

Moreover, since the election, the Sandinista-controlled National Assembly has attempted to protect the defeated Sandinista party by passing a series of obnoxious laws. They have deeded luxurious homes and factory facilities to themselves. They have seized property which once belonged to U.S. citizens.

Mr. President, I ask unanimous consent that a list of Sandinista abuses and harassments during the transition process be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. HELMS. For this reason, I am surprised, Mr. President, that this bill, as reported from committee, contains some very unfair language.

Mr. President, the bill which has been reported from the Committee on Foreign Relations includes a provision which is diametrically opposed to the American concept of fairness. It is in the section which provides for assistance for demobilization, repatriation, and resettlement of members of the Nicaraguan Resistance and their families. At first glance, this seems to be a generous provision.

However, page 18 contains the following paragraph:

> Assistance may be provided under this subparagraph for members of the Nicaraguan Resistance only if there is agreement that such members will give up their weapons as part of the demobilization process.

Mr. President, I can see how some Americans, how some members of this body, might conclude that the war in Nicaragua is over. They might conclude that a democratic settlement has been reached, and that it is appropriate for all parties to lay down their arms.

And indeed, it is appropriate for all parties to lay down their arms. Unfortunately, Mr. President, it is not appropriate to require that only one side lay down its arms. For 10 years, the Sandinistas have been subjecting Nicaragua to Communist domination. For 10 years, the Sandinistas have been strangling the liberties of the Nicaraguan people. For 10 years they have run a military dictatorship in Nicaragua. And as I have already pointed out, Ortega has been shipping truckloads of weapons to these militia groups, arming them to the teeth in anticipation of the rule of Mrs. Chamorro.

Therefore, it is not at all clear that Ortega and the Sandinistas will actually turn over the military forces to Mrs. Chamorro. We have had conflicting statements. It may very well turn out that hardcore units of the Sandinista Army will desert, and disappear into the jungle. Under these circumstances, it would be a clear and present danger for any members of the Resistance in Nicaragua to give up their arms. If they are defenseless, they could be surrounded by Ortega's people and murdered.

Mr. President, the $30 million, given under the attached condition, is not an honest offer. It is an attempt to induce the freedom fighters to act against their own security interests. There is no possible way that the freedom fighters can be secure in Nicaragua so long as the Communist Sandinistas themselves can keep their own weapons and organizations.

The Sandinistas would not have been defeated in the elections, if it were not for the valiant and courageous actions of the freedom fighters. The Resistance forces were the winners; the Sandinistas were the losers. But this bill would disarm the winners, and leave the losers in full possession of their weapons. How can we disarm the winners, and put them at the mercy of the losers, who remain in control of their own weapons and organization? That is manifestly unfair.

The Resistance is not the problem in Nicaragua; the Sandinistas are the problem. Why does this bill not address the real problem?

Mr. President, I have seen statements that the Resistance has already agreed to demobilize and disarm. Even Assistant Secretary of State Bernard Aronson has asserted that the representatives of the Resistance had signed an agreement to that effect. But it is not true that the Resistance has given unconditional support to demobilization. The Resistance has agreed to demobilization and turning in their weapons for members in Honduras only—not in Nicaragua. The State Department does not emphasize this distinction.

The reason the Resistance has agreed to demobilization and surrender of arms in Honduras is that virtually all of the 12,000 able-bodied members of the Resistance had already left Honduras with their weapons before the March 23 agreement had been signed. Only dependents and about 2,000 wounded remain, along with a small number of protective forces. Therefore, the agreement to demobilize and give up arms in Honduras is irrelevant.

Of course, few Senators, and apparently not even Assistant Secretary Aronson have had an opportunity to review the actual terms of the document, which is in Spanish. I have had a summary of the March 23 agreement prepared in English. It shows clearly that there is no agreement to lay down arms in Nicaragua—only in Honduras.

Mr. President, I ask unanimous consent that a summary of the English text of this agreement be printed in the RECORD at the conclusion of my remarks.

The Presiding Officer. Without objection, it is so ordered.

(See exhibit 2.)

Mr. HELMS. Mr. President, that is why the Resistance absolutely will not lay down their arms in Nicaragua as long as 65,000 troops and 200,000 militia are under the effective control of the Communist Sandinistas. To do so would be a death sentence.

EXHIBIT 1

POST-ELECTION HARASSMENT BY THE COMMUNIST SANDINISTAS AND OTHER EVENTS

PRE-ELECTION COMMENTS

Interior Minister Tomas Borge:

"If a new government is formed . . . it will have to name its cabinet and if it names another interior minister, it would have to get rid of the staff as well, because they certainly wouldn't obey the new minister."

Defense Minister Humberto Ortega:

Even if Mrs. Chamorro won "she would still have to deal with me." He further stated that the armed forces may not obey orders they consider unsound.

Foreign Ministry Secretary General Alejandro Bendana:

"This country is ungovernable without the FSLN. There can be no stability in this country without the FSLN. There can be no democracy without the FSLN."—The Washington Times, The Washington Post February 26, 1990.

February 26, 1990

The UNO headquarters in Managua was attacked by Sandinista supporters with bottles and rocks.

In a half dozen northern cities, homes of party supporters and several party headquarters were stoned, according to UNO officials. While attacking several homes, Sandinista supporters fired automatic rifles into the air.

In the town of Esteli, the Sandinista police stood by as the homes of UNO supporters were attacked and UNO headquarters were burned.

The UNO campaign headquarters in Matagalpa was occupied for two hours.

Several Sandinista officials said the front can make Nicaragua ungovernable if they so decide. Health Minister Dora Maria Tellez said in a nationally televised speech that "the cooperation of the Sandinista Front is indispensable to govern this country."—The Washington Post February 26, 1990, Miami Herald February 27, 1990, The New York

Times, The [Baltimore] Sun February 28, 1990.

February 27, 1990

Out-going President Daniel Ortega told a crowd of 3,000 supporters: "We will continue to govern from below." He also said that the Sandinistas would not allow land expropriated by the Sandinistas to be given back to its former owners.

This one of a series of "irreversible" social advances that he demanded the new government keep. Others included demobilizing the contras, maintain the labor code and nationalization of international trade, banking and natural resources, protect the jobs of those on the public payroll, and continue to allow labor activism, strikes, agrarian reform, payments to war veterans and war widows and the freedom of the press.

Ortega made this statement despite an announcement from the Supreme Electoral Council that UNO won eight of the nine electoral regions, losing only the remote sparsely populated Rio San Juan region in the southeast.

At a separate speech, Ortega vowed to protect the "professionalism" in the army saying "We are going to govern from below and defend from below." [All officers above the rank of captain are members of the Sandinista Party.]

At the rally, Sandinistas supporters cried "[F]raud," "[W]e are the army," and "[W]e've got the guns."

Over four hundred AK-47 assault rifles were unloaded from an army truck in Jinotega and distributed to selected residents by a local Sandinista leader.

Today was the first day that civilians could sign up for FSLN militias. In one neighborhood in Managua, 300 people joined. The militias are trained with weapons, practice intelligence gathering and weapons maintenance and must attend daily meetings, advise leaders of their movements and leave a means where they can be reached in case of an emergency. They are classified as active reservists. The Sandinistas are also recruiting teenagers for "four months of voluntary combat duty."

President-elect Chamorro declared that the removal of General Humberto Ortega from the Defense Ministry was "non-negotiable."

Callers to Sandinista-controlled Radio Sandino threatened to take to the streets to block Mrs. Chamorro's inauguration. Despite objections from party leaders, the station continued to air inflammatory anti-UNO spots.

A Sandinista supporter burst into the house of a 50-year-old farmer, Francisco Benevides of Jalapa and sprayed machine-gun fire before being disarmed.—The Washington Post, The [Baltimore] Sun, Boston Globe, Miami Herald, Los Angeles Times February 28, 1990, Miami Herald March 1, 1990, The Washington Times March 2, 1990, Washington Post March 5, 1990, Los Angeles Times March 8, 1990.

February 28, 1990

President-elect Chamorro announced that she would remove Gen. Humberto Ortega from his position as Defense Minister.—Los Angeles Times, Miami Herald March 1, 1990.

March 1, 1990

Sandinista union leaders promised to paralyze the country if the government does not improve the economy in the 100 days. "If they don't respond, we will paralyze production," said Bernicia Sandiers head of the Sandinista textile union.

The same union leaders promised strikes if the new Chamorro government privatizes firms nationalized by the Sandinista government.

Contra leaders in Honduras report violence between Sandinista forces and army deserters. According to contra spokesman Alejandro Acevedo, "we have information that there have been massive desertions in at least three brigades and violent clashes in a number of battalions.

Juan Carlos Medina, 18, told the Associated Press that 40 of the 60 members in his Sandinista air force unit, based at the international airport, deserted since Monday [February 26, 1990]. "They took our weapons away on Monday and didn't give them back. Maybe they didn't trust us."

Interior Minister Tomas Borge offered to resign when Mrs. Chamorro takes power on April 25, 1990.—The [Baltimore] Sun, Miami Herald March 2, 1990.

March 2, 1990

Bayardo Arce, one of the nine Sandinista commanders, said that the command structure of the Army cannot change.

An unknown assailant threw a bomb at the home of a priest, Father Eliar Pineda of Jinotega. Father Pineda was an UNO supporter. He had received numerous death threats.

A group of Sandinista supporters attempted to rip the iron grating off the house of Trinidad Gonzalez of Jinotega. His house was flying a UNO banner.

In Jalapa, Sandinista youths or turbas attacked the houses of six UNO supporters. These families were forced to barricade themselves into the UNO headquarters in that city. In a separate attack, a group of turbas attacked the house of UNO activist Jorge Alberto Marin. During the attack, they tore down an iron gate, broke through a door and sprayed automatic rifle fire throughout the house. One of the attackers was wounded when Marin slashed his arm with a machete.—AFP March 2, 1990, La Prensa March 4, 1990, Washington Post, March 5, 1990.

March 3, 1990

Three MI-25 helicopters bombed the house of an UNO supporter, Trinidad Ubeda Gonzalez in the Ducuali neighborhood of Jinotega. Two minors were wounded and the family van, that was used for UNO rallies, was partially destroyed.—La Prensa March 4, 1990, Miami Herald March 8, 1990.

March 5, 1989

Yatama, a Miskito Indian organization, reported that on the Atlantic coast Cuban doctors have been left go. When those in the region, especially those who are not Sandinistas, have asked for medical aid or attempted to buy food from ENABAS, the Sandinista food distribution organization, they have been told, "You voted for Yatama and UNO, go ask them for help."

UNO has filed a protest with the Supreme Electoral Council (CSE) over the "annulment" of more than 90,000 votes for "irregularities." If the count stands the Sandinistas could gain one seat in the legislature.

President Ortega said the Sandinista armed forces "cannot be replaced by contras or Samoza's guard because this would be the signal for a national war against the mercenaries and the Somocistas."

Minister of Trade and Industry Luis Carrion warned that there would be "civil war, instability and chaos" if the Chamorro government attempted to break up the Sandinista army and police.

President-elect Chamorro said that there would be no jobs for the contras in her cabinet or in the Army.—Boston Globe Los Angeles Times, March 6, 1990, Latin American Monitor, March 7, 1990.

March 6, 1990

President Ortega announces a new press law that would allow the Sandinistas to set up a television station before they leave power. The law would also leave Nicaragua without press restrictions for the first time in over a decade.

[There are two television stations in Nicaragua, one of which was expropriated by the Sandinistas in 1979.]

Outgoing Managua mayor Carlos Carrion, a Sandinista, noted that repealing the media law would be in the Sandinistas interest now that they will be in the opposition.

La Prensa [Panama] eidtor Winston Robles said, "He's preparing to become a member of the opposition, and he doesn't want [Chamorro's government] to apply his own medicine."—Miami Herald, Los Angeles Times, Washington Post, March 7, 1990.

March 7, 1990

President-elect Chamorro charged that the Sandinistas have handed out 10,000 AK-47 assault rifles and pistols to its supporters in urban factories, factories and collective farms "in the name of self-defense during the post-revolutionary era." The charge was confirmed in two northern provinces and by witnesses in other areas of the country.

Luis Serrano, an Organization of American States officials monitoring events in post-election Nicaragua, said, "[E]veryone here is getting arms. It's incredible! It's a bomb that could explode at any moment."

In the Matagalpa region, two collective farms have received 2,500 assault rifles and residents of the area have been put into weekend training courses.

The Miami Herald and Los Angeles Times report that "hundreds" of Nicarguan soldiers have abandoned their posts since the victory of Violeta Chamorro on February 25. The desertions are most prevalent in the Nueva Segovia and Jinotega regions. This includes 100 of 120 soldiers in the 368th Brigade in Jinotega and 300 out of 800 draftees in the Omar Torrijos Battalion in Managua. The Sandinistas deny that they are allowing the desertions to take place in order to keep the army ideologically pure.

The Washington Times reported a series of post-election Sandinista intimidation actions:

Conception Salazar, a UNO activist in Titapa, reported receiving death threats from Sandinista supporters, including the outgoing mayor, since February 26, 1990.

Zacaria Vaya, a UNO poll-watcher, was placed under arrest for two days in retaliation for his role during the election.

Marisol Perez, 19, said her father was arrested and held for three days because of his role as an UNO activist. When Sandinista activist came for her father, they struck her aid in their escape.—Miami Herald, Los Angeles Times, Washington Times, March 8, 1990.

March 8, 1990

The Sandinista controlled National Assembly passed a new media law that would allow for greater press freedom and would allow the Sandinistas to set up their own television station, a right they denied the opposition while controlling the government.

The National Assembly also began work on a package of laws that would transfer

ownership of approximately 10,000 homes now owned by the state to their occupants, grant broad amnesty against future prosecution of crimes committed in the past decade and would offer extensive protection to civil servants.

According to the President of the Nicaraguan Bar Association, Roger Guevara, "This [the amnesty law] authorizes and pardons in advance the theft and decapitation of the goods of the state." The Nicaraguan Constitution prohibits the imposition of retroactive penalties. An UNO leader said, "the Sandinistas are giving themselves a hell of a send-off party."

Even before the debate, the government began to seize property. At 4 PM three armed soldiers arrived at a house in the Alta Gracisa district in Managua that had been rented by three divorced women since 1979. The house was taken over by the wife of an army captain and the locks were changed.

Opposition radio stations continued to air persistent reports that Sandinista public employees have been looting government offices, carting away office equipment, files and furniture.

Cuban President Fidel Castro announced that his country will stop sending Nicaragua military aid, 90,000 tons of petroleum and food that fed 50,000 a day on Nicaragua's Atlantic coast.—DPA, March 8, 1990, The Washington Post, The New York Times, Miami Herald March 9, 1990.

March 9, 1990

The UNO Political Council charged that FSLN leaders had taken to "passing state machinery, homes and property of all sorts to private hands."

UNO leader Guillermo Taboada noted that in several parts of the country cattle were being slaughtered to export beef. He also said that there were reports about "the disappearance of trucks" from the state Automobile Distributors Firm (Edina).—ACAN-EFE March 10, 1990.

March 13, 1990

The Sandinista controlled National Assembly passed an amended version of the amnesty law. The law extends from July 19, 1990 to the day the law is published.

La Prensa, the main opposition newspaper commented that "until it is published by the official journal of the government, it represents a veritable invitation to commit crimes. If it is not published until the end of April, Nicaragua could be plunged into a dangerous period of anarchy, since any crime could legally be committed."

One section of the law would provide amnesty to "government officials and public employees" who may be charged with misappropriation of funds or other economic crimes.—The New York Times March 12, 1990, Miami Herald March 14, 1990.

March 14, 1990

The Sandinista controlled National Assembly approved 69-0, with one abstention, an amendment to the civil service and administrative career law that would make it more difficult to remove government employees.

In a separate action the Assembly passed a law that would guarantee that legislators who leave the Assembly would receive benefits until January, 1991. The money be given out at the rate of "one month of salary for each year of service based on the latest salary figure."—Barricada March 14, 1990.

March 15, 1990

In the town of Camoapa, in the Boaco Department, an army lieutenant Joaquin Sandoval delivered a shipment of AK-47 assault rifles and ammunition to two neighborhood Sandinista leaders. The weapons were distributed to 22 people. Similar deliveries were made at the "Red Ranch" Peasant Development and in Las Lajas, Yalguas, Salinas and in other towns.

UNO leaders in Campona report that military commanders are offering salaries of 5 million cordobas and a government food package if they are willing to carry out operations against UNO supporters. They also report that Battalion 5-13 has stored 200 rifles, 45,000 rounds of ammunition, 60 cutlasses and various other military equipment.—La Prensa March 20, 1990.

March 16, 1990

In an interview with a French magazine Paris Match, outgoing President Ortega admitted that the Sandinistas are continuing to distribute arms throughout all regions of the country. Ortega also said that he would continue to live in his house which had been confiscated [as part of the property law]. On his position in the National Assembly said "I am a deputy by law but I do not think I will take my seat in the assembly."

Ortega said in the interview that he thought that President Chamorro should rule in association with the Interior and Defense ministries. [This position was changed when Ortega met with Quayle on March 15.]

Vice-President-elect Godoy confirmed that current oil reserves will last only through April 28. Godoy said that the Sandinistas had cancelled contracts with Exxon without consulting UNO and that during the first week after the election, $10 million dollars had left Nicaragua.

Godoy also noted that the government had been reexporting supplies of fertilizer [to Honduras to pay off debt] and food. He also commented on "looting" of state property, the destruction of documents, delays in appointing technical commissions, the disappearance of livestock from state farms and electrical problems throughout the country.

Citing confirmation by Colonel Salvatierra of the 6th Region, he also noted that 40,000 pistols and rifles had been distributed to private individuals since February 25.

Vasily Voinov, chief of the Soviet trade mission, told Barricada that the last scheduled Soviet oil and free food shipments to Nicaragua will come in March. The Soviets say that new aid must be requested.—Managua Radio Catolica, La Prensa, ACAN, Barricada March 16, 1990, Paris Match March 22, 1990.

March 20, 1990

Out-going President Ortega submitted a bill to the National Assembly seeking immunity for the current public officials, including the highest ranking members of the executive branch, National Assembly representatives, justices on the Supreme Court of Justice and Supreme Electoral Council judges. The president and vice-president would also receive a pension for life.

Sandinista Commander Jaime Wheelock confirmed that the Sandinista Army had been distributing arms to civilians after the Panama invasion. He made no mention that the Army had ever attempted to take the weapons back.—ACAN March 20, 1990, AFP March 21, 1990.

March 21, 1990

The National Assembly approves the amnesty law, submitted on March 20.—Radio Sandino March 21, 1990.

March 22, 1990

In an interview with a Caracas newspaper El Nacional, President Ortega warned that "a president who attempts to eliminate the army is exposed to a military coup."

The Soviet Union announced that the last free food was delivered to Nicaragua. The food, rice and wheat, was the last food the Soviets agreed to send under a five year food agreement. The last shipment of fuel oil will come this month and the last supplies of animal feed, food oil and machinery will be sent at a later date.—EFE March 22, 1990, Barricada March 27, 1990.

EXHIBIT 2 APPENDIX—MARCH 23 AGREEMENT BETWEEN THE RESISTANCE AND THE CHAMORRO GROUP

The agreement, signed at Toncontin Airfield in Honduras, consists of two sections. The first section states the position of the negotiators for the Resistance, and the second section states the position of the delegation representing President-elect Chamorro.

The first section states that the Resistance recognizes that the elections of February 25 have permitted the triumph of the will of the Nicaraguan people to establish a democratic process. The Resistance then declares that it wishes to "begin a process of general demobilization of our forces leading to start disarming those forces which remain in Honduras by April 20." For this purpose, the Resistance seeks the cooperation and help of international organizations such as ONUCA, CIAV, and Cardinal Obando y Bravo.

The Resistance then states that, at the same time, there should be an immediate cessation of military engagements in Nicaragua in order to proceed to the following:

(1) An effective cease-fire on both sides, verifiable by the international organizations (ONUCA and CIAV) and Cardinal Obando y Bravo.

(2) The concentration of their armed forces in Nicaragua in the security zones previously agreed upon, monitored by the same international organizations and the Cardinal, so that the process of demobilization will be effected in an atmosphere of security and order which will guarantee the enjoyment of a normal life and peaceful labor.

The second section states four points by the representatives of President-elect Chamorro.

(1) They take note of the decision of the Resistance to initiate the beginning of a process of demobilization on this date;

(2) As a gesture of proper recognition of the patriotic work of the Resistance, it is necessary to assist the wounded, orphans, and widows, innocent victims of the armed fight. Therefore, Violeta Chamorro commits herself to assure the rehabilitation and social-readaption of the affected parties. Furthermore, they will have the right to their appropriate monthly pensions.

(3) In order to execute everything agreed to in the accord, they agree to set up a special transition commission composed of members of the government and the Resistance, to be announced.

(4) The new government of President-elect Chamorro promises to seek humanitarian assistance for the members of the Resistance, as well as the medical infrastructure to provide proper attention to the victims of the conflict for as long as the de-mobilization lasts.

The document is signed by Cardinal Obando y Bravo, Antonio Lacayo, Emilio Alvarez Montalban, and Comandante Ruben.

AMENDMENT NO. 1467

(Purpose: Technical amendment to comply with the Budget Act)

AMENDMENT NO. 1468

(Purpose: Technical amendment to clarify committee jurisdiction)

AMENDMENT NO. 1469

(Purpose: To promote market economy and political democracy in Nicaragua)

AMENDMENT NO. 1470

(Purpose: To promote market economy and political democracy in Namibia)

Mr. PELL. Mr. President, I send four technical amendments to the desk, ask they be treated en bloc, and I ask for their immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Rhode Island [Mr. PELL] proposes amendments numbered 1467 and 1468, and for Mr. GRAMM proposes amendments numbered 1469 and 1470.

Mr. PELL. Mr. President, I ask unanimous consent that reading of the amendments be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendments are as follows:

AMENDMENT No. 1467

At the end of section 8, add the following new subsection:

"(c) COMPLIANCE WITH THE BUDGET ACT.—New credit authority provided in this section is to be effective only to such extent or in such amounts as is provided in advance in appropriation Acts.".

AMENDMENT No. 1468

Beginning on page 20, with line 20 strike all through the "(2)" on line 3 of page 21.

AMENDMENT No. 1469

Section 3 is amended by inserting immediately after subsection (a) the following subsection:

"( ) OBJECTIVES OF ASSISTANCE.—The assistance authorized by this section shall be used to encourage and assist the Government of Nicaragua in taking necessary steps to restructure government policy and administration in order to allow the proper functioning of a market economy and political democracy. Among these steps should be the formulation and execution of sound economic policies and improved public sector management, with special attention to such areas as fiscal policy, the financial sector, budget planning and implementation, privatization of public enterprise, trade policy, and regulatory policy.".

AMENDMENT No. 1470

Section 7(a) is amended by inserting immediately after paragraph (1) the following paragraph:

"( ) OBJECTIVES OF ASSISTANCE.—The assistance authorized by this subsection shall be used to encourage and assist the Government of Namibia in taking necessary steps to restructure government policy and administration in order to allow the proper functioning of a market economy and political democracy. Among these steps should be the formulation and execution of sound economic policies and improved public sector management, with special attention to such areas as fiscal policy, the financial sector, budget planning and implementation, privatization of public enterprise, trade policy, and regulatory policy.".

The PRESIDING OFFICER. If there be no further debate, the question is on agreeing to the amendments.

The amendments (Nos. 1467, 1468, 1469, and 1470) were agreed to.

Mr. HELMS. Mr. President, it is my understanding that the House Foreign Affairs Committee is considering adding its version of the supplemental for Panama and Nicaragua a great many additional items authorizing funding for fiscal year 1991.

In particular, among the items the committee is considering including is additional funding for Eastern Europe, the foreign aid bill for fiscal years 1990 and 1991 upon which the Senate has yet to act, greatly expanded funding for Africa, and funding for United Nations Fund for Population Activities programs in Romania. Is that the understanding of the distinguished chairman of the Foreign Relations Committee?

Mr. PELL. I understand that while the House Committee has not yet reported out its companion S. 2364, the scenario that the Senator describes is indeed a possibility.

As the Senator knows, the House has already passed the supplemental appropriations bill for aid to Nicaragua and Panama. If the authorizing committees desire to protect their roles in the process, we are going to have to act quickly to pass the authorization for Nicaragua and Panama.

Any attempt by the House to use the authorization bill as a vehicle for unrelated authorizations for fiscal year 1991 would greatly delay the process, effectively killing our chances of producing an authorization bill prior to passage of appropriations.

Mr. HELMS. I could not agree more with the distinguished chairman of the Foreign Relations Committee. Should we go to conference on S. 2364, or have such legislation returned with amendments by the House, would the chairman be willing to work with me to oppose any and all fiscal year 1991 authorizations the House may choose to attach to this legislation?

Mr. PELL. I would be pleased to work with the Senator from North Carolina in this regard, since the bill before us is limited to fiscal year 1990 supplemental authorization.

Mr. HELMS. I thank the Chairman.

AFRICA

Will the Chairman yield further for some questions on the Africa section of the bill before us?

Mr. PELL. Certainly.

Mr. HELMS. Specifically, $10 million for the new government in Namibia and $20 million to increase development assistance funding for Africa have much to recommend them. As the chairman pointed out, the administration has dipped into Africa funding to provide money for the initial Panama assistance bill enacted earlier this year. While this may have been a temporary necessity, does the chairman agree that some attempt should be made to restore funding?

Mr. PELL. I do, emphatically. I have serious concerns that development and economic needs in Africa may be shortchanged because of the administrations desires to move funds elsewhere in the world.

Mr. HELMS. I wonder if the chairman would agree with me further that this supplemental authorization should not be used to fund new and untried programs in Africa. Here I refer to attempts to fund South African political parties and movements with funds authorized in the pending legislation. A committee staff member reported to me after recently visiting South Africa that neither the United States Ambassador, Bill Swing, nor the Mission Director for the Agency for International Development, Dennis Barrett, believe United States Government funding of South African political parties and movements is desirable at this point in time.

Mr. PELL. Since I have not spoken with those gentleman, I am not prepared to take a position on these issues at this time. However, I believe the language in the Senate version on Africa is good, and I pledge to support the Senate position in conference.

Mr. ROTH. Mr. President, the Panamanian people have suffered greatly under the reign of General Noriega, and their economy has been left in a shambles. Removing Noriega from power has required significant sacrifice, both by American servicemen, some of whom made the ultimate sacrifice of their lives, and by the Panamanian people. Some Panamanians also died, but all suffered the effects of loss of freedom and democracy and the devastation brought on by the breakdown in the Panamanian economy.

But let us not forget that, for many years, Panama had an economy that was fed a daily diet of drug traffickers' money. Panamanians, both for and against Noriega, nurtured that economy which was structured around bank secrecy and paper corporations designed to attract illegal money. Panamanian President Endara has acknowledged that the boom in Panama's banking industry was a direct result of drug money.

I rise to sound a word of caution. Since 1988, when the Permanent Subcommittee on Investigations first held hearings which revealed the role of General Noriega and the Panama Defense Forces in money laundering and

drug trafficking in Panama, I have had a special interest in the issue of Panama and drug money laundering.

It would be a mistake to assume that with the removal of General Noriega, the potential for large-scale drug money laundering in Panama was also removed. What concerns me is that many of the laws and policies which made Panama such an attractive money laundering center are still in place. There has been only one minor change, regarding reporting requirements, in Panama banking laws which were used over more than 10 years to securely house drug traffickers' deposits.

Also disturbing was a New York Times article of February 6, 1990, headlined, "Panama Is Resisting U.S. Pressure To Alter 'Inadequate' Banking Laws." This article listed the current President, Second Vice President and Attorney General of Panama as having direct ties to prominent banks which have, in the past, been used to launder drug money. While I am aware of no evidence that these persons had any knowledge of the crimes which were taking place in those banks, I repeat that the problem of Panama as a money laundering center has not been solved by arresting General Noriega.

For this reason, I strongly endorse the provisions of S. 2364 which support changes by the Government of Panama to end the era of Panama as the money laundering haven of the Western Hemisphere. I cite specifically the provision which requires that the United States and Panama reach an agreement for exchanging adequate information and records on currency transactions, or certification that Panama is negotiating in good faith to reach such an agreement. I am also aware that negotiations are now ongoing between Panama and the United States, but I am not convinced that this indicates any progress is being made. The United States has been negotiating with Panama for years with no meaningful results. The fact of ongoing discussions has always been used to convince us that meaningful changes were forthcoming. Well, the time is now. We must insist on a Mutual Legal Assistance Treaty, signed, sealed, and delivered.

Panama faces a great challenge and a great opportunity. I am glad that the United States is able to be there, in some small way, for Panama at this critical juncture in its history. But we must not be foolish with our money. Our economic assistance must be used in rebuilding a legitimate economy, not one based on secret bank accounts and corporations. I urge the Panamanian Government to meet this challenge so that their people will never again be victims to the abuses of the past.

Mr. McCAIN. Mr. President, we have good reason today to be proud of the critical role that we as a nation have played in what could be called the great democratic awakening of recent months. Since our independence, we have served the world as the focus for aspiring democracies as an example for all nations seeking just government. In the last half of this century we continued our critical support for the cause of freedom, while globally confronting a formidable enemy whose power served a cause antithetical to ours.

Mr. President, the United States has good reason to be proud of the critical role we have played in what could be called the great democratic awakening of recent months. Since our independence, we have served the world as the focus for aspiring democracies—as an example for all nations seeking just government. In the last half of this century, we continued our critical support for the cause of freedom while globally confronting a formidable enemy whose power served a cause antithetical to ours.

Mr. President, now that we have peace, we have to make sure that our commitment to peace continues. We must help these countries attain the one essential ingredient to a free and open democracy, that is economic development.

Mr. President, the urgency of the situation in Panama and Nicaragua cannot be overstated. Neither can the importance to the United States of stability in those countries be overstated. The United States, of course, is concerned with the success and survival of democracy everywhere in the world. Our policies in support of that cause through successive Presidential administrations have always been global. But we must be mindful of our unique responsibility to the other Americas. Unlike the countries of Eastern Europe, who enjoy a close affinity and historical association with Western European nations, the countries of the Americas look primarily to the United States for assistance and cooperation in their political and economic development.

Although the stability and development of democracies in all parts of the world is the concern of the United States, it is in this hemisphere that the consequences of instability most directly affect our own society.

We have risked much for our cause and we mut take care that the global advance of liberty is not now hindered or reversed because the United States has reduced its commitment to that progress.

In recent years, one of the more disturbing costs of American foreign policy was the steady deterioration of a bipartisanship consensus on, if not the goals, then certainly the means of that policy. Appropriately, one of the most attractive opportunities provided by the stunning changes occurring in the world is the opportunity for the restoration of bipartisanship in the design and conduct of our foreign policy. For this Senator, a return to close cooperation and broad agreement on the role our country will play in the world is a most welcome prospect. And I sincerely hope that as Congress considers how the United States will consolidate the many successes of recent months, bipartisanship will be the norm and not the exception in our deliberations.

It is a source of great personal satisfaction, that on a question that involves the United States' role in Nicaragua I find myself in agreement with my good friend from Connecticut, Mr. DODD. Though, we have often disagreed over how best to serve democratic values in that troubled country, we are now in agreement that the United States will best serve our own values and interests by immediately and generously contributing to the repair of the devastated economies of Nicaragua and Panama. Our agreement encourages me that Congress will indeed return to the spirit of bipartisanship that has guided us at other critical moments in history.

Mr. President, in recent years, approximately 15 percent of the population of Nicaragua has sought refuge from political and economic turmoil in the United States. If we will assist their economy, many of those Nicaraguans will be able to return, easing an economic burden on the United States and providing a much needed infusion of enthusiasm and desire into Nicaraguan society.

The presence of so many refugees from turmoil and poverty in Latin America is a constant reminder of how important the political and economic development of our neighbors is to the well-being of the United States.

It is also a constant reminder of the close connection Americans feel to the populations of our neighboring countries. Of course, our affinity with Latin America is most keenly felt in that large and growing segment of our population—Hispanic Americans. Indeed, the Latin aspect of our national character grows stronger every year. And while all Americans share good will for Latin America, Hispanic Americans, understandably, are especially concerned that the blessings of democracy and free market economies are enjoyed in the lands of their fathers.

Let me add, Mr. President, this increasingly influential segment of our society will rightly hold their elected officials accountable for the depth of our commitment to hemispheric freedom and prosperity.

I know that some Senators would like to reduce our aid to Panama and Nicaragua in order to provide greater

assistance to the emerging democracies of Eastern Europe. Mr. President, I do not advocate ignoring our responsibilities in Europe or anywhere else in the world. But Eastern Europe enjoys the support and assistance of many countries. The G-24 countries have already pledged over $23 billion in assistance for Hungary and Poland alone, and they are now planning additional assistance for the rest of Eastern Europe. While the world hails the triumph of freedom in Eastern Europe with generous economic assistance, democracy in Central America is left at risk to the politically destabilizing effects of extreme poverty. In fact, the poorest economies in Eastern Europe have a per capita GNP of over $6,000. Panama has one-quarter that amount, and in Nicaragua the per capita GNP is roughly one-tenth that amount. In Nicaragua, the economic basket case of Latin America, the per capita GNP is now lower than Haiti.

Mr. President, Panama faces 30 percent unemployment. Social unrest is the consequence of widespread unemployment. Indeed, increasing instability is already evident in Panama. In Nicaragua, the Sandinistas are pinning their hopes for a return to power on Mrs. Chamorro's failure to improve the miserable poverty that afflicts her people. Certainly, failure to plant this year's crops will make economic progress nearly impossible to achieve this year.

Mr. President, the United States must endeavor to do all it can to see that the promise of freedom is fulfilled in these two countries. We have obligations and interests linked to the welfare of these people. Let us provide Panama with the startup capital it requires to restore its traditionally vigorous economy. Let us provide Nicaragua with the seed and fertilizer it desperately needs to begin its long struggle back from near total bankruptcy.

This is a golden opportunity to prove our commitment not only in war, but in peace to these two fledgling democracies. Let Panama and Nicaragua know we will neither neglect nor ignore the problems that afflict those unfortunate societies, that we want them to take part in the great experiment called the free enterprise system, to grow and prosper not only for themselves but for future generations of Latin Americans.

And, Mr. President, let us seize this opportunity to restore bipartisan unity to our efforts to promote democratic development in the world, and most especially in that corner of the world—Central America—whose economic and political survival depend on the support of all Americans. The prospect of democracy as the ascendant political force in mankind is a cause America has supported for a very long time. Let us come together at this critical time to ensure that progress toward that goal is irreversible—especially here in what humanity has always called the new world.

Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. PELL. How much time remains?

The PRESIDING OFFICER. The Senator controls 6 minutes 18 seconds.

Mr. PELL. I yield 5 minutes to the Senator from Connecticut.

The PRESIDING OFFICER. The Senator from Connecticut is recognized for 5 minutes.

Mr. DODD. Mr. President, I thank the chairman of the Foreign Relations Committee and also commend my colleague from Arizona for his statements and comments.

This is an historic day, Mr. President. We have been over an awful lot of ground over these last 9 or 10 years on this issue. I suppose some may have wondered during those moments if this kind of day would ever arrive. But, in fact, it has. I am delighted to be a part of this effort to authorize much needed assistance to both Nicaragua and to Panama.

Today, the Senate, Mr. President, is being asked to consider the provision of a substantial economic assistance program to two countries that have virtually been on the blacklist here for some time—in the case of Nicaragua, for nearly 10 years; and in the case of Panama, for 2 years.

What we are doing here today is more than simply voting on a $770 million emergency aid package for these two countries. What we are doing is turning the page with respect to our policies toward Panama and Nicaragua and beginning a new chapter in our relations with them and, hopefully, more cordial relations.

What is this economic assistance for? In the case of Panama, the $470 million in assistance is designed to—

Revitalize the private sector, by providing an infusion of funds into the Panamanian banking system;

Facilitate public investment in infrastructure and the social sectors, through budgetary support to the Government;

Reestablish Panama's eligibility to borrow from the international financial institutions by paying arrears, in cooperation with the Government of Panama and other donors;

Replace the corrupt Panamanian Defense Forces with a well-trained, civilian national police force;

Strengthen the managment and administrative capabilities of the government, including environmental protection and resource management capabilities; and

Facilitate improved cooperation between the United States and Panama in criminal matters, and particularly in the area of narcotics trafficking and money laundering.

Mr. President, if we are truly going to close one chapter in our relations with the Government of Panama and begin another then two fundamental issues must be effectively addressed: The first, the permanent demise of the Panamanian Defense Force. That means more than simply changing its name. It will require the creation of a police force, trained as police and equipped as police, with limited powers and under strick civilian control. The second issue pertains to the judicial system in Panama. This system has allowed money-laundering and other illegal activities to flourish without detection or prosecution; and the absence of an effective legal framework for international cooperation on criminal matters between the United States and Panama has internationalized the legal problem it has created domestically.

Both of these matters I believe have been addressed in the legislation before us today. But, these are problems that were a long time in the making and will require concerted effort by the Endara government to permanently resolve. The assistance we are considering today, in and of itself, is not going to correct these problems—only the Endara government and the people of Panama, with our help and encouragement can accomplish those goals.

In the case of Nicaragua, Mr. President, the $300 million in emergency assistance is designed to do the following:

Facilitate the importation of petroleum products, agricultural equipment, and spare parts;

Restore Nicaragua's eligibility to borrow from international financial institutions by paying arrears;

Participate in longer term economic growth and development needs through programs designed to improve infrastructure; assist in social sector programs, such as health and education; and provide technical assistance to the private sector;

Support the demobilization, repatriation and resettlement of Nicaraguan resistance fighters and their families by the United Nations and OAS, under conditions agreed to by the Central American Presidents, at Tela, Honduras, in August 1989, and in subsequent summit meetings;

Assist in the resettlement of Nicaraguan refugees and other displaced persons; and

Remove any remaining legal impediments to restoration of full economic relations with our country.

In the case of Nicaragua, beginning a new chapter will require that the remnants of our previous policies not be permitted to impede efforts by the newly elected government of Violeta Chamorro to achieve national reconciliation, so that she can get on with

the business of restoring that war ravaged economy. This will require that, from this moment on, all United States assistance provided for the demobilization and repatriation of Nicaraguan resistance fighters be channeled through the organs established by the five Central American Presidents, as part of the Central America peace process; namely, the U.N. sponsored Observer Group for Central America [ONUCA] and the International Commission of Support and Verification [CIAV].

I know that foreign aid is never popular. This is particularly the case at a time when we face severe budgetary constraints at home. But I believe we have an obligation to make sure that the promise of democracy in these countries has a fighting chance to take root and flourish. That is not going to happen if people find themselves no better off tomorrow under the new governments, than they were yesterday under previous ones.

With respect to Panama, we made it clear at the outset that the actions which we were taking against the Noriega regime were not intended to do harm to the Panamanian people. Unfortunately, it was not within our power when applying economic sanctions to target them solely against Noriega and his cronies. An infusion of funds now, to get what had once been a vibrant economy back on track, is really all that is needed to rectify the damage.

I believe it would be the ultimate irony, if we were to deny assistance to the newly elected Government of Nicaragua on budgetary grounds at the very time it faces the daunting task of rebuilding its war torn economy. Certainly we never seemed to have any trouble over the past decade finding the cash to fuel the armed conflict in that country.

Many innocent people in both Nicaragua and Panama have suffered as a result of our policies. We have a duty and responsibility to assist in efforts to turn the tide on economic hardship and suffering. We have a duty and responsibility to support democracy with more than words and resolutions. The bill before us today is a concrete way to fulfill our obligations and demonstrate our support for democracy. Therefore, I urge my colleagues to support passage of this very important legislation.

Mr. President, I ask unanimous consent that I be allowed to proceed for 1 additional minute.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DODD. Mr. President, I ask unanimous consent to have printed in the RECORD the declaration of Montelimar, which was entered into the other day by the five Central American Presidents which Mrs. Chamorro attended and offered her support.

There being no objection, the declaration was ordered to be printed in the RECORD, as follows:

DECLARATION OF MONTELIMAR

The Presidents of Costa Rica, El Salvador, Guatemala, Honduras and Nicaragua, gathered at Montelimar, Republic of Nicaragua, on the second and third days of April of 1990:

Taking into account the contents of the various documents and declarations of the Esquipulas peace process, which constitutes a unique and indivisible whole, and motivated by the same patriotic and Central American spirit that has made it possible for dialogue and negotiations among the Central American governors to be an historical and decisive contribution for regional peace,

AGREE

1. To affirm unequivocally each and every commitment made during the Esquipulas process and to renew the decision to comply with the agreed upon accords fully.

2. To express their satisfaction for the advances obtained for consolidating democracy in the region through clean and honest electoral processes, which are proof of the efficacy and fulfillment of the political commitments undertaken in the Esquipulas framework.

3. To declare their satisfaction with the successful culmination of the electoral process in the Republic of Nicaragua on February 25 of this year, given that those elections were conducted in conditions of complete freedom and honesty, as attested by numerous international observers;

To commend the guarantees presented by the Government of Nicaragua in fulfillment of the political commitments undertaken at the different stages of the Esquipulas process and to express satisfaction with the agreements reached by the Transition Teams of the present Government and the Government-elect, to which they give their moral support as a mark of respect for the sovereign decisions agreed upon among Nicaraguans;

In virtue of which, the Presidents of Costa Rica, El Salvador, Guatemala and Honduras express to the President of Nicaragua, Daniel Ortega Saavedra, their recognition of his promoting and strengthening the process toward consolidation of representative and pluralist democracy in his country.

4. To ratify their commitment to continue promoting respect for human rights, including the strengthening and perfecting of their democratic systems, fully guaranteeing participation of all citizens in the political life of their countries, independence and impartiality of the judicial power and respect for civil, political, economic, social and cultural rights.

5. To emphasize again the need for immediate demobilization of the Nicaraguan Resistance subscirbed to at the Tele Summit on August 7, 1989 and in the Toncontin Agreement signed in Honduras on March 23, 1990, and to express their satisfaction for the goodwill demonstrated by the parties involved in carrying out that objective.

The Presidents of Costa Rica, El Salvador, Guatemala and Honduras applaud the immediate support tht the Government of Nicaragua gave that Agreement, to which they also give their complete support so that peace will be reestablished in the country and a transfer of power will be achieved with absolute normality.

To support the Protocol of Procedure for the transfer of the Presidential Mandate of the Republic of Nicaragua and to request the United Nations Observers Group for Central America (ONUCA) and the International Commission of Support and Verification (CIAV) to take the necessary steps to guarantee opportune support for the demobilization and disarmament of the members of the Resistance inside or outside Nicaragua, which should begin immediately and conclude by this coming April 25 at the latest.

The arms that ONUCA will receive should be destroyed on site in the presence of representatives of other Central American governments invited for the purpose by the corresponding Government.

To call upon the Government of the United States of America to continue supporting and contributing to the demobilization of the Nicaraguan Resistance and to channel funds approved for these forces to the International Commission of Support and Verification (CIAV) to use for the reintegration of the exmembers of the Nicaraguan Resistance who deliver their arms to the Group of Observers of the United Nations (ONUCA) into the normal life of the country, and of their families.

To express gratitude and recognition of the valuable cooperation of the Government of Honduras for the demobilization of the Nicaraguan Resistance.

6. To express gratitude to the Secretary General of the United Nations and the Secretary General of the Organization of American States for their continuous efforts in support of the Esquipulas process, as well as repeating support for the work of DNUCA and CIAV.

7. To reaffirm the importance to the consolidation of democracy of the incorporation of the irregular forces into political life in the framework of the provisions of the Esquipulas Accords. In this regard, they declare their satisfaction with the imminent reinitiation of the dialogue between the Government of El Salvador and the FMLN and for the agreements reached in Oslo between the National Commission of Reconciliation of Guatemala and the URNG. Similarly, the Central American countries offer themselves as sites for meetings for these purposes.

8. To condemn acts of terrorism in the region and to repeat the call to end all kinds of violent acts that directly or indirectly harm the civilian population or the productive infrastructure and to demand immediate release of all individuals who have been sequestered and are under the power of irregular forces or terrorist groups.

9. In accordance with point 7 of the Esquipulas II Accords and in view of the advance in the processes of National reconciliation, consolidation and perfecting Democracy, they have decided that it is now time to promote and schedule pending negotiations with regard to security, verification, control and limitation of armaments. Therefore, they call on the Security Commission to meet in Costa Rica on May 15.

10. That the consolidation of democracy, once obstacles to peace are overcome, demands decisive confrontation with the economic challenge and therefore they have decided that the next summit should fundamentally analyze:

a. The restructuring, strengthening and reactivation of regional economic integration;

b. Evolution toward a regional integrative productive system;

c. Reconsideration of the problem of the external debt;

d. A better distribution of the social costs of necessary economic adjustments.

To support national programs of necessary economic adjustment to face the serious economic and social situation of the area, on whose solution depends the stability of the countries of the region.

In this respect, they call on the International Community to reenforce, consolidate and amplify economic support for the regions, in ways such as the Luxembourg Accord, direct cooperation and the Joint Plan of Cooperation for Central America. In this context they reiterate the urgent need to supply Central America with additional financial resources under favorable conditions.

To recognize the need to strengthen the activities of the public and private, national and international organizations that aid in overcoming the political obstacles to the solution of social problems and to the promotion of the economic development of the region. In this respect, they express their pleasure because of the offers presented by the Governments of Canada and Japan to contribute to these tasks.

To express their conviction that in this new stage, the integration of the People and Government of Panama is fundamental to the efforts made toward strengthening and perfecting democratic and pluralist regimes committed to economic and social development of their people. With the firm purpose of materializing this concept and supporting its efforts to normalize political life, within the strictest respect to International Legal Order and, in particular, to the norms of coexistence among sovereign states, we have decided to invite the Government of Panama fraternally to take an active part in the processes of dialogue, negotiation and cooperation that the Central American governments carry out on these matters.

To manifest their satisfaction for the advances reached in carrying out the special Plan of Economic Cooperation for Central America (PEC) as a valuable instrument of the Peace Plan and to exhort the contracting of commitments to finance projects in the framework of the sectional meetings sponsored by the United Nations Program for Development (PNUD). To underscore the importance of that mechanism's continuing with budgetary support within the United Nations Program for Development (PNUD).

To take grateful advantage of the proposal formulated by the Governments of Colombia, Mexico and Venezuela in respect to lending their cooperation for the development and strengthening of National Centers established in the Central American countries so they can have regional effect and significance in the areas of education, health, agriculture and energy, as well as recognizing their contribution toward peace in Central America.

11. To express profound satisfaction for the process of ratification of the Protocol for the Constitutive Treaty of the Central American Parliament permitting establishment of that Parliament, thereby beginning a new stage in the process of Central American integration.

12. To subscribe to the Accord of Regional Cooperation for the Eradication of Illegal Traffic of Drugs, as an expression of determined political desire to collaborate closely in uniting forces to prevent and confront the dangers that derive from the illicit traffic. They particulary emphasize the importance of regional and international cooperation and of the adoption of laws that will permit eradication of drug traffic.

13. To declare their satisfaction with the work of the Central American Commission on Environment and Development and to reaffirm support for its continuation and evaluation of the necessity and appropriateness of looking for financial sources and innovative mechanisms to promote its programs and projects. In this respect they agree to discuss the subject of debt conversion for environment at the next Summit.

14. To support carrying out programs of development for displaced populations, refugees and repatriated persons in Central America, requesting the International Community to maintain and amplify support for commitments already made so as not to put off their implementation, and to express support for the first international meeting of the Committee of Supervision of the International Conference on Central American Refugees (CIREFCA), which will be celebrated soon at the United Nations headquarters.

15. To reaffirm that the health of Central American people is a political priority that implies maintenance and deepening of joint health endeavors, conceived as a bridge to peace and understanding among the peoples of the area. For these purposes, they have decided to orient their Health Ministers to evaluate immediately the achievements of the last five years of the Plan of Health Priorities (PPSCAP) and to elaborate a new health initiative for Central America. For that purpose, they request the collaboration of the Pan American Health Organization and the World Health Organization (OPS/OMS), among others.

16. They have decided to meet in the second trimester of the present year in the anticipated Regular Meeting to be held in the Republican of Guatemala.

17. The Presidents of Costa Rica, El Salvador, Guatemala and Honduras wish to commend the fraternal hospitality of the People and Government of Nicaragua that contributed decisively to creating a frank and constructive atmosphere that permits looking forward to the determined continuation of the Central American endeavors for peace.

Signed in Montelimar, Republic of Nicaragua, on the third day of April of one thousand nine hundred ninety.

Oscar Arias Sanchez, President of the Republic of Costa Rica; Vinicio Cerezo Arevalo, President of the Republic of Guatemala; Alfredo Cristiani Burkard, President of the Republic of El Salvador; Rafael Leonardo Callejas, President of the Republic of Honduras; Daniel Ortega Saavedra, President of the Republic of Nicaragua.

Mr. DODD. Lastly, I say I to my friend from Arizona, who I think made an excellent point, this aid package is good and is needed. But what is really needed is trade improvement so that we do not have these barriers that exist to debt relief, and foreign investment in these countries.

Aid will provide some infrastructure assistance, but long-term economic growth in Central America will require that we change the way we have been doing things with regard to trade and debt and foreign investment. That is really going to offer these countries a future. Foreign aid helps, but it really is not the ultimate answer.

I could not agree with him more about Central Europe. We certainly want to be helpful, but my colleagues should have no doubt whatsoever about the ability of Central Europe to get on its feet economically. The European countries are going to pour in assistance there. You cannot get a hotel room in Prague or Budapest today because of the people over there that are doing business.

They are announcing at least 10 joint ventures in East Germany a day. I think that is wonderful. Unfortunately, the European Community has also announced that is going to be pulling back on its financial commitment in Latin America. Europe will celebrate 1992 by entering into a single market. In 1992 we will celebrate the 500th anniversary of America.

Let us make no less a commitment in our hemisphere to see that these wartorn countries that have been denied opportunity for a democratic future have the blessing and support of the American people.

What we are doing today is beginning that process. I hope we pass this legislation on a unanimous vote, Mr. President. That is the kind of signal that our colleagues and our friends in Latin America need and deserve.

I urge the adoption of this resolution.

The PRESIDING OFFICER. The time of the Senator has expired. Who yields time?

Mr. McCAIN. Mr. President, I yield however much time the Senator may use to the Senator from Wisconsin [Mr. KASTEN].

The PRESIDING OFFICER. The Senator from Wisconsin [Mr. KASTEN] is recognized for up to 3 minutes, 31 seconds.

Mr. KASTEN. I thank the Chair. I simply want to join with my colleagues in support of this legislation and make a number of observations.

First of all, I think it is very significant that this legislation will pass with unanimous support. I do not know when was the last time we have had either an appropriation or an authorization with regard to Central America on which we have had unanimous bipartisan support. That support is bicameral as well.

The House of Representatives in the last few days passed not only the authorization bill, which this is, but they also passed the appropriations bill. They passed that appropriations bill by an overwhelming vote, and they passed the authorization as well.

Mr. President, we should be doing the same. It is not enough simply to pass the authorization bill tonight. We should be staying here, not going on vacation, and we should be doing the same so that the dollars would be in Central America: the $500 million for Panama, the $300 million for Nicaragua, and the other important money that is requested.

The vote in the House of Representatives on the appropriations measure was only 59 votes against, 362 votes in favor; an overwhelming vote for the appropriations.

We, because of a number of difficulties, are unable now to pass the appropriations bill. We are going to go another couple of weeks while we are on vacation and then come back.

Mr. President, when we come back we cannot afford to get into a long, drawn-out partisan wrangle on where this money is going to go. There is clear bipartisan support for the dollars going to Central America.

Yes, we can deal with Europe, and we must deal with the developing democracies in Eastern Europe, but as my friends from Connecticut and Arizona have both pointed out, the European Community is also working in Eastern Europe and they have responsibilities there.

Our first responsibility is to our hemisphere, and in this hemisphere we are going to be going almost alone. Yes, we are hoping for some help from the Japanese and from some others, but our primary responsibilities are here.

As ranking member of the Foreign Operations Subcommittee, I am going to work to pass this legislation quickly—I know we have strong support on the committee to pass this legislation quickly—that will in fact send the money to Central America, where it is needed.

It is a tragedy that we are going out on vacation today and not working tonight or tomorrow in order to pass the appropriations bill as well, as did the House of Representatives. But when we come back, we will have to act quickly and with dispatch and pass that emergency supplemental appropriations bill which contains this important money.

I thank the Chair.

The PRESIDING OFFICER. Who seeks recognition?

Mr. PELL. How much time remains?

The PRESIDING OFFICER. The Senator controls 26 seconds.

Mr. PELL. How much remains for the minority?

The PRESIDING OFFICER. It happens that the minority controls 26 seconds as well. The Senator's side is now down to 13 seconds.

Mr. McCAIN addressed the Chair.

The PRESIDING OFFICER. The Chair recognizes the Senator from Arizona for up to 26 seconds.

Mr. McCAIN. I thank my friend from Wisconsin. I think his words are very important, particularly on the absolute urgency of finishing this process by enacting the appropriations bill.

I also thank my friend from Connecticut for his continued commitment to this effort to aid both Nicaragua and Panama.

I yield back my remaining seconds.

Mr. PELL. I yield back the remainder of my time.

Mr. CHAFEE. Mr. President, while we have seen dramatic change in Eastern Europe, we have also witnessed extraordinary democratic revolutions in our own hemisphere. The Panamanian people, once again, have a duly elected government led by President Endara; and former dictator Noriega is in United States custody under trial for drug trafficking.

Let us look at Nicaragua. In Nicaragua, the Nicaraguan people, in free and fair elections, chose UNO candidate Violetta Chamorro to be their President. This historic election has put an end to the suppressive Sandinista rule and demonstrates the desire of the Nicaraguan people for democracy.

It is my fervent hope, and I believe the fervent hope of this entire Senate and indeed of our Nation, that this transition to democracy in our own hemisphere will go smoothly. However, we are presented with new responsibilities and challenges. Both Panama and Nicaragua must establish and strengthen democratic institutions and work toward economic recovery. I think that is the real problem that is facing those nations. Their economies are in chaos. How should the United States respond? How can we best help these two fledgling democracies?

I strongly believe that the Senate should approve this authorization for assistance as soon as possible. These nations for years have undergone strife and oppression that have resulted in human losses and destruction of homes and property. We must act to address these problems. This is a matter of the utmost urgency.

What exactly does this bill do?

First, we must bear in mind that the overall objective of this assistance is to promote democracy and free-market economies in these nations.

The bill provides $470 million in economic support funds for Panama. This assistance will help the Panamanian people in many ways:

How? All right.

It will encourage private and public investment in that nation; up to $130 million is provided in relief of international debts; it will strengthen the administrative and management capabilities of the government; and it will promote environmental protection.

What about Nicaragua?

Nicaragua will receive $300 million in assistance. The main objective in that country is to restore productivity in the economy of Nicaragua and to promote long-term economic recovery. Furthermore, the $300 million or portions of it will provide funds for the demobilization and demilitarization of the Contras and for the repatriation of displaced refugees.

Mr. President, it is absolutely critical that the Senate rapidly approve this bill and appropriate the necessary funds. I might point out that the appropriation is necessary. That is going to follow on. Let us get the authorization done and rapidly move to the appropriation. The United States played a vital role in the promotion of democratic change in these two countries. The President's military initiative clearly accomplished the goals in Panama of capturing Noriega and restoring democracy. In Nicaragua, the bipartisan accord on Central America, which was worked out by the Congress and the administration, contributed to the free and fair elections which Mrs. Chamorro won so decisively.

We had bipartisanship in that area and it has demonstrated its effectiveness in implementing sound and effective policy. I urge my colleagues to move forward in this same spirit and to vote for this aid that is so desperately needed in those countries.

Mr. SANFORD. Mr. President, I rise in support of this measure which provides urgently needed assistance to Nicaragua and Panama. I also wish to congratulate the majority leader on his remarks earlier this week. He is absolutely right. We need strategic planning in the expenditure of both our foreign aid and defense dollars. I believe that we need to sit down, define exactly what our foreign policy and national security goals are, and determine how we can best achieve those goals with the tools that are available to us. Those tools include not only defense and foreign aid, but trade policy, multilateral lending, and export financing.

I strongly support the Nicaraguan aid package because it is the result of strategic planning. In 1987, the International Commission on Central American Recovery and Development set out to draw a blueprint for economic development in Central America. The Commission was unique because it consisted primarily of Central Americans, with help from representatives of other donor countries and international organizations. There were four Nicaraguan members, two with ties to the Sandanista government and two affiliated with what was then the opposition. One of those commissioners, Francisco Mayorga, is now the chief economic adviser to President-elect Chamorro. Mr. Mayorga recently spent time in Washington working with AID, the State Department, and others to develop this proposal.

The bill before us is based largely upon, and is entirely consistent with, the Commission's report. It provides urgently needed assistance for refugees, including the internally displaced. It provides support for agricultural products, petroleum, and equipment needed to plant crops for this year's season. It provides debt relief

and money for schools, medical care, and roads. It grants OPIC the authority to operate in and confers CBI benefits on Nicaragua. It anticipates the future, and is a more regional approach to Central America's economic development. It's a solid, thoughtful program, and one that deserves our support.

Many of us have taken the position that the root causes of the problems in Central America are economic and social, rather than military, in nature. I for one, believe that is true. In order to break the vicious cycle of conflict we must strive to eliminate its causes—poverty and inequality. Of course we can't fix all of Nicaragua's problems with this aid package, but it's a start, and a good one.

I urge your support for this bill.

Mr. GRAHAM. Mr. President, I strongly support the action which the Senate and the House will now take in contributing to the completion of our national responsibilities and challenges in Central America and Panama.

We have fought a long decade to try to move Nicaragua and Panama from a totalitarian state, a state which denied basic human rights into one that adopted a democratic process for the selection of political leadership and the protection of human values.

In Panama, a similar pattern of U.S. involvement has taken place throughout the decade of the 1980's. It is, therefore, with great pleasure that the citizens of this country can see the results of their long effort in the democratization of these two countries.

I believe the step we will take now in extending a hand of support to the economic revitalization of these countries is not only appropriate in the context of our long commitment, but also very much necessary. Unlike Central Europe, there is going to be no other significant democracy participating in the economic revitalization of Central America, other than the United States of America. This is an area of special concern to us and special historical economic and cultural interest. The step that we take today is in that history, that tradition of a long-sustained U.S. interest.

I also comment, Mr. President, that one of the most positive aspects of this program is its focus on the private sector. I met yesterday with a group of journalists from Chile, Argentina, Brazil, and Uruguay. They asked about the Alliance for Progress and what the alliance would have been like, had it still been in effect today. They commented as to the fact that they did not necessarily feel it would have been advantageous to Latin America for the alliance to still be in existence today, because during its period in the early sixties, it was primarily focused on government-to-government aid programs, the development of large-scale, generally public-sector-managed projects.

I commented that I felt, first, that the Alliance for Progress was essentially a statement of the United States' recognition of the common destiny of the persons who happen to share the Western Hemisphere; that the particular projects that it implemented in the early sixties were a statement of the then philosophy of what was appropriate developmental policy by an industrialized country to aid an emerging country.

I held that if the Alliance for Progress had a continuous existence, it also would have had a maturation process, and part of that would have been by today a greater recognition of the importance of the private sector of the entrepreneurial spirit and a similar commitment in our efforts through a continued Alliance for Progress to that end.

Although the alliance has not continued, I would offer the proposal that we have before us today as an example of that maturing of American attitude, maturing of American appreciation of what constitutes appropriate development policy in the last decade of the 20th century.

The heavy emphasis on private sector rejuvenation, aid to agriculture, to industrial development, assistance in rebuilding an infrastructure upon which any market-based economy must depend are extemely important elements of this legislation and indicates that the United States is not prepared to assist in a more contemporary, a more private sector entrepreneurial-oriented aid program.

Finally, I would hope that this action today will be seen as part of a larger pattern. The United States throughout its history has seen Latin America in a very episodic manner. When there was a crisis we would send in the marines or other appropriate Armed Forces to deal with that crisis. Once we felt the crisis had been resolved we would leave the scene. The fundamental social, political, economic, and cultural issues that caused the crisis in the first place largely went unattended.

We now are excited about the developments around the world with particular attention to the developments in Central Europe. I suggest that the revolution that is occurring in Latin America deserves an equal amount of enthusiastic interest from the United States.

It was only a few years ago that there were only four democracies in all of Latin America. Today, all of Latin America is a democracy, except for two, Cuba and Haiti. Those are now the holdouts in a whole continent as well as the Caribbean of emerging democracies. We should take pride in that fact.

We should also understand that we are going to have a continuing opportunity to see that those democracies are stable and growing and give to their people the benefits of liberty, freedom, and justice and that they are supported by economies that give to their people a sense of hope in a future of greater prosperity. It is in that area that the United States will not finish its task by any means even in the countries of Nicaragua and Panama by what we do today, but rather this will be part of a longer and sustained involvement of the United States in the political and economic development of Latin America.

I believe that what our generation of Americans, Americans from Canada through Argentina, should be focusing on is what do we believe our common relationship should be over the next quarter century? I believe that common relationship should be one of respect, of national identity but also recognition of some important regional issues.

We must work together with the tremendous problem of drug trafficking being just one of the items on that agenda and the opportunities that we will have more closer economic cooperation. Those I believe should be our goals for a quarter of a century. And the question today is what can we do now to contribute to the realization of those goals in the year 2015.

The step that we take today is a contribution toward the realization of those goals in the next century.

I extend my appreciation to those who have brought us to the point that we can adopt this measure speedily as a statement of the importance that we place on these two countries, the importance which we place on a new relationship with the citizens of those two countries, the support that we give to the governments and their leaders who are now directing Panama and Nicaragua toward a new course, and the recognition that this is a step in a long walk toward fulfillment of the potential that exists in these lands that we call the Americas.

Mr. DURENBERGER. Mr. President, I rise to offer my strong support for this supplemental funding measure that will provide much needed assistance to Nicaragua and Panama as well as other recipients. I believe United States interests are extremely well served by our efforts to promote democracy and stability in our own hemisphere.

Recent events in Nicaragua and Panama represent the culmination of an important and difficult phase in United States relations with the region. The United States now has the opportunity to move vigorously to begin consolidating these developments as we enter into a new phase in our relations. This aid package is good

start in our efforts to assist Nicaragua and Panama in establishing democratic societies and rebuilding damaged economies.

Longstanding United States objectives in the region, as elsewhere around the world, have been to foster democracy, to free nations from tyranny, and to promote the creation of an environment in which the people can choose for themselves the form of government and the leaders they wish to have. In Nicaragua and Panama, we are beginning to see the results for which we have hoped and worked.

Reasonable debate will continue on the wisdom of specific past United States policies in the region. People will also continue to debate whether United States policies had any positive impact at all in bringing about the dramatic and encouraging events there, especially the holding of fair elections in Nicaragua and the stunning victory of the democratic forces.

Mr. President, let me suggest that while this debate will no doubt persist for years to come, a definitive resolution of the debate really is not necessary at this point. The facts on the ground remain the same: democracy and pluralism in Nicaragrua and Panama now have a chance to grow and establish strong, deep roots. The United States has a profound interest in promoting these developments. We have a opportunity not to do just that.

This aid package is just the beginning of the new phase in the region. But it is an important beginning, one that deserves the full support of the Congress and the American people.

If the United States is indeed serious about promoting and strengthening democracy, if we have really meant what we have been saying for all these years, we have a deep obligation to provide concrete assistance to these countries. Not only is it our obligation to follow through assertively to the next phase in United States toward the region, but it serves our best long-term interest as well.

If democracy and pluralism take hold in Nicaragua and Panama, everyone benefits. The people of those countries will have the opportunity to live in peace, to choose their own leaders, to advocate whatever policies they wish. In short, Mr. President, they will experience the challenges and fruits of self-determination.

The United States benefits from stable, peaceful, and hopefully prosperous countries in our own hemisphere, our own backyard. This is crucially important. Stable democracies tend not to go to war with each other. They tend not promote instability among their neighbors. They also tend to provide good markets for U.S. products as well as good sources of U.S. imports.

Mr. President, there has also been some debate regarding priorities for United States foreign assistance money. Should we provide more money to eastern Europe or more to Central America? This is how one of the arguments have been framed. I want to make clear that I do not accept the premise of this argument. It is not a zero-sum game. A gain for Central America does not translate to a loss for Eastern Europe.

The United States has a strong, solid program for assisting the emerging democracies in Eastern Europe. There are legitimate concerns regarding the amount of money that these countries can reasonably and efficiently absorb.

What is clear to me, however, is that there is a dire need in Nicaragua and Panama for the assistance contemplated in this measure. Without question, there is also the ability to absorb the assistance.

At this point, it appears to me that the United States can in fact provide meaningful and desperately needed assistance to both regions—Central America and Eastern Europe. We are not forced to make a black and white, up or down choice on this aid. We can assist the countries in question in both regions.

They need this assistance. We can provide it. All sides will benefit from the programs. And I strongly urge my colleagues to support this measure to provide substantial and badly needed assistance to Nicaragua and Panama.

Thank you, Mr. President. I yield the floor.

Mr. PELL. Mr. President, yesterday the distinguished Senator from Rhode Island [Mr. CHAFEE] raised questions with regard to section 8 of S. 2364.

Section 8 establishes a housing guaranty program for new immigrants to Israel. Senator CHAFEE raised several questions, which I answered. Unfortunately, with regard to a question about restrictions that would pertain, I did not give him a very complete answer, and, because of an error, the matter is not at all clear in the RECORD. Accordingly, I would like to ask now if the Senator would like to restate his question.

Mr. CHAFEE. I would be pleased to do so. Am I correct that the Agency for International Development policies would ensure that the $400 million in housing guaranty money which would be authorized by this bill could not be spent with regard to housing on the West Bank or in Gaza?

Mr. PELL. Yes. The Senator is correct. The bill specifically states that, "such guaranties shall be issued only in conformity with AID policies governing assistance to Israel in effect on the date of enactment of this Act." It has been the policy of successive Administrations, and, by extension, the Agency for International Development, that United States assistance would only be available for expenditures within Israel as it existed before the June 1967 war.

Mr. CHAFEE. I thank my Rhode Island colleague, the chairman of the Committee on Foreign Relations, for this clarification.

Mr. PELL. I thank my distinguished colleague for his forbearance as we have endeavored to respond correctly and completely to his inquiry.

Mr. BIDEN. Mr. President, it was my intention to offer an amendment to the bill currently before us.

The amendment I would have offered was very simple: It would have authorized $125 million in economic assistance for the three coca-producing countries of South America—Bolivia, Colombia, and Peru—during fiscal year 1990.

I make this proposal because I believe a great opportunity lies before us in the Andes, an opportunity that may be wasted if we do not provide immediate help to the Andean countries.

One need only examine the events of the past 7 months to see that this is true. Last August, following the tragic death of Senator Galan, Colombia launched a total war on the drug cartels—extraditing leading members of the Medillin cartel, seizing millions in assets of drug barons, destroying hundreds of processing labs. Rodriguez Gacha, one of the most notorious leaders of the cartels, was killed.

In Bolivia, the new government of Jaime Paz Zamora increased its suppression of drug traffickers, showing a dedication to the antidrug effort not seen before in that country.

Finally, the Presidents of each of the three coca-producing nations met in a historic summit with President Bush in February, beginning a new partnership against the blight that affects the entire Western Hemisphere.

This confluence of events, and the new commitment on the part of all nations involved to fight cocaine cultivation, have helped bring about a remarkable occurrence: the price of the coca leaf—the raw material for cocaine—has plummeted in the Andes.

In Bolivia, for example, the price of a 100-pound bag of coca, which a year ago sold for $70, now sells for $5–$10 a bag. Since the break-even point is $30, Coca farmers are suffering huge losses. As a result, farmers are getting out of the business, in record numbers.

In the first 2 months of this year, 1,639 hectares of coca in Bolivia have been eradicated, compared to 2,504 hectares for all of last year. To repeat—65 percent of the total for 1989 has already been eradicated, in just 2 months' time. At this pace, Bolivia will easily surpass its eradication target of 6,000 hectares.

Farmers in the Chapare Region of Bolivia are lining up to join Government buyout and crop substitution programs.

All of these events, I need not remind my colleagues, are unprecedented. Never before has the price of the coca leaf stayed this low for this long. Never before has Bolivia eradicated fields of coca at such a rapid pace. And never before have we had such a phenomenal opportunity to help the Andean countries move their citizens out of the coca trade.

These facts were attested by Samuel Doria Medina, a senior economic advisor to the President of Bolivia, in testimony before the Judiciary Committee last month. The dramatic decline in the price of the coca leaf has also been confirmed by U.S. officials.

In spite of this evidence, the administration clings to its plan to delay new economic assistance for the Andean countries until fiscal 1991. In my view, the administration's position at this critical moment is fundamentally flawed and tremendously short-sighted.

The drop in coca prices gives the Andean nations—and the United States—a small window of opportunity to convince farmers in the coca-growing regions to switch to legal alternatives. But the window will slam shut in a matter of months. If alternative means of employment are not available, farmers will become quickly disillusioned and return to their coca fields or, as some have suggested, move up the chain and become involved in processing coca paste.

Moreover, despite continued enforcement measures, it seems likely that the disruption of trafficking—and the resulting low prices for coca leaf—will not last forever. Chances are good, I believe, that the prices for the leaf will rise again by the end of this year.

When that happens, I can guarantee that there will be an increase in coca farmers, an increase in hectares under production, and an increase of cocaine on the streets of this country.

Mr. President, we must act now to prevent this from happening. We are all aware of the devastating drug problem facing our country. But, despite dramatic increases in our anti-drug efforts, cocaine, heroin and marijuana continue to flow into this country at alarming rates.

We cannot allow the opportunity that lies before us to slip from our grasp. The drop in the price of the coca leaf gives us a chance, however small, to make a real dent in the cultivation of coca in South America. And because the cartels in Colombia are on the defensive, we may be able to severely disrupt the flow of cocaine into the United States.

Mr. President, time is of the essence. The nations of the Andes desperately need our help. Their economies have become addicted to dollars generated by coca profits. If the drug profits are reduced, economic disruption and recession could result.

Unfortunately, there is little U.S. assistance in the pipeline. We have appropriated just $56.3 million in economic aid for the Andean nations in this fiscal year—$41.1 million for Bolivia, $15.2 million for Peru, and nothing for Colombia. And much of this aid is development assistance—project assistance which often spends out slowly.

My proposal would add $125 million in economic assistance—right now—to help the Andean countries at this critical moment in the drug war. I believe this is a modest investment, and just the beginning of a much larger Andean plan.

I would remind my colleagues that last fall, we appropriated an extra $125 million in military and law enforcement assistance for Bolivia, Colombia, and Peru. We need to match his commitment with additional economic assistance at this important moment.

We all know the importance of the bill before us for Panama and Nicaragua, two nations that have recently escaped the grip of tyranny. We have a unique responsibility to help both of these countries get back on their feet.

But we also have a unique responsibility to help the Andean countries which suffer under a different kind of tyranny—the narco-traffickers—who pose a serious threat to democracy, stability, and United States interests in the region.

Mr. President, I have no desire to slow down the aid package for Panama and Nicaragua. But I do not believe that my proposal does that. On the contrary, this is a perfect complement to the Central America aid package, since it addresses another major security threat in the hemisphere—drug trafficking.

As I said at the outset, I had planned to offer this amendment to the authorization bill before us. However, the leadership on both sides of the aisle asked me not to introduce it at this time, and I agreed to withhold.

However, I want to serve notice that I will be back with this amendment when the appropriations bill comes before us. I invite the support of my colleagues, and hope that the Senate will approve my proposal at that time.

The PRESIDING OFFICER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S. 2364

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE AND TABLE OF CONTENTS.

(a) SHORT TITLE.—This act may be cited as the "Emergency Supplemental Assistance for Panama, Nicaragua, and sub-Saharan Africa Act of 1990".

(b) TABLE OF CONTENTS.—The table of contents for this Act is as follows:

Sec. 1. Short title and table of contents.
Sec. 2. Assistance for Panama.
Sec. 3. Assistance for Nicaragua.
Sec. 4. Administration uses of funds for Panama and Nicaragua.
Sec. 5. Environmental Authorities and Limitations.
Sec. 6. Assistance for refugees.
Sec. 7. Assistance for sub-Saharan Africa.
Sec. 8. Housing Guarantee program for new immigrants to Israel.

SEC. 2. ASSISTANCE FOR PANAMA.

(a) ECONOMIC SUPPORT FUND ASSISTANCE.—

(a) AUTHORIZATION OF APPROPRIATIONS.—In order to support the efforts of Panama to restructure and restore its economy, restore relations with international financial institutions, and strengthen democratic institutions, there are authorized to be appropriated $470,000,000 as supplemental appropriations for fiscal year 1990 for assistance in accordance with this section under chapter 4 of part II of the Foreign Assistance Act of 1961 (22 U.S.C. 2346 and following; relating to the economic support fund).

(2) OBJECTIVES OF ASSISTANCE.—The assistance authorized by this subsection shall be used to encourage and assist the Government of Panama in taking the necessary steps to restructure government policy and administration in order to allow the proper functioning of a market economy and political democracy. Among these steps should be the formulation and execution of sound economic policies and improved public sector management, with special attention to such areas as fiscal policy, the financial sector, budget planning and implementation, privatization of public enterprise, trade policy, and regulatory policy.

(3) ALLOCATIONS OF ASSISTANCE.—Except as provided in paragraph (5), the funds authorized to be appropriate by paragraph (1) shall be allocated and used as follows:

(A) PRIVATE SECTOR REVITALIZATION.—

(i) IN GENERAL.—Up to $170,000,000 shall be for assistance to revitalize the private sector in Panama. Such assistance shall include the following:

(I) BUSINESS INVESTMENT AND INVENTORY.—Assistance to help business finance a resumption of investment expenditures and restock inventories. Priority should be given to those businesses that suffered from looting in late December 1989 and for which a rapid resumption of economic activity would generate substantial employment.

(II) EXPORT PROMOTION.—Assistance for export promotion activities.

(ii) CREDIT ASSISTANCE.—Except for the assistance described in clause (i)(II), assistance under this subparagraph shall be provided through the commercial banking system and other financial intermediaries.

(B) PUBLIC INVESTMENT PROGRAM.—Up to $125,000,000 shall be for assistance to revitalize public investment in Panama. Such assistance shall be provided as budget support to the Government of Panama to finance construction and other activities in such sectors as transportation, education, agriculture, and health. This assistance shall be administered by the Government of Panama and by nongovernmental organizations, with implementation to be carried out for the most part by private contractors.

(C) PAYMENT OF ARREARAGES TO INTERNATIONAL FINANCIAL INSTITUTIONS.—Up to $130,000,000 shall be for assistance to assist Panama in paying its arreagages to international financial institutions. Such assistance

shall be provided as part of a package of assistance for such purpose that includes the participation of the Government of Panama and other donor nations and multilateral institutions. This effort should be accompanied by a rescheduling of official bilateral and commercial debt.

(D) STRENGTHENING PUBLIC ADMINISTRATION.—Except as provided in paragraph (4)(D), up to $45,000,000 shall be for—

(i) assistance to strengthen the administrative and management capabilities of the Government of Panama, including the National Banking Commission;

(ii) assistance to promote environmental protection and natural resource management, with special attention to protection of the Panama Canal watershed;

(iii) assistance under section 534 of the Foreign Assistance Act of 1961 (22 U.S.C. 2346c) to strengthen the administration of justice in Panama, including the Office of the Attorney General; and

(iv) notwithstanding section 660 of the Foreign Assistance Act of 1961 (22 U.S.C. 2420; relating to the prohibition on assistance for law enforcement forces)—

(I) training for the Public Forces and other civilian law enforcement forces of Panama in human rights, civil law, and investigative and civlian law enforcement techniques;

(II) assistance in developing a curriculum and faculty for a civilian police training academy in Panama; and

(III) assistance to finance the procurement for civilian law enforcement forces in Panama of equipment that are appropriate for standard civilian law enforcement requirements.

(4) LAW ENFORCEMENT ASSISTANCE.—

(A) PROHIBITION ON LETHAL EQUIPMENT.—Only equipment that is nonlethal may be provided under paragraph (3)(D).

(B) LIMITATION ON EQUIPMENT.—Not more than $5,000,000 of the funds made available under paragraph (3)(D) may be used for the procurement of equipment for law enforcement of Panama.

(C) DEFINITION OF EQUIPMENT.—For purposes of this paragraph and paragraph (3)(D), the term "equipment" has the same meaning as is given the term "commodities" by section 644(c) of the Foreign Assistance Act of 1961 (22 U.S.C. 2403(c)).

(D) ASSISTANCE FOR OTHER COUNTRIES.—Up to $1,200,000 of the amount allocated pursuant to paragraph (3)(D) may be used under section 534(b)(3) of the Foreign Assistance Act of 1961 (22 U.S.C. 2346(b)(3)) for countries in Latin America and the Caribbean other than Panama.

(E) LIMITATIONS NOT APPLICABLE.—The second sentence of section 534(e) of the Foreign Assistance Act of 1961 (22 U.S.C. 2346c(e)) and the second sentence of section 599G(c) of the Foreign Operations, Export Financing, and Related Programs Appropriations Act, 1990 (Public Law 101-167), shall not apply with respect to assistance provided under paragraph (3)(D), including assistance under subparagraph (D) of this paragraph.

(5) REALLOCATIONS.—Funds allocated pursuant to any subparagraph of paragraph (3) may be reallocated for use under any other such subparagraph if, at least fifteen days before such reallocation, the President notifies the congressional committees specified in section 634A of the Foreign Assistance Act of 1961 (22 U.S.C. 2394-1; relating to reprogramming procedures) in accordance with the procedures applicable under that section.

(b) MONEY LAUNDERING AND MUTUAL LEGAL ASSISTANCE.—

(1) COOPERATION BY THE ENDARA GOVERNMENT.—The Congress commends the Endara government for—

(A) its cooperation and assistance in freezing Panamanian bank accounts believed to be used for laundering narcotics proceeds;

(B) signing a counter-narcotics agreement;

(C) taking the initiative to establish legal requirements to ensure the availability of currency and other financial transaction information to regulatory and law enforcement authorities;

(D) signing the United Nations Convention Against Illicit Traffic in Narcotic Drugs and Psychotropic Substances; and

(E) initiating discussions with the United States on information sharing and other law enforcement agreements, including agreements regarding narcotics and money laundering.

(2) UNITED STATES POLICY.—It is the policy of the United States to support the efforts of the Government of Panama to ensure that abuse of Panama's private and public institutions by drug traffickers and money launderers will not again be permitted to occur. To this end, the United States should—

(A) pursue to a prompt conclusion the discussions initiated by the Government of Panama concerning arrangements for information sharing and other law enforcement agreements with a view toward formalizing appropriate arrangements, to include—

(i) a mechanism for exchanging adequate records (as defined in section 4702(f)(2) of the Anti-Drug Abuse Act of 1988) on currency transactions in connection with narcotics investigations and proceedings;

(ii) mutual access to records of financial transactions for purposes of law enforcement investigations; and

(iii) efficient mechanisms for each government to obtain from the other country, in judicially admissible form, bank records and other evidence for use in criminal proceedings;

(B) utilize funds appropriated under this and other acts to provide appropriate training, materials and equipment requested by the Government of Panama to facilitate implementation of such agreed arrangements;

(C) utilize funds appropriated pursuant to this and other acts to provide appropriate training, materials and equipment requested by the Government of Panama to ensure effective implementation of its recently adopted financial transaction requirements; and

(D) utilize funds appropriated pursuant to this and other acts to assist the office of the Attorney General of Panama in obtaining appropriate training, materials and equipment requested by the Government of Panama to ensure effective implementation of its declared policy of prosecuting drug traffickers and money launders, and seizing their assets.

(3) APPLICABILITY OF KERRY AMENDMENT TO PANAMA.—Panama shall be considered to be a country described in the second sentence of section 4702(c)(1) of the International Narcotics Control Act of 1988 (31 U.S.C 5311 note; relating to "highest priority" countries for purposes of negotiations concerning laundering of United States currency).

(4) BANK RECORD SHARING AGREEMENT.—Not more than 80 percent of the funds appropriated pursuant to the authorization of appropriations provided in this section may be expended until—

(A)(i) the Secretary of the Treasury reports to the Congress that the Government of the United States and the Government of Panama have reached an agreement for exchanging adequate records (as defined in section 4702(f)(2) of the International Narcotics Control Act of 1988) on international currency transactions in connection with narcotics investigations and proceedings, and

(ii) the Secretary of State, in consultation with the Attorney General, reports that progress is being made towards signing a Mutual Legal Assistance Treaty; or

(B) if a report has not been submitted under subparagraph (A)(i) as of the time the Secretary of the Treasury submits the final report required by section 4702(d) of that Act, the Secretary of Treasury reports to the Congress that Panama is negotiating in good faith to reach such agreement.

(5) 1991 NARCOTICS CERTIFICATION.—

(A) SEPARATE CERTIFICATIONS FOR BILATERAL AND MULTILATERAL ASSISTANCE.—In the case of the certification requirements of section 481(h) of the Foreign Assistance Act of 1961 (22 U.S.C. 2291(h)), the President shall submit separate certifications with respect to Panama for fiscal year 1991 for purposes of paragraphs (1)(A) and (1)(B) of that section.

(B) REQUIREMENT FOR BILATERAL ASSISTANCE CERTIFICATION.—The President may make a certification with respect to Panama for fiscal year 1991 for purposes of paragraph (1)(A) of that section under paragraph (2)(A)(i) of that section (relating to countries which are fully cooperating with respect to illicit drug production, trafficking, and money laundering) only if an agreement has been signed between the Government of the United States and the Government of Panama that provides for—

(i) mutual access to records of financial transactions for purposes of drug-related law enforcement investigations, and

(ii) efficient mechanisms for each government to obtain from the other country, in judicially admissible form, bank records for use in drug-related proceedings.

(c) CONGRESSIONAL NOTIFICATIONS.—At least fifteen days before each obligation of funds for assistance under this section (including assistance authorized by subsection (e)), the President shall notify the congressional committees specified in section 634A of the Foreign Assistance Act of 1961 (22 U.S.C. 2394-1; relating to reppprogramming procedures) in accordance with the procedures applicable under that section.

(d) AUTHORIZATION OF EXTENDED PERIOD OF AVAILABILITY FOR OBLIGATION.—Funds appropriated pursuant to the authorizations of appropriations contained in this section may be made available for obligation until September 30, 1991.

(e) OTHER ASSISTANCE.—In addition to the funds authorized to be appropriated by this section for assistance for Panama, funds available for fiscal year 1990 under other provisions of law may be used to provide the economic assistance for Panama authorized by this section notwithstanding the provisions of law cited in subsection (f).

(f) WAIVER OF BROOKE/ALEXANDER AMENDMENT.—The assistance authorized for Panama by this section may be provided for a period of twelve months after the date of enactment of this Act nothwithstanding section 518 of the Foreign Operations, Export Financing, and Related Program Appropriations Act, 1990 (Public Law 101-167), section 620(q) of the Foreign Assistance Act of 1961 (22 U.S.C. 2370(q)), and any similar provision of law relating to foreign assistance repayments.

SEC. 3. ASSISTANCE FOR NICARAGUA.

(a) AUTHORIZATION OF APPROPRIATIONS.—In order to help restore the productive capacity of the Nicaraguan economy, restore Nicaragua's relations with international financial institutions, provide support for long-term economic growth and development in Nicaragua, and provide assistance for the repatriation and reconciliation process in Nicaragua, there are authorized to be appropriated $300,000,000 as supplemental appropriations for fiscal year 1990 for assistance in accordance with this section under chapter 4 of part II of the Foreign Assistance Act of 1961 (22 U.S.C. 2346 and following; relating to the economic support fund).

OBJECTIVES OF ASSISTANCE—The assistance authorized by this section shall be used to encourage and assist the Government of Nicaragua in taking necessary steps to restructure government policy and administration in order to allow the proper functioning of a market economy and political democracy. Among these steps should be the formulation and execution of sound economic policies and improved public sector management, with special attention to such areas as fiscal policy, the financial sector, budget planning and implementation, privatization of public enterprise, trade policy, and regulatory policy.

(c) ALLOCATIONS OF ASSISTANCE.—Except as provided in subsection (c), the funds authorized to be appropriated by subsection (a) shall be allocated and used as follows:

(1) RESTORING THE PRODUCTIVE CAPACITY OF THE NICARAGUAN ECONOMY.—Up to $128,000,000 shall be for assistance to support the efforts of the Government of Nicaragua and the private sector in Nicaragua to restore the productive capacity of the Nicaraguan economy. Such assistance may include support for public and private sector imports of—

(A) agricultural equipment, spare parts, fertilizer, and other inputs needed to restore the agricultural sector;

(B) petroleum and oil products; and

(C) raw materials, equipment, intermediate goods, and spare parts to rehabilitate existing facilities and stimulate new productive enterprise in the industrial and agricultural sectors.

(2) PAYMENT OF ARREARAGES TO INTERNATIONAL FINANCIAL INSTITUTIONS.—Up to $50,000,000 shall be for assistance to assist Nicaragua in paying its arrearages to international financial institutions. Such assistance shall be provided as part of a package of assistance for such purposes that includes the participation of the Government of Nicaragua and other donor nations and multilateral institutions. This effort should be accompanied by a rescheduling of official bilateral and commercial debt.

(3) ECONOMIC GROWTH AND DEVELOPMENT.—Up to $75,000,000 shall be for assistance to assist Nicaragua to meet its longer-term economic growth and development needs, directly or through regional and other international insitutions, through support for—

(A) programs to repair, improve, and maintain existing public infrastructures, such as schools, health clinics, roads, and community facilities;

(B) provision of medical equipment, commodities, training, and other support for the health sector;

(C) provision of assistance and training to improve government administration and strengthen democratic institutions;

(D) provision of technical assistance and training to the private sector to permit the rehabilitation and modernization of private enterprise in Nicaragua;

(E) support for primary school education and university level scholarships and training;

(F) support for the agricultural sector through small farmer credit activities and improvement of input supply and production marketing systems; and amendment

(G) programs to protect and manage the environment and natural resources.

(4) DEMOBILIZATION AND REPATRIATION; ASSISTANCE FOR REFUGEES AND DISPLACED PERSONS.—Up to $47,000,000 shall be for assistance to support the demobilization and demilitarization process and to reunite former combatants (including members of the Nicaraguan Resistance), as well as Nicaraguan refugees and other Nicaraguans who have been displaced by the conflict, into the social economic, and political life of Nicaragua, as follows:

(A) DEMOBILIZATION, REPATRIATION, AND RESETTLEMENT OF MEMBERS OF THE NICARAGUAN RESISTANCE.—

(i) Not more than $30,000,000 shall be used to support the voluntary demobilization, repatriation, and resettlement of members of the Nicaraguan Resistance and their families.

(ii) Such assistance shall be provided—

(I) through the International Commission of Support and Verification (CIAV) established by the Secretary General of the United Nations and the Secretary General of the Organization of American States pursuant to the agreement of the Central American Presidents at Tela, Honduras, on August 7, 1989, and

(II) in coordination with the Government of Nicaragua,

unless the President notifies the Congressional committees specified in section 634A of the Foreign Assistance Act of 1961 (22 U.S.C. 2394–1; relating to reprogramming procedures) in accordance with the procedures applicable under the section.

(iii) Assistance may be provided under this subparagraph for members of the Nicaraguan Resistance only if there is agreement that such members will give up their weapons as part of the demobilization process.

(B) ONUCA.—Up to $2,000,000 shall be used to support the Observer Group for Cental America (ONUCA) if, with the consent of the United Nations Security Council, it plays a role in supporting the voluntary demobilization of former combatants and supporting safe conditions in Nicaragua in accord with the Central American peace process.

(C) REPATRIATION AND RESETTLEMENT OF REFUGEES AND DISPLACED PERSONS.—Up to $15,000,000 shall be used for the repatriation and resettlement in Nicaragua of Nicaraguan refugees and other Nicaraguans who have been displaced by the conflict in Nicaragua (without regard to whether they are within or outside Nicaragua). Such repatriation and resettlement shall be carried out under the international auspices, including through the United Nations Commissioner for Refugees (UNHCR) and the International Conference of Central American refugees (CIR-EFCA), in accordance with the Government of Nicaragua. Assistance under this subparagraph may be provided under the authorities of the Migration and Refugee Assistance Act of 162 (U.S.C. 2601 and following).

(d) CHANGES IN ALLOCATIONS.—Funds authorized pursuant to any paragraph of subsection (b), or any subparagraph of paragraph (4) of that subsection, may be reallocated for use under any other such paragraph or subparagraph (except that assistance made available pursuant to subparagraph (4)(A)(i) may not exceed $40,000,000) if, at least fifteen days before such reallocation, the President notifies the congressional committees specified in section 634A of the Foreign Assistance Act of 1961 (22 U.S.C. 2394–1; relating to reprogramming procedures) in accordance with the procedures applicable under that section.

(e) CONGRESSIONAL NOTIFICATIONS.—At least fifteen days before each obligation of funds for assistance under this section (including assistance pursuant to the amendments made by subsection (f) and assistance provided pursuant to subsection (h)), the President shall notify the Congressional committees specified in section 634A of the Foreign Assistance Act of 1961 (22 (U.S.C. 2394–1; relating to reprogramming procedures) in accordance with the procedures applicable under that section.

(f) AUTHORIZATION OF EXTENDED PERIOD OF AVAILABILITY FOR OBLIGATIONS.—Funds appropriated pursuant to the authorizations of appropriations contained in this section may be made available for obligation until September 30, 1991.

(g) EXPANDING USES OF SURVIVAL ASSISTANCE FOR VICTIMS OF CIVIL STRIFE IN CENTRAL AMERICA.—Section 1 of the Act entitled "An Act to provide survival assistance to victims of civil strife in Central America", approved December 11, 1989 (Public Law 101–215), is amended—

(1) in the first sentence of subsection (a), by striking out "noncombatants";

(2) in the second sentence of subsection (a), by striking out "noncombatants" and inserting in lieu thereof "those"; and

(3) by repealing subsection (c).

(h) TRADE BENEFITS AND OPIC PROGRAMS—OPIC DETERMINATION.—OPIC programs may be made available in Nicaragua notwithstanding the provisions of section 231A of the Foreign Assistance Act of 1961, as amended, until such time as a determination shall be made pursuant to section 2462(b)(7) of title 19, United States Code. If that determination is positive, Nicaragua shall be considered in compliance with the requirements of section 231A of the Foreign Assistance Act of 1961, as amended. If the determination is negative, OPIC shall cease offering new insurance, finance or guaranties pursuant to this provision.

(i) OTHER ASSISTANCE.—In addition to the funds made available by this section for assistance for Nicaragua, funds available for fiscal year 1990 under other provisions of law may be used to provide the economic assistance for Nicaragua authorized by this section, and to provide otherwise authorized training and services provided by the Office of Security of the Department of State for law enforcement personnel of Nicaragua for VIP protection and the physical protection of internationally protected persons and related facilities, notwithstanding the provisions of law cited in subsection (i).

(j) WAIVER OF BROOKE/ALEXANDER AMENDMENT.—The assistance authorized for Nicaragua by this section may be provided notwithstanding section 518 of the Foreign Operations, Export Financing, and Related Program Appropriations Act, 1990 (Public Law 101–165), and section 620(q) of the Foreign Assistance Act of 1961 (22 U.S.C. 2370(q)) and any similar provision of law relating to foreign assistance repayments.

SEC. 4. ADMINISTRATIVE USES OF FUNDS FOR PANAMA AND NICARAGUA.

Up to $10,000,000 of the funds authorized to be appropriated by section 2 and 3 of this

Act may be used for the purpose of paying administrative expenses incurred by the Agency for International Development in connection with carrying out its functions under those sections or under the Act entitled "An Act to Implement the Bipartisan Accord on Central America of March 24, 1989", approved April 18, 1989 (Public Law 101-14), provided that not more than $60,000 of any such administrative funds may be used in connection with administrative expenses incurred in concluding activities under Public Law 101-14.

SEC. 5. ENVIRONMENTAL AUTHORITIES AND LIMITATIONS.

(a) POLICY.—The Congress recognizes the significant environmental challenges facing Panama and Nicaragua, including the preservation of tropical forests, promotion of sustainable agriculture, control of pollution and restoration of the natural resource base on which a sustainable, healthy economy depends. Therefore, the President is directed to give a high priority to addressing these problems by all United States agencies in implementing assistance to Panama and Nicaragua under this Act.

(b) LIMITATION.—None of the funds made available for Nicaragua or Panama under this Act shall be used for any project that would result in the destruction of tropical forests, including their colonization, unless for a project for which the Administrator of the Agency for International Development, in consultation with the appropriate environmental institutions of the Governments of Nicaragua or Panama and the appropriate non-governmental environmental organizations in Nicaragua or Panama, makes a written finding to the Senate Committee on Foreign Relations and the Speaker of the House of Representatives that such project—

(1) is consistent with long-term, environmentally sustainable development;

(2) results in no significant destruction of primary tropical forests; and

(3) results in no significant net loss of other tropical forest.

(c) AUTHORIZATION OF ENVIRONMENTAL ACTIVITIES.—

(1) In consultation with the Environmental Protection Agency, the Agency for International Development is authorized to undertake such educational, policy training, research, technical and financial assistance, monitoring, coordination and other activities as may be requested by the Governments of Nicaragua and Panama to protect the environment and to strengthen government and non-government environmental institutions.

(2) Of the amounts authorized to be appropriated under sections 2 and 3 of this Act, there are authorized to be available for the purposes of subsection (c)(1) $4,000,000.

(d) SI-A-PAZ PROJECT.—In order to help reverse the rapid decline in tropical forests and other natural resources in Central America, the Congress supports the ongoing efforts of Nicaraguan and Costa Rican environmentalists to create the International System of Protected Areas for Peace (the SI-A-PAZ program) on their shared border. Congress shares the hope that such an integrated development project, which aims to protect precious natural resources on both sides of the border while promoting economic development in surrounding zones, will help raise the standard of living of people in the zone and contribute to peace in the region.

SEC. 6. ASSISTANCE FOR REFUGEES.

Section 104(a)(1) of the Foreign Relations Authorization Act, Fiscal Years 1990 and 1991 (Public Law 101-246), is amended by striking out "$415,000,000" and inserting in lieu thereof "$438,409,000".

SEC. 7. ASSISTANCE FOR SUB-SAHARAN AFRICA.

(a) ASSISTANCE FOR NAMIBIA.—

(1) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated $10,000,000 as supplemental appropriations for fiscal year 1990 for assistance in accordance with this subsection under chapter 4 of part II of the Foreign Assistance Act of 1961 (22 U.S.C. 2346 and following; relating to the economic support fund), which shall be for assistance for Namibia. Funds appropriated pursuant to the authorization of appropriations contained in this paragraph may be made available for obligation until September 30, 1991.

(2) OBJECTIVES OF ASSISTANCE.—The assistance authorized by this subsection shall be used to encourage and assist the Government of Namibia in taking necessary steps to restructure government policy and administration in order to allow the proper functioning of a market economy and political democracy. Among these steps should be the formulation and execution of sound economic policies and improved public sector management, with special attention to such areas as fiscal policy, the financial sector, budget planning and implementation, privatization of public enterprise, trade policy, and regulatory policy.

(3) USES OF ASSISTANCE.—Except as provided in paragraph (3), funds appropriated under this subsection shall be provided to the Government of Namibia for budgetary support and to nongovernmental organizations to finance development activities in the priority sectors of agriculture, health, education, and housing.

(4) AID MISSION.—Up to $1,000,000 of the funds appropriated under this subsection shall be used for the expenses of establishing and maintaining an Agency for International Development Mission in Namibia.

(b) DEVELOPMENT ASSISTANCE.—

(1) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated $20,000,000 as supplemental appropriations for fiscal year 1990 for the "SUBSAHARAN AFRICA, DEVELOPMENT ASSISTANCE" account under chapter 1 of part I of the Foreign Assistance Act of 1961 (22 U.S.C. 2151 and following; relating to development assistance), which shall be for additional assistance for countries for which assistance under that account is allocated for fiscal year 1990 in the report submitted to the Congress pursuant to section 653 of the Act (22 U.S.C. 2413).

(2) AVAILABILITY OF FUNDS.—Funds appropriated under this subsection may be made available for obligation through September 30, 1991.

SEC. 8. HOUSING GUARANTEE PROGRAM FOR NEW IMMIGRANTS TO ISRAEL.

(a) ESTABLISHMENT OF PROGRAM.—Title III of chapter 2 of part I of the Foreign Assistance Act of 1961 is amended by inserting after section 222A (22 U.S.C. 2182a) the following new section:

"SEC. 222B. GUARANTY PROGRAM FOR HOUSING FOR NEW IMMIGRANTS TO ISRAEL.

"(a) AUTHORITY.—The President is authorized to issue guaranties on an expedited basis to eligible investors (as defined in section 238(c)) assuring against losses incurred in connection with loans made for housing projects in Israel for newly arrived immigrants in that country.

"(b) LIMITATION.—The total principal amount of guaranties issued under this section that are outstanding at any one time may not exceed $400,000,000. The limitation established by the second sentence of section 222(a) does not apply with respect to guaranties issued under this section.

"(c) TERMS AND CONDITIONS.—Guaranties hereunder shall be issued upon review solely to ascertain whether Israel's planned or actual expenditures have or will be expended for the purposes set forth in this section and to assure that guaranties will be utilized in a manner that improves the efficiency and increases the privatization of the housing sector in Israel, provided that such guaranties shall be issued only in conformity with AID policies governing assistance to Israel in effect on the date of enactment of this Act.

"(d) FEES.—Notwithstanding subsection (c) of this section, the only guaranty fee to be charged pursuant to section 223(a) or otherwise shall be an initial fee of one quarter of 1 percent of the principal amount of such loan."

(b) CONFORMING AMENDMENTS.—Section 223 of that Act (22 U.S.C. 2183) is amended—

(1) in subsection (a), by inserting a comma after "222A" and by inserting ", of for each guaranty issued under section 222B" after "President";

(2) in subsection (b)—

(A) by inserting "or 222B" after "222" the first and third places it appears, and

(B) by inserting "and 222B" after "222" the second place it appears;

(3) in subsection (c), by inserting "or 222B" after "222";

(4) in subsection (d), by striking out "or 222A" and inserting ", 222A, or 222B";

(5) in subsection (f), by inserting "or 222B" after "222"; and

(6) in subsection (j)—

(A) in the second sentence, by striking out "this title" and inserting in lieu thereof "section 222", and

(B) in the third sentence, by inserting "under section 222" after "issued" both places it appears.

(c) COMPLIANCE WITH THE BUDGET ACT.—New credit authority provided in this section is to be effective only to such extent or in such amounts as is provided in advance in appropriation Acts.

Mr. PELL. Mr. President, I move to reconsider the vote by which the bill, as amended, was passed.

Mr. McCAIN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. GORE. Mr. President, I ask unanimous consent to speak for 10 minutes as if in morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

ENVIRONMENTAL CHALLENGES

Mr. GORE. Mr. President, nearly 20 years ago, as a nation, we stopped to think about the health of the world in which we live. Later this month, on April 22—Earth Day 1990—we will again stop to think about the environmental challenges we face, not only as a nation, but as neighbors in a global

environment with problems that were unforeseen 20 years ago.

The world's forests are being destroyed at the rate of one football fields worth each second. An enormous hole has appeared in the stratospheric ozone layer. Species are dying at an unprecedented rate: 1,000 times faster than at any time in the last 65 million years. Chemical wastes are seeping down to poison ground water, while huge quantities of carbon dioxide, methane, and chlorofluorocarbons are entering the atmosphere to threaten the planet with climate change.

From the time of Christopher Columbus to the beginning of this century, world population tripled. In only the past 75 years it tripled again, to today's 5.2 billion. In the next 75 years, we are told, it will double and possibly even triple yet again. Nearly every aspect of modern industrialized society follows the same pattern of sudden, unprecedented acceleration.

To secure our planet, we need to deal comprehensively with global warming, stratospheric ozone depletion, species loss, deforestation, ocean pollution, acid rain, air and water pollution, and other threats. In every major sector of the economy, we must find and disseminate new technologies that will help us to meet this challenge.

Some of these technologies are being brought to our doorstep—the Earth Tech Fair, which I am honored to cochair with my good friend from Pennsylvania [Mr. HEINZ], will open tomorrow on The National Mall. There, many of the technologies of sustainable development will be demonstrated—from photovoltaic arrays, to a device that actually vacuums bugs from agricultural crops in the field.

Slowly we are beginning to take the right steps. Earlier this year scientists, policymakers, and religious leaders gathered in Moscow to address global environmental concerns. Soviet President Mikhail Gorbachev delivered a message of environmental awareness to the gathering and in so doing demonstrated an understanding and sensitivity rarely seen among world leaders. Later this month, the Senate will host the first Interparliamentary Conference on the Global Environment, which will gather together representatives from around the world to craft the policies necessary to slow our planet's destruction.

The 1990's must be the decade of decisive action. If major national and international efforts are not pursued during this period, irreparable damage will be done to the environment and the resources on which life, our economy, and our security so greatly depend. These problems will not disappear of their own accord. They will only prove increasingly intractable and expensive, ultimately demanding crisis management.

We know what to do. The task before us may seem immense, but Earth Day 1990 will remind us that it is manageable, that working together, we can protect our planet, the future of our children and all children around the globe. It will mark the beginning of a new decade of the environment and a critical resolve to make basic changes that will bring big results: Reducing ozone-depleting chemicals and carbon dioxide emissions; preserving forests and endangered species; reducing our waste load and our energy consumption; coming to grips with explosive population growth and forging, once and for all, the path of substainable development toward a sustainable future.

A wide variety of events have been planned as part of Earth Day 1990. Many of these events focus on the vital role local governments must play in confronting both regional and global environmental issues. A key component of the Earth Day Program is the Global Cities project, which will assist cities throughout the world with programs such as recycling, energy and water conservation, and ridesharing.

Earth Day volunteers are in the process of organizing gatherings in cities and towns throughout the world. These gatherings may take the form of small town parades or mass gatherings of many thousands of people. In every case, the goal is to raise consciousness and encourage activism in protecting our environment.

Our educational institutions will also play an active role in Earth Day 1990. Many activities are planned throughout the Nation's schools designed to raise environmental awareness among younger children. Universities will hold campus teach-ins in order to provide a forum for the exchange of ideas on how to best address global environmental issues.

On a larger scale, Earth Day organizers have set goals such as planting 1 billion trees, organizing 10,000 local recycling programs, and urging adoption of the Valdez principles by as many corporations and State and local governments as possible. The Valdez principles are 10 guidelines for corporate conduct designed to incorporate concern for the environment into the decisionmaking process. The guidelines cover the release of pollutants, sustainable use of natural resources, reduction and safe disposal of waste, energy efficiency, and several other items crucial to the protection of our global environment.

Mr. President, these issues are important to every American, and to every resident of this planet. As Earth Day 1990 approaches, I urge my colleagues to come to the Senate floor to speak about the environmental challenges and opportunities ahead—our grandkids are counting on us all.

Mr. President, during the days following the recess leading up to Earth Day, a number of Senators have agreed to give daily speeches about this problem. I circulated a "Dear Colleague" letter, and earlier this year introduced a resolution establishing April 22 as Earth Day 1990. It is a celebration organized in the private sector, but we in the U.S. Senate, along with our colleagues in the other body, passed a resolution, which was sponsored in the other body by the distinguished MO UDALL, of Arizona.

The solutions, as I mentioned, fall in three areas. I talked about population. There is a way to stabilize world population. It involves making certain that birth control technology and information is widely accessible. But we cannot stop there, because a new strategy is called for. We need to focus on two specific goals. No. 1, lifting child survival rates above the threshold beyond which family sizes fall. In most of the world there is no such thing as Social Security, and parents want to make certain that at least some of their children survive into adulthood to help take care of them. All the research over the last several decades shows that if children have a very high likelihood of dying in infancy, then family sizes become very, very large because parents want to make certain that at least some of their children survive.

The research also shows definitively that if children survival rates go above that threshold above which parents have confidence that children will survive, then family sizes come back down, provided a second factor is also present; that is, the level of education, especially among women, reaches the threshold above which women feel empowered to participate in the decision and know-how to implement decisions to have smaller families.

Sustainable economic growth is almost always a prerequisite for achieving these two conditions, high child survival rates and adequate levels of education, especially among women. Again, the availability of birth control devices and knowledge is a prerequisite.

What about the second area of solutions? Technology. Some of today's technologies need to be abandoned. Chlorofluorocarbons represent a good example. We had a vote on that issue here in this body not long ago. By an overwhelming vote, the Senate agreed that we really should get rid of these chemicals.

But other technologies also need attention. We need to unleash the energy and power of business and industry to develop new technologies capable of substituting for the ones that are helping to cause the problem today.

One way to look at the problem is to compare it to the problem of warfare. For thousands of years humankind has had wars. But when nuclear weapons were developed in this century, suddenly the consequences of war became completely unacceptable for new reasons. So our way of thinking about warfare had to change. We are all optimistic that we are seeing just such a change now as our Nation and the Soviet Union move toward a new generation of arms control agreements that hold out the realistic hope of putting that genie back in the bottle.

Well, I wanted to use that as an example to illustrate what needs to happen with the technologies that are harming the environment. For thousands of years, just as humankind has had wars, we have also exploited the resources of the Earth for sustenance. Just in this century, just as nuclear weapons were invented, we have invented a whole range of new technologies for improving the way in which we exploit the resources of the Earth. We improved the efficiency of war and our ability to kill lots of people with nuclear weapons. We have improved our ability to gain sustenance from the Earth with insecticides, pesticides, and new machines, new mining techniques and extraction techniques.

While none of these new technologies is anywhere nearly as dramatic as nuclear weapons, taken together they have changed the consequences of exploiting the resources of the Earth.

If we now continue in an unrestrained way with growing population and a growing demand for more and more resources from the Earth, then the consequences will become unthinkable. So, as a result, we need to start changing the way we think about this pattern of behavior. And in order to do so, we need to develop new technologies to avoid this conflict between economic growth and environmental protection.

Incidentally, I have joined with our colleague, Senator JOHN HEINZ, as a cochair of Earth Tech 1990, which is displaying more than 100 new technologies on The Mall right now, down in front of the Capitol Building, to show some of these new technologies. We are also in the midst right now and tomorrow of an international forum conducted in the Hart Building, with satellite linkups to Europe and Japan, with roundtable discussions of new technologies in areas such as transportation, energy, agriculture, consumer goods, and the like. These discussions are very interesting, and, indeed, I am going back over to them this evening.

Mr. President, I said there were three areas: Stabilizing global population, developing and disseminating new technologies, and, third, changing our way of thinking about our realtionship to the world's environment.

We have for centuries thought of ourselves as separate from the environment, entitled to exploit it at will. Indeed, in my own religious tradition I am taught we are given dominion over the Earth, and, indeed, I believe that very strongly. But the same religious tradition teaches that we are required to be good stewards of the Earth. And other religious traditions teach the same values.

It is that shift from an emphasis purely on dominion and exploitation to an emphasis on stewardship and caring for the sustainability of our endeavors and the long-term future of the environment it—is prescisely that shift—which is now beginning to take place.

A lot of the solutions which need to be implemented are currently inaccessible politically, but what today is unimaginable will soon become imaginable. I was reviewing a list of the technological solutions that are required with a friend who is a scientist long active in this field. He said, "You know, I agree with you, but I know enough about politics in the Government to tell you that these steps which you say are necessary are simply unlikely." I said, "Wait just a minute. Let me ask you a question. What if I asked you 6 months ago how likely is it that in the next 90 days every single country in Eastern Europe will abandon communism, tear down the statues of Lenin, and embrace democracy and free markets? Would you have said that was unlikely?" He said, "Yes, I would have."

Well, what changed in Eastern Europe was their way of thinking about communism. When enough people changed their minds, the Berlin Wall came down in their thoughts before the first chisel hit the stones.

What is changing now is our way of thinking about the environment. And while today it seems impossible to take some of the steps that are necessary, when enough people change their minds about how important it is, then solutions which seem inaccessible today will become accessible.

Many of us in this Chamber, Mr. President, have long been aware of the fact that no issue energizes people at the local level more than a proposal to locate a new garbage dump or landfill near their backyard. Economic issues quickly become secondary when the backyard is threatened.

Another way of describing the change now underway is to say the definition of that word "backyard" is beginning to change. The air in this Chamber, which we are breathing into our lungs at this moment, has 600 percent more chlorine atoms per lungful that it did just 40 years, or even 3 billion years ago in this same space.

It is amazing to me to think that we in our civilization could engineer a change of that magnitude in the makeup of the Earth's atmosphere everywhere on Earth in just 40 years time.

Breathing in six times as many chlorine atoms in each lungful does not directly hurt human health, as far as we know, but it does burn the stratospheric ozone layer and create a chain of consequences for the web of life and threatens to do irreparable harm to the global atmosphere.

If we reflect on that fact and consider that the air we breathe every minute is affected by actions around the world, that perhaps we will begin to think of the global atmosphere as part of our backyard and being able to protect it with the same kind of emotional intensity that individuals bring to the protection of their own backyard when a new landfill is going to be sited.

I saw a television show recently called "Saturday Night Live," Mr. President. They have the habit of putting on humorous pretend commercials that look like real commercials. In this particular commercial they brought out a new consumer device about the size of two of these desks, and it was called the catapulto, modeled on a medieval catapult but downsized, with the same kind of spring-operated arm that would throw things. And the use was, according to this made-believe commercial, for the homeowner to take his garbage out, and instead of worrying about a landfill or incinerator or paying a garbage company to pick it up, he put it in the catapulto and pulled the lever, and it went flying over his backyard into the neighbor's yard two houses down. By the end of the commercial, his neighbors had gotten these devices as well, and the garbage bags were flying across backyard fences throughout the neighborhood.

I found it to be very funny. But when you think about it, that is what our civilization is doing. The garbage barge which took an 18-month tour of the Caribbean before it came back to New York City, no better for having made that journey, represented the same kind of behavior on the part of our civilization. When we dump gaseous waste into the atmosphere, dump liquid waste down into the ground water, on which 50 percent of Americans rely for their drinking water, it is the same as in that make-believe commercial, which was funny because it seemed so absurd.

What we are doing is wrong, and we have to change the technologies we use, the way we think about our relationship to the environment and stabilize global growth.

Earth Day 1990, which many of us will speak about after the recess on a regular basis up until April 22, is an occasion for Americans throughout

this country to think about the ways in which we can solve the global environmental crisis. It will be recognized and participated in by all 50 States and in foreign countries all around the world. And I urge my colleagues to participate actively in their home States, as many, of course, are already planning to do.

I yield the floor.

The PRESIDING OFFICER. Does any Senator seek recogniation?

Mr. GRAHAM. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. MITCHELL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. SANFORD). Without objection, it is so ordered.

EXECUTIVE SESSION

EXECUTIVE CALENDAR

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Senate proceed to executive session to consider the following nominations: Calendar items Nos. 601, 695, 696, and 697, and the nominations reported today by the Committee on Agriculture, Nutrition, and Forestry; the Committee on the Judiciary; the Committee on Banking, Housing, and Urban Affairs; and the Committee on Foreign Relations, except the nomination to be the Alternate Representative of the United States of America for Special Political Affairs in the United Nations, with the rank of Ambassador.

I further ask unanimous consent that the nominees be confirmed en bloc; that any statements appear in the RECORD as if read; that the motions to reconsider be laid upon the table, en bloc; that the President be immediately notified of the Senate's action.

The PRESIDING OFFICER. Without objection, it is so ordered.

The nominations considered and confirmed en bloc are as follows:

DEPARTMENT OF ENERGY

John Wesley Bartlett, of Massachusetts, to be Director of the Office of Civilian Radioactive Waste Management.

RAILROAD RETIREMENT BOARD

Charles J. Chamberlain, of Illinois, to be a member of the Railroad Retirement Board for the term of 5 years from August 29, 1989. (Reappointment.)

Glen L. Bower, of Illinois, to be a member of the Railroad Retirement Board for the remainder of the term expiring August 28, 1992.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

Lynne Vincent Cheney, of Wyoming, to be Chairperson of the National Endowment for the Humanities for a term of 4 years. (Reappointment.)

FROM THE COMMITTEE ON FOREIGN RELATIONS

H. Douglas Barclay, of New York, to be a member of the Board of Directors for the Overseas Private Investment Corporation for the term expiring December 17, 1991;

Henrietta Hugentobler Holsman, of California, to be an Assistant Administrator of the Agency for International Development;

James Henry Michel, of Virginia, to be an Assistant Administrator of the Agency for International Development;

J. Carter Beese, Jr., of Maryland, to be a member of the Board of Directors of the Overseas Private Investment Corporation for a term expiring December 17, 1992;

Donald Burnham Ensenat, of Louisiana, to be a member of the Board of Directors of the Overseas Private Investment Corporation for a term expiring December 17, 1992;

C. Anson Franklin, of Virginia, to be an Assistant Administrator of the Agency for International Development;

Richard E. Bissell, of Virginia, to be an Assistant Administrator of the Agency for International Development;

James Henry Michel, of Virginia, to be a member of the Board of Directors of the Inter-American Foundation for the remainder of the term expiring September 20, 1992;

Deane Roesch Hinton, of Illinois, a career member of the Senior Foreign Service, with the personal rank of Career Ambassador, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Panama, to which position he was appointed during the recess of the Senate from November 22, 1989, to January 23, 1990.

Nelson C. Ledsky, of Maryland, a career member of the Senior Foreign Service, class of Minister-Counselor, for the rank of Ambassador during his tenure of service as Special Cyprus Coordinator.

Jonathan Moore, of Massachusetts, to be the Representative of the United States of America on the Economic and Social Council of the United Nations, with the rank of Ambassador.

FROM THE COMMITTEE ON THE JUDICIARY

Alan D. Lourie, of Pennsylvania, to be U.S. circuit judge for the Federal Circuit;

John S. Martin, Jr., of New York, to be U.S. district judge for the Southern District of New York;

Daniel B. Sparr, of Colorado, to be U.S. district judge for the District of Colorado;

Norman H. Stahl, of New Hampshire, to be U.S. district judge for the District of New Hampshire;

Leo A. Giacometto, of Montana, to be U.S. Marshal for the District of Montana for the term of 4 years;

Terrenace B. Adamson, of Georgia, to be a member of the Board of Directors of the State Justice Institute for a term expiring September 17, 1991;

Vivi L. Dilweg, of Wisconsin, to be a member of the Board of Directors of the State Justice Institute for a term expiring September 17, 1991;

Carl F. Bianchi, of Idaho, to be a member of the Board of Directors of the State Justice Institute for a term expiring September 17, 1992;

James Duke Cameron, of Arizona, to be a member of the Board of Directors of the State Justice Institute for a term expiring September 17, 1992;

Janice L. Gradwohl, of Nebraska, to be a member of the Board of Governors of the State Justice Institute for a term expiring September 17, 1992; and

Malcolm M. Lucas, of California, to be a member of the Board of Directors of the State Justice Institute for a term expiring September 17, 1992.

FROM THE COMMITTEE ON AGRICULTURE, NUTRITION, AND FORESTRY

John C. Foltz, of Ohio, to be Administrator of the Federal Grain Inspection Service.

FROM THE COMMITTEE ON BANKING, HOUSING, AND URBAN AFFAIRS

Robert C. Larson, of Michigan, to be a member of the Oversight Board of the Resolution Trust Corporation for a term of 3 years; and

Philip C. Jackson, Jr., of Alabama, to be a member of the Oversight Board of the Resolution Trust Corporation for a term of 3 years.

STATEMENT ON THE NOMINATION OF JOHN W. BARTLETT

Mr. McCLURE. Mr. President, on February 21, 1990, the Committee on Energy and Natural Resources favorably reported the nomination of John W. Bartlett to be Director of the Department of Energy's Office of Civilian Radioactive Waste Management by a vote of 19 to 0.

Dr. Bartlett's background as a nuclear engineering executive will serve him well in carrying out his responsibilities for developing the Nation's waste disposal system for spent nuclear fuel and high-level radioactive waste. For a decade, prior to his joining the Department of Energy as a consultant to the Secretary, Dr. Bartlett directed energy and environment work for the Analytic Science Corp. in Reading, MA. His work there included detailed knowledge of high-level radioactive waste programs. Prior to that (1969–78), as the manger of system studies in the nuclear waste technology program office of Battelle Pacific Northwest Laboratories in Richland, WA, he directed analytic and institutional high-level waste programs. Dr. Bartlett received his Ph.D. and masters in chemical engineering from Rensselaer Polytechnic Institute and his bachelor of science degree in chemical enigneering from the University of Rochester. His experience and educational background certainly make him well-qualified for the position to which he has been nominated.

Mr. President, I urge my colleagues to join me in supporting Dr. Bartlett's confirmation as Director of the Office of Civilian Radioactive Waste Management.

Mr. REID. Mr. President, what to do with waste generated by nuclear power plants has plagued this nation for decades. During the waning hours of the 97th Congress, it appeared that a solution had finally been reached to create a national disposal system to deal with mounting levels of nuclear waste. The 1982 Nuclear Waste Policy Act sought a regional and equitable balance to deal with the 40,000 metric

tons of spent fuel anticipated by the year 2000. The Act directed the Department of Energy to open a permanent deep repository by 1998 and to recommend a second site that would begin receiving waste about 5 years later. President Reagan signed the bill into law in January 1983 stating, "The step we are taking today should demonstrate to the public that the challenge of coping with nuclear waste can and will be met."

The Department of Energy was required to pick three finalists for the repository and evaluate each site simultaneously. The DOE formally identified nine sites in five distinct geohydrologic settings as potentially acceptable for a mined geological repository for spent nuclear fuel and high-level radioactive waste. DOE reduced the number from nine to five and proposed the nomination of sites at Hanford, WA; Yucca Mountain, NV; Deaf Smith County, TX; Davis Canyon, UT; and Richton Dome, MS.

Three sites were to be intensely studied or characterized, with primary emphasis placed on geologic factors for the selection of the sites. The Nuclear Waste Policy Act authorizes a number of key activities designed to meet the objectives of providing safe and permanent disposal of spent fuel and high-level waste. These components call for the:

First, protection of public health and safety along with environmental acceptability;

Second, acceptance of waste for disposal starting not later than Janaury 31, 1998;

Third, a repository for permanent disposal of spent fuel and high-level waste;

Fourth, safe transportation of waste to the repository;

Fifth, provision of limited interim storage of spent fuel for utilities, as required by the Nuclear Regulatory Commission [NRC];

Sixth, encouragement to nuclear facilities to use existing storage facilities at reactor sites effectively until waste is accepted for disposal;

Seventh, involvement of the States and Indian tribes and full and open public participation;

Eighth, full cost recovery, with costs borne equitably by the waste generators.

President Reagan named three sites: Nevada, Washington, and Texas, as the final candidates for the first permanent repository in May 1986. To be selected as a "host state" was considered a dubious honor by anyone's standards. But, the Secretary of Energy further bungled an already suspect program by announcing the indefinite postponement of further screening of sites for a second repository. Until then the active search had been undertaken in granite and other crystalline rocks east of the Mississippi River, the section of the country that generates more than two-thirds of the Nation's nuclear waste. According to the Department of Energy, a second repository was no longer necessary due to lower than anticipated volumes of spent fuel. Others speculate that election year politics prompted DOE's decision. In any event, the agency's announcement further eroded the little confidence that existed in DOE's ability to successfully manage the nuclear waste program. Subsequently Congress placed a moratorium on funds, precluding the Department of Energy from sinking exploratory shafts at the three Western sites.

In January 1987, the DOE proposed amendments to the mission plan required by the Nuclear Waste Policy Act calling for a delay in opening of a first repository beyond 1998; plans to accept spent fuel beginning in 1998 at a monitored retrievable storage facility that Congress would have to authorize; and deferral for an indefinite period of site-specific work on a second repository. Clearly the nuclear waste program was in trouble causing one Member of Congress to comment that "the only thing the Department has managed to bury is its credibility."

Legislation was introduced to delay site selection by an additional 18 months while a special commission studied ways to get the program back on track, including incentives to encourage States to voluntarily accept the repository, a responsible proposal which I supported. Serious concerns were raised about the program's future and the path of least resistance was taken. The 100th Congress ostensibly resolved the issue by restricting characterization for the first repository to Nevada's Yucca Mountain. If Yucca Mountain is found suitable by the NRC, the permanent repository then would be constructed at the site. If fatal flaws are found, DOE must terminate the site search and submit a report to Congress. A monitored retrievable storage facility for storing and packaging spent fuel is also authorized. Mr. President, the package approved by Congress is known in my home State as the "Screw Nevada Bill."

Cutting off other studies and designating Yucca Mountain as the sole candidate repository site may have resolved some short term issues; but it appears that we are no closer to solving the nuclear waste problem than we were 2½ years ago.

Mr. President, another devastating problem this Nation faces involves the Department of Energy's handling of the nuclear weapons program. The General Accounting Office estimates that there are over 3,000 inactive waste sites within the weapons complex that need to be cleaned up, a cleanup that could take 20 years and cost $100 billion. In the book "Forevermore—Nuclear Waste in America," by Donald L. Barlett and James B. Steele, succinctly recap this tragic situation. They state:

> The turtles that creep along the banks of the Savannah River, near Aiken, South Carolina, are radioactive, So is the water in a well that serves the borough of Lodi, New Jersey. So, too a drainage ditch that runs along a street in an industrial park in southeast Houston. The turtles, the water, and the soil were once free of radioactivity. They are now contaminated because of the ignorant and careless handling of radioactive materials. More important, they are a symptom of the inability of government and industry to control nuclear waste, a catchall phrase for scores of the most deadly and long-lived toxic substances ever manufactured.

DOE's incompetence and its apparent disregard for the environmental rules and regulations which ordinary citizens and industry are required to follow have raised awareness and levels of mistrust in my State about the agency's ability to effectively characterize a nuclear waste repository. The DOE has made science a second-class citizen. Since 1979, the State of Nevada has warned the DOE about the many technical issues that would disqualify Yucca Mountain during NRC licensing. Volcanoes, faults, ground water problems, nuclear weapons testing at the Nevada Test Site, Air Force bombing activities could render the site unsuitable for the 10,000 year lifespan of the repository.

Nevada lies in one of the most seismically active regions in the Nation. The area has averaged one major trembler, measuring more than 6 on the Richter scale, every 27 years since the mid 1800's. In 1954 alone, four quakes measuring between 6.6 and 7.2 caused significant damage in the Lahontan Valley just 75 miles east of Reno. An engineering geologist for the Nevada Bureau of Mines has said:

> We should anticipate another major earthquake in Western Nevada in the near future.

The site of the nuclear dump sits on a fault where a major earthquake could occur.

In fact, these very concerns have been raised by scientists outside of the State of Nevada. Jerry Szymanski, a DOE scientist, concluded that the Yucca Mountain site should be abandoned since it would be impossible to predict when earthquakes or other disasters might occur. His research suggested that tectonic activity could result in a rapid rise in ground water, which could flood the repository allowing radionuclides to escape. A Nuclear Regulatory Commission geologist, John Trapp, cautions that volcanic activity renders the site unsuitable. Dr. Trapp visited Yucca Mountain in May 1989 and reported,

I, therefore, am of the opinion that this is not the site at which * * * to license the first high-level radioactive waste repository.

Secretary of Energy Watkins announced late last year the Department's plan to restructure the flawed program, apparently agreeing with what we in Nevada have said all along. In the "report to Congress on Reassessment of the Civilian Radioactive Waste Management Program," states:

The Secretary of Energy has recently completed an extensive review of the Civilian Radioactive Waste Management Program and concluded that it cannot be effectively executed in its current form. An important underlying premise of these Secretarial actions is that the program and supporting activities have a sound scientific basis. The intent is to develop and follow a solid, integrated plan based on a realisitc assessment of the current situation.

DOE outlined the three-point action plan which includes:

First, a restructuring of the Office of Civilian Radioactive Waste Management;

Second, initiatives to gain access to the Yucca Mountain site to continue the scientific investigations needed to evaluate the site's suitability for a repository; and

Third, an initiative for establishing integrated monitored retrievable storage [MRS] with a target for spent-fuel acceptance in 1998.

In presenting this restructuring plan to Congress, DOE admits its efforts to date had been unrealistic. The plan delays the opening of the repository by 7 years, from 2003 to 2010. After spending $2 billion, DOE admitted that "dissatisfaction existed with earlier assessment of the site."

The Nevada Legislature has outlawed nuclear waste in the State. Consequently, the State has refused to act on DOE permit applications necessary for testing activities at the Yucca Mountain site. Nevada filed its own lawsuit in December 1989 claiming that it has the right to bar DOE from carrying out Congress' mandate because the State has "disapproved" the Yucca Mountain site. Congress has not taken action to override the State's veto. In January, the Department of Energy filed a lawsuit against Nevada asking for a court order that would require the State to act on DOE permit applications. We hope these judicial avenues are allowed to continue on course.

Mr. President, the Nuclear Waste Technical Review Board, created by the 1987 amendments to the Nuclear Waste Policy Act, recently reported to Congress on the Nuclear Waste Program. The Board agreed with DOE's restructuring program. The Board's first report states that:

The DOE needs to implement management improvements, to pursue an orderly program of scientific investigations that is not driven by unrealistic scheduling demands, and to establish a monitored retrievable storage [MRS] facility with more flexible linkages to the repository to allow early acceptance of spent nuclear fuel.

The Board also urged that:

High priority be given to the studies of the natural hazards of volcanism, faulting, and earthquakes, as well as to the hydrogeologic framework of Yucca Mountain.

After spending $3 billion already on a bad idea, it's time to stop throwing money away. If allowed to continue, the agency's policies and programs will only bring failures. We should seriously consider other options to address nuclear waste disposal. Onsite storage is definitely feasible. It is safe, fair, and less expensive.

I have had an opportunity to meet on several occasions with John Bartlett, the President's nominee to fill the position of Director of the Office of Civilian Radioactive Waste Management. We discussed at length the many difficulties facing the program. Mr. Bartlett seems to understand the need for an independent oversight role for the State and has pledged to ensure that adequate funding is provided for this purpose. He has also agreed with the need to decouple the MRS schedule from the repository schedule and feels the current judicial process should be given fair opportunity to resolve the waste issues. I hope to work with Mr. Bartlett to see these objectives come to pass.

Mr. BRYAN. Mr. President, today I wish to inform the Senate of a very pressing issue for the State of Nevada. One of the most critical posts in the Department of Energy, the Director of the Office of Civilian Radioactive Waste Management, is vacant and the administration has submitted Mr. Bartlett for approval of the Senate.

Mr. Bartlett's nomination posed an opportunity for those of us from Nevada to delve deeper into the DOE's intentions on a number of fronts: What is the direction of the Yucca Mountain repository project? What are DOE's intentions toward the State of Nevada, should my State prevail in the ongoing litigation with the DOE. And finally, what opinion did Mr. Bartlett have toward the funding of vital independent research being done by the State of Nevada on nuclear waste issues? This last point has been of particular concern for those of us in Nevada, who have seen the DOE and the Congress reduce and attempt to limit our use of these funds.

Together, with Senator REID, I met with Mr. Bartlett on two separate occasions. We expressed as forcefully as we could the unfair treatment our State has received over the nuclear waste issue. He listened.

His responses were forthright, but it has been the painful lesson learned by Nevadans, that things are not always as they seem. We respectfully asked him to respond to some questions, which to his credit, he agreed to immediately.

In his reply to our questions, Mr. Bartlett addressed a number of concerns, the most critical being his degree of support for the State of Nevada's independent research of the work being done at Yucca Mountain by the DOE. After an exchange of memos, he defined a clear funding philosophy and put that down on paper. Under that formula, the State of Nevada program would be entitled to triple the amount of Federal funds for independent research; an increase from the presently budgeted $5 million to almost $15 million.

We were also concerned about the continuing rumors that should the ongoing litigation between the State of Nevada and the DOE end in failure for the DOE, that the agency would come to Congress to seek to reverse the decision through legislation. Mr. Bartlett indicated his opposition to seeking a Federal legislative override of any court decision.

Finally, we asked Mr. Bartlett to meet personally with the director of the Nevada State nuclear waste office; that meeting was held yesterday.

Mr. Bartlett's nomination will go forward. Only the course of events will show if Mr. Bartlett will bring to this failed program the needed objectivity and courage to reevaluate this program. And I am confident, that if Mr. Bartlett did take a fair look at the program, then the DOE would withdraw from Yucca Mountain. If Mr. Bartlett does take that second look, then he will have earned the respect of an entire State.

STATEMENT ON THE NOMINATION OF LEO A. GIACOMETTO

Mr. BURNS. Mr. President, today one of the outstanding young leaders of Montana was accepted as President Bush's appointment to serve as U.S. Marshall for the State of Montana. Leo Giacometto is just one of many young men and women that this adminstration has attracted to public service. Mr. Giacometto served two terms as a State representative from the southeastern district and ranched down on the Little Missouri River just north of Alzata, MT. He was the youngest member of the Montana State House of Representatives and a strong law and order advocate.

I would like to thank him and his family for stepping forward and accepting this challenging position and wish them well. Mr. Giacometto has my full support.

STATEMENT ON THE NOMINATION OF GLEN L. BOWER

Mr. DIXON. Mr. President, I am pleased to speak today in support of Mr. Glen L. Bower, who has been nominated by the President to serve as the Chairman of the Railroad Retirement Board. I believe the President has

made an excellent choice for this important position.

Glen Bower was born and raised in the State of Illinois, and has a long record of distinguished public service in our great State. He has recently served as the assistant director and general counsel at the Illinois Department of Revenue. In 1979, Glen was sent by the voters to the Illinois House of Representatives, where he served his constituents until 1983. Just prior to his tenure in the State house, Glen served a four year elected term as state's attorney for Effingham County, during which time he also co-chaired the Illinois State's attorney association's Juvenile Justice Committee.

I am only lightly touching upon this man's vast record of public service. In addition to the jobs I have described that he has held over the last 15 years, Glen has also served on several boards and committees. These additional contributions to public service include, the "Committee of Fifty," which met for 2 years to review the need for an Illinois constitutional committee; the U.S. Economic Advisory Board, to which Commerce Secretary Malcolm Baldrige appointed Glen to serve from 1982 to 1985; serving on the board of trustees of McKendree College in Lebanon, IL; and serving a 4-year appointment by President Ford to the 21-member National Advisory Committee for Juvenile Justice and Delinquency Preventions.

I have known Glen Bower for at least 10 years, and in that time I have always known him to take a bipartisan approach to issues. Glen is very highly regarded by members of the Illinois congressional delegation that have had the privilege to work with him. He is highly intelligent, and he is a devoted public servant. I unequivocally recommend him, and I am delighted that the Senate will confirm him to the Railroad Retirement Board.

DEPARTMENT OF VETERANS AFFAIRS

Mr. MITCHELL. Mr. President, I ask unanimous consent that the nomination of D'Wayne Gray, to be Chief Benefits Director of the Department of Veterans Affairs, be discharged from the Committee on Veterans' Affairs; that the Senate proceed to the immediate consideration of the nomination; that any statements be inserted in the RECORD, as if read; that the nominee be confirmed; that the motion to reconsider the vote be laid upon the table; that the President be notified of the Senate's action; and that the Senate return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

The nomination was considered and confirmed.

STATEMENT ON THE NOMINATION OF D'WAYNE GRAY

Mr. CRANSTON. Mr. President, as chairman of the Committee on Veterans' Affairs, I rise in support of the nomination of D'Wayne Gray to be the Chief Benefits Director of the Department of Veterans Affairs, for a term of 4 years. Mr. Gray is the first nominee to this position under the legislation, the Department of Veterans Affairs Act (Public Law 100-527), which elevated the Veterans' Administration to Cabinet status. Section 3(c) of that measure also provided, for the first time, for the Chief Benefits Director to be a Presidential nominee subject to Senate confirmation and prescribed a statutory term of 4 years. Previously, the Chief Benefits Director was named by the Administrator of Veterans' Affairs, with no statutorily established term.

Our committee, by a poll completed today, has voted 11 to 0 in support of Mr. Gray's nomination. Since, however, we were not able to meet to vote on the nomination, we are proceeding by way of unanimous consent to have the committee discharged from further consideration in order to obtain Senate action before the Senate goes out today.

As head of the Veterans Benefits Administration [VBA], D'Wayne Gray would be the principal VA executive responsible for the payment and administration of a vast array of benefits, which will involve total expenditures of $16.4 billion in fiscal year 1990—nearly 60 percent of VA's projected expenditures for this year. Through its 58 regional offices, VBA provides services to a potential clientele that totals 74 million people or almost 30 percent of the Nation's population. Programs within VBA include, among others, service-connected disability compensation, non-service-connected disability pension for wartime veterans, survivors' benefits, education, home loan guaranty, vocational rehabilitation for service-disabled veterans, and life insurance.

QUALIFICATIONS OF THE NOMINEE

Mr. President, as I noted during the committee's February hearing on this nomination, D'Wayne Gray's qualifications are impressive. His distinguished military career covered over 35 years of service in the U.S. Marine Corps, beginning with a year and a half as a private and PFC prior to entering the University of Texas. Upon graduation he received his commission. By the time of his retirement in 1987, he was a three-star general. Along the way, he served three tours in combat theaters, one in Korea and two in Vietnam. From 1979 to 1985, he served in a succession of positions of increasing responsibility at the U.S. Marine Corps Headquarters in Washington, culminating in his service as Chief of Staff, and concluded his service as the commanding general of the Marine Corps in the Pacific from 1985 to 1987. His military decorations include the Distinguished Service Medal, Legion of Merit, Bronze Star, Meritorious Service Medal, Air Medal, Joint Service Commendation Medal, Navy Commendation Medal, and Combat Action Ribbon.

Since retiring, D'Wayne has served as a consultant for the Naval Research Advisory Committee, and as executive director of the Montgomery County Revenue Authority in Rockville, MD. He currently is serving as a consultant to the Secretary of Veterans Affairs.

Mr. President, in addition to the great responsibilities and challenges inherent in the important position of Chief Benefits Director, D'Wayne Gray will have the added burden of being a pioneer of sorts. Assuming his confirmation as the 12th Chief Benefits Director, not only will he be the first Presidential appointee and thus the first Director to have come before the Senate for confirmation, but he will also be the first to come from outside of VA's benefits program career force. Being the first such "outsider" should present him with many challenges; likewise, it should give VA the benefit of a fresh perspective and approach.

In establishing the statutory position for which Mr. Gray has been nominated, Congress took great pains to ensure the selection of a qualified person and to provide that person with independence and insulation from political interference. Section 3(c) of Public Law 100-527 specifies that the Chief Benefits Director is to be appointed by the President "without regard to political affiliation or activity." The appointment must be made "solely on the basis of integrity and demonstrated ability in fiscal management and the administration of programs within the Veterans Benefits Administration or programs of similar content and scope." Moreover, the appointment may be made only after the establishment of an independent Search Commission, with the majority of members from outside Government, and the Commission's submission of recommendations of at least three individuals to the President along with the Secretary's comments on those recommended by the Commission. The law requires that the Chief Benefits Director be appointed for a term of 4 years with successive reappointments permitted and provides that, if the President removes the Chief Benefits Director prior to the completion of the appointed term, the President must communicate the reasons for removal to both Houses of Congress.

I was instrumental in authoring these rather extraordinary protective provisions, and I believe very strongly

in the importance of each of them in precluding the politicization of the position of Chief Benefits Director.

I also want to note that Congress quite deliberately chose to make the title of this position the same title that has been attached to it for some 37 years. Although the position is of Under Secretary rank as an Executive Level III position, it is not in any way a traditional, political Under Secretary position—filled in the traditional manner as sub-Cabinet jobs throughout the Government are filled. I know of no position in the Federal Government—other than the counterpart position of VA Chief Medical Director—that has this degree of statutorily prescribed independence from the political selection process.

Further, it is notable that there are a number of other top Department or agency operating officials at the so-called Executive Level III, Under Secretary level who carry significant historical titles which have not been altered, such as the Commissioner of Internal Revenue, the Urban Mass Transportation Administrator, the Director of the FBI, and the Archivist of the United States.

Mr. President, the fresh insights and perspectives which Mr. Gray brings from outside the Department likely will afford him many opportunities within it; by the same token, there will be equally significant challenges for him—including some arising from the apprehensions of others about his being an outsider. Based on the nominee's remarks to me and committee staff throughout the confirmation process and his responses to questions posed by committee members prior to, during, and subsequent to his confirmation hearing, I am confident that he has the capacity to meet these challenges with the sensitivity needed to allay any misgivings and to win the confidence of those with whom he will work and interact.

Finally, I note that the committee received a January 30, 1990, letter from the Office of Government Ethics to the effect that Mr. Gray is in compliance with applicable laws and regulations governing conflicts of interest and that my review of the FBI report on the nominee has revealed no bar to his confirmation. Assuming Senate action to confirm this nomination, I look forward to working with D'Wayne Gray in ensuring that our Nation's veterans are well served and receive all the benefits to which they are so justly entitled.

Mr. President, on behalf of the Committee on Veterans' Affairs, I recommend this nomination to the Senate.

LEGISLATIVE SESSION

The PRESIDING OFFICER. Under the previous order, the Senate will return to legislative session.

MESSAGES FROM THE HOUSE

At 12:30 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the House agrees to the amendment of the Senate to the bill (H.R. 1048) to provide for the acquisition and publication of data about crimes that manifest prejudice based on certain group characteristics.

The message also announced that the House has passed the following bill, in which it requests the concurrence of the Senate:

H.R. 4404. An act making dire emergency supplemental appropriations for disaster assistance, food stamps, unemployment compensation administration, and other urgent needs, and transfers, and reducing funds budgeted for military spending for the fiscal year ending September 30, 1990, and for other purposes.

At 6:27 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the House has passed the following bill, in which it requests the concurrence of the Senate:

H.R. 2571. An act to provide for the designation of certain National Wildlife Refuge lands as wilderness in the State of Arizona.

MEASURES REFERRED

The following bills were read the first and second times by unanimous consent, and referred as indicated:

H.R. 2571. An act to provide for the designation of certain National Wildlife Refuge lands as wilderness in the State of Arizona; to the Committee on Environment and Public Works.

H.R. 4404. An act making dire emergency supplemental appropriations for disaster assistance, food stamps, unemployment compensation administration, and other urgent needs, and transfers, and reducing funds budgeted for military spending for the fiscal year ending September 30, 1990, and for other purposes; to the Committee on Appropriations.

ENROLLED BILL SIGNED

The ACTING PRESIDENT pro tempore (Mr. HARKIN) reported that on today, April 5, 1990, he had signed the following enrolled bill, which had previously been signed by the Speaker of the House:

S. 1813. An act to ensure that funds provided under section 4213 of the Indian Alcohol and Substance Abuse Prevention and Treatment Act of 1986 may be used to acquire land for emergency shelters.

ENROLLED BILL PRESENTED

The Secretary of the Senate reported that on today, April 5, 1990, he had presented to the President of the United States the following enrolled bill:

S. 1813. A bill act to ensure that funds provided under section 4213 of the Indian Alcohol and Substance Abuse Prevention and Treatment Act of 1986 may be used to acquire land for emergency shelters.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-2717. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report on the President's second special impoundment message for fiscal year 1990; pursuant to the order of January 30, 1975, as modified on April 11, 1986, referred jointly of the Committee on Appropriations, the Committee on Budget, the Committee on Foreign Relations, the Committee on Agriculture, Nutrition, and Foresty, and the Committee on Commerce, Science, and Transportation.

EC-2718. A communication from the Secretary of Agriculture, transmitting, pursuant to law, the annual report on trade policies and market opportunities for United States farm exports for 1989; to the Committee on Agriculture, Nutrition, and Forestry.

EC-2719. A communication from the Under Secretary of Defense (Acquisition), transmitting, pursuant to law, the selected acquisition reports for the quarter ended December 31, 1989; to the Committee on Armed Services.

EC-2720. A communication from the Assistant Secretary of the Army (Installations, Logistics, and Environment), transmitting, pursuant to law, notice that the Army intends to initiate, during May 1990, lethal chemical disposal operations at the Johnston Atoll Chemical Agent Disposal System; to the Committee on Armed Services.

EC-2721. A communication from the Acting Director of the Defense Security Assistance Agency, transmitting, pursuant to law, a report containing an analysis and description of services performed by full-time U.S. Government employees under certain sections of the Arms Export Control Act; to the Committee on Armed Services.

EC-2722. A communication from the Chairman of the Federal Financial Institutions Examination Council, transmitting, pursuant to law, the annual report of the Council for fiscal year 1989; to the Committee on Banking, Housing, and Urban Affairs.

EC-2723. A communication from the Under Secretary of Commerce (Oceans and Atmosphere), transmitting, pursuant to law, the biennial report of the Office of Ocean and Coastal Resource Management, National Oceanic and Atmospheric Administration; to the Committee on Commerce, Science, and Transportation.

EC-2724. A communication from the Secretary of the Interior, transmitting, pursuant to law, part 1 of the report on National historic landmarks that have been damaged or to which damage to their integrity is anticipated; to the Committee on Energy and Natural Resources.

EC-2725. A communication from the Administrator of the Energy Information Administration, transmitting, pursuant to law, a report entitled "Annual Report on U.S. Coal Imports, 1989"; to the Committee on Energy and Natural Resources.

EC-2726. A communication from the Assistant Administrator of the Environmental Protection Agency, transmitting, pursuant

to law, the annual report on progress being made towards termination of ocean dumping of sewage sludge and industrial waste for calendar year 1989; to the Committee on Enviroment and Public Works.

EC-2727. A communication from the Assistant Administrator of the Environmental Protection Agency, transmitting, pursuant to law, a report on surveillence and enforcement of sewage sludge dumping; to the Committee on Environment and Public Works.

EC-2728. A communication from the Secretary of Housing and Urban Development, transmitting a draft of proposed legislation to amend Federal laws in order to extend the low-income housing credit; to the Committee on Finance.

EC-2729. A communication from the Secretary of Housing and Urban Development, transmitting a draft of proposed legislation to amend the Internal Revenue Code of 1986 to stimulate employment in, and to promote revitalization of, economically distressed areas designated as enterprise zones, by providing Federal tax relief for employment and investments, and for other purposes; to the Committee on Finance.

EC-2730. A communication from the Chairman of the Physician Payment Review Commission, transmitting, pursuant to law, the 1990 annual report of the Commission; to the Committee on Finance.

EC-2731. A communication from the Fiscal Assistant Secretary of the Treasury, transmitting, pursuant to law, the annual reports on the Airport and Airway Trust Fund, the Asbestos Trust Fund, the Black Lung Disability Trust Fund, the Harbor Maintenance Trust Fund, the Hazardous Substance Superfund, the Highway Trust Fund, the Inland Waterways Trust Fund, the Leaking Underground Storage Tank Trust Fund, the Nuclear Waste Trust Fund, the Reforestation Trust Fund, and a Statement of Liabilities and Other Financial Commitments of the United States Government; to the Committee on Finance.

EC-2732. A communication from the President of the African Development Foundation, transmitting a draft of proposed legislation to authorize appropriations for the African Development Foundation, and for other purposes; to the Committee on Foreign Relations.

EC-2733. A communication from the Secretary of State, transmitting, pursuant to law, the 1989 annual report on Voting Practices in the United Nations; to the Committee on Foreign Relations.

EC-2734. A communication from the Assistant Legal Advisor for Treaty Affairs, Department of State, transmitting, pursuant to law, a report on international agreements, other than treaties, entered into by the United States in the sixty day period prior to March 29, 1990; to the Committee on Foreign Relations.

EC-2735. A communication from the Chairman of the National Labor Relations Board, transmitting, pursuant to law, the annual report of the board under the Government in the Sunshine Act for calendar year 1989; to the Committee on Governmental Affairs.

EC-2736. A communication from the Acting Director of the Office of Government Ethics, transmitting, pursuant to law, the first biennial report of the Office of Government Ethics; to the Committee on Governmental Affairs.

EC-2737. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of D.C. Act 8-182 adopted by the Council on March 13, 1990; to the Committee on Governmental Affairs.

EC-2738. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of D.C. Act 8-183 adopted by the Council on March 13, 1990; to the Committee on Governmental Affairs.

EC-2739. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of D.C. Act 8-138 and D.C. Act 8-184; to the Committee on Governmental Affairs.

EC-2740. A communication from the Executive Director of the Interstate Commission on the Potomac River Basin, transmitting, pursuant to law, a report on the financial audit of the Commission for fiscal year 1989; to the Committee on Governmental Affairs.

EC-2741. A communication from the President of the American Academy and Institute of Arts and Letters, transmitting, pursuant to law, the annual report on the activities of the Academy during calendar year 1989; to the Committee on the Judiciary.

EC-2742. A communication from the Secretary of Veterans Affairs, transmitting, pursuant to law, the annual report of the Department of Veterans Affairs under the Freedom of Information Act for calendar year 1989; to the Committee on the Judiciary.

EC-2743. A communication from the General Counsel of the Federal Housing Finance Board, transmitting, pursuant to law, the annual report of the Board under the Freedom of Information Act for calendar year 1989; to the Committee on the Judiciary.

EC-2744. A communication from the Acting Solicitor of the United States Commission on Civil Rights, transmitting, pursuant to law, the annual report of the Commission under the Freedom of Information Act for calendar year 1989; to the Committee on the Judiciary.

EC-2745. A communication from the Secretary of Health and Human Services, transmitting, pursuant to law, the annual report on activities and accomplishments of the State programs operated to assist persons with developmental disabilities and their families; to the Committee on Labor and Human Resources.

EC-2746. A communication from the Chairman of the Federal Courts Study Committee, transmitting, pursuant to law, the report and recommendations of the Committee; to the Committee on the Judiciary.

EC-2747. A communication from the Director, Office of Public Affairs, Department of Agriculture, transmitting, pursuant to law, the annual report of the Department under the Freedom of Information Act for calendar year 1989; to the Committee on Judiciary.

EC-2748. A communication from the Secretary of Health and Human Services, transmitting a draft of proposed legislation to amend the Low-Income Home Energy Assistance Act of 1981; to the Committee on Labor and Human Resources.

EC-2749. A communication from the Secretary of Education, transmitting, pursuant to law, a report describing the Homeless Children and Youth Program activities for the period October 1, 1988, through September 30, 1989; to the Committee on Labor and Human Resources.

EC-2750. A communication from the Secretary of Veterans Affairs, transmitting a draft of proposed legislation to amend title 38, United States Code, to revise the copayment formulas for those non-service-connected veterans with the means to contribute toward the cost of their care; to the Committee on Veterans' Affairs.

EC-2751. A communication from the Secretary of Veterans Affairs urging the adoption of certain Veterans health care legislation; to the Committee on Veterans' Affairs.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. KENNEDY, from the Committee on Labor and Human Resources, with an amendment, in the nature of a substitute:

S. 1511. A bill to amend the Age Discrimination in Employment Act of 1967 to clarify the protections given to older individuals in regard to employee benefit plans and for other purposes (Rept. No. 101-263).

By Mr. PELL, from the Committee on Foreign Relations, without amendment, and with a preamble:

S. Res. 231. Resolution urging the submission of the Convention on the Rights of the Child to the Senate for its advice and consent to ratification.

By Mr. BIDEN, from the Committee on the Judiciary, unfavorably without amendment:

S. 640. A bill to regulate interstate commerce by providing for uniform standards of liability for harm arising out of general aviation accidents.

By Mr. PELL, from the Committee on Foreign Relations, without amendment, and with a preamble:

S. Con. Res. 112. Concurrent resolution expressing the sense of the Congress that the United States should seek to obtain an Advisory Opinion for the International Court of Justice concerning the right of self-determination of the people of Lithuania.

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. LEAHY, from the Committee on Agriculture, Nutrition, and Forestry:

John C. Foltz, of Ohio, to be Administrator of the Federal Grain Inspection Service.

(The above nomination was reported with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. RIEGLE, from the Committee on Banking, Housing, and Urban Affairs:

Robert C. Larson, of Michigan, to be a Member of the Oversight Board of the Resolution Trust Corporation for a term of 3 years;

Philip C. Jackson, Jr., of Alabama, to be a Member of the Oversight Board of the Resolution Trust Corporation for a term of 3 years.

(The above nominations were reported with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. BIDEN, from the Committee on the Judiciary:

Alan D. Lourie, of Pennsylvania, to be U.S. Circuit Judge for the Federal Circuit;

John S. Martin, Jr., of New York, to be U.S. District Judge for the Southern District of New York;

Daniel B. Sparr, of Colorado, to be U.S. District Judge for the District of Colorado;

Norman H. Stahl, of New Hampshire, to be U.S. District Judge for the District of New Hampshire;

Leo A. Giacometto, of Montana, to be U.S. Marshal for the District of Montana for the term of 4 years;

Terrenace B. Adamson, of Georgia, to be a member of the Board of Directors of the State Justice Institute for a term expiring September 17, 1991;

Vivi L. Dilweg, of Wisconsin, to be a member of the Board of Directors of the State Justice Institute for a term expiring September 17, 1991;

Carl F. Bianchi, of Idaho, to be a member of the Board of Directors of the State Justice Institute for a term expiring September 17, 1992;

James Duke Cameron, of Arizona, to be a member of the Board of Directors of the State Justice Institute for a term expiring September 17, 1992;

Janice L. Gradwohl, of Nebraska, to be a member of the Board of Governors of the State Justice Institute for a term expiring September 17, 1992; and

Malcolm M. Lucas, of California, to be a member of the Board of Directors of the State Justice Institute for a term expiring September 17, 1992.

By Mr. PELL, from the Committee on Foreign Relations:

H. Douglas Barclay, of New York, to be a member of the Board of Directors for the Overseas Private Investment Corporation for the term expiring December 17, 1991;

Henrietta Hugentobler Holsman, of California, to be an Assistant Administrator of the Agency for International Development;

James Henry Michel, of Virginia, to be an Assistant Administrator of the Agency for International Development;

J. Carter Beese, Jr., of Maryland, to be a member of the Board of Directors of the Overseas Private Investment Corporation for a term expiring December 17, 1992;

Donald Burnham Ensenat, of Louisiana, to be a member of the Board of Directors of the Overseas Private Investment Corporation for a term expiring December 17, 1992;

C. Anson Franklin, of Virginia, to be an Assistant Administrator of the Agency for International Development;

Richard E. Bissell, of Virginia, to be an Assistant Administrator of the Agency for International Development;

James Henry Michel, of Virginia, to be a member of the Board of Directors of the Inter-American Foundation for the remainder of the term expiring September 20, 1992;

Deane Roesch Hinton, of Illinois, a career member of the Senior Foreign Service, with the personal rank of Career Ambassador, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Panama, to which position he was appointed during the recess of the Senate from November 22, 1989, to January 23, 1990.

(Contributions are to be reported for the period beginning on the first day of the fourth calendar year preceding the calendar year of the nomination and ending on the date of the nomination.)

Nominee: Deane R. Hinton.

Post: Ambassador to Panama.

Contributions, amount, date, and donee:

1. Self, none.

2. Spouse, none.

3. Children and spouses, Deborah Hinton, Chris Hinton, Joe and Kathy Hinton, Joanna Hinton, Veronica Hinton, Mr./Mrs. Pedro Arrivillaga, Mr./Mrs. Guillermo Arrivillaga, Mr./Mrs. Grimm, Juan Jose Arrivillaga, Sebastian Hinton, and Deane Patrick Hinton, none.

4. Parents, Col. Joe Hinton contributes $300 to $700 a year to various GOP committees. Mrs. Doris Hinton—deceased.

5. Grandparents, Mr./Mrs. Frank Roesch—deceased. Mr./Mrs. Arthur Hinton—deceased.

6. Brothers and spouses, none.

7. Sisters and spouses, none.

Jonathan Moore, of Massachusetts, to be the Representative of the United States of America on the Economic and Social Council of the United Nations, with the rank of Ambassador.

(Contributions are to be reported for the period beginning on the first day of the fourth calendar year preceding the calendar year of the nomination and ending on the date of the nomination.)

Nominee: Jonathan Moore.

Post: U.S. Ambassador to the United Nations and Representative to ECOSOC.

Contributions, Amount, Date, and Donee:

1. Self, none.

2. Spouse, none.

3. Children and spouses, Joan, Jocelyn, Jennifer, and Charles, none.

4. Parents, Adeline N. Moore, none.

5. Grandparents, Deceased.

6. Brothers and spouses, Benjamin and Barbara Moore, $75, November 1986, $50, November 1988, Sid Yates for Congress; $50, August 1989, Royer Committee; $50, November 1989, People for Joe King; and $25, December 1989, Norman Rice Celebration.

7. Sisters and spouses, Deborah and Peter Geithner, none. Lydia DuPertuis, $10, October 1986, Hoffer for Congress.

Shirin Raziuddin Tahir-Kheli, of Pennsylvania, to be the Alternate Representative of the United States of America for Special Political Affairs in the United Nations, with the rank of Ambassador.

(Contributions are to be reported for the period beginning on the first day of the fourth calendar year preceding the calendar year of the nomination and ending on the date of the nomination.)

Nominee: Shirin Tahir-Kheli.

Post: Alternative Representative of the U.S. for Special Political Affairs in the U.N.

Contributions, amount, date, and donee:

1. Self, none.

2. Spouse, $20, January 19, 1934, Republican National Committee; $25, March 9, 1984, National Federation of Republican Women; $10, March 9, 1984, Republican National Committee; $25, September 7, 1984, Republican National Committee; $25, March 1, 1985, Republican National Committee; $25, March 1, 1985, National Federation of Republican Women; $25, October 4, 1986, Republican National Committee; $25, March 11, 1987, Republican National Committee; $25, January 7, 1988, Republican National Committee; $25, December 24, 1988, Republican National Committee; $25, July 17, 1989, Republican National Committee.

3. Children and spouses, none.

4. Parents, none.

5. Grandparents, none.

6. Brothers and spouses Toufiq and Ulrike Siddiqi, none.

7. Sisters and spouses, none.

Nelson C. Ledsky, of Maryland, a Career Member of the Senior Foreign Service, Class of Minister-Counselor, for the rank of Ambassador during his tenure of service as Special Cyprus Coordinator.

(Contributions are to be reported for the period beginning on the first day of the fourth calendar year preceding the calendar year of the nomination and ending on the date of the nomination.)

Nominee: Nelson C. Ledsky.

Post: Special Coordinator for Cyprus.

Contributions, amount, date, and donee:

1. Self, none.

2. Spouse, Cecile W. Ledsky, none.

3. Children and spouses, Rebecca, Jonathan, Karen Ledsky, none.

4. Parents, Nathan and Bertha Ledsky (deceased).

5. Grandparents, Morris and Libby Ledsky (deceased); Jacob and Gazella Glattstein (deceased).

6. Brothers and spouses, none.

7. Sisters and spouses, Robert and Rita (sister) Fueglein, none.

(The above nominations were reported with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. CRANSTON:

S. 2421. A bill to amend the Consolidated Omnibus Budget Reconciliation Act of 1985 to provide transitional Medicare eligibility rules for State and local government employees covered by optional State agreements; to the Committee on Finance.

By Mr. BOND (for himself and Mr. PRYOR):

S. 2422. A bill to establish a research program for the development and implementation of new technologies in food safety and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. JOHNSTON (for himself and Mr. BREAUX):

S. 2423. A bill to provide for Federal recognition of the United Houma Nation of Louisiana, and for other purposes; to the Select Committee on Indian Affairs.

By Mr. BAUCUS (for himself and Mr. CHAFEE):

S. 2424. A bill to amend the Internal Revenue Code of 1986 to provide for the imposition of certain excise taxes related to the enforcement of provisions of the Clean Air Act added by the Clean Air Act Amendments of 1990; to the Committee on Finance.

By Mr. KERRY (for himself, Mr. BIDEN, and Mr. BRADLEY):

S. 2425. A bill to amend the Federal Election Campaign Act of 1971 to provide for a voluntary system of spending and public financing of Senate general election campaigns, to limit contributions by multicandidate political committees, and for other pur-

poses; to the Committee on Rules and Administration.

By Mr. LEAHY (for himself, Mr. LUGAR, Mr. MITCHELL, Mr. DOLE, Mr. BURNS, Mr. BRADLEY, Mr. GRAMM, Mr. WIRTH, Mr. DURENBERGER, Mr. PRYOR, Mr. BOSCHWITZ, Mr. SANFORD, Mr. JEFFORDS, Mr. MCCAIN, Mr. WARNER, Mr. D'AMATO, Mr. MURKOWSKI, Mr. GARN, Mr. HATCH, Mr. STEVENS, Mr. GORTON, Mr. BOND, Mr. COATS, Mr. WILSON, Mr. KASTEN, Mr. SIMON, and Mr. ADAMS):

S. 2426. A bill to authorize the President to designate a private nonprofit Foundation as eligible to receive funds for the purpose of promoting community tree planting and cultivation projects to authorize the Secretary of Agriculture to establish a rural tree planting program and a community tree planning program, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. LEAHY (for himself, Mr. LUGAR, Mr. BAUCUS, and Mr. CONRAD):

S. 2427. A bill to provide for the establishment of a coordinated and cooperative Federal, State, and local forest program for the management and enhancement of forest lands, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. GRAMM (for himself and Mr. DOMENICI):

S. 2428. A bill to authorize negotiation of Mexico-United States free trade agreement, and for other purposes; to the Committee on Finance.

By Mr. BINGAMAN:

S. 2429. A bill to establish the Mimbres Culture National Monument and to establish an archeological protection system for Mimbres sites in the State of New Mexico, and for other purposes; to the Committee on Energy and Natural Resources.

S. 2430. A bill to amend the Zuni-Cibola National Historical Park Establishment Act of 1988 to enlarge the time in which the Secretary of the Interior may accept a leasehold interest for inclusion in the park; to the Committee on Energy and Natural Resources.

By Mr. LEAHY:

S. 2431. A bill to provide for the establishment of farmland resource conservation programs, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. BINGAMAN:

S. 2432. A bill to provide for payments in lieu of taxes to be made with respect to certain lands comanaged by the Bureau of Land Management and the Secretary of the Army; to the Committee on Energy and Natural Resources.

By Mr. WIRTH (for himself and Mr. GRAHAM):

S. 2433. A bill to establish a Financial Services Commission, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. DOLE (for Mr. D'AMATO) (for himself, Mr. DECONCINI, Mr. WILSON, Mr. MCCONNELL, and Mr. COATS):

S. 2434. A bill to permit the implementation of the Department of Transportation anti-drug program rule for recipients of Federal mass transit assistance; to the Committee on Commerce, Science, and Transportation.

By Mr. GRAHAM:

S. 2435. A bill to establish within the U.S. Information Agency the Andrei Sakharov Educational Exchange Program; to the Committee on Foreign Relations.

By Mr. CRANSTON (for himself, Mr. PELL, Mr. BOREN, Mr. DECONCINI, and Mr. ROCKEFELLER):

S. 2436. A bill to amend the Peace Corps Act to extend the authorizations of appropriations for the Peace Corps through fiscal year 1992, to provide for limited exceptions to the limitation on reemployment by the Peace Corps and to establish a Peace Corps foreign fluctuations account, and for other purposes; to the Committee on Foreign Relations.

By Mr. JOHNSTON:

S. 2437. A bill to authorize the acquisition of certain lands in the State of Louisiana for inclusion in the Vicksburg National Military Park; to the Committee on Energy and Natural Resources.

By Mr. BAUCUS:

S. 2438. A bill to amend title XVIII of the Social Security Act to make certain modifications in the Medicare Program with respect to payments made under such program to hospitals located within rural areas with 50 beds or fewer, to improve the delivery of health services to individuals residing in rural areas, and for other purposes; to the Committee on Finance.

By Mr. GORE (for himself and Mr. GLENN):

S. 2439. A bill relating to the advertising of certain alcoholic beverages and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. NUNN (for himself and Mr. WARNER) (by request):

S. 2440. A bill to amend various provisions of law that affect the operations and management of the Department of Defense particularly in the areas of military personnel, acquisition reform, civilian personnel management, and for real property; to the Committee on Armed Services.

By Mr. KOHL:

S. 2441. A bill to amend title 17, United States Code, to assure the protection of motion picture copyrights, and for other purposes; to the Committee on the Judiciary.

By Mr. SIMON (for himself, Mr. METZENBAUM, and Mr. KENNEDY):

S. 2442. A bill to amend the Occupational Safety and Health Act of 1970 to expand the rights of victims of occupational safety and health hazards, and for other purposes; to the Committee on Labor and Human Resources.

By Mr. ARMSTRONG (for himself and Mr. BURNS):

S. 2443. A bill to amend the Internal Revenue Code of 1986 to provide that the rate of interest on overpayments and underpayments of tax be the same; to the Committee on Finance.

By Mr. MACK (for himself, Mr. GRAHAM, Mr. GRAMM, Mr. LIEBERMAN, Mr. KASTEN, Mr. DECONCINI, Mr. MCCAIN, Mr. PRESSLER, Mr. HUMPHREY, and Mr. GORTON):

S. 2444. A bill to require limitations and restrictions concerning trade and other transactions with Cuba; to the Committee on Foreign Relations.

By Mr. BOSCHWITZ (for himself, Mr. DOLE, Mr. LUGAR, Mr. MCCONNELL, Mr. LEAHY, and Mr. HARKIN):

S. 2445. A bill to amend the Food Stamp Act of 1977 to require participating retail food stores and wholesale food concerns to provide their taxpayer identifying numbers to the Secretary; to establish criminal penalties applicable to laundering funds obtained from trafficking in coupons; and for other purposes; to the Committee on the Judiciary.

By Mr. SIMPSON:

S. 2446. A bill to take measures to improve the employment verification system under the Immigration and Nationality Act, and for other purposes; to the Committee on the Judiciary.

By Mr. JOHNSTON:

S. 2447. A bill to establish the Bayou Cocodrie National Wildlife Refuge; to the Committee on Environment and Public Works.

By Mr. KERRY (for himself and Mr. KENNEDY):

S. 2448. A bill providing for modification of employment tax treatment of certain crew members on fishing vessels; to the Committee on Finance.

By Mr. RUDMAN (for himself and Mr. HUMPHREY):

S. 2449. A bill to authorize the Secretary of the Air Force to purchase the mobile homes of certain members of the Air Force stationed at Pease Air Force Base, NH; to the Committee on Armed Services.

By Mr. SYMMS (for himself, Mr. HATCH, and Mr. GARN):

S. 2450. A bill to amend the Internal Revenue Code of 1986 to clarify that qualified contributions to a missionary of a church are treated as contributions to the church; to the Committee on Finance.

By Mr. INOUYE (for himself, Mr. MCCAIN, Mr. BAUCUS, Mr. REID, Mr. BURDICK, Mr. DASCHLE, Mr. DECONCINI, Mr. WIRTH, Mr. CONRAD, and Mr. NICKLES):

S. 2451. A bill to establish in the Department of the Interior a Trust Counsel for Indian Assets; to the Select Committee on Indian Affairs.

By Mr. ARMSTRONG:

S. 2452. A bill to amend the Federal Rules of Evidence to establish a tax preparer's privilege; to the Committee on the Judiciary.

By Mr. MOYNIHAN (for himself, Mr. RIEGLE, and Mr. PRYOR):

S. 2453. A bill to establish the Social Security Administration as an independent agency, and for other purposes; to the Committee on Finance.

By Mr. RIEGLE (for himself, Mr. LEVIN, Mr. D'AMATO, Mr. DOMENICI, and Mr. COATS):

S.J. Res 286. Joint resolution to designate the week beginning May 6, 1990, as "National Correctional Officers Week"; to the Committee on the Judiciary.

By Mr. PELL (for himself, Mr. HATFIELD, Mr. MITCHELL, Mr. JEFFORDS, Mr. CRANSTON, Mr. HARKIN, Mr. KENNEDY, Mr. KERRY, Mr. MATSUNAGA, and Mr. SIMON):

S.J. Res. 287. Joint resolution requesting the President of the United States to negotiate agreements to achieve early prohibition of nuclear explosions; to the Committee on Foreign Relations.

By Mr. KASTEN:

S.J. Res. 288. Joint resolution designating January 6 through 12, 1991, as "National Law Enforcement Training Week"; to the Committee on the Judiciary.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. BRYAN (for himself and Mr. REID):

S. Res. 268. Resolution commending the Runnin' Rebels of the University of Nevada at Las Vegs for winning the 1990 National Collegiate Athletic Association Men's Basketball Championship; considered and agreed to.

By Mr. MOYNIHAN (for himself Mr. BENTSEN, Mr. BRADLEY, and Mr. HEINZ):

S. Res. 269. Resolution to express the sense of the Senate that the President ought promptly send to the Senate nominations for the vacancies on the Social Security Board of Trustees.

By Mr. SIMON (for himself, Mr. HUMPHREY, Mr. PELL, Mrs. KASSEBAUM, Mr. KENNEDY, Mr. CRANSTON, Mr. HELMS, and Mr. MITCHELL):

S. Res. 270. Resolution expressing the sense of the Senate regarding the urgent famine situation in Ethiopia; to the Committee on Foreign Relations.

By Mr. HOLLINGS:

S. Con Res. 119. Concurrent resolution setting forth the congressional budget for the U.S. Government for fiscal years 1991, 1992, and 1993; to the Committee on the Budget.

By Mr. BOSCHWITZ (for himself, and Mr. DURENBERGER):

S. Con. Res. 120. Concurrent resolution to commend the National Mental Health Leadership Forum and the National Advisory Mental Health Council; to the Committee on the Judiciary.

By Mr. PRESSLER:

S. Con. Res. 121. Concurrent resolution expressing the sense of the Congress regarding the need for the negotiation of an international agricultural cropland conservation reserve treaty; to the Committee on Foreign Relations.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. CRANSTON:

S. 2421. A bill to amend the Consolidated Omnibus Budget Reconciliation Act of 1985 to provide transitional Medicare eligibility rules for State and local government employees covered by optional State agreements; to the Committee on Veterans' Affairs.

MEDICARE ELIGIBILITY FOR STATE AND LOCAL GOVERNMENTS

Mr. CRANSTON. Mr. President, today I am introducing legislation that would provide certain employees of State and local governments coverage under the Medicare Program.

In 1985, Congress passed legislation requiring all State and local employees hired after April 1, 1986, to participate in the Medicare Program and pay Medicare hospital insurance [HI] taxes. Since this mandate has been in effect, the pool of individuals who are paying into non-Medicare retiree health insurance programs has steadily decreased. This decrease, coupled with the skyrocketing inflation in health care costs we have seen over the past several years, has led to an increase in the cost of providing health insurance coverage for retirees. As a result, school districts in my home State, and possibly other State and local governments, have reported difficulty in continuing to provide retiree health benefits for employees hired before April 1, 1986, who have not been paying into Medicare.

To help address this problem, the California Legislature last year passed a law to allow school districts in the State to elect coverage for their employees under the Medicare HI Program. However, some teachers in school districts that elect this option who, as employees of local government, have not paid HI taxes during their teaching years, will reach retirement age before earning the necessary 40 quarters for Medicare eligibility.

The legislation I am introducing today aims to remedy this shortcoming. It would give credit toward Medicare eligibility for employees—hired before April 1, 1986—of State or local governments voluntarily opting into the Medicare Program for those quarters worked in non-Medicare-taxed jobs. This would allow individuals, generally those aged 55 to 65, to become eligible for Medicare upon reaching age 65 without necessarily having paid the mandatory 40 quarters—or 10 years—in Medicare HI taxes. For California teachers, this bill would allow teachers in districts voluntarily participating in Medicare to receive credit toward Medicare eligibility for those year that they have taught.

This concept of grandfathering into the Medicare Program employees who have not accrued sufficient numbers of quarters for Medicare eligibility is not a new one. When Medicare coverage was extended to Federal employees in 1983, for example, a grandfather clause similar to the one I have proposed was included. That law gave credit for quarters worked in Federal employment to those Federal employees who would not otherwise have met the required number of quarters paid in HI taxes before reaching age 65. Similarly, in 1984, when changes were made regarding Social Security coverage of employees of nonprofit organizations, special eligibility requirements were established for individuals who were near retirement.

Mr. President, this legislation would help protect a small number of elderly citizens against the danger of being without vitally needed health insurance coverage. For example, the California Teachers Association estimates that, if all school districts elect to participate in Medicare, approximately 16,800 teachers between the ages of 55 and 65 would not be fully vested in Medicare by the time they became eligible for Medicare at 65. This represents 7.8 percent of the more than 213,000 teachers who were employed prior to April 1, 1986. At present, an individual is eligible to receive Medicare benefits upon reaching age 65 if he or she has paid Medicare hospital insurance taxes for a minimum of 40 quarters or has become eligible through a spouse. Since it is likely that some of these individuals would become eligible for Medicare through their spouses, this figure represents the maximum number of California teachers who would be grandfathered under this legislation. Should other State or local governments decide to cover employees hired before April 1, 1986, I would expect a similarly small percentage of employees would need assistance under this legislation.

In fact, the Congressional Research Service estimates that approximately 95 percent of all State or local government employees hired prior to April 1986 who have not paid HI taxes during their employment at the State or local level will, upon reaching age 65, nevertheless be eligible for Medicare either through previous work experience in the private sector or through a spouse. Moreover, according to CRS, the number of Federal employees who were grandfathered into the Medicare Program as a result of the 1983 law was extremely small and resulted in no significant cost.

Mr. President, I am concerned about those individuals who, because they work in State and local government, are ar risk of being without vital medical insurance coverage when they reach retirement age. The legislation I am introducing today is designed to address this problem, and I urge my colleagues to join me in cosponsoring this important measure to ensure that older Americans have access to basic and necessary medical care.

I ask unanimous consent that the text of the bill be printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2421

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 13205 of the Consolidated Omnibus Budget Reconciliation Act of 1985 is amended by adding at the end thereof the following new subsection.—

"(e) TRANSITIONAL PROVISIONS.—

"(1) IN GENERAL.—For purposes of sections 226, 226A, and 1811 of the Social Security Act, in the case of any individual—

"(A) who is described in section 218(n)(2) of such Act,

"(B) who performs service both during April 1986 and before April 1, 1986, which constitutes medicare qualified government employment (as defined in section 210(p) of such Act, and

"(C) who would be entitled, under section 226(a)(2)(C), 226(b)(2)(C), 226(a)(1)(A)(ii), or 226A(a)(1)(B)(iii) of such Act, to hospital insurance benefits under part A of title XVIII of such Act but for the failure to include medicare qualified government employment (as so defined) within the meaning of the term 'employment' for purposes of title II of such Act for remuneration paid before April 1, 1986.

the individual's medicare qualified government employment (as so defined) performed before April 1, 1986, for which remuneration was paid before such date, shall be considered to be 'employment' (as so defined), but only for the purpose of providing such entitlement.

"(2) ELIGIBILITY OF OTHER PERSONS.—Any individual who is entitled to hospital insurance benefits under part A of title XVIII of the Social Security Act by reason of the application of paragraph (1) of this subsection, shall be deemed to be entitled to an old-age benefit under section 202 of such Act, or a disability benefit under section 223 of such Act, for purposes of determining eligibility for such hospital insurance benefits for any other person. In applying this paragraph, any such other person who would be entitled to a monthly benefit under section 202 of such Act if such individual (to whom paragraph (1) applies) were entitled to such old-age or disability benefit, shall be deemed to be entitled to such monthly benefit, but only for purposes of determining such person's eligibility for hospital insurance benefits.

"(3) APPROPRIATIONS.—There are authorized to be appropriated to the Federal Hospital Insurance Trust Fund from time to time such sums as the Secretary of Health and Human Services deems necessary for any fiscal year, on account of—

"(A) payments made or to be made during such fiscal year from such Trust Fund with respect to individuals who are entitled to benefits under title XVIII of the Social Security Act solely by reason of paragraph (1) or (2) of this subsection,

"(B) the additonal administrative expenses resulting or expected to result therefrom, and resulting or expected to result therefrom, and

"(C) any loss in interest to such Trust Fund resulting from the payment of those amounts,

in order to place such Trust Fund in the same position at the end of such fiscal year as it would have been in if this subsection had not been enacted.".

(b) The amendment made by subsection (a) shall take effect as if included in the provisions of section 13205 of the Consolidated Omnibus Budget Reconciliation Act of 1985.

By Mr. BOND (for himself and Mr. PRYOR):

S. 2422. A bill to establish a research program for the development and implementation of new technologies in food safety, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

FOOD SAFETY ACT

● Mr. BOND. Mr. President, this morning I rise to reintroduce legislation concerning the safety of food products of animal origin. It is a pleasure once again to be joined in this effort by my distinguished colleague from Arkansas [Mr. PRYOR]. In July 1987, we introduced this initiative with a majority of the Agriculture Committee as cosponsors. It is our hope that we will have the same widespread support again as we move to include it in the 1990 farm bill.

To begin, I must reiterate a point that has been stated many times before—the United States has the safest food supply and best inspection system of any country in the world. This past year, however, a number of food scares have alarmed consumers and drawn attention to some shortcomings in food regulatory laws and programs. In my opinion, suggestions for improvement should not be regarded as condemnation of the present system but recognition of emerging technologies which could make current programs more effective and efficient. Food safety research that results in improved consumer confidence helps build demand for agricultural commodities and is vital to producers, processors, and consumers.

The U.S. Meat and Poultry inspection system is one of the most comprehensive public health programs in the world with nearly 9,000 employees located in over 6,700 meat and poultry plants in every State and territory. My home State of Missouri has 265 federally inspected plants with approximately 313 total USDA meat and poultry inspectors.

The vast majority of food animals in the United States are found to be healthy upon entering the meat supply. In 1988, Food Safety and Inspection Service [FSIS] inspectors examined 5.6 billion chickens, turkeys, and other domesticated waterfowl; 32.7 million cattle; 4.7 million sheep and goats; and 79 million swine. Each of these animals was inspected and very few were found to be diseased or otherwise unfit for consumption.

Further evidence of this fact is the percent condemnation of these animals. In 1988, less than 1 percent of livestock and poultry were condemned at both ante mortem and post mortem inspections.

Mr. President, the wholesomeness and safety of food products of animal origin is very important to the health and well-being of our Nation. Foodborne illnesses are a major public health concern which impose significant costs, both direct and indirect. Direct costs include medical care and lost wages, while indirect costs include recalls and investigations.

Furthermore, it should be noted that one-third of all reported outbreaks of food-related illnesses are attributed to meat and poultry. Although this bill authorizes research for livestock and poultry products only, it is important to recognize that fish and seafood are significant vehicles identified in food poisoning outbreaks.

The legislation which we are introducing today is the logical first step in the process of developing a comprehensive quality assurance program which includes chemical and microbiological sampling. Furthermore, the importance of preventing foodborne illness is growing as larger percentages of the population become more susceptible. These groups include the elderly, young children, and others whose immune systems are suppressed.

Mr. President, the objectives of this legislation were developed from reports, discussions, and testimony presented by people representing a wide variety of interests. Let me summarize the objectives:

The Secretary of Agriculture is authorized to establish a research program which includes:

First, developing the technology for rapid identification of microbiological or chemical contaminants on the farm or throughout the processing and distribution chain. The goal is to have access to accurate results in a matter of seconds or minutes rather than hours or days. For example, a complete analysis could be performed before the product leaves the processing facility and enters the distribution chain.

Second, establishing a statistical framework under which the potential health risks posed by contamination can be measured. In a nutshell, this could be termed risk assessment. Risk assessment is the use of the factual base to define the health effects of exposure of individuals or populations to hazardous materials and situations.

Upon the successful development of these two objectives, the Secretary is further requested to provide funding to:

First, analyze the entire animal product food chain and determine the most effective points where intervention could occur to control or prevent a microbiological or chemical cycle.

Second, develop techniques to monitor the animal product food chain and detect potential microbiological or chemical agents and assist in the removal from commerce of those foods which would be unacceptable under the statistical framework mentioned earlier.

The research projects awarded under this act will be approved by the Secretary of Agriculture on a competitive grant basis. Projects eligible for funding may be submitted by entities within public and private colleges and universities or other entities involved in research in the area of food safety.

To carry out these objectives, there are authorized to be appropriated for each of the fiscal years 1991 through 1995 such sums as may be necessary to carry out this act.

Mr. President, the control of microorganisms such as Salmonella, E. Coli, and Listeria is a very complex issue. We all realize there are no easy answers to this problem. I must reiterate that all foods have the potential for Salmonella contamination, and that it is not feasible to expect eradication in such products in the near future.

It is important that we keep this entire issue in perspective. These are not new bacteria, they have been

around as long as man has been able to identify them and will probably remain long after we are gone. Today, however, the climate is right to work together to obtain the information to control these mircoorganisms. In my judgment, all players in the game: Producers, processors, USDA, marketers, educators, and consumers are aware of the task and are willing to cooperate in efforts to move our current system into the 21st century.

Even if researchers could guarantee animal products free of contaminants, their efforts would be wasted without the cooperation of consumers. Lacking the proper education regarding handling practices, consumers unknowingly exacerbate the extent of foodborne illnesses.

In my view the solution to this problem is threefold. First, children must be exposed to safe handling practices early in life. In today's society, fast food is in and sitdown family dinners often take second place. Without the proper education, children are apt to acquire the bad habits of their elders.

Second, adults must be better informed of these safe handling practices. The livestock and poultry industries, as well as consumer groups, are to be commended for their efforts better to educate consumers. This information can be passed along through various voluntary labeling practices as well as in store point-of-purchase pamphlets and brochures.

Finally, educational programs must be administered throughout the food service industry. As larger proportions of our population eat away from home, the importance of food safety in restaurants and cafeterias becomes critical.

Mr. President, at this point I would ask unanimous consent that an outline of safe handling practices be inserted into the RECORD.

There being no objection, the outline was ordered to be printed in the RECORD; as follows:

SAFE HANDLING PRACTICES

1. Cooking all meat until it is fully done;
2. Washing all cutting boards and utensils thoroughly;
3. Washing hands completely after handling meat and poultry and before moving to the preparation of other foods; and
4. Only thawing products in the refrigerator or on the defrost setting of a microwave and never at room temperature or in warm water.

Mr. BOND. Mr. President, in conclusion, the public's concern over microbiological and chemical contaminants in livestock and poultry must be addressed by the research community. The ability to move beyond visual inspection and into microbiological and chemical sampling is a process which will benefit all of those involved. We must move forward to ensure that appropriate standards are developed to control or prevent the growth and spread of harmful microbes.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2422

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. FINDINGS.

Congress finds that—

(1) food borne illness is a major public health concern that imposes large costs on the public, including expenses related to direct medical care, lost wages, recalls, and investigations;

(2) all food groups have the potential to cause food borne illness, with approximately 33 percent of all reported outbreaks of food-related illnesses attributed to meat and poultry;

(3) the wholesomeness and safety of food products of animal origin is very important to the health and well-being of the United States;

(4) maintenance of consumer confidence in the wholesomeness and safety of food products of animal origin is very important to the food industry and producers; and

(5) the importance of preventing food borne illnesses in growing, due to the increase in the number of older Americans, people with suppressed immune systems, and other individuals who are susceptible to food borne illnesses.

SEC. 2. RESEARCH PROGRAM.

The Secretary of Agriculture (referred to in this Act as the "Secretary") shall establish a research program for the development and implementation of new technologies in food safety. The program shall include research projects designed to decrease the susceptibility of food products of animal origin to infectious or toxic agents (referred to in this Act as "research projects"), including research projects to—

(1) develop technology for the rapid identification of infectious agents and toxins on farms and within the processing and distribution chain;

(2) establish a statistical framework to measure the extent of potential health risks posed by the contamination of the animal product food chain by the agents referred to in paragraph (1);

(3) analyze the animal product food chain to determine the most effective intervention point to control or prevent a microbiological or chemical cycle in—

(A) a production unit;

(B) a processing unit; and

(C) a distribution element; and

(4) develop techniques to monitor the production of food animals and the processing and distribution of food products of animal origin to detect potential microbiological or chemical agents.

SEC. 3. RESEARCH GRANTS.

(a) AUTHORIZATION.—The Secretary shall award grants, for periods not to exceed 5 years, to pay for the Federal share of the costs of funding research projects.

(b) RESEARCH PROPOSALS.—

(1) ELIGIBILITY.—The Secretary shall seek research proposals for research projects. In seeking proposals, the Secretary shall seek the widest participation from persons eligible for research grants, which shall include—

(A) individuals associated with public and private colleges and universities, including—

(i) food scientists;

(ii) agricultural engineers;

(iii) veterinary and public health scientists; and

(iv) animal scientists; and

(B) other entities involved in research in the area of food safety.

(2) EVALUATION.—The Secretary shall perform peer review evaluations of research proposals. In performing the evaluations, the Secretary shall seek the widest participation of qualified scientists in the Federal Government, colleges and universities, State agricultural experiment stations, and the private sector.

(c) FEDERAL SHARE.—

(1) IN GENERAL.—Except as provided in paragraph (2), the Federal share of grants provided for under this section shall be 75 percent.

(2) INCREASES.—The Secretary may increase the Federal share of a grant provided for under this section to 100 percent, if the Secretary determines such action is appropriate.

(d) LIMITATION.—The Secretary may not make a grant under this section for any purpose for which a grant may be made under section 2(d) of the Act entitled "An Act to facilitate the work of the Department of Agriculture, and for other purposes", approved August 4, 1965 (7 U.S.C. 450i(d)) or for the planning, repair, rehabilitation, acquisition, or construction of a building or a facility.

SEC. 4. AUTHORIZATION OF APPROPRIATIONS.

(a) IN GENERAL.—There are authorized to be appropriated for each of the fiscal years 1991 through 1995 such sums as may be necessary to carry out this Act.

(b) ADMINISTRATIVE COSTS.—Four percent of the amount appropriated for each of fiscal years 1991 through 1995 may be retained by the Secretary to pay administrative costs incurred by the Secretary to carry out this Act.●

By Mr. JOHNSTON (for himself and Mr. BREAUX):

S. 2423. A bill to provide for Federal recognition of the United Houma Nation of Louisiana, and for other purposes; to the Select Committee on Indian Affairs.

UNITED HOUMA NATION RECOGNITION ACT

Mr. JOHNSTON. Mr. President, on behalf of Senator BREAUX and myself, I am pleased to introduce today a bill to extend Federal recognition to the United Houma Nation of Louisiana.

Before the creation of the State of Louisiana, the Houma Indians lived along the banks of the Mississippi River in an area now known as Baton Rouge. Driven from their homelands by the encroachment of new settlers, the Houma Indians moved further south into the swamplands of southeast Louisiana and eventually isolated themselves along the coast of the Gulf of Mexico where they currently reside. Despite these disruptions, the Houma have continually maintained their identity as an Indian tribe and community, exercising self-government and autonomy over its members. At present, the United Houma Nation is the largest Indian tribe in Louisiana with approximately 11,000 members

living in seven settlements within Lafourche and Terrebonne Parishes. These settlements, which are currently threatened by severe coastal erosion, have otherwise changed little since the early part of the century. Although trapping and farming have declined because of ecological changes to the surrounding lands and bayous, fishing and shell fishing remain the principal occupations of most families.

Throughout its history, the Houma Tribe has maintained relationships with the Governments of Spain, France, and the United States. In fact, in 1806, 3 years after the Louisiana Purchase, the territorial governor of Louisiana, W.C.C. Claiborne presented medals to the Houma chiefs. In accordance with the policy of the United States at the time, bestowing these medals upon Indian leaders was the official manner of extending political recognition to an Indian tribe. Unfortunately, the United Houma Nation has been denied this status and now requests that the Congress take appropriate action to correct the situation by extending Federal recognition to the tribe.

Mr. President, as you are well aware, the current acknowledgment process administered by the Bureau of Indian Affairs is an inadequate method for processing the applications of Indian tribes seeking Federal recognition. This procedure is lengthy, cumbersome, and extremely expensive. At present, it takes the Bureau of Indian Affairs an average of 10 years to process an application, and there is a backlog of over 100 applications which have yet to be processed. On July 18, 1985, the Houma Tribe submitted a petition to the Bureau of Indian Affairs outlining the existence of the tribe from their early European contacts to the present day Houma community. Despite their comprehensive petition and detailed responses to inquiries made by the Bureau of Indian Affairs, the United Houma Nation appears to have made little progress in their quest for Federal recognition and must continue to wait for several more years before their petition will even be reviewed.

I understand that legislation is currently pending before the Senate Select Committee on Indian Affairs to reform the Federal acknowledgment process in order to facilitate the consideration of tribal applications for Federal recognition. I fully support this idea and have signed on as a cosponsor of S. 611 which was introduced by the distinguished chairman of the committee. While I commend the committee for their desire to improve the acknowledgment procedure, I do not feel that the consideration of such reform measures should prevent the Congress from taking action to correct this situation. Therefore, I ask my colleagues to carefully consider this legislation which would extend Federal recognition to the United Houma Nation of Louisiana.

By Mr. BAUCUS (for himself and Mr. CHAFEE):

S. 2424. A bill to amend the Internal Revenue Code of 1986 to provide for the imposition of certain excise taxes related to the enforcement of provisions of the Clean Air Act added by the Clean Air Act Amendments of 1990; to the Committee on Finance.

ENVIRONMENTAL EXCISE TAXES

● Mr. BAUCUS. Mr. President, previously, we considered and adopted an amendment to the clean air substitute measure deleting certain Federal fee collection authorities. This action was necessary because our colleagues in the House of Representatives had indicated that they believed that the fee provisions constituted revenue raising measures and infringed upon their Constitutional prerogatives.

At the time the amendment was adopted to strike the fee provisions, the distinguished Chairman of the Finance Committee, Senator BENTSEN, indicated his willingness to consider fee provisions similar to those contained in the clean air substitute as part of a 1990 tax measure. Today, I'm introducing legislation that contains the fee provisions that were stricken from the substitute amendment.

In order for the Environmental Protection Agency [EPA] to fully implement the provisions of the clean air amendments, it is essential that there be a dedicated revenue source to help fund the program. The Congressional Budget Office has estimated that a $15-per-ton Federal emissions fee would bring in approximately $90 million annually starting in 1993. That is a significant contribution toward the costs of implementing the new requirements. Other provisions of the bill would enable Federal collection of fees in the event that States fail to establish comparable mechanisms for assessing emission fees.

Mr. President, by introducing this measure today, we are making our intent clear to work toward establishment of a funding source for implementation of the clean air amendments. This measure serves as a basis for discussion of possible revenue provisions as the Finance Committee proceeds on the 1990 tax measure.●

By Mr. KERRY (for himself, Mr. BIDEN, and Mr. BRADLEY):

S. 2425. A bill to amend the Federal Election Campaign Act of 1971 to provide for a voluntary system of spending limits and public financing of Senate general election campaigns, to limit contributions by multicandidate political committees, and for other purposes; to the Committee on Rules and Administration.

SENATORIAL ELECTION PUBLIC FUNDING AND CAMPAIGN ACT

Mr. KERRY. Mr. President, on behalf of myself, Senator BIDEN, and Senator BRADLEY, I am introducing today the Senatorial Election Public Funding and Campaign Act of 1990.

We have introduced this legislation today because we believe that money is distorting the American political process.

There is a growing gap between the representative and the represented. The reason is an increasing perception that only those with access to huge sums of money can run for high office—and only those with huge sums of money can affect what happens in the Halls of Congress.

Someone once said, "money is the mother's milk of politics." Well, it's gone sour.

Too many have the perception that money has come to dominate the process of how laws get made—that the system is rigged—that special interests get special favors because they contribute money to politicians—and that some elected officials spend so much time and energy raising money that they aren't doing the jobs they were elected to do.

Now that we've passed a clean air bill, it is time to pass a clean campaign bill.

What this bill does is make a few critical changes to S. 137, the Boren-Mitchell bill. Each of us is a cosponsor of that bill, and we continue to support it.

Our bill adds voluntary public funding for general elections and creates an exemption from spending caps for small donations from voters within a candidate's own State.

An exemption for small donations from in-State voters was a key recommendation of the Bipartisan Task Force on Campaign Finance appointed by the majority and minority leaders earlier this year.

This exemption is one way to insure that campaigns can continue to organize grassroot support all the way through to election day—even while living within spending caps and accepting public funding as an alternative to larger donations.

There is a great irony here in our democracy. Recently, we have had a consensus in Congress that it is OK to spend public funds in elections to promote democracy abroad. We had no trouble, for example, agreeing to use public United States funds to support the opposition in the recent elections in Nicaragua. If we can spend the money to ensure fairness in Nicaraguan elections, we certainly ought to be able to do the same at home—particularly on a voluntary basis.

I have been working closely with Senator BOREN and the majority leader on their campaign finance

reform legislation as a member of the Democratic Task Force on Campaign Finance. They expect to bring a vehicle on campaign finance to the floor later this month or in May. When they do so, it is my hope that public funding will have received enough support that we can bring it to a vote on the floor as an amendment to the Boren-Mitchell bill.

I ask unanimous consent that this legislation be printed in full in the RECORD following my remarks, together with an analysis of the act and a chart listing the impact, State by State, of the system of spending caps and voluntary public funding established by this legislation.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 2425

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Senatorial Election Public Funding and Campaign Act of 1990".

SEC. 2. SPENDING LIMITS.

The Federal Election Campaign Act of 1971 (referred to as "the Act") is amended by adding at the end thereof the following new title:

"TITLE V—SPENDING LIMITS AND PUBLIC FINANCING FOR SENATE GENERAL ELECTION CAMPAIGNS

"DEFINITIONS

"SEC. 501. For the purposes of this title—

"(1) the term 'authorized committee' means, with respect to a candidate for election to a seat in the United States Senate, a political committee that is authorized in writing by the candidate to accept contributions or make expenditures on behalf of the candidate to further the election of the candidate;

"(2) the term 'candidate' means an individual who is seeking nomination for election, or election, to a seat in the United States Senate, and such an individual shall be deemed to be seeking nomination for election, or election, if the individual meets the criteria stated in subparagraph (A) or (B) of section 301(2);

"(3) the term 'eligible candidate' means a candidate who has made the filings prescribed by section 502 (a) and (b);

"(4) the term 'election cycle' means, with respect to an election to any Senate seat—

"(A) in the case of a candidate or the authorized committee of a candidate, the period beginning on the day after the date of the most recent general election for the seat that the candidate seeks and ending on the date of the next general election; or

"(B) in the case of other persons, the period beginning on the first day following the date of the last general election and ending on the date of the next election;

"(5) the term 'general election' means an election that will directly result in the election of a person to the office of United States Senator, but does not include an open primary election;

"(6) the term 'general election period' means the period beginning on the day after the date of a primary or runoff election, whichever is later, and ending on the first of—

"(A) the date of such general election; or

"(B) the date on which the candidate withdraws from the campaign or otherwise ceases actively to seek election;

"(7) the term 'immediate family' means—

"(A) a candidate's spouse;

"(B) a child, stepchild, parent, grandparent, brother, half-brother, sister, or half-sister of the candidate or the candidate's spouse; and

"(C) the spouse of a person described in subparagraph (B);

"(8) the term 'major party' has the meaning stated in section 9002(6) of the Internal Revenue Code of 1986 (the Presidential Election Campaign Fund Act), except that a candidate in a general election held by a State to elect a Senator subsequent to an open primary in which all the candidates for the office participated and which resulted in the selection of the candidate and at least one other candidate for the ballot in the general election, shall be treated as a candidate of a major party for purposes of this title;

"(9) the term 'primary election', with respect to an election for any Senate seat, means an election that may result in the selection of a candidate for the Senate on the ballot of in a general election;

"(10) the term 'primary election period', with respect to an election for any Senate seat, means the period beginning on the day following the date of the last Senate election for that seat and ending on the first of—

"(A) the date of the first primary election for that seat following the last Senate election for that seat; or

"(B) the date on which the candidate withdraws from the election or otherwise ceases actively to seek election;

"(11) the term 'runoff election', with respect to an election for any Senate seat, means an election held after a primary election for that seat, prescribed by State law as the means for determining the candidates that will be certified as nominees for the Senate;

"(12) the term 'runoff election period', with respect to an election for any Senate seat, means the period beginning on the day following the date of the most recent primary election for that seat and ending on the date of the runoff election for that seat;

"(13) the term 'Senate Account' means the Senate Election Campaign Account maintained, pursuant to section 506, by the Secretary of the Treasury in the Presidential Campaign Fund established by section 9006(a) of the Internal Revenue Code of 1986; and

"(14) the term 'voting age population' means the resident population, 18 years of age or older, as certified for a State pursuant to section 315(e).

"ELIGIBILITY TO RECEIVE BENEFITS

"SEC. 502. (a) To be eligible to receive benefits under this title, a candidate shall make the filings required by subsections (b) and (c).

"(b) To become an eligible candidate, a candidate shall, on the day that the candidate files as a candidate for the primary election, file with the Commission a declaration whether—

"(1) the candidate and the candidate's authorized committees agree to make expenditures for the primary election in an amount greater than the lesser of—

"(A) 67 percent of the general election spending limit applicable to the candidate under section 503(b); or

"(B) $2,750,000;

"(2) the candidate and the candidate's authorized committees agree to make expenditures for a runoff election, in an amount equal to no more than 20 percent of the general election spending limit applicable to the candidate under section 503(b); and

"(3) the candidate and the candidate's authorized committees agree to make expenditures for the general election in an amount equal to no more than the general election spending limit applicable to the candidate under section 503(b).

"(c) To become an eligible candidate, a candidate shall, not later than 7 days after qualifying for the general election ballot under State law or, if the candidate's State is one that has a primary election to qualify for the general election ballot after September 1, not later than 7 days after the date such candidate wins in such primary, whichever occurs first, file a certification with the Commission under penalty of perjury stating that—
